With respect to the subcommittee's 302(b) allocation, the bill as scored by the Congressional Budget Office is within both the budget authority and outlay. Let me say in passing that I am proud that the subcommittees on the Committee on Appropriations are very careful to stay within their 302(b) allocations. When the bills are reported from the full Appropriations Committee, those allocations are adhered to. That motion is always made by the ranking member, Mr. HATFIELD, on the condition that the bills stay within the 302(b) allocation, the bill as reported so that no point of order will lie against it once it is on the floor.

So for those who may be prone to say that domestic discretionary spending is where the answer lies with respect to securing the budget deficits, let them take note that the Appropriations Committee stays within its allocation.

I commend Senator LAUTENBERG, who is chairman of the subcommittee. He conducts his hearings early in the session and by the time the House appropriations bills come over to the Senate, the distinguished chairman, Mr. LAUTENBERG, is ready to mark up his bill in subcommittee, and quickly moves to mark up in the full committee.

He assiduously goes about his work. He does it well. His hearings are thorough. He is careful in his markups. I am grateful for it for he is a member of my committee. I always have his cooperation and support in the full committee. He has mine in the subcommittee.

I also wish to complement Mr. D'AMATO, the ranking minority member. Nothing is so helpful to a chairman as to have the ranking member who cooperates and works with the chairman. I used to be the chairman of this appropriations subcommittee on transportation. I know what it is to have the ranking member with whom one can work. I am especially fortunate in that I have Mr. HATFIELD, and he is the ranking member of the full committee. He is one that always works very closely with me and I enjoy his friendship in addition.

So I compliment these two men for their excellent work in accommodating the priorities of the Senate within the constraints of the budget. It is difficult. Their work was assisted by the cooperation of our colleagues on the subcommittee and on the full Committee on Appropriations.

I also want to compliment both the majority and the minority staff for their months of hard work—months of hard-work which has gone into the hearings, the markups, and in subcommittee; the work on the floor and the working conference.

So I compliment those fine staff people in connection with this legislation: Pat McCann, Peter Rogoff, Anne Miano, Joyce Rose, and Dorothy Pastis. This is a good bill considering the budgetary constraints we are operating under. It deserves the support of the Senate.

I again thank the chairman and ranking member for their good work.

Mr. LAUTENBERG. Mr. President, I thank the President pro tempore for his comments, for his encouragement, and for noting the fact that we proceed with dispatch. Senator D'AMATO and I moved this bill ahead. We do not let anything get in our way. I must note Mr. President, that standing right behind us often with a hand on our shoulder, and sometimes with a whip in the other hand, is the distinguished chairman of the Appropriations Committee who regularly informs us that our assignment is to get these bills done as rapidly and as thoroughly as we can.

Without Senator BYRD's encouragement and direction, we could languish around here forever. We would come to the end of the fiscal year unprepared to move ahead with continuing resolutions hanging above us, and not knowing which direction to take in the way we finance or appropriate funds for the next fiscal year.

So once again, I thank the distinguished chairman not only for his leadership and guidance in this matter but for all of those things that I have consulted with him upon over the years and all of the wonderful direction that he has given.

FISCAL YEAR 1991 DEPARTMENT OF TRANSPORTATION APPROPRIATIONS BILL

Mr. SIMPSON. Mr. President, I do want to thank my fine friends and colleagues, Senators LAUTENBERG and D'AMATO, for their willingness to include a provision in this bill that is so vitally important to my home State of Wyoming.

With regard to the weight of trucks on our Nation's highways, Wyoming is known as an "island State," meaning it is surrounded by States which allow heavier trucks to traverse their own highways than are allowed in Wyoming. The problem began in 1956, when the Wyoming State Legislature failed to include a provision in its statutes to implement the Federal Aid Highway Act of 1956 which would allow divisible load permits—a grandfathering provision. The surrounding States including Colorado, Montana, Utah, and Nebraska were grandfathered in and hence, Wyoming found itself at a great disadvantage. We have been operating for many years under temporary fixes to allow greater truck weights and it is finally time to permanently increase our truck weight maximum in order that we might simply match that of the surrounding States.

Our trucking industry is so vitally important to us in Wyoming; 60 percent of Wyoming communities are served only by highway transportation. Nothing else. We have no barges. We have no Amtrak, no other passenger rail transportation, and many communities are not served by any adequate air transportation services. Trucks then are the very lifeblood of the transportation system in our State.

This provision now makes Wyoming equal with its bordering States—nothing more. No advantage here. No detriment to the railroads. Just equality. We are known as the Equality State. This is a fine gesture for us in our centennial year. I appreciate my colleagues' willingness to accept this provision and to give Wyoming the assistance we so sorely needed.

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that the committee amendments be considered and agreed to en bloc, and that they be considered as original text for the purpose of further amendments.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2595

(Purpose: Technical amendment)

Mr. LAUTENBERG. Mr. President, I send to the desk four technical amendments en bloc and I ask for their immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from New Jersey [Mr. LAUTENBERG], proposes an amendment numbered 2595, en bloc.

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 9, line 18, after the numeral, insert: ", of which $7,000,000 shall remain available until expended".

On page 33, line 22, strike "28" and insert "23".

On page 34, line 12, strike "28" and insert "23".

Insert on page 70, before line 1, the following lead-in: "Subsections a(2), a(3), (b),

and (c) of section 104 of title 23, United States Code are amended as follows:".

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that the amendments be agreed to.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment (No. 2595) was agreed to.

Mr. LAUTENBERG. Mr. President, I move to reconsider the vote by which amendment was agreed to.

Mr. D'AMATO. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2596

Mr. LAUTENBERG. Mr. President, at this point I send an amendment to the desk proposed by Senator FORD and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from New Jersey [Mr. LAUTENBERG] (for Mr. FORD), proposes an amendment numbered 2596.

Mr. LAUTENBERG. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill, add the following new section:

SEC. 4. AUXILIARY FLIGHT SERVICE STATION PROGRAM.

(a) GENERAL RULE.—The Administrator of the Federal Aviation Administration shall develop and implement a system of manned auxiliary flight service stations. The auxiliary flight service stations shall supplement the services of the planned consolidation to 61 automated flight service stations under the flight service station modernization program. Auxiliary flight service stations shall be located in areas of unique weather or operational conditions which are critical to the safety of flight.

(b) REPORT TO CONGRESS.—Not later than 180 days after the date of enactment of this Act, the Administrator of the Federal Aviation Administration shall report to Congress with the plan and schedule for implementation of this section.

Mr. FORD. Mr. President, I want to commend the distinguished chairman and ranking member on their good work in seeing the transportation appropriations bill through. I also would like to add my support to the amendment to establish an auxiliary flight service station program. These flight service stations would provide important weather information to all pilots, information critical to safe flight.

The legislation would mandate that the Federal Aviation Administration report back to Congress with a list of manned flight service stations to be kept open, above and beyond the 61 automated FSS's scheduled to remain when the current FAA consolidation program is completed in 1993. The auxiliary stations are to be located in areas of unique weather or operations conditions—such as mountainous regions or along the coast. Those areas where bad weather is prone to crop up at a moment's notice.

This program is not a plan to save all of the remaining 143 flight service stations that are awaiting consolidation. Actually, it's an idea borrowed from former FAA Administrator, Adm. Don Engen. During his tenure at the FAA, the admiral testified on a few occasions to the fact that he expected to see more than 61 FSS's remain at the end of the consolidation program. He stressed that we need more than a piece of automated equipment or an hourly weather observation in these areas of rapidly changing weather conditions. We need the expertise of trained professionals familiar with local weather conditions.

Weather is the single greatest cause of aviation accidents. This small amendment will go a long way toward helping pilots get complete, accurate and up-to-date weather information, and in turn improving the overall safety record.

Mr. McCAIN. Mr. President, I rise in support of the amendment that would authorize an auxiliary set of flight service stations [FSS], to supplement the weather services provided by 61 automated flight service stations scheduled to be on line by the end of 1993.

The Federal Aviation Administration flight service station consolidation program was first implemented in 1981. This program has been criticized from its inception. While some of this criticism reflected a lack of understanding of the program, some of it was well-founded. This is particulary true where unique weather or operational conditions exist. The auxiliary FSS's mandated under this provision would be retained in these areas. These areas can't be served adequately by automated facilities which can be located hundreds of miles away.

Pilots depend on accurate and timely weather information, particulary when they plan to travel through regions with characteristically harsh conditions, or areas known to have storm systems move in quickly and unexpectedly. The obvious examples are mountainous and coastal regions.

The additional stations would allow pilots the accessibility they need to draw on the observations and advice of trained weather professionals, in regions of rapidly changing weather conditions. The auxiliary flight service station program would strike a better balance between the need to streamline the FSS organization, and recognize the diversity of the country's geography and weather.

There have been some questions regarding the scope of this amendment and I would like to ask the subcommittee chairman if he could clarify a few points.

Mr. LAUTENBERG. I will certainly try.

Mr. McCAIN. It is the Senator's view that this provision is intended to give the Administrator the broadest discretion in deciding whether a particular site needs some form of continued FSS service?

Mr. LAUTENBERG. Yes it is.

Mr. McCAIN. Does the chairman construe this provision as mandating any specific number of facilities?

Mr. LAUTENBERG. I would like to make it clear that the provision is only intended to give flexibility to FAA to deviate from its current consolidation program, as it decides is necessary for safety purposes in its professional judgment.

Mr. McCAIN. Will the chairman press this view in conference?

Mr. LAUTENBERG. Yes, it would be my intention that the conference report language makes it clear that we are not trying to restrict the FAA's safety experts but rather that we intend to assure that FAA has all flexibility it needs to see that safety is not adversely impacted.

I thank the chairman. I appreciate the good work of the chairman and ranking member on the fiscal year 1991 Transportation appropriations bill, and urge my colleagues to support the bill and this amendment.

Mr. President, I urge adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 2596) was agreed to.

Mr. LAUTENBERG. Mr. President, I move to reconsider the vote.

Mr. FORD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2597

Mr. D'AMATO. Mr. President, I send an amendment to the desk on behalf of Senator DOLE and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from New York [Mr. D'AMATO] (for Mr. DOLE), proposes an amendment numbered 2597.

Mr. D'AMATO. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the bill add the following:

"U.S. 54 INTERCHANGE PROJECT

"For the purpose of carrying out a demonstration of an improved interchange near a major municipal airport, there is hereby appropriated $10,900,000, to remain available until expended, for the acquisition of right-of-way, and other costs incurred in the con-

struction of an improved interchange at Kellogg (U.S. 54) and Dugan Streets in Wichita, Kansas. Provided, That all funds appropriated under this heading shall be exempted from any limitation on obligations for Federal-aid highways and highway safety construction programs: Provided further, That $10,900,000 of unobligated contract authority available for airport development and planning pursuant to section 505(a) of the Airport and Airway Improvement Act of 1982, as amended, is rescinded."

Mr. D'AMATO. Mr. President, this is an amendment that has been cleared on both sides of the aisle.

Mr. LAUTENBERG. Mr. President, I urge adoption of the amendment.

The PRESIDING OFFICER. If there be no further debate, the question is on agreeing to the amendment.

The amendment (No. 2597) was agreed to.

Mr. D'AMATO. I move to reconsider the vote by which the amendment was agreed to.

Mr. LAUTENBERG. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2598

Mr. D'AMATO. Mr. President, I send an amendment to the desk on behalf of Senator MURKOWSKI, myself, and Senator HEINZ. and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from New York [Mr. D'AMATO], for Mr. MURKOWSKI (for himself, Mr. HEINZ, and Mr. D'AMATO) proposes an amendment numbered 2598.

Mr. D'AMATO. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill, add the following:

SEC. . (a)(1) None of the funds appropriated by this Act may be obligated or expended to enter into any contract for the construction, alteration, or repair of any public building or public work in the United States or any territory or possession of the United States with any contractor or subcontractor of a foreign country, or any supplier of products of a foreign country, during any period in which such foreign country is listed by the United States Trade Representative under subsection (c) of this section.

(2) The President or the head of a Federal agency administering the funds for the construction, alteration, or repair may waive restrictions of paragraph (1) of this subsection with respect to an individual contract if the President or the head of such agency determines that such action is necessary for the public interest. The authority of the President or the head of a Federal agency under this paragraph may not be delegated. The President or the head of a Federal agency waiving such restrictions shall, within 10 days, publish a notice thereof in the Federal Register describing in detail the contract involved and the reason for granting the waiver.

(b)(1) Not later than 30 days after the date of enactment of this Act, the United States Trade Representative shall make a determination with respect to each foreign country of whether such foreign country—

(A) denies fair and equitable market opportunities for products and services of the United States in procurement, or

(B) denies fair and equitable market opportunities for products and services of the United States in bidding, for construction projects that cost more than $500,000 and are funded (in whole or in part) by the government of such foreign country or by an entity controlled directly or indirectly by such of foreign country.

(2) In making determinations under paragraph (1), the United States Trade Representative shall take into account information obtained in preparing the report submitted under section 181(b) of the Trade Act of 1974 and such other information or evidence concerning discrimination in construction projects against United States products and services that are available.

(c)(1) The United States Trade Representative shall maintain a list of each foreign country which—

(A) denies fair and equitable market opportunities for products and services of the United States in procurement, or

(B) denies fair and equitable market opportunities for products and services of the United States in bidding,

for construction projects that cost more than $500,000 and are funded (in whole or in part) by the government of such foreign country or by an entity controlled directly or indirectly by such foreign country.

(2) Any foreign country that is initially listed or that is added to the list maintained under paragraph (1) shall remain on the list until—

(A) such country removes the barriers in construction projects to United States products and services;

(B) such conutry submits to the United States Trade Representative evidence demonstrating that such barriers have been removed; and

(C) the United States Trade Representative conducts an investigation to verify independently that such barriers have been removed and submits, at least 30 days before granting any such waiver, a report to each House of the Congress identifying the barriers and describing the actions taken to remove them.

(3) The United States Trade Representative shall publish in the Federal Register the entire list required under paragraph (1) and shall publish in the Federal Register any modifications to such list that are made after publication of the original list.

(d) For purposes of this section—

(1) The term "foreign country" includes any foreign instrumentality. Each territory or possession of a foreign country that is administered separately for customs purposes shall be treated as a separate foreign country.

(2) Any contractor or subcontractor that is a citizen or national of a foreign country, or is controlled directly or indirectly by citizens or nationals of a foreign country, shall be considered to be a contractor or subcontractor of such foreign country.

(3) Subject to paragraph (4), any product that is produced or manufactured (in whole or in substantial part) in a foreign country shall be considered to be a product of such foreign country.

(4) The restrictions of subsection (a)(1) shall not prohibit the use, in the construction, alteration, or repair of a public building or public work, or vehicles or construction equipment of a foreign country.

(5) The terms "contractor" and "subcontractor" includes any person performing any architectural, engineering, or other services directly related to the preparation for or performance of the construction, alteration, or repair.

(e) Paragraph (a)(1) of this section shall not apply to contracts entered into prior to the date of enactment of this Act.

(f) The provisions of this section are in addition to, and do not limit or supersede, any other restrictions contained in any other Federal law.

Mr. MURKOWSKI. Mr. President, I offer an amendment that would prohibit foreign company participation in public works projects appropriated by this bill, if the United States Trade Representative rules that reciprocal access to foreign public works project is not available.

The timing of this amendment is crucial. August 2 and 3 the United States and Japanese Governments enter talks which review a bilateral agreement on United States access to public works in Japan to determine if there has been progress in this arena and if the agreement is being adhered to.

Mr. President, there are serious allegations that our bilateral agreement has been violated on the first major contract awarded under that agreement, a part of the Kansai International Airport in Japan. The Japanese press is filled with story after story of illegal price fixing in the Japanese construction market. It even has a name: it is called "dango" in Japanese. We have just learned that the winner of that first major project at Kansai, the Niigata Engineering Co., is one of the 100 Japanese construction companies sentenced to pay damages to the United States this year for illegal price fixing at a United States naval base in Japan.

Let me point out that the Japanese construction market is larger than the United States construction market, some $50 billion larger. And yet the Japanese have around 2.5 billion dollars' worth of construction work in the United States annually, while the United States has done only 200 million dollars' worth of construction work in Japan, in total. Not annually, in total.

Mr. President, the second major contract at Kansai will be awarded any day. This is why we must now take a stand on this issue. We must begin the process today on this appropriations bill which includes funding for public works projects that foreign countries may participate in.

We can no longer afford to sit by and hope that our trading partners will offer us the benefits we offer to them so freely. We definitely cannot sit by and watch our bilateral agreements be brushed aside.

Mr. President, I urge that my colleagues adopt this amendment. Should we find in our bilateral talks carried out this week that access will undoubtedly be granted to U.S. companies, this amendment can be dealt with in conference. But the message today must be clear—we take our bilateral commitments seriously, and so must our partners.

Mr. D'AMATO. Mr. President, I propose this amendment on behalf of Senator MURKOWSKI, and myself. Senator HEINZ also joins us as a cosponsor. This amendment, commonly known as the Murkowski-Brooks amendment, will bar Japanese companies and their subcontractors from federally financed public works projects in the United States for lack of reciprocal access for American companies in Japan.

In the last few days, it has been brought to my attention that the recent awarding of the contract for the automated guideway transit system at the Kansai International Airport was direct violation of the 1987-88 bilateral construction agreement. This is not the first time and will not be the last time that the Japanese market has been closed out to American companies.

The award violated rules of the bidding process to the disadvantage of other qualified bidders, including the submission by AEG Westinghouse, headquartered in Pittsburgh, PA.

Specifically, Mr. President, the Kansai International Airport Co. [KIAC] violations include:

Failure to open the bids in public;

Acceptance of an unreasonably low bid;

Failure of KIAC to adhere the requirements of their own technical specifications. The company that received the award has no experience in airport transit systems. Furthermore, they have no experience in unmanned, fully automated operations, and "failure to provide evaluation criteria to bidders.

The case before us strongly suggests that the Japanese construction market has in fact been closed out to our American companies. This is outrageous and demands our prompt attention.

American companies spend millions of dollars and years working to compete for contracts abroad. They aggressively pursue work based on the good-faith bilateral agreements that are negotiated to ensure open and fair trade.

Reciprocity. That is what we ask. And, we will not budge until American companies are treated with reciprocity in their efforts to compete abroad. This amendment is intended to send a strong message to the Government of Japan:

It is fair trade or it is no trade.

Denial of fair and equitable market opportunities for U.S. bidders will not be tolerated.

AEG Westinghouse has requested KIAC to submit a formal explanation of the selection process. The answer they received was only a perfunctory response. They have also requested USTR and the Department of Commerce to lodge a formal protest against the award on the basis of the above-mentioned violations.

Mr. President, the United States negotiating team met with the Government of Japan on August 2, and I sent a letter to Secretary Mosbacher on August 1, strongly urging the executive branch to make this issue their highest priority in their negotiations. My colleagues and I are extremely concerned about the fair and equitable treatment of companies abroad. We look to the administration to take appropriate action to help remedy this situation.

Thank you, Mr. President. I urge adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 2598) was agreed to.

Mr. D'AMATO. Mr. President, I move to reconsider the vote.

Mr. LAUTENBERG. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2599

Mr. HEINZ. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Pennsylvania [Mr. HEINZ], for himself, and Mr. SPECTER, proposes an amendment numbered 2599.

Mr. HEINZ. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 66, strike lines 14 through 25.
On page 67, strike lines 1 through 17.

Mr. HEINZ. Mr. President, this amendment strikes section 329 of the committee bill. It is a provision of the bill that affects only one State, Pennsylvania. It would have the effect, if we left it in this bill, of subjecting our Commonwealth and losing some 25 percent of its Federal highway money, and the State government did not comply with a mandate imposed under this provision. That mandate is that the Commonwealth of Pennsylvania would have to dedicate a tax-based source of revenues to funding one or more mass transit authorities in our State.

Let me say at the outset, Mr. President, that the Senator from Pennsylvania, Senator SPECTER, and I—and this amendment is offered on behalf of both of us—in fact, support and have urged our State legislature to act and to put into the law a dedicated source of revenue for mass transit in our State. We believe it is very important that that be done. We will continue to speak out publicly on the record, urging our authorities in Pennsylvania to do that. We have that right. We are their constituents.

Mr. President, where we part company is in Federal legislation that tells our State legislature to do something that is none of the business of the Federal Government to tell them to do, whether they are right or wrong.

The provision in this legislation puts a Federal gun to the head of our State legislature and administration and says, "we are going to pull the trigger on your highway money, up to $142 million of it, unless you do what the Federal Government, Big Brother, in Washington says."

Mr. President, that is not the way we should be making policy. We have a responsibility in the Senate to address Federal issues and questions of national interest. In this case, we are turning the question of Federal interests on its head.

This is a provision unique to our State. It affects only our State, and we believe our State should be given the chance to solve this problem without being coerced. In that regard, our State nearly did solve it this year. We came to within just a few votes in our State legislature of getting this done without any help from Washington, DC.

It is, therefore, with a great deal of sincerity, that I ask our colleagues to give the State of Pennsylvania the time it needs to do what is right.

At this time, Senator SPECTER and I are constrained to oppose it. We oppose it on the principle that the Federal Government should not do this. The president pro tempore of the Pennsylvania State Senate strongly opposes it. It is a provision that the Casey administration says they do not support, although I must tell you that, as far as I can tell, they have not taken a position one way or another. So it is accurate to say they do not support it.

But in one other sense they have not made up their minds. I could understand if there was a Federal interest involved here, if these were Federal contracts or Federal lands or bases, if these were things where the Federal Government had a direct interest, I could not make the argument, at least as strongly as I make it today. But I urge our colleagues to please give our State its right and due to make this decision on our money.

Mr. President, I yield the floor.

Mr. SPECTER. Mr. President, this is a difficult matter for the Senator from the Commonwealth of Pennsylvania, because the underlying issue on the merits pits one part of the State against another.

On the merits, there ought to be a dedicated source of revenue, but it is totally inappropriate to have that conclusion dictated by the Congress of the United States, starting with legislation in the transportation bill. It is a matter that has been very, very controversial in the State assembly, and the matter really has to be resolved by the State assembly.

Senator HEINZ noted that he and I have spoken out in favor of the facts. I will specify the consideration and have, in fact, introduced legislation which, instead of penalizing the State for not having a dedicated source of revenue, the current state of revenue by providing a bonus, perhaps that kind of a carrot as opposed to the stick would be the appropriate way to solve this problem. And there are funds in the highway trust fund for urban mass transit which could be used for this purpose. So it is with reluctance that we have to follow this course. But Washington, DC, may not, cannot, should not fairly dictate to Harrisburg, PA, on this issue.

Mr. President, the fiscal year 1991 transportation appropriations bill contains a provision which is designed to provide a dedicated source of funding for mass transit systems in the Commonwealth of Pennsylvania. I support the establishment of a dedicated source of funds for mass transit in Pennsylvania, but do not support the approach taken by the provision contained in the transportation appropriations bill.

The Commonwealth of Pennsylvania is a particularly transit-intensive State. Its 22 urban and 18 rural public transportation systems serving 48 of the 67 counties where nearly 94 percent of the State's population resides. In Philadelphia, the Southeastern Pennsylvania Transportation Authority [SEPTA] serves over 3 million people in the Delaware Valley, with over 1.2 million trips by Pennsylvania each day. The Port Authority of Allegheny County [PAT] serves over 1.6 million people and carries nearly 90 million passengers a year. Other cities across the Commonwealth are equally dependent on mass transit.

The provision in the bill which my colleague from Pennsylvania and I object to provide that Pennsylvania's fiscal year 1991 highway dollars for Federal-aid highways and highway safety construction programs shall be cut by 25 percent, unless the Commonwealth's State legislature and Governor establish a dedicated source of revenue for mass transit by July 1, 1991. The amendment which my colleague and I are proposing will strike out the provision, because it is simply not tolerable for the Federal Government to be dictating the needs and desires of one specific State. This, I contest, is not an appropriate approach by the U.S. Senate.

Mr. President, the merits of a dedicated source of funding for mass transit are such that I recently introduced a bill, S. 2943, to provide an incentive for States to establish such a source of funding. It is my belief that if the Federal Government is to insist on State and local funding commitments, then a bonus system should be in place to those States that implement a permanent, predictable source of funds. To this end, my bill provides a mechanism that will guarantee to transit authorities, local governments, and States, that, if they provide a dedicated source of funding for transit, they will receive support from the Federal Government for their operating and capital expenses. To fund this incentive mechanism, my bill turns to the uncommitted balance of the transit account of the highway trust fund, which is expected to have an uncommitted balance of $2.5 billion by the end of fiscal year 1990. This, I believe, is the appropriate approach.

Mr. President, the transit systems in the Commonwealth greatly need a dedicated source of funding. Between 1980 and 1988 Federal operating support for transit has dropped from 17.3 percent of transit operating revenue to 6.2 percent, or a decrease of 64 percent. The Southeastern Pennsylvania Transportation Authority's [SEPTA] only source of funds are the farebox and Government subsidiaries. Therefore, SEPTA's Federal operating assistance has fallen from $61 million in 1980 to $28 million in 1989, or a 54-percent reduction. In addition, SEPTA's capital Federal funding has dropped from $170 million in 1980 to $88 million in 1989, or a 48-percent reduction. Consequently, over the past several years, SEPTA has been depending on Federal subsidies to support nearly 80 percent of its capital projects.

SEPTA, and the other transit authorities in Pennsylvania, need additional assistance, whether it be Federal or State assistance. I would agree that a dedicated source of funds is an urgency for these transit authorities, but I question the procedure through which the Transportation Appropriations Committee has chosen to establish such a source of funds in my State.

Mr. President, the bill before us would restrict $142 million of Pennsylvania's Federal highway allotment for fiscal year 1991 unless the Commonwealth concurs with the wishes of the Transportation Appropriations Committee. I would point out that Pennsylvania's State Legislature attempted last June to pass a dedicated source of funds for mass transit, but was unsuccessful. If this year's assembly is any indication of the legislature of 1991, Pennsylvania can count on losing 25 percent of its Federal highway dollars—dollars that Pennsylvanians have already paid to the Federal Government through the national gas tax.

It is my understanding that legislators in Harrisburg, Pennsylvania's State Capital, intend to reintroduce the legislation to establish a dedicated tax for mass transit. However, there is no guarantee that it will pass both bodies of the legislature by July 1, 1991, as required under the bill.

I urge my colleagues to consider the precedent such a move the Transportation Appropriations Subcommittee is taking. Yes, the Congress has imposed its position in the past by restricting Federal highway dollars, but to the best of my knowledge, the Congress has never threatened to restrict Federal highway dollars to force one State to act in the interest of the Federal Government.

I submit, Mr. President, that if we are to impose our views on States, then we should encourage through incentives, not force through penalties. I urge the adoption of this amendment, and expeditious consideration of my bill.

The PRESIDING OFFICER (Mr. PRYOR). The Senator from New Jersey.

Mr. LAUTENBERG. Mr. President, I rise to respond to the Senators from Pennsylvania and to indicate my opposition to the motion offered by the Senator from Pennsylvania to strip from this bill section 329, which withholds highway funding from Pennsylvania in the interest of encouraging that State to provide adequate support to the fourth largest mass transit system in the entire country which is in Philadelphia which carries 1.2 million passengers each and every day, that is, workdays.

First, let us be clear about how this provision came about. The Senator from New Jersey was not the one who put this provision in the bill initially. It came from the House. The other body, in response to the pleas from the majority whip and a bipartisan group of Members from Philadelphia, included this provision in the bill that was sent to the Senate. I was asked my views on the substance of this matter. I support the substance of this provision for several very sound reasons.

The provision contained in the bill when it arrived at my subcommittee was left intact. We had a subcommittee markup. There was no opposition expressed on this provision. We had a full committee markup. Once again there was no opposition expressed.

No opposition was raised to this amendment during full committee markup even though we have able representation from the State of Pennsylvania on the full committee. Now at

this late date opposition has been raised.

The Senate is told that this is a local matter best settled at the local level and that the provision impacts only one State, Pennsylvania. This provision denies highway funding to one State only, Pennsylvania, but the current dismal financial situation facing mass transit in Philadelphia impacts on all riders of the SEPTA system whether they live in Pennsylvania, New Jersey, Delaware, or whether they travel to that historic city and use the system.

Thousands of trips on the SEPTA system per day begin in Wilmington, DE, or Trenton, NJ, or other parts outside the State of Pennsylvania.

The figures available do not count those who use the PATCO high-speed line from New Jersey to Philadelphia or those who park and ride the system.

In supporting this provision, the Senator from New Jersey is not just supporting the many Philadelphians who are demanding a dedicated source of support for SEPTA. I have in mind my constituents who use this system daily. I have in mind the New Jersey residents injured when the bottom fell out of a SEPTA train in Center City and killed and injured scores of people.

The Senator from New Jersey, is no enemy of Philadelphia or her people. In fact, I was once introduced by the mayor of that fine city as if I were a native son. We have indeed a great number of common interests. I admire Philadelphia. I love her history and the people that inhabitat that city and I am mindful of her needs.

A dedicated source of revenue for SEPTA is the highest priority that system has in Harrisburg, and they have a lot of support for that proposition.

The National Transportation Policy fashioned by the Secretary of Transportation, Sam Skinner, and supported by President Bush clearly calls upon State governments to pull their share of the load when it comes to funding mass transit. Secretary Skinner and UMTA Administrator Brian Clymer, who is a former board member of SEPTA, do not tire of telling me what an abysmal job Pennsylvania has done of supporting Philadelphia's mass transit system needs.

Every State in this country, save one, with a transit system of any appreciable size, has taken action at the State level to insure a dedicated source of support for mass transit. Only one State—Pennsylvania—insists on seeking Federal contributions to its capital plant and putting in only enough money of its own to match Federal dollars and nothing more.

Mr. President, I agreed with the leadership and the Senators from Pennsylvania not to seek a rollcall vote on this amendment in order that this important bill not be held hostage and action on it be delayed. However, I wish to make it loud and clear that I object to this amendment. The issue is going to be considered again and I will do whatever I can to seek the safest and most efficient transit system for the people in my State of New Jersey and the State of Delaware, and Pennsylvania and the city of Philadelphia who rely on SEPTA.

Mr. President, according to the Southeastern Pennsylvania Area Coalition for Transportation, a coalition of business, labor, churches, schools, civic and environmental organizations supporting a dedicated source of revenue for SEPTA, that system needs $4.5 billion over the next 10 years to rehabilitate its capital plant. At the rate they are going, $1 billion is the best they can hope for. That's a $3.5 billion shortfall, and who is supposed to make up the difference, the Federal Government?

In fiscal year 1978, SEPTA received from all sources $234 million for mass transit capital projects. In fiscal year 1990, it is estimated that SEPTA will have about $112 million to work with. It is clear to me that if Pennsylvania does not join the other States which have decided to carry their share of the load in providing mass transit, the Federal Government does not have either the fiscal capacity or the inclination to bail them out.

Mr. President, I know the general manager of the SEPTA system, Mr. Louis Gambaccini, very well. Mr. Gambaccini served as commissioner of transportation for the State of New Jersey and on the staff of the Port Authority of New York and New Jersey. I served as a commissioner of the Port Authority before being elected to the Senate. Mr. Gambaccini has made his need for a dedicated source of support very clear to me and anyone who will listen to him. Quite properly, Mr. Gambaccini is held in high regard in Philadelphia for his efforts to turn SEPTA around and for pulling together the local community behind his goals. I think it's time someone gave Mr. Gambaccini some help.

Recently, the State legislature in Pennsylvania voted down the possibility that SEPTA could receive support from the State gas tax, which is limited only to highways. The State legislature was given an opportunity to avoid exactly the situation we find ourselves in at the moment, and they flatly turned it down. The margin of defeat was about six votes. There were six votes cast by Republican legislators from Philadelphia. I regret the action by the Pennsylvania Legislature to refuse to take a step already taken by almost every other State, but the Federal Government should not have to shovel more and more Federal money to Pennsylvania to redeem the reputations of six recalcitrant legislators.

Mr. President, I ask unanimous consent to print in the RECORD the impressive list of members of the Southeastern Pennsylvania Area Coalition for Transportation, an editorial from the Philadelphia Inquirer, and an article from that same paper dated August 3 which notes that Temple University law professor Charles H. Rogovin, a member of the SEPTA board had resigned, "citing overwhelming time demands brought on by the transit agency's worsening financial prospects."

There being no objection, the material was ordered to be printed in the RECORD, as follows:

A LEADERLESS CAUSE—USING GASOLINE TAXES FOR MASS TRANSIT

It is time for the legislative bloc from Southeastern Pennsylvania to provide some real leadership to push through a constitutional amendment that would allow the state's gasoline-tax revenues now restricted for highway construction to be used for mass transit as well.

Californians voted just last week to double their state's gas tax as a way to improve both highway and mass transit systems. The fact that traffic jams and smog have reached emergency proportions in places such as Los Angeles does not mean that Pennsylvanians should be too smug about smog.

It is time the highway interests got together with the mass transit interests and cut a deal on behalf of the public interest. Fortunately, momentum is building toward that goal.

Led by Bucks County Commissioner Andrew Warren, commissioners from 10 counties went to Harrisburg last week to talk with key legislative leaders about the need for more state support for mass transit. The Southeastern Pennsylvania Coalition for Transportation passed a resolution last week in support of using the gas tax for public transit. The coalition represents business, labor, senior citizens, academic, religious and other community groups. The next effort will be to redirect into the gas tax fight the energy that the Consumers Education and Protective Association and other ridership groups put into fighting the recent SEPTA rate hikes.

The problem is that legislative leaders—perhaps taking their cue from the governor—have been unwilling to stand up and lead. Legislators such as Senate Majority Leader F. Joseph Loeper (R., Delaware) say they are waiting for grass-roots support before getting too far out in front. On the Senate side there's also been unaccountable silence from Richard Tilghman (R., Montgomery) and Vincent Fumo (D., Phila.).

House Speaker Robert W. O'Donnell (D., Phila.) is at least a co-sponsor (along with 42 other House members) of Rep. Gordon Linton's (D., Phila.) bill that would allocate gas tax revenues for mass transit. But virtually nothing has been heard from such putative leaders as Reps. Matthew Ryan (R., Delaware), Max Pievsky (D., Phila.) and Joseph Pitts (R., Chester).

In order for the state to give the voters the option of passing the motor fuels amendment next year, the legislature must pass the constitutional amendment bill by June 30. (Even so it could not complete the ratification process before May 1991. If it doesn't pass by June 30 it could not be enacted until 1993.) Delay would only leave even less appealing alternatives, such as an increase in the sales or income taxes.

MONTCO MEMBER QUITS SEPTA PANEL

(By Jerry W. Byrd)

Temple University law professor Charles H. Rogovin, who has represented Montgomery County on the SEPTA board of directors since May 1988, has resigned.

Citing overwhelming time demands brought on by the transit agency's worsening financial prospects, Rogovin informed Montgomery County Commissioners Chairman Paul B. Bartle of his decision Wednesday.

In his letter to Bartle, Rogovin said that Temple law students were his first concern.

SEPTA's problems "are now approaching the crisis point . . . and there has been a correlative increase in the time demands upon members of the SEPTA board," the letter said. "For me this has meant less and less time available to address other responsbilities. . ."

Bartle yesterday replaced Rogovin with Republican Commissioner Floriana M. Bloss of Plymouth Township. The term expires Sept. 1, 1994. She joins Frank W. Jenkins of Ambler, the county's other representative on the SEPTA board.

"I welcome the opportunity to serve," Bloss said yesterday. "One of the things I'm particularly interested in is exploring further a possible dedicated funding source for SEPTA, and looking into wherever we can cut costs, if that's possible."

Bloss also said she would fight plans to eliminate the Route 91 bus to the county prison at Eagleville. That cost-cutting measure would cause a hardship for prisoners and their families, she said.

Democratic minority Commissioner Rita C. Banning opposed the Bloss appointment as she opposed Jenkins' and Rogovin's selections.

"I don't think that this traditional political approach has been very successful with SEPTA," Banning said. "I had thought it would perhaps be helpful to have someone who is more allied with general consumer as opposed to partisan interests."

Bartle said Bloss had expressed an interest in serving on the board.

"She can intimately respond to questions the commissioners have and can give a view of what's happening down there," Bartle said.

Rogovin replaced Lewis F. Gould, Jr., who resigned from the board in March 1988. Rogovin could not be reached for comment yesterday.

Judith Harris, deputy chairwoman of the SEPTA board, said Rogovin would be missed. "He brought a fresh look to old issues and a critical look to new issues facing SEPTA," she said yesterday.

"I understand why he did what he did," she said. "The time commitment is substantial to start with, and Charlie also served on several committees."

She said board members spent many hours going over funding proposals and reviewing the impact of litigation on the agency.

Mr. LAUTENBERG. Mr. President, I have a responsibility to the people of my State who use the SEPTA system to insure that it is a save and efficient mode of transportation. We have seen the consequences of neglect and we should suffer them no longer.

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. ROCKEFELLER. I wonder if the Senator from Pennsylvania [Mr. HEINZ] will yield for a question.

Mr. HEINZ. I yield.

Mr. ROCKEFELLER. Mr. President, will the Senator go over what he has said earlier about the efforts of the Governor and the State legislature to try to resolve this problem for the benefit of the Senator from West Virginia?

Mr. HEINZ. Yes. Earlier this year the Pennsylvania Legislature brought to a vote an increase in revenue to be dedicated to mass transit in southeastern Pennsylvania, and it was lost by one vote. It was an issue that I think will be resolved next time.

I might also add that there are many people in our State who would like to have the issue of mass transit financed from a gas tax, and that may be a good way to do it. But under Pennsylvania's constitution it requires a constitutional amendment which clearly you cannot do by October 1 of this year. You may not even be able to do it by July 31 of next year. Under this amendment, of course, we would lose $142 million if the legislature decided to fund mass transit with a gas tax. So this imposes a very difficult burden on the State in terms of the way it goes about solving its problems.

Mr. ROCKEFELLER. Mr. President, I thank the Senator from Pennsylvania. I served as Governor of the State of West Virginia for 8 consecutive years, as the Presiding Officer served as Governor of the State of Arkansas. And I am very familiar with a State that is trying to work out problems that are expensive. There are conflicts with the legislature. One comes very close. In fact, one comes within one vote. And then there is always next year.

I am not a player in this bill, but it just seems to me that if both the Senators from the State of Pennsylvania object to being talked to or mandated by the Federal Government in this sense, and if at the same time they are indicating that there is every possibility this will happen in the following year, and in fact the State officials and the Governor are trying to get this done, it seems to me rather awkward and perhaps improper for the Senate to be imposing its will in this fashion.

Mr. HEINZ. Mr. President, I thank the Senator from West Virginia for his very thoughtful remarks.

The PRESIDING OFFICER. The Senator from Pennsylvania is recognized.

Mr. HEINZ. I think we are ready to vote, Mr. President.

Mr. LAUTENBERG. I agree.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Pennsylvania.

The amendment (No. 2599) was agreed to.

Mr. HEINZ. Mr. President, I move to reconsider the vote.

Mr. LAUTENBERG. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAUCUS. Mr. President, I rise for two purposes; first, to commend the Senator from New Jersey for excellent work in putting together this transportation appropriations bill. It contains many provisions which are not only important to the country but also very important to the Western United States, a part of our country which is thinly populated, not nearly as populous as is the State of New Jersey.

I might add, Mr. President, that in my home State of Montana, there are about five persons per square mile. In the State of New Jersey, on the other hand, there are about 1,000 persons per square mile.

The Senator from New Jersey is very broadminded and he has produced a bill that not only accommodates the interests of the more populous Eastern United States, as well it should, but also is very accommodating to interests of the Western United States. I commend the Senator for his excellent leadership.

The second reason I rise, Mr. President, is to urge the chairman, the Senator from New Jersey, and other members of the Appropriations Committee who go to conference with the House to stand by the Senate level for essential air service. The Senate bill provides approximately $26 million for essential air service, a program that is critical to rural America, particularly cirtical to parts of America in the West that are very sparsely populated and where the distance between cities is great; in fact, frankly, Mr. President, much greater than I think most people in the East realize.

Regrettably, the House provided only about $23 million for essential air service. That might not sound like a major difference, but unfortunately if the House level prevails, 10 to 12 communities in America will no longer have essential air service. That means in all probability they will not have any commerical air transportation whatsoever.

I strongly urge the chairman of the Appropriations Committee and the chairman of the Transportation Subcommittee to support the Senate levels, because I do not think we can afford at all to have 10 to 12 American cities which no longer have essential air sevice, particularly two cities in my home State of Montana: Miles City, MT, and Lewistown, MT, which I am told would no longer have essential air service if the House provision were to prevail.

So I urge my Senate colleagues who are on the conference very aggressively to stand up for the Senate provision.

I again thank the Senator from New Jersey for his excellent leadership.

Mr. LAUTENBERG. Mr. President, the Senator from Montana could not be more correct about the value of essential air service. I visited Montana with him just last weekend. I was coming from the State of New Jersey, the most densely populated State in the Union. One cannot help but be impressed by the vast distances and the remote terrain.

I understand that as a result of that visit, EAS means to isolated communities without air service. Aviation has become the backbone of our economic system, the centerpieces of our infrastructure. No other country has the kind of aviation system that we have. We built dependence on it. We recognize its importance.

And, of course, sitting by my side for all practical purposes is the distinguished Senator from West Virginia, the chairman of the committee, who has more than once indicated to me how important essential air service is to his State; and both Senators from Nebraska. Senator EXON is constantly reminding me about how important that service is, as well as Senator KERREY. Also, Senator DASCHLE, people who come from States that are somewhat remote, that have big distances.

In my State, it would be hard to use essential air service. We would not know where to take off and where to land. But in other States, I recognize the importance.

I am determined, with the encouragement of the Senator from Montana, to do whatever I can in conference to hold the higher level. I am assured by my distinguished colleague, Senator D'AMATO, that he will do the same.

Mr. D'AMATO. I might say to the distinguished chairman, sometimes people think New York State is New York City. I want you to know that we have many small airports and a great rural area in our upstate communities, and we are certainly desirous of protecting this program.

Mr. DOMENICI. Mr. President, I rise in support of the Transportation appropriations bill reported by the Senate Appropriations Committee.

This bill provides $13.2 billion in new budget authority and $29.5 billion in outlays for the Department of transportation and Related Agencies.

I particularly appreciate the subcommittee's support for a nondestructive evaluation center to develop and demonstrate state-of-the-art technology to screen and inspect aging aircraft.

Mr. President, I believe it is important to recognize that this bill does not meet its 302(b) allocation for outlays. The bill is $5 million over in outlays.

The overage arises from the bill's inclusion of the sale of railroad rehabilitation loan assets, with a face value of $32 million, that yields $8 million in outlay savings. CBO scores this assist sale as a legitimate offset to the spending in the bill, the Budget Committee does not.

This scoring adjustment by the Budget Committee is nothing new. I have objected to this maneuver by the subcommittee for several years now. Last year I signed the fiscal year 1990 Transportation Appropriations Conference Report with the exception of this provision.

The Senate has long recognized that one-time savings from the sale of Federal assets should not be used to offset ongoing spending. Gramm-Rudman does not count asset sales; and we should not do so now.

Mr. President, I also wish to point out that this bill assumes that Coast Guard funding will be supplemented by $300 million to be provided in the defense appropriations.

I admit that this is not new. Appropriations bill for the last 5 fiscal years have included such transfers, including $650 million last year. Yet, I am troubled that this bodes ill for the Congress' ability to live up to any future budget agreement that attempts to set spending levels for defense and nondefense programs.

The Congress has not adopted a fiscal year 1991 budget. To allow the Appropriations Committee to move their bill, the Senate adopted a resolution that provided an allocation to the Appropriations Committee until the budget summit reaches an agreement.

I must caution my colleagues that we will have to revisit appropriations bills when the Budget summit reaches an agreement.

In the absense of a budget summit agreement, we face at least an $84 billion sequester that would be disastrous for the programs in this bill, much worse than any reduction the summit would produce.

Mr. ROBB. Mr. President, as we consider the Department of Transportation appropriations for fiscal year 1991, Mr. WARNER and I would like to bring to attention a much needed highway improvement project in the Hampton Roads area of Virginia.

The Commonwealth will qualify for Interstate 4-R discretionary funding at the conclusion of fiscal year 1990 and will request consideration of such funding for Interstate 64 between Route 44 and Indian River Road in the cities of Virginia Beach, Norfolk, and Chesapeake. This is the fastest growing region in our State, a growth which puts an overwhelming strain on the aging infrastructure. Priority designation for this project would be helpful to the Commonwealth's request.

Mr. President, we therefore request that the Interstate 64 project be included in the Interstate 4-R Discretionary Program section of the conference report on H.R. 5229.

Mr. LAUTENBERG. I am glad the Senators from Virginia have brought the Interstate 64 improvement project to my attention. As they know, I believe that maintaining and improving our transportation infrastructure is of the highest priority. I understand that this request came to the attention of the committee too late to be considered as part of the Senate bill. I assure the Senators that I will give their request the highest level of consideration.

Mr. SIMPSON. Mr. President, I do want to thank my fine friends and colleagues, Senators LAUTENBERG and D'AMATO, for their willingness to include a provision in this bill that is so vitally important to my home State of Wyoming.

With regard to the weight of trucks on our Nation's highways, Wyoming is known as an "island State"—meaning it is surrounded by States which allow heavier trucks to traverse their own highways than are allowed in Wyoming. The problem began in 1956 when the Wyoming State Legislature failed to include a provision in its statutes to implement the Federal Aid Highway Act of 1956 which would allow divisible load permits—a "grandfathering provision". The surrounding States including Colorado, Montana, Utah, and Nebraska were "grandfathered in" and hence, Wyoming found itself at a great disadvantage. We have been operating for many years under temporary fixes to allow greater truck weights and it is finally time to permanently increase our truck weight maximum in order that we might simply match that of the surrounding States.

Our trucking industry is so vitally important to us in Wyoming. Sixty percent of Wyoming communities are served only by highway transportation. Nothing else. We have no barges. We have no Amtrak, no other passenger rail transportation, and many communities are not served by any adequate air transportation services. Trucks then are the very life blood of the transportation system in our State.

This provision now makes Wyoming equal with its bordering States—nothing more. No advantage here. No detriment to the railroads. Just equality. We are known as the equality State. This is a fine gesture for us in our centennial year. I appreciate my colleagues' willingness to accept this provision and to give Wyoming the assistance we so sorely needed.

BRADLEY AIRPORT

Mr. LIEBERMAN. Is it the distinguished chairman's understanding that Bradley Airport, which is on the Airport Improvement Program list for discretionary funding for airport improvements, has already made improvements in the runways and airport facilities at a cost of $100 million to the government of the State of Connecticut? And that my request is that Bradley International Airport, located outside of Hartford, CT, be given all consideration and priority for an additional $3 million from the fiscal year 1991 AIP fund in order to continue the improvement of its runways and taxiways?

Mr. LAUTENBERG. Yes, I understand the Senator's request. I also understand that Bradley Airport is deserving of these funds because of the already extensive commitment made by the State of Connecticut to its improvement but also because Bradley has become a more important regional center over the past few years. In fact, I understand that Bradley is now the second largest airport in New England, with 18 airlines providing 330 daily flights. I also understand that the number of fliers that Bradley served between 1982 and 1983 doubled. I think that it is absolutely crucial that Bradley receive funding in order to protect the safety of these passengers. This is particularly true since these are the first major improvements being made at Bradley since World War Two.

Mr. LIEBERMAN. I appreciate the Senator's consideration of my request. The renovation of Bradley is important to the millions of passengers that use it each year. The State of Connecticut has made a strong commitment to the improvement of Bradley; we are only seeking $3 million, a modest amount in comparison to the amount that the State has already expended on Bradley.

PAYMENTS TO AIR CARRIERS

Mr. EXON. Would the distinguished chairman of the Senate Transportation Appropriations Subcommittee yield for a question?

Mr. LAUTENBERG. Yes.

Mr. EXON. In the Transportation appropriations bill committee report under "Payments to Air Carriers," there is a listing of the fiscal year 1991 projection of air carriers and communities receiving essential air service subsidy. My question relates to Norfolk, NE, which is not on that list. Norfolk is an EAS point which has received subsidized service in the past. At the present time, Norfolk is not receiving subsidized service, but has subsidy-free service. However, its service without subsidy was only recently obtained. Norfolk has not been disqualified from EAS eligibility in any congressional authorization or appropria-

tion acts, nor in any DOT administrative actions. My specific question is if Norfolk, NE, again needs subsidized air service and is otherwise eligible, is Norfolk still eligible for EAS even though it is not listed as one of the projected EAS cities in the committee report?

Mr. LAUTENBERG. Norfolk, NE's EAS eligibility is not affected by its absence on that list. The purpose of the listing of communities and carriers in the committee report is simply to illustrate those communities that DOT projects will be EAS recipients at the program's current services level. The committee's intent is to fund EAS at a current services level. The committee recognizes that, from time to time, individual EAS points achieve subsidy-free service, or sometimes go the opposite direction and again need EAS. There is certainly no intent to penalize an EAS community like Norfolk for having subsidy-free service. On the contrary, the committee hopes other EAS communities follow Norfolk's example in working to find subsidy-free service.

Mr. EXON. I thank my friend and colleague for the clarification.

RESTORATION OF RAIL PASSENGER SERVICE FOR STATE OF MAINE

Mr. MITCHELL. Mr. President, I wish to raise an issue with the distinguished chairman of the Transportation Appropriations Subcommittee. Senator COHEN also wishes to join me in discussing a matter of interest to the State of Maine.

Mr. LAUTENBERG. I will be glad to address whatever concerns the majority leader and the senior Senator from Maine wish to raise.

Mr. MITCHELL. As you know, there is considerable interest in Maine regarding the rail passenger service to the State. Maine is one of the few States without Amtrak service; however, there is support among Maine citizens for both Amtrak and rail passenger service generally. Over the last year, the Maine Department of Transportation has conducted an independent, preliminary feasibility study for the possible restoration of rail passenger service to Maine. Completion of the study is expected soon. The next step in the process will probably require planning assistance by the Federal Government through Amtrak.

Mr. LAUTENBERG. The Appropriations Subcommittee on Transportation is aware of the State of Maine's interest and supports Amtrak's planning assistance. It is my understanding that Amtrak is prepared to conduct a study to address certain relevant issues.

Mr. COHEN. Along with the majority leader, I appreciate the subcommittee's support for the State of Maine's interest in rail passenger service. The only current rail passenger service is from Canada's Via Rail train which travels a limited east-west route. What is needed in this instance is a study by Amtrak that will complement and supplement a preliminary study already undertaken by the State of Maine. It is my understanding that Amtrak is willing to undertake a study to identify specific needs for facilitation of rail passenger service to Maine. The study is to be completed by June 1, 1991 and should address the following issues: First, an analysis of possible Amtraks route, options, and incremental phases for assistance with restoration of rail passenger service to Maine; second, options for coordinating or connecting such service with existing Amtrak service to and from Boston, MA or other locations; third, an inventory of capital equipment and facility needs of the State of Maine, with recommendations for possible Federal assistance; and fourth, an assessment of track conditions of railroad lines over which service to Maine might be provided, with recommendations for any necessary improvements.

On this latter point, I would like to emphasize the need for cooperation with private freight lines for the eventual restoration of passenger service. I also want to emphasize that Amtrak should not presume any particular option will be chosen by the State of Maine. Decisions still will need to be made ultimately by the State. The study is intended only as an assessment.

Mr. MITCHELL. It is our understanding that Amtrak will coordinate closely with the Maine Department of Transportation in conducting the study. The Federal Railroad Administration and the Urban Mass Transit Administration also may need to be consulted, but Amtrak is responsible for the overall study. Further decisions will be left to the State of Maine. As Senator COHEN has indicated, the intention here is for a study only.

Mr. LAUTENBERG. That is my understanding also of the State of Maine's needs and what Amtrak is prepared to provide at this time. The subcommittee supports the State of Maine's interest in this regard and encourages Amtrak's timely completion of the study so that appropriate decisions can be made by the State of Maine.

CITY ACCESS TO O'HARE AIRPORT

Mr. SIMON. Mr. President, I appreciate the work that Senator LAUTENBERG and Senator D'AMATO have put into this bill. Anyone looking at limited funds for badly needed and long-postponed infrastructure needs and transportation service, as you do, deserves the thanks of all of us here in Congress.

It is my understanding that my friend and colleague, Senator LAUTENBERG, intended to include language in the report on the Transportation appropriations to clarify congressional intent in the fiscal year 1990 Transportation appropriations bill. It was the intent of the conferees to reduce the Essential Air Service Program to satisfy budget targets, not to cut off air service to small cities which never needed subsidies. In Illinois communities of Galesburg and Danville, along with others in Michigan and Indiana, this was the case.

This language would correct that unintended consequence of the changes in eligibility for EAS by directing the Department of Transportation to restore the landing and takeoff rights at O'Hare Airport and other high-traffic airports for willing replacement carriers wishing to serve these small cities.

This action will cost the American taxpayers nothing. In fact, by including this language it will save taxpayers the costs of a reversal in the economies of the small cities unintentionally affected by the fiscal year 1990 Transportation Appropriations Act.

Mr. LAUTENBERG. The Senator is correct. If these small cities have carriers ready and willing to step in to continue serving them without subsidies, and landing and takeoff slots were previously available for small community service, they should be able to do so. I will work with you and members of the conference committee to clarify the intent of the fiscal year 1990 Transportation Appropriations Act.

Mr. HARKIN. Mr. President, I want to congratulate the chairman, the Senator from New Jersey, for the excellent job that he has done in developing the Transportation appropriations bill. It was a difficult job and many difficult choices had to be made. There are many competing needs for those limited dollars. Funding is very limited and the transportation needs of the Nation are very great. I believe that he has done an excellent job in balancing the many priorities in the bill.

I also want to thank him for the consideration that he has given to the special transportation concerns of my State. Given the great limitations in the bill, I am most thankful for his willingness to accommodate Iowa's many needs.

I also want to thank him for his efforts to provide for additional assistance available to railroads, especially for branch lines and smaller railroads. Local rail service assistance and the section 511 loan guarantee program can provide considerable aid to our railroads, many of which are in considerable need of financial aid. There may be a parliamentary difficulty concerning the section 511 program in the other body. I am hopeful that we can solve the problem so this important program can benefit our Nation's railroads.

Mr. KERRY. Mr. President, I want to commend the chariman and the ranking members of the Transporta-

tion Appropriation Subcommitee and the full Appropriation Committee for providing $125 million in this bill to begin the process of providing much needed and long promised high-speed rail service between Boston and New York. As Chairman LAUTENBERG knows, I have been a strong advocate for high-speed rail and believe that his action is very wise.

The steps we are taking today will eventually reduce the rail travel time from Boston to New York from the current 4½ to 5 hours down to under 3 hours. This is extremely good news for Massachusetts and New England—for the safety and convenience of all travelers, for our environment, and for the economic vitality of our region.

Mr. President, in the first phase, this $125 million, if approved by the conference, will modernize the signal system between Canton, MA, and New Haven, CT. It will upgrade and renovate bridges, improve station platforms, provide for high-speed interlockings, and make many other changes designed to make fast train service possible. In addition, this program will begin the design and environmental work on the electrification of the Boston to New Haven segment of this route.

The Boston-to-New York corridor represents the single largest underserved rail market in the world. Boston-New York has been described as the highest density air corridor in the world. The Boston-to-New York market is twice the size of the largest city-pair market in Europe, which is Paris-Brussels. The Boston-to-New York rail market is the biggest in the United States, being somewhat larger than the New York-to-Washington market.

The citizens of Massachusetts and Rhode Island were promised real high-speed rail service 14 years ago, with the passage of the Northest Corridor Improvement Program. With the advent of the Reagan administration, that program was cut back in 1981, with the deletion of electrification between New Haven and Boston.

Since that time we have witnessed a phenomenal increase in congestion in the corridor, both on the highways and at the major airports. The FAA has calculated that by the middle of this decade air travelers will suffer more than 5 million hours of airport delay at Logan alone. Another 5 million hours will be lost at La Guardia, with more than 7 million hours projected to be lost at Newark. The predictions for hours of delay along the major interstates between Connecticut and New York City are equally staggering.

Over the past 4 years, working with the Commonwealth of Massachusetts and others in our delegation, I have been fighting for the completion of the Northeast corridor project. With the Coalition of Northeastern Governors, we have been actively campaigning for a program of 3-hour high-speed rail service between Boston and New York. Working with Amtrak and FRA, it has been documented that such a program can between double and triple Amtrak ridership in this corridor. And these calculations do not assume superhigh-speed service such as in France or Japan; the doubling or tripling of ridership would result from the establishment of conventional Metroliner-type service as currently exists between New York and Washington.

With these conservative assumptions about the future rail service, several million air passengers could be diverted away from the congested airports, freeing up something like 8 or 10 gate positions for other high-priority air travel needs. Actually, 8 or 10 gates is larger than most of the airports we are encouraging to take up the overflow at Logan!

The environmental impacts of attaining this program of 3-hour rail service are significant. High-speed rail is six times as energy efficient as air travel! Carbon monoxide levels alone are expected to decrease by over 2,000 tons.

In short, we have been fighting for a total program of improvements for service between Boston and New York. With the establishment of 3-hour travel time between Boston and New York, significant improvement can be made in the quality of transportation in the Northeast.

Mr. President, my colleague in the House, Congressman CONTE, has been successful in gaining approval of $16 million in the House-passed bill for more powerful dual propulsion locomotives that save signficant time on the Boston-to-New York route by not having to be changed in New Haven. This appropriation is consistent with language I added to the Amtrak authorization. We need the time savings that appear to be quickly achievable by using these new locomotives. I urge the chairmen to give this provision the careful and wise consideration they have already given to other aspects of these critical Boston-to-New York rail service improvements.

Finally, I again commend the chairmen and ranking members for the foresight they have demonstrated by including the funding in this bill to bring rail service between Boston and New York up to a modern standard that will serve our people and our economy well for decades.

THE RESTORATION OF AMTRAK SERVICE TO OKLAHOMA

Mr. NICKLES. Mr. President, I rise today to express my continued support for the restoration of Amtrak service to Oklahoma. As the chairman and the ranking member of the Transportation Appropriations Subcommittee are aware, Amtrak has previously indicated to me that refurbished equipment could be made available to resume passenger rail operations along the former Lone Star route through Kansas, Oklahoma, and Texas. I strongly support the restoration of the Lone Star route and I wish to enter into a colloquy with the chairman and ranking member to indicate to Amtrak the level of Congressional support for resumption of the Lone Star route and to encourage them to continue their efforts to resume this service as soon as possible.

Mr. LAUTENBERG. I am pleased to discuss the expansion of Amtrak service with the Senator from Oklahoma. As the Senator is aware, I have been a long-time supporter of Amtrak, and I believe that Amtrak should serve all 50 States. In last year's committee report, the committee noted that, "the committee is encouraged about the possibility of Amtrak passenger rail service being restored to Oklahoma * * * within the funding levels provided, the committee supports efforts by Amtrak to further the restoration of Amtrak service." I would certainly reiterate the committee's sentiments on this matter at this time. As I understand it, Amtrak's ability to restore the Lone Star route will depend both on the availability of rolling stock and an adequate financing mechanism for the operating expenses of the line. However, I am prepared to reiterate the committee's interest in Amtrak restoring the Lone Star route as soon as feasible.

Mr. D'AMATO. Mr. President, I would echo the remarks of my distinguished chairman and indicate to my friend from Oklahoma my support of the resumption of Amtrak service along the former Lone Star route.

Mr. LAUTENBERG. Mr. President, before I close, I would like to reiterate what has been said by the distinguished chairman of the Appropriations Committee, and by my colleague, Senator D'AMATO, about the staff work that went into getting this bill developed, and prepared for adoption. Our staff is an unusual resource, Mr. President. In the case of my subcommittee, I have Pat McCann and Peter Rogoff here with me; and also Anne Miano of Senator D'Amato's staff, and Bruce Russell, Joyce Rose, and Dorothy Pastis, all of whom made major contributions to getting this work done.

Mr. President, you know very well that we can work as hard as we want, but if we do not have the right kind of staff people in there to develop the information, to make sure all of the other Senators and interested parties are informed, we cannot move these bills along, as we are doing now.

Once again, I thank Senator BYRD for the encouragement that he has

given and the professionalism of the staff that he has developed. I see Jim English, the chief clerk of the Appropriations Committee. A proud lot they are, and they deserve to be. I thank them.

Unless there is any further business, Mr. President, I ask for third reading of the bill.

The PRESIDING OFFICER. The question is on the engrossment of the amendments and third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read a third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, shall the bill pass?

So the bill (H.R. 5229), as amended, was passed.

Mr. LAUTENBERG. Mr. President, I move to reconsider the vote by which the bill, as amended, was passed.

Mr. D'AMATO. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. LAUTENBERG. Mr. President, I move that the Senate insist on its amendments and request a conference with the House on the disagreeing votes of the two houses, and that the Chair be authorized to appoint conferees on the part of the Senate.

The motion was agreed to, and the Presiding Officer appointed Mr. LAUTENBERG, Mr. BYRD, Mr. HARKIN, Mr. SASSER, Ms. MIKULSKI, Mr. INOUYE, Mr. D'AMATO, Mr. KASTEN, Mr. DOMENICI, Mr. GRASSLEY, and Mr. HATFIELD conferees on the part of the Senate.

Mr. BYRD. Mr. President, I again want to thank the chairman and ranking member, and the members of the Subcommitte on Transportation of the Committee on Appropriations. I call attention to the fact that this bill was received in the Senate from the House on July 16, and it was reported and placed on the calendar on July 27. So there in 11 days, Mr. LAUTENBERG and Mr. D'AMATO have moved this bill after it came over from the House to the Senate calendar. And on August 4, it is being passed.

I think that is an excellent example of the way committees and subcommittees ought to move here. I am very proud of this subcommittee, and proud of the chairman and ranking member.

I also want to thank Mr. HEINZ and Mr. SPECTER for their willingness to proceed with this bill today. I thank again the chairman, Mr. LAUTENBERG, for his willingness to proceed without a rollcall vote. He knew very well that if there had been a rollcall vote, a good many Members have already left the Hill and we would have probably had some difficulty getting a quorum. Otherwise, I think he would have wanted a rollcall vote, but I am not sure about that. For his willingness to proceed so as to expedite the bill, I thank him. And I, as I say, thank the Senators from Pennsylvania, and I thank the chairman.

The PRESIDING OFFICER. The Senator from Alaska is recognized.

Mr. STEVENS. Mr. President, as we leave to return to our homes, I want to take a few minutes to point out one of the problems.

The PRESIDENT pro tempore. The Chair will advise the Senator to use the microphone.

The Senator from Alaska.

Mr. STEVENS. Mr. President, as we leave to go back to our homes, I just want to take a few minutes to comment on a subject that is very close to my life and to try to make it relevant to what is happening now in Kuwait and the threat to Saudi Arabia.

In President Reagan's last budget, Mr. President, there appeared a request for approval of the ANWR legislation, the legislation to authorize leasing in the Arctic National Wildlife Refuge. That authorization included a budget projection for 1990 of $2.1 billion in terms of receipts from the bidding on the leases which would be taken by American oil interests and used for the purpose of exploration of these 1.5 million acres of the Arctic plain. It also showed a projection of continued receipts with the estimate being $1.3 billion for 1993.

Obviously, the Congress has not passed the legislation, and the country has not had that income. That is one of the problems we face, in terms of the current deficit, the loss of the income that would have been derived from leasing these Federal lands.

We are rapidly approaching a very serious crisis in the world. I think it is good to remember a little bit of history. In 1970, we imported only 23 percent of our oil needs. When the Arab embargo went into effect in 1973, we had increased our reliance on foreign imports to 36 percent. That jumped to 43 percent by the time the Alaska oil pipeline became fully operational.

In 1985, our reliance on foreign oil had dropped down to 31 percent. Now, due to a series of reversals and the fact that so many areas are closed to our domestic industry for exploration, we see our reliance on imported oil continuing to go up. It has gone up, Mr. President, from 31 percent, as I indicated was our 1985 level, now in this year to over 50 percent. We estimate this month we will import 53 percent of our Nation's needs. We predict, those of us from the oil areas, if this trend continues by the turn of the century two-thirds of our energy will be imported.

Incidentally, it is a fact that the United States has been increasing its importation of oil from Iraq. We are importing roughly 727,000 barrels a day from Iraq. We also had imported 160,000 barrels a day from Kuwait. Kuwait has now been conquered by Iraq. As we know, Iraq stands poised to take over Saudi Arabia; it is on the border of Saudi Arabia with substantial forces. We also imported 1.3 billion barrels a day from Saudi Arabia. In a short period of time Iraq may be the chief supplier of foreign oil to the United States.

This has happened at a time when, because of domestic policies, we have, through congressional action or inaction, prevented access to the areas of our country that could give us an increased domestic oil reserve. One only needs to look at the prices of oil, going from $15.60 on June 20, to well over $25 a barrel now. The gasoline prices are going to go up the same way.

And I predict that by this fall we will, once again, see gas lines. We are going to see gas rationing this year if we attempt to use an economic weapon against Iraq. Iraq has a very strong economic weapon against us. We have no way at the present time to replace the oil that comes from Iraq, Kuwait, and Saudi Arabia which, as I indicated, could well be totally under the control of Hussein by the time we return in September.

Mr. President, there are 12 sedimentary basins in my State of Alaska. Only two of them are in production now. All the rest are blocked from access. There is no ability for the American oil industry to have access to them. We have proven reserves in Alaska now of about 7 billion barrels. Alaska has estimated reserves—and these are very conservative estimates—of 15 billion barrels.

I would like to remind the Senate that at the time I stood on the floor and sought the authorization for our development in the North Slope, the projections then were that about one-half billion to 1 billion barrels of oil would be discovered in the Prudhoe Bay area. Alaska's oil industry has already produced now 9 billion barrels from Alaska's North Slope.

Whatever the estimate, it is an absolute fact that currently Alaska is supplying more oil to the United States than Saudi Arabia, but that the Prudhoe Bay field is being overproduced. We expect a 20-percent decline in production in the next 5 years and a 30-percent decline in the 5 years following. By the end of this decade the production level will drop from last year's 2.1 million barrels a day to 500,000 barrels a day.

Mr. President, the only way to keep the throughput of the Alaska pipeline up to where it maintains the economic security of the United States is to gain access to the areas of the Arctic where access is now denied so our industry may start the process of exploration.

If we authorized the exploration of ANWR this year, we would see oil exploration starting in 1991 and, assum-

ing discovery, we could have actual oil from the ANWR area into the Alaska oil pipeline by 1994. If that is not done, the United States will increase its demands for foreign oil, increasing our reliance upon the Middle East at the rate of about 200,000 to 300,000 barrels a day each year. As the pipeline throughput from Alaska goes down, the only place the U.S. oil needs may be replaced is through increased imports from the Middle East.

Mr. President, I do not take the floor with any kind of feeling of joy over the need to remind the Senate that we cannot have a situation where we become reliant upon Iraq for two-thirds of our oil. If they do take over the oil fields of Saudi Arabia, their economic weapon against us is horrendous.

I am hopeful, Mr. President, the Senate will respond to the request that we will make when we return in September to move ahead with the bill that was reported by the Senate Energy Committee to authorize the leasing of ANWR, to proceed as was originally intended in the 1980 Alaska National Interest Lands Act. The Senate must indicate that there is an urgency to develop the additional oil reserves that are necessary to maintain our own security.

Last, Mr. President, I hesitate to say this, but I think the Senate needs to be reminded of a saying that was quite prevalent when I was a young boy. It is a very simple saying: "Loose lips sink ships."

There are people around here talking about what the President might or might not do with regard to Iraq, what options we have, and how we might proceed to stop this juggernaut of the Iraqis as they move their third to fourth largest Army in the world down the Persian Gulf.

I believe it is time for us to stop talking about what we might do and get behind the only person who has the right to act under our Constitution—the President of the United States—and back him up on what he decides we are able to do. It is no time for loose lips, as far as I am concerned.

Mr. President, I am indebted to the majority leader for the opportunity to make this statement.

The PRESIDENT pro tempore. The majority leader.

MORNING BUSINESS

Mr. MITCHELL. Mr. President, I ask unanimous consent there be a period for morning business with Senators permitted to speak therein.

The PRESIDENT pro tempore. Without objection, it is so ordered.

TROUBLE AT THE EUROPEAN BANK

Mr. KASTEN. Mr. President, last March I alerted my colleagues to the danger that the proposed European Bank for Reconstruction and Development might become too centralized, too socialistic, too entrenched, and too much of a bureaucratic vacuum cleaner sucking power away from entrepreneurs and toward government officials.

Senator DOLE and I proposed an alternative aid program—a special lending window at the World Bank—that would have avoided the worst of these problems, and that, unlike the EBRD, would have been in place by now. Regrettably, the most recent reports from Europe lend a considerable amount of credence to my concerns about the EBRD. I ask unanimous consent that three articles on this—two in the Financial Times and one in the Economist—be included in the RECORD at this point.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Financial Times, July 30, 1990]

SHAREHOLDERS IN EBRB CALL ON ATTALI TO RETHINK

(By Peter Riddell)

The U.S. and other leading shareholders are pressing Mr. Jacques Attali, president designate of the new European Bank for Reconstruction and Development, to change his proposals for centrallsing power and for setting up an extensive branch network.

Some shareholders have warned that they may reconsider participating in the bank, intended to assist each European economic reform, if the changes are not before their next meeting in London in October.

The shareholders were worried by detailed suggestions made at a tense meeting in London earlier this month by Mr. Attali, a close adviser to President François Mitterrand of France, which were seen as being against both the spirit and the letter of the general structure for the bank agreed in late May after lengthly negotiations.

The dispute is both about the style of Mr. Attali's management and about the direction of the bank, which, with an initial capital of $13bn, is also intended to aid the east European private sector.

Officals in the Bush Administration hope these "very unfortunate" problems are temporary and are seeking clarification from Mr. Attali, who is on holiday.

But U.S. officials say that, unless these questions are resolved, existing strong opposition in Congress may make it more difficult to pass the necessary legislation authorising U.S. involvement. Hence it is possible that the U.S., with a planned 10 percent stake, may not join the bank.

According to one non-U.S. participant at the London meeting, Mr. Attali irritated representatives of member governments by his attitude to questions.

At one stage he apparently said he did not deal with bureaucrats but with prime ministers, with whom any problems should be raised. He hinted that if the shareholders did not like his plan he would resign.

The U.S. and other shareholders, including Japan and some European ones, believe that Mr. Attali is departing from the agreed framework in concentrating power upon himself as president rather than leaving authority for approving policy and loans with the board of executive directors from member shareholders, as happens with the IMF and World Bank.

Consequently, U.S. officials have described as "patently unacceptable" Mr. Attali's proposal that the agreed plan to have resident executive directors should be deferred for two years.

There is also concern that the earlier agreement that the senior vice-president, Mr. Attali's deputy, would be an American has not yet been resolved although discussions are continuing with Mr. Ernest Stern, a senior vice president of the World Bank.

The other main worry is about Mr. Attali's proposal to set up branches throughout eastern Europe, A U.S. official said this risked repeating the mistakes of other regional multilateral development banks which had set up such branch networks, creating an incentive just to pump money out. Instead, the critics would like to see a business plan for the bank's lending policies agreed first.

[From the Financial Times, Aug. 2, 1990]

AUTOCRACY AND TEARS AT THE BANK

Those who know Mr. Jacques Attali are far from surprised that he should be making headlines as president-designate of the European Bank for Reconstruction and Development well before the new multinational institution for helping Eastern Europe has formally been set up.

For this dynamic, fiercely intellectual and mercurial adviser to France's President Francois Mitterrand is by temperament far removed from the pin-striped world of the banker and the bureaucrat.

But news of an acrimonious meeting two weeks ago in London between Mr. Attali, his staff and representatives of the 40 nations setting up the EBRD has created more than the usual flutter of concern in Washington and other capitals. The reports of Mr. Attali seeking to centralize power in the bank and aspiring to set up an extensive and expensive branch network in eastern Europe have prompted mutterings of Napoleonic *folie de grandeur* at odds with the bank's purpose of promoting the market economy in the former Soviet satellite nations as effectively and swiftly as possible.

With the dust now settling after that meeting, it seems the EBRD is not in a state of antenatal crisis.

But it is clear that, whatever the EBRD's major shareholders thought when they selected Mr. Attali to be the bank's president, they appointed a man who is determined to be a hands-on president, running the bank in his own way. The disputes have also thrown into focus the unique character of the EBRD which, Mr. Attali's supporters claim, justifies his rigorous treatment of the shareholders' representatives last month.

By the standards of international institutions, the gestation period of the EBRD has been rapid. It was first conceived by Mr. Attali at the end of last year. It is hoped that it can be operating by next February.

At the end of May, ministers and senior officials from the Group of Seven leading industrial powers, the European Community, eastern Europe, the Soviet Union and a scattering of other countries signed the EBRD charter in Paris. The meeting in London last month was to carry out the important, nitty-gritty work of drawing up by-

laws and other regulations to ensure that the bank can operate once its creation has been ratified by member states.

Many officials attending the meeting returned to their national capitals deeply upset by Mr. Attali's style. Some complained that the arrived late for the meeting, others that he railroaded those parts of the discussion that he attended. Others objected that he was trying to use the present power vacuum at the embryo bank to concentrate power in his own hands.

These complaints have taken the Attali camp by surprise. Members of his staff say the meeting was constructive and achieved a great deal in preparation for the next meeting with shareholders in October.

To some extent, tension was to be expected. The history of international institutions has been punctuated by squabbles between the people charged with running them and national governments. Such conflict is especially rife where disbursing public money is concerned.

Mr. Attali's personality undoubtedly exacerbated a potentially tense situation. Not a man to suffer fools gladly, his years of sitting in the outer office of the French president have apparently fostered his impatience with lesser mortals. One European official who attended the London meeting complained to his superior about Mr. Attali's brusque handling of the discussion. Mr. Attali's staff admits he has a very direct manner. "It can be described as efficient," one said.

But such tensions are also a sign that the role and nature of the EBRD have still to be defined. Mr. Attali is apparently concerned that the bank, which will be empowered to make equity investments in eastern Europe, should have many of the attributes of a merchant bank rather than a development agency. He fears that it will be unable to function with sufficient speed if all important decisions have to be approved by executive directors from member shareholders as happens with the International Monetary Fund and World Bank.

Members of Mr. Attali's staff reject specific complaints raised after the London meeting. Far from proposing the establishment of branch offices for the EBRD throughout eastern Europe, they say Mr. Attali simply asked permission for a study of the practicality of such offices. This was agreed by the meeting, they say.

It is also understood that Mr. Attali very much wants Mr. Ernest Stern, a US citizen and a senior vice-president of the World Bank to be the EBRD's senior vice-president. The absence so far of an announcement about the appointment of a deputy had raised fears in the US that Mr. Attali might be trying to reverse an earlier agreement that the job should go to an American.

In Britain, which has secured London as the home of the bank, officials are anxious not to make too much of the discord. One spoke of "creative tensions" between Mr. Attali and the shareholders. Another argued that the bank would need strong leadership to be a success.

Other capitals also seem anxious to play down talk of rows at this stage. A West German official, for example, said Bonn was giving Mr. Attali the "benefit of the doubt".

The EBRD itself could have been spared much confusion if Mr. Attali had decided against isolating himself from the press. But this self-denying ordinance, one aide explained, only highlights his desire to work by the book. Mr. Attali felt it was not right to speak for the EBRD until formally elected to the position of president.

[From the Economist, July 28, 1990]

COCK OF THE ROOST

Is the BERD's head growing too big for the beast? The European Bank for Reconstruction and Development (BERD is its French acronym) is the future international institution designed to help finance the rebuilding of ex-communist Europe, with a capital stock of 10 billion ecus ($13 billion) and an emphasis on promoting the private sector. Last week the bank's 42 founding members met for the first time in London, where its headquarters will be, to discuss how it will work. Some of them emerged privately alarmed at the imperial behavior of the bank's French president-designate, Mr. Jacques Attali.

That Mr Attali should have ruffled some feathers is hardly surprising. A brilliant man—five foreign languages, four degrees, three books just in the past year—he produces more ideas (of variable quality) in a week than most people do in a year. Some find him irrating. Others appreciate him: among them President Mitterrand, whose close adviser he has been. Admirers marvel at the negotiating skill which helped hatch the BERD with impressive speed. So what if he kept the founding representatives waiting for an hour last week before turning up to deliver them a long lecture? "That's the man we know and love."

Yet it is more than just the Attali style that bothered some of the people at the London meeting. They worry about what they see as his grab for power: too much of it for himself as president, too little for the board of directors. True, the bank's constitution ensures that any loans have to be approved by the board. But within such constraints, say the worriers, Mr Attali seems to want to make the bank as "presidential" as possible; they see a risk of creating a monster that will be hard to control.

The Attali cabinet circulated its draft bylaws for the bank. There was particular concern at Section 8(b): "The president may take all steps which in his or her opinion are necessary to conduct the current business of the Bank." Also circulated was a document outlining Mr Attali's "current thinking" on the bank's organisation. Eyebrows rose at a chart of management structure showing no second-in-command to Mr Attali, and at the section on the president's functions. The president will, it said, "define the strategic agenda for the bank," and "decide on all major issues of policy and operations."

What, some wondered, ensures that he will act in the shareholders' interests? Some believe the board should be fully constituted right from the beginning (not the plan at present) so that it can influence the bank's "culture".

Proposals affecting the bank's budget caused concern, too. The average payroll cost for each member of the eventual staff of some 450 is projected to be 125,000 ecus. Mr Attali, it seems, would like to open branches of the bank throughout the borrowing countries of Eastern Europe; that will also take its toll on the budget. When asked whether it is sensible for the bank to open branches before it knows what it is supposed to be doing, Mr Attali is said to have "erupted".

No doubt many of these worries can be smoothed out before the BERD actually take flight. Another shareholders' conference is to held in October; plenty of time for more amendments to the draft by-laws. The bank will formally come into existence (probably next year) once parliaments of two-thirds of its shareholders have ratified it. But there are two dangers.

One is that resistance to Mr. Attali's wilder ideas will be wimpish. The British are being polite in public, because they are playing host. The Dutch don't want to be accused of sour grapes because their candidate for the presidency, Mr. Onno Ruding, lost out. The Germans don't want to upset the French. The French will not commit *lèse*-Attali. The East Europeans don't want to spoil their chances of getting money.

The other danger is that, even if the critics do pipe up, Mr. Attali will not listen. There was little real dialog at last week's meeting. And Mr. Attali has said he will not be talking to the press until he is formally appointed president.

If he really is pushing for strong presidential powers, it may be from the best of motives. Eastern Europe's needs are urgent. The bank should be able to move fast, unclogged by bureaucracy. But Eastern Europe also needs a bank which enjoys complete confidence from the start. For that reason alone, Mr. Attali should listen to the twittering in his BERD's nest.

Democracy has come too far in eastern Europe in the last 12 months for us to let the chance for economic freedom slip away. All Senators ought to be interested in the "writing on the wall" contained in these three articles, and keep this issue in mind when we consider the authorization for U.S. funding for the BERD.

UNIVERSITY OF MICHIGAN

SUNRUNNER IS FIRST AMONG WINNERS

Mr. LEVIN. Mr. President, I want to bring the attention of the Senate today to a race that was recently completed in Michigan. It was a race from Orlando, FL, to Warren, MI, featuring 32 solar-powered cars competing in the "GM Sunrayce USA." It was won by a very dedicated team from the University of Michigan, but in a deeper sense, there were 32 winners.

Instead, some of the brightest young minds in this Nation, in teams from colleges all over North America, Canada, and Puerto Rico, including a joint team from Western Michigan University and Jordan College, gave us a glimpse of the future. Powered only by the sun and the collaborative inspirations of the young and young at heart, the racers blazed a 1,650-mile trail of proof that the technology for producing ultra-clean vehicles is ours if we can seize the opportunity.

The current concerns about the supply of energy are only one spur to the development of this technology. The potential for cleaning our air and reducing the threat posed by global warming is equally exciting. The fact that studies tell us ultra-clean technologies like solar power could result in cars far cleaner than the best gasoline-

powered engines sets an important goal for this Nation.

But we cannot reach that goal without placing a high priority on education in this Nation. Our young people need to see the fields of science and engineering as their own "field of dreams," where accomplishment is only limited by the power of the mind. Among the many in this race who inspired us all young and old is the University of Michigan's winning squad. I was very proud to have been able to join them recently in Michigan to celebrate their achievement and to celebrate the future. I am also very proud, Mr. President, to list their names in the CONGRESSIONAL RECORD: Joe Bartlo, Dave Bell, Justin Beres, Michael Blackman, Jeff Boyne, Matt Brown, Kevin Czajkowski, Susan Fancy, Paula Finnegan, Chris Gregory, Daniel Hauri, Bill Kaliardos, Harpreet Labana, Chetan Maini, Mike McAlear, Rahul Naik, Dave Noles, Doug Parker, Jeffrey Pavlat, Scott Sbihli, David Smith, Frank Stagg, Andy Swiecki, Cyril White.

TRIBUTE TO J. SOUTHGATE JONES, JR.

Mr. SANFORD. Mr. President, I rise today to pay tribute to J. Southgate Jones, Jr., one of my long-time friends and a constituent from my hometown of Durham, NC. For the past year, Mr. Jones has been president of the Independent Insurance Agents of America, Inc. [IIAA]. We all have independent agents in our States and it is important to recognize those who have gone above and beyond the call of duty to serve their association of small business people at the national level. Southgate has a record of distinguished service in our community, holding the office of president of the United Way, the YMCA, the Red Cross, and many other enterprises. Mr. Jones is also a former Durham City Councilman and past president of the Durham Chamber of Commerce.

His tenure with the Independent Insurance Agents of America reveals his dedication to his work. As president of J. Southgate & Son, Inc., he has served as president of the Independent Insurance Agents of North Carolina and president of the Independent Insurance Agents of Durham. He also has been chairman of the legislative committee, and the building and action committee for the Independent Insurance Agents of North Carolina. He is a recipient of the Durham Agent of the Year Award, North Carolina Agent of the Year Award, and the Carolinas' Insurance Managers' first Leadership Award.

Mr. President, it is my distinct privilege and honor to ask my colleagues to join me in recognizing J. Southgate Jones, Jr. I know Southgate will continue his distinguished service and dedication to independent agents and to his community. I am pleased we can recognize such an outstanding individual for his dedication and professionalism.

SOCIAL SECURITY AND DEFICIT REDUCTION

Mr. HARKIN. Mr. President, before we leave for our August recess, I wanted to address the issue of Social Security and deficit reduction.

It has been reported from time to time that negotiators at the budget summit are considering cutting Social Security benefits as a part of a deficit reduction plan. One of the options discussed would freeze or delay the cost-of-living adjustment or COLA that elderly and disabled Social Security recipients are scheduled to receive January 1, 1991.

Mr. President, no single function of Government affects as many Americans as profoundly as Social Security does. Nearly 40 million retirees, disabled workers, their spouses and children, including 518,000 Iowans, receive a Social Security check each month. Social Security is the primary source of income for 70 percent of older Americans, and it is virtually the sole source of income for almost one in three older persons.

Some may say, "Just delaying the COLA's isn't really a benefit cut. That isn't so bad." Well, let us look at real life. Because in real life, a delay is a cut in income to our seniors. And not just for this year, because a cut in their income this year means less income in the year to come as well.

In budget terms, eliminating this year's COLA for Social Security and railroad retirement recipients would mean a $7.6 billion cut in benefits. Even more onerous, it would cut benefits by over $49 billion over the next 5 years.

In human terms, and that is what is most important here, eliminating the COLA would hurt our most economically vulnerable seniors the most. A recent study by the Families USA Foundation, found that a 1-year COLA's freeze would push 368,000 older Americans permanently below the poverty level—$6,820 for an individual and $8,420 for a couple. Further, they found that another 420,000 older Americans would be thrown below 150 percent of the poverty level. In my own State of Iowa, over 3,500 seniors would be forced into poverty. Since most older persons live on tight-fixed incomes, carefully planning out each dollar, this cut will mean having to choose between giving up heat, medications, or food. Because the cost of all of these necessities, especially health care, will increase while their incomes stay flat.

Mr. President, Social Security did not cause the deficit. It should not be used to solve it. The deficit summit negotiators have a tough task. Any cuts are bound to be in some way controversial. But we cannot accept forcing older Americans to bear the brunt of a problem they didn't create. That is why if a deficit reduction plan comes before us that cuts or eliminates the seniors' or the disabled's COLA, I will have to ask that there be a separate up or down vote on this provision. So that it is perfectly clear what is being done.

EXPLANATION OF ABSENCE

Mr. DOLE. Mr. President, the senior Senator from New Mexico [Mr. DOMENICI] missed several votes this afternoon.

Since it was not clear whether the Senate was going to hold a Saturday session until yesterday, the Senator had made a commitment to meet with various constituent groups in New Mexico. He canceled one meeting with the Association for Retarded Citizens. He really felt badly about missing this appointment. It has been scheduled for a long time.

He did delay his departure so that he could be here for the SDI debate. SDI, as most of my colleagues know, is very important to New Mexico because of the extensive SDI research carried out at Los Alamos and Sandia National Laboratories. Senator DOMENICI delayed his departure in order to participate in the debate.

However, the Senate was hours from completing its work and rather than disappoint other constituents he had planned to meet with, he caught the 2 p.m. plane to Albuquerque. This would permit him to arrive for the last of his scheduled appointments for today.

SOCIAL SECURITY NOTCH

Mr. HARKIN. Mr. President, approximately 10 million Americans have been waiting 13 long years for Congress to address the Social Security notch—a glitch in the law which has reduced the benefits of individuals born between 1917 and 1926.

As a result of the 1977 amendments to the Social Security Act, individuals born between 1917 and 1926 receive substantially lower benefits than individuals born in earlier years. This reduction in benefits has caused suffering among older Americans, many of whom depend on their Social Security check to keep them out of poverty.

There are approximately 130,000 Iowans affected by the notch. When I came to the Senate 6 years ago, I made notch correction legislation a priority and I have supported and cosponsored legislation over the years which will provide relief to these individuals in a fiscally responsible manner.

In the 101st Congress, I cosponsored Senator SANFORD's bill, S. 1212, which will ease the financial inequity created by the Social Security notch. In the past, notchers were considered as those individuals who were born during 1917 and 1921. However, the financing formula of the Sanford bill calls for a gradual phase-in of a stable level of benefits for individuals who were born between 1917 and 1926, thus targeting the benefits to those who need them the most. Moreover, this legislation provides a lump sum payment of up to $1,000 per family for past periods of entitlement.

So, I want to announce to my colleagues that when we consider the long-term debt ceiling, I plan to offer an amendment similar to Senator SANFORD's proposal. Finding a solution to the Social Security notch is in the best interest of Congress, the Social Security system and the Nation.

I urge my colleagues to join me in the effort to redress the grievances of millions of persons who have been unfairly penalized by the notch. Doing so will bring long-awaited justice to these beneficiaries and build greater confidence in the Social Security system.

STATEMENT ON INTELLIGENCE AUTHORIZATION ACT FOR 1991

Mr. BRADLEY. Mr. President, last night the Senate passed S. 2834, the Intelligence Authorization Act of 1991. I support this bill but I also want to express significant reservations about one aspect of the bill. In particular, I am concerned that President Bush might misinterpret this act as a mandate for U.S. intelligence agencies to devote scarce budget dollars and sensitive collection methods to the task of giving private business interests an edge in international competition. I am also emphatic that the SCSI's call for a comprehensive study of economic espionage by foreign powers in the United States must not become a pretext for a new program of counterintelligence surveillance by the FBI of either foreigners or Americans.

In my view, it would be imprudent to shift the resources of the U.S. intelligence community away from critical national security missions that it is uniquely competent to perform, and toward economic problems of the private sector that it is ill-suited to solve. Improving the relative productivity, technological quality, and commercial competitiveness of enterprises that employ American workers is simply not a project for our intelligence agencies.

Further, the traditional national security purposes for which we created these agencies have not disappeared. It would be dangerous to distract the intelligence community from vigilantly monitoring the many serious threats to U.S. national security interests that will proliferate and persist in the post-cold-war world. Indeed, Saddam Hussein's armed aggression Thursday against Kuwait underscores the point that United States intelligence agencies will continue to have life-or-death projects far more pressing than watching international commerce.

The world has been changing. The former Soviet colossus has diminished as a threat to American interests because its leadership finally recognized the vast scale of its political and economic failure. At the same time, Americans have grown concerned that the United States may be losing its dominant role in the international economy, especially to its allies in East Asia and Western Europe.

Although the fading of the Soviet military threat does not lessen our need for capable, wide-ranging foreign intelligence, the President has responded to these developments by proposing to redirect intelligence programs away from old problems of international security and toward economic and trade issues. In his statement of National Security Strategy issued last March, President Bush specified a new direction for U.S. intelligence programs:

> • • • We will also have to adapt to a new emphasis on broader global economic and trade issues. We must be more fully aware of such subjects as foreign trade policies, economic trends, and foreign debt.

While I agree with the President that he and his administration have not been as alert as they should have been to global economic issues, the intelligence community is not to blame for these deficiencies. Moreover, we cannot expect U.S. intelligence agencies to improve either the administration's economic policy or the competitive performance of U.S. companies. Those solutions lie elsewhere.

I am also troubled by the President's suggestion that U.S. counterintelligence programs should broaden their focus on threats to "our secrets and technologies" from foreigners. Does this mean the U.S. Government is spying on foreign-owned firms that employ millions of American workers? Do they pose such a threat? Should they be subject to counterintelligence surveillance more than companies that are fully owned by U.S. citizens. If so, why? These questions remain unanswered.

Mr. President, I am worried about the presumptions and scope of the study on Economic Espionage directed by the SSCI's report. The report raises undue, or at least premature, alarms about "an emerging economic espionage threat, including the collection of U.S. proprietary and unclassified information by foreign powers."

In the classified report that accompanies and amplifies this public report, I have sought to draw a sharp distinction between perfectly legal information-gathering by foreign powers, which we conduct ourselves and which must be tolerated, and illegal economic espionage, which should be countered effectively. The SSCI's report fails to utilize this distinction, and I remain to be convinced that economic espionage in the latter sense is a new or growing threat that warrants a greater counterintelligence effort. Despite my request for evidence on cases in point, the Director of Central Intelligence has not substantiated his public assertion that "we have been victims of industrial espionage."

Mr. President, I happen to believe that there are more than enough difficult and important challenges for the intelligence community in the national security field. There is no good reason why firms should expect the CIA or the FBI to protect their proprietary information against snooping by foreign competitors any more than they need such protection against similar threats from domestic American rivals. Nor should the U.S. Government use sensitive intelligence sources and methods, or scarce tax dollars, to collect economic information for the exclusive benefit of private interests, especially if such efforts would infringe on the fundamental freedoms guaranteed by the fourth amendment of the Bill of Rights. Yet, that is the direction the President, the Director of Central Intelligence, and the Select Committee on Intelligence seem to be headed. Mr. President, I urge them to reconsider.

CHEHALIS RIVER BASIN FISHERY RESOURCES STUDY AND RESTORATION ACT, H.R. 3787

Mr. ADAMS. Mr. President, I rise today in support of a bill authorizing the study and restoration of the fishery resources in the Chehalis River Basin of Washington State.

The Chehalis River Basin is our State's second largest river system. It includes approximately 1,400 separate rivers and streams totaling nearly 3,400 miles in length. The Chehalis River Basin has a long history as one of the greatest fish runs in our State. Fishery resources in the basin have supported recreational, commercial and Indian fisheries in the basin and in the ocean off the shores of Washington, Canada, and Alaska. The basin is home to large runs of anadromous fish including trout, salmon, sturgeon, and shad.

Unfortunately, over the past few decades the fish runs have been in constant decline. Today the number of fish produced in the basin is one-half of what it was in 1935. It appears that the Chehalis River problems stem from the survival of juvenile fish. These fish appear to be dying from

problems existing in the lower part of the river and the industrialized inner harbor. Many parties, including recreational and commercial fishing interests, State and local governments, Indian tribes, industry, and public utilities, have made attempts to determine the causes of these problems. However, these efforts have met with limited success.

The legislation before the Senate today is intended to help fund and coordinate the work of these interested parties. This bill authorizes a 3-year, $2.5 million program to be conducted by the U.S. Fish and Wildlife Service. One-fifth of the appropriated sum will be made available to the Chehalis Tribe and the Quinault Indian Nation for their participation. Contributions from State, local, and other entities will provide an additional $500,000. The assistance of the State and Indian tribes is very important to the success of this project. The tribal governments in western Washington and the State of Washington have made great strides in their mutually supportive efforts to protect, manage, and enhance our region's anadromous salmon fisheries resources. The cooperation between the tribes and the State has evolved into a working model of possible accomplishments when entities join to achieve common objectives. I expect that the implementation of the proposed Chehalis River Basin Study legislation that this tribal-State fisheries management relationship will be strengthened through fisheries habitat improvements.

The legislation is divided into two components. First, the parties will review existing studies to identify data needs. Second, the act directs the participating groups to conduct additional studies to develop goals for restoring the fisheries resource in the Chehalis River Basin. Participants in this process will include a variety of State and Federal agencies as well as the local governments, tribal interests, commercial and recreational fishing interests and other affected entities.

Mr. President, this legislation is very important to my State. It is supported by all parties I have mentioned, as well as the administration. It is my hope that the Senate will also add its endorsement to this worthy bill. I would like to close by expressing my admiration to Congresswoman JOLENE UNSOELD and Jim Hoff on her staff for their outstanding work on this bill. Thank you.

TERRY ANDERSON

Mr. MOYNIHAN. Mr. President, I rise to inform my colleagues that today marks the 1,967th day that Terry Anderson has been held in captivity in Beirut.

A COUNTERFEIT-PROOF SOCIAL SECURITY CARD, NOW

Mr. MOYNIHAN. Mr. President, the front page of this morning's New York Times carries a photograph of three young illegal immigrants in Los Angeles holding up counterfeit green cards and Social Security cards. The caption reads: "For Immigrants, Fake Documents Are Easy To Come By." The story, ably reported by Richard W. Stevenson, has the headline: "Growing Problem: Aliens With Fake Documents."

Mr. Stevenson reports that a recent survey by the Immigration and Naturalization Service of 900 aliens arrested at workplaces in the past year, some 233 "admitted having counterfeit Social Security cards." The story continues: "Most new arrivals can buy a green card and a Social Security card for $20 or more in central Los Angeles, with prices generally higher in other regions, investigators said."

Some may regard this news—and, of course, there is a sense in which it is not news—as representing a defeat for the organizations in the American government concerned with illegal immigration. And so it is. Yet, it is equally important to recognize that it also marks a victory for the Social Security Administration. A victory over Congress, and a victory, less pronounced, within the executive branch.

It is a victory in the sense that the Social Security Administration is determined that the Social Security card should be easily counterfeited. The SSA does not directly desire this, but it might as well do. For it defeats all efforts to create a counterfeit-proof Social Security card. It does this from powerful, if in my view misguided principle.

I wish I could interest students of bureaucracy in this subject. Perhaps these remarks will do.

To understand this curious "organizational behavior," it is necessary to go back to 1935 when the Social Security Administration was created. At President Roosevelt's firm insistence, each contributor to this system was given an account, complete with his or her own number, and a card with the contributor's name and number so that employee and employer contributions could be posted to the account in a routine manner.

Right off, opponents of Social Security, and of President Roosevelt, charged that the administration was creating an identity card, of the sort recently introduced in Nazi Germany.

Nothing could have been further from the truth. The distinction is elemental. In a police state—or a country such as wartime Britain—identity cards are issued under the rubric of national security. Individuals must carry them, and must produce them upon demand from the authorities. Obviously, no one is required to carry a Social Security card, much less to produce it on demand. It is a near relation of a bankbook. Of interest only to the depositor and the institution in which funds are deposited. Mind, over the half century Americans have come to use their Social Security number for general identification purposes. Numbers are issued in maternity awards. But this is a convenience, nothing more.

Even so, the Social Security bureaucracy remained traumatized—I do not think that is too strong a word—by the original charges, and committed to maintaining the original plain pasteboard card. As a sign, perhaps, of innocence.

When I came to the Senate almost 14 years ago, I commenced a now extended effort to persuade the Social Security Administration that the pasteboard card was out of date. I had a number of concerns. The most important was that the American public was still uncertain about the security of Social Security benefits. I hoped for an American Express-type card that would proclaim the dependability and solvency of the system. I tried and tried. Time and again such a measure would pass the Senate, only to be rejected in the House where the Social Security bureaucracy was well connected.

Finally, in 1983 I attached a tamperproof provision to the Social Security legislation for that year. Legislation of great importance, of course.

For almost a year, I waited for our new card. A counterfeit-proof Social Security card. Finally, it arrived. And what did we get? The same old pasteboard. There were technical changes. Tiny fibers were mixed with the pulp from which the cards are made. In an FBI laboratory, a counterfeit is easily detected. Under a microscope. But, of course, the fibers are invisible to the naked eye.

Presto. The Social Security Administration had thwarted the will of Congress, and not coincidentally, blocked an obvious need of the Immigration and Naturalization Service.

In March 1988, the General Accounting Office released a report on ways to improve the integrity of the Social Security card. The report points out the present card's vulnerability to fraud and identifies a number of counterfeit-resistant technologies that could be used to enhance the card's integrity, such as putting a hologram on the card. Today, credit card companies manufacture plastic cards with holograms for only 2 or 3 cents a piece.

During the 1936 Presidential campaign, Republican National Chairman, John D.M. Hamilton warned that eventually every American would be required to wear a dog tag containing his Social Security number. In the half century since then, we have, I

thought, become much less susceptible to this sort of thing.

But the Social Security bureaucracy, I am afraid, has not. They cling to the old views and fears. They opposed my proposal last year to provide for yearly Social Security account statements that would tell all workers what they have paid in and could expect to get back in benefits. We finally got a compromise, phased-in version enacted in the 1989 Reconciliation Act.

Public confidence in Social Security remains low, and the SSA remains disinterested or unconcerned. This is not an insignificant problem in itself, and I have proposed other measures to deal with that, such as making SSA an independent agency. But for today, let me simply draw the attention of my colleagues to today's news on the subject.

I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times, Aug. 4, 1990]

GROWING PROBLEM: ALIENS WITH FAKE DOCUMENTS

(By Richard W. Stevenson)

LOS ANGELES, August 3.—Armando Huerta arrived here two months ago from Mexico and, like many of the illegal aliens who continue to come to Southern California, went almost immediately to a seedy part of Alvarado Street near downtown Los Angeles.

There, Mr. Huerta said, he quickly found a man who offered to sell him fake identity papers. Mr. Huerta told the man he could afford to pay $19—he had $20 but he needed to save $1 for the bus—and the deal was quickly struck. In a few minutes the 23-year-old Mr. Huerta had a counterfeit "green card" and Social Security card, allowing him to get temporary jobs in restaurants and construction.

Now Mr. Huerta is looking for a permanent job in a factory, and is settling in as a member of the region's huge illegal work force.

THE MOST PRESSING PROBLEM

The increasing ease with which Mr. Huerta and other newly arrived illegal immigrants can buy fraudulent documents and use them to find jobs has become one of the most pressing problems Government officials face as they try to enforce the nation's 1986 immigration law.

As long as illegal immigrants believe they can find jobs and relative prosperity in the United States, experts say, the Immigration and Naturalization Service will continue to have difficulty stemming the flow of illegal aliens from Mexico and other economically distressed nations to the south.

"This is the premier fraud problem facing the immigration service," said Lynn Nelson-Paretta, the service's senior special agent for investigations in Washington.

The 1986 law, the Immigration Reform and Control Act, gave many illegal aliens already in the United States a chance to become legal residents. But it was also meant to choke off further illegal immigration by making it more difficult for illegal aliens to find jobs.

The law requires employers to demand proof from job applicants of their right to work in the United States, through documents like passports, driver's licenses, Social Security cards and immigration papers. Employers found not to have required such proof face fines or prison sentences.

Immigration officials say a vast majority of employers are meeting the law's requirements by demanding documentation from prospective employees. In fact, some employers are so fearful of the law's penalties, or so biased, that they refuse to hire any aliens.

A study made public earlier this year by the General Accounting Office, the investigative arm of Congress, found a "widespread pattern of discrimination" against people with a "foreign appearance or accent."

But other employers who are willing to check into an applicant's documentation have no legal incentive for doing so. The law does not require employers to verify the authenticity of documents, nor does it provide an easy way for them to do so.

IT'S "A MUSHROOMING INDUSTRY"

With fraudulent documents so readily available, officials say, employers in regions and industries that have long relied on a low-wage illegal work force are still hiring large numbers of illegal aliens, sometimes knowingly and sometimes unknowingly.

"This loophole in the law has created a mushrooming industry of falsified documents," said Jorge Bustamante, president of the College of the Northern Border, in Tijuana, who has done extensive research on illegal immigration.

Counterfeiting is a problem in every city that attracts large numbers of illegal aliens, officials said, but such activity is very brisk in Los Angeles.

A SURVEY OF ILLEGAL ALIENS

To gauge how widespread is the use of fraudulent documents, the immigration service surveyed 900 aliens who were arrested at work places last year. Of those 900, 233 admitted having counterfeit Social Security cards and 142 admitted having a fake "green card," the common name for a permanent residency document. Officials said the survey probably understated the numbers of aliens with fake documents.

Prices for such documents vary widely. Most new arrivals can buy a green card and a Social Security card for $20 or more in central Los Angeles, with prices generally higher in other regions, investigators said.

More elaborate documents, like the card used to identify an alien as someone who has completed the first step in the process of becoming a citizen under the 1986 law, can cost at least $500. Fraudulent birth certificates and driver's licenses are also widely available on the street.

"Some employers even refer the undocumented immigrants to where they can get falsified documents," Mr. Bustamante said. "They are interested in reducing the cost of labor, and they can comply with the law by just seeing a document, any document."

A GLANCE FROM THE BOSSES

After arriving here a year ago from Mexico, Guillermo Jacobo Abunader looked for day work with gardeners, construction companies and other employers who hire men from street corners without asking for documentation. But that type of work, which pays less than a steady job, is not always available. So Mr. Abunader bought a fake Social Security card and green card.

"It's much easier to find work with papers," he said. "The bosses just want you to show them something. They just glance at them and are satisfied."

The immigration service is developing a pilot program to allow employers to phone in and verify the documents being provided by job applicants. The agency is also considering recalling all old versions of the green card, including the mid-1970's version that counterfeiters have found particularly easy to copy.

For now, immigration officials say they are aggressively pursuing cases involving fraudulent documents. William M. Griffen, the supervisory special agent in charge of the immigration service's anti-fraud efforts in Los Angeles, said the office has obtained 129 felony convictions on document-fraud charges in the fiscal year ended last Sept. 30.

The pace of convictions this year is running slightly ahead of last year's, Mr. Griffen said, with 101 cases successfully prosecuted through the first nine months of the fiscal year.

SEARCH FOR THE COUNTERFEITER

The agency's ultimate goal is to arrest the counterfeiters who are producing the false documents. But in most cases investigators must work their back up a chain from the document sellers on the street through a variety of distributors before they can identify the counterfeiter.

In a recent case, immigration investigators bought counterfeit documents from a husband and wife team selling documents from a street corner in the Los Angeles suburb of Inglewood. Investigators followed the husband to the apartment of another couple in south-central Los Angeles, where the falsified documents were prepared by placing the buyer's name and picture on the counterfeit documents.

Investigators raided the apartment and found 4,000 blank counterfeit documents, $12,000 in cash and a stolen gun, said John Torres, a special agent for the immigration service in Los Angeles. From there investigators were able to trace the suppliers of one particular counterfeit identify card and arrest them as well.

Although the case resulted in three guilty pleas and one conviction on felony charges involving the possession or selling of falsified documents, investigators have not yet been able to find their ultimate target, the counterfeiter who made most of the documents being sold by those who were arrested.

TRIBUTE TO CHAPLAIN MAJ. GEN. MATTHEW A. ZIMMERMAN

Mr. SANFORD. Mr. President, I rise today to pay tribute to Chaplain Matthew A. Zimmerman, Jr., who is the Chief Chaplain of the U.S. Army. Chaplain Zimmerman is a great leader and was one of the first African-American graduates of Duke Divinity School. He has enjoyed a distinguished and honored career as a military chaplain.

Chaplain Zimmerman joined the military service in 1967 and has served in Vietnam, Frankfurt, West Germany; Washington, DC, and numerous bases in the United States. He received many awards and decorations for his service, including the Legion of Merit, Bronze Star Medal, and the Vietnam Honor Medal, 1st class.

In 1989, President Bush nominated Chaplain Zimmerman for promotion to brigadier general. His promotion and appointment as Deputy Chief of Chaplains became effective later that year. A further honor was bestowed upon Chaplain Zimmerman in 1990, when President Bush nominated him for appointment as the Chief of Chaplains and promotion to the grade of major general, Chaplain's Corps.

Chaplain Zimmerman's rise in rank and responsibility is a reflection of the confidence that has been placed in him. His numerous awards are indicative of his exceptional ability.

I would like to commend the chaplain for his leadership and his commitment to excellence. He is a great man and I wish him continued success in his important ministry.

SOCIAL SECURITY

Mr. PELL. Mr. President, I strongly support the proposal offered by the distinguished senior Senator from New York [Mr. MOYNIHAN] to reduce Social Security payroll taxes and to return the Social Security system to its traditional pay-as-you-go basis.

I was one of five Senators who joined with Senator MOYNIHAN when he first introduced this proposal in January of this year, and I am a cosponsor of the proposal now before the Senate.

This legislation is essential to end the current massive annual plundering of the Social Security trust funds to both mask the size of the Federal budget deficit and to finance that deficit.

The proposal has strong support from a broad range of national organizations, representing business, small business, the elderly, and workers.

Among those supporting the Moynihan proposal are the U.S. Chamber of Commerce, the National Federation of Independent Business, the AFL-CIO, and the National Committee to Preserve Social Security and Medicare.

Let me quote what some of these organizations say about this proposal to cut Social Security [FICA] taxes and to stop the misuse of Social Security funds.

The National Committee to Preserve Social Security and Medicare, one of the Nation's largest senior citizen organizations, in a letter endorsing Senator MOYNIHAN's proposal says it "* * * believes that pay-as-you-go financing is the fairest approach to Social Security financing. Huge build-ups in the trust funds take money from current workers' pockets, disguise the size of the Federal deficit, and provide a false sense of security."

The U.S. Chamber of Commerce in a letter to Members of the Senate says:

> It is by now widely understood that the excess FICA (Social Security) taxes being collected today are not being saved to finance the next generation's retirement. Instead, they are used, through the purchase of special-issue Treasury bonds, to finance current government spending.
>
> The Moynihan proposal returns these excess taxes to the workers and employers who have earned them, without thereatening the benefit security of current or future Social Security recipients.

The AFL-CIO says:

> The AFL-CIO supports the concept of the Moynihan proposal because it exposes the charade of using the growing Social Security trust fund surplus to hide the true size of the federal deficit. Since the Social Security tax is levied only on the first $51,300 of earned income, middle-income working people are paying a disproportionate share of the burden to build this surplus, the purpose of which has been hijacked to mask the consequences of unbalanced and unwise budget policies.

The National Federation of Independent Business, with a national membership of more than 500,000 small businesses, says:

> The majority of small business owners pay more in FICA taxes than they do in income taxes. * * * Help America's small business owners, help America's workers, help America's economy. Vote for the Moynihan amendment to cut FICA taxes.

So major spokesman for American workers, for American business, and for older Americans all have joined in support of this proposal.

And I would note that this is basically and in principle the same proposal put forward in January with one modification. Instead of taking affect over 2 years, the proposal now is phased in over 5 years. The reason for that change was to allow the buffer reserve fund to reach a level of 150 percent of expected annual benefit expenditures instead of slightly over 100 percent in the original proposal.

But the basic principle remains the same: Return the system to pay-as-you-go financing, and cut the Social Security taxes now being paid by workers and businesses. The Moynihan proposal would do away with the current system of trying to build huge surpluses in Social Security. We have found that there is no other way to stop the plundering of those surpluses to pay for current expenses of government—from paper clips to B-2 bombers.

The idea that current Social Security surpluses are being put aside to pay for benefits for baby boomers when they retire in the next century has become nothing more than a charade, and a hugely expensive fraud. Indeed, unless it is stopped now the cost of this fraud to the American workers will far exceed the outrageous costs of cleaning up the savings and loan mess.

Under the Moynihan proposal, Social Security withholding taxes will be reduced in each of the next 5 years, with an overall reduction from 6.2 to 5.2 percent of wages. When fully effective, that means a tax reduction of $300 a year for a worker or a family with wage income of $30,000 a year, or a tax cut of $500 a year for a worker or family with $50,000 in wage income. And the workers' employer or employers would benefit from an equal tax cut.

That tax cut is also the amount of excess taxes those working families and those businesses are now paying to build up huge Social Security surpluses that are being misused. Those surpluses are planned to continue for another 25 years, and if they continue under present conditions, that working family making $30,000 will have paid more than $7,500 in excess taxes. That cost is many times the estimates of the long-term costs of the S&L cleanup. It is unthinkable that we should permit this plundering of the workers' wages to continue.

In the State of Rhode Island, the total of the tax cut for workers when the full Moynihan tax cut is in effect would be about $100 million a year. And an equal tax cut of nearly $100 billion would go to Rhode Island businesses. At a time when working families are hard pressed to make ends meet, and when businesses are in great need of funds for investment and modernization to be more competitive, these tax cuts would provide an important boost to the economy.

Mr. President, I commend Senator MOYNIHAN for the great leadership he has demonstrated in bringing this proposal before the Senate. I am pleased to be able to join with him in support of this proposal to provide tax justice to American workers.

TAXPAYER FINANCING—NO!

Mr. DOLE. Mr. President, this past Wednesday, the Senate passed a campaign finance reform bill that has more to do with partisan advantage, with reforming 45 Senate Republicans, than with what a real reform bill should be all about—reducing the role of special interests in Senate campaigns.

After the vote my distinguished colleague from Oklahoma, Senator BOREN, expressed his hope that a bipartisan compromise could be reached in conference.

I welcome my colleague's remarks. And, believe me, I welcome any opportunity to remove the partisan sting that dominates this issue.

But, Mr. President, there should be no illusions.

If a bipartisan deal is to be struck, two big ticket items must first be confronted head on:

First, the issue of taxpayer-financing of politicians, which the Democratic bill fully embraces but which Republicans unabashedly reject.

And second, the issue of nonparty soft money—or sewer money—which

the Democratic bill conveniently and completely ignores.

TAXPAYER-FINANCING

Mr. President, I have prepared a table summarizing the minimum amount of taxpayer-financing required by the Democratic bill.

I ask unanimous consent that this table be printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

PUBLIC FINANCING—BOREN/MITCHELL SUBSTITUTE—6-YEAR ELECTION CYCLE

State	General-election spending limit	Broadcast vouchers (20 percent)	Postal subsidies	Total public financing		
				1 candidate, 1 election	2 candidates, 1 election	2 candidates, 2 elections
Alabama	$1,303,000.00	$260,600.00	$195,450.00	$456,050.00	$912,100.00	$1,824,200.00
Alaska	950,000.00	190,000.00	142,500.00	332,500.00	665,000.00	1,330,000.00

Wyoming	950,000.00	190,000.00	142,500.00	332,500.00	665,000.00	1,330,000.00
Total	78,656,300.00	15,731,260.00	11,798,445.00	27,529,705.00	55,059,410.00	110,118,820.00

2-year election cycle—totals

Broadcast vouchers (20 percent)	$20,975,013.00
Postal subsidies	15,731,260.00
Total public financing	36,706,273.00

Mr. DOLE. Mr. President, according to my calculations, the total amount of public financing over a 6-year election cycle could be as much as $110 million. And, in my view, that is a conservative estimate, since it does not take into account taxpayer grants given to a candidate whose opponent exceeds the bill's proposed spending limits.

A CASE STUDY: NEBRASKA

Mr. President, to make things a bit more concrete, let me take a few moments to highlight what public financing means in one State—the State of Nebraska.

Under the Democratic bill, the general-election spending limit for Nebraska is $950,000. A Senate candidate is entitled to receive something called broadcast vouchers to purchase television time, financed not by the candidate himself, but by the taxpayers.

The cost of these vouchers would equal 20 percent of the spending limit—so for Nebraska, that is $190,000—$190,000 paid for by the U.S. Treasury.

And if two candidates are in a Senate race, which is usually how things work, that is two times $190,000, or $380,000 directly out of the taxpayer's pocket.

Under the Democratic bill, eligible candidates would also be entitled to pay for first-class mail at one-quarter the normal first-class postage rate. The cost of mail sent out at the reduced first-class rate may not exceed 5 percent of the general-election spending limit.

What this all boils down to is that a Senate candidate in Nebraska would be entitled to a $142,500 mail subsidy. Multiply that number by two Senate candidates, and you get a very significant $285,000 postal discount.

So, Mr. President, according to my arithmetic, the cost to the taxpayers for a typical two-candidate Senate race in Nebraska would, at a minimum, equal $665,000—$380,000 in broadcast vouchers and $285,000 in postal subsidies.

And if you take that $640,000 number and multiply it by two Senate races—which makes sense, since each State has two Senators—the total bill for the taxpayers will be almost $1.3 million, just for one State, the State of Nebraska.

SOFT MONEY

Mr. President, the Democratic bill also fails to clean up the nonparty sewer money that clogs up the campaign finance system.

During the debate, my distinguished colleague from Kentucky, Senator MCCONNELL, tried to address this problem by offering an amendment prohibiting all tax-exempt, 501(c) organizations from engaging in activities designed to

influence the election of a specific candidate for public office.

In other words, if you are playing the partisan political game, you should play it like the rest of us—with after-tax dollars and under the regulatory supervision of the Federal Election Commission.

That sounded fair to me, and I suspect it sounds fair to most taxpaying Americans.

Contrary to some of the statements made yesterday, the McConnell amendment was not about shutting down the Girl Scouts. Or the Rotary Club. Or the League of Women Voters.

The amendment is about the Citizen's Action Network, a tax-exempt, supposedly nonpartisan, organization that boasts of its ability to elect Democratic candidates nationwide.

It is about Campaign California, a 501(c)(4) organization whose self-described purpose is to strengthen the Democratic Party base in California and the Nation.

It's about Washington Fair Share, another supposedly nonpartisan 501(c)(4) that conducted a 13-city truth drive to unseat Republican incumbent SLADE GORTON.

And it is about the Wisconsin Action Coalition, yet another allegedly nonpartisan tax-exempt that just happened to contact 18 percent of the Wisconsin State population in support of the Senate candidacy of Democrat Ed Garvey.

Mr. President, I ask unanimous consent that the full text of a FEC complaint filed by the Republican senatorial committee against Citizen's Action and its affiliated organizations be printed in the RECORD immediately after my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. DOLE. Mr. President, I also ask unanimous consent that an article entitled "Citizen's Action: Noah's Ark or a Sham?" be printed in the RECORD as well.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 2.)

Mr. DOLE. So, Mr. President, it is no wonder that my colleagues on the other side of the aisle so eagerly support spending limits—they know that an unlimited pool of soft money is waiting in the wings, ready to finance get-out-the-vote and other campaign activities on their behalf.

There is nothing fancy about this spending-limits-soft-money equation.

Give something up with spending limits. But then take it back with nonparty soft money.

Put limits on federally disclosed and federally regulated individual contributions. But place no limits on undisclosed and unregulated nonparty soft money donations.

Place limits on the contributions that our own constituents can make. But place no limits on the amount of unregulated money that labor unions, corporations, and tax-exempts can pump into the campaign finance pipeline.

It is an easy formula, Mr. President, and it is a formula that highlights how nonparty "soft money" is the perfect "campaign vitamin supplement" to aggregate spending limits.

PILING ON THE TAXPAYER

Mr. President, I do not live in a shoebox.

I know why we passed a campaign finance reform bill. In large part, it can be summed up in two simple words: Charles Keating.

It is people like Charles Keating who tried to exploit the campaign finance system, who fed off Congress' own unwillingness to open its eyes to the pending S&L juggernaut, and who—with Congress' passive, if not active, assistance—will make our income tax bills significantly larger as we struggle to finance the S&L bailout.

So, Mr. President, I find it ironic, if not downright irresponsible, for the Senate to call any legislation campaign finance reform when it piles yet another tax burden onto the American people.

That is not right. And the American people know it.

EXHIBIT 1.

BEFORE THE FEDERAL ELECTION COMMISSION

In the Matter of:

Citizen Action, Inc. a national political organization; Citizen Action Political Action Committee, Midwest Academy, Inc., Citizen Leadership Foundation, Inc., Citizen/Labor Energy Coalition, Inc., Citizen/Labor Energy Coalition Foundation, Inc., Citizen/Labor Energy Coalition PAC

And Its Affiliates and Allies:

Wisconsin Action Coalition, Inc., Wisconsin Action Coalition Political Action Committee, Wisconsin Citizen Education Fund, Inc., Washington Fair Share, Inc., Washington Fair Share for Citizen Action Political Action Committee, Washington Fair Education and Research Fund, Inc., Illinois Public Action Council, Inc., Citizen Action Nonpartisan Political Action Federal Campaign Committee, National Consumer Foundation, Inc., Pennsylvania Public Interest Coalition, Inc., Pennsylvania Public Interest Coalition Voters Alliance Federal Fund, Pennsylvania Public Interest Education Fund, Inc., Ohio Public Interest Campaign, Inc., Ohio Public Interest Campaign Political Action Committee, Industrial States Policy Center, Inc., Florida Consumers Federation, Inc., Florida Consumers Federation Foundation, Inc., Citizens Action Coalition of Indiana, Inc., Citizen Action Coalition Political Action Committee of Indiana, Citizen Energy Coalition Education Fund of Indiana, Inc., Maryland Citizen Action Coalition, Inc., Maryland Citizen Action Coalition Political Action Committee, Maryland Citizen Action Coalition Education Fund, Inc., Iowa Citizen Action Network, Inc., Iowa Citizen Action Network Voters Alliance, Inc., Iowa Citizen Action Network Political Action Committee, Iowa Citizen Action Education Foundation, Inc., Campaign California, Inc., Campaign California Committee, Connecticut Citizen Action Group, Inc., Connecticut Citizen Action Group Political Action Committee, Connecticut Citizen Research Group, Inc., Idaho Fair Share, Inc., Idaho Fair Share Research and Education Foundation, Massachusetts Citizen Action, Inc., Massachusetts Citizen's Fund, Inc., Minnesota COACT, Inc., Minnesota COACT Political Action Committee, North Area Training and Resource Institute, Inc., New Hampshire Citizen Action, Inc., New Hampshire Citizen Action Political Action Committee, North Country Institute, Inc., New Jersey Citizen Action, Inc., New Jersey Citizen Policy Education Fund, Inc., Citizen Action of New York Inc., Citizen Action of New York Political Action Committee, Citizen Action Fund of New York, Inc., Oregon Fair Share, Inc., Oregon Fair Share Non-Partisan Action Committee, Oregon Fair Share Research and Education Fund, Inc., Rhode Island Community Labor Coalition, Inc., Rhode Island Community Economic Education Center, Inc., Maine Peoples Alliance, Inc., Maine People's Alliance Campaign Vote, Maine People's Resource Center, Inc., Missouri Citizen/Labor Coalition, Inc., Missouri Coalition Education Foundation, Inc., North Carolina Fair Share, Inc., North Carolina Fair Share Education Fund, Inc., South Carolina Fair Share, Inc., South Carolina Fair Share Education Fund, Inc., and West Virginia Citizen Action Group, Inc.

And the Labor Union PAC's Which Illegally Fund the Citizen Action PACs:

Machinists Non-Partisan Political League, National Education Association Political Action Committee, United Auto Workers V-CAP PAC, AFSCME P.E.O.P.L.E., Communications Workers of America PAC, Engineers Political Education Committee.

And the Campaigns That Accepted Illegal Contributions:

Dukakis For President Committee, Inc., Wyche Fowler For Senate, Terry Sanford For U.S. Senate, A Lot Of People Supporting Tom Daschle, Garvey For Senate, Brock Adams Senate Committee, Friends Of Bob Graham Committee, Mikulski For Senate Committee, Dixon For Senate Committee, Bob Edgar For U.S. Senate, Citizens For Mike Lowry Committee, McMillen For Congress, Citizens For Reese Lindquist, Friends Of Lane Evans, Feighan For Congress Committee, Tom Sawyer Committee, Jim Jontz For Congress Committee, Nagel '88 Committee.

I. INTRODUCTION

The integrity of the system through which political campaigns in the United States are financed is based on the honest and complete disclosure of who contributes money and how it is spent.

This Complaint demonstrates that a network of corporate entities taking advantage of a preferential tax status to push a special interest social agenda has illegally injected the American political system with unreported "soft money" corporate contributions. Organized beneath the umbrella of the Chicago-based group Citizen Action (hereinafter referred to as "the Network"), these groups solicit tax exempt money by door-to-door canvassing among the general public. But adding political endorsement to their solicitation pitch and gathering information that benefits endorsed candidates, these groups are directly and illegally influencing federal elections while avoiding any public disclosure of their activities. This

method is an attempt to evade the Federal Election Campaign Act and the Internal Revenue Code,[1] and allows this network of tax exempt organizations to funnel illegal undisclosed corporate contributions to endorsed candidates throughout the United States. Exhibit 1. It is a classic case of a "cause" believing its end is so right that anything justifies the means used to get there.

In reality, the actions of this network are an unreported scandal of American politics that the Federal Election Commission ("FEC") must investigate and rectify. These illegal activities took place during the 1986 elections, as this Complaint shows. Already there is evidence that these same groups have similar plans to circumvent the law and illegally influence the 1988 federal elections.

In three recent enforcement actions, the FEC has found illegal the standard operating procedures Complainant believes all members of the network named herein use to circumvent the Act. In Matter Under Review 1937 the FEC fined the Illinois Public Action Council, Inc. $5,000 for violating the Act; in MUR 1586 the FEC fined the Sierra Club $5,000; and in MUR 2286 the FEC fined Charlotte SANE, Inc. $1,000.

This Complaint demonstrates that these three cases revealed only a glimpse of this extensive "soft money" network that distorts federal elections in the United States. The facts show that Citizen Action and its network of affiliates have conducted (and plan again to conduct in 1988) an orchestrated series of illegal canvasses and solicitations among the general public. These activities constitute express advocacy under the Act. They result in illegal unreported contributions and expenditures aimed at influencing the election and defeat of selected federal candidates.

At the heart of the Network's method is its canvass/solicitation operations. Although Network officials admit that the purpose of the 501(c)(4)s' canvass is political near elections, the target of the activity at all times is the general public, not the members of the corporation. All the actions beyond the permissible class of the organizations' members that constitute express advocacy concerning a federal election are reportable expenditures and contributions under the Act. By ignoring these provisions of the Act, the members of the Network make illegal corporate contributions and expenditures that violate the law.

This network of incorporated special interest groups has violated federal election law by dispatching paid employees to assist endorsed federal candidates and by producing materials advocating the election or defeat of specific federal candidates. Since the actions of their employees and the content of their materials constitute express advocacy and make them reportable expenditures for the purpose of influencing federal elections, the expenditures are either subject to the Act's provisions governing independent expenditures, 2 U.S.C. 434(b), (c) (1982), or attributable to specific candidates and, therefore, contributions as defined in the Act, 2 U.S.C. 431(8)(A).

If the latter is true, the payments for these communications and personnel and the sources of the groups' funding are subject to the prohibitions and limitations of the Act. *See* 2 U.S.C. 441b, 434; FEC Advisory Opinion ("AO") 1984-24, 1 Fed. Elec. Camp. Fin. Guide (CCH) 5771 (1984). By failing to report, Citizen Action and the members of its network have kept from public view the sources of the funds used to pay for their involvement in federal elections.

In some cases, the 501(c) corporations form separate segregated funds ("PACs") in an attempt to launder the corporate contributions. *E.g.*, MUR 1937, MUR 1586. Each time the FEC has looked at the arrangement between a Network corporation and its PAC, it has found the PACs to be shells and the transactions to be shams constituting illegal corporate expenditures and contributions. *Id.*[2]

The special interest groups that are the subject of this Complaint apparently feel their stated mission of reforming the United States for the better entitles them to play by a different set of rules from all others who spend money influencing federal elections. Although claiming their actions are not subject to the Act, the simple fact is that the members of this Network have found a way to evade the prohibitions of federal election laws and inject the political process with illegal corporate money.

In sum, these groups sit in a glass house constructed with tax exempt dollars and flaunt the law under the guise of "progressive" reform. The members of this network have refused to do what the law plainly requires—solicit and canvass within the Act and account to the public for the money they spend influencing elections.

The effort to evade federal election laws and inject the process with corporate soft money demands the quick attention of the FEC. Accordingly, the National Republican Senatorial Committee, 440 First Street, N.W., Suite 600, Washington, D.C. 20001 files this Complaint against the 501(c)(4) organizations that are the core of this Network, their shell PACs and the connected 501(c)(3) "foundations" through which they solicit tax deductible money to fund their other operations, as is described below. The complete list of defendants and their addresses is attached as Exhibit 2.

The following is a list of the known violations of federal election law by these groups during the 1986 election cycle. In addition, the FEC has the authority to investigate actions that are "about to occur." 11 C.F.R. 111.4 (1988); *see* 2 U.S.C. 437g(a)(2). The NRSC has reason to believe, as will be shown below, that the Citizen Action Network's activities in the 1986 elections (and planned for the 1988 elections) violate the following provisions of the law:

1. The defendants are not "membership organizations" as defined in the law. *See Federal Election Comm'n* v. *National Right to Work Comm.*, 459 U.S. 197 (1982); AO 1977-67, 1 Fed. Elec. Camp. Fin. Guide (CCH) 5326 (1977); 11 C.F.R. 114.1(e);

2. Even if membership organizations, their canvassing constitutes unreported contacts beyond their permissible class that are illegal and undisclosed contributions to specific candidates. 2 U.S.C. 441b;

3. The groups use illegal corporate money to influence federal elections by directly paying for personnel, materials and facilities that aid the campaigns of federal candidates. 2 U.S.C. 441b(a); 11 C.F.R. 114.2(a)(2)(c), (d); 11 C.F.R. 114.10;

4. The defendants fail to report all their communications and use of personnel paid by the corporation as expenditures under the Act; 2 U.S.C. 431(9)(A), 434; 11 C.F.R. 106.1(a);

5. They refuse to report all their activities as either independent expenditures made to influence federal elections, 2 U.S.C. 431(17), 434(b)(6), (c), or as contributions to specific candidates subject to the Act's limits, 2 U.S.C. 431(8)(A), 441(a);

6. The Nework's members hide from public scrutiny the sources of the funds used by the tax-exempt entities, *see* 2 U.S.C. 441b and 441f, through failure to properly register and report as political committees, 2 U.S.C. 431(4), 432, 433 and 434, so that the public cannot know if their sources of funds are corporations, labor unions, individuals giving above the limits allowed by the election laws or other forms of "soft money";

7. Labor PACs appear to be directing funds to Network PACs that then contribute to candidates to whom the PACs have already been given the legal maximum. The FEC must investigate whether these are illegally earmarked contributions in violation of 2 U.S.C. 441f;

8. The publication of help wanted ads by Nework 501(c)(4) corporations expressly advocating the election or defeat of a specific candidate or political party violates the Act. 2 U.S.C. 441b; and

9. Campaigns which accept contributions from, or know of, the activities by the members of the Network which aid their campaigns violate the prohibitions against accepting corporate contributions. 2 U.S.C. 441b(a).

II. FACTS

A. Structure of the 501(c) Contribution Network

Citizen Action, Inc., a 501(c) corporation headquartered in Chicago, Illinois, and Washington, D.C. is the center of the web and the model for this corporate network. Describing itself as a "political organization", Exhibit 3, Citizen Action claims to have affiliate 501(c)s in 24 states with 75 offices, a total combined staff of 1200 and membership in excess of 1.75 million across the United States. Exhibit 4. Citizen Action refuses to make public its contributors, budget or expenditures. All the members of this Network are defendants in this Complaint.

Citizen Action also is closely tied to at least two 501(c)(3) foundations—the Midwest Academy, which according to its brochure trains "organizers" to carry out various projects for "progressive social change", and the Citizens Leadership Foundation, which claims it offers "training in all aspects of the democratic process."

The root of this corporate Network's ability to funnel unreported "soft money" into federal elections is obtaining preferred tax status as a 501(c)(4) organization. In most instances, the groups will also be connected to a 501(c)(3) organization that can accept tax deductible contributions and a PAC. The standard practice is for both groups (and their PAC) to be at the same location and, often, operate with the same officers, directors, and staff. On information and belief, it is these organizations which train (with tax deductible contributions) the indi-

[1] The violations of the Internal Revenue Code by the members of the 501(c) Network are the subject of Complaints being filed simultaneously with the appropraite offices of the Internal Revenue Service.

[2] The scarce resources collected by the PAC in an effort to pretend it is a legitimate organization come almost exclusively not from small grassroots contributors, but from a few labor unions. Labor union contributors include: The International Association of Machinists (five Network members), the United Auto Workers (two), the National Education Association (two), and the American Federation of State and County Municipal Employees (two).

viduals who go out and illegally canvass the general public on behalf of political candidates endorsed by the 501(c)(4). Exhibit 5. The PAC will have few assets of its own, and typically makes only minimal monetary contributions to candidates. Exhibit 6. The PAC, however, is often crucial to the fiction of the 501(c)(4)'s canvassing solicitation/contribution process, as described below.

B. Method

The method of funneling unreported corporate contributions to federal candidates begins with canvassers/fundraisers hired by the 501(c)(4) going door-to-door in neighborhoods across the United States. In a sworn affidavit in a recently closed FEC enforcement action, MUR 1937, an official of Citizen Action's flagship Illinois organization, Illinois Public Action Council, Inc. ("Council"), described the method Complainant believes is the standard operating procedure for all members of the Network:

"Most of the Council's individual members are recruited by a door to door canvass operation that operates . . . every evening. These canvassers operate year in and year out. During periods that are near elections, we ask these canvassers to add to their normal duties. In addition to their job of recruiting members, renewing memberships and raising additional contributions, these canvassers are asked to inform our members of the endorsements made by our political committee. In addition, they distribute partisan literature to both members and others who do not become members.

"Our canvassers are not paid any additional remuneration for the conduct of these additional duties."

MUR 1937, Affidavit of Robert Creamer, Council Executive Director.

In response to FEC Interrogatories, Creamer stated that its connected PAC "contracted with the Council to have Council canvassers distribute literature to members and non-members of the Council," that the "costs of contacting Council members were paid directly by the Council," and that the "Council's costs of contacting non-members were billed to [its PAC]."[3] *Id.*, In MURs 1937 and 1586, the FEC found this method an illegal use of corporate treasury money to influence federal elections. *Id.*

The organizations in the Network developed this scheme partly to overcome the federal election law provision permitting them to communicate a message of express advocacy only to their "members". But under the Act, the term "members" refers only to persons who have met specific requirements, and does not include persons who simply support or contribute to the 501(c)(4). *See, Federal Election Comm'n* v. *National Right to Work Comm.*, 459 U.S. 197 (1982); AO 1977-67, 1 Fed. Elec. Camp. Fin. Guide (CCH) 5326 (1977). Thus, as discussed below, the 501(c) Network's scheme does not work since the canvassers/fundraisers are improperly soliciting persons outside the permissible class (*i.e.* they are contacting non-members).

(1)—Canvass

Creamer's affidavit and responses to interrogatories make it obvious that the aim of the 501(c)s' canvass is to reach the general public. As Creamer stated in his affidavit, there is no difference in a canvasser's solicitation method or target audience when he or she is also carrying a political endorsement. The only difference is the message.

Further evidence that the aim is reaching the general public (and not just the 501(c)(4) corporation's members or permissible class) is contained in the Illinois flagship organization's own description of its canvassing operation. Exhibit 7 is an article from the Illinois Public Action Council's Campaign Against Toxic Waste's newsletter. The lengthy description of a "Day in the Life of a Canvasser" includes note of the fact that a "hundred canvassers across the state * * * knock each evening on thousands of doors." There is the frank admission that: "Once in the neighborhood, the crew's field manager explains the canvasser's boundaries, usually the precinct lines, and sends them off with a few quick words of advice and encouragement." There is no instruction to contact only members if they are bearing a political message. Rather, the canvass' aim is obviously to contact *everyone* in a neighborhood.

There is no evidence that the 501(c)'s solicitation plans call for repeat visits to individuals who are already members (i.e., the permissible class). Since, by definition, the 501(c)s recruit their "members" door-to-door, the 501(c)'s canvass/solicitation in the overwhelmingly majority of instances is, by design, made to a non-member. Only after hearing the pitch (which includes the illegal political message concerning a federal candidate) and if the person gives money, could that person become a "member" even under the convenient and unsupportable definition used by the defendants herein. It is only by chance that an existing "member" of the 501(c)(4) corporation receives a visit from a canvasser/fundraiser.

Thus, any time there is contact with a non-member and the canvasser conveys a political message concerning a specific candidate, an illegal expenditure has been made by the 501(c)(4) corporation and an illegal contribution accepted by the candidate benefiting. Since, as Creamer admits, the political canvass is an integral part of this process "during periods near elections," the canvass is made as a matter of course way beyond the permissible class allowed under the Act. 11 C.F.R. 114.1(e).

The essence of the Network's method is that the 501(c)(4) (and maybe a connected 501(c)(3)) uses its tax exempt status illegally to canvass the general public and raise funds. The canvass itself is illegal under the Act. But, in addition, the funds raised are often spent as "soft money", usually to fund the canvass benefiting specific candidates, sometimes as direct or in-kind contributions to candidates and sometimes as a pass-through to candidates by way of the PAC.

(2)—Use of a PAC

In some instances, such as MUR 1937, the 501(c)(4) activity involves a PAC. The PAC hires the 501(c)'s paid canvassers/fundraisers. In reality, these canvassers/fundraisers are paid to distribute the 501(c)(4)'s literature door-to-door and to solicit donations with a message extolling both social issues and endorsed federal candidates. (Political canvassing among non-members is a contribution under the election laws, and an illegal activity for an incorporated 501(c)(4).) The costs of contacting those they denominate "members" are paid by the 501(c)(4). The 501(c)(4) then uses an undisclosed formula to determine the cost of contacting the non-members (*i.e.*, those who don't contribute to the 501(c)(4) or the 501(c)(3)). In theory, these communications are then in-kind contributions by the PAC to the federal candidate. That amount is then billed to the PAC, generally after the 501(c)(4) has used its resources in the political process to contact the general public. Often the amount is not collected, as MUR 1937 demonstrates.

When it is collected, it is because Labor PACs have contributed money to the Citizen Action PACs in races where the Labor PAC has already given the legal maximum to the candidate benefiting. The truth of the matter is that the Citizen Action PACs are funded almost exclusively not by any grassroots contributions but by the big labor union PACs. The FEC reports of the Citizen Action PACs are the only bit of the Network web on the public record. And they show the Citizen Action PACs as nothing more than shells established by the labor unions to skirt the contribution limits.

This gives rise to questions of illegal earmarking by the Labor PACs. For example, take the Wisconsin Action Coalition ("WAC") and its Wisconsin Action Coalition Political Action Committee ("WAC-PAC"). Exhibit 8. Reports on file with the FEC show that for the 1986 election, WAC raised $15,470, with a total of $14,500 coming from four PACs. The Machinists contributed $5,000 to WAC in May 1986. That was after they gave Democrat candidate Ed Garvey $5,000 in December 1985 and another $5,000 in March 1986.

The National Education Association's PAC found itself in the same position. It gave $5,000 to Garvey on May 9 and again on September 24. But the NEA PAC was not done. On October 7, the NEA PAC gave $5,000 each to both Citizen Action PAC and the Citizen/Labor Energy Coalition ("CLEC") PAC, which is housed in the same building as Citizen Action. And then on October 8, FEC reports show CLEC PAC sent $5,000 to WAC and Citizen Action PAC sent $2,200 to WAC. That's a total of $12,200. What happend to the money? WAC had total disbursements for 1986 of $14,823.94. And WAC reported spending $14,371.19 on independent expenditures against Bob Kasten between October 16 and November 3, 1986. WAC provides an interesting model for what the Citizen Action network considers "grassroots" activities.

Under this scheme, the PAC is obviously a shell. It usually has little resources of its own, and instead passes through the resources of either a labor union PAC that has already given the legal maximum to a candidate or the 501(c)(4), as the FEC found in MUR 1937 and 1586. It is an attempt to allow the 501(c)(4) to use its resources to contact every resident in a neighborhood, whether the resident is a member or not.

[3] It appears that often the 501(c)(4)'s canvassers/fundraisers are also hired by the connected 501(c)(3), which has a name similar to the 501(c)(4). *See* Exhibit 2. The 501(c)(3)s are generally funded by unreported grants and money received from door-to-door solicitations by the same people raising money for the 501(c)(4). These canvassers are instructed to tell potential donors that the 501(c)(4) social welfare organization also has a 501(c)(3) that is permitted to receive tax deductible contributions to conduct "research" and "educational training." Donors are more likely, obviously, to give a tax deductible contribution.

The money received as tax deductible contributions by the 501(c)(3) can then be given back to the 501(c)(4) in the form of payments for the services of the canvassers/fundraisers. The Illinois Citizen Action MUR 1937 demonstrates that the tax deductible 501(c)(3) donations then find their way into federal elections in the form of a loan or debt from the 501(c)(4) to its PAC, which passes it on as an in-kind contribution to a candidate. In some cases the PAC also "hires" the 501(c)(4)'s paid canvassers/fundraisers which allows still more resources to be funneled to the corporation for illegal political contact with the general public.

Also under this scheme, anything the 501(c) wants to funnel into an election (*e.g.*, printed materials, money, office space, etc.) is "loaned" to the PAC. As in MUR 1937, the PAC reports the illegal corporate contribution as a "debt" to the 501(c)(4). In turn, the PAC makes an in-kind contribution to the selected federal candidate. Since the full extent of what the 501(c)(4) gives the PAC in terms of personnel and adminstrative support is never reported (including the donors to the 501(c) and its other disbursements), it is impossible to know how much money is ever spent in federal elections and what the source of that money is. The PAC may or may not every repay the 501(c) corporation. If it does, it is often through a special fundraising held long after the election is over. *Id.*

C. Defendants

1—The Network

A complete list of the defendants, their affiliated 501(c)(3) research foundations elegible to receive tax deductible donations and their connected PACs appears as Exhibit 2. For purposes of this action, Complainant, on information and belief, charges all defendants with utilizing a method and structure that violates the Act. During 1986, a number of these groups engaged in specific violations of the Act that are chronicled below. The Citizen Action Network is gearing up to use this sane illegal method to influence the 1988 election. Exhibits 4, 11, 12, 13.

2—Defendants: Specific Examples in 1986

Citizen Action, a corporation registered in the District of Columbia, enjoys preferred tax status as a 501(c)(4) organization. It is affilated with a 501(c)(3), the Midwest Academy, and a separate segregated fund, Citizen Action Political Action Committee. All are housed at the same address. On information and belief, the officers, directors and staff of all three organizations are essentially the same.

By its own admission, Citizen Action as a 501(c)(4) directly assisted in 1986 United States Senate races in the states of Georgia, North Carolina and South Dakota. Exhibit 9. A review of the relevant FEC reports for the PAC and the affected campaigns does not show these illegal unreported contributions by the 501(c)(4) for canvassing, phone banks, printed materials and professional staff assistance on behalf of the campaigns of *Wyche Fowler, Terry Sanford* and *Tom Daschle.* Nor do the costs of communications with Citizen Action members appear in the 1985–1985 FED Index of Communication Costs. Despite this admission that it advocated the election or defeat of these specific federal candidates and attempted to influence a federal election, the full value of these corporate soft money expenditures that amounted to contributions to the federal candidates are not reported on any FEC forms filed by the corporation (or a PAC) or the campaigns.

What does appear on the FED reports are $5,000 contributions to the Citizens Action Political Action Committee from the Machinists Non-Partisan Political League ("Machinists") (which rents the Citizens Action space in its Washington, D.C. headquarters), the United Auto Workers V-Cap ("UAW"), the Engineers Political Education Committee, the Communictions Workers of America's COPE-PAC, the Bakery, Confectionary & Tobacco Workers International Union PAC, the National Education Association ("NEA"), and $3,450 from the Citizen/Labor Energy Coalition ("CLEC") PAC, which is registered as a separate PAC but is based in Citizens Action's Chicago offices as well. There is no indication that any candidates received direct contributions from Citizens Action PAC. But, according to its FEC reports, the group did spend more than $10,400 in independent expenditures for Colorado Democrat Senate candidate Tim Wirth. The Machinists contributed $9,550 to Wirth; the NEA contributed $9,250 to Wirth, and the UAW contributed $9,050 to Wirth. The FEC must investigate whether there was any illegal earmarking by these PACs of their contributions to Citizens Action PAC.

Also housed at Citizens Action's Chicago headquarters is the CLEC and its affiliated PAC. There appears to be little if any difference between the groups, although they do have separate FEC contribution limits. The same Labor PACs provided virtually all the funding for both entities. Exhibit 6. CLEC-PAC received $5,000 each from the Machinists and the NEA. They also received $3,000 contributions from the Communications Workers of America PAC and $3,000 from the Committee for Good Government in Detroit. This was all the money the CLEC PAC raised during 1986. CLEC PAC spent its money by giving money to WAC, Penn-PIC, the Citizens Action PAC and the CLEC 501(c)(4).

The same illegal earmarking inquiry should be made concerning the Wisconsin Senate race, where FED reports show that Citizens Action PAC contributed $4,500 to Network member Wisconsin Action Coalition ("WAC"). By its own admission, see below, WAC's principle aim in the 1986 election was the defeat of Republican Senator Bob Kasten. The Machinists contributed $9,900 to Garvey; NEA contributed $10,000, and UAW contributed $10,000. Exhibit 8.

Wisconsin Action Coalition (WAC), a corporation registered in the state of Wisconsin, enjoys preferred tax status as a 501(c)(4) organization. It is affiliated with a 501(c)(3), the Wisconsin Citizen Education Fund, and a PAC, the Wisconsin Action Coalition PAC ("WAC-PAC"). All three share the same address. On information and belief, all three have interchangeable directors, officers and staff members. By its own admission, WAC as a 501(c)(4) corporation directly assisted in the 1986 United States Senate race when it "worked for *Ed Garvey* in a U.S. Senate race against incumbent Robert Kasten. WAC, which by itself was responsible for 2¼% of the Garvey vote, came extremely close to unseating Senator Kasten. WAC contacted more than 18% of the state's population, and worked in every Congressional district."

Exhibit 9. WAC claims 75,000 members. Eighteen percent of Wisconsin's 4,785,000 1986 population is 861,300 persons. Eighteen percent of its 3,515,000 1986 voting age population is 632,700 persons. That means WAC, by its own admission, contacted individuals on behalf of Garvey who were not its "members". In fact, WAC conducted a partisan political canvass among the general public on behalf of Garvey.

Despite this admission that it advocated the election or defeat of a specific federal candidate and attempted to influence a federal election, the value of its corporate soft money expenditures that amounted to contributions to the federal candidate are not fully reported on any FEC forms filed by the corporation, its PAC or the Garvey campaign. The FEC's Index of Communication Costs shows a $15,239.86 expenditure on June 30, 1986 for door-to-door canvassing among WAC members. In addition, a letter to the FEC from WAC indicates a $5,250 expenditure in communications with members between October 1 and October 15, 1986 through both door-to-door and phone canvassing, and direct mail. However, the reports do not indicate any similar costs for contacting non-members, despite WAC's declared contacting of at least 632,500 persons. The source of virtually all of WAC's funds were large labor union PACs that had already given the legal maximum to Garvey and other Citizen Action PACs. Exhibit 6.

In addition, a letter from WAC to the FEC explains a $2,500 payment from WAC-PAC to WAC for "General Election Day membership contact services in support of candidate Ed Garvey in the Wisconsin Democratic primary election." [sic]. In light of the illegality of its canvass among the general public, this activity must be investigated for its apparent contacts beyond WAC's permissible class.

Washington Fair Share, a corporation registered in the state of Washington, enjoys preferred tax status as a 501(c)(4) organization. It is affiliated with a 501(c)(3), the Washington Fair Share Education and Research Fund, and a separate segregated fund, Washington Fair Share Political Action Committee. All are housed at the same address. On information and belief, all three also share directors, officers and staff. Indeed, the treasurer of the PAC who signed the 1986 FEC reports is also the president of the 501(c)(4) corporation.

By its own admission, Washington Fair Share as a 501(c)(4) corporation directly assisted in 1986 United States Senate race when it "worked on helping Democrat *Brock Adams* defeat Republican incumbent Slade Gorton for the U.S. Senate seat. WFS conducted a 13-city 'truth drive' on Social Security to call attention to Gorton's dismal record on the issue. The drive covered 1500 miles and made 17 stops around the State.

WFS also helped elect two U.S. Congressmen, *Reese Lindquist* [sic] and *Mike Lowry.*"

Exhibit 9. Despite this admission that it advocated the election or defeat of a specific federal candidate and attempted to influence a federal election, the full value of these corporate soft money expenditures that amounted to contributions to the federal candidates are not reported on any FEC forms filed by the corporation, its PAC or the campaigns. The PAC reports show no expenses for staff, rent or other overhead. While a corporation may pay the administrative and solicitation costs of a PAC for contact with its permissible class, once the aim of the PAC becomes a violation of the Act, such as a canvass of the general public, the financial support by the corporation becomes an illegal contribution.

According to year-end FEC reports, on December 11, 1986, the PAC wrote a check to the 501(c)(4) "to cover the payroll taxes on checks written previously," according to the Year-end FEC report. But no previous checks appear on the FEC report. This disbursement lends credence to the illegal nature of the 501(c)(4)'s corporate support for the PAC.

In addition, the PAC made independent expenditures totaling more than $20,000 in the last three weeks of the 1986 campaign against Slade Gorton. These expenditures coincided with October 27 contributions from both the Machinists and AFSCME. Both of these Labor PACs had given the maximum $10,000 to Brock Adams. The FEC needs to investigate whether the Labor

PACs exercised any illegal direction or earmarked these contributions.

Illinois Public Action Council, a corporation registered in the State of Illinois, enjoys preferred tax status as a 501(c)(4) organization. It is affiliated with a 501(c)(3), the National Consumer Foundation, and a separate segregated fund, Citizen Action Non-Partisan Political Action Committee. All three share the same address. On information and belief, all three also share the same directors, officers and staff.

By its own admission, Illinois Public Action Council as a 501(c)(4) directly assisted in 1986 elections:

"In the 1986 election, the Illinois Public Action Council (IPAC) endorsed 135 candidates for local, state, and national races; 99 won. * * * IPAC's notable victories included re-electing U.S. House Member *Lane Evans* from the 17th District.

Exhibit 9. The full value of these expenditures by the corporation that amounted to contributions to the federal candidates are not reported on any FEC forms filed by the corporation, the PAC or the campaigns. The FEC's Index of Communication Costs lists no entry for this group. In addition, its FEC reports reveal some convoluted bookkeeping and contributions and disbursements during the 1986 cycle that occurred at the same time it was negotiating with the FEC to settle a case from the 1984 election on the very same tactics it employed in 1986. *See* MUR 1937. While IPAC was found guilty of violating the Act and paid a $5,000 fine in MUR 1937, it apparently used the same tactics in 1986 to benefit congressional candidate Lane Evans and Senator Alan Dixon.

FEC reports for 1986 filed by the PAC show in-kind disbursements totaling $2,122.81 to Evans and $839.19 to Dixon. Their reports also show a loan from the 501(c)(4) totaling nearly $13,000 that was not paid off until December 15, 1986. That occurred several months after the FEC reached its finding against the Council that such a loan was an illegal corporate contribution in the 1984 election. And it appears from the PAC's year-end 1986 FEC report that it had the money to repay the loan only because it received a December 8, 1986 contribution of $20,000 from Lane Evans' campaign committee. The PAC reported the money as an "invoice for services" on Line 11a. This merits the FEC's attention since it means that either the PAC accepted a contribution in excess of the limits, or the PAC drastically undervalued its in-kind contributions to Evans during the campaign to escape the contribution limits, or the 501(c)(4) made large illegal contributions to Evans that were never disclosed.

Pennsylvania Public Interest Coalition, a corporation registered in the state of Pennsylvania, enjoys preferred tax status as a 501(c)(4) organization. It is affiliated with a 501(c)(3), the Pennsylvania Public Interest Education Fund, and a separate segregated fund, Pennsylvania Public Interest Coalition Voters Alliance. All are housed in the same location. On information and belief, all three also share the same directors, officers and staff.

By its own admission, Pennsylvania Public Interest Coalition ("PennPIC") as a 501(c)(4) directly assisted in 1986 elections:

"The Pennsylvania Public Interest Coalition dedicated almost all of its electoral activities to the U.S. Senate Race between Bob Edgar and incumbent Arlen Specter. PennPIC contacted 325,000 people on behalf of Edgar, using the door-to-door canvass, phone banks, and literature distribution. Although Senator Specter held onto his seat, PennPIC made the race closer than had been anticipated."

Exhibit 9. Although admitting they canvassed beyond their permissible class, thereby making a contribution to Edgar, the value of these corporate contributions has never been fully reported or explained to the FEC. Nor did the Edgar campaign or the PAC fully report these illegal soft money corporate contributions.

As opposed to virtually all of the other members of the Network, PennPIC does report costs of communications to its "members". While its canvass/solicitation method fails to meet the test set forth in the law, it is noteworthy that this one Network group operates like the others but reports differently. However, PennPIC reports costs of $24,595 in contacting members for Edgar. While contacting 325,00 people for Edgar, they claim only $3,014.15 in total costs of contacting non-members. The FEC needs to investigate these costs of contacting non-members in a door-to-door canvass among the general public.

The sources of PennPIC-PAC's money is instructive. Indeed, the PAC only reported raising and spending about $11,000. Of that total, $9,500 came from these PACs. They received $5,000 from the Machinists (who gave the maximum to Edgar); $2,000 from Citizen Action PAC in July (the Machinists gave Citizen Action PAC $5,000 five months earlier); and Citizen/Labor Energy Coalition PAC (headquartered with Citizen Action) gave $2,500 in October, two days after receiving a $5,000 contribution from the NEA's PAC (which had given the maximum to Edgar by September).

PennPIC-PAC also made to the 501(c)(4) "advance payments for rent, phone, health insurance in support of", according to FEC reports. However, the advances appear to bear no resemblance to the amounts of in-kind contributions to candidates appearing on the FEC report. This discrepancy merits further inquiry to determine the adequacy of the method and amount of the reimbursements.

Ohio Public Interest Campaign, a corporation registered in the state of Ohio, enjoys preferred tax status as a 501(c)(4) organization. It is affiliated with a 501(c)(3), the Industrial States Policy Center, and a separate segregated fund, Ohio Public Interest Campaign Political Action Committee. All three share the same address. On information and belief, all three also share officers, directors and staff.

By its own admission, Ohio Public Interest Campaign as a 501(c)(4) directly assisted in 1986 elections:

"The Ohio Public Interest Campaign won in all the races where it supported candidates. . . . *U.S. Congressman Ed Feighan* and *Tom Sawyer* were also elected with OPIC's help."

Exhibit 9. Despite this admission that it advocated the election or defeat of specific federal candidates and attempted to influence a federal election, these corporate soft money expenditures that amounted to contributions to the federal candidates are not fully reported on any FEC forms filed by the corporation, its PAC or the campaigns.

Florida Consumers Federation, a corporation registered in the state of Florida, enjoys preferred tax status as a 501(c)(4) organization. It is affiliated with a 501(c)(3), the Florida Consumer Federation Foundation. Both are located at the same address. On information and belief, all three also share officers, directors and staff.

By its own admission, Florida Consumers Federation as a 501(c)(4) directly assisted in 1986 elections:

"Florida Consumers Federation focused most of its election efforts in Palm Beach and Broward Counties. . . . FCF also assisted the *National Council of Senior Citizens* to help elect Governor *Bob Graham* to the U.S. Senate."

Exhibit 9. Despite this admission that it advocated the election or defeat of a specific federal candidate and attempted to influence a federal election, these corporate soft money expenditures that amounted to contributions to the federal candidates are not fully reported on any FEC forms filed by the corporation or the campaign.

Citizens Action Coalition of Indiana, a corporation registered in the state of Indiana, enjoys preferred tax status as a 501(c)(4) organization. It is affiliated with a 501(c)(3), the Citizen Energy Coalition Education Fund, and a separate segregated fund, Citizen Action Coalition of Indiana Political Action Committee. All are located at the same address. On information and belief, all three also share officers, directors and staff.

By its own admission, Citizens Action Coalition of Indiana as a 501(c)(4) directly assisted in 1986 elections:

"Citizens Action Coalition of Indiana concentrated much of its attention on the race for U.S. House of Representatives in Indiana's Fifth District. With the incumbent Republican retiring, most people thought the new Republican candidate, who was identified with the Religious Right, would hold onto the seat. However, Democrat State Senator *Jim Jontz*, a long-time CAC leader, was elected to Congress with 52% of the vote."

Exhibit 9. Despite this admission that it advocated the election or defeat of a specific federal candidate and attempted to influence a federal election, these corporate soft money expenditures that amounted to contributions to a federal candidate are not fully reported on any FEC forms filed by the corporation, its PAC or the campaigns.

In addition, it appears that much of the PAC's activity was funded by one Labor PAC. The UAW sent the Indiana PAC a $5,000 contribution on October 29, 1986. On October 31, the PAC gave congressional candidate Tom Ward (Indiana 3) an $800 contribution. The UAW had already given Ward (and Senate candidate Jill Long) the legal maximum, according to FEC reports. The UAW contribution, plus $500 from Lodge 2040 PAC in Evansville, amount to all the money the PAC raised in 1986. Those contributions allowed it to spend funds in the closing days of the campaign for printed materials. However, the PAC failed to indicate which, if any candidate, benefited from the expenditures.

Maryland Citizen Action Coalition, a corporation registered in the State of Maryland, enjoys preferred tax status as a 501(c)(4) organization. It is affiliated with a 501(c)(3), the Maryland Citizen Action Coalition Education Fund, and a separate segregated fund, Maryland Citizen Action Coalition Political Action committee. All three are located at the same address. On information an belief, all three also share officers, directors and staff.

By its own admission, Maryland Citizens Action Coalition as a 501(c)(4) directly assisted in 1986 elections:

"Maryland Citizen Action Coalition endorsed 25 candidates in the 1986 elections, and 24 won. In the Fourth U.S. Congression-

al District, *Thomas McMillen* was elected by less than 500 votes. MCAC worked on voter contact and education to help win that race. MCAC also helped to elect U.S. Congresswoman *Barbara Mikulski* to the U.S. Senate."

Exhibit 9. Despite this admission that it advocated the election or defeat of a specific federal candidate and attempted to influence a federal election, these corporate soft money expenditures that amounted to contributions to the federal candidate are not fully reported on any FEC forms filed by the corporation, its PAC or the campaigns.

The PAC's FEC reports show a $300 contribution from AFSCME and a $360 contribution from the congressional campaign committee of Stewart Bainum (Maryland 8). The loan disbursement appears to be $360 to the 501(c)(4) for "salaries", probably for Bainum.

Iowa Citizen Action Network, a corporation registered in the state of Iowa, enjoys preferred tax status as a 501(c)(4) organization. It is affiliated with a 501(c)(3), the Iowa Citizen Action Education Fund, and a separate segregated fund, Iowa Citizen Action Network Political Action Committee. All three are located at the same address. On information and belief, all three also share officers, directors and staff. Indeed, the same individual who signed the FEC reports for the PAC is the secretary for the 501(c)(3) corporation.

By its own admission, Iowa Citizen Action Network as a 501(c)(4) directly assisted in 1986 elections:

"Iowa Citizen Action Network was successful in electing eight board members to the Iowa State Legislature, and also contributed greatly to electing *David Nagle* to represent the Third District in the U.S. House of Representatives.".

Exhibit 9. Despite this admission that it advocated the election or defeat of a specific federal candidate and attempted to influence a federal election, these corporate soft money expenditures that amounted to contributions to the federal candidate are not fully reported on any FEC forms filed by the corporation, its PAC or the campaigns.

Campaign California, a corporation registered in the state of California, enjoys preferred tax status as a 501(c)(4) organization. It is affiliated with a separate segregated fund, the Campaign California Committee. Both are located at the same address and, on information and belief, share many of the same officers, directors and staff members.

By its own admission, Campaign California, as a 501(c)(4) corporation wants to target a message to the general public that will help elect partisan political candidates. For example, in seeking a new Executive Director for the 501(c)(4), an advertisement in its 2nd Quarter 1987 newsletter, stated:

"Position: Executive Director for Campaign California, *a political organization working to elect progressive candidates* and pass initiatives at the local and state levels; to build local progressive governing coalitions, increase voter participation, and *strengthen the Democratic Party base in California and the nation.*"

Exhibit 10 (emphasis added).

3. Defendants: Specific Examples in the 1988 Election

The same tactic of reaching the general public, rather than its members, engaged in by the Network in support of its endorsed candidates in the 1986 elections is already visible as the 1988 elections near. It provides additional evidence that the groups' goal is to reach the general public with their partisan political message.

For example in Wisconsin in 1986, WAC ran an ad in a general circulation newspaper that included the words: ". . . learn political organizing and defeat Bob Kasten this summer with the Wisconsin Action Coalition." Exhibit 11. This ad, which contains express advocacy on behalf of a federal candidate, is by definition aimed beyond the permissible class.

Already in 1988 Citizen Action has engaged in similar tactics. The Washington Post on May 8, 9, 11, 16, 18, 22 and 25, 1988 carried an ad with the headline "Presidential Campaign." It goes on to say: "This summer, help elect a democrat to the White House. Citizen Action, the nation's largest progressive organization, is fighting for affordable health care & working to defeat George Bush in November." Exhibit 12.

And the same group showed that the true aim of its canvassing work is the general public when it ran an ad seeking: "Political Work/Tele-fundraisers. Work on issues that make a difference. Citizen Action building grassroots support nationwide. Our 1988 agenda: * Lobby on national health care legislation. * Working on the democratic presidential campaign." Exhibit 13. Washington Post, June 5, 6, 7, May 31, 1988.

These ads aim a partisan political message at the general public. In the case of the Wisconsin ad, they benefited Ed Garvey. In the case of the Citizen Action ads, they benefit the Mike Dukakis for President Committee.

But the most blatant example of Citizens Action's fictional analysis of the Act and Internal Revenue Code is Exhibit 14. That newspaper article describes a joint venture between Citizen Action and the Democratic National Committee, which it appears is tied to the recruitment of tele-fundraisers described above. Exhibit 13. According to the April 22, 1988 Los Angeles Times: "When the phone rings at the homes of several hundred thousand voters registered as Democrats, it will be signaling a direct pitch for the Democratic presidential candidate. Ira Arlook, executive director of Citizen Action, said the phone call will be designed to touch the issues the individual voters believe are crucial to the country."

Citizen Action is utilizing by phone the same scheme it uses through door-to-door canvassing to reach the general public (rather than its "members") and to funnel illegal corporate resources to federal candidates. If Citizen Action was truly contacting only its members, it would not need the Democratic National Committee. Citizen Action, presumably, knows who its members are. Such egregious corporate contributions to the Dukakis for President Committee must be halted by the FEC. At the very least, the Dukakis for President Committee should put a stop to this circumvention of the spending limits imposed by the publicly-funded presidential campaign finance system. No amount of pious rhetoric about being "nonpartisan" and canvassing only members can hide the reality of these election law violations.

III. LEGAL ANALYSIS

A. The Solicitation/Canvassing Method Used by the Members of the 501(c) Network Violates the Act

The soliciting/canvassing method employed by the 501(c) network (described on pages 11-14) is illegal and violates the Act in two ways: 1) the 501(c)(4)s are not membership organizations as defined in the statute and under the holdings of the Supreme Court, and, 2) virtually all their canvassing is done to the general public and constitutes illegal corporate contributions and expenditures on behalf of endorsed candidates.

Under federal election law, a corporation or a PAC established by a corporation may solicit contributions to such a fund only from its permissible class. 2 U.S.C. 441b(b)(4)(A)(i). A corporation without capital stock, such as virtually all the "members" of the 501(c) network, may solicit contributions from members of the corporation without capital stock. 2 U.S.C. 441b(b)(4)(C). "The effect of this proviso is to limit solicitation by nonprofit corporations to those persons attached in some way to it by its corporate structure." *Federal Election Comm'n v. National Right to Work Comm.*, 459 U.S. 197, 202 (1982). The standard canvassing method of the 501(c) network violates this rule.

1. The 501(c)'s Fail the Test of "Membership Organizations"

A "member" is defined as any person who is currently satisfying the requirements for membership in a corporation without capital stock. 11 C.F.R. 114.1(e). A person is not considered a "member" if the only requirement for membership is a contribution. *Id.* Rather, as the Court held in *National Right to Work*, the key test to being a "member" is that the members have very specific obligations and rights to participate in the governance of the organization.

The Court has said that a determination that " 'members' include anyone who has responded to one of the corporation's essentially random mass mailings would, we think, open the door to all but unlimited corporate solicitation and thereby render meaningless the statutory limitation to 'members.' " 459 U.S. at 204. By analogy, this would apply to the random door-to-door solictation/canvassing employed by the 501(c) defendants in this case.

Interpreting this Supreme Court holding and its Regulations in a series of enforcement matters and MURs, the FEC has concluded that a person is a "member" of a corporation without capital stock if:

he or she has knowingly taken some affirmative steps to become a member of the organization, such as donating money and receiving a membership card;

the membership relationship is evidenced by the existence of rights and obligations toward the corporation, such as voting for officers, voting on the day-to-day affairs of the corporation, having the right to attend membership meetings, exercising formal control over the expenditure of the contributions or playing a part in the administration of the corporation. It is not sufficient to be asked to respond to polls, questionnaires, petitions and other fundraising/membership involvement techniques.

there is a predetermined minimum amount for annual dues or contributions that are assessed and collected on a regular basis.

See Id.; MUR 1860, General Counsel's Report.

In reaching its conclusion that the purported members of an organization were not sufficiently attached to the corporate structure, the Supreme Court reasoned that they played "no part in the operation or administration of the corporation," that they "elect no corporate officials, and indeed there are apparently no membership meetings," and that there "is no indication [the group]'s asserted members exercise any control over the expenditure of their contributions." 459 U.S. at 206.

Although one of the factors in the Court's opinion was that the group's corporate documents disclaimed the existence of members, this was not the sole basis for the holding. Rather, all these factors in conjunction with one another were noted by the Court when it stated: "We think that under these circumstances, those solicited were insufficiently attached to the corporate structure of [the group] to qualify as 'members' under the statutory proviso." *Id.*

The canvass' objective of reaching the general public indicates that these required "circumstances" are not present within the 501(c) Network. Accordingly, the FEC needs to investigate.

2. The 502(c)'s Illegally Canvass the General Public on Behalf of Endorsed Candidates

Even if an FEC investigation somehow shows that some or all of the 501(c)(4)s meet the legal test of being membership organizations, their method of canvassing violates the Act. The aim of the 501(c)(4)s' canvass is to contact the general public, and not just their permissible class.

The 501(c)(4) method is to contact the general public in door-to-door solicitation/canvassing. After giving the illegal pitch for its endorsed federal candidate(s), the 501(c)(4) employee hopes the citizen will give a donation. Under their fiction, the giving of that donation conveys a retroactive status of "member" on the donor. This is a sham which allows Citizen Action and its affiliates to fulfill their stated mission as "a *national citizens political organization* . . . dedicated to increasing citizen participation in economic and *political decision-making.*" Exhibit 3. (emphasis added).

To believe that the 501(c)(4)s' method is to contact their members, with some incidental contact with non-members, is to suspend belief in reality. To accept the 501(c)(4)s' analysis of proper contact with "members" is to believe that "membership" meeting the criteria of the law can be conferred on the stoop of a house. This is especially incredible since the canvassing that constitutes the illegal corporate contribution or expenditure takes place before the person even contributes any money, the preliminary step to becoming a "member".

In fact, the 501(c)(4) Network's entire method of political canvassing is geared to non-members. Their actions and methods belie their claim that they meet the definition of "membership organization". Only a minuscule number of solicitations and political endorsements are actually conveyed to individuals within the permissible class. That means virtually all the door-to-door work by the 501(c)(4)s' employees constitutes illegal contributions and expenditures from a corporation that evades public disclosure.

B. Cited Actions Influence Federal Elections

1. The 501(c) Members' Canvassing and Other Activities Constitute Express Advocacy Under the Act.

a. *The Act's Standards.*—The FEC has developed a test for whether certain activities such as the ones cited herein, are subject to the Act, its reporting requirements and its limitations. In its ruling, the FEC has consistently taken the position that expenditures are subject to the Act where they constitute express advocacy made for the purpose of influencing a federal election as judged by the act's proximity to an election. In other words, the FEC will examine whether the activity and message are clearly political (advocating the election or defeat of a specific candidate and whether there are clear connections between the organization and the candidate's campaign).

The actions described in this Complaint fall squarely within that articulated test. Citizen Action, its affiliates and the other members of its Network mentioned herein, perhaps because they feel they enjoy a position of moral superiority conferred by their preferred tax status, have chosen to ignore this legal test. Nonetheless, the actions of the 501(c) network are designed to influence federal elections under the FEC's test. Their expenditures are paid for by corporations. That is against the law. The FEC needs to enforce the law and make the defendants in this matter play by the same rules as other groups attempting to influence federal elections.

A tenet of federal election law is that the expenditure of funds by corporations, or the use of corporate funds by any other entity, to influence a federal election is prohibited. 2 U.S.C. 441b. As their own words and actions demonstrate, Citizen Action and the members of its Network have violated this law. They cannot evade this prohibition by invoking their status as 501(c) entities dedicated to "social welfare" or "education" of the public. As the FEC found in MUR 1937, the prohibition on corporate expenditures and contributions does not distinguish between tax-exempt and other corporations. MUR 1937 (citing 2 U.S.C. 441b; 11 C.F.R. 114.1(a)(2)(iii), 114.3(a)(2), 114.4(a)(1)(ii), 114.5 (b)-(i) and 114.7). Nor has such a distinction even been found by the courts. *See* AO 1987-7, 1 Fed. Elec. Camp. Fin. Guide (CCH) 5889 (1987).

In conducting analyses similar to the one required in this case, the FEC has scrutinized an organization to determine whether its activities were covered by the Act. This analysis has included several factors, including consideration of the text of the message and activity prepared for the general public, the timing of those communications and other evidence bearing on "an election-connected or election-influencing purpose." AO 1984-41, 1 Fed. Elec. Camp. Fin. Guide (CCH) 5787 (1984).

The FEC has reviewed the pre-election activities of an organization alleging an interest only in issues, not elections. AO 1980-106, 1 Fed. Elec. Camp. Fin. Guide (CCH) 5582 (1980). By examining the circumstances surrounding the organization's activities, it found the distribution of certain materials "designed to influence the readers' choice in the 1980 presidential election, rather than simply to promote discussion of issues." *Id.*

The FEC has been particularly alert to whether a communication or activity is election-related if the expenditure could violate the Act's prohibition on corporate spending. *See, e.g.,* AO 1986-26, 1 Fed. Elec. Camp. Fin. Guide (CCH) 5866 (1986); AO 1984-24, 1 Fed. Elec. Camp. Fin. Guide (CCH) 5771 (1984); *accord California Medical Ass'n v. FEC,* 453 U.S. 182, 200 (1981) ("the statute as a whole imposes far *fewer* restrictions on individuals and unincorporated associations than it does on corporations and unions") (emphasis in original). It has specifically noted that the Act "subjects corporations . . . to stricter standards than individuals when Federal elections are concerned." AO 1978-102, 1 Fed. Elec. Camp. Fin. Guide (CCH) 5397 (1978).

Indeed, individual members of the Commission have publicly recognized the importance of this test in the case of a tax exempt entity. Expressing his own view in testimony last year before a House subcommittee, then FEC Chairman Scott Thomas said:

"[If] it were determined that it was fairly clear what the purpose of the activities were, they would cross the line of being contributions or expenditures for the purpose of influencing the federal election, then of course yes, we would be in the posture of trying to determine whether the group should register, whether it has crossed the border in terms of being a corporation that made prohibited expenditures."

Thomas also stated: "[E]ven though a corporation or labor organization may be tax exempt, if it makes a contribution or expenditure in connection with a federal election, the FEC is charged with the duty to regulate such activity. . . . For the most part, *public* electioneering activity by a 501(c) (3) or (4) tax exempt corporation will be a violation of election law *and* contrary to the rules for retaining tax-exempt status." Statement of Scott E. Thomas before Subcommittee on Oversight of the House Ways and Means Committee, March 12, 1987 (emphasis in original).

It is also clear that the attempts by some members of the Network to wash their 501(c) corporate funds through connected PACs cannot withstand legal scrutiny. The FEC dealt squarely with this issue in Advisory Opinion 1984-24. It noted: "Except for certain activities such as internal communications and nonpartisan activities, the act requires that a corporation or labor organization direct and finance its political activities solely through the use of the voluntary contributions in its separate segregated fund and not through the use of general treasury funds. 117 Cong. Rec. 43381 (Remarks of Rep. Hansen). . . . The regulations specifically provide that a corporation or labor organization may not use the establishment, administration, and solicitation process as a means of exchanging treasury monies for voluntary contributions. 11 C.F.R. 114.5(b)." Id. at 11,082.

That Advisory Opinion continues with the explicit warning that "Only the monies in the separate segregated fund may be disbursed for political purposes, and the corporation may not use its general treasury funds for such purpose." The opinion states:

"In this regard, the Act and regulations prohibit a corporation from using its general treasury funds to provide goods and services at no charge to candidates in any Federal election. *A corporation's donation of the services of its employees and the use of its facilities incident to its employees' services qualifies as a gift of something of value to the candidate.* Thus, the expenditure of corporate treasury funds to provide such services and facilities falls squarely within the prohibition of 2 U.S.C. 441b. Nothing in the Act or regulations excludes such corporate disbursements from the Act's prohibition. On the contrary, *Commission regulations specifically define a contribution as the payment of compensation to a person who renders services to a candidate or political committee or the provision of goods or services at less than the usual and normal charge for them.* . . . The prohibition of 2 U.S.C. 441b also includes advances by a corporation of its general treasury funds and the extension of credit whch is not made in the ordinary course of the corporation's business and on terms similar to those extended to non-political debtors."

Id. at 11,083 (citations omitted) (emphasis added). It is clear from the 501(c)'s descriptions of their own canvassing and other election-related activities that they went far

beyond the safe harbors provided by the Act, the FEC and the courts.

b. *Precedent on 501(c)s*—Within this legal framework, the FEC has three times examined the standard methods employed by members of the 501(c) corporate Network and found illegalities each time. The FEC found that the standard method that is the subject of this Complaint entails express advocacy by the 501(c)(4) corporation, which is attributed to the connected PAC as a debt. In some cases, the activity is reported to the campaign as an in-kind contribution from the PAC. As the FEC noted in MUR 1586, this method violates "2 U.S.C. 441b(a) by using corporate treasury money to make expenditures to support federal candidates, which were later reimbursed by the [PAC]. These initial disbursements of corporate treasury money constituted corporate contributions and/or expenditures in violation of the Act." Conciliation Agreement at 4. The method employed in this MUR by the Council and CANPAC is an example of how the Network operates.

In reviewing the specific facts of MUR 1937 involving Illinois Public Action Council (Council) and the Citizen Action Non-Partisan Political Action League ("CANPAC"), the FEC found that the disbursements, even though reported by CANPAC, were "corporate in origin." In other words, they were in fact made by the Council, an incorporated 501(c)(4) organization. The FEC concluded that they constituted illegal corporate expenditures and contributions under 2 U.S.C. 441b. The FEC rejected the contention that the Council's disbursements were not expenditures, but merely "accounts receivable from CANPAC to the Council." Citing Advisory Opinion 1984-24, the General Counsel's Report to the FEC found that "the activities described involved initial disbursements of corporate funds for activities in furtherance of the election of federal candidates."

The FEC also rejected the argument that the Council-CANPAC arrangement was a legitimate extension of credit under 11 C.F.R. 114.10: "This regulation was not meant to apply to a situation such as the present matter where the political committee is connected to the corporation. As stated in AO 1984-24, 'section 114.10 is intended to apply to commercial transactions made in the ordinary course of a corporation's business, where it extends credit as part of such a transaction to a political purchaser on terms comparable to those for similar non-political purchasers.'" MUR 1937, General Counsel's Brief.

The 501(c)(4) defendant also argued that the Act's prohibition on corporate contributions did not apply to 501(c) groups. Citing the plain wording of the statute, the FEC said the prohibition applies to "any corporation" and that the statute does not distinguish (as the Council tried to maintain) between organizations with capital stock and other corporations. The FEC noted that its Regulations prohibiting corporate contributions explicitly extend to non-capital stock corporations and membership corporations. This is true for the definitional sections, *e.g.*, 11 C.F.R. 114.1(a)(2)(iii) (applying to a "corporation, labor organization, membership organization, cooperative, or corporation without capital stock"); sections referring to communications to a restricted class, *e.g.*, 11 C.F.R. 114.3(a)(2), 114.4(a)(ii) ("incorporated membership organization, incorporated trade association, incorporated corporative or corporation without capital stock"), and sections referring specifically to the permissible activities of PACs, *e.g.*, 11 C.F.R. 114.5 (b)-(i), 114.7 ("corporations, labor organizations, membership organizations, cooperatives or corporations without capital stock"). *Accord* AO 1987-7, 1 Fed. Elec. Camp. Fin. Guide (CCH) 5889 (1987) (finding 501(c)(4) corporation subject to prohibition of 2 U.S.C. 441b).

Thus, the FEC has held 501(c)s to the same standards as other corporations attempting to influence federal elections. The activities of these 501(c)s accordingly violate a series of the Act's prohibitions.

2. Specific Violations

a. Illegal Corporate Expenditures and Contributions.—A basic tenet of federal election law is that contributions or expenditures by corporations are prohibited:

"It is unlawful for any national bank, or any corporation organized by authority of any law of Congress, to make a contribution or expenditure in connection with any election to any political office."

2 U.S.C. 441b(a). This prohibition applies whether the contribution is in the form of money, goods or services (including those provided by paid employees of the corporation). Neither candidates or political committees can accept such contributions, nor may officers and directors of corporations provide consent for such contributions or expenditures to be made on the incorporated entity's behalf. 11 C.F.R. 114.2 (a)(2), (c), and (d). These 501(c) defendants prefer to operate as if the laws do not apply to them. Either their actions constitute independent expenditures made with prohibited funds or the candidates who are benefiting from their expenditures are receiving illegal corporate contributions. The FEC must determine which and take the appropriate remedial action.

b. Failure to Report Activities as Expenditures Under the Act.—Under the FEC's analysis, any 501(c) defendant failing to report the costs of its activities as expenditures violates the Act. This applies to the costs of their illegal canvassing on behalf of endorsed federal candidates as well as contributions of employees, printed materials and other resources. Any actions by these groups that specifically call for either the election or defeat of a specific candidate are reportable.

These activities were paid for by 501(c)(4)s, all of which are corporations, for the purpose of influencing either the 1986 or 1988 federal elections. 2 U.S.C. 431(9)(A). These defendants violated the Act by failing to report their expenditures, 2 U.S.C. 434, and by failing to allocate the expenditures to the specific candidates who benefited. 11 C.F.R. 106.1(a). Even if the defendants claim they were only communicating with their members (which is absured on its face), they have violated the Act if the 501(c)(4)s failed to report on Form 7 of the costs of communicating with their "members".

c. Failing to Report Ads as Independent Expenditures or Contributions.—Since the activities described herein are something of value given to influence a federal election, they constitute either independent expenditures by the 501(c) group involved or contributions by the group to the specific candidate opposing the candidate criticized or the candidate who was endorsed. In either case, the 501(c) corporation has chosen to cast itself as above the law and has failed to either register or report its activity fully. Since all these defendants are incorporated and not within the exception provided by *FEC v. Massachusetts Citizens For Life, Inc.*, 107 S. Ct. 616 (1986), the expenditures themselves are illegal. 2 U.S.C. 441b.

An "independent expenditure" is defined as an expenditure by a person or political committee "expressly advocating the election or defeat of a clearly identified candidate which is made without cooperation or consultation with any candidate, or any authorized committee or agent of such candidate, and which is not made in concert with, or at the request or suggestion of, any candidate, or any authorized committee or agent of such candidate." 2 U.S.C. 431(17). The law requires that such independent expenditures be fully reported. 2 U.S.C. 434(c). According to the Supreme Court in *Massachusetts Citizens for Life* at 630:

"[A]n independent expenditure of as little as $250 . . . will trigger the disclosure provisions of section 434(c). As a result, [the organization] will be required to identify all contributions who annually provide in the aggregate $200 in funds intended to influence elections, will have to specify all recipients of independent spending amounting to more than $200, and will be bound to identify all persons making contributions over $200 who request that the money be used for independent expenditures."

The 501(c) defendants have failed to report their independent expenditures, again preferring to hold themselves as above the law. The FEC must investigate whether these groups consulted with any leaders or agents of a national party committee in deciding which candidates to criticize or praise.

If the canvassing and other activities and materials are a contribution to a federal candidate, 2 U.S.C. 431(8)(A), they are subject to the contribution limits of the Act. None of the 501(c) defendants have qualified with the FEC as multi-candidate committees. 2 U.S.C. 441a(a)(4). That means that the 501(c) groups, if they were a legal source, would be limited to contributing $1,000 for the primary election and $1,000 for the general election. 2 U.S.C. 441a(a). The FEC must investigate whether this limit was exceeded by these activities.

d. The Members of the 501(c) Network Are "Political Committees" Which Have Violated Their Legal Obligation to Register With the FEC And Report Their Election Influencing Activities.—The members of the 501(c) Network that are defendants in this action are hiding from public scrutiny the sources of the money they are using to influence federal elections in which they are participating. The central theory behind the federal election laws is that the public must be able to scrutinze all the sources of funding in a federal election. It is *only* through this public knowledge that honest and above-board federal election campaigns will be conducted. Yet by refusing to register as a political committee making expenditures under the Act, these 501(c)(4) groups ignore this disclosure requirement. 2 U.S.C 431(4), 432, 433, 434. The Act defines a political committee as "any committee, club, association, or other group of persons" which receives contributions or expenditures aggregating more than $1,000 in a calendar year for the purpose of influencing a federal election. 2 U.S.C. 431(4)(A).

The FEC has found that where even a "loose association" of individuals makes "expenditures", as defined in the Act, in excess of $1,000, it becomes a political committee. See AO 1980-106, 1 Fed. Elec. Camp. Fin. Guide (CCH) 5582 (1980). In addition, the FEC has articulated standards under which an organization receiving contributions

from others becomes a political committee subject to the Act's public disclosure requirements. AO 1986-38, 1 Fed. Elec. Camp. Fin. Guide (CCH) 5876 (1986). Under these rulings, the 501(c) defendants in this action come under the Act's registration and reporting standards.

Furthermore, according to the Court,

"should [the organization's] independent spending become so extensive that the organizations major purpose may be regarded as campaign activity, the corporation would be classified as a political committee. [*See Buckley v. Valeo,* 424 U.S. 1, 79 (1976).] As such, it would automatically be subject to the obligations and restrictions applicable to those groups whose primary objective is to influence political campaigns."

Massachusetts Citizens for Life, 107 S. Ct. at 630, The campaign activity of each of these organizations is integral to their operations, thereby constituting a major purpose of the organizations. Thus, each of these organizations should be treated as a political committee subject to the Act's reporting requirements for political committees.

Each defendant member of the 501(c) Network, as their own words and actions demonstrate, far exceeded this threshold through their canvassing and expenditures on behalf of federal candidates. See Exhibits 3, 5-11.

The Act further requires all political committees to register with the FEC and file regular reports of their receipts and disbursements disclosing to the public their political activity. 2 U.S.C 433-434. Thus, the 501(c) defendants are violating this law. The fact of the matter is that these 501(c) are very active at criticizing others who they feel are not adhering to the law and their social obligations. But the American people have the right to know that these special interest groups are engaging in express advocacy on behalf of their endorsed candidates. The public should be able to scrutinize the extent to which these groups are involved in federal elections, who they are supporting and with whose money.

e. Labor PAC Contributions to Network Members Cannot be Earmarked for Specific Candidates Under the Act.—The Labor PACs that provide the overhwhelming majority of the funding for the "grassroots" Citizen Action Network PACs appear to be illegally earmarking contributions through the PACs to candidates to which they have already given the legal maximum. The center of the apparent laundering scheme is Citizen Action and the Citizen-Labor Energy Coalition, which are housed in the same Chicago office but claim different contribution limits. Under the Act, if the Labor PACs are directing the 501(c) Network PACs to contribute to condidates to whom they have given the maximum, it is an evasion of the campaign law limits and an illegally earmarked contribution. 2 U.S.C. 41f.

Specifically, the FEC should review the contributions of the Machinists PAC (Washington, Illinois, Pennsylvania, Wisconsin through Citizen Action and Idaho through Citizen Action, and Pennsylvania through CLEC); the NEA PAC (Wisconsin through Citizen Action and CLEC and Pennsylvania through CLEC); the UAW PAC (Indiana and Idaho through Citizen Action); AFSCME PAC (Washington), and the Communications Workers (Colorado through Citizen Action).

f. The Want Ads Recruiting Employees That Expressly Advocate the Election or Defeat of a Specific Candidate Violate the Act.—The want ads used to recruit employees for the defendant 501(c)s that expressly advocate the election or defeat of a specific candidate are illegal corporate contributions by the 501(c). These ads, which are described on pages 31-32, contain such words of express advocacy as ". . . help elect a democrat to the White House! Citizen Action, the nation's largest progressive organization, is fighting for affordable health care and working to defeat George Bush in November." Exhibit 12.

Because these ads appear in newspapers of general circulation, by definition they are communicated beyond the permissible class. 2 U.S.C. 441b(4)(c); 11 C.F.R. 114.3(a). Indeed, they are communications to the general public that contain words of express advocacy either in support of or in opposition to a specific candidate for federal office. Since these ads all appear to be paid for by an incorporated 501(c) organization, they constitute violations of 2 U.S.C. 441b.

g. *Violations by Individual Campaigns.*—The election laws prohibit the knowing receipt or acceptance of corporate contributions by federal candidates. The FEC has argued that "knowing receipt or acceptance means knowledge of the facts that establish a violation of the statute, not knowledge that the receipt or acceptance was in violation of the law." MUR 1937 General Counsels' Report at 4 (citing *FEC v. California Medical Association,* 502 F. Supp. 196 (N.D. Cal. 1980)). Accordingly, the FEC must investigate the campaigns of Wyche Fowler For Senate, Terry Sanford For U.S. Senate, A Lot Of People Supporting Tom Daschle, Garvey For Senate, Brock Adams Senate Committee, Friends of Bob Graham Committee, Mikulski for Senate Committee, Dixon for Senate Committee, Bob Edgar for U.S. Senate, Citizens for Mike Lowry Committee, McMillen for Congress, Citizens for Reese Lindquist, Friends of Lane Evans, Feighan for Congress Committee, Tom Sawyer Committee, Jim Jontz for Congress Committee, and Nagle '88 Committee for their receipt of illegal corporate contributions from members of the 501(c) Network. Since, as discussed below, all the canvassing on behalf of specific candidates was a sham, any campaigns that knew of this effort or helped the 501(c) coordinate their effort, are guilty of accepting and failing to report an illegal corporate contribution.

In some cases, it appears that the 501(c)(4) established a PAC, which in some instances later reimbursed the corporation for its illegal expenditure or showed the expenditure as a debt. In order to make this scheme work, the 501(c) and its PAC had to inform the campaigns which benefited from the work being done by the PAC. However, in discussing the canvassing work done by the 501(c)(4), the campaign had knowledge of the scheme and either knew or should have known that it was accepting a corporate contribution.

Since the FEC maintains that if a campaign is informed that it is receiving in-kind contributions and it is obvious, as it was here, that the contributions were really coming from a connected corporation, the campaign violated the law.

IV. CONCLUSION

The FEC must not delay in holding these 501(c) corporations and the campaigns which benefited from their activities to the same laws as all others attempting to influence federal elections. The amounts spent by these 501(c) corporations, especially on the illegal canvassing activities, should be declared as either illegal corporate independent expenditures by the groups or illegal corporate contributions to the benefiting candidates. In either case, this source of illegal expenditures must be halted.

There is already ample evidence that the 501(c) Network plans to replicate and increase its activity in 1988. *See* want ads. Accordingly, this case should be prosecuted on an expedited basis to ensure no additional illegal expenditures or contributions between now and Election Day 1988. Since the law is clear, the service on these 501(c) corporations and their PACs of this Complaint will operate as notice that their canvassing and other expenditures on behalf of federal candidates is accountable under the Act. From that day forward, any spending by any of these 501(c) corporations, their PACs, other unnamed affiliates of Citizen Action and by other 501(c) groups employing a similar method to influence federal elections will be viewed by Complainant as a knowing and willful violation of the Act requiring FEC referral to the Justice Department or the imposition by the FEC of the remedial action proscribed in 2 U.S.C. 437g(d)(1). In addition, the filing of this Complaint will serve as notice to any federal campaigns that receive contributions (whether in-kind as goods and services or monetary) that they are knowingly and willfully violating the Act by accepting prohibited corporate contributions.

Respectfully submitted by Jann L. Olsten, Executive Director, National Republican Senatorial Committee.

EXHIBIT 2

CITIZEN ACTION: NOAH'S ARK OR A SHAM?

(By Richard E. Cohen)

Citizen Action, a prominent liberal activist group, has in recent years methodically broadened the scope of its activities from legislative lobbying to the national electoral arena, with considerable success.

But some of the tactics used by the Chicago-based organization—whose leadership will be convening in Washington in mid-June to plot presidential campaign strategy—have come under intense scrutiny. And some of Citizen Action's Republican targets have charged that it is violating federal election and tax laws.

Citizen Action is a national coalition of state-based groups that embraces progressive-style politics and uses a grass-roots approach to frequently get its way with lawmakers. In its assertiveness, it parallels many other tax-exempt coalitions that have become pointedly more partisan. But few of the other groups have attracted such harsh criticism.

Senate Republicans call the complex Citizen Action web of organizations a "sham." "Citizen Action has been skirting laws that restrict the activities of tax-exempt corporate groups," said Benjamin Ginsberg, the National Republican Senatorial Committee's legal counsel. "And its massive political contacts with nonmembers are illegal corporate contributions that escape full public disclosure."

Critics pounce on a classified advertisement that the national arm of Citizen Action recently ran in the Washington Post, seeking students who can earn up to $400 a week this summer to "help elect a Democrat to the White House" by joining its "community outreach" staff.

"This is not a nonpartisan group," said Sen. Robert W. Kasten Jr., R-Wis., who prompted the GOP inquiry following attacks against him in his 1986 reelection campaign by Wisconsin Action Coalition, part of the Citizen Action network. "The idea that they are trying to elect a presidential candidate is outside the spirit—and maybe the letter—of the law.

Robert M. Brandon, who is vice president and political director of Citizen Action, dismissed Kasten's criticism saying, "We only use the organizations resources to communicate with our members on behalf of a candidate." Communications with the public, he said, are made through affiliated political action committees (PACs). "We are not unique. We are important because we are effective and are trying to bring people into the political process . . . Republicans don't like it when they are attacked in the political arena."

Kasten challenged the Wisconsin group's attacks in October 1986 by filing complaints with the Internal Revenue Service and the Federal Election Commission (FEC), but neither agency has issued a response. Under the tax law, a so-called 501(c)(4) organization promoting the social welfare is entitled to tax-exempt status, but it may not intervene with the public on behalf of or in opposition to a political candidate. The House Ways and Means Committee recently held hearings on alleged abuses by tax-exempt groups.

In a separate proceeding, which Kasten and his party colleagues were unaware of until recently, the FEC has fined the Illinois Public Action Council—another tax-exempt arm of Citizen Action—for making illegal corporate contributions to congressional candidates in 1984. Robert Creamer, the council's executive director, signed a conciliation agreement with the commission and agreed in September 1986 to pay a $5,000 civil penalty. Under its procedures, the FEC did not disclose the details of this case, which resulted from an internal staff review, until two months ago.

Citizen Action's emergence as a self-styled national progressive movement has made it a growing political force. By becoming increasingly involved in national campaigns, along with races for local offices, its leaders say they have been shifting the national debate away from the policies of the Reagan Administration.

According to Citizen Action's promotional materials, the network in 1986 supported Democratic candidates for the Senate in Georgia, Maryland, North Carolina, Pennsylvania, South Dakota, Washington and Wisconsin. Its impact has been trumpeted by national political reporters, including Washington Post columnist David S. Broder, who called the state groups "a growing political presence and force in the country."

The Midwest Academy, a national training center for Citizen Action's political foot soldiers, has scheduled a retreat in Washington on June 17-19 to discuss this year's presidential campaign and to set strategy for the Democratic convention and the election. At a separate meeting in the capital slated for June 19, the Citizen Action board may decide to endorse the Democratic presidential nominee, Brandon said. Four years ago, the group endorsed Democrat Walter F. Mondale for President.

Despite these nationally focused campaign activities, Citizen Action is better known on Capitol Hill for its lobbying on behalf of issues such as energy regulation, toxic waste disposal and health care. Brandon said that the group fought for expanded prescription drug coverage in the catastrophic illness insurance in early June.

Citizen Action affiliates pursue similar agendas in nearly two dozen states. "We are a federation of statewide citizen organizations," Brandon said. "Most of our work is done at the state level and is directed to legislative activities." The state groups make wide use of neighborhood canvassers to generate grass-roots support among members and nonmembers.

Citizen Action was first organized in 1980 to pursue state issues on a national level. It receives dues from its state chapters, which have 1.6 million members. Heather Booth, the national president, works out of Citizen Action's Chicago office.

The national group also has worked closely with and has received financial assistance from other organizations, including the National Council for Senior Citizens and several labor unions. Citizen Action's Washington offices are in the International Association of Machinists building; in January, Citizen Action gave machinists president William W. Winpisinger its first lifetime achievement award.

Also providing substantial aid to Citizen Action have been the nation's trial lawyers, who are known for their aggressive legislative and electoral tactics on issues that affect them, such as their opposition to national product liability legislation.

Citizen Action has maintained an especially active relationship with a narrow segment of the trial lawyer community, the approximately 90 attorneys who represent railroad union members in liability cases. Robert J.F. Brobyn, a Philadelphia lawyer who is chairman of the group that calls itself Campaign for Safe Railroads, said that it was organized in 1986 in response to efforts by the nation's railroads to replace the existing liability coverage for rail workers with a form of workers' compensation. "This would be bad for the employees and bad for their lawyers, by moving away from a fault system," he said.

In 1987, Brobyn's group merged forces with several other organizations, including Citizen Action and the Illinois Public Action Council, to form the Coalition for Safe and Responsible Railroads. The council was paid $50,000 to prepare a document on railroad safety, which includes data on railroad accidents. "I found them an excellent organization," Brobyn said.

Citizen Action issued a statement in Washington on May 26 criticizing Kasten for supporting an effort by Amtrak to change the Federal Employees' Liability Act, the 80-year-old law governing railway workers' injury cases. "Kasten's amendment on Amtrak is clearly intended by the rail industry to be a foot in the door towards eliminating this stringent safety law," said Creamer, head of the Illinois Public Action Council.

Included in the materials was a four-page briefing paper on the danger of railroads, which cited the Illinois group's study, and criticism of Kasten by Jeff Eagan, executive director of the Wisconsin Action Council. Maybe our activities serve the interests of trial lawyers," Eagan said in an interview. "But our group is broad-based. We're like Noah's ark." Creamer and Eagan held three press conferences across Wisconsin to trumpet their study.

Kasten responded with a statement by James T. Sims, his press secretary. "This liberal political group isn't representing the public safety so much as they are trial lawyers who are exploiting the present outdated railroad workers' compensation system," Sims said. "The group's shrill contention that safety will be undermined is completely unfounded." Kasten, who is ranking Republican on the Commerce, Science and Transportation Subcommittee on Surface Transportation, has not introduced legislation, but he has discussed Amtrak's request for a three-year trial period with a worker's compensation system.

The 1986 campaign opposition to Kasten was another example of the Citizen Action-labor-trial lawyer connection. Kasten's op-

ponent was Ed Garvey, a trial lawyer who previously served as the outspoken executive director of the National Football League Players Association.

In its 1986 campaign against Kasten, for example, the Wisconsin Action Coalition ran radio advertisements criticizing his votes on social security. "We watched the blending of the Garvey campaign and Wisconsin Action Coalition," Kasten said. Eagan has denied the charge; his group's response on Kasten's complaint to the federal agencies remain private.

Similar controversy surrounded the 1986 campaign against GOP Sen. Slade Gorton by Washington Fair Share—another part of the network. Gorton lost and is making a comeback attempt this year. And the Missouri Citizen/Labor Coalition held press conferences to highlight the campaign contributions from toxic waste dumpers received by Senate GOP candidate Christopher S. (Kit) Bond.

Kasten said that the National Republican Senatorial Committee plans soon to file tax and election-law-complaints against the Citizen Action network and that he may pursue legislative action to prevent what he sees as abuses by tax-exempt groups. "The citizen-volunteer aura that these groups try to cloak themselves in is fraudulent," he said. "We are going to expose them for what they are—activists supporting Democratic candidates."

NATIONAL REPUBLICAN SENATORIAL COMMITTEE,
Washington, DC, June 15, 1988.

NRSC TO FILE FEC, IRS COMPLAINTS AGAINST CITIZEN ACTION

WASHINGTON.—The National Republic Senatorial Committee (NRSC) today announced its intent to shut down the illegal flow of unreported corporate political contributions to Democratic campaigns by tax-exempt organizations belonging to Citizen Action, a Chicago-based "social welfare" group.

Senators Bob Kasten (R-Wisc), Mitch McConnell (R-Ky), and NRSC executive director Jann Olsten announced at a press conference today that the NRSC would file complaints against Citizen Action with the Federal Election Commission (FEC) and the Internal Revenue Service (IRS).

The complaints allege that Citizen Action has created an intricate and complex nationwide web of front groups that allow it to circumvent the laws of campaign finance. They contend that Citizen Action has created a shell game of tax-exempt corporations and political action committees (PACs) that allows it to funnel illegal corporate contributions to campaigns without having to comply with the rigid disclosure requirements of the FEC.

Citizen Action claims to have affiliate 501(c)s in 25 states with 75 offices, a total combined staff of 1200 and a nationwide membership in excess of 1.75 million people.

A "501(c)" is an IRS designation for a tax exempt-corporation that has none of the restrictions on contributions of a political campaign. Therefore, according to Olsten, Citizen Action can run a political operation without any of the usual public scrutiny.

"Citizen Action" has essentially developed into a national political field operation that is funded by undisclosed and unlimited contributions from unions, corporations, and individuals," Olsten said. "Is it effective? Certainly. Is it legal? Certainly not."

"We have no quarrel with the intent of getting people involved in the political process," he added. "Our argument is that we should all play by the same rules."

The NRSC complaint alleges that Citizen Action affiliate member groups violate the law in a number of ways. Among them:

Door-to-door canvassing on behalf of candidates to an audience larger than their membership (which is prohibited by the FEC);

Using unreported corporate money to pay for personnel, materials, and facilities that aid the campaigns of federal candidates;

Failing to report their activities as either independent expenditures or as direct contributions to candidates;

Failing to register and report as political committees; and

Funnelling earmarked contributions to campaigns from labor PACs nine ways.

Olsten said the NRSC would ask that:

The IRS withdraw the groups' tax-exempt status and declare that the contributions to 501(c)(3) organizations are not tax deductible;

Monies received by the 501(c)(3) and 501(c)(4) organizations are not tax excempt but are taxable income;

Appropriate fines be imposed on all campaigns, corporations, and labor unions engaged in the illegal activity;

All contributions to these organizations be made public; and

All future activities of these organizations be conducted in full compliance with Federal Election Campaign laws, including limitations on individual contributions, prohibitions from corporate contributions, and full and complete disclosure of all receipts and expenditures.

Olsten promised that Republican campaigns would monitor the political activities of these groups in the coming campaign, as much for potential illegalities as to highlight the delusion that the groups are somehow independent "grass roots" organizations.

"For too long these groups have masqueraded as many different, separate oganizations when in fact they are more than likely the same activists writing on different press release paper," Olsten said. "This wouldn't be so egregious except that they sometimes duped the media into thinking they are credible, legitimate representatives of grass roots organizations."

"Unlike the unlawful transfer of contributions, this masquerade is not illegal," Olsten acknowledged, "but it is a hoax, nonetheless. And it must be seen as one."

ACCOMPLISHMENTS OF THE 101ST CONGRESS

Mr. MITCHELL. Mr. President, in the last few weeks we have worked long days and long nights. But we have made good progress during those many hours of facing and dealing with the issues of concern to the American people.

Since becoming majority leader, I have often said I believe the agenda of the American Congress should be the agenda of the American family. American families need security, jobs, an equal opportunity to work and earn a living, good education for their children, a clean environment, and a society where quality education, day care, and a decent family life are the priorities.

Through the hard work and cooperation of Members of both sides of the aisle, I believe we are well on our way to meeting many of those needs.

We have not, and we will not, agree on every issue. We have had many hours of vigorous, competitive, and spirited debate. This is, as it should be, in a democracy.

The competition of ideas and priorities in the process that yields the best possible outcome for the American people. Members on both sides of the aisle have contributed their best thinking to our work and our work has benefited. We can all take pride in the productive session we have had to date and look forward with anticipation to completing our work in the fall.

The Senate has been productive:

The first Clean Air Act to pass in 13 years is now in conference.

The first comprehensive oilspill legislation ever is awaiting the President's signature.

The Senate has passed a major bill to eliminate adult illiteracy, the Excellence in Education Act to boost our children's schooling, and has begun work on the National Teacher Act. In conference with the House in the fall, we will enact a comprehensive education package designed to ensure American children a world-class education in the decades to come.

The Senate has responded to change in the American work force by seeking to make changes in the American workplace.

A comprehensive child care bill is in conference with the House.

A parental leave bill was passed, but, unfortunately, met with a Presidential veto.

The first increase in the minimum wage in 10 years is now going into effect, benefiting those Americans who work hard for small reward.

The Senate has acted to make real the American ideal of equal opportunity. The Americans With Disabilities Act has been signed into law. For the first time ever, all of our people will be judged by their abilities, not limited by their disabilities.

The Senate has passed a Civil Rights Act of 1990 to restore again the full scope of equal rights under the law to all Americans, regardless of race, ethnic origin, religious belief, or sex.

The Senate has passed the Affordable Housing Act to give back American families a central part of the American dream: A home of their own.

The Senate has approved national service legislation to create a way for all Americans to serve their communities and their society.

The Senate has passed the first comprehensive drug bill to recognize that treatment and prevention are as important a focus as law enforcement and interdiction. It has been signed into law. The Senate has responded to

concerns about public safety, with a major crime package on which the House will act in September.

The Senate has approved major AIDS legislation to help city hospitals cope with the emergency caused by AIDS patients. It awaits the President's signature.

The Senate has approved major ethics legislation, which is now already law. It has passed campaign finance reform, on which a Senate-House conference will meet next month.

The Senate has approved a major rural development bill and a 5-year farm bill to meet the needs of our farming families and of our Nation's food and fiber production.

We can look with satisfaction on the quantity and quality of our work so far in this session.

But we all know the greatest challenge lies ahead. When we return after Labor Day, the budget and fiscal management issues, so urgent to the Nation, await our final action.

Members of the Senate are engaged in negotiations seeking a substantial and effective multiyear package of deficit reductions. A healthy, growing American economy is the most important of our responsibilities to American families. That is the aim of the budget negotiations.

With hard work and effort, I believe the Senate can successfully craft a package of deficit reductions that will not burden middle-income working Americans and that will continue to allow us to meet the needs of our people.

I thank all Senators for their patience and cooperation and their help in the session so far.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. DECONCINI). The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

STATUS OF NOMINATIONS OVER THE RECESS

Mr. MITCHELL. Mr. President, as in executive session, I ask unanimous consent that notwithstanding the provisions of rule XXXI, paragraph 6, all nominations remain in status quo during the recess of the Senate, with the following exceptions:

Adriane Dudley, district court judge for the Virgin Islands;

Charles House, Director, Office of Victims of Crime, Department of Justice;

G. Philip Hughes, Ambassador to Barbados, and concurrently to the Commonwealth of Dominica, St. Lucia, St. Vincent, and the Grenadines; and

George Fleming Jones, Ambassador to the Cooperative Republic of Guyana.

The PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGE FROM THE HOUSE

At 9:11 a.m., a message from the House of Representatives, delivered by Mr. Hays, one of its reading clerks, announced that the House has passed the following bill and joint resolutions, without amendment:

S. 2952. An act to amend the Energy Policy and Conservation Act to extend the authority for Titles I and II;

S.J. Res. 248. Joint resolution to designate the month of September 1990 as "International Visitors' Month";

S.J. Res. 296. Joint resolution designating August 7, 1990, as "National Neighborhood Crime Watch Day"; and

S.J. Res. 343. Joint resolution to designate August 13 through August 19, 1990, as "Home Health Aide Week."

The message also announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

S. Con. Res. 118. Concurrent resolution to authorize the printing of a brochure describing the history, design, and functions of the U.S. Capitol as the seat of the legislative branch of the Government.

The message further announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 1465) to establish limitations on liability for damages resulting from oil pollution, to establish a fund for the payment of compensation for such damages, and for other purposes.

The message also announced that the House has passed the bill (S. 695) to promote excellence in American education by recognizing and rewarding schools, teachers, and students for their outstanding achievements, enhancing parental choice, encouraging the study of science, mathematics, and engineering, and for other purposes; with amendments, in which it requests the concurrence of the Senate.

The message further announced that the House agrees to the amendment of the Senate to the bill (H.R. 4790) to amend the Public Health Service Act to establish a program of grants for the detection and control of breast and cervical cancer.

The message also announced that the House agrees to the amendment of the Senate to the bill (H.R. 3086) to amend title 5, United States Code, to grant appeal rights to members of the expected service affected by adverse personnel actions, and for other purposes.

The message further announced that the House has passed the following bill and joint resolutions, in which it requests the concurrence of the Senate:

H.R. 3762. An act to amend title 10, United States Code, to authorize certain services to be provided to the Armed Forces in connection with military historical collections;

H.J. Res. 482. Joint resolution designating March 1991 as "Irish-American Heritage Month";

H.J. Res. 519. Joint resolution designating August 29, 1990, as "National Sarcoidosis Awareness Day"; and

H.J. Res. 627. Joint resolution designating Labor Day weekend, September 1 through September 3, 1990, as "National Drive for Life Weekend."

The message also announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 338. Concurrent resolution authorizing the printing of the proceedings of the bicentennial research conference entitled "Understanding Congress."

ENROLLED JOINT RESOLUTION SIGNED

The message further announced that the Speaker has signed the following enrolled bill:

H.R. 76. An act to amend the Wild and Scenic Rivers Act to study the eligibility of the St. Marys River in the States of Florida and Georgia for potential addition to the wild and scenic rivers system.

The enrolled bill was subsequently signed by the Acting President pro tempore [Mr. BRYAN].

MEASURES REFERRED

The following bills and joint resolutions were read the first and second times by unanimous consent, and referred as indicated:

H.R. 3762. An act to amend title 10, United States Code, to authorize certain services to be provided to the Armed Forces in connection with military historical collections; to the Committee on Armed Services.

H.R. 4721. An act to designate the Federal building located at 340 North Pleasant Valley Road in Winchester, Virginia, as the "J. Kenneth Robinson Postal Building"; to the Committee on Governmental Affaris.

H.R. 4877. An act to redesignate the Austin Dam located near Austin, Texas, as the "Tom Miller Dam; to the committee on Energy and Natural Resources.

H.R. 5146. An act to amend the Public Health Service Act to revise and extend the program regarding organ transplantation; to the Committee on Labor and Human Resources.

H.J. Res. 482. Joint resolution designating March 1991 as "Irish-American Heritage Month"; to the Committee on the Judiciary.

H.J. Res. 519. Joint resolution designating August 29, 1990, as "National Sarcoidosis Awareness Day"; to the Committee on the Judiciary.

The following concurrent resolution was read, and referred as indicated:

H. Con. Res. 338. A concurrent resolution authorizing the printing of the proceedings of the bicentennial research conference entitled "Understanding Congress"; to the Committee on Rules and Administration.

MEASURES PLACED ON THE CALENDAR

The following bill was read the first and second times by unanimous consent, and placed on the calendar:

H.R. 3562. An act to amend the Federal Food, Drug, and Cosmetic Act to prescribe nutrition labeling for foods, and for other purposes.

MEASURES HELD AT THE DESK

The following bill was orderd to be held at the desk until the close of business on September 12, 1990:

H.R. 5400. An act to amend the Federal Election Campaign Act of 1971 and certain related laws to clarify such provisions with respect to Federal elections, to reduce costs in House of Representatives elections, and for other purposes.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. SASSER, from the Committee on the Budget, without amendment:

S. 532. A bill to amend the Congressional Budget Act of 1974 to provide that any concurrent resolution on the budget that contains reconciliation directives shall include a directive with respect to the statutory limit on the public debt, and for other purposes (Rept. No. 101-428).

By Mr. SASSER, from the Committee on the Budget, without amendment:

S. 3008. An original bill to exclude the Federal Hospital Insurance Trust Fund from the deficit calculation (Rept. No. 101-429).

By Mr. PELL, from the Committee on Foreign Relations, without amendment and with a preamble:

S. Res. 313. A resolution relating to Vladimir Tsivkin.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. SASSER:

S. 2999. An original bill to exclude the Social Security Trust Funds from the deficit calculation; from the Committee on the Budget; to the Committee on Governmental Affairs.

By Mr. SIMPSON (for Mr. HEINZ):

S. 3000. A bill to strike coins for Pearl Harbor veterans, for the Yosemite National Park Centennial and for the bicentennial of the United States Constitution; considered and passed.

By Mr. SYMMS (for himself, Mr. COATS, Mr. GARN, Mr. GRASSLEY, Mr. LUGAR, Mr. MCCLURE, Mr. STEVENS, and Mrs. KASSEBAUM):

S. 3001. A bill to increase expenditures in programs funded out of the Highway Trust Fund and the Airport and Airway Trust Fund, to reduce the cash balance in those trust funds, and for other purposes; to the Committee on Environment and Public Works.

By Mr. MOYNIHAN (for himself and Mr. BRADLEY):

S. 3002. A bill to amend title XIX of the Social Security Act to permit coverage of residential drug treatment for pregnant women and certain family members under the Medicaid Program, and for other purposes; to the Committee on Finance.

By Mr. WILSON:

S. 3003. A bill to provide for the establishment of the Laguna de Santa Rosa National Wildlife Refuge in Sonoma County, California; to the Committee on Environment and Public Works.

By Mr. AKAKA:

S. 3005. To establish an endowment to assist the University of Hawaii in making grants for the development of education programs which target Filipinos; to the Committee on Labor and Human Resources.

By Mr. KENNEDY (for himself, Mr. HATCH, Mr. DODD, Mr. COATS, and Mr. DURENBERGER):

S. 3006. A bill to amend the Federal Food, Drug, and Cosmetic Act to make improvements in the regulation of medical devices, and for other purposes; to the Committee on Labor and Human Resources.

By Mr. AKAKA:

S. 3007. A bill to establish the Spark M. Matsunaga National Energy Research Laboratory and make funds available to the laboratory for OTEC research; to the Committee on Energy and Natural Resources.

By Mr. SASSER from the Committee on the Budget:

S. 3008. An original bill to exclude the Federal Hospital Insurance Trust Fund from the deficit calculation; to the Committee on Governmental Affairs

By Mr. AKAKA:

S. 3009. A bill to provide for the protection, conservation, and management of ocean resources, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. WARNER:

S. 3010. A bill to authorize appropriations for the National Endowment of the Arts, to amend the Internal Revenue Code of 1986 to provide for designation of contributions to the National Endowment for the Arts, and for other purposes; to the Committee on Finance.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon) as indicated:

By Mr. CRANSTON (for himself, Mr. KERRY, Mr. PELL, Mr. SIMON, Mrs. KASSEBAUM, Mr. BIDEN, and Mr. DODD):

S. Res. 321. A resolution expressing the sense of the Senate concerning American policy toward Cambodia; to the Committee on Foreign Relations.

By Mr. BRYAN:

S. Res. 322. A resolution expressing the sense of the Senate regarding controls by certain European countries on chemicals that are used in the processing of illegal drugs; to the Committee on Foreign Relations.

By Mr. MITCHELL:

S. Res. 323. A resolution to authorize printing of exhibition posters; considered and agreed to.

By Mr. NUNN (for Mr. MITCHELL (for himself, Mr. DOLE, Mr. DOMENICI, and Mr. SIMON)):

S. Con. Res. 145. A concurrent resolution to salute and congratulate the people of Poland as they commemorate the 200th anniversary of the adoption of the Polish Constitution; considered and agreed to.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. SYMMS (for himself, Mr. COATS, Mr. GARN, Mr. GRASSLEY, Mr. LUGAR, Mr. MCCLURE, Mr. STEVENS, and Mrs. KASSEBAUM):

S. 3001. A bill to increase expenditures in programs funded out of the highway trust fund and the airport and airway trust fund, to reduce the cash balance in those trust funds, and for other purposes; to the Committee on Environment and Public Works.

TRANSPORTATION INVESTMENT AND TRUST ACT

Mr. SYMMS. Mr. President, I rise today to introduce legislation to increase spending in our Federal-aid airport, highway, and mass transit programs and help draw down the balances in the highway trust fund and the airport and airway trust fund. The Transportation Investment and Trust Act of 1990 authorizes funding for these important transportation programs through fiscal year 1992 with an annual increase of $2.8 billion for highways, $1 billion for mass transit, and $1.8 billion for airports beginning in fiscal year 1991. I am particularly pleased that Senators COATS, GARN, GRASSLEY, KASSEBAUM, LUGAR, MCCLURE, and STEVENS have joined me as original sponsors of the bill.

Let me discuss briefly a few of the important issues associated with this legislation.

First: need. There can be no question about the need for this modest increase in our user-financed transportation infrastructure programs. Over the past 2 years, one report after another has noted the deteriorating condition of the Nation's transportation network and the ever-increasing problems with highway and airport congestion. Passenger use in every mode of transportation is growing exponentially while our infrastructure investment at all levels of government is insufficient even to maintain existing facilities, let alone try to expand capacity.

In its February 1988 final report to the President and Congress, the National Council on Public Works Improvement recommended increasing our infrastructure investment by up to 100 percent per year and graded our transportation systems as follows: aviation, B minus; highways C plus; mass transit C minus. No graduate school will suffer a student with grades like that, and our competitiors in the world marketplace will be even less forgiving.

The American Association of State Highway & Transportation Officals [AASHTO] likewise sees a pressing need for increased investment in transportation by all levels of government. In its Transportation 2020 report entitled, "Keeping America Moving," AASHTO estimates the annual investment needed to maintain

our transportation facilities through the year 2020 at $100 billion for highways and bridges, $15.1 billion for public transit, and $12.9 billion for airports and airways. Those figures compare with current nationwide investment totals of $72.9 billion for highways and bridges, $10.7 billion for transit, and $11.1 billion for airports. Obviously, we're falling behind, and we cannot possibly meet our capacity improvement needs at current funding levels.

CAN WE AFFORD THIS BILL

Even admitting the substantial unmet needs in our transportation infrastructure, one might wonder whether we can afford the increased Federal investment my colleagues and I propose in this bill. Has the Senator from Idaho forgotten we're in the midest of a budget deficit crisis? one might ask. I haven't forgotten the budget deficit, and my answer is, we can't afford not to increase our infrastructure investment. In fact, if we hope to reduce our budget and trade deficits for the long term, we must act to reduce what Secretary of Transportation Sam Skinner has called our third deficit: infrastructure.

Recent economic reports indicate that while manufacturing and commodity-producing sectors of the economy have experienced significant productivity gains in the 1980's, transportation productivity has remained almost flat. We cannot hope to make substantial gains in transportation productivity while passenger-laden jets wait in long lines on the tarmac and commuters spend hours getting to work traveling on clogged urban interstates. Long-term economic growth depends on greater transportation productivity, and that will require more investment in capital projects and research.

But what about the dollars? Where will the money come from? As my colleagues know, the highway trust fund and the airport and airway trust fund are financed out of taxes paid by highway and airport users. Those taxes support the highway, airport, and mass transit programs included in the legislation my colleagues and I propose today. Unfortunately, over the years since creation of the trust funds, a balance of funds has been allowed to accrue in each of the accounts, and that balance has grown to scandalous proportions today.

By the end of fiscal year 1991, according to the Congressional Budget Office's baseline projections, the cash balance in the highway account of the highway trust fund will grow to $11.3 billion, the uncommitted balance in the mass transit account of the highway trust fund will reach $3.1 billion, and the uncommitted balance in the airport and airway trust fund will stand at $7.2 billion.

At precisely that time, the authorization for our highway and mass transit programs will expire and Congress may still be considering legislation to reauthorize the Federal Airways Program. I believe there will be strong support on the authorizing committees and in the Senate as a whole for increasing program expenditures. In addition, serious consideration will be given to proposed user-fee increases to support larger transportation programs over a multiyear authorization.

It would be unconscionable, in this Senator's mind, for Congress to ask America's highway and airport users to pay higher transportation taxes while we have a balance of more than $20 billion in the highway and airport trust funds. It would be bad public policy and even worse politics. We must start spending down the trust fund balances before considering a multiyear authorization bill.

CBO estimates that enactment of the Transportation Investment and Trust Act of 1990 would reduce trust fund balances to $9.6 billion in the highway account, $1.8 billion in the mass transit account, and $3.6 billion in the airport and airway trust fund by the end of fiscal 1992. In other words, passage of this legislation would leave a total of $15 billion in the two trust funds at the end of fiscal 1992 as compared with $21 billion remaining under the current CBO baseline.

Obviously, the trust funds could support greater spending increases than those proposed in this legislation. It is a modest funding proposal; it is good transportation policy; and it is sound economics.

GRAMM-RUDMAN-HOLLINGS

In addition to the funding increases, our bill removes the highway and airport trust funds from Gramm-Rudman-Hollings deficit calculations in order to protect these user-financed programs against spending controls intended to reduce the general fund deficit. While trust fund surpluses could not be used to mask part of the Federal deficit, the bill does not exempt the two transportation trust funds from any Gramm-Rudman-Hollings sequester. Therefore, if a sequester is ordered, the transportation programs will share in the financial squeeze and no additional pressure will be placed on general fund programs.

According to CBO, removing the trust funds from the deficit calculations will increase the deficit by $1.6 billion in fiscal year 1991, $400 million in fiscal 1992, and $100 million in fiscal year 1993. Those numbers correspond to the total annual surplus in the transportation accounts at current funding levels. They indicate the trust funds are hiding part of the general fund deficit, but probably to a smaller extent than some of my colleagues have been led to believe.

Removing the transportation trust funds from the Gramm-Rudman-Hollings deficit calculations will not have a significant adverse effect on the deficit picture. In fact, if transportation spending is increased to the point that we reduce the existing trust fund balances, the general fund deficit will look better if the trust funds are not included in the calculation. Excluding the trust funds from the deficit calculation makes good policy and political sense.

REAUTHORIZATION

Finally, Mr. President, I want to emphasize that this bill is not a substitute for the regular reauthorization legislation for our surface and air transportation programs. Rather, it is intended to spend down the trust fund balances and put us in a better position to consider the appropriate funding level and revenue needs for each of these programs in a multiyear authorization bill.

Congressman DENNY HASTERT of Illinois is introducing a companion measure in the House of Representatives, and I urge my House colleagues to give that bill their full support.

I ask unanimous consent that my statement appear in the RECORD followed by a copy of the bill, a section-by-section analysis of it, and a chart showing the State-by-State increases in highway obligational authority this measure provides.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 3001

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Transportation Investment and Trust Act of 1990".

TITLE I—HIGHWAY ACCOUNT AUTHORIZATIONS

SEC. 101. EXTENSION OF THE INTERSTATE PROGRAM

(a) ADMINISTRATIVE ADJUSTMENT OF ICE.—Section 104(b)(5)(A) of title 23, United States Code is amended by striking "On October 1 of each of fiscal years 1988, 1989, 1990, and 1991, whenever Congress has not approved a cost estimate under this subparagraph" and inserting instead "On October 1 of each fiscal year, whenever Congress has not approved a cost estimate under this subparagraph".

(b) AUTHORIZATION OF APPROPRIATIONS FOR INTERSTATE SYSTEM CONSTRUCTION.—Section 108(b) of the Federal-Aid Highway Act of 1956 is amended by striking "$1,400,000,000" and inserting instead "$2,000,000,000".

SEC. 102. AUTHORIZATION OF APPROPRIATIONS FOR INTERSTATE SUBSTITUTE HIGHWAY PROJECTS.

(a) Section 103(e)(4)(G) of title 23, United States Code is amended by striking "and 1991." and inserting instead "1991, and 1992.".

(b) Section 103(e)(4)(H)(i) of title 23, United States Code is amended by striking "and 1991" and inserting instead "1991, and 1992".

(c) Section 103(e)(4)(H)(iii) of title 23, United States Code is amended by striking "and 1991" the two places it appears and inserting instead in each place "1991, and 1992".

SEC. 103. AUTHORIZATION OF APPROPRIATIONS.

(a) Section 106(a)(1) of the Federal-Aid Highway Act of 1987 is amended by striking "and 1992" and inserting instead "1992, and 1993".

(b) Section 106(a) of the Federal-Aid Highway Act of 1987 is amended by striking "and 1991." each place it appears and inserting instead in each place "1991, and 1992.".

SEC. 104. OBLIGATION CEILING.

(a) Section 105(a) of the Federal-Aid Highway Act of 1987 is amended by striking "and (5) $12,350,000,000 for fiscal year 1991." and inserting instead "(5) $15,000,000,000 for fiscal year 1991; and $15,000,000,000 for fiscal year 1992.".

(b) Sections 105 (c), (d), (e), (f), and (g) of the Federal-Aid Highway Act of 1987 is amended by striking "and 1991" each place it appears and inserting instead in each place "1991, and 1992".

(c) Section 105(f) of the Federal-Aid Highway Act of 1987 is amended by striking "or 1991" the two places it appears and inserting instead in each place "1991, or 1992".

SEC. 105. FEDERAL-AID PRIMARY FORMULA.

Section 108 of the Highway Improvement Act of 1982 (23 U.S.C. 104 note) is amended by striking "and 1991" each place it appears and inserting instead in each place "1991, and 1992".

SEC. 106. BRIDGE PROGRAM.

Section 144(g) of title 23, United States Code is amended by striking "and 1991" each place it appears and inserting instead in each place "1991, and 1992".

SEC. 107. STRATEGIC HIGHWAY RESEARCH PROGRAM.

Section 307(d)(4) of title 23, United States Code is amended by striking "and 1991" and inserting instead "1991, and 1992".

TITLE II—MASS TRANSIT ACCOUNT AUTHORIZATIONS

SEC. 201. AUTHORIZATIONS AND OBLIGATION CEILING.

Section 21 of the Urban Mass Transportation Administration Act of 1964, as amended (49 U.S.C. 1617) is amended by—

(a) striking subsection (a)(2) and substituting:

"(2) There shall be available from the Mass Transit Account of the Highway Trust Fund only to carry out sections 3, 4(i), 8, and 16(b) of this Act $1,700,000,000 for each of fiscal years 1991 and 1992, to remain available until expended.";

(b) striking subsection (b)(4) and subsituting:

"(4) $700,000,000 for each of fiscal years 1991 and 1992, to remain available until expended."; and

(c) adding the following sentence at the end of subsection (c)(2):

"None of the funds made available by subsections (a)(2) and (b) shall be available for the implementation or execution of programs in excess of $2,400,000,000 for each of fiscal years 1991 and 1992.".

TITLE III—AIRPORT AND AIRWAY AUTHORIZATIONS

SEC. 301. AIRPORT DEVELOPMENT AND PLANNING.

Section 505(b) of the Airport and Airway Improvement Act of 1982 (49 U.S.C. App. 2204(b)) is amended by striking the phrase "September 30, 1987" and inserting the phrase "September 30, 1992" in lieu thereof.

SEC. 302. AIRWAY FACILITIES AND EQUIPMENT.

Section 506(a) of the Airport and Airway Improvement Act of 1982, as amended (49 U.S.C. App. 2205(a)) is amended by striking all after the words "Trust Fund" where they appear in subsection (a)(1) and inserting the following in lieu thereof: "for fiscal years beginning after September 30, 1990, aggregate amounts not to exceed $3,000,000,000 for the fiscal year ending before October 1, 1991, and $6,000,000,000 for the fiscal years ending before October 1, 1992. Amounts appropriated under this authorization shall remain available until expended.".

SEC. 303. RESEARCH, ENGINEERING AND DEVELOPMENT.

Section 506(b) of the Airport and Airway Improvement Act of 1982, as amended (49 U.S.C. App. 2205(b)) is amended by striking out everything after the words "Trust Fund" in paragraph (2) and inserting the following in lieu thereof: "for fiscal years beginning after September 30, 1990, aggregate amounts not to exceed $260,000,000 for the fiscal year ending before October 1, 1991, and $520,000,000 for the fiscal years ending before October 1, 1992. Amounts appropriated under this authorization shall remain available until expended.".

SEC. 304. EXPENDITURES FROM AIRPORT AND AIRWAY TRUST FUND.

Section 9502(d)(1)(A) of the Trust Fund Code of 1981 (26 U.S.C. 9502(d)(1)(A)) is amended by striking the phrase "(as such Acts were in effect on the date of enactment of the Airport and Airway Safety and Capacity Expansion Act of 1987)" and inserting the phrase "or the Transportation Investment and Trust Act of 1990 (as such Acts were in effect on the date of enactment of the Transportation Investment and Trust Act of 1990)" in lieu thereof.

TITLE IV—DEFICIT CALCULATION

SEC. 401. TREATMENT OF THE HIGHWAY TRUST FUND AND THE AIRPORT AND AIRWAY TRUST FUND FOR DEFICIT CALCULATION PURPOSES.

Section 3(6) of the Congressional Budget and Impoundment Control Act of 1974 is amended by inserting before the last sentence the following: "In calculating the deficit for purposes of comparison with the maximum deficit amount under the Balanced Budget and Emergency Deficit Control of 1985 and in calculating the excess deficit for purposes of sections 251 and 252 of such Act for any fiscal year, the receipts of the Highway Trust Fund (including the Mass Transit Account) and the Airport and Airway Trust Fund allocable to the transportation-related operations of each such Trust Fund for such fiscal year shall not be included in total revenues for such fiscal year, and the disbursements allocable to the transportation-related operations of each such Trust Fund for such fiscal year shall not be included in total budget outlays for such fiscal year. For purposes of the preceding sentence, the receipts allowable to the transportation-related operations of the (A) Highway Trust Fund are the disbursements, and the receipts allowable to such disbursements, under paragraph (1) of section 9503(c) of the Internal Revenue Code of 1986 (relating to expenditures from the Highway Trust Fund for the Federal-aid highway program) and paragraph (3) of section 9503(e) of such Code (relating to expenditures from the Mass Transit Account), and (B) the Airport and Airway Trust Fund are the disbursements, and the receipts allocable to such disbursements, under paragraph (1) of section 9502(d) of such Code (relating to expenditures from the Airport and Airway Trust Fund for the airport and airway program).".

TRANSPORTATION INVESTMENT AND TRUST ACT OF 1990

SECTION-BY-SECTION ANALYSIS

Title I—Highway Account Authorizations

Section 101(a)—Continues the administrative adjustment of the Interstate Cost Estimate for years in which Congress has not approved a cost estimate by the beginning of the fiscal year. This subsection allows the Secretary to apportion FY 1993 Interstate Construction funds on October 1, 1991, as scheduled (these funds are apportioned one year in advance), even if Congress has not approved a new highway authorization or cost estimate by that date.

Section 101(b)—Increases the FY 1993 authorization for Interstate Construction funds to $2 billion. This amount will be insufficient to complete the nation's Interstate Highway System, but it compares favorably with the $1.4 billion authorized for FY 1993 in the 1987 highway bill. The current Interstate Cost Estimate indicates $3 to $4 billion, in addition to the amounts authorized in 1987, will be necessary to complete the Interstate System.

Section 102(a)—Extends for one year (FY 1992) the annual $740 million authorization for Interstate Substitute Highway projects.

Section 102(b)—Extends for one year (FY 1992) the distribution of Substitute Highway funds between discretionary and apportioned programs.

Section 102(c)—Extends for one year (FY 1992) the administrative adjustment of the Interstate Substitute Cost Estimate for highway projects.

Section 103(a)—Extends for one year (FY 1993—these funds are apportioned one year in advance) the $2.815 billion annual authorization and the Interstate 4R program.

Section 103(b)—Extends for one year (FY 1992) the annual authorizations provided in the 1987 highway bill for the following funding categories: primary system (#2.325 billion), secondary system ($600 million), urban system ($750 million), bridge replacement and rehabilitation ($1.63 billion), hazard elimination ($170 million), Indian reservation roads ($80 million), forest highways ($55 million), public lands highways ($40 million), parkways and park highways ($60 million), section 402 safety programs ($10 million), FHWA safety research ($10 million), and rail highway crossings ($160 million).

Section 104(a)—Establishes a $15 billion obligation limitation for FY 1991 and FY 1992. The 1987 highway bill set an obligation limitation of $12.35 billion for each of the fiscal year 1987-1991. Congress has adjusted that amount each year in the Transportation Appropriations bill. In FY 1990, the obligation limitation is $12.21 billion. Raising the obligation limitation to $15 billion will substantially increase each state's spending authority and is the principal mechanism in this legislation to draw down the existing balance in the Highway Account of the Highway Trust Fund.

Section 104(b) and (c)—Extends for one year (FY 1992) the formula for distribution and redistribution of obligation authority.

Section 105—Extends for one year (FY 1992) the formula for distribution of Federal-aid primary funds.

Section 106—Extends for one year (FY 1992) the bridge discretionary program and the authorization for the use of funds on

bridges not located on the Federal-aid highway system.

Section 107—Extends for one year (FY 1992) the authorization of funds for the Strategic Highway Research Program.

Title II—Mass Transit Account Authorizations

Section 201(a)—Authorizes $1.7 billion in fiscal years 1991 and 1992 for discretionary grants in the following funding categories: rail and bus capital expenditures, innovative technologies, planning assistance, and elderly and handicapped transit services. This is an increase of $700 million per year over the amount currently authorized for these programs for FY 1991.

Section 201(b)—Authorizes $700 million in fiscal years 1991 and 1992 for urban and rural transit programs. This is an increase for these programs for FY 1991. Part of these funds are discretionary grants and the remainder are distributed to cities and states on the basis of an apportionment formula.

Section 201(c)—Establishes a $2.4 billion annual obligation limitation for fiscal years 1991 and 1992. This is a $1.26 billion increased in spending authority over the FY 1990 obligation limitation of $1.14 billion. Combined with the increased authorizations, this section will help draw down the balance of uncommitted funds in the Mass Transit Account.

Title III—Aiport and Airway Authorizations

Section 301—Extends obligational authority for the Airport Improvement Grant (AIP) program through FY 1992. Congress has approved $1.8 billion per year in contract authority for the AIP program; however, actual spending authority is restricted by an obligation limitation ($1.425 billion in FY 1990). This legislation would increase actual spending in the AIP program by extending obligation authority through 1992 without imposing an obligation limitation.

Section 302—Provides $3 billion in annual budget authority for the Airway Facilities and Equipment (F&E) program in fiscal years 1991 and 1992. In FY 1990, the F&E program is funded at $1.72 billion, and the authorization will expire this year.

Section 303—Provides $260 million in annual budget authority for the Aviation Research, Engineering, and Development (RE&D) program in fiscal years 1991 and 1992. In FY 1990, the RE&D program is funded at $170 million, and the authorization will expire this year.

Section 304—Authorizes expenditures from the Airport and Airway Trust Fund to meet the obligations of the United States incurred under the Transportation Investment and Trust Act of 1990.

Title IV—Deficit Calculation

Section 401—Removes the Highway Trust Fund and the Airport and Airway Trust Fund from the Gramm-Rudman-Hollings deficit and calculations. No annual surplus in the trust funds could be used to mask the General Fund deficit. This legislation does not remove the two trust funds from any sequester ordered pursuant to Gramm-Rudman-Hollings, so it will not impose a greater burden on General Fund programs if a sequester is ordered.

COMPARISON OF FISCAL YEAR 1990 $12.21 BILLION OBLIGATION LIMITATION (LESS RESERVES) WITH A $15.0 BILLION LIMITATION (LESS RESERVES)

[Dollars in thousands]

State	$12.21 billion limitation	$15.0 billion limitation	Limitation increase
Alabama	202,194	254,276	52,082
Alaska	144,797	182,095	37,298

By Mr. MOYNIHAN (for himself and Mr. BRADLEY):

S. 3002. A bill to amend title XIX of the Social Security Act to permit coverage of residential drug treatment for pregnant women and certain family members under the Medicaid Program, and for other purposes; to the Committee on Finance.

MEDICAID DRUG TREATMENT FOR FAMILIES ACT

Mr. MOYNIHAN. Mr. President, today, I rise to introduce the Medicaid Drug Treatment for Families Act of 1990. I am particularly pleased to note at the outset that the distinguished Senator from New Jersey [Mr. BRADLEY] joins me as an original cosponsor of this proposed legislation.

For some time now we have been about the business of expanding opportunities for individuals addicted to drugs and alcohol. I have often noted on the floor of the Senate what we accomplished in the 1988 drug bill. To wit, section 2012 of Public Law 100-690, the Anti-Drug Abuse Act of 1988, entitled "Purposes," calling for treatment upon request.

It is the purpose of this subtitle * * * to increase to the greatest extent possible, the availability and quality of treatment services so that treatment on request may be provided to all individuals desiring to rid themselves of their substance abuse problem.

Mr. President, those words are a part of the statute. They are law. And yet we have not appropriately met the goals we set forth in that legislation. We have failed to apply the model which we established in that new law. Namely, that demand reduction efforts must equal those of supply reduction. All of this is well and good. But while the debate continues, pregnant women, their children, indeed, their entire families are left vulnerable to the scourge of drug addiction. A disease which destroys lives and communities. Indeed, drug use is passed from person to person, child to child, through social interaction. So are most communicable diseases. But behavior associated with drug use is more difficult to control, and less responsive to education, because it is addictive.

Drug addiction is not only passed from person to person. It is passed from generation to generation. Where the heroin epidemic of the 1960's gave us the one-parent family, the crack epidemic of the 1980's has given us the no-parent child. We have to find a cost-effective treatment. Clearly, this effort needs to follow an epidemiological mode, addressing the environment as well as the individual. Sick persons must be treated if the epidemic of addiction is not to continue.

The bill we introduce today will in large measure increase the opportunity to break this cycle of addiction for those most vulnerable and most inclined to be affected by it, pregnant women and their children.

A recent survey conducted by the National Association of State Alcohol and Drug Abuse Directors estimated that the approximate total number of women per year, including pregnant women, who are currently receiving treatment is 548,326 with the total number of pregnant women being 29,842 while the approximate total number of women needing treatment is 4,004,803 and the number of pregnant women needing treatment is 250,362.

We are clearly not providing adequate access to appropriate types of treatment for women and their families. The Federal Medicaid Program will pay for certain inpatient hospital services including detoxification and outpatient programs including methadone maintenance clinics. While detoxification is certainly a stage in the treatment process it is not, in and of itself, treatment. Indeed, detoxification begins the process whereby a commitment to long-term residential treatment may break the cycle of ad-

diction. Similarly, methadone maintenance has proven tremendously effective when available. However, that model is not one which is appropriate for all individuals who abuse crack cocaine or alcohol or the various other drugs which destroy lives.

Our commitment to even this appropriate form of treatment of individuals addicted to heroin has not always received the support it deserves. In a recent communication to me from Dr. Vincent Dole, professor and physician at Rockefeller University and the recipient of the Albert Lasker Medical Award for his discovery of methadone—a recognition which came to him some 20 years after his achievement—he reviewed for me the great success of a program which has made a tremendous difference in the cycles of heroin addiction.

In 1970-1972, when the Health Department of New York City supported an increase in the capacity of methadone maintenance programs from 11,000 to 30,000 heroin use was eliminated in over 90% of the addicts admitted to treatment; employment increased, dependence on public assistance declined, criminal activity was reduced markedly, and cases of serum hepatitis in the city dropped by over 40%. Despite these positive results, political pressure since then has prevented any significant expansion of treatment services. No new clinics have been permitted to open for 15 years.

In public health terms the continuing opposition to methadone treatment is difficult to understand. Heroin use continues to be terminated in over 90% of patients who have been in treatment for one year or longer, and cocaine use (which is now nearly universal on admission) has declined after admission to between 10 and 40% in different clinics. Today, in addition to control of heroin addiction, methadone clinics are providing one-half of all the treatment available for cocaine users.

While the Federal Medicaid Program will pay for methadone treatment for heroin addicts and while success rates are dramatic when long-term treatment modalities are utilized, Medicaid will not pay the long-term residential treatment cost for pregnant women addicted to crack cocaine.

Our bill will change this statutory restriction which currently prohibits residential treatment centers from being reimbursed by Medicaid.

The Medicaid Drug Treatment for Families Act of 1990 will permit, at a State's option, Federal Medicaid reimbursement for certain case-managed, substance abuse treatment services provided in residential settings for pregnant women whose incomes are below 185 percent of the Federal poverty line. In addition, substance abuse treatment services would continue for 12 months post-partum. We also would allow Federal reimbursement for substance abuse treatment for Medicaid-eligible parents and children in addition to pregnant women.

In order to be eligible for Medicaid reimbursement, residential drug treatment programs would be required to provide certain services including individual, group, and family substance abuse counseling, substance abuse education and treatment provided pursuant to individualized treatment plans, HIV prevention education, family support services, parenting skills training, and, where appropriate, domestic violence counseling, and sexual abuse counseling; child care, either on-site or off through contract; room and board with on-site supervision 24 hours per day; counseling services to assist in the transition to independent living; and staff training programs on a continuing basis.

In addition, programs would be required to provide referral or guarantee and facilitate access to the following services including Alcoholics and Narcotics Anonymous, public education for preschool and school-age children, maternal and child health services under title V of the Social Security Act, WIC, outpatient pediatric services, well-baby care, EPSDT, educational, vocational, and other employment-related programs, including the JOBS program, outpatient substance abuse treatment and counseling, and housing assistance.

Services provided are reimbursable for no more than 12 months. In the case of a pregnant woman, however, services are reimbursable through 1 year post-partum.

All required services, except child care, would be reimbursed through Medicaid. To pay for child care, we amend title IV of the Social Security Act to require States who choose the option to guarantee child care for each individual receiving residential substance abuse treatment services under title XIX of the Social Security Act.

While we believe it is important for facilities to be limited in size and scale we also recognize that providers as well as States must have the flexibility to determine, with the approval of the Secretary of Health and Human Services, the size of residential centers. Our bill limits the size of the residential treatment facility to no more than 40 beds unless the State assures the Secretary that the services we require to be provided will be provided in larger facilities.

Mr. President, if we intend to bring an end to the pathology associated with addiction including the horror of babies born addicted to crack cocaine, then we are going to have to invest our energies in solutions which work. A commitment to long-term residential drug treatment services and facilities will save women and children and their families—saving them from the tragedies of addiction disorders. Our bill will save mothers from the ravage of drug addiction including infection from the human immunodeficiency virus, hepatitis, and other diseases; our bill will save children from dysfunctional pathologies which exist in families where one or more parents or relatives abuse drugs; and our bill will save the family to the extent that our proposal reaches out to those family members and includes them in the long-term process of drug treatment.

Finally, Mr. President, I would call attention to a recent study prepared by the General Accounting Office entitled "Drug Exposed Infants: A Generation At Risk," which stated:

With additional federal funding, the large gap between the number of women who could benefit from drug treatment and the number of residential and out patient slots currently available could be reduced. . . . These include:

Requiring states to include substance-abuse treatment as part of the package of services available to pregnant women under Medicaid.

While we do not require, in this proposal, States to provide such services, we believe, indeed hope, that States particularly those which have a high incidence of drug abuse among pregnant women will opt for this package of benefits.

In so doing, we may just break the cycle of addiction which passes from person to person and generation to generation.

Mr. President, I would ask unanimous consent that at the conclusion of this statement several editorials and testimony presented by David Gates on behalf of the National Health Law Program, Inc., and presented by Dr. Maureen Montgomery of Buffalo, NY, on behalf of the American Academy of Pediatrics be printed in the CONGRESSIONAL RECORD.

I also ask unanimous consent that a statement by Senator BRADLEY follow directly after the statement of the Senator from New York.

I would ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 3302

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the Medicaid "Drug Treatment for Families Act of 1990".

SEC. 2. MEDICAID COVERAGE OF ALCOHOLISM AND DRUG DEPENDENCY RESIDENTIAL TREATMENT SERVICES FOR PREGNANT WOMEN AND FAMILY MEMBERS.

(a) OPTIONAL COVERAGE OF ALCOHOLISM AND DRUG DEPENDENCY RESIDENTIAL TREATMENT SERVICES.—Section 1905 of the Social Security Act (42 U.S.C. 1396d) is amended—

(1) in subsection (a)—

(A) by striking "and" at the end of paragraph (21),

(B) by redesignating paragraph (21) as paragraph (23), and

(C) by inserting after paragraph (21) the following new paragraph:

"(22) alcoholism and drug dependency treatment services (as defined in subsection (t) and alcoholism and drug dependency res-

idential treatment services (as defined in subsection (u)); and";

(2) in the matter following paragraph (23), as so redesignated—

(A) in subparagraph (A), by striking "or"

(B) in subparagraph (B)—

(i) by inserting "(other than services described in paragraph (22))" after "care or services"; and

(ii) by striking the period and inserting "; or", and

(C) by inserting after subparagraph (B) the following new subparagraph:

"(C) any such payments with respect to alcoholism and drug dependency residential treatment services under paragraph (22) for individuals not described in subsection (u)(6)"; and

(3) by adding at the end the following new subsections:

"(t) The term 'alcoholism and drug dependency treatment services' means—

"(1) inpatient alcoholism and drug dependency treatment services (including counseling) provided by a hospital or by any other entity authorized by the State to provide such treatment; and

"(2) outpatient alcholism and drug dependency treatment services (including counseling) provided by a hospital or by any other entity authorized by the State to provide such treatment.

"(u)(1) The term 'alcoholism and drug dependency residential treatment services' means (subject to the limitations described in paragraph (5) of this subsection), the required services described in paragraph (3), which shall be provided in a coordinated manner either—

"(A) directly, or

"(B) by contract by a residential treatment facility that meets the requirements of paragraph (3).

"(2) For purposes of this title, alcoholism and drug dependency residential treatment services shall be considered to be pregnancy-related prenatal care services.

"(3) For purposes of paragraph (1), the required services described in this paragraph are as follows:

"(A) Individual, group, and family counseling including—

"(i) addiction education and treatment, provided pursuant to individualized treatment plans (including opportunity for involvement in Alcoholics Anonymous and Narcotics Anonymous;

"(ii) parenting skills training.

"(iii) education concernng prevention of HIV infection, and

"(iv) domestic violence counseling and sexual abuse counseling (in cases where such counseling is appropriate).

"(B) Room and board in a structured environment with on-site supervision 24 hours-a-day.

(C) Therapeutic child care (as defined by the Secretary), where appropriate.

"(D) Assisting parents in obtaining access to—

"(i) development service (to the extent available) for the pre-school age children of such parents;

"(ii) public education for the school-age childen of such parents (including providing assistance in enrollment in school); and

"(iii) public education (with respect to such parents who have not completed a high school education).

"(D) Facilitating access to health and social services, where appropriate and to the extent available, including—

"(i) services provide under title V,

"(ii) services and nutritional supplements provided under section 17(i) of the Child Nutrition Act of 1966 (42 U.S.C. 1786(i)),

"(iii) services provided by Federally qualified health centers, outpatient pediatric services, well-baby care, and early and periodic screening, diagnostic, and

"(iv) treatment services (as defined in subsection (r)).

"(E) Planning for and counseling to assist reentry into society, including—

"(i) to the extent such programs are available, referrals to appropriate educational, vocational, and other employment-related programs (including the Job Opportunities and Basic Skills Training Program under part F of title (IV),

"(ii) referral to appropriate outpatient treatment and counseling, and

"(iii) referrals to transitional housing, and assistance in obtaining suitable affordable housing and employment upon discharge.

"(F) Continuing specialized training for the staff members of residential treatment facilities with respect to the special needs of residents of such facilities and the children of such residents, designed to inform such staff members of the most recent and most effective treatment techniques.

"(4)(A) The requirements of this paragraph with respect to a facility are as follows:

"(i) Each State agency that administers alcohol and drug abuse prevention and treatment activities and programs has certified to the single State agency under section 1902(a)(5) that the facility—

"(I) is able to provide, either directly or by contract, the services described in paragraph (3); and

"(II) meets the State licensing or certification requirements applicable to the facility.

"(ii) The facility that provides the residential services described in paragraph (3) is not licensed as a hospital, and—

"(I) has no more than 40 beds, or

"(II) has no more than 40 beds the State provides assurances in an approved State plan demonstrating that—

"(aa) such facilities are capable of providing the services described in paragraph (3); and

"(bb) the State shall ensure that such services are provided by such facilities.

"(B) A facility may restrict the age of children who may receive services in the facility described in paragraph (5)(B) or (5)(C) and may restrict the number of such children that may accompany each mother or caretaker parent (except that the facility may not restrict the number of such children so as to prohibit one child from accompanying each mother).

"(5)(A) Subject to subparagraph (B), services described in paragraph (3) shall be covered in the amount, duration and scope medically required for each eligible individual in need for such services (as defined and determined by the Secretary).

"(B) Except as provided in subparagraph (C), with respect to an individual covered under a State plan, such State plan shall provide coverage of alcoholism and drug dependency residential treatment services for a period, if the period is not less than 12 months.

"(C) Nothing in this subsection shall be construed so as to prevent a State from requiring prior authorization and utilization review with respect to alcoholism and drug dependency residential treatment services to ensure that such services are appropriate and medically necessary.

"(6) A State plan shall limit coverage under the plan of alcoholism and drug dependency residential treatment services under subsection (a)(22) to the following individuals (who are otherwise eligible for medical assistance under this title):

"(A) Women during pregnancy, and until the end of the 1-year period following the end of the pregnancy.

"(B) Children of a woman described in subparagraph (A).

"(C) At the option of a State, the caretaker parent of a child of a woman described in subparagraph (A).

"(7) Notwithstanding any other provision of this title, a State plan for medical assistance may provide for medical assistance for alcoholism and drug dependency residential treatment services with respect to an individual described in subparagraph (B) or (C) of paragraph (5) who—

"(A) is the child or spouse of a woman described in subparagraph (A) of such paragraph; and

"(B) is not otherwise eligible for medical assistance under the plan during the period of time described in subparagraph (A) of such paragraph.".

(b) OPTIONAL COVERAGE OF CARETAKER PARENTS.—Section 1902(a)(10) of such Act (42 U.S.C. 1396a(a)(1) is amended—

(1) by striking "and" at the end of subparagraph (D);

(2) by adding "and" at the end of subparagraph (E); and

(3) by inserting before the matter at the end thereof the following new subparagraph:

"(F) that the medical assistance made available to individuals who are parents of a child eligible for medical assistance under a State plan and who are eligible for medical assistance under subclause (I), (III), or (IV) of clause (i) of subparagraph (A), under subclause (I), (II), or (III) of clause (ii) of such subparagraph, or under subparagraph (C), may include alcoholism and drug dependency residential treatment services (as defined in section 1905(u)) notwithstanding the exclusion from coverage for individuals in institutions for mental diseases under section 1905(a), without making such alocoholism and drug dependency residential treatment services available to other groups covered by the State plan (notwithstanding subparagraph (B);"

(c) PAYMENT ON A COST-RELATED BASIS.—Section 1902(a)(13) of such Act (42 U.S.C. 1396a(a)(13)) is amended—

(1) by striking "and" at the end of subpargraph (D),

(2) by adding "and" at the end of subparagraph (E), and

(3) by adding at the end the following new subparagraph:

"(F) for payment for alcoholism and drug dependency residential treatment services that—

"(i) the Senate determines (and provides assurances satisfactory to the Secretary) to be reasonable and adequate to meet the cost of efficiently and economically operating facilities to provide services that conform with applicable State and Federal laws and regulations, including any quality and safety standards; and

"(ii) to assure that individuals eligible for such services have reasonable access to such services;".

(d) CASE MANAGEMENT SERVICES.—Section 1902(a) of such Act (42 U.S.C. 1396a(a)) is amended—

(1) by striking "and" at the end of paragraph (52);

(2) by striking the period at the end of paragraph (53) and inserting "; and"; and

(3) by inserting at the end thereof the following new paragraph:

"(54) if the State plan includes, as medical assistance, alcoholism and drug dependency residential treatment services, provide—

"(A) with respect to each eligible individual who requests such services, for a case management evaluation of the needs of the eligible individual and the family of the eligible individual (as determined by the Secretary), to be conducted prior to the provision of such services, including—

"(i) an assessment of the necessity and desirability of providing the alcoholism and drug dependency residential treatment services;

"(ii) the adequacy of the services described in clause (i) to meet the health needs of the individual at the time of such case management evaluation and to promote the maximum level of physical, psychological, and emotional well-being with respect to such individual;

"(iii) the feasibility of meeting such needs through alternative institutional or non-institutional services, as defined by the Secretary, (to be provided as medical assistance to the extent that such alternative services are included as medical assistance under the State plan); and

"(iv) upon completion of the initial case management evaluation, referral to the alternative services in the case where a determination is made that such services meet the needs of the individual and the family of such individual; and

"(B) with respect to each eligible individual who requests such alcoholism and drug dependency residential treatment services, for a regular program of periodic case management review of the continued need for such services, including—

"(i) an assessment of the necessity and desirability of continuing to provide such services;

"(ii) the adequacy of such services in meeting the health needs of the eligible individual at the time of such review to promote the maximum level of physical, psychological, and emotional well-being with respect to such individual;

"(iii) the feasibility of meeting such needs through alternative institutional or non-institutional services, as defined by the Secretary, (to be provided as medical assistance to the extent that such alternative services are included as medical assistance under the State plan); and

"(iv) upon completion of the case management review, referral to the alternative services in the case where a determination is made that such services meet the needs of the individual and the family of such individual.".

(c) CHILD CARE UNDER THE AID TO FAMILIES WITH DEPENDENT CHILDREN PROGRAM UNDER TITLE IV OF THE SOCIAL SECURITY ACT.—Section 402(g)(1)(A)(i) of such Act (42 U.S.C. 602(g)(1)(A)(i)) is amended—

(1) by striking "and" at the end of subclause (I);

(2) by striking the period at the end of subclause (II) and inserting "; and" and

(3) by adding at the end the following new subclause:

"(III) for each individual described in paragraph (6) of section 1905(u), who receives alcoholism and drug dependency residential treatment services (as defined in paragraph (1) of such section) for which medical assistance is made available under a State plan under title XIX, to the extent the State agency (described in section 1902(a)(5)) determines such services to be necessary for a member of the family of such eligible individual.".

(f) CONFORMING AMENDMENTS.—

(1) CLARIFICATION OF CONTINUATION OF ELIGIBILITY FOR 12 MONTHS FOLLOWING THE END OF PREGNANCY.—Section 1902 of such Act (42 U.S.C. 1396a) is amended—

(A) in subsection (e)(5), by inserting before the period at the end the following: ", and, with respect to alcoholism and drug dependency residential treatment services (if covered under the plan), through the end of the month in which the 1-year period (beginning on the last day of her pregnancy) ends"; and

(B) in subsection (1)(1)(A), by inserting " and, with repsect to alcoholism and drug dependency residential treatment services (if covered under the plan) through the end of the month in which the 1-year period, beginning on the last day of her pregnancy, ends" " after "last day of pregnancy".

(2) REDESIGNATIONS.—Section 1902 of such Act (42 U.S.C. 1396a) is futher amended—

(A) in subsection (a)(10)(C)(iv), by striking "(20)" and inserting "(22)", and

(B) in subsection (j), by striking "(21)" and inserting "(23)".

(f) EFFECTIVE DATE TRANSITION.—

(1) The amendments made by this section apply to alcoholism and drug dependency residential treatment services and drug dependency residential treatment services furnished on or after July 1, 1991, without regard to whether or not final regulations to carry out such amendments have been promulgated by such date.

(2) The Secretary of Health and Human Services shall not take any compliance, disallowance, penalty, or other regulatory action against a State under title XIX of the Social Security Act in regards to alcoholism and drug dependency residential treatment services (as defined in section 1905(t)(1) of such Act)) made available under such title on or after July 1, 1991, before the date the Secretary issues final regulations to carry out the amendments made by this section, if the services are provided under its plan in good faith compliance with such amendments.

[From the New York Times, Dec. 31, 1989]

CRACK MOTHERS, CRACK BABIES AND HOPE

Since 1971, a program called Mabon (Mothers and Babies Off Narcotics) has been sheltering and treating drug addicts. Once the residents were trying to beat heroin; today they are trying to beat crack. At the moment there are 20 women and 23 children enrolled in the program run by Odyssey House and located on Wards Island.

It is as tragic an assemblage of families as can be found in the city—but in one sense also a hopeful one. For to the extent the program can be made to work, it offers a promising strategy for coping with New York City's crisis of child care.

Where child welfare policy once had to focus on the single-parent family, it now must deal increasingly with the no-parent child. The reason appears to be crack, which is far more popular with women than heroin ever was. As a result, drug abuse now affects far more small children than ever before.

In 1987 the number of babies born in New York City to substance-abuse mothers was 2,784. The 1989 figure is estimated at 10,000. Right now the vast majority of these children become candidates for a dangerously strained foster care system. Preventing them from having to be taken from their mothers may be their best hope, and the system's.

That's the main goal of Mabon. The average age of the women in residence is 29. Many already have four or five children, most of whom are in foster care, in addition to those living with them on Wards Island. The program gives these mothers a safe, structured environment.

While their children are in nurseries or preschool, the women participate in group therapy, encounter groups, eventually individual therapy. They also work toward their G.E.D.'s and take vocational training courses. Most important, they gain the self-esteem essential to independent living.

The program, supported by public funds, costs between $30,000 and $40,000 per family unit per year. That's not cheap, but the cost needs to be compared with the costs, financial and social, of denying any help. While there are no hard figures yet on long-term effectiveness of the therapy for crack addicts, it is more than encouraging that about 48 percent of Mabon enrollees graduate, compared with rates of only 25 to 30 percent for other residential drug treatment programs.

Certainly the idea of helping drug-involved mothers and children together deserves much more attention. Many, many more need the intensive services Mabon offers. And countless others might be helped with something less—outpatient treatment combined with day care, for example.

Mabon may show that motherhood gives crack abusers a bit more motivation to benefit from treatment than other addicts. With children severely at risk, that special motivation deserves special encouragement and support—nationally as well as in New York.

[From the New York Times, June 22, 1990]

THE SENATOR'S RIGHT ON DRUG TREATMENT

The Senator accuses the drug czar of seeking the "political rewards to be had for tough-guy talk." The drug czar calls the Senator's attack "bilious, dyspeptic, orotund."

What's going on? It's the latest flare-up in a dispute over financing for drug treatment between Daniel Patrick Moynihan and William Bennett, the Director of National Drug Control Policy. Senator Moynihan makes the better case.

The New York Democrat believes that Washington should spend as much on drug treatment as on law enforcement. Treatment programs around the country are desperately underfinanced; more money would make a big dent in the demand for drugs. The 50-50 recommendation was written into the 1988 omnibus drug bill.

Yet last year the Bush Administration, with Mr. Bennett as drug czar, continued the old pattern of spending—73 percent for law enforcement and only 27 percent for treatment. The language of the 1988 law, drug policy officials say, wasn't binding.

Mr. Moynihan responded with an amendment providing more drug treatment money from Medicaid, the Federal health insurance for the poor. The extent to which the program now covers substance abuse treatment in hospitals and clinics remains unclear, and it won't cover treatment in residential programs of the sort considered most effective for crack addicts. The Moynihan amendment, passed by the Senate late last year, would ease those restrictions.

Yet Mr. Bennett continues to resist, suggesting that such funds might be better provided through the current setup of block grants to states. Others worry that the

amendment's cost, estimated at $700 million a year is prohibitive.

But block grants, requiring annual Congressional approvals and further red tape at the state level, are less reliable than a Medicaid change, which would guarantee ongoing Federal support. Such a guarantee could spur the rapid development of drug treatment programs.

Is $700 million too much? If that kind of spending looks unrealistic this year, why not at least begin by allowing Medicaid funds for drug treatment of poor women who are pregnant? That would be an affordable investment—focused where it would do the most good.

[From the New York Newsday, July 24, 1990]

TRY TREATMENT—TO HIT AIDS, AID THE ADDICTS

Sen. Daniel P. Moynihan (D-N.Y.) is mad as hell—and it's hard to blame him. The 1988 federal anti-drug act directs the administration to increase, "to the greatest extent possible," the availability of drug-treatment programs so that anyone who requests these services will get them. But it hasn't happened, the Senator points out. Why not?

The administration points to a notoriously high rate of backsliders—especially among cocaine users—and insists that treatment on demand wouldn't be cost effective. In any case, says a spokesman for federal drug czar William Bennett, people are more inclined to stick with treatment when they're led into it not by whim but by the courts (that is, when their choice is staying clean or going to jail).

Bashing treatment on demand sounds like another tiresome turn in Bennett's tough-guy act.

Forget for a moment that drug treatment on request is a goal set by law. The contention that convicts make better rehabilitation risks than addicts who merely ask for treatment is unproven. The research is equivocal, say most experts. And if priority for convicts is cost-effective (it's cheaper than jail), do we really want to tell addicts they'll have to get themselves locked up before we'll help them?

To be fair, Bennett's policy consists of more than sound and fury. His office does support the allocation of more money for treatment slots, and Bennett says he's convinced that drug treatment can work. But why ante up a substantial amount for treatment on demand, Bennett asks, when we know that a large number of addicts will fail to stay the course?

One answer is AIDS. The crack epidemic is feeding the AIDS epidemic. Some crack users sell their bodies to pay for the habit; others are buyers of sexual favors. Safe sex methods are frequently ignored. In the long run, the cost of drug treatment on demand is less than the cost of AIDS treatment. As a public health measure, there's even a benefit to stopping such addicts temporarily.

Moynihan has the right idea. He's backing a bill that would explicitly allow Medicaid to pay for drug treatment in a hospital or clinic. The measure may cost hundreds of millions yearly, but ultimately it would save lives and money.

MEDICAID AND MATERNAL ADDICTION: WHY IT DOESN'T WORK AND HOW TO FIX IT

(Presented by David Gates on behalf of the National Health Law Program, Inc.)

I. WHAT MEDICAID COVERS NOW

Significant amounts, probably in the millions, are being spent each year under Medicaid on substance abusing pregnant women and their babies. However, very little of this money is being used for substance abuse treatment. Most of the Medicaid funds are going to neonatal intensive care units in hospitals to try to save the lives of babies after addiction has done its damage.

Medicaid funds that are going to treatment primarily pay for detoxification in hospitals or for methadone maintenance clinics. It should be noted that although detox often is a prerequisite for treatement, it is not itself treatment. Detox is not likely to help a substance abuser get off alcohol or drugs unless she is provided real treatment immediately following completion of detox. As for methadone maintenance, it is simply not appropriate for alcohol or cocaine addictions, which are the drugs of choice among women. Furthermore, while methadone may be a useful component in a broader treatment program for heroin addicts, the effectiveness of many existing methadone maintenance programs has been called into question by a recent GAO report.[1] The point is, while Medicaid funds are being spent to treat the effects of maternal addiction, very little is being spent to treat the causes.

Inpatient substance abuse treatment for pregnant women under 21 can be covered under Medicaid if provided in a psychiatric hospital.[2] However, treatment in these facilities tends to be very expensive and not geared specifically to substance abuse. Furthermore, psychiatric hospitals are unlikely to be able to provide the necessary prenatal care. Coverage is a state option.[3] Medicaid coverage of outpatient drug-free substance abuse treatment services is more problematic due to the absence of a clearly "medical" component to the treatment (discussed further below).

Residential treatment services provide the greatest challenge in terms of coverage under Medicaid. This is unfortunate because these programs are often less expensive and more specific to substance abuse than many inpatient hospital programs (which tend to primarily be psychiatric units) while many experts believe they are more effective, particularly for hard core drug abuse, than outpatient programs.

Most residential programs are not able to get Medicaid coverage as hospitals or psychiatric hospitals because they are not medical or psychiatric institutions and are therefor unable to get licensure or JCAH accreditation as a hospital or psychiatric hospital or meet the other Medicaid requirements for hospitals.[4]

Probably the most appropriate provision for Medicaid coverage of residential treatment programs is the so-called "rehab option".[5] The rehab option permits states to cover "rehabilitative services" which are defined as "any medical or remedial services recommended by a physician or other licensed practitioner of the healing arts, within the scope of his practice under State law, for maximum reduction of physical or mental disability and restoration of a recipient to his best possible functional level."[6] While an initial reading of this provision might suggest it is aimed at physical, occupational and speech therapies, those services are explicitly covered under another provision.[7] Therefor, the rehab services covered under this provision must encompass some other services. Several states are using the rehab option to cover intensive community based mental health services such as partial hospitalization.[8] The full range of services that may be covered under the rehab option remains unclear.

II. BARRIERS TO MEDICAID COVERAGE

The IMD exclusion

The Health Care Financing Administration ("HCFA") that administers the Medicaid program takes the position that substance abuse is a mental disease.[9] Since residential programs treat people with "mental diseases" (by HCFA's definition of that term), HCFA has found some of these programs to be institutions for mental diseases.[10] By finding a residential substance abuse treatment program to be an IMD, every person under the age of 65 who is residing in that program is excluded from Medicaid, not just for coverage of their substance abuse treatment but for any Medicaid covered service (including prenatal care) regardless of where it is provided.[11] Therefor for residential substance abuse treatment programs and Medicaid-eligible clients residing in them, the definition of an IMD is critical.

The statute defines an IMD as "a hospital, nursing facility, or other institution of more than 16 beds, that is primarily engaged in providing diagnosis, treatment, or care of persons with mental diseases, including medical attention, nursing care, and related services."[12] Obviously, the easiest way for a residential treatment program to avoid being classified as an IMD is to have less than 16 beds. Unfortunately, since few free-standing residential programs were designed with Medicaid in mind (due to the difficulties in getting Medicaid coverage), many have 16 or more beds.

Prior to 1986, HCFA had focused primarily on the diagnoses of the people being treated by the facility. If the majority were diagnosed as substance abusers (which, as noted above, HCFA considers to be a mental illness) the facility was considered an IMD. However, two court challenges and an order from their own Grant Appeals Board forced HCFA to look instead at the nature of the treatment being provided.[13]

In 1986, HCFA issued new guidelines on IMDs.[14] While seeming to implement the Court and Appeals Board decisions that the type of treatment provided and the qualifications of the persons providing the treatment be the primary factors in determining IMD status, HCFA created a "catch 22" under which most residential substance abuse facilities continue to be excluded from Medicaid coverage. A facility that follows a psychiatric model using medically trained and licensed personnel is considered an IMD (thereby excluding from coverage at least for those patients between 21 and 65) while a facility that uses peer support and lay counselors would not fall into the IMD exclusion but its services would not "constitute 'medical or remedial treatment' required for Medicaid reimbursement under 42 CFR 440.2(b)."[15] Unfortunately, the plaintiff in the lead case that forced HCFA to revise its IMD standards was financially unable to continue its litigation and the 1986 standards remain unchallenged.[16]

While Congress has not dealt with the problems raised by the IMD exclusion in the context of residential substance abuse treatment programs, it has expressed its concern about the impact of the IMD exclusion of the provision of psychiatric and other mental health services. In OBRA '89, Congress required HCFA to study its policy regarding the IMD exclusion and the statutory exclusion itself and report to Congress by October 1, 1990 on any statutory or

Footnotes at end of article.

policy modifications that "may be appropriate to accommodate changes that may have occurred since 1972 in the delivery of psychiatric and other mental health services on an inpatient basis. . . ."[17] As part of this mandated study and report, HCFA will examine the effect of its interpretation of the IMD exclusion on Medicaid coverage of residential substance abuse treatment and will also consider the possibility of exempting these facilities from the IMD exclusion.

Medical Model

HCFA has indicated it will look at the nature of the treatment provided and at the training and qualifications of the people providing it to determine whether the treatment can be covered.[18] Where treatment "follows a psychiatric model and is performed by medically-trained and licensed personnel" HCFA will find the treatment to be medical in nature and therefor coverable under Medicaid.[19] However, where treatment is based "on peer counseling and meetings to promote group support and encouragement, and they use primarily lay persons as "counselors' " HCFA will probably find that the treatment is not medical in nature and therefor not coverable under Medicaid. Most substance abuse treatment programs follow the latter model rather than the former. Treatment programs that do not use a psychiatric model are more likely to meet HCFA's "medical" requirement if they use licensed or certified substance abuse counselors (in states that have some licensure or certification requirements).

Room and Board Costs

HCFA's contends that absent explicit statutory authorization, the Medicaid program may not reimburse providers for room and board costs (which comprise a significant portion of the costs for residential programs).[20] Since the Medicaid Act only explicitly authorizes capital reimbursement for hospitals, skilled or intermediate care facilities (nursing homes) and hospices, under HCFA's view states may not reimburse non-hospital residential treatment programs for their room and board costs.

Some residential treatment programs have been able to get around this by operating in an unused section or wing of a general hospital.[21] Another approach some residential treatment programs have taken is to become licensed as intermediate care facilities (for which Medicaid can reimburse room and board costs).[22] The practicality of this approach depends in large measure on the licensure requirements of the state where the program is located.

This approach will become increasingly impractical as of October 1, 1990 when the statutory distinction between skilled and intermediate care facilities will be eliminated. These two categories of facilities will be replaced by a single category entitled "nursing facilities".[23] The practical effect of that elimination will be to require facilities that had been licensed as intermediate care to meet the federal requirements that had previously only been imposed on skilled care facilities. One of the most difficult "nursing facility" requirements for substance abuse treatment programs to meet is the requirement that licensed nursing services (RN or LPN) be provided 24 hours a day and that an RN be available 8 hours a day, seven days a week although this requirement may be waived by the state under certain circumstances.[24]

Furthermore, even if a residential facility was able to comply with the nursing facility requirements, it might still not qualify as a nursing facility because the statute excludes facilities that are "primarily for the care and treatment of mental diseases" (HCFA considers substance abuse to be a mental disease) from coverage as nursing facilities.[25] However, states could still reimburse free-standing residential programs under Medicaid for the cost of providing counseling and other therapies and use their ADAMHA block grant funds or other funding streams to cover the room and board costs.

III. REMOVING THE BARRIERS

Pennsylvania's Act 152

One state has gotten around the various barriers to Medicaid coverage that are set forth above by establishing a parallel Medicaid program for substance abuse treatment using only state dollars. In 1988, the Pennsylvania General Assembly enacted Act 152 which provides Medicaid coverage "for a continuum of alcohol and drug detoxification and rehabilitation services".[26] The act specifically covers non-hospital detox and residential treatment facilities. The act also requires the state Medicaid agency to consult with the state Alcohol and Drug Abuse Agency and for the two agencies to commission an independent evaluation of the success of treatment funded under Medicaid. In addition, Act 152 contains a provision requiring all licensed substance abuse treatment facilities to admit "at reasonable rates" people on Medicaid.[27] [Section 2335(a)] While the language is not clear, it was the intent of the parties who negotiated this language that "reasonable rates" refer to reimbursement rates. In order to reduce the initial cost of the act and to allow time to set up the necessary administrative structure, the act phased in Medicaid coverage over a five-year program although the state Medicaid agency is aiming to implement the act state-wide more quickly. Of course a state may not overturn federal Medicaid law so the barriers to federal funding remain and funding for Act 152 coverage comes solely from the state so far. However, the state is exploring the possibility of getting federal financial participation, at least for some of the covered services.

Conditions that complicate pregnancy

While there are several provisions of the Medicaid Act which may be used generically to fund substance abuse treatment there is a provision specific to pregnant women. It requires states to cover pregnant women whose income does not exceed a level set by the state which must be at least 133% of the federal poverty level and not greater than 185%.[28]

Services covered for pregnant women who are Medicaid eligible under this provision are "services related to pregnancy . . . and to *other conditions which may complicate pregnancy.*" [Emphasis added][29] Without question, substance abuse is a "condition which may complicate pregnancy". The Health Care Financing Administration ("HCFA") has made it clear that a state may cover services for pregnant women that they do not cover for other Medicaid eligibles.[30] Given the current fiscal restraints on the federal government and many states, targeting coverage of substance abuse treatment under Medicaid to pregnant women without having to cover all Medicaid eligibles may be particularly attractive.

There are however drawbacks to covrage under this provision. Pregnant women who are Medicaid eligible under this provision lose their eligibility 60 to 90 days after the last day of their pregnancy.[31] In many instances addicted mothers will need more than two months of treatment following the birth of their child, especially if they entered treatment late in their pregnancy. Mothers under 21 could have their continued treatment covered under EPSDT if they were sent for an EPSDT screening. For mothers 21 and older, states could cover the cost of treatment following the 60 day cutoff under another funding scource such as the ADAMHA Block Grant although this would require coordination between two different state agencies. The "single state agency" for alcohol and drug abuse is usually a different agency than the single state Medicaid agency. Of course, Congress could eliminate this problem by exempting pregnant women in substance abuse treatment programs from the 60 day limit.

An even greater drawback to the effective use of Medicaid is HCFA's position that the coverage provisions regarding pregnant women do not supersede the IMD exclusion and HCFA's perceived lack of authority to pay room and board costs in a non-hospital residential setting. While these restrictions would not affect outpatient or hospital-based programs, they would limit a state's ability to use Medicaid to cover non-hospital residential treatment. Congress could eliminate this problem by exempting substance abuse treatment programs for pregnant women from the IMD exclusion.

INFANT VICTIMS OF DRUG ABUSE

(Presented by Maureen Montgomery, M.D., F.A.A.P., on behalf of the American Academy of Pediatrics

INTRODUCTION

Mr. Chairman, my name is Dr. Maureen Montgomery, and I am an assistant clinical professor of pediatrics at the State University of New York School of Medicine in Buffalo. More to the point for today's discussion, I am also associated with the Children's Hospital of Buffalo, where I serve as co-coordinator of the new Infants of Substance-Abusing Mothers [ISAM] Clinic. It is an honor to appear before you this morning on behalf of my 39,000 colleagues in the American Academy of Pediatrics, who are dedicated to the promotion of maternal and child health.

At the outset, Mr. Chairman, I want to express to you and to the members of this panel the Academy's deep appreciation of your emphasis on these urgent issues affecting addicted women and their children. As a nation, we have not yet begun to come to terms with our tragic proliferation of drug-exposed infants and children, but this public hearing—and this Committee's jurisdiction, especially with respect to Medicaid, foster care and the maternal and child health block grant—offers real promise of progress.

For pediatricians, that promise is all-important. There are indications today that perhaps one of every 10 infants is exposed to illicit drugs during pregnancy. More and more infants, are being admitted to special-care nurseries for complications caused by their intrauterine drug exposure.

Yet preliminary findings from a recent survey by the National Association of Children's Hospitals and Related Institutions suggest that neither systems are currently in place nor adequate resources are being made available today to meet the needs of this growing patient population. I come before you as an advocate for these infants and children, and for their mothers, whose persistent substance abuse problems our society simply must learn to address more sensitively—and more successfully.

THE PROBLEM

The situation in Buffalo is acute—our community has some of the most adverse health status and socioeconomic problems in the state. Infant mortality rates and low birthweight deliveries are extremely high. The rate of prematurity in Buffalo in 1986 was 9.5 percent, the highest in the state. As of August, 1987, there were 467,000 children of substance abusers in New York State alone. And research indicates that without effective intervention many of the current children of substance abusers are themselves likely to fall prey to drugs.

Pediatricians, caught in the crossfire of this latest epidemic, continue to face two basic problems: 1) infants exposed to substance abuse in the prenatal period are at high risk for a host of medical problems, and 2) the mothers are often unable or unprepared to parent.

ISAM

In response to these concerns associated with the increasing number of drug-exposed infants in and around Buffalo, the ISAM Clinic was launched eight months ago under a "Healthy Tomorrows for Children" grant, awarded by the federal bureau of maternal and child health in conjunction with the Academy. ISAM is a primary care pediatric clinic designed to provide services to children who are exposed to drugs prenatally in order : 1) to prevent abuse, 2) to increase the skills and understanding of both parents and foster parents who have these children in their care, and 3) to reduce developmental delays in participating children.

The model includes a range of services designed to provide concrete assistance to these high-risk mothers and infants, including intensive medical evaluation and follow-up, parenting classes, home-based intervention and linkage to appropriate social service agencies in the community. Since its inception, the program has developed a protocol with local child protective services that includes a contract between the mother and CPS which mandates that she will take the baby for appropriate medical care. (The ISAM Clinic is strongly suggested as the source for that primary care in order to ensure that the infants in fact receive intended services.)

METHODOLOGY

Primary care under ISAM is provided by a pediatrician and a nurse practitioner on a schedule even greater than the frequency of visits recommended by AAP guidelines. This includes parent education classes in conjunction with well-child visits and periodic neurodevelopmental and behavioral assessments. There is 24-hour coverage for emergencies and advice.

Home-based support is carried out through weekly visits by the "resource mothers" and through their attendance with the parents at all parent-education classes. (These culturally similar "resource mothers" are recruited from Buffalo neighborhoods and are trained to provide surrogate parenting. They are women of the same race as the mother, and who have proven abilities to care for and nurture children. They support and serve as role models to substance-abusing mothers in an effort to avoid foster-care placement.)

Children's Hospital currently has a strong link with Child Protective Services through its High Risk Clinic and the Norman S. Ellerstein Center for the Prevention of Child Abuse and Neglect. Signs of child abuse or non-compliance with the treatment program are to be identified through frequent home and office visits, and are promptly followed up and reported.

CONSIDERATIONS FROM THE COMMUNITY-BASED PERSPECTIVE

It is clear that any programs which hope to succeed in caring for children of substance-abusing mothers must be carefully tailored to meet the unique needs of this vulnerable population. Consider the following:

(1) There is probably a high incidence of multiple diagnoses among these mothers (e.g., drug dependency, AIDS, sexually transmitted diseases, psychiatric illnesses such as depression and borderline personalities). Effective interventions will require the incorporation of mental health principles and professionals into every aspect of the program.

(2) There is a tremendous financial burden on centers caring for these infants and their mothers. Based on our experience and that of many other programs around the country which have dealt with poor, undereducated, high-risk populations and their relative success at parenting their children, it is apparent that service delivery is extremely labor-intensive.

The services which appear to be most crucial, those of nursing coordinators and social workers, are not routinely funded through the reimbursement process. These are precisely the services that make a difference in terms of quality of care and ability to assure long-term follow-up, without which any valid outcome measure is impossible.

ISAM is patched together through a combination of federal, state, local and private foundation grants. Continued availability of grant funding is uncertain, and Medicaid does not provide funding for these necessary psychosocial supports.

(3) The vast majority of mothers (more than 95 percent) in this population are poor, inner city minority women who live in drug-infested neighborhoods without amenities which most of us would consider among the bare necessities of life. Approximately one-third do not have a refrigerator; many have no phone, and more frequently, safe child care and transportation are major issues. Concern about the safe arrival of the public assistance check is real. Many of the mothers are "overprogrammed," i.e., obligated to attend parenting classes, undergo drug treatment, visit other children in foster care, and keep appointments for WIC, public assistance, housing, etc.

Most of the women have had late or no prenatal care, and therefore the paperwork is not in place for their infants to be immediately placed on Medicaid or WIC. (There is a six- to eight-week lag, during which period the infant's nutrition is dependent on the mother purchasing the formula herself.) In addition, a large number of women freely admit that they discovered their pregnancy late, beyond the time when they could have obtained a legal abortion, which many of these women say that they would have had. Even these women, however, clearly want to keep their infants once they are born.

A large number of these women have themselves been victims of domestic violence, child abuse, prostitution or incarceration—they are without hope and without goals. They have no ability to delay gratification and are entirely fatalistic. Many women, even after being informed of the real risk of "crib death" among cocaine-exposed infants, turn down the offer of a home monitor because they believe "what will be, will be."

These mothers have few supports; daily stress has become unmanageable; their lives are out of control. They have pressing needs and are often inept at using available support systems, formal or informal. They need help just to use help. Traditional programs which offer services encumbered by bureaucracy, and which do not take into account the obstacles faced by these depleted families, are doomed to failure. We must rid ouselves of the notion that the women who are most in need of help will simply partake if the services are there. In the long run, unless we get women to appreciate their own individual responsibilities, nothing we do in the clinic will work. Successful programs must meet these families more than halfway.

(4) As part of our program, we attempt to meet every mother in the hospital before

she and the baby are discharged in order to introduce ourselves and the "resource mother." The baby's first postnatal appointment is within 7-10 days discharge, and then every two to three weeks thereafter for the next several months. Consequently, we get to know them and they get to know us early on, and there is an attachment which ensues naturally. The resource mother visits frequently for the first month, almost daily, to develop a relationship that grows beyond the clinic. Ideally, no resource mother in the program is responsible for more than three families at once.

In addition, the team social worker meets with each family at each visit, and teaches a mother-support group on a weekly basis. The support group focuses on issues relating to parenting, caring for a new baby, family stresses, etc. By deliberately avoiding the issues of drug dependency, the classes have allowed the women themselves to broach their problems with substance abuse—as well as the implications for their children.

(5) There are crisis in social service delivery systems. There is currently in Buffalo a six- to eight-week delay for emergency housing. Most emergency shelters will not allow children. There is a six- to eight-week waiting period for Medicaid-eligible patients requiring inpatient detoxification. These programs are traditionally geared toward drug-using males, and make no provision for mothers who must find emergency child care at a moment's notice. None of the inpatient programs in Buffalo today provides residential care for mothers and their children. One inpatient program has made pregnant women a priority. Many of the women in ISAM have in the past been inpatients in drug treatment programs for acute detoxification. All have stated that the outpatient programs, following their hospitalizations, have been thoroughly unsatisfactory.

(6) Foster care is strained to the limit. Most foster care families in our clinic are close relatives of the natural mother, e.g., the baby's grandmother or aunt. These families are being overwhelmed by the sheer numbers of childen being placed. In addition, many children are placed back with their natural mothers within the first year of life, often after the mothers' drug dependency has not been successfully overcome, and without the infants having formed any bond whatsoever with their mothers.

CONCLUSION

Mr. Chairman, I have not conveyed to you this morning an optimistic picture. Conditions today among women and their drug-exposed infants are dismal and getting worse. They cry out for attention. As promising as our own modest community-based program may be, I have to emphasize that effective outcome measures will require long-term evaluation and follow-up. Service delivery is critical, not only on moral grounds but for scientific purposes. If they find it unsatisfactory or inappropriate, these mothers and children will be extemely difficult to track. But there are innovations which are cost-effective, and which we can promote now. More than 100 woman, for example, many of them themselves on public assistance, applied to serve as ISAM resource mothers. This component of the program is vital—yet minimum wage—and well may warrant wider application.

It is our hope that this committee in its wisdom can sort out these and other promising opportunities for public policy in behalf of addicted women and drug-exposed infants, and then exert its leadership behind necessary legislation. The Academy will be there in support.

Mr. BRADLEY. Mr. President, I join my colleague from New York, Senator MOYNIHAN, in introducing this important bill that would allow States to use Medicaid funds to provide drug treatment and family support services to substance abusing pregnant women. The bill would also allow States to use Medicaid funds to provide these services to spouses who will be caring for these children and for the children themselves. These services will allow these fragile families a chance for a decent and productive life.

Mr. President, as a member of the National Commission to Prevent Infant Mortality, I have been deeply concerned about the treatment of infants and children in this country. For the past few years, we have taken several important steps to address a problem that can only be characterized as a national disgrace. More children die in this country before the age of 1 than in 20 other industrialized countries in the world. Many others are born underweight and with significant disabilities that will hamper their abilities to realize their full potential in life. Much of this misery is preventable with early, adequate, and coordinated prenatal care.

Mr. President, I have been proud of our efforts in the Congress to remove significant financial barriers to early, adequate, and coordinated prenatal care through the Medicaid Program. Last year, we also began the task of breaking down other, nonfinancial barriers to preventive prenatal care. We started the process of developing an effective maternal and child health handbook that can be used to educate women about the growing life inside and the responsibilities for nurturing the child. We tried to attack bureaucratic barriers by creating one-stop shopping health programs and promoting home visitation as a strategy for reaching hard-to-reach women. Finally, we attacked the problem of the lack of providers of care by taking the first step to ensure adequate reimbursement.

But, Mr. President, despite all these efforts, the tasks of improving the care we deliver to women and their children, and of dealing effectively with the unconscionably high infant mortality rates in this country remain momentous. Drug abuse during pregnancy, both of legal and illegal substances, cheats many children of the chance to succeed in life. Cigarette smoking contributes to at least 25 percent of all low-birth-weight infants. The National Commission to Prevent Infant Mortality has estimated that if all women were to stop smoking during their pregnancies, 10 percent of all infants who now die before the age of 1 would live. An estimated 40,000 to 80,000 babies are born each year with enough exposure to alcohol to go through alcohol withdrawal. Many develop physical and mental retardation as a result.

But the harmful effects of these legal drugs during pregnancy has been quickly overshadowed lately by the enormous problems faced by infants exposed to the host of illicit drugs that have proliferated in America. Such drugs as crack/cocaine, metamphetamines, heroin, PCP, and marijuana all present potent threats to women addicts and their innocent children who are exposed to the drugs. In 1988, an estimated 5 million women—90 percent of American women of childbearing age—admitted to using an illegal drug. One million women admitted to using crack/cocaine. It is no wonder that our foster care system is overwhelmed, our hospitals are full of crack exposed children who have nowhere to go, and family structures that have traditionally been important supports are beginning to crumble.

And yet, despite this growing threat to families and children, we do not have enough facilities to help women to overcome these pernicious addictions for their own sake and for the sake of their families. Even when these facilities exist, precious few provide the range of family support and child welfare services needed to give women a chance to escape the environment that nurtures such destructive habits.

Mr. President, there has been a growing recognition that viable treatment alternatives are necessary to break the cycle of despair, addiction, and misery that substance abuse represents for a growing number of childbearing women in this country. Today, with this bill, we will be taking substantial steps toward guaranteeing that effective treatment for drug addicted families is available through the Medicaid Program. This bill would specifically end the catch-22 that treatment programs face today when seeking reimbursement for drug treatment for pregnant women under the Medicaid Program. The Medicaid payment exclusion for facilities classified as institutes of mental diseases has been used effectively to block payments for drug treatment programs for this vulnerable and desperately needy population. This bill would clearly give States the option to pay for treatment and services for addicted women and their children.

This bill gives the States the option to use Medicaid funds for residential substance abuse treatment for pregnant women. It further defines a range of services for the family and for the woman that would enable her to provide for the social and health needs of other children in her family while she is reorganizing her life

under treatment. The bill would encourage these facilities to provide long-term job and skills training that would enable the woman to take a longer term perspective on her life and would give her the tools with which to provide a better environment for her family. It is only the hope for a better life and the skills to achieve it that will enable substance abusing pregnant women to resist the temptation to slide back into drug use. This job will, of course be easier if the family is intact. Two-parent families have a clear advantage in providing the stable environment needed for healthy growth. This is why this bill will also offer the States the opportunity to use Medicaid funding for other caretaking spouses and children within the family structure.

Mr. President, this bill will save children's lives. A preliminary estimate of the cost of this bill if all States opted for the treatment of pregnant women is about $200 million per year when fully implemented. Approximately 37,000 women and their caretaker relatives would be given a chance for a better life with this bill. In New Jersey, where as many as 12,000 pregnant women use illegal drugs and thousands more smoke and drink alcohol to excess, this bill would allow the State to make significant strides in dealing with the problem.

More and more, the test of our leadership in the world will depend less on our military might and more on our ability to show the world that we can effectively and humanely address deep social problems affecting our society. I urge my colleagues to support this bill.

By Mr. WILSON:

S. 3003. A bill to provide for the establishment of the Laguna de Santa Rosa National Wildlife Refuge in Sonoma County, CA; to the Committee on Environment and Public Works.

LAGUNA DE SANTA ROSA NATIONAL

● Mr. WILSON. Mr. President, I rise today to introduce legislation to establish the Laguna de Santa Rosa Wildlife Refuge. This bill is similar to H.R. 2548 introduced by my House colleague from California, DOUG BOSCO.

Located in Sonoma County, the Laguna de Santa Rosa is an important and unique freshwater coastal wetland. My legislation will designate over 9,000 acres of the Laguna de Santa Rosa as a National Wildlife Refuge. Preservation of this marshland accomplishes several environmental goals.

First, it protects valuable open spaces from piecemeal development. Many of our urban areas are growing—seemingly without bounds. It is important to retain open space for recreation, for fish, wildlife and water fowl, for interaction—people to people, as well as people to nature. They enrich our lives by bringing families and individuals into touch with the wonders of nature. This marshland renews the life cycle of nature as it provides not only a refuge for wildlife but a refuge for humankind from the stresses of our daily lives.

Second, my bill protects valuable marshland. The Laguna de Santa Rosa is a valuable nursery. It is the second largest freshwater marshland extant in California. It is home to several endangered species, including the bald eagle and the peregrine falcon, and at least five threatened or endangered plant species. The wealth and diversity of wildlife that this wetland supports is staggering for an area so close to a major, urban center. Over 400 species of plants and birds inhabit this important wintering and nesting area for migratory waterfowl along the Pacific Flyway.

Marshlands are fragments of California's natural history. It is important to preserve what we have left. Rapidly expanding development threatens to encroach on these important wetlands, sometimes by outright drainage and development, sometimes by untoward byproducts and impacts.

My bill attempts to forge a partnership with the Federal and State government and the local government entities, specifically the cities of Sebastopol and Santa Rosa, as well as the county of Sonoma. Although the legislation I introduce today designates the 9,000-acre Laguna de Santa Rosa a National Wildlife Refuge, local government and the State of California will contribute over 3,000 acres which have already been acquired. The State of California is also pledged to contribute $4 million, an important contribution to the $20 million, which my bill authorizes for Santa Rosa marshland acquisition.

This is an excellent example of constructive Federal response to the leadership of local government. This bill, which roughly models my upper Sacramento bill in terms of local participation, is based on the suggestions of the Laguna Technical Advisory Committee. The Federal Government does well when it listens to the concerns of local government, and it does particularly well when it heeds their concerns for the provision of important open space.

Mr. President, the importance of protecting the precious, outstanding natural areas near urban centers cannot be overemphasized.●

By Mr. LEVIN (for himself and Mr. MOYNIHAN):

S. 3004: A bill to amend the Public Health Service Act to extend the time for the filing of certain claims for compensation for vaccine-related injuries, and for other purposes; to the Committee on Labor and Human Resources.

EXTENSION OF TIME FOR FILING VACCINE-RELATED INJURY CLAIMS

Mr. LEVIN. Mr. President, as we are all aware, vaccination is the surest and most effective way to protect against a number of illnesses that commonly affect children. In rare cases, children have suffered adverse reactions after receiving a vaccine. The Vaccine Compensation Act provides a no-fault compensation system for individuals who suffer injuries associated with one of the following vaccines: Diptheria and tetanus toxoids and Pertussis (DPT], measles, mumps and rubella, oral polio, or inactivated polio vaccine.

The program, effective as of October 1, 1988, permits individuals who believe they are eligible for compensation to file a petition with the U.S. Claims Court. The act is intended to provide a less time-consuming and less expensive procedure for resolving claims for vaccine-related injuries than a lawsuit in a civil court. Individuals filing a petition do not need to prove fault on the part of those who manufactured or administered the vaccine. They must only prove that the vaccine caused the injury.

All claims for compensation for vaccine injuries occurring prior to October 1, 1988 must be filed no later than October 1, 1990. For vaccine injuries occurring after October 1, 1988 the claim must be filed within 3 years after the date of the first symptom of manifestation of the vaccine injury.

Mr. President, despite the efforts of the Secretary of the Department of Health and Human Services to inform the public of the availability of the program, many parents of children injured by vaccine have not filed claims because they have no knowledge of the act or the impending deadline. In my own state, the Michigan Legislative Council for the Handicapped [MLCH] estimates that an overwhelming majority of the parents of vaccine injured children are unaware of the deadline. And this is the trend nationwide. According to MLCH, claims of eight Michigan children, whose parents have only recently learned of the act, will be filed in the weeks ahead.

For this reason, I am today introducing legislation, along with my colleague from New York, Senator MOYNIHAN, which would extend the deadline for injuries occurring prior to October 1, 1988 for 6 months, until April 1990.

The compensation awards are to reimburse for medical expenses, lost earnings, pain and suffering, legal expenses and a death benefit. The program is funded through a perdose excise tax on the sale of selected prescribed vaccines and is maintained in a Vaccine Injury Compensation Trust Fund, managed by the Internal Revenue Service. The tax was first imposed on all vaccine sales after December 31,

1987 and are used to compensate for adverse reactions from vaccines administered after September 30, 1988. Receipts generated by the excise tax are estimated to be $118 million in 1991. Compensation for injuries resulting from vaccines administered prior to fiscal year 1989 is provided through the general fund. An $80 million appropriations is authorized annually for fiscal years 1989-1992 for the retroactive claims; any additional amounts are permitted to be paid from the trust fund. A later appropriation is made to reimburse the trust fund.

As of June 28, 1990, some 340 petitions have been filed. Of these, 323 stemmed from injuries or deaths that occurred before October 1, 1988, and 17 after; 35 petitions were never completed; 27 claims ended in dismissal and 8 were judged noncompensable.

Eighty-two awards totaling $42.1 million had been made as of June 28, 1990 under the program. Amounts of the awards ranged from $39,000 to $2.8 million. The average award has been approximately $1 million for a lifelong impairment; $250,000 for death.

Mr. President, vaccines against childhood disease are universally recommended to protect the public health at large, as well as for each individual. Because, regrettably, a small number of individuals each year suffer tragic side effects, the no-fault compensation system provides an appropriate and effective remedy for assisting children and their families.

I urge my colleagues to support this much-needed extension. I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3004

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. EXTENSION OF TIME FOR FILING VACCINE-RELATED INJURY CLAIMS.

Section 2111(a)(5)(A) of the Public Health Service Act (42 U.S.C. 300aa-11) is amended by striking out "2 years" and inserting in lieu thereof "2½ years".

By Mr. AKAKA:

S. 3005. A bill to establish an endowment to assist the University of Hawaii in making grants for the development of education programs which target Filipinos; to the Committee on Labor and Human Resources.

GRANTS FOR EDUCATION PROGRAMS FOR FILIPINOS

Mr. AKAKA. Mr. President, today I am introducing a bill which will establish an endowment to assist the University of Hawaii in providing grants for the development of educational programs to aid Filipino students.

In 1988, a report by the University of Hawaii Task Force on Filipinos found that Filipinos were substantially under-represented in higher education. Although Filipinos comprise 19 percent of the population in Hawaii's public schools, the report found that only 6.3 percent of the student body at the University of Hawaii at Manoa were Filipino.

Mr. President, education has become one of our top national priorities. President Bush and our Nation's Governors established a goal at the educational summit for each student in the country to be literate and employable by year 2000. One way to achieve this ambitious goal is to provide educational opportunities for minorities, which is what my bill does.

Filipinos are the fourth largest ethnic group in the State of Hawaii, and comprise over 11 percent of the State's population. They are also the fastest growing ethnic group. Between 1967 and 1982, 54 percent of the immigrants admitted into the United States were Filipinos.

Studies and reports show a direct correlation between education and socioeconomic status. A higher educational level usually correlates to a higher economic standing. However, Filipinos have historically been unable to benefit substantially from the educational system and, thus, have remained one of the most disadvantaged ethnic groups in the State of Hawaii.

Mr. President, the bill I am introducing today seeks to change this tragic situation. It would establish a $5 million endowment, matched by non-Federal sources, to develop educational programs which target Filipino students. The programs would assist Filipino students in making the difficult transition from high school and community colleges to 4-year institutions of higher education. It would also allow the development of programs to increase recruitment efforts and decrease the high attrition rates that occur during the first year at 4-year institutions.

The intent of this legislation is to encourage Filipino youngsters to pursue higher education and to develop new educational programs that will assist Filipinos and immigrant Filipinos. This bill seeks to address the lack of educational opportunities, and attempts to resolve some of the basic roadblocks these students face in obtaining a higher education.

I thank the President for this time.

By Mr. KENNEDY (for himself, Mr. HATCH, Mr. DODD, Mr. COATS, and Mr. DURENBERGER):

S. 3006. A bill to amend the Federal Food, Drug, and Cosmetic Act to make improvements in the regulation of medical devices, and for other purposes; to the Committee on Labor and Human Resources.

COMPREHENSIVE MEDICAL DEVICE IMPROVEMENT ACT

Mr. KENNEDY. Mr. President, I am pleased to introduce the Comprehensive Medical Device Improvement Act of 1990. This bill strengthens the authority of the Food and Drug Administration to assure the safety and efficacy of all medical devices, consistent with its mandate to protect the public health. The goals of this bill are simple—to ensure that all medical devices entering the market are safe and effective, that problems with devices are identified quickly, and that defective devices are taken off the market.

This legislation builds upon the Medical Device Amendments of 1976, by improving the processes of classification and approval of new medical devices, and enhancing monitoring of clinical experience with devices after they have been approved for marketing. Consumers will gain added assurance that medical devices are safe and effective, and the medical device industry will benefit from more consistent FDA regulation.

The statutory definition of a medical device includes any item promoted for a medical purpose that does not rely on a chemical action to achieve its intended effect. It covers everything from tongue depressors to cardiac pacemakers, from bed pans to CAT scanners.

Through the years, we have all seen dramatic accounts of the miracles of medical technology. These new technologies continue to improve our ability to diagnose and treat illness, and enhance the quality of life for large numbers of individuals.

Altogether there are more than 1,700 types of medical devices, 60,000 separate products, and thousands of device manufacturers. Not surprisingly, the breadth of the field poses unique regulatory challenges.

Medical device legislation first received serious consideration in Congress in the early 1970's. Extensive debate took place, culminating in the passage of the Medical Device Amendments of 1976. Before 1976, FDA's authority was limited to actions taken after a medical device had been introduced into interstate commerce, and only when it had been found to be adulterated or misbranded. In essence, the burden of proof was on FDA to prove that a device was unsafe or ineffective.

In 1976, Congress decided that "after the fact" regulation was inadequate in light of the proliferation of medical devices, and the disclosure of serious problems with some devices, such as the Dalkon shield.

In the 1976 amendments, Congress sought to protect the public health without stifling technology and innovation by creating a three-tiered classification system that regulated medical devices according to their task. Of the 1,700 types of medical devices, approximately 700 have been placed in Class I. Devices in this class pose the

least health risk and are subject to "general controls": prohibitions against misbranding and adulteration, labeling requirements, manufacturer registration and product listing, and good manufacturing practices.

Approximately 800 devices are in Class II. These devices are subject to the same general controls as Class I devices; in addition, the 1976 amendments directed FDA to establish performance standards for each device in Class II. To date FDA has not been able to establish a performance standard for a single Class II device; the agency estimates that it may require 50,000 staff-years to complete standards for all Class II devices.

All remaining devices are in class III; many of these devices are at the cutting edge of technology and have the greatest potential risk—cardiac pacemakers, for example. Manufacturers of class III devices must comply with premarket approval requirements, which include the use of scientific and clinical data to demonstrate safety and efficacy.

The 1976 amendments provide two ways for a manufacturer to obtain approval from FDA to market a device. Under premarket notification, or "510(k)," a manufacturer must demonstrate that the new device is substantially equivalent to a pre-1976 device; more than 95 percent of all new devices are approved via the 510(k) pathway.

Once a manufacturer has submitted a 510(k) application, the FDA has 90 days to determine whether the device can be marketed; if FDA does not notify the manufacturer otherwise, the application is considered approved and the device can be marketed. For the remaining devices, regarded as truly new in the statutory sense, a manufacturer must submit a premarket approval application [PMA]. PMA's currently require years for FDA to consider, even though the 1976 amendments set a time requirement of 180 days. FDA must approve the PMA before a manufacturer can market the new device.

In recent years, FDA has, for some devices, required data to demonstrate the safety and efficacy of a device approved via 510(k)—a so called mini-PMA or hybrid 510(k). But requirements for such data are not consistent among devices or manufacturers. In addition, FDA has called for PMA's for only a small number of pre-1976 class III devices, even though the 1976 amendments directed FDA to call for PMA's for all class III devices. And newer versions of class III devices, for which FDA has never requested PMA's, have been approved via the 510(k) route.

While the 1976 amendments have provided significant improvements in the safety and effectiveness of medical devices, further reforms are needed to make the regulation of devices simpler and more efficient while maintaining assurances of safety. Several issues need to be addressed:

Most devices enter the market through 510(k) notifications. Yet the absence of a statutory definition for "substantially equivalent" raises doubts about the scope of FDA's authority;

The requirement of mandatory performance standards for class II devices is unworkable, and it is unrealistic to expect FDA to establish such standards for all class II devices;

The current classification system needs improvement in a number of areas to allow more expeditious review of devices which present the greatest potential risks;

Prohibitions against allowing FDA to use data in one manufacturer's PMA to approve or reclassify another manufacturer's device have led to inefficient use of industry and FDA resources;

The postmarket surveillance system is not adequate to inform FDA of problems with medical devices in a timely manner; and

Oversight authority of the FDA must be improved to assure that defective devices are identified more quickly and, if necessary, removed from the market.

The Comprehensive Medical Device Improvement Act addresses these concerns about regulation of medical devices in several ways.

"SUBSTANTIAL EQUIVALENCE"—SECTION 510(k)

The bill provides a statutory clarification of the determination that two devices are substantially equivalent. In essence, the bill codifies, and makes consistent, the present practices of FDA concerning section 510(k) notifications. Those seeking a determination that a device is substantially equivalent to a pre-1976 class III device must conduct a reasonable search of all published or unpublished information and provide a summary of all safety and effectiveness data.

If the submission of clinical data is required as part of a substantial equivalence determination, the Secretary may require a summary of the data to be prepared by the manufacturer and made available to the public.

REGULATION OF CLASS II DEVICES

Since the current requirements for mandatory performance standards are unwieldly, the bill provides that performance standards may be established by "notice and comment" rulemaking. The bill also permits the Secretary to establish additional controls such as guidelines or notifications to facilitate the regulation of class II devices.

PRE-1976 CLASS III DEVICES

The bill provides a timeframe to review and revise all pre-1976 class III devices. Within 3 years of enactment, all manufacturers of such devices must submit a summary of safety and effectiveness information; within 5 years, the Secretary must issue notices either reclassifying the devices into class I or II, or retaining the devices in class III. If a device remains in class III, the Secretary must, within 12 months, establish a schedule calling for premarket approval for each device. Appropriate classification of pre-1976 class III devices will also assure that a PMA approval schedule is established for post-1976 devices determined to be substantially equivalent to devices remaining in class III.

TRANSITIONAL DEVICES

The bill requires FDA to address the issue of transitional devices such as contact lenses, which were regulated as drugs prior to the 1976 medical device amendments and are now automatically placed in class III, regardless of risk. The bill gives specific timeframes for FDA to make appropriate decisions about the classification of transitional devices. This issue has been of great interest to Senator BUMPERS and Senator HATCH, and I am pleased that we have been able to address it in the context of this broad reform.

PREMARKET APPROVAL DATA

The bill provides that after a period of exclusivity, data contained in one manufacturer's PMA should, under certain circumstances, be available to the FDA for use in approving and reclassifying other devices. Under current law, FDA is unable to use such data for any purpose. The intent of this provision is to protect innovation, while at the same time creating incentives for competition in the medical device industry.

POSTMARKET SURVEILLANCE

The bill will provide several means of improved postmarket surveillance to assist in early identification of potential problems with medical devices. Under current law, manufacturers of medical devices have reporting obligations, but medical device users such as hospitals and nursing homes do not. The bill requires hospitals and other users to report on deaths and serious injuries when there is information that reasonably suggests that a medical device may have caused or contributed to the death or injury.

By including, for the first time, hospitals and similar health care facilities in the reporting network, this bill addresses concerns that FDA is unaware of many device problems. Questions of underreporting of device defects have been raised in a number of instances.

In one highly publicized case involving structural flaws in an artificial heart valve, the device remained on the market for years while FDA sought sufficient evidence to confirm the seriousness of the problem. The defective valve exposed thousands of

patients to substantial risk, and caused a significant number of deaths. Many of those lives might have been saved if a comprehensive user reporting system had been in place to provide early confirmation of the valve's risk.

Concerns about inadequate or untimely reporting of device flaws have also been expressed in investigations of serious, and in some cases, life-threatening defects with silicone breast implants, anaesthesia machines, and implantable pacemakers. In all these instances, user reporting might have prevented numerous personal tragedies.

The bill's early warning reporting system will provide vital information about the use of medical devices, without unduly burdening either users or the FDA. The bill requires users to report device-related deaths concurrently to FDA and to the manufacturer. Users would report serious illnesses or injuries directly to the manufacturer when there is a reasonable suggestion that a device may have caused or contributed to the illness or injury. The bill will not affect the current obligations of manufacturers under the Medical Device Reporting Program.

The bill also improves post-market surveillance by requiring manufacturers of devices that may pose substantial risks to contract with qualified academic medical centers to monitor clinical experience. This provision will help to provide reliable information about devices in the critical period immediately after market introduction. At a recent hearing, the Labor and Human Resources Committee heard testimony that this type of clinical monitoring could have provided early detection of serious problems with several types of devices, including heart valves, resuscitators and apnea monitors.

IMPROVED OVERSIGHT

Additional provisions in the bill will increase the authority of FDA to assure that unsafe devices are quickly identified and appropriately modified or removed from the market.

The bill provides the Secretary of Health and Human Services with authority to halt the distribution of a PMA-appropriated device at once, if it presents an unreasonable risk of substantial harm to the public health. Under current law, the Secretary can only remove such devices after lengthy administrative proceedings. In an appearance before the Labor and Human Resources Committee, the Acting Commissioner of FDA requested this authority.

In the case of the defective heart valves noted above, a streamlined withdrawal process would have allowed FDA to remove defective devices over 2 years before the company conducted a voluntary market individual.

The bill instructs the Secretary to issue regulations which will require manufacturers, distributors, and importers of devices which may pose substantial risks to establish mechanisms to assure that such devices can be traced to the ultimate users.

The bill provides that manufacturers, distributors, and importers must notify the Secretary when they conduct certain types of device removals or repairs which are not part of routine servicing. Under current law, it is not a requirement that such activities be reported to the FDA; the agency may not find out about removals and repairs until a lengthy interval has passed, if at all.

The bill provides the Secretary with specific recall authority to remove a device which poses an unreasonable risk of substantial harm to the public health. The "repair, replacement, or refund" provisions in section 518(b) of the current law are cumbersome. In fact, section 518(b) has never been used. The bill provides the Secretary with a needed tool for decisive action to protect the public health from unsafe devices.

REVIEW OF COMBINATION PRODUCTS

The bill improves efficiency in the FDA review process by providing that the Secretary will require only one market clearance route for products which are combinations of devices, drugs, or biologics.

This bill is designed to enhance regulatory efficiency and provide greater assurances to the American people that medical devices are safe and effective. Enactment of this legislation will increase consumer confidence that FDA is appropriately regulating medical devices. It will encourage technological innovation in the medical device field, while providing improved protections for public health.

I particularly commend Senator HATCH, Senator DODD, and Senator COATS for their efforts in developing this bill, and I hope that it will receive wide bipartisan support in the Senate. As this legislation moves forward, I am anxious to obtain recommendations for improvements from all interested parties. In light of the strong interest by the House of Representatives in passing medical device legislation during this year, I am optimistic that a bill will be enacted before Congress adjourns.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3006

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Comprehensive Medical Device Improvement Act of 1990".

SEC. 2. REFERENCES TO THE FEDERAL FOOD, DRUG, AND COSMETIC ACT.

Except as otherwise specifically provided, whenever in this Act an amendment is expressed in terms of an amendment to a section or other provision, the reference shall be considered to be made to a section or other provision of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 301 et seq.).

SEC. 3. REMANUFACTURING.

Section 510 (21 U.S.C. 360) is amended—

(1) in subsection (a)—

(A) by striking the "and" at the end of paragraph (1);

(B) by redesignating paragraph (2) as paragraph (3);

(C) by inserting after paragraph (1) the following new paragraph:

"(2) the term 'manufacture' includes, with respect to a device, remanufacture;";

(D) by striking the period at the end of paragraph (3) (as redesignated) and inserting "; and"; and

(E) by inserting after paragraph (3) (as redesignated) the following new paragraph:

"(4) the term 'remanufacture' means, with respect to a device, the reprocessing, reconditioning, or rebuilding of a device, or the performance of any similar act to a device, previously introduced into interstate commerce, for the purpose of holding the device for resale, or for any other form of commercial distribution, by a person who owns the device."; and

(2) by adding at the end the following new subsection:

"(1) Not later than 2 years after the date of enactment of this subsection, the Secretary shall issue regulations providing for exemptions from the requirements of sections 510(k) and 515, and any other regulatory requirement that the Secretary determines to be inappropriate to a remanufactured device.".

SEC. 4. REVIEW OF SAFETY AND EFFECTIVENESS INFORMATION.

(a) REVIEW.—Section 510(k) (21 U.S.C. 360(k)) is amended—

(1) by redesignating paragraphs (1) and (2) as subparagraphs (A) and (B), respectively;

(2) by inserting "(1)" after the subsection designation; and

(3) by adding at the end the following new paragraph:

"(2)(A) The requirements of subparagraph (B) shall apply to a person who submits a notification in accordance with paragraph (1) for a device that the person claims is substantially equivalent to a marketed device—

"(i) that was introduced or delivered for introduction into interstate commerce for commercial distribution before the date of enactment of this paragraph;

"(ii) that is classified as a class III device in accordance with subsections (b) through (d) of section 513; and

"(iii) for which no final regulation requiring premarket approval has been promulgated in accordance with section 515(b).

"(B) A person described in subparagraph (A) shall—

"(i) prior to the submission of a notification in accordance with paragraph (1), conduct a reasonable search for, and review of, published and unpublished data available to the person concerning the safety and effectiveness of the marketed device and the device for which the notification is submitted, including all adverse safety and effectiveness data concerning the devices, except for data that has been submitted to the Sec-

retary in accordance with section 519 of this Act and section 803 of title 21, Code of Federal Regulations; and

"(ii) include in the notification a certification that the search and review was conducted and a citation to and summary of the data resulting from the search.

"(C) The Secretary may require the submission of any data described in the summary required by paragraph (B)(ii).".

SEC. 5. CLASSIFICATION OF DEVICES.

(a) CLASSIFICATION.—Section 513 (21 U.S.C. 360c) is amended—

(1) in subsection (a)(1)—

(A) in subparagraph (A)(ii), by striking "or to establish a performance standard" and inserting "or to establish an additional control or controls, as described in subparagraph (B)(ii),";

(B) by amending subparagraph (B) to read as follows:

"(B) CLASS II, ADDITIONAL CONTROLS.—A device—

"(i) that cannot be classified as a class I device because general controls are insufficient to provide reasonable assurance of the safety and effectiveness of the device;

"(ii) for which there is sufficient information to establish an additional control or controls to provide the assurance, including—

"(I) the promulgation of a performance standard;

"(II) the development and dissemination of a guideline, including a guideline for the submission of clinical data in a premarket notification submission in accordance with section 510(k); and

"(III) a recommendation or other appropriate action considered necessary by the Secretary to provide reasonable assurance of the safety and effectiveness of the device; and

"(iii) for which it is necessary to establish an additional control or controls to provide reasonable assurance of the safety and effectiveness of the device."; and

(C) in subparagraph (C)(i)(II), by striking "establishment of a performance standard" and inserting "establishment of an additional control, as described in subparagraph (B)(ii),"; and

(2) in subsection (f)—

(A) in paragraph (1), by inserting "the Secretary by order determines that" after "unless"; and

(B) in paragraph (2), by striking "The" and inserting "The Secretary may initiate the reclassification of a device classified in class III under paragraph (1), or a".

(b) CONFORMING AMENDMENT.—Section 513(h)(1) is amended by inserting after "510" the following: "(except for a guideline for the submission of clinical data in a premarket notification submission in accordance with section 510(k))".

SEC. 6. REVISION OF CLASSIFICATION FOR CERTAIN CLASS III DEVICES.

(a) REVISION OF CLASSIFICATION.—Section 513 (21 U.S.C. 360c) (as amended by section 5(b) of this Act) is further amended—

(1) by redesignating subsection (h) as subsection (i); and

(2) by inserting after subsection (g) the following new subsection:

"Revision of Classification

"(h)(1) The requirements established by order in accordance with paragraph (2) shall apply with respect to a device—

"(A) that was introduced or delivered for introduction into interstate commerce for commercial distribution before the date of enactment of this subsection;

"(B) that is classified as a class III device; and

"(C) for which no final regulation requiring premarket approval has been promulgated in accordance with section 515(b).

"(2) Not later than 36 months after the date of enactment of this subsection, the Secretary—

"(A) shall by order require manufacturers of devices described in paragraph (1) to submit to the Secretary a citation to and summary of all published and unpublished data reasonably available to the manufacturer concerning the safety and effectiveness of the device, including any adverse safety and effectiveness data, except for information that has been submitted to the Secretary under section 519 of this Act and section 803 of title 21, Code of Federal Regulations; and

"(B) may require a manufacturer to submit any data described in the summary.

"(3) After the issuance of an order in accordance with paragraph (2)(A), but not later than 24 months after the issuance of the order, the Secretary shall publish in the Federal Register for each device covered by the order a notice of proposed rulemaking proposing to change the classification of the device to class II or to class I or to continue the classification of the device in class III.

"(4) In determining whether to revise the classification of a device or to continue the classification of the device in class III, the Secretary shall apply the criteria in section 513(a) to the information available when the device was initially classified and any new information made available since initial classification.

"(5) After considering any comments submitted in response to the notice of proposed rulemaking, the Secretary shall issue a regulation changing the classification of the device or continuing the classification in class III. The Secretary shall publish in the Federal Register findings on the matters referred to in paragraph (4), a discussion of the comments received in response to the notice of the proposed rulemaking, and the response of the Secretary to the comments. The Secretary shall not publish the regulation before the expiration of 90 days from the date of publication of the notice of proposed rulemaking relating to the regulation.

"(6) A regulation issued in accordance with paragraph (5) is subject to judicial review in accordance with section 517.".

"(7) Not later than 12 months after the effective date of any regulation issued in accordance with paragraph (5), the Secretary shall establish a schedule for the issuance of a regulation in accordance with section 515(b) requiring submission of a premarket approval application for each device that has been continued in class III.".

SEC. 7. ESTABLISHMENT OF PERFORMANCE STANDARDS.

(a) PROCEDURE.—Section 514 (21 U.S.C. 360d) is amended—

(1) in subsection (a), by striking "The Secretary may" and inserting "If the Secretary determines that a performance standard is necessary to provide reasonable assurance of the safety and effectiveness of a class II device, the Secretary shall";

(2) by striking subsections (b) through (f);

(3) by redesignating subsection (g) as subsection (b);

(4) in subsection (b) (as redesignated), by striking paragraphs (1) and (2) and inserting the following new paragraphs:

"(1)(A) The Secretary shall publish in the Federal Register a notice of proposed rulemaking for the establishment, amendment, or revocation of any performance standard for a device.

"(B) A notice of proposed rulemaking for the establishment or amendment of a performance standard for a device shall—

"(i) set forth a finding with supporting justification that the performance standard is appropriate and necessary to provide reasonable assurance of the safety and effectiveness of the device;

"(ii) set forth proposed findings with respect to the risk of illness or injury that the performance standard is intended to reduce or eliminate;

"(iii) invite interested persons to submit to the Secretary within 15 days of the publication of the notice, requests for changes in the classification of the device based on new information relevant to the classification; and

"(iv) invite interested persons to submit an existing performance standard for the device, including a draft or proposed performance standard, for consideration by the Secretary.

"(C) A notice of proposed rulemaking for the revocation of a performance standard shall set forth a finding with supporting justification that the performance standard is no longer necessary to provide reasonable assurance of the safety and effectiveness of a device.

"(D) The Secretary shall provide for a comment period of no fewer than 60 days.

"(2) If, after publication of a notice in accordance with paragraph (1), the Secretary receives a request for a change in the classification of the device, the Secretary shall, within 60 days of the publication of the notice, consult with a classification panel described in the second sentence of section 513(e).".

(b) CONFORMING AMENDMENTS.—

(1) Section 514(b) (as redesignated by subsection (a)(3)) is amended—

(A) in paragraph (3)(A), by striking "paragraph (2)" and inserting "paragraph (1)"; and

(B) in paragraph (4)(A), by striking "paragraphs (2) and (3)(B)" and inserting "paragraphs (1), (2), and (3)(B)".

(2) Section 517(a)(3) (21 U.S.C. 360g(a)(3)) is amended by striking "514(b)(2) or".

(3) Section 520(i) (21 U.S.C. 360j(i)) is amended by striking "514(g)(5)(B)" and inserting "514(b)(5)(B)".

SEC. 8. WITHDRAWAL OF APPROVAL OF APPLICATION.

Section 515(e) (21 U.S.C. 360e(e)) is amended by adding at the end the following new paragraph:

"(3)(A) The Secretary may by order temporarily suspend the approval of an application approved under this section if the Secretary determines that the continuation of distribution of the device under the approved application will result in an unreasonable risk of substantial harm to the public health.

"(B) Concurrently with the issuance of an order under subparagraph (A), the Secretary shall notify the holder of the suspended application for the device that the Secretary will provide an opportunity for an informal hearing to determine whether to issue an order withdrawing approval of the application, as provided in paragraph (1), or to vacate the temporary suspension order.".

SEC. 9. JUDICIAL REVIEW.

Section 517(a) (21 U.S.C. 360g(a)) is amended—

(1) by striking "or" at the end of paragraph (6); and

(2) by inserting after paragraph (7) the following new paragraphs:

"(8) the issuance of a regulation under section 513(h), or

"(9) the issuance of an order under this subchapter that a device is substantially equivalent to another device.".

SEC. 10. EMERGENCY RECALL AUTHORITY.

Section 518 (21 U.S.C. 360h) is amended by adding at the end the following new subsection:

"Emergency Recall Authority

"(e)(1) If the Secretary finds that a device intended for human use, and subject to this Act, presents an unreasonable risk of substantial harm to the public health, the Secretary shall issue a recall order. The order shall require the appropriate party or parties (including the manufacturers, importers, distributors, or retailers of the device) to immediately cease any distribution of the device and, thereafter, withdraw the device from commercial distribution. The order shall specify a timetable in which the device withdrawal will occur, and shall require periodic reports to the Secretary describing the progress of the withdrawal effort.

"(2) The order issued under paragraph (1) shall include withdrawal of devices from hospitals and other health care institutions, and from individuals subject to the risks associated with the use of the device, unless the Secretary determines that the risk of withdrawing the device from the facilities or persons presents a greater health risk than not removing the device from use.

"(3) Not later than 5 days after the issuance of an order under paragraph (1), the Secretary shall provide the party or parties to whom the order is directed an informal hearing to determine whether the order shall be affirmed or vacated.

"(4) If the Secretary determines that the order was properly issued, the order shall remain in effect. The person to whom the order was directed shall initiate the withdrawal of devices, as required by the order, not later than 10 days after the determination of the Secretary and complete the device withdrawal not later than 20 days after initiation of the withdrawal. Not later than 30 days after a determination that the order issued under paragraph (1) was proper, the Secretary shall institute an action under section 302(a) to prohibit the distribution of the device unless, prior to the initiation of such an action, the conditions associated with the unreasonable risk of substantial harm are remedied to the satisfaction of the Secretary.

"(5) If the Secretary determines that inadequate grounds exist to support the order issued under paragraph (1), the Secretary shall vacate the order.

"(6) The remedy provided by this subsection shall be in addition to those provided by subsections (a), (b), and (c).".

SEC. 11. USER REPORTS.

(a) REQUIREMENT.—Section 519 (21 U.S.C. 360i) is amended—

(1) in subsection (a)(3), by inserting before the semicolon the following: "and shall require distributors who submit the reports to submit copies of the reports to the manufacturer of the device for which the report was made";

(2) by adding at the end the following new subsections:

"Inclusion of Distributors

"(c) Not later than 1 year after the date of the enactment of this subsection, the Secretary shall amend the regulations promulgated under this section to require distributors of medical devices to establish and maintain records, and make reports under section 519.

"Certification

"(d) Each manufacturer, importer, and distributor required to make reports under subsection (a) shall submit to the Secretary annually a statement certifying that—

"(1) the manufacturer, importer, or distributor did not file any report under subsection (a) because it did not receive information respecting, or was not aware of, events requiring such a report; or

"(2) the manufacturer, importer, or distributor did file a certain number of the reports that represented all events concerning which the manufacturer, importer, or distributor had information.

"User Reports

"(e)(1) As used in this subsection:

"(A) The terms 'facility' and 'medical device user facility' mean a hospital, nursing home, or ambulatory surgical facility.

"(B) The terms 'serious illness' and 'serious injury' mean illness or injury, respectively, that is unanticipated and—

"(i) is life threatening;

"(ii) results in permanent impairment of a body function or permanent damage to a body structure; or

"(iii) necessitates immediate medical or surgical intervention to preclude permanent impairment of a body function or permanent damage to a body structure.

"(2) Whenever a medical device user facility becomes aware of information that reasonably suggests that a medical device may have caused or contributed to the death of a patient of the facility, the facility shall within 10 working days report the information to the Secretary and, if the identity of the manufacturer is known, to the manufacturer of the device.

"(3) Whenever a medical device user facility becomes aware of information that reasonably suggests that a medical device may have caused or contributed to a serious illness or serious injury to a patient of the facility, the facility shall within 10 working days report the information to the manufacturer of the device. If the facility is unable to determine the identity of the manufacturer of the device, the facility shall send a report of the information to the Secretary.

"(4) For purposes of paragraphs (2) and (3), a medical device user facility shall be treated as having received or otherwise become aware of information with respect to a medical device of the facility when an individual who is employed by or otherwise affiliated with the facility receives or otherwise becomes aware of information with respect to the device in the course of the duties of the individual.

"(5)(A) Except as provided in subparagraph (B), the Secretary may not disclose the identity of a facility that makes a report in accordance with paragraph (2) or (3)—

"(i) except in connection with an action brought to enforce section 301(q);

"(ii) except in connection with a communication to a manufacturer of a device that is the subject of a report in accordance with paragraph (2) or (3); or

"(iii) unless required to be disclosed in accordance with subsection (a).

"(B) This paragraph shall not authorize the Secretary to withhold the identity of a facility making a report in accordance with paragraph (2), or any information in the report, from duly authorized committees and subcommittees of Congress.

"(6) No facility or individual who is employed by or otherwise affiliated with the facility shall be held liable in any private civil action with respect to the content of any report made in accordance with paragraph (2) or (3) unless the information contained in the report is false and the facility or individual had knowledge of its falsity. A report made in accordance with paragraph (2) or (3), or the fact that the report has been made, may not be admitted into evidence or otherwise used in an action against the facility or individual, other than in an action brought to enforce this subsection.

"(7) The obligation of a medical device user facility to make a report in accordance with paragraph (2) or (3) shall not affect the obligation of the manufacturer of the device who receives the information to file a report concerning the device as required under subsection (a).

"User Education

"(f)(1) During the 1-year period beginning on the date of enactment of this subsection, the Secretary may award grants to eligible entities to establish public education programs for hospitals, ambulatory surgical facilities, and nursing homes concerning the user reporting requirements set forth in subsection (e).

"(2) In awarding grants in accordance with paragraph (1), the Secretary shall give priority to entities to submit proposals that demonstrate—

"(A) a need for user education among hospitals, ambulatory surgical facilities, and nursing homes regarding a generic category of medical device; and

"(B) the ability to adequately perform the proposed educational program.

"(3) In order to receive a grant in accordance with paragraph (1), an entity shall submit an application to the Secretary at such time, in such manner, and containing such information as the Secretary may by regulation require. At a minimum, the application shall contain—

"(A) a description of the proposed public education program;

"(B) the qualifications and experience of the entity to carry out the program; and

"(C) the need for user education among persons to be served by the entity regarding a generic category of medical device.

"(4) The Secretary shall by regulation specify the qualifications for an entity to receive a grant in accordance with paragraph (1).

"(5) There are authorized to be appropriated to carry out this subsection such sums as may be necessary for each of fiscal years 1991 through 1993.".

(b) REGULATIONS.—The Secretary of Health and Human Services shall promulgate regulations to implement section 519(e) of the Federal Food, Drug, and Cosmetic Act, as added by the amendment made by subsection (a), not later than 12 months after the date of enactment of this Act.

(c) REPORT TO CONGRESS.—Not later than 36 months after the date of enactment of this Act, the Secretary of Health and Human Services shall prepare and submit to the appropriate committees of Congress a report that contains an evaluation of the requirements of section 519(e) of the Federal Food, Drug, and Cosmetic Act. At a minimum, the report shall contain—

(1) an evaluation of the safety benefits of the requirements;

(2) an evaluation of the burdens placed on the Food and Drug Administration by the requirements;

(3) an evaluation of the cost-effectiveness of the requirements; and

(4) recommendations for legislative reform.

(d) EFFECTIVE DATE.—Section 519(e) of the Federal Food, Drug, and Cosmetic Act shall become effective on the earlier of—

(1) the effective date of regulations promulgated in accordance with subsection (b); or

(2) the date that is 12 months after the date of enactment of this Act.

SEC. 12. REPORTS OF REMOVALS AND FIELD REPAIRS.

Section 519 (21 U.S.C. 360i) (as amended by section 11 of this Act) is further amended by adding at the end the following new subsection:

"Reports of Removals and Field Repairs

"(g)(1)(A) Except as provided in paragraph (2), the Secretary shall by regulation require a manufacturer, importer, or distributor of a device to report to the Secretary any removal or field repair of a device undertaken by the manufacturer, importer, or distributor of a device if the removal or field repair was undertaken to—

"(i) eliminate a risk to health posed by the device; or

"(ii) remedy a violation of this Act caused by the device.

"(B) A manufacturer, importer, or distributor of a device who undertakes a field repair or removal of a device that is not required to be reported under subparagraph (A) shall keep a record of the field repair or removal.

"(2) No report of the field repair or removal of a device may be required under paragraph (1) if a report of the field repair or removal is required under this Act, or the field repair or removal was initiated at the request of the Secretary, and a report has been submitted to the agency.

"(3) For purposes of paragraphs (1) and (2), the terms 'field repair' and 'removal' do not include routine servicing.".

SEC. 13. USE OF PREMARKET APPROVAL DATA.

Section 520(h) (21 U.S.C. 360j(h)) is amended—

(1) in paragraph (3), by striking "Any" and inserting "Except as provided in paragraph (4), any"; and

(2) by adding at the end the following new paragraph:

"(4) Not earlier than 4 years after the date of approval of an application in accordance with section 515, the Secretary may use any information contained in the application, including clinical and preclinical data, but excluding descriptions of methods of manufacture and product composition, to establish the safety and effectiveness of another device for purposes of this Act.".

SEC. 14. TRACEABILITY.

Subsection (j) of section 520 (21 U.S.C. 360j(j)) is amended to read as follows:

"Traceability Requirements

"(j)(1) The Secretary shall, not later than 1 year after the date of enactment of this subsection, determine which devices should be subject to a requirement of labeling, or coding, or identification by any other means, that is necessary to ensure that the device may be traced from the place of manufacture of the device or initial distribution to the ultimate user of the device, from among devices that are purported or represented to be for use in supporting or sustaining human life, or for a use that is of substantial importance in preventing impairment of human health, or present a potential unreasonable risk of illness or injury.

"(2) Not later than 2 years after the date of enactment of this subsection, the Secretary shall by regulation require the manufactures, importers, and distributors of the devices that are described in paragraph (1) to establish the means by which the devices will be traced to the ultimate user.".

SEC. 15. REVISION OF CLASSIFICATION FOR DEVICES REGULATED AS NEW DRUGS OR ANTIBIOTIC DRUGS.

(a) IN GENERAL.—Section 520(l)(2) (21 U.S.C. 360j(l)(2)) is amended—

(1) by inserting "(A)" after the paragraph designation; and

(2) in subparagraph (A) (as designated by paragraph (1), by striking "The" and inserting "The Secretary may initiate the reclassification of a device classified in class III under paragraph (1), or a"; and

(3) by adding at the end the following new subparagraph:

"(B)(i) Not later than 90 days after the date of enactment of this subparagraph, the Secretary shall publish a notice in the Federal Register with respect to devices that are subject to regulation pursuant to this subsection. The notice shall state whether each device shall remain in class III or be reviewed for classification into class I or II. The notice shall also require the manufacturer of a device that the Secretary intends to classify into class I or II to submit to the Secretary a description of and citation to any adverse safety and effectiveness information not submitted under section 519(a) of this Act and section 803 of title 21, Code of Federal Regulations. The Secretary may require a manufacturer to submit the adverse safety and effectiveness information for which a description and citation were submitted to the Secretary.

"(ii) After the issuance of the notice under clause (i), and following consultation with appropriate advisory panels in accordance with subsections (b) through (d) of section 513, but before the expiration of the 1-year period beginning on the date of enactment of this subparagraph, the Secretary shall publish a proposed regulation in the Federal Register classifying each device into class I or II, or providing that each device shall remain in class III. The data furnished by manufacturers in accordance with clause (i), in combination with the advice and recommendation of appropriate advisory panels shall, for purposes of this Act, serve as a basis for satisfying the criteria set forth in subclause (I) or (II) of section 513(a)(1)(C)(ii), and shall serve as a basis for the proposed regulation required under this subparagraph.

"(iii) Following a review of comments received on the proposed regulation issued in accordance with clause (ii), and before the expiration of the 1-year period referred to in clause (ii), the Secretary shall promulgate a final regulation prescribing the classification of all devices regulated under this subsection on the date of enactment of this subparagraph. No regulation issued under this subparagraph requiring a device to remain in class III or classifying the device as class I or II may take effect before the expiration of 90 days from the date of the publication of the regulation in the Federal Register.

"(iv) The Secretary may by notice in the Federal Register extend the 1-year period prescribed by clauses (ii) and (iii) for a device for an additional period not to exceed 1 year.

"(v) Notwithstanding any other provision of this subsection, the Secretary shall not retain any daily wear nonhydrophilic plastic contact lens in class III unless the Secretary finds that it meets the criteria set forth in subclause (I) or (II) of section 513(a)(1)(C)(ii). The finding, and the grounds for the finding, shall be published in the Federal Register. If during the 1-year period beginning on the date of enactment of this subparagraph, the Secretary has not made the finding and issued the notice required by this clause, the Secretary shall issue an order placing the lens in class II.

"(vi) Actions taken under this subparagraph shall not interfere with any pending reclassification action. Any device for which a reclassification petition was pending on January 1, 1989, shall not be included in the list published under clause (i).".

(b) CONFORMING AMENDMENT.—Section 520(l)(1) is amended—

(1) by inserting "on the initiative of the Secretary or" after "Secretary"; and

(2) by striking "paragraph (2)" and inserting "paragraph (2)(A)".

SEC. 16. SUBSTANTIAL EQUIVALENCE.

Section 520 (21 U.S.C. 360j) is amended by adding at the end the following new subsection:

"Substantial Equivalence

"(m)(1) For purposes of determinations of substantial equivalence under this subchapter—

"(A) The term 'different technological characteristics' means, with respect to a device being compared to a predicate device, that there is a significant change in the materials, design, energy source, or other features of the device from those of the predicate device.

"(B) The term 'substantially equivalent' or 'substantial equivalence' means, with respect to a device being compared to a predicate device, that the device has the same intended use as the predicate device and—

"(i) has the same technological features as the predicate device; or

"(ii) has different technological features and the evidence submitted that the device is substantially equivalent to the predicate device contains information, including clinical data, if required, that demonstrates that the device is as safe and effective as a marketed device.

"(2) A device may not be found to be substantially equivalent to a predicate device that has been removed from the market at the initiative of the Secretary or that has been determined to be misbranded or adulterated by a judicial order.

"(3) The Secretary shall promulgate regulations under which a manufacturer seeking a determination of substantial equivalence may be required to prepare a summary of any clinical data required (including information respecting any adverse effects of the device on health) if the Secretary determines that clinical data must be submitted in accordance with paragraph (1)(B)(ii), and establishing a standard format for the summary. The Secretary shall make the summary available to the public within 30 days of the issuance of a determination of substantial equivalence.".

SEC. 17. POSTMARKET SURVEILLANCE.

The Act is amended by inserting after section 521 (21 U.S.C. 360k) the following new section:

"SEC. 522. POSTMARKET SURVEILLANCE.

"(a) IN GENERAL.—The Secretary shall require a manufacturer to conduct postmarket surveillance for any device that—

"(1) is an implant;

"(2) is intended for a use in supporting or sustaining human life;

"(3) is of substantial importance in diagnosing, curing, mitigating, treating disease, or in otherwise preventing impairment to human health;

"(4) presents potential for serious risk to human health; or

"(5) is a device with respect to which the Secretary determines that postmarket surveillance of the device is necessary to protect the public health or to evaluate the safety or effectiveness of the device.

"(b) REGULATIONS.—The Secretary shall issue regulations implementing the requirements of this section within 1 year of the effective date of this section.

"(c) SURVEILLANCE PERIOD.—The Secretary may determine the period of surveillance required in order to complete the collection of useful data or other information necessary to protect the public health or to evaluate the safety or effectiveness of the device. In no event may a surveillance period be imposed in accordance with this section without a termination date.

"(d) CONTRACTS.—The manufacturer of a device for which postmarket surveillance is required in accordance with subsection (a) shall contract with a qualified academic medical center, or a representative number of qualified academic medical centers in representative locations, to provide for any monitoring of clinical experience that may be required in accordance with this section. The number and identity of the academic center or centers, if any, that will perform surveillance in accordance with this section, and the manner of surveillance, shall be determined by the manufacturer after consultation with the Secretary.".

SEC. 18. DESIGN VALIDATION.

Sections 501(h), 515(c)(1)(C), 515(d)(2)(C), 515(e)(1)(E), 515(f)(3)(B)(iv), 520(f)(1)(A), 520(f)(2)(A)(ii), 520(f)(2)(C), 520(f)(2)(C)(ii), and 801(a) (21 U.S.C. 351, 360e, 360j, and 381) are each amended by inserting "design validation," after "manufacture,".

SEC. 19. DEFINITIONS.

Section 201 (21 U.S.C. 321) is amended—

(1) in subsection (g)(1)(D), by striking "; but does not include devices or their components, parts, or accessories"; and

(2) in the language following paragraph (3) of subsection (h), by striking "principal" and inserting "primary".

SEC. 20. REVIEW OF MARKET APPLICATIONS FOR ARTICLES COMPRISING COMBINATIONS OF DRUGS, DEVICES OR BIOLOGICS

Section 503 (21 U.S.C. 353) is amended—

(1) by striking the section heading and inserting the following:

"SPECIAL CONSIDERATION FOR CERTAIN DRUGS, DEVICES, AND BIOLOGICAL PRODUCTS";

and

(2) by adding at the end the following new subsection:

"(f)(1) The Secretary shall require only one market clearance route for an article that constitutes a combination of a device, drug, or biological product. If the Secretary determines that the primary mode of action of the combination article is that of—

"(A) a drug (other than a biological product), neither the combination article nor any part of the article shall be treated as a device or as a biological product for market clearance purposes;

"(B) a device, neither the combination article nor any part of the article shall be treated as a drug or a biological product for market clearance purposes; or

"(C) a biological product, neither the combination article nor any part of the article shall be treated as a drug or a device for market clearance purposes.

"(2) Nothing in this paragraph shall prevent the Secretary from using any agency resource of the Food and Drug Administration necessary to assure adequate review of the safety, effectiveness, or substantial equivalence of an article, if the Secretary employs a single market clearance mechanism.

"(3) The Secretary shall promulgate regulations to implement market approval procedures in accordance with paragraph (1) not later than 1 year after the date of enactment of this subsection.

"(4) As used in this subsection:

"(A) The term 'biological product' has the meaning given the term in section 351(a) of the Public Health Service Act (42 U.S.C. 262(a)).

"(B) The term 'market clearance' includes approval of an application under section 505, 507, 515, or 520(g), an order determining substantial equivalence under this subchapter, and approval of a product or establishment license under subsection (a) or (d) of section 351 of the Public Health Service Act (42 U.S.C. 262).".

Mr. DODD. Mr. President, I am pleased to join Senator KENNEDY, the chairman of the Committee on Labor and Human Resources, in introducing the Comprehensive Medical Device Improvement Act of 1990.

Medical devices are a striking feature of the U.S. health care system. The past generation has seen the development of a tremendous range of devices whose use has improved or prolonged people's lives and revolutionized medical practice.

Some medical devices have enabled people with what would otherwise be debilitating conditions to improve their functioning. Artificial hip joints, for example, have enabled elderly people with crippling disabilities to walk and live independently.

Other devices have extended people's lives. Cardiac pacemakers, for example, have controlled certain arrhythmias of the heart.

Still other devices have drastically altered medical diagnosis and treatment. Starting with automated blood chemistry analyzers, clinical laboratories have shifted from manual to mechanized procedures, with consequent improvements in the speed, accuracy, and per-unit cost of tests.

New imaging devices, such as the magnetic resonance imager, often obviate the use of more dangerous, painful, and costly procedures, such as exploratory surgery.

The industry that manufactures medical devices in the United States has grown in tandem with these developments. From less than $1 billion in 1958, industry sales have grown to well over $20 billion in annual sales.

There is tremendous diversity in the medical devices industry, both in the medical devices that are marketed and in the companies that make them. Underlying the diversity in products is the high level of innovation. More than in many other U.S. industries, small firms are particularly important in developing and producing medical devices. The U.S. medical device industry is recognized around the globe as the world leader.

The 1976 Medical Device Amendments to the Federal Food, Drug, and Cosmetic Act [FDCA] formally initiated the regulation of an ever-growing medical device industry. The 1976 amendments require the Food and Drug Administration to regulate medical devices and ensure their safety and effectiveness.

By design, the 1976 Medical Device Amendments embrace a balanced and comprehensive regulatory scheme intended to: First, protect the public against unsafe or ineffective new devices gaining entry to the market; second, assure that health practitioners can be confident about the medical equipment they use or prescribe for their patients; and third, provide market protection for pioneers of new medical technologies. At the same time, the 1976 law is structured to guard against excessive governmental restrictions which might inhibit innovation in the development and advancement of biomedical products.

However, since the comprehensive medical device law was enacted in 1976, FDA has been unable to implement the law in the manner that the Congress intended. In the past few years, interest in the medical device amendments has grown because of problems associated with implementation of the law, as well as concerns regarding the costs of some provisions relative to the incremental gains in safety and effectiveness.

These implementation problems appear to be the result of: First, complexities in the 1976 law; second, the manner in which FDA has interpreted certain provisions of the 1976 law; and third, limited FDA resources.

The legislation we are introducing today, the comprehensive Medical Device Improvement Act of 1990, would modify most major medical device program activities at FDA and would promote improved actions by the FDA.

Most significantly, the legislation would:

Codify FDA's current policies regarding determinations of substantial equivalence under section 510(k);

After a period of 4 years, allow the use by FDA of any information contained in a manufacturer's PMA, including clinical and preclinical data, but excluding descriptions of manufacture and product composition, to establish the safey and effectiveness of another manufacturer's device;

Require hospitals, ambulatory surgical facilities, outpatient diagnostic and treatment facilities, and nursing homes to report deaths attributed to devices to FDA, and life-threatening

illnesses and injuries to the manufacturer;

Authorize a strong user education program in promoting awareness of new medical device reporting requirements among health care providers;

Authorize FDA to require manufacturers of PMA'd devices and many class II devices to conduct postmarket surveillance by contracting with qualified academic medical centers to provide for monitoring of clinical experience as required by regulation;

Require either reclassification or premarket review of all preamendment class III devices and transitional devices;

Redefine class II devices as devices for which "additional controls," rather than mandatory standards, can provide reasonable assurance of safety and effectiveness, and substitute the current complex standard-setting process with simple notice and comment rulemaking. Additional controls would include mandatory performance standards as well as voluntary standards, educational activities, guidelines, and other activities;

Authorize FDA to issue a recall order if FDA finds that a device presents an unreasonable risk of substantial harm to the public health;

Require only one market clearance route for an article that constitutes a combination of a device, drug, or biological product.

Mr. President, the legislation we are introducing today constitutes an important first step in improving the regulatory scheme for medical devices. I look forward to strengthening, fine-tuning, and perfecting this bill so that the Committee on Labor and Human Resources can report truly comprehensive legislation to the full Senate, which will improve the regulatory scheme for medical devices and will ensure continued public access to safe, effective, high quality medical devices.

Mr. HATCH. Mr. President, I am pleased to join Senator KENNEDY, Senator DODD, and Senator COATS in introducing legislation which makes changes in the medical device law.

Since the 1976 enactment of the medical device amendments, we have seen an explosion of medical technology with the potential to enhance the health care of millions of Americans. In revising this legislation, I believe we achieve the goals of the medical device amendments, to approve devices that are safe and effective, and to balance the need for regulation with the benefits of innovation.

There are over 10,650 suppliers with over 50,000 product listings in the medical device register. There are more than 8,500 foreign and domestic facilities that manufacture or distribute medical devices and must register with the FDA, most of which are small manufacturers.

Utah, alone, has over 114 medical device companies with over 4,000 employees. There are many technological wonders that are manufactured in Utah that are critical to our health care marketplace. A great deal of attention has been given to the artificial heart, the artificial arm, and the artificial ear; but, there are other equally important products, such as the thermal dilution catheters, the medical eyeshield for interocular lenses, and EKG monitoring pads.

Most of the medical device industry is dominated by small manufacturers. The industry is dependent on the entrepreneurship and innovative skills of these small manufacturers. In updating the law, we were constantly aware of the need that we not get too bureaucratic and actually stifle this innovation.

To accomplish this end, the legislation was developed according to the following principles:

First, FDA should review the current classification of medical devices to ensure that each device is receiving an appropriate regulatory review. Class III devices should be limited to those devices which are life-supporting devices or those which present unreasonable risk if they fail. These devices are expensive to develop; they should have strict clinical trials to ensure they are safe and effective; and, they should be monitored once they are approved. Class II devices should have fewer controls because they pose a smaller risk if failure occurs. Class I devices should have minimal controls.

Second, rather than hinder the entrance of new products into the marketplace, we should enact measures to monitor closely whether or not medical devices, once approved, work effectively and are used properly.

Third, the current law does not work, particularly the requirements for performance standards to be developed for class II devices and for reporting when medical devices fail. The bill being introduced today gives FDA the legislative tools to ensure that medical devices are safe and effective.

The bill also accomplishes another important objective, it codifies the current method by which class II devices are approved. This process, known as 510(k), requires that a manufacturer demonstrate that a new device is "substantially equivalent" to a previously approved device. The mechanisms for such approval have evolved within FDA, and this bill would simply guarantee that all device manufacturers understand and can rely on the terms by which their products must be approved. Further, retaining the existing 510(k) process is critical to the delivery of reasonable health care services and products in this country. Its removal would almost certainly result in less competition, increased prices, and a damaged trade advantage.

There are other provisions contained in this legislation that modify the current law. One provision would allow the FDA to use premarket approval data 4 years after the approval of the application to establish the safety and effectiveness of another device; such data would not be disclosed. Another provision I consider critical to any medical device reform bill is the review of transitional devices, particularly contact lenses. Our current laws have created a monopoly for the primary manufacturers of a transitional device. It is no secret that I object to the regulatory maze that has trapped contact lenses into the class III category. Because approval of a new class III device is costly, many smaller contact lens manufacturers have closed their doors as a result of such high entry costs.

An estimated 60 to 65 percent of all premarket approval applications are for transitional devices, a large majority of which are for contact lenses. FDA has recognized the need to ensure that transitional devices are appropriately classified when they stated:

> Transitional products * * * account for 15 percent of * * * all product review. Classification of these products into a more appropriate regulatory class based on estimates of risk will free up resources for those products which present greater risk to the public health, thereby reducing unnecessary regulation and enhancing necessary regulation.

This legislation would allow for the long-overdue reassignment of transitional devices to their proper regulatory class. And, it would conserve increasingly scarce FDA resources.

I believe the Comprehensive Medical Device Improvement Act of 1990 achieves the goal of protecting the small manufacturers who are the innovators of many of today's products and the backbone of medical device manufacturing. At the same time, Americans will be provided with safe and effective medical devices. I urge my colleagues to join us in cosponsoring this important legislation.

Mr. COATS. Mr. President, I am pleased to join Senators KENNEDY, HATCH, and DODD in introducing the Comprehensive Medical Device Improvement Act of 1990. In my judgment, this bill is a quantum leap forward in our effort to pass a bill that will enable the American people to benefit in a timely manner from innovative devices with full confidence in their safety and effectiveness.

Since Congress first passed legislation that specifically deals with devices in 1976, the scientific advances in this field have been remarkable. Although the law has been amended on occasion, the time has come to reexamine the original statute in light of

the great deal of experience that we have gained over the last 14 years.

In fact, Congress came close to revising the law 2 years ago when I was a Member of the House of Representatives. H.R. 4640 was approved by the Committee on Energy and Commerce, of which I was a member, and passed by the House. The Senate did not pass a bill. While H.R. 4640 made some important improvements in the law, it was not, in my judgment, an ideal piece of legislation.

Mr. President, this bill amends many sections of the medical device law, however I would like to take just a few moments to review several of the most significant improvements that this bill makes.

In my judgment, the most significant language in this bill deals with the expedite approval process that is used to bring most devices to the patients who need them. Section 16 provides the Food and Drug Administration [FDA] with the clear authority they need to ensure that these products are safe and effective.

The pace at which new and improved devices are being developed is steadily accelerating and is sure to increase. While the advent of what FDA terms "breakthrough devices" is steady, devices are much more likely to be improved incrementally. In 1989, FDA approved more than half a dozen breakthrough products. During the same year, more than 5,000 other devices were approved to be marketed. The physicians who use these products to diagnose and treat patients are often the ones who suggest changes that may appear minor to the uninitiated. However, a seemingly minor change can significantly improve the treatment or diagnosis of an illness or injury.

It is critical to keep devices that improve medical treatment moving to the patients that need them as quickly as is prudent. The 1976 law did make distinctions between the potential risk posed by a class of devices and made the approval process more rigorous for the high-risk devices. However, it has developed that section 510(k) has been used more frequently than many observers expected by FDA to approve devices that are substantially equivalent to devices that were on the market before 1976. For the most part, this arrangement has worked to the public's advantage and our bill codifies this practice. Codifying substantially equivalence provided an opportunity to clarify some elements of this process that are unclear and that need to be updated to reflect changes in the industry.

In section 6, this bill updates the criteria used for the three levels of device classification to ensure that they are defined properly, and that an appropriate level of risk is maintained in each level of classification. Also, the performance standards, which were written in 1976 and have not been fully utilized for a number of reasons, have been revised so that FDA can use them productively.

It is essential that applicants seeking approval for new devices demonstrate that these devices are safe and effective, and that FDA weigh the risk of injury against the probable benefit. However, no matter how carefully a class III device is evaluated under an application for premarket approval, or how thoroughly a 510(k) application is reviewed, there are limits to what can be learned about a device in the approval process. The devices submitted are custom made, the physicians using them in trials are hand picked for their expertise, and the patient populations used in trials are carefully selected to increase the chances of positive results. I have no objection to this, it only makes sense and is certainly in the best interests of all parties.

My point is that there is a big difference between a custom device used in the approval process and a mass produced device that is made available to the general public. The present law recognizes this in sections 519 and 520 that call for user records and reports, and good manufacturing practices. In 1984, the Secretary initiated under the authority of section 519 a medical device reporting [MDR] system under which FDA requires manufactures to report deaths, serious injuries, and malfunctions of devices. Under section 520, FDA regularly inspects manufacturing facilities and promulgates related guidelines and standards.

The bill we are introducing today will give FDA the authority to expand their ability to gather information about a device after it is approved. For example, in section 11, a limited class of device users are required to report to FDA when the failure of a device causes death and notify the manufacturer when a device has caused serious injury or illness. This information is valuable not only in identifying a malfunctioning device, but also in showing performance trends that could lead to corrective action before a device fails.

In addition, section 14 of this bill calls for manufacturers to devise a system to trace certain devices that are used to support or sustain human life so that patients could be contacted in the future if necesssary. Section 17 initiates a program of postmarket surveillance for a limited group of devices so that useful data can be gathered for a period of time that the Secretary of Health and Human Services believes is necessary.

Mr. President, a wide variety of interested parties testified or were represented at the July 25 hearing on this bill before the Committee on Labor and Human Resources on which I am privileged to sit. A number of changes have been made in the bill since that hearing, however, there will certainly be more reaction to this bill now that it has been introduced. Although I believe that this bill is a solid piece of legislation, I am open to constructive suggestions for improvements, and I look forward to working with the many organizations that have a legitimate interest in providing patients with safe, reliable, and innovative medical devices. Thank you, Mr. President.

Mr. DURENBERGER. Mr. President, I rise in support of the Comprehensive Medical Device Improvement Act of 1990. I join with my distinguished colleagues, Senators DODD, KENNEDY, HATCH, and COATS, in sponsoring this important legislation. While there are still a few issues to be resolved before this bill is considered by the Labor and Human Resources Committee, I commend the authors of this legislation for their very responsible approach to medical device regulatory reform. I am particularly pleased that the authors included a section in their bill concerning applications for articles comprising combinations of drugs, devices, or biologics. This is an area of interest to me, and to many medical device companies in Minnesota.

By Mr. AKAKA:

S. 3007. A bill to establish the Spark M. Matsunaga National Energy Research Laboratory and make funds available to the laboratory for OTEC research; to the Committee on Energy and Natural Resources.

SPARK M. MATSUNAGA NATIONAL ENERGY RESEARCH LABORATORY

Mr. AKAKA. Mr. President, today, in the wake of Iraq's invasion and hostile occupation of Kuwait, and in response to the higher energy prices that will inevitably result, I am proposing a seven-point plan for Hawaii's energy security. We now recognize that low oil prices in recent years have only been a wolf in sheep's clothing, lulling Americans into complacency about their energy security. Iraq's invasion, and the surging oil prices that have resulted from these events, makes it imperative that we adopt the energy proposals I am advancing today.

1. CONSERVATION—AMERICA'S LARGEST, LEAST-COSTLY UNTAPPED ENERGY RESOURCE

Although often overlooked, energy conservation is America's greatest untapped source of energy. While improvements in energy efficiency have yielded considerable savings since the oil crisis of the 1970's, the United States has not come close to exhausting the full potential for savings through conservation.

Utilities, businesses, government, environmental and consumer groups must come to recognize that conserva-

tion is in their best interests and must join forces to achieve greater energy savings.

In many cases, we are not talking about dramatic transformations. Significant savings are attainable through subtle, but sustained changes in our habits or lifestyles. Consider this example: If every customer in Hawaii could save just $1 each week on his or her electric bill through conservation of one means or another, we would save nearly a million barrels of oil per year.

Conservation makes sense not merely for economic and energy security reasons. There are compelling environmental reasons for pursuing conservation as well. Events such as the *Exxon Valdez* oilspill attest to the environmental consequences of our continued dependence on fossil fuels. Nonfossil resources such as customer energy-efficiency programs and renewable energy technologies are all essential components of a strategy for reducing the overall risk of our national energy portfolio. Conservation often presents a strategy that not only is least cost, but also least risk.

Successfully implemented, a long-term conservation strategy would also make significant contributions toward addressing the problems of growing dependence on energy imports, air and water pollution, global climatic change, and inadequate electric generation capacity.

In the field of energy conservation, we are all indebted to the leadership of forward thinking utilities such as the Pacific Gas & Electric Co. that have shown true leadership on this issue. PG&E and companies like them are approaching this issue with innovative solutions.

2. ENERGY TAX CREDITS WILL SPEED COMMERCIALIZATION OF NONPOLLUTING RENEWABLE ENERGY TECHNOLGY

Our progress in renewable energy has begun to subside. This trend has frightening implications given the inevitable role that renewable energy must play in our Nation's energy future. As the Department of Energy's energy security report points out, the United States "will, in time, come to rely on energy sources * * * that are commonly lumped under the term 'renewable energy.'" In light of the continuing instability in the Middle East, it may be sooner than we think.

At a time when U.S. dependence on foreign sources of oil has reached its highest volume in over 10 years, and when such environmental problems as global warming, acid rain, and the *Valdez* disaster point to the need to broaden the Nation's energy mix, the Federal Government is simply not doing enough to help renewable energy technologies get off the ground and into commercial production.

Our best response to the Department of Energy's warnings that our reliance on renewable energy is "inevitable," is to renew these tax credits.

3. ENERGY POLICIES MUST BE FOUNDED ON THE NEED TO REDUCE GLOBAL WARMING

Scientific evidence indicates that the generation of carbon dioxide and other greenhouse gases is causing profound changes in the Earth's atmosphere. We can no longer wait to respond to these findings. Trends in the concentration of greenhouse gases will likely result in global changes in climate, with far-reaching economic, social, and environmental implications for mankind.

In September, the Secretary of Energy will unveil a new, national energy strategy. I call on the Secretary to recommend policies that fully consider the extent to which fossil fuels contribute to global climatic change.

In addition, before the 101st Congress comes to a close, we must enact S. 234, the National Energy Policy Act of 1990, which redirects energy policies to reduce global warming.

4. HAWAII HAS EARNED A NATIONAL ENERGY LABORATORY

A national laboratory of the Department of Energy must be established in Hawaii to help develop, improve, and commercialize renewable technologies. More than anywhere else, Hawaii is the location of choice for a variety of renewable technologies: wind, solar, biomass, photovoltaics, OTEC, geothermal, and hydropower.

National labs play a unique role in the development of new energy technology. Bridging the gap between universities and the private sector, they are instrumental is advancing ideas from the drawing board to the marketplace. As Secretary Watkins has noted, they have traditionally been home to some of the world's brightest and most innovative scientists and engineers. There is no better place to site a national laboratory for renewable energy than in Hawaii, the wellspring of renewable technology.

Today I am introducing legislation to establish a Federal energy laboratory in Hawaii.

5. HAWAII NEEDS A REGIONAL PETROLEUM RESERVE

I renew my call for the establishment of a regional petroleum reserve within the State of Hawaii and have introduced legislation to achieve this goal.

Unless something is done now about Hawaii's vulnerability, when the next oil crisis hits Hawaii will wither on the vine.

Compared to the Mainland, Hawaii faces a much greater risk of an oil supply disruption because we have no overland access to domestic sources of crude. While the lower 48 States and Alaska have access to oil transported by pipeline, rail, or highway, in Hawaii all of our crude oil and refined products arrive by ocean tanker. Our total reliance on tanker deliveries makes Hawaii exceptionally vulnerable to a cutoff of oil supplies should a crisis disrupt imports.

Hawaii would not be so fortunate. Our only means of access to the strategic petroleum reserve would be by tanker delivery from the Gulf of Mexico through the Panama Canal. A study commissioned by the State of Hawaii indicated that the minimum delivery time for strategic petroleum reserve oil to Hawaii would be 53 days. This exceeds the State's average commercial working inventory by 23 days. Under these circumstances, Hawaii's oil supply would run dry and our economy would grind to a halt.

Yet the administration continues to maintain that Hawaii's emergency petroleum supply needs can be met through central petroleum storage in the SPR salt dome caverns in Texas and Louisiana. This notion is absurd. This oil reserve is as far away from Hawaii as Istanbul is from New York City.

A regional petroleum reserve must be established in Hawaii to safeguard our energy security. We must act now on legislation I introduced to provide for an emergency reserve for our State.

6. UNNATURAL BARRIERS TO FULL-SCALE RENEWABLE ENERGY DEVELOPMENT MUST BE REMOVED

Unnecessary and artificial Federal restrictions limit the entry of renewable energy and conservation technologies into the energy marketplace. An example of this is size restrictions contained in the Public Utility Regulatory Policies Act of 1978 [PURPA] which prohibits individual solar powerplants larger than 30 megawatts.

Inequities in the Tax Code also serve as a barrier to saving energy. The code currently treats rebates paid for energy-efficiency equipment as income to customers, rather than considering them to be price reductions as is the case with car rebates, for example. This penalizes consumer efforts to achieve conservation and unnecessarily raises the cost of saving energy.

Other tax, regulatory and market barriers must be removed before more accurate price signals can work to ensure a fair competition between efficiency and production. We need to ensure that whatever limits are imposed on the development of clean, renewable energy are those imposed by nature and not by government.

7. HAWAII'S CONSUMERS CANNOT AFFORD AN OIL IMPORT FEE

An oil import fee would be regressive, burdensome, unfair, and inflationary. It would impose the greatest hardship on those in Hawaii who can least afford it—the middle class and the poor. That is why I have cosponsored legislation opposing the imposi-

tion of a fee on imported crude oil and refined petroleum products.

Informed economists, executives, and policy experts recognize the ill effects an oil import fee would have on the economy. Malcolm Baldridge, Secretary of Commerce during the Reagan administration, summed up this view when he stated that a tax on oil imports would "reduce U.S. economic growth, increase inflation, reduce our competitiveness in domestic and international markets, and eliminate more jobs in other economic sectors than are created in the energy sector."

An oil import fee would be nothing less than a direct tax on the American people. What is worse is that such a fee would also be discriminatory. Because Hawaii is dependent upon imported oil for more than 50 percent of its energy needs, Hawaii consumers would be forced to pay far more than their fair share, while those living in oil producing States would get a free ride.

The daily consumption of oil in Hawaii is 130,000 barrels. Approximately 70,000 barrels or 55 percent of that figure is imported from foreign countries. If, say a $5 per barrel import tax were imposed, it would cost each of Hawaii's 1.2 million citizens $106 per year. To consumers already paying about $1.65 per gallon for super unleaded, $106 per year cuts into a family's budget.

These are my proposals for greater energy security for Hawaii and the Nation. With the lifeline of oil from the Middle East so tenuous, we cannot afford to wait before acting on these proposals.

By Mr. AKAKA:

S. 3009. A bill to provide for the protection, conservation, and management of ocean resources, and for other purposes; to the Committee on Commerce, Science, and Transportation.

OCEAN RESOURCES PARTNERSHIP ACT

Mr. AKAKA. Mr. President, I rise today to introduce the Ocean Resources Partnership Act which brings together the Federal Government and coastal States to jointly manage the resources of these States' marine and coastal areas in an environmentally sound manner. This act will open a new era of closer Federal-State cooperation in overseeing the activities occuring along our Nation's coastlines and within the exclusive economic zones [EEZ].

Mr. President, 30 coastal States, including those which border the Pacific and Atlantic Oceans, as well as the Great Lakes, would benefit from this bill. Coastal States have the right to exercise control over their marine and coastal environments through the regulation of land, air, and water uses of their adjacent waters.

These 30 States, however should not develop their coastal policies independent of all other considerations and move in 30 different directions. There must be unity of planning and unity of approach. Moreover, some States will require assistance—Federal assistance—in protecting their coastal zones and other affected areas from the adverse effects of exploration and commercial recovery of seabed resources. At other times, some States will insist on participating in the development of policy and planning decisions made by the Federal Government. My bill addresses these concerns with an eye toward a mutually beneficial partnership.

The Ocean Resources Partnership Act will provide an effective consultation process and partnership between the coastal States and the Federal Government. Where Federal officials once had a near exclusive right to decide policy within a State's EEZ, under my bill, they would become partners with State officials and marine and environmental experts. Furthermore, each State would be entitled to a share of gross revenues generated by the resources of and activities that occur within its EEZ.

As a necessary first step to understand exactly what resources lie within the EEZ, my bill would establish a comprehensive and systematic research program to collect information on seabed resources. Governmental, academic, and private interests would coordinate their marine scientific activities as they explore the seabed, subsoil, and superjacent waters. These activities, in turn, would lead to environmental assessments and general mapping and charting of areas subject to further exploration.

Mr. President, it has long been recognized that a Nation's or a State's interests do not stop at its border or at its shoreline. As custodians of the land, we owe it to our children to ensure the protection and wise stewardship of our coastal resources.

I urge my colleagues to support my legislation.

By Mr. WARNER:

S. 3010. A bill to authorize appropriations for the National Endowment for the Arts, to amend the Internal Revenue Code of 1986 to provide for designation and contributions to the National Endowment for the Arts, and for other purposes; to the Committee on Finance.

NATIONAL ENDOWMENT FOR THE ARTS CHECKOFF ACT

Mr. WARNER. Mr. President, I rise today to introduce the National Endowment for the Arts Checkoff Act, a bill that could serve as a temporary solution to break the current deadlock that exists over the future of Federal funding for the arts. As of today, I believe William Shakespeare could not write language that could mollify the battling parties; therefore, I offer this proposal as a mechanism to take the time to reach a proper decision.

Eventually, I am hopeful we can restore public confidence in the ability of the Government to allow the greatest degree of artistic expression possible in its grant procedures. Today, however, I, along with others, am genuinely concerned over the ability of Members of Congress to reach a settlement—even among themselves—that would enable the NEA to fulfill its important role in the arts. I have worked hard on this legislation, in an effort to put forward a temporary fallback compromise that treats all concerned parties equitably.

Basically, all parties may need to join in a time out—up to several years—to review carefully and patiently the Federal role in the arts. Rushing to adopt compromise restrictions in a last-minute congressional markup or late session will not be in the Nation's long-term interests. Much of a Nation's history is established by its artistic achievements, which survive to tell a story, long after the reverberations of political debate fade away.

Mr. President, in reflecting on the current situation, I am reminded of the adage that "bad facts make bad law." Many Members of Congress—myself included—found grants for the Mapplethorpe and other recent exhibits to be an unacceptable expenditure of taxpayer funds. How we protect taxpayers from those types of mistakes and yet continue to entrust to public servants the discretion to support and foster artistic freedom is the challenge. Continued debate now could well result in deadlock. The factions are poles apart. Therefore, it is my belief that all parties should take time to reflect on Federal support and funding for the arts. This amendment is a mechanism for preserving, as nearly as possible, the respective positions while allowing a flexible period for reflection and fair judgment.

Mr. President, my proposal has these objectives:

First, allow a reasonable and flexible period to pass so that Congress, the executive branch, and the arts community are able to work to reach agreement, hopefully before fiscal 1995;

Second, eliminate as soon as practicable, the critical problem of alleviating taxpayer concern;

Third, provide for voluntary taxpayer participation in fostering the arts and for a mechanism to determine the measure of public support for the arts;

Fourth, allow NEA to operate—after fiscal year 1991—with minimal restrictions in fulfilling its statutory charter until agreement for a long-term solution is reached or this act sunsets, whichever occurs first; and

Fifth, allow NEA to restore a strong base of public support.

Mr. President, my bill is but a stopgap compromise that would impose a two-step authorization process over a period of up to 4 years. First, for fiscal year 1991, the appropriations for the NEA would be authorized at the existing level of $171,255,000, with only such conditions as are currently in force in the fiscal year 1990 Interior appropriations bill. This will allow 1 fiscal year to pass while a mechanism for subsequent appropriations for the arts is put in place.

For no more than 3 of the subsequent fiscal years, the NEA would be funded by a voluntary tax checkoff program on individual and corporate tax returns. During these years, taxpayers who want to fund the arts can affirmatively express their support by checking off a box on their tax returns allowing up to $5 of their obligated tax payment to be directed toward the annual appropriation for NEA. In return for this citizen support, Congress will allow NEA to promote the arts as it did before the Mapplethorpe episode.

It is my hope that Congress, the President, and the arts community would use the period during which the checkoff program is in place to come up with a suitable, permanent solution to funding for the arts. Therefore, I urge my colleagues to review this new proposal and provide me with their comments. I look forward to working with interested Senators in developing an equitable, long-term solution to the current problem, so that we can continue to provide public support for the arts, while addressing taxpayer concerns.

ADDITIONAL COSPONSORS

S. 1273

At the request of Mr. ROTH, his name was added as a cosponsor of S. 1273, a bill to amend the Internal Revenue Code of 1986 with respect to treatment by cooperatives of gains or losses from sale of certain assets.

S. 2044

At the request of Mr. BIDEN, the name of the Senator from Georgia [Mr. FOWLER] was added as a cosponsor of S. 2044, a bill to require tuna products to be labeled respecting the method used to catch the tuna, and for other purposes.

S. 2256

At the request of Mr. HARKIN, the names of the Senator from Virginia [Mr. WARNER] and the Senator from Nebraska [Mr. KERREY] were added as cosponsors of S. 2256, a bill to amend title XIX of the Public Health Service Act to clarify the provisions of the allotment formula relating to urban and rural areas, and for other purposes.

S. 2312

At the request of Mr. SYMMS, the name of the Senator from Hawaii [Mr. AKAKA] was added as a cosponsor of S. 2312, a bill to amend the Internal Revenue Code of 1986 to exclude from gross income payments made by public utilities to customers to subsidize the cost of energy and water conservation services and measures.

S. 2584

At the request of Mr. ROTH, his name was added as a cosponsor of S. 2584, a bill to amend the Internal Revenue Code of 1986 to provide that the deduction for State and local income and franchise taxes shall not be allocated to foreign source income.

S. 2591

At the request of Mr. BAUCUS, the names of the Senator from Oregon [Mr. HATFIELD] and the Senator from Texas [Mr. GRAMM] were added as cosponsors of S. 2591, a bill to amend title XVIII of the Social Security Act to provide relief from certain regulations relating to physicians' services.

S. 2640

At the request of Mr. DASCHLE, the name of the Senator from Kansas [Mrs. KASSEBAUM] was added as a cosponsor of S. 2640, a bill to amend title XVIII of the Social Security Act to prevent fraud and abuse and encourage competition in the sale of Medicare supplemental insurance.

S. 2840

At the request of Mr. GLENN, the name of the Senator from South Dakota [Mr. PRESSLER] was added as a cosponsor of S. 2840, a bill to improve the management of the Federal Government by establishing a Deputy Director for Management in the Office of Management and Budget; by establishing a Chief Financial Officer of the United States who shall be in the Office of Management and Budget; by requiring the development of systems that provide complete, accurate, and timely financial information; by increasing financial discipline and accountability by requiring independently audited agency financial statements; and for other purposes.

S. 2929

At the request of Mr. BENTSEN, the name of the Senator from Texas [Mr. GRAMM] was added as a cosponsor of S. 2929, a bill to amend the Carribbean Basin Economic Recovery Act to establish a center to study and support improved trade and economic relations among Western Hemisphere countries.

SENATE JOINT RESOLUTION 355

At the request of Mr. EXON, the name of the Senator from South Dakota [Mr. DASCHLE] was added as a cosponsor of Senate Joint Resolution 355, a joint resolution to express appreciation for the benefit brought to the Nation by Amtrak during its 20 years of existence.

SENATE CONCURRENT RESOLUTION 113

At the request of Mr. GLENN, the names of the Senator from Nebraska [Mr. EXON], the Senator from Minnesota [Mr. DURENBERGER], and the Senator from New York [Mr. D'AMATO] were added as cosponsors of Senate Concurrent Resolution 113, a concurrent resolution expressing the sense of the Congress on international nuclear sales to South Asia.

SENATE RESOLUTION 313

At the request of Mr. LAUTENBERG, the names of the Senator from Illinois [Mr. DIXON], and the Senator from Michigan [Mr. LEVIN] were added as cosponsors of Senate Resolution 313, a resolution relating to Vladimir Tsivkin.

SENATE RESOLUTION 321—CONCERNING AMERICAN POLICY TOWARD CAMBODIA

Mr. CRANSTON (for himself, Mr. KERRY, Mr. PELL, Mr. SIMON, Mrs. KASSEBAUM, Mr. BIDEN, and Mr. DODD) submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. RES. 321

Whereas the President of the United States has decided to:

(1) Reject the credentials of the Cambodian resistance coalition including the genocidal Khmer Rouge at the United Nations;

(2) Begin a dialogue with the Vietnamese with respect to ending the conflict in Cambodia;

(3) Ease some restrictions on humanitarian aid to Cambodia; and

(4) Implement an aid program for children within Cambodia.

Whereas the Secretary of State has declared that Vietnamese occupation troops have withdrawn from Cambodia;

Whereas there are continuing reports of noncommunist resistance forces cooperating tactically and strategically with the Khmer Rouge;

Whereas the Khmer Rouge are responsible for over one million deaths between 1975–1979;

Whereas the Khmer Rouge have made significant military gains in recent months and pose a grave threat to peace in Cambodia;

Whereas the Chinese have vowed to increase their military and financial support to the Khmer Rouge;

Whereas the United States provides military aid to the non-Communist resistance factions allied with the Khmer Rouge;

Whereas the Administration's expressed goals are the maintenance of the non-Communist resistance as a politically viable force; self-determination for the Cambodian people, and prevent the return of the Khmer Rouge to power: Now, therefore, be it

Resolved, That it is the sense of the Senate that the Administration's policy revisions, while commendable, must be accompanied by the following specific actions if a peaceful, negotiated settlement to the Cambodia crisis is to be reached in the near future:

(1) The Administration should initiate a direct dialogue with the government in

Phnom Penh in order to facilitate a negotiated settlement;

(2) The United States should press the People's Republic of China to cease all its weapons and financial support to the genocidal Khmer Rouge;

(3) The Administration should concentrate its diplomatic efforts on achieving free and fair elections at the earliest possible date; and

(4) The trade embargo against Cambodia should be lifted to allow both humanitarian and developmental aid to reach the Cambodian people.

Mr. CRANSTON. Mr. President, today I wish to introduce a resolution expressing the sense of the Senate concerning American policy toward Cambodia. I am very pleased to note that Senators KERRY, PELL, SIMON, KASSEBAUM, BIDEN, and DODD of the Foreign Relations Committee are cosponsors.

Mr. President, this resolution is based on Senator MITCHELL and Senator DANFORTH's letter to the President of July 24, which 64 other Senators cosigned expressing our concern about the continuing war in Cambodia.

As the world's attention is focused on war in the Middle East, we must not forget that there are other parts of the world where peace is in question. Indeed Iraq's invasion of Kuwait reminds us that world stability is no longer threatened as much by tension between East and West but conflict in the South.

This is especially true in Indochina where prosperity and stability recently enjoyed by the newly industrializing nations of Southeast Asia are jeopardized by continuing conflict in Cambodia where the Khmer Rouge threaten to impose once again a genocidal regime.

This resolution, while commending the President's recent policy changes toward Cambodia, suggests that other actions should be taken.

First, the administration should initiate a direct dialog with the Hun Sen government in Phnom Penh in order to facilitate a negotiated settlement which would include the non-Communist resistance. Secretary Baker recently suggested that such steps are under consideration but have not yet been decided upon. This resolution would encourage him to take that next logical step.

It is not enough to talk to Vietnam about Cambodia. We should talk to Cambodians about Cambodia.

In discussing this issue with Vietnam we are implicitly reinforcing the view that Cambodia continues to be Vietnam's colony even though, as Secretary Baker noted in Paris, Vietnamese occupation troops have withdrawn.

Indeed, I am uncertain what the administration intends to discuss with Vietnam as the two issues raised in the past were, first, Vietnam's insistence that the Khmer Rouge not be included in a settlement and, second, our insistence that Vietnamese troops be withdrawn. The President's decision to talk to Vietnam is confusing: Do we want to convince the Vietnamese to include the Khmer Rouge or to reinvade Cambodia?

Second, it calls on the United States to press the People's Republic of China to cease all its weapons and financial support to the Khmer Rouge.

We must press the Chinese at the highest level to end their support for it is their support to the Khmer Rouge which threatens regional stability. Just as we condemn Iraq for its invasion, a similar invasion is being undertaken as I speak by the Chinese in Cambodia through their Khmer Rouge surrogates.

Third, it asks the administration to concentrate its diplomatic efforts on achieving free and fair elections at the earliest possible date.

We cannot allow international negotiations to be dragged on and on by the Chinese or the Soviets in hope that some elusive comprehensive settlement can be reached by which the Khmer Rouge lion lays down with the Cambodian lamb. There can be no doubt that the Khmer Rouge intend to gain absolute power by hook or by crook. Elections held at the earliest time irregardless of a comprehensive settlement offer the opportunity to begin building a multiparty democracy before the Khmer Rouge have achieved absolute political and military dominance.

Finally, the resolution asks that the administration lift the trade embargo against Cambodia to allow both humanitarian and developmental assistance. Already the administration has pledged its cooperation in implementing legislation Senator KERREY of Nebraska and I authored to provide humanitarian assistance to children inside Cambodia.

It is time to go beyond that if we are going to have any chance of strengthening the resolve of the Cambodian people as they struggle out of poverty and danger. This is a country which the 20th century has essentially bypassed.

For Henry Kissinger, Cambodia was a sideshow in the Vietnam war. Now it is on center stage as the last aspects of that conflict are played out. We should not ignore its suffering once again in some sacrifice to great power politics as we negotiate with the Chinese and the Soviets.

I urge my colleagues to consider this resolution and join me in sponsoring it.

SENATE RESOLUTION 322—RELATIVE TO CONTROL BY EUROPEAN COUNTRIES OF CHEMICALS USED IN PRODUCTION OF ILLICIT DRUGS

Mr. BRYAN submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. RES. 322

Whereas it is widely known that chemicals are critical in the processing of illegal narcotics, that chemicals produced worldwide are shipped to Colombia, and that more than 40 percent of these chemicals are being diverted to the drug cartels;

Whereas the United States took positive action in 1988 by passing the Chemical Diversion and Trafficking Act which gives the Drug Enforcement Administration the authority to stop shipments of chemicals not destined for legitimate industrial, commercial, or scientific use;

Whereas the importance of the effort by the United States to control exports of these chemicals is illustrated by the fact that following passage of an earlier Senate Resolution, President Bush raised the issue of chemical control at the drug summit in Houston in July 1990;

Whereas an escalated effort by Latin American countries to restrict imports, exports, and production of chemicals is demonstrated by the recommendations for model regulations to control chemicals used in the processing of cocaine passed by the General Assembly of the Organization of American States in June 1990;

Whereas, according to a recent Drug Enforcement Administration report, while United States exports of essential chemicals to Colombia have declined, exports from Europe increased 340 percent;

Whereas it is vital to the worldwide antidrug abuse effort that chemicals used to process narcotics are controlled and monitored at the source; and

Whereas the Council of Ministers of the European Communities is currently considering a directive for the control of chemicals which, if adopted, would be binding on each member country in the European Community for use as its domestic chemical control legislation: Now, therefore, be it

Resolved, That the Senate—

(1) urges the European Communities' Council of Ministers to adopt a directive that would impose controls as strict as those in current United States law on precursor and essential chemicals used in the production of cocaine, heroin, and other clandestinely produced drugs; and

(2) urges the chemical producing nations of England, Finland, France, Holland, Italy, Spain, and the Federal Republic of Germany to work with the Drug Enforcement Administration and the International Narcotics Control Board to draft and enact laws as strong as the United States chemical diversion laws.

SENATE RESOLUTION 323—TO AUTHORIZE PRINTING OF EXHIBITION POSTERS

Mr. MITCHELL submitted the following resolution; which was considered and agreed to.

S. RES. 323

Resolved, That 1000 sets of posters, prepared by the U.S. Senate Commission on

Art for the exhibition, "A Necessary Fence," shall be authorized for the use of the Senate.

AMENDMENTS SUBMITTED

NATIONAL DEFENSE AUTHORIZATION ACT, FISCAL YEAR 1991

WARNER (AND OTHERS) AMENDMENT NO. 2587

Mr. WARNER (for himself, Mr. MCCAIN, Mr. WILSON, Mr. DOLE, Mr. GORTON, Mr. THURMOND, Mr. WALLOP, and Mr. NUNN) proposed an amendment to the bill (S. 2884) to authorize appropriations for fiscal year 1991 for military activities of the Department of Defense, for military construction, and defense activities of the Department of Energy, to prescribe personnel strengths for such fiscal years for the Armed Forces, and for other purposes, as follows:

At an appropriate place in the bill, insert the following new section:

SEC. . THEATER DEFENSE PROGRAM.

(a) FINDINGS.—Congress makes the following findings:

(1) The Director of Central Intelligence, William Webster, has testified before Congress that between 15 and 20 developing nations will possess ballistic missile capabilities by the end of the century.

(2) The Director has also testified that by the year 2000, at least six Third World countries will have ballistic missiles with ranges of up to 1,800 miles, and three of them may develop ballistic missiles with a range of 3,400 miles.

(3) The Director has also testified "* * * that as many as 20 countries may be developing chemical weapons; and we expect this trend to continue despite ongoing multilateral efforts to stop their proliferation. * * * At least 10 countries are working to produce both previously known and futuristic biological weapons."

(4) During the war between Iraq-Iran each used ballistic missiles and chemical payloads.

(5) The Defense Intelligence Agency (DIA) has also informed Congress that, in addition to the five nuclear weapons countries—United States, Soviet Union, England, France, and China—"about half a dozen additional countries have either acquired a capability to explode a nuclear device or are pursuing such a capability."

(6) DIA has also informed Congress that the proliferation of ballistic missiles is occurring at an ever-increasing pace. In just the last 2 years:

Over 1,000 ballistic missiles have been fired in combat in Iran, Iraq, and Afghanistan.

Flight tests of ballistic missiles have occurred in India, Pakistan, and South Africa.

Iraq has conducted an initial flight test of a space launch vehicle, which will enhance greatly their already extensive ballistic missile capability.

The longest range (1800+ mile) ballistic missiles in the Middle East have been supplied to Saudi Arabia by China.

(7) The proliferation of ballistic missiles, chemical weapons and nuclear technology poses a direct threat to many of our friends and allies. Moreover, United States contingency and projection forces are also threatened by these technologies, and this threat will increase in the future.

(b) Therefore, it is the sense of the Congress that—

(1) The proliferation to developing countries of ballistic missiles and chemical and nuclear weapons technology applicable to missile warhead development are potentially destabilizing, a threat to United States security commitments, and also pose a significant threat to the national security of our friends and allies around the world.

(2) Of the funds authorized for the Strategic Defense Initiative, up to $300,000,000 should be made available for the development of antitactical ballistic missile (ATBM) systems to counter such threats to United States forward deployed and projection forces. In this regard, the Congress recommends that the development of systems such as the Extended Range Interceptor and the Theater High Altitude Air Defense should be accelerated.

(3) The SDI Organization should ensure that the Navy and Marine Corps are involved in developmental programs for future ATBM systems suitable for deployment with their projection and expeditionary forces.

(4) Since the Arrow ATBM has been a successful joint development program and, when deployed, will become an important asset for the defense of Israel against the threat of short range ballistic missiles in the region, the Secretary of Defense should negotiate, on an equitable basis, a memorandum of agreement to continue the program. Therefore, of the funds available for the Theater Defense program element in SDI program, not more than $50,000,000 should be made available for the Arrow program.

(5) Of the funds authorized to the Army for Research, Development, Testing, and Evaluation, not more than $50,000,000 should be made available to conduct additional tests of the Patriot II system against existing types of ballistic missile threats.

(6) The Army should establish a vigorous program to develop and test a rapidly deployable ATBM capability for United States units. For the near-term, the focus should be on the Patriot II system. From within these funds made available for Patriot II testing, the Army should also develop support systems, such as tracking and attack assessment radars, for existing and future ATBM systems.

BINGAMAN (AND OTHERS) AMENDMENT NO. 2588

Mr. BINGAMAN (for himself, Mr. SHELBY, Mr. HEFLIN, Mr. JOHNSTON, Mr. DOMENICI, and Mr. HATFIELD, proposed an amendment to the bill S. 2884, supra, as follows:

On page 14, beginning with line 8, strike out all down through line 19, and insert in lieu thereof the following:

SEC. 222. LIMITATIONS ON THE STRATEGIC DEFENSE INITIATIVE.

(a) FINDINGS.—Congress makes the following findings:

(1) The Strategic Defense Initiative (SDI) has become too focused on a projected 1993 Presidential decision on whether the United States will deploy a space-based kinetic energy weapon system, known as "brilliant pebbles".

(2) There has been tremendous instability in the Phase I architecture of the strategic defense system.

(3) A decision to deploy the phase I architecture of that system would have grave implications for offensive arms reduction negotiations with the Soviet Union and for continued United States compliance with the 1972 Anti-Ballistic Missile Treaty.

(4) Changes in the international political environment over the past year permit the United States to pursue the SDI program at a more measured pace, with increased emphasis on theater and anti-tactical ballistic missile contingencies.

(5) A broad-based research program on the feasibility of highly effective missile defenses remains in the national interest.

(b) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) the Strategic Defense Initiative should not be focused on the projected 1993 Presidential decision on deployment of a space-based kinetic energy weapon system;

(2) the Strategic Defense Initiative should continue a balanced, robust program of research on those technologies that offer the prospect of highly effective anti-ballistic missile defenses;

(3) priority under the Strategic Defense Initiative should be given, in the near term, to research on a defense system that (A) would protect against an accidential missile launch against the United States or a limited ballistic missile attack against the United States by a third-world country, and (B) if deployed, would not be in violation of the 1972 Anti-Ballistic Missile Treaty.

(4) the Strategic Defense Initiative should include a vigorous pursuit of a variety of theater and anti-tactical ballistic missile defenses which would be of value to allies of the United States and to the military forces of the United States temporarily or permanently deployed within range of tactical ballistic missiles of a potential enemy; and

(5) the Strategic Defense Initiative should continue support, as it has over the past six years, for those critical technology efforts that have both civil and military applications in areas other than ballistic missile defense systems.

(c) LIMITATIONS ON SPENDING.—Of the funds authorized to be appropriated pursuant to section 201 for the Strategic Defense Initiative—

(1) not more than $345,000,000 may be obligated for the ground-based radar, space-based surveillance and tracking system program, and ground-based surveillance and tracking system program;

(2) not more than $142,000,000 may be obligated for the ground-based interceptor program;

(3) not more than $129,000,000 may be obligated for the brilliant pebbles program;

(4) not more than $894,300,000 may be obligated for other phase I programs;

(5) not more than $944,400,000 may be obligated for follow-on technologies programs;

(6) not more than $320,000,000 may be obligated for key technologies activities;

(7) not more than $227,800,000 may be obligated for operational support and management activities;

(8) not more than $180,000,000 may be obligated for test and evaluation activities;

(9) not more than $180,000,000 may be obligated for theater defense activities, of which not more than $42,000,000 may be expended for an advanced development program for an anti-tactical ballistic missile system with the Government of Israel;

(10) not more than $116,800,000 may be obligated for the innovative science and technology and small business innovative research programs; and

(11) not more than $93,700,000 may be obligated for engineering analysis activities.

(d) BUDGET INFORMATION.—With respect to each program and activity specified in clauses (1) through (11) of subsection (c), the Secretary of Defense shall include in budget justification materials submitted to Congress after the date of the enactment of this Act for any fiscal year, and in each annual report submitted to Congress after such date pursuant to section 224 of the National Defense Authorization Act for Fiscal Years 1990 and 1991 (10 U.S.C. 2431 note), a description of the program or activity, any changes made in the program or activity since the last budget justification materials were submitted to Congress or the last annual report was submitted as the case may be, and the amount budgeted for that program or activity for the fiscal year concerned.

(e) REPORT.—(1) The Secretary of Defense shall submit to the congressional defense committees a report on the allocation of funds appropriated for the Strategic Defense Initiative for fiscal year 1991. The report shall specify the amount of such funds allocated for each program, project, and activity of the Strategic Defense Initiative, including the amount allocated for each of the programs named in subsection (c).

(2) The report required by paragraph (1) shall be submitted not later than 90 days after the date of the enactment of legislation appropriating funds for the Strategic Defense Initiative for fiscal year 1991.

(f) CONSTRUCTION OF TERMS.—As used in this section:

(1) The terms "Phase I", "follow-on technologies", "key technologies", "operational support and management", "test and evaluation", "theater defense", "innovative science and technology", "small business innovative research", and "engineering analysis" shall be interpreted consistent with the use of those terms in the testimony of Lieutenant General George L. Monahan, and the materials presented by General Monahan, before the Committee on Armed Services of the Senate on June 20, 1990, except that the term "Phase I" does not include the boost surveillance and tracking system program.

(2) The terms "brilliant pebbles", "space-based surveillance and tracking system", "ground-based surveillance and tracking system", "ground-based radar", and "ground-based interceptor" shall be interpreted consistent with the use of those terms in Appendix F to the "1990 Report to the Congress on the Strategic Defense Initiative", dated May 1990.

(g) DEFINITION.—In this section, the term "1972 Anti-Ballistic Missile Treaty" means the Treaty Between the United States of America and the Union of Soviet Socialist Republics on the Limitations of Anti-Ballistic Missiles, signed at Moscow on May 26, 1972.

BUMPERS (AND OTHERS) AMENDMENT NO. 2589

Mr. BUMPERS (for himself, Mr. JEFFORDS, and Mr. GLENN) proposed an amendment to the bill S. 2884, supra, as follows:

At the appropriate place in the bill, insert the following:

Notwithstanding any other provisions of this Act, the funds authorized to be appropriated for fiscal year 1991 for the use of the Armed Forces for research, development, test, and evaluation for the Defense Agencies shall not exceed $8,643,293,000; of the amounts appropriated pursuant to section 201 or otherwise made available to the Department of Defense for research, development, test and evaluation, for the Strategic Defense Initiative,

(1) not more than $143,500,000 may be obligated for the ground-based radar, spaced-based surveillance and tracking system program, and ground-based surveillance and tracking system program;

(2) not more than $142,000,000 may be obligated for the ground-based interceptor program;

(3) not more than $129,000,000 may be obligated for the brilliant pebbles program;

(4) not more than $641,200,000 may be obligated for other phase I programs;

(5) not more than $840,200,000 may be obligated for follow-on technologies programs;

(6) not more than $284,700,000 may be obligated for key technologies activities;

(7) not more than $227,900,000 may be obligated for operational support and management activities;

(8) not more than $180,000,000 may be obligated for test and evaluation activities;

(9) not more than $180,000,000 may be obligated for theater defense activities, of which not more than $42,000,000 may be expended for an advanced development program for an anti-tactical ballistic missile system with the Government of Israel;

(10) not more than $116,800,000 may be obligated for the innovative science and technology and small business innovative research programs; and,

(11) not more than $93,700,000 may be obligated for engineering analysis activities.

KERRY (AND HARKIN) AMENDMENT NO. 2590

Mr. KERRY (for himself, Mr. HARKIN, Mr. JEFFORDS, Mr. DECONCINI, and Mr. DASCHLE) proposed an amendment to the bill S. 2884, supra, as follows:

At the appropriate place in the bill, insert the following:

SEC. . Funding For Programs Under the Public Health Service Act (42 U.S.C. 300x) and the Department of Veterans Medical Accounts.

(a) TRANSFER AUTHORIZATION.—Of the amount authorized in section 201 to be appropriated for fiscal year 1990 and made available pursuant to section 221 for research, development, test and evaluation, for the Strategic Defense Initiative,

(1) $100,000,000 is authorized to be transferred and be made available for carrying out in fiscal year 1991 programs under Section 1911(a) of the Public Health Service Act (42 U.S.C. 300x) (Alcohol and Drug Abuse And Medical Health Services Block grants);

(2) $100,000,000 is authorized to be transferred and be made available for carrying out in fiscal year 1991 programs under Part A of title V of the Public Health Service Act (42 U.S.C 290aa et seq.) as amended by the Anti-Drug Act of 1988, model projects for pregnant and post partum women and their infants; and

(3) $200,000,000 is authorized to be transferred to the Medical account of the Department of Veterans Affairs.

(b) Notwithstanding any other provisions of this Act, of the funds authorized to be appropriated for fiscal year 1991 for research, development, test and evaluation of the Strategic Defense Initiative,

(1) not more than $207,000,000 may be obligated for the ground-based radar, space-based surveillance and tracking system program, and ground-based surveillance and tracking system program;

(2) not more than $127,700,000 may be obligated for the ground-based interceptor program;

(3) not more than $129,000,000 may be obligated for the brilliant pebbles program;

(4) not more than $786,100,000 may be obligated for other phase I programs;

(5) not more than $840,200,000 may be obligated for follow-on technologies programs;

(6) not more than $284,700,000 may be obligated for key technologies activities;

(7) not more than $227,800,000 may be obligated for operational support and management activities;

(8) not more than $180,000,000 may be obligated for test and evaluation activities;

(9) not more than $180,000,000 may be obligated for theater defense activities, of which not more than $42,000,000 may be expended for an advanced development program for an anti-tactical ballistic missile system with the Government of Israel;

(10) not more than $116,800,000 may be obligated for the innovative science and technology and small business innovative research programs; and

(11) not more than $93,700,000 may be obligated for engineering analysis activities.

BRYAN AMENDMENT NO. 2591

Mr. NUNN (for Mr. BYRAN) proposed an amendment to the bill S. 2884, supra, as follows:

At the appropriate place in the bill, insert the following: "As part of the request for authorizations of appropriations for fiscal year 1992, the Secretary of Defense shall transmit to the Committees on Armed Services of the Senate and the House of Representatives a report containing an analysis of the merits of utilizing as a dedicated NATO training facility a military installation within the United States which would otherwise be subject for closure or realignment."

ARMSTRONG (AND OTHERS) AMENDMENT NO. 2592

Mr. WARNER (for Mr. ARMSTRONG, for himself, Mr. MOYNIHAN, and Mr. HELMS) proposed an amendment to the bill S. 2884, supra, as follows:

At the end thereof, add the following new title:

TITLE . LITHUANIAN EMERGENCY ASSISTANCE

Chapter 9 of part I of the Foreign Assistance Act of 1961 (relating to international disaster assistance) is amended by adding at the end thereof the following new section:

"SEC. 495L. LITHUANIAN EMERGENCY RELIEF.—(a)(1) The Congress recognizes that prompt United States assistance is necessary to alleviate the emergency existing in the Republic of Lithuania caused by the economic blockade imposed by the Union of Soviet Socialist Republics which has caused great suffering among the Lithuanian people, especially with regard to a severe

shortage of medical supplies and the basic necessities of life.

"(b)(1) The Administrator of the Agency for International Development shall—

(i) furnish, in accordance with the authorities of this chapter, humanitarian assistance for the relief of the Lithuanian people during the existing emergency;

(ii) solicit private sector donations of humanitarian assistance for Lithuania; and

(iii) cooperate with private relief agencies attempting to provide humanitarian aid to Lithuania;

(2) The Commander-in-Chief of United States Transportation Command is authorized to provide all airlift and sealift necessary, throughout the course of the Lithuanian blockade, to transport United States public and private donations of medical supplies to Lithuania on a regular basis and should begin such transport as soon as the agreement described in subsection (e) has been concluded.

(c) For purposes of this paragraph, the term "humanitarian assistance" includes—

(i) oil, gas and fuel for emergency vehicles and medical facilities;

(ii) water purification supplies, materials for immunization, and other materials needed to prevent the outbreak of contagious diseases and to safeguard public health;

(iii) medical supplies; and

(iv) food and clothing.

(d)(1) In addition to funds authorized to be appropriated to carry out this chapter, there are authorized to be appropriated to the President $10,000,000 to carry out subsections (b)(1) and (b)(2).

(2) Funds appropriated pursuant to paragraph (1) are authorized to remain available until expended.

(3) The authority contained in the Foreign Assistance Act of 1961 to transfer funds between accounts shall not apply with respect to funds appropriated pursuant to paragraph (1).

(e) The Congress urges the President to begin negotiations immediately with the nations surrounding Lithuania, including Latvia, Estonia, the Union of Soviet Socialist Republics and Poland regarding the importation of critical humanitarian assistance. Pending conclusion of these negotiations, the Administrator of the United States Agency for International Development shall furnish the necessary humanitarian assistance through the International Red Cross, the Lithuanian Red Cross, CARITAS, and other relief agencies, to ensure the Lithuanians begin to receive critical humanitarian assistance immediately.

(f) Assistance may be provided under this section notwithstanding any other provision of law, other than that included in Public Law 101-179, section 503, known as the Support for Final European Democracy (SEED) Bill of 1989.

NUNN AMENDMENT NO. 2593

Mr. NUNN proposed an amendment to the bill S. 2884, supra, as follows:

On page 9, strike out line 12 and insert in lieu thereof the following:

"(1) For the Army, $5,696,323,000.".

On page 11, line 17, strike out the period and insert in lieu thereof ", subject to the customary reprogramming procedures.".

On page 19, strike out lines 7 through 10, and insert in lieu thereof "not more than $3,000,000 shall be available for distribution of humanitarian relief supplies to non-Communist, noncombatant, displaced persons or refugees at or near the border between Thailand and Cambodia."

On page 105, line 12, strike out "(a)," and insert in lieu thereof "(b),".

On page 145, lines 10 and 11, strike out "each House of the Congress" and insert in lieu thereof "the Committee on Governmental Affairs of the Senate, the Committee on Government Operations of the House of Representatives,".

On page 145, lines 14 and 15, strike out "each House of the Congress" and insert in lieu thereof "such committees".

On page 208, line 4, insert "authorized to be" after "Funds".

On page 212, between lines 20 and 21, insert the following new subsection:

(e) RELATIONSHIP TO OTHER LAWS.—(1) The authority provided in this section for the support of counter-drug activities by the Department of Defense is in addition to the authority provided for such purpose under chapter 18 of title 10, United States Code.

(2) Nothing in this section shall be construed to modify or supersede the provisions of section 375 of title 10, United States Code, or the provisions of section 376 of such title, except to the extent provided in subsection (c) of this section.

On page 215, line 15, strike out "five-year defense program" and all that follows through line 16 and insert in lieu thereof the following: "five-year or six-year defense program submitted pursuant to section 114a of title 31, United States Code.".

On page 215, between lines 16 and 17, insert the following new subsection:

(d) SIX-YEAR NATIONAL FOREIGN INTELLIGENCE PROGRAM.—Notwithstanding the reference in subsection (a) to a five-year national foreign intelligence program, if in any year the Director of Central Intelligence prepares a six-year national foreign intelligence program, the Director may submit that program to the committees referred to in subsection (a) in lieu of a five-year national foreign intelligence program.

On page 223, line 24, strike out "the those" and insert in lieu thereof "those".

On page 302, line 4, strike out "section 501" and insert in lieu thereof "section 2501".

On page 375, line 14, strike out "section 201" and insert in lieu thereof "section 3201".

On page 380, line 9, strike out "Defense" and insert in lieu thereof "Energy".

In amendment number 2586, on page 2, strike out lines 1 through 4.

NUNN (AND JOHNSTON) AMENDMENT NO. 2594

Mr. NUNN (for himself, and Mr. JOHNSTON), proposed an amendment to the bill S. 2884, supra, as follows:

On page 190, strike out line 6 and all that follows through line 26 on page 207, and insert in lieu thereof the following:

TITLE X—STRATEGIC ENVIRONMENTAL RESEARCH PROGRAM

SEC. 1001. STRATEGIC ENVIRONMENTAL RESEARCH PROGRAM.

(a) PROGRAM REQUIRED.—(1) Title 10, United States Code, is amended by inserting after chapter 171 the following new chapter:

"CHAPTER 172—STRATEGIC ENVIRONMENTAL RESEARCH PROGRAM

"Sec.

"2901. Strategic Environmental Research Program.
"2902. Joint Strategic Environmental Research Program Council.
"2903. Executive Director.
"2904. Strategic Environmental Research Program Scientific Advisory Board.

"§ 2901. Strategic Environmental Research Program

"(a) The Secretary of Defense and the Secretary of Energy jointly shall establish a program to be known as the 'Strategic Environmental Research Program'.

"(b) The purposes of the program are as follows:

"(1) To address environmental matters of concern to the Department of Defense and the Department of Energy through support for basic and applied research and development of technologies that can enhance the capabilities of those departments to meet their environmental obligations.

"(2) To identify research, technologies, and other information developed by the Department of Defense and the Department of Energy for national defense purposes that would be useful to governmental and private organizations involved in the development of energy technologies and of technologies to address environmental restoration, waste minimization, hazardous waste substitution, and other related environmental concerns, and to transfer such research, technologies, and other information to such governmental and private organizations.

"(3) To furnish other governmental organizations and private organizations with data, enhanced data collection capabilities, and enhanced analytical capabilities for use by such organizations in the conduct of environmental research, including research concerning global environmental change.

"(4) To identify technologies related to energy conservation, environmental restoration, hazardous waste substitution, and waste minimization developed by the private sector that could be useful for Department of Defense and Department of Energy defense activities and to provide for the use of such technologies in the conduct of such activities.

"§ 2902. Joint Strategic Environmental Research Program Council

"(a) There is established a Joint Strategic Environmental Research Program Council (hereafter in this chapter referred to as the 'Council').

"(b) The Council is composed of ten members as follows:

"(1) The Assistant Secretary of Defense responsible for matters relating to production and logistics.

"(2) The Director of Defense Research and Engineering.

"(3) The Vice Chairman of the Joint Chiefs of Staff.

"(4) The Assistant Secretary of the Air Force responsible for matters relating to space.

"(5) The Assistant Secretary of Energy responsible for matters relating to defense programs.

"(6) The Assistant Secretary of Energy responsible for matters relating to environmental restoration and waste management.

"(7) The Director of the Office of Energy Research of the Department of Energy.

"(8) The Assistant Secretary of Energy responsible for matters relating to conservation and renewable energy.

"(9) The Administrator of the Environmental Protection Agency.

"(10) The Executive Director of the Council, who shall be a non-voting member.

"(c) The Secretary of Defense shall designate a member of the Council as chairman

for each odd numbered fiscal year. The Secretary of Energy shall designate a member of the Council as chairman for each even numbered fiscal year.

"(d) The Council, under the control and direction of the Secretary of Defense and the Secretary of Energy in their respective departments, shall have the following responsibilities:

"(1) To develop policies and procedures for implementation of the Strategic Environmental Research Program.

"(2) To enter into contracts, grants, and other financial arrangements, in accordance with other applicable law, to carry out the purposes of the Strategic Environmental Research Program.

"(3) To prepare an annual five-year strategic environmental research plan that shall cover the fiscal year in which the plan is prepared and the four fiscal years following such fiscal year.

"(4) To promote the maximum exchange of information regarding and to help minimize duplication of environmentally related research and development activities through close coordination with the military departments and Defense Agencies, offices within the Department of Energy, other departments and agencies of the Federal Government, State and local governments, and other organizations engaged in such activities.

"(5) To ensure that research and development activities under the Strategic Environmental Research Program do not duplicate other ongoing activities sponsored by the Department of Defense, the Department of Energy, or any other department or agency of the Federal Government.

"(e) In carrying out subsection (d)(1), the Council shall develop policies and procedures for accomplishing the goals of—

"(1) providing access by Federal Government personnel, State and local government personnel, college and university personnel, industry personnel, and the general public to data under the control of or otherwise available to the Department of Defense that is relevant to local, regional, and global environmental change by—

"(A) identifying the sources of such data;

"(B) publicizing the availability and sources of such data by appropriately targeted dissemination of publicity to such personnel and the general public and by other means; and

"(C) providing for review of classified data relevant to environmental matters with a view to declassifying or preparing unclassified summaries of such data;

"(2) providing governmental and nongovernmental entities with analytic assistance, consistent with national defense missions, including access to military platforms for sensor deployment and access to computer capabilities, in order to facilitate environmental research;

"(3) identifying energy technologies developed for national defense purposes (including electricity generation systems, energy storage systems, alternative fuels, bio-mass energy technology, and applied materials technology) that might have environmentally sound, energy efficient applications for other programs of the Department of Defense and the national security programs of the Department of Energy, particularly technologies that have the potential for industrial, commercial, and other governmental applications, and to support programs of research in and development of such applications;

"(4) identifying and supporting programs of basic and applied research, development, and demonstration of technologies useful—

"(A) to facilitate environmental compliance, remediation, and restoration activities of the Department of Defense and the Department of Energy;

"(B) to minimize waste generation and for materials recycling by such departments;

"(C) to substitute use of nonhazardous, nontoxic, nonpolluting, and other environmentally sound materials practices and substances for use of hazardous, toxic, and polluting materials and substances by such departments; or

"(D) to treat, store, and dispose of waste in a manner that will not adversely impact the environment or human health;

"(5) identifying and supporting research, development, and application of other technologies developed for national defense purposes which, not only are directly useful for programs, projects, and activities of such departments, but also have useful applications for solutions to such national and international environmental problems as climate change and ozone depletion;

"(6) encouraging and supporting transfer to the private sector of technologies referred to in clauses (2) through (5) and promoting the use of cooperative, cost-shared arrangements under the Stevenson-Wydler Technology Innovation Act of 1980 (15 U.S.C. 3701 et seq.) and other applicable laws;

"(7) identifying and planning for the demonstration and use of existing environmentally sound, energy efficient technologies developed by the private sector that could be used by the Department of Defense and the Department of Energy;

"(8) identifying military specifications that prevent or limit the use of environmentally beneficial technologies, materials, and substances in the performance of Department of Defense contracts and recommend changes;

"(9) ensuring that the research and development programs identified for support pursuant to the policies and procedures prescribed by the Council are closely coordinated with, and do not duplicate, ongoing activities sponsored by the Department of Defense, the Department of Energy, and other Federal agencies;

"(10) ensuring that there is participation by industry and universities in conducting research, development, and demonstration activities; and

"(11) providing for the Secretary of Defense, the Secretary of Energy, and the Administrator of the Environmental Protection Agency jointly to develop—

"(A) innovative approaches to the prevention of environmental pollution caused by waste streams and other emissions resulting from industrial processes, post-consumer solid waste sewage and waste water, and other sources of air and water pollution; and

"(B) thermal technologies, biological technologies, chemical technologies, and other innovative technologies for the treatment of hazardous waste.

"(f) The Council shall be subject to the authority, direction, and control of—

"(1) the Secretary of Defense in prescribing policies and procedures under subsection (d)(1); and

"(2) the Secretary of Energy in prescribing the applicability of any such policies and procedures to the national security programs of the Department of Energy.

"(g)(1) Not later than February 1 of each year, the Council shall submit to the Secretary of Defense and the Secretary of Energy an annual report on the annual five-year strategic environmental research plan prepared pursuant to subsection (d)(3).

"(2) The report shall contain the following:

"(A) Actions to be taken during the five-year period covered by the plan to prevent duplication of research and development activities undertaken pursuant to the program.

"(B) A description of each project selected or recommended by the Council for support and funding, including the duration of and total estimated or, if known, actual cost of—

"(i) each such project supported during the fiscal year in which the plan is submitted and the preceding fiscal year; and

"(ii) each such project proposed for funding during the fiscal year in which the annual report is submitted and the following four fiscal years.

"(C) The amounts requested, in the budget submitted to Congress pursuant to section 1105(a) of title 31 for the fiscal year following the fiscal year in which the annual report is submitted, for the programs, projects, and activities of the Strategic Environmental Research Program and the estimated expenditures under such programs, projects, and activities during such following fiscal year.

"(D) The amount made available, for the fiscal year in which the annual report is submitted, to each Department of Defense laboratory and to Department of Energy facilities.

"(E) The amount requested in the budget referred to in subparagraph (C) for each Department of Defense laboratory and to Department of Energy facilities.

"(F) Any changes in military specifications recommended by the Council, actions to be taken to effectuate any such recommended changes on an expedited basis, and the projected date for each such change.

"(G) A description of all contracts, agreements, or other documents for cooperative research and development activities entered into pursuant to the Stevenson-Wydler Technology Innovation Act of 1980 (15 U.S.C. 3701 et seq.) during the fiscal year preceding the fiscal year in which the annual report is submitted.

"(H) Plans for transferring technology and information to other governmental agencies and to nongovernmental organizations involved in environmental research and related matters.

"(I) Plans to increase access to data described in subsection (e)(1).

"(J) Such additional recommendations or proposals, including proposals for legislation, relating to the Strategic Environmental Research Program as the Council considers appropriate.

"(3) The Council shall make a draft of the five-year strategic environmental research plan covered by the report available for public comment for a period of at least 30 days.

"(4) Not later than March 15 of each year, the Secretary of Defense and the Secretary of Energy shall transmit the annual report to the Committees on Armed Services and Appropriations of the Senate and House of Representatives, the Committees on Energy and Natural Resources and on Environment and Public Works of the Senate, and the Committee on Energy and Commerce of the House of Representatives. The Secretaries of Defense and Energy may submit such comments on the annual report as each Secretary considers appropriate.

"§ 2903. Executive Director

"(a)(1) There shall be an Executive Director of the Council appointed jointly by the Secretary of Defense and the Secretary of Energy.

"(2) The position of Executive Director shall be a Senior Executive Service position.

"(b) Subject to the authority, direction, and control of the Secretary of Defense, the Executive Director is responsible for the management of the Strategic Environmental Research Program in accordance with the policies established by the Council.

"(c) The Executive Director may enter into contracts or other agreements in accordance with applicable law, except that the Executive Director shall first obtain the approval of the Council for any contract or agreement in an amount equal to or in excess of $500,000 or such lesser amount as the Council may prescribe.

"(d)(1) The Executive Director, with the concurrence of the Council and without regard to the provisions of title 5 governing appointments in the competitive service, may appoint such professional and clerical staff as may be necessary to carry out the responsibilities and policies of the Council.

"(2) The Executive Director, with the concurrence of the Council and without regard to the provisions of chapter 51 of title 5 and subchapter III of chapter 53 of such title, may establish the rates of basic pay for professional employees appointed pursuant to paragraph (1). No such rate of basic pay may exceed the rate of basic pay payable for GS-18 of the General Schedule under section 5332 of such title.

"§ 2904. Strategic Environmental Research Program Scientific Advisory Board

"(a) The Secretary of Defense and the Secretary of Energy shall jointly appoint a Strategic Environmental Research Program Scientific Advisory Board (hereafter in this section referred to as the 'Advisory Board') consisting of not less than 7 and not more than 14 members.

"(b)(1) Members of the Advisory Board shall be appointed from among persons eminent in the fields of basic sciences, engineering, ocean and environmental sciences, education, research management, international and security affairs, health physics, health sciences, or social sciences, with due regard given to the equitable representation of scientists and engineers who are women or who represent minority groups. At least one member of the Advisory Board shall be a representative of environmental public interest groups and one member shall be a representative of the interests of State governments.

"(2) The Secretary of Defense and the Secretary of Energy shall request—

"(A) the head of the National Academy of Sciences, in consultation with the head of the National Academy of Engineering and the head of the Institutes of Medicine of the National Academy of Sciences, to nominate persons for appointment to the Advisory Board;

"(B) the Council on Environmental Quality to nominate for appointment to the Advisory Board at least one person who is representative of environmental public interest groups; and

"(C) the National Association of Governors to nominate for appointment to the Advisory Board at least one person who is representative of the interests of State governments.

"(3) The Administrator of the National Oceanic and Atmospheric Administration and the Science Advisor to the President shall be permanent members of the Advisory Board.

"(4) Members of the Advisory Board shall be appointed for terms of three years.

"(c) The Advisory Board shall prescribe procedures for carrying out its responsibilities. Such procedures shall define a quorum as a majority of the members, provide for annual election of the Chairman by the members of the Advisory Board, and require at least three meetings of the Advisory Board each year.

"(d) The Advisory Board may make recommendations to the Council regarding technologies, research, projects, programs, activities, technology transfer, and, if appropriate, funding within the scope of the Strategic Environmental Research Program.

"(e) The Advisory Board shall assist and advise the Council in identifying the environmental data and analytical assistance activities that should be covered by the policies and procedures prescribed pursuant to section 2902(d)(1) of this title.

"(f) Not later than March 15 of each year, the Advisory Board shall submit to the committees referred to in section 2902(g)(4) of this title an annual report setting forth its actions during the year preceding the year in which the report is submitted and any recommendations, including recommendations on projects, programs, and information exchange and recommendations for legislation, that the Advisory Board considers appropriate regarding the Strategic Environmental Research Program.

"(g) Each member of the Advisory Board shall be required to file a financial disclosure report under title I of the Ethics in Government Act of 1978 (5 U.S.C. App.).".

(2) The tables of chapters at the beginning of subtitle A of title 10, United States Code, and the beginning of part IV of such subtitle are each amended by inserting after the item relating to chapter 171 the following:

"172. Strategic Environmental Research Program ..... 2901".

(b) INITIAL APPOINTMENTS TO ADVISORY BOARD.—(1) Up to one-half of the members originally appointed to the Strategic Environmental Research Program Scientific Advisory Board established under section 2904 of title 10, United States Code, as added by subsection (a), may be appointed for terms of not more than 6 and not less than 2 years in order to provide for staggered expiration of the terms of members. The Secretary of Defense and the Secretary of Energy shall jointly designate the members appointed for terms authorized under this paragraph and shall jointly specify the terms for which such members are appointed.

(2) The Secretary of Defense and the Secretary of Energy shall make the appointments required by section 2904(a) of title 10, United States Code (as added by subsection (a)(1)), not later than 60 days after the date of the enactment of this Act.

(c) FIRST ANNUAL REPORT OF THE JOINT STRATEGIC ENVIRONMENTAL RESEARCH PROGRAM COUNCIL.—(1) The first annual report required by section 2902(g) of title 10, United States Code, as added by subsection (a), shall be submitted to the Secretary of Defense not later than February 1, 1992.

(2) The Secretary of Defense shall submit to the congressional defense committees, with the annual report referred to in paragraph (1), any recommendations for changes in the personnel management structure of the Department of Defense that the Secretary considers necessary to carry out the environmental activities of the Department of Defense more effectively.

(3) The Secretary of Defense shall prepare and publish with the annual report referred to in paragraph (1) an action plan to integrate the environmental change data gathered from the Department of Defense and the intelligence community into existing Federal and other research programs related to environmental change. In the preparation of the action plan, the Secretary shall consult with the Committee on Earth Sciences of the Federal Coordinating Council on Science, Engineering, and Technology.

(d) FIRST ANNUAL REPORT OF THE STRATEGIC ENVIRONMENTAL RESEARCH PROGRAM SCIENTIFIC ADVISORY BOARD.—The first annual report of the Strategic Environmental Research Program Scientific Advisory Board shall be submitted not later than March 15, 1992.

SEC. 1002. AVAILABILITY OF FUNDS

Of the amounts authorized to be appropriated pursuant to section 201, $200,000,000 shall be available for the Strategic Environmental Research Program established under chapter 172 of title 10, United States Code, as added by section 1001. To the extent provided in appropriation Acts, the amount made available by this section shall remain available until expended.

DEPARTMENT OF TRANSPORTATION AND RELATED AGENCIES APPROPRIATIONS, FISCAL YEAR 1991

LAUTENBERG AMENDMENT NO. 2595

Mr. LAUTENBERG proposed an amendment to the bill (H.R. 5229) making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1991, and for other purposes, as follows:

On page 9, line 18, after the numeral, insert: ", of which $7,000,000 shall remain available until expended".

On page 33, line 22, srike "28" and insert "23".

On page 34, line 12, strike "28" and insert "23".

Insert on page 70, before line 1, the following lead-in: "Subsections a(2), a(3), (b), and (c) of section 104 of title 23, United States Code are amended as follows:".

FORD AMENDMENT NO. 2596

Mr. LAUTENBERG (for Mr. FORD) proposed an amendment to the bill H.R. 5229, supra, as follows:

At the end of the bill, add the following new section:

SEC. 4. AUXILIARY FLIGHT SERVICE STATION PROGRAM.

(a) GENERAL RULE.—The Administrator of the Federal Aviation Administration shall develop and implement a system of manned auxiliary flight service stations. The auxiliary flight service stations shall supplement the services of the planned consolidation to 61 automated flight service stations under the flight service station modernization program. Auxiliary flight service stations shall be located in areas of unique weather or

operational conditions which are critical to the safety of flight.

(b) REPORT TO CONGRESS.—Not later than 180 days after the date of enactment of this Act, the administrator of the Federal Aviation Adminstration shall report to Congress with the plan and schedule for implementation of this section.

DOLE AMENDMENT NO. 2597

Mr. D'AMATO (for Mr. DOLE) proposed an amendment to the bill H.R. 5229, supra, as follows:

At the appropriate place in the bill add the following:

"U.S. 54 INTERCHANGE PROJECT

"For the purpose of carrying out a demonstration of an improved interchange near a major municipal airport, there is hereby appropriated $10,900,000, to remain available until expended, for the acquisition of right-of-way, and other costs incurred in the construction of an improved interchange at Kellogg (U.S. 54) and Dugan Streets in Wichita, Kansas: *Provided*, That all funds appropriated under this heading shall be exempted from any limitation on obligations for Federal-aid highways and highway safety construction programs: *Provided further*, That $10,900,000 of unobligated contract authority available for airport development and planning pursuant to section 505(a) of the Airport and Airway Improvement Act of 1982, as amended, is rescinded."

MURKOWSKI AMENDMENT NO. 2598

Mr. D'AMATO (for Mr. MURKOWSKI) proposed and amendment to the bill H.R. 5229, supra, as follows:

At the end of the bill, add the following:

SEC. . (a)(1) None of the funds appropriated by this Act may be obligated or expended to enter into any contract for the construction, alteration, or repair of any public building or public work in the United States or any territory or possession of the United States with any contractor or subcontractor of a foreign country, or any supplier of products of a foreign country, during any period in which such foreign country is listed by the United States Trade Representative under subsection (c) of this section.

(2) The President or the head of a Federal agency administering the funds for the construction, alteration, or repair may waive the restrictions of paragraph (1) of this subsection with respect to an individual contract if the President or the head of such agency determines that such action is necessary for the public interest. The authority of the President or the head of a Federal agency under this paragraph may not be delegated. The President or the head of a Federal agency waiving such restrictions shall, within 10 days, publish a notice thereof in the Federal Register describing in detail the contract involved and the reason for granting the waiver.

(b)(1) Not later than 30 days after the date of enactment of this Act, the United States Trade Representative shall make a determination with respect to each foreign country of whether such foreign country—

(A) denies fair and equitable market opportunities for products and services of the United States in procurement, or

(B) denies fair and equitable market opportunities for products and services of the United States in bidding,

for construction projects that cost more than $500,000 and are funded (in whole or in part) by the government of such foreign country or by an entity controlled directly or indirectly by such foreign country.

(2) In making determinations under paragraph (1), the United States Trade Representative shall take into account information obtained in preparing the report submitted under section 181(b) of the Trade Act of 1974 and such other information or evidence concerning discrimination in construction projects against United States products and services that are available.

(c)(1) The United States Trade Representative shall maintain a list of each foreign country which—

(A) denies fair and equitable market opportunities for products and services of the United States in procurement, or

(B) denies fair and equitable market opportunities for products and services of the United States in bidding,

for construction projects that cost more than $500,000 and are funded (in whole or in part) by the government of such foreign country or by an entity controlled directly or indirectly by such foreign country.

(2) Any foreign country that is initially listed or that is added to the list maintained under paragraph (1) shall remain on the list until—

(A) such country removes the barriers in construction projects to United States products and services;

(B) such country submits to the United States Trade Representative evidence demonstrating that such barriers have been removed; and

(C) the United States Trade Representative conducts an investigation to verify independently that such barriers have been removed and submits, at least 30 days before granting any such waiver, a report to each House of the Congress identifying the barriers and describing the actions taken to remove them.

(3) The United States Trade Representative shall publish in the Federal Register the entire list required under paragraph (1) and shall publish in the Federal Register any modifications to such list that are made after publication of the original list.

(d) For purposes of this section—

(1) The term "foreign country" includes any foreign instrumentality. Each territory or possession of a foreign country that is administered separately for customs purposes shall be treated as a separate foreign country.

(2) Any contractor or subcontractor that is a citizen or national of a foreign country, or is controlled directly or indirectly by citizens or nationals of a foreign country, shall be considered to be a contractor or subcontractor of such foreign country.

(3) Subject to paragraph (4), any product that is produced or manufactured (in whole or in substantial part) in a foreign country shall be considered to be a product of such foreign country.

(4) The restrictions of subsection (a)(1) shall not prohibit the use, in the construction, alteration, or repair of a public building or public work, of vehicles or construction equipment of a foreign country.

(5) The terms "contractor" and "subcontractor" includes any person performing any architectural, engineering, or other services directly related to the preparation for or performance of the construction, alteration, or repair.

(e) Paragraph (a)(1) of this section shall not apply to contracts entered into prior to the date of enactment of this Act.

(f) The provisions of this section are in addition to, and do not limit or supersede, any other restrictions contained in any other Federal law.

HEINZ (AND SPECTER) AMENDMENT NO. 2599

Mr. HEINZ (for himself and Mr. SPECTER) proposed an amendment to the bill H.R. 5229, supra, as follows:

On page 66, strike lines 14 through 25.
On page 67, strike lines 1 through 17.

FEDERAL MARITIME COMMISSION AUTHORIZATION

BREAUX AMENDMENT NO. 2600

Mr. MITCHELL (for Mr. BREAUX) proposed an amendment to the bill (S. 2759) to authorize appropriations for fiscal year 1991 for the Federal Maritime Commission, and for other purposes, as follows:

Strike all after the enacting clause and insert in lieu thereof the following:

That in fiscal year 1991, $15,894,000 is authorized to be appropriated for the use of the Federal Maritime Commission; except that for fiscal year 1991, and for each fiscal year thereafter, not to exceed $2,000 may be expended for official reception and representation expenses.

SEC. 2. Subsection (h) of section 18 of the Shipping Act of 1984 is amended by inserting "Advisory" immediately before "Commission shall", and by striking "its establishment" and inserting in lieu thereof "all of its members have been duly appointed".

SEC. 3. Section 19 of the Merchant Marine Act, 1920 (46 App. U.S.C. 876) is amended—

(1) in subdivision (b) of paragraph (1) by inserting "including intermodal movements, terminal operations, cargo solicitation, forwarding and agency services, non-vessel-operating common carrier operations, and other activities and services integral to transportation systems," immediately after "generally,"; and

(2) by adding at the end the following new paragraphs:

"(5) The Commission may initiate a rule or regulation under paragraph (1)(b) of this section either on its own motion or pursuant to a petition. Any person, including a common carrier, tramp operator, bulk operator, shipper, shippers' association, ocean freight forwarder, marine terminal operator, or any component of the Government of the United States, may file a petition for relief under paragraph (1)(b) of this section.

"(6) In furtherance of the purposes of paragraph (1)(b) of this section—

"(a) the Commission may, by order, require any person (including any common carrier, tramp operator, bulk operator, shipper, shippers' association, ocean freight forwarder, or marine terminal operator, or an officer, receiver, trustee, lessee, agent, or employee thereof) to file with the Commission a report, answers to questions, documentary material, or other information which the Commission considers necessary or appropriate;

"(b) the Commission may require a report or answers to questions to be made under oath;

"(c) the Commission may prescribe the form and the time for response to a report and answers to questions; and

"(d) a person who fails to file a report, answer, documentary material, or other information required under this paragraph shall be liable to the United States Government for a civil penalty of not more than $5,000 for each day that the information is not provided.

"(7) In proceedings under paragraph (1)(b) of this section—

"(a) the Commission may authorize a party to use depositions, written interrogatories, and discovery procedures that, to the extent practicable, are in conformity with the rules applicable in civil proceedings in the district courts of the United States;

"(b) the Commission may by subpoena compel the attendance of witnesses and the production of books, papers, documents, and other evidence;

"(c) subject to funds being provided by appropriations Acts, witnesses are, unless otherwise prohibited by law, entitled to the same fees and mileage as in the courts of the United States;

"(d) for failure to supply information ordered to be produced or compelled by subpoena in proceedings under paragraph (1)(b)(7) of this section, the Commission may—

"(i) after notice and an opportunity for hearing, suspend tariffs of a common carrier or that common carrier's right to use the tariffs of conferences of which it is a member, or

"(ii) assess a civil penalty of not more than $5,000 for each day that the information is not provided; and

"(e) when a person violates an order of the Commission or fails to comply with a subpoena, the Commission may seek enforcement by a United States district court having jurisdiction over the parties, and if, after hearing, the court determines that the order was regularly made and duly issued, it shall enforce the order by an appropriate injunction or other process, mandatory or otherwise.

"(8) Notwithstanding any other law, the Commission may refuse to disclose to the public a response or other information provided under the terms of this section.

"(9) If the Commission finds that conditions that are unfavorable to shipping under paragraph (1)(b) of this section exist, the Commission may—

"(a) limit sailings to and from United States ports or the amount or type of cargo carried;

(b) suspend, in whole or in part, tariffs filed with the Commission for carriage to or from United States ports, including a common carrier's right to use tariffs of conferences in United States trades of which it is a member of any period the Commission specifies;

"(c) suspend, in whole or in part, an ocean common carrier's right to operate under an agreement filed with the Commission, including any agreement authorizing preferential treatment at terminals, preferential terminal leases, space chartering, or pooling of cargoes or revenue with ocean common carriers;

"(d) impose a fee, not to exceed $1,000,000 per voyage; or

"(e) take any other action the Commission finds necessary and appropriate to adjust or meet any condition unfavorable to shipping in the foreign trade of the United States.

"(10) Upon request by the Commission—

"(a) the collector of customs at the port or place of destination in the United States shall refuse the clearance required by section 4197 of the Revised Statutes (46 App. U.S.C. 91) to a vessel of a country that is named in a rule or regulation issued by the Commission under paragraph (1)(b) of this section, and shall collect any fees imposed by the Commission under paragraph (9)(d) of this section; and

"(b) the Secretary of the department in which the Coast Guard is operating shall deny entry for purpose of oceanborne trade, of a vessel of a country that is named in a rule or regulation issued by the Commission under paragraph (1)(b) of this section, to any port or place in the United States or the navigable waters of the United States, or shall detain that vessel at the port or place in the United States from which it is about to depart for another port or place in the United States.

"(11) A common carrier that accepts or handles cargo for carriage under a tariff that has been suspended under paragraph (7)(d) or (9)(b) of this section, or after its right to use another tariff has been suspended under those paragraphs is subject to a civil penalty of not more than $50,000 for each day that it is found to be operating under a suspended tariff.

"(12) The Commission may consult with, seek the cooperation of, or make recommendations to other appropriate Government agencies prior to taking any action under this section.".

SEC. 4. Notwithstanding sections 12106, 12107, and 12108 of title 46, United States Code, and section 27 of the Merchant Marine Act, 1920 (46 App. U.S.C. 883), the Secretary of Transportation may issue a certificate of documentation for the following vessels:

(1) Angelos, hull identification number HAZ1432C0173 and State of Hawaii registration number HA 1432 C.

(2) Arctic Sounder, United States official number 569927.

(3) Bounty, United States official number 950956.

(4) Camelot, United States official number 923202.

(5) Cherokee V, United States official number 570746.

(6) Ernestina, United States official number 136423.

(7) Ghostrider, United States official number 906121.

(8) He'enalu, State of Hawaii registration number HA 843 CP.

(9) Job Site, United States official number 595013.

(10) Kainalu, State of Hawaii registration number HA 779 CP.

(11) Lady Rose Anne, United States official number 603040.

(12) Mariner III, United States official number 225459.

(13) Ocean Prowler, United States official number 632751.

(14) Pacific Pearl, hull identification number MRY10161M76H414.

(15) Pumpkin, United States official number 627259.

(16) Rose, United States official number 928811.

(17) Salisa M, United States official number 265653.

(18) Sea Devil, United States official number 569316.

(19) Sea Nugget, State of Alaska registration number AK 2233 E.

(20) Sinbad, formerly Sangria, hull identification number 15846 and State of Alaska registration number AK 3650.

(21) Solitaire, United States official number 521894.

(22) Swee'Pea, hull identification number PBL32012K990 and State of Alaska registration number AK 8550 L.

(23) Weatherbird, United States official number 527918.

(24) Weatherbird II, United States official number 652213.

NEGOTIATIONS TO RESOLVE THE GREYHOUND STRIKE

KENNEDY AMENDMENT NO. 2601

Mr. MITCHELL (for Mr. KENNEDY) proposed an amendment to the concurrent resolution (S. Con. Res. 127) to express the sense of Congress that the Greyhound Lines, Inc., and the Amalgamated Transit Union should pursue meaningful negotiations under the auspices of the Federal Mediation and Conciliation Service and the Secretary of Labor to resolve their dispute and restore vital transportation services, as follows:

Amend the resolved clause by striking "and the Secretary of Labor".

Amend the title by striking "and the Secretary of Labor".

REVITALIZATION OF COMMISSIONED CORPS OF THE PUBLIC HEALTH SERVICE

KENNEDY AMENDMENT NO. 2602

Mr. MITCHELL (for Mr. KENNEDY) proposed an amendment to the bill (S. 1963) to amend the Public Health Service Act to facilitate the revitalization of the Commissioned Corps of the Public Health Service, and for other purposes, as follows:

On page 8, after line 24, add the following new section:

SEC. . MOUSE BREEDING FACILITIES GRANTS.

(a) IN GENERAL.—Public Law 101-190 (103 Stat. 1691) is amended—

(1) in section 1—

(A) by striking out "CONTRACT" in the heading and inserting in lieu thereof "GRANT";

(B) by striking out "for entering into a contract with" in subsection (a), and inserting in lieu thereof "to make a grant to"; and

(C) by striking out "contract" in subsection (b), and inserting in lieu thereof "grant";

(2) in section 2—

(A) by striking out "enter into contract" in the matter preceding paragraph (1) in subsection (a), and inserting in lieu thereof "make a grant";

(B) by striking out "contract" in subsection (a)(1), and inserting in lieu thereof "grant";

(C) by striking out "contractor" in the matter preceding subparagraph (A) in subsection (b)(1), and inserting in lieu thereof "grantee";

(D) by striking out "a contract" each place that such occurs in subparagraph (A) and

(B) of subsection (b)(1), and inserting in lieu thereof "an agreement";

(E) by striking out "contractor" in subsection (b)(2), and inserting in lieu thereof "grantee";

(F) by striking out "CONTRACTOR" in the heading of paragraph (1) of subsection (d), and inserting in lieu thereof "GRANTEE";

(G) by striking out "enter into a contract" in subsection (d)(1), and inserting in lieu thereof "make a grant"; and

(H) by striking out "the contract" in subsection (d)(1), and inserting in lieu thereof "the grant";

(3) in section 3(a)—

(A) by striking out "enter into a contract" and inserting in lieu thereof "make a grant"; and

(B) by striking out "the contract" each place that such occurs and inserting in lieu thereof "the grant";

(4) in section 4—

(A) by striking out "enter into a contract under section 1 unless the applicant for the contract" in the first sentence of subsection (a)(1), and inserting in lieu thereof "make a grant under section 1 unless the applicant for the grant";

(B) by striking out "in the contract" in the second sentence of subsection (a)(2)(A);

(C) by striking out "enter into a contract" in the matter preceding paragraph (1) in subsection (b), and inserting in lieu thereof "make a grant";

(D) by striking out "contract" in subsection (b)(1), and inserting in lieu thereof "grant";

(E) by striking out "enter into a contract" in the matter preceding paragraph (1) in subsection (c), and inserting in lieu thereof "make a grant"; and

(F) by striking out "contract" in subsection (w)(1), and inserting in lieu thereof "grant";

(5) in section 5, by striking out "contractor" each place that such occurs and inserting in lieu thereof "grantee"; and

(6) in the matter preceding paragraph (1) in section 6(a), by striking out "contractor" and inserting in lieu thereof "grantee".

(c) EFFECTIVE DATE.—The amendments made by subsection (a) shall be retroactively effective as of November 29, 1989.

SECURITIES EXCHANGE ACT AMENDMENTS

DODD AMENDMENT NO. 2603

Mr. MITCHELL (for Mr. DODD) proposed an amendment to the bill (S. 648) to amend the Securities Exhange Act of 1934, as follows:

On page 22, between lines 13 and 14, insert the following new paragraph, and renumber accordingly:

"(3)(A) In developing and implementing reporting requirements pursuant to paragraph (1) of this subsection with respect to associated persons subject to examination by or reporting requirements of a Federal banking agency, the Commission shall consult with and consider the views of each such Federal banking agency.

"(B) A registered broker, dealer, or municipal securities dealer shall be in compliance with any recordkeeping or reporting requirement adopted pursuant to paragraph (1) of this subsection concerning an associated person that is subject to examination by or reporting requirements of an appropriate Federal banking agency if such broker, dealer, or municipal securities dealer utilizes for such recordkeeping or reporting requirement copies of reports filed by the associated person with the Federal banking agency pursuant to section 5211 of the Revised Statutes, section 9 of the Federal Reserve Act, section 7(a) of the Federal Deposit Insurance Act, section 10(b) of the Home Owners' Loan Act, or section 8 of the Bank Holding Company Act of 1956. The Commission may, however, by rule adopted pursuant to paragraph (1), require any broker, dealer, or municipal securities dealer filing such reports with the Commission to obtain, maintain, or report supplemental information if the Commission makes an explicit finding that such supplemental information is necessary to inform the Commission regarding potential risks to such broker, dealer, or municipal securities dealer. Prior to requiring any such supplemental information, the Commission shall first request the appropriate Federal banking agency to expand its reporting requirements to include such information.

"(C) Prior to making a request pursuant to paragraph (2) of this subsection for information with respect to an associated person that is subject to examination by or reporting requirements of a Federal banking agency, the Commission shall—

"(i) notify such agency of the information required with respect to such associated person; and

"(ii) consult with such agency to determine whether the information required is available from such agency and for other purposes, unless the Commission determines that any delay resulting from such consultation would be inconsistent with ensuring the financial and operational condition of the broker, dealer, or municipal securities dealer, government securities broker, or government securities dealer or the stability or integrity of the securities markets.

"(D) Nothing in this subsection shall be construed to permit the Commission to require any broker, dealer, or municipal securities dealer, government securities broker, or government securities dealer for which the Commission is the appropriate regulatory agency, to obtain, maintain, or furnish any examination report of any Federal banking agency or any supervisory recommendations or analysis contained therein.

On page 25, line 4, strike "it and".

On page 25, lines 9 and 10, strike "the Secretary or".

On page 25, lines 13 and 14, strike "the Secretary or".

On page 25, lines 19 and 20, strike "Secretary or the".

On page 25, line 24, strike "the Secretary and".

On page 26, between lines 2 and 3, insert the following new subparagraph, and renumber accordingly:

"(C) (i) In developing and implementing reporting requirements pursuant to subparagraph (A) of this paragraph with respect to associated persons subject to examination by or reporting requirements of a Federal banking agency, the Commission shall consult with and consider the views of each such Federal banking agency.

"(ii) A registered broker, dealer, or municipal securities dealer shall be in compliance with any recordkeeping or reporting requirement adopted pursuant to subparagraph (A) of this paragraph concerning an associated person that is subject to examination by or reporting requirements of an appropriate Federal banking agency if such broker, dealer, or municipal securities dealer utilizes for such recordkeeping or reporting requirement copies of reports filed by the associated person with the Federal banking agency pursuant to section 5211 of the Revised Statutes, section 9 of the Federal Reserve Act, section 7(a) of the Federal Deposit Insurance Act, section 10(b) of the Home Owners' Loan Act, or section 8 of the Bank Holding Company Act of 1956. The Commission may, however, by rule adopted pursuant to subparagraph (A), require any broker, dealer, or municipal securities dealer filing such reports with the Commission to obtain, maintain, or report supplemental information if the Commission makes an explicit finding that such supplemental information is necessary to inform the Commission regarding potential risks to such broker, dealer, or municipal securities dealer. Prior to requiring any such supplemental information, the Commission shall first request the appropriate Federal banking agency to expand its reporting requirements to include such information.

"(iii) Prior to making a request pursuant to subparagraph (B) of this paragraph for information with respect to an associated person that is subject to examination by or reporting requirements of a Federal banking agency, the Commission shall—

"(I) notify such agency of the information required with respect to such associated person; and

"(II) consult with such agency to determine whether the information required is available from such agency and for other purposes, unless the Commission determines that any delay resulting from such consultation would be inconsistent with ensuring the financial and operational condition of the broker, dealer, municipal securities dealer, government securities broker, or government securities dealer or the stability or integrity of the securities markets.

"(iv) Nothing in this paragraph shall be construed to permit the Commission to require any broker or dealer, or any municipal securities dealer, government securities broker, or government securities dealer for which the Commission is the appropriate regulatory agency, to obtain, maintain, or furnish any examination report of any Federal banking agency or any supervisory recommendations or analysis contained therein.

On page 28, line 2, strike "subsection" and insert "paragraph".

IMPROVEMENTS TO SCHOLARSHIPS AND LOAN REPAYMENT PROGRAMS

KENNEDY AMENDMENT NO. 2604

Mr. MITCHELL (for Mr. KENNEDY), proposed an amendment to the bill (S. 2617) to amend the Public Health Service Act to make various improvements in existing scholarships and loan repayment programs, as follows:

Strike out all after the enacting clause and insert in lieu thereof the following:

SECTION 1. SHORT TITLE.

This Act may be cited as the "National Health Service Corps Revitalization Act of 1990".

SEC. 2. FINDINGS AND PURPOSE.

(a) FINDINGS.—Congress finds that—

(1) the mission of the National Health Service Corps is to improve access to primary health care services through coordinated systems of care for medically underserved populations by addressing the geographic maldistribution of physicians and other health care personnel;

(2) over the years, more than 16,500 health care providers have been placed in communities that greatly needed their services with the peak field strength of the National Health Service Corps occurring in 1986 with 3,127 providers;

(3) the key contributor to this field strength were the individuals who had received medical school scholarships in return for a commitment to serve with such Corps;

(4) the number of scholarship awards by the National Health Service Corps peaked in 1978 when 3,150 were awarded;

(5) due to a planned phase out of the scholarship program combined with reductions in funding, the number of scholarships and commitments to serve in the Corps declined steadily throughout the 1980's, and between 1986 and 1989, the number of providers in place around the country declined by over 1000;

(6) the cut back described in paragraph (5) was based on the theory that a physician surplus would drive physicians into underserved communities, but the anticipated overflow of physicians into underserved areas did not happen and many communities lost their sole provider of health services due to the cutback in this Federal program;

(7) inner city and rural communities face an especially serious deterioration in the availability of health services that has been greatly exacerbated by the decline in the strength of the Corps with the situation reaching a crisis level in some communities;

(8) as of December 1988, the Department of Health and Human Services had designated the following number of health personnel shortage areas—

(A) 793 dental shortage areas;

(B) 592 psychiatry shortage areas; and

(C) 1,944 primary care shortage areas;

(9) it would take more than 4,000 physicians to fill the primary care shortage areas and eliminate the designations referred to in paragraph (8);

(10) approximately 50 percent of the medically indigent population in the shortage areas reside in rural areas and rural areas constitute roughly 70 percent of the shortage area designations;

(11) in 1987, to begin to address the shortage created by the cuts in the scholarship program, a new loan repayment program for health professionals was established;

(12) the loan repayment program referred to in paragraph (11) was offered to doctors and nurses with the response making it clear that additional funds were needed for such program;

(13) the number of mid-level health practitioners, including nurse practitioners and physicians assistants, in underserved areas, and especially in rural areas, has increased significantly in recent years, and such practitioners have provided an important source of care and have often been complementary to existing physician services;

(14) a mix of providers that include nurses, nurse practitioners, certified nurse midwives, physicians assistants, psychologists, social workers, other mental health workers, dentists, podiatrists, and physicians is needed in order to provide for the full range of services needed by underserved communities;

(15) though loan repayment may represent a useful incentive to bring such health personnel to underserved areas, scholarships are specially needed in order to successfully recruit physicians, nurses, certified nurse midwives, and nurse practitioners to serve in such areas; and

(16) due to the high turnover of health professionals in underserved areas, improved methods of retention are needed to keep existing National Health Service Corps personnel in underserved communities to which such personnel are assigned to serve.

(b) PURPOSE.—It is the purpose of this Act—

(1) to increase the supply of primary care providers to urban and rural underserved health professional shortage areas;

(2) to halt proposals to phase out the National Health Service Corps scholarship program and to increase the number of scholarships and loan repayments for physicians and other providers to address the serious decline in the availability of health professionals in underserved areas; and

(3) to revitalize the National Health Service Corps by improving the recruitment and retention of providers and by diversifying the Corps so that it includes mid-level practitioners, psychologists, social workers, and other mental health professionals.

SEC. 3. PUBLICITY AND RECRUITMENT.

Section 338A(c)(2) of the Public Health Service Act (42 U.S.C. 254l(c)(2)) is amended by inserting before the period the following: ", including a statement of all factors considered in the selection of applicants and the assignment of corps members".

SEC. 4. SCHOLARSHIP AND LOAN REPAYMENT PROGRAM PRIORITIES.

(a) SCHOLARSHIP PROGRAM.—Section 338A(d) of the Public Health Service Act (42 U.S.C. 2541(d)) is amended to read as follows:

"(d)(1) The Secretary shall consider the following factors in selecting applicants to participate in the Scholarship Program—

"(A) the applicant's demonstrated interest in providing primary services;

"(B) the applicant's demonstrated interest in providing health services to individuals residing in underserved areas;

"(C) the applicant's connection to a health professional shortage area (designated under section 332) at the time of the submission of the application;

"(D) the need and demand for nurses, certified nurse midwives, nurse practitioners, physicians assistants, podiatrists, dentists, psychologists, social workers, and other mental health professionals;

"(E) the school attended by the applicant with regard to its demonstrated record of success or its effort to train individuals to enter primary care fields, and to serve underserved areas; and

"(F) any other factors which the Secretary determines are relevant to the selection of qualified applicants.

"(2) In determining which applications under the Scholarship Program to approve (and which contracts to accept), the Secretary shall give priority—

"(A) first, to applications made (and contracts submitted) by individuals who have previously received scholarships under the Scholarship Program or under section 758; and

"(B) second, to applications made (and contracts submitted) by individuals from disadvantaged and minority backgrounds.".

(b) LOAN REPAYMENT PROGRAM.—Section 338B(d) of the Public Health Service Act (42 U.S.C. 254l-1(d)) is amended to read as follows:

"(d)(1) The Secretary shall consider the following factors in selecting applicants to participate in the Loan Repayment Program—

"(A) the applicant's demonstrated interest in providing primary services;

"(B) the applicant's demonstrated interest in providing health services to individuals residing in underserved areas;

"(C) the applicant's connection to a health professional shortage area (designated under section 332) at the time of the submission of the application;

"(D) the need and demand for nurses, certified nurse midwives, nurse practitioners, physicians assistants, podiatrists, dentists, psychologists, social workers, and other mental health professionals;

"(E) the training program attended by the applicant with regard to its demonstrated record of success or its effort to train individuals to enter primary care fields, and to serve underserved areas; and

"(F) any other factors which the Secretary determines are relevant to the selection of qualified applicants.

"(2) In determining which applications under the Loan Repayment Program to approve (and which contracts to accept), the Secretary shall give priority—

"(A) first, to applications made (and contracts submitted) by individuals who have previously received scholarships under the Loan Repayment Program or under section 758, and then;

"(B) to applications made (and contracts submitted) by individuals from disadvantaged and minority backgrounds;

"(C) to applications from individuals who are legal residents of health professional shortage areas or who, at the time of the submission of the application, reside in a health professional shortage area; and

"(D) to applications from individuals who have demonstrated an interest in providing primary care service for the underserved through the participation of such individuals in clinical programs.".

SEC. 5. INCENTIVES AND ADMINISTRATIVE PROVISIONS.

Subpart III of part D of title III of the Public Health Service Act (42 U.S.C. 2541 et seq.) is amended by adding at the end thereof the following new sections:

"SEC. 338K. INCENTIVES FOR RECRUITMENT AND RETENTION.

"(a) IN GENERAL.—The Secretary shall establish and implement a program of incentives, as described in subsection (b), to improve National Health Service Corps recruitment and retention.

"(1) MATERIALS.—The Secretary shall distribute materials that encourage the financial aid offices of medical, dental, nursing, graduate departments of psychology, and social work schools, primary care oriented medical school departments, and residency programs to inform all students and residents about the Scholarship and Loan Repayment Program.

"(2) STUDENT TRAINING AND EXTERNSHIP PROGRAM.—The Secretary shall make grants and enter into contracts with health professions institutions and public and private nonprofit entities for the conduct of programs that would expose and train health

professions students throughout their academic careers to clinical settings administered by countries, States, or the Public Health Service that provide primary care services to medically underserved areas.

"(3) CAREER ADVISOR.—The Secretary shall assure the availability of career advisors to assist Corps members from the time such members enter into a contract with the Corps until such members complete their obligation.

"(4) FELLOWSHIPS IN PRIMARY CARE.—The Secretary, in conjunction with eligible residency programs and other training programs, shall establish fellowship programs for physicians, dentists, nurse practitioners, nurse midwives, and physician assistants who have an interest and commitment to primary care, to enable such health professionals to gain exposure and expertise in the delivery of medical services to underserved populations in health professional shortage areas.

"(5) FACULTY APPOINTMENTS.—The Secretary shall encourage the provision of faculty appointments for Corps providers at health professional schools, to provide access for such providers, and the communities they serve, to university facilities and to make such providers a source of expertise for health professions students.

"(6) EXCHANGE PROGRAMS, ETC.—The Secretary shall establish exchange programs with teaching centers, leave time for professional conferences, sabbatical leave, and traveling medical consultation teams to increase opportunities for patient case presentations and discussions and research by Corps personnel.

"(7) JOB SHARING, ETC.—The Secretary shall establish options, such as job sharing and couple recruitment, and other flexible work programs for Corps members to be available after the period of obligated service.

"(8) RESPITE SQUAD.—The Secretary shall establish a 'respite squad' that shall consist of mid-career health professionals who would work in underserved areas on a short-term basis, such as a two-week period or a one day a month basis.

"(9) INDEPENDENT RECRUITMENT.—The Secretary shall maintain a recruitment program to recruit individuals, who are not participants in the Scholarship or Loan Repayment Programs, to become Corps members.

"(c) TRACKING AND EVALUATION.—

"(1) IN GENERAL.—The Secretary shall track and evaluate the incentive programs established under subsection (b), to determine the effectiveness of such programs in increasing the participation of individuals in the programs established under this part, and in the continuing participation of such individuals in such programs.

"(2) EFFECTIVENESS.—The Secretary shall evaluate the effectiveness of the programs established in paragraphs (3) and (5) of subsection (b) in influencing the specialty choice and practice setting of program participants.

"(3) REPORTING.—Not later than March 1 of every even numbered year, the Secretary shall prepare and submit to the appropriate Committees of Congress, a report concerning the evaluations conducted under paragraphs (1) and (2).

"SEC. 338L. INCREASE IN STAFF.

"The Secretary shall ensure that the administrative staff of the National Health Service Corps is adequate and appropriate to administer the programs established and operated under this subpart. The Secretary shall increase such staff if such increase is necessary to effectively administer such programs.".

SEC. 6. TRACKING AND EVALUATION REQUIREMENTS.

(a) SCHOLARSHIP PROGRAM.—Section 338A(i) of the Public Health Service Act (42 U.S.C. 254l(i)) is amended—

(1) in paragraph (3), by striking out "and" at the end thereof;

(2) in paragraph (4), by striking out the period and inserting in lieu thereof "; and"; and

(3) by adding at the end thereof the following new paragraphs:

"(5) the effectiveness in maintaining or increasing the interest in and commitment of individuals participating in the Scholarship Program to primary care and service to the underserved; and

"(6) the retention rate of participants in the Scholarship Program.".

(b) LOAN REPAYMENT PROGRAM.—Section 338B(i) of such Act (42 U.S.C. 254l-1(i)) is amended—

(1) in paragraph (3), by striking out "and" at the end thereof;

(2) in paragraph (4), by striking out the period and inserting in lieu thereof "; and"; and

(3) by adding at the end thereof the following new paragraphs:

"(5) the effectiveness in maintaining or increasing the interest in and commitment of individuals participating in the Loan Repayment Program to primary care and service to the underserved; and

"(6) the retention rate of participants in the Loan Repayment Program.".

SEC. 7. TRANSFER OF FUNDS.

Section 338G of the Public Health Service Act (42 U.S.C. 254q) is amended by adding at the end thereof the following new subsection:

"(c) TRANSFER OF FUNDS.—The Secretary may transfer funds between the Scholarship Program and the Loan Repayment Program as needed due to the availability of applicants for such programs.".

SEC. 8. ADMINISTRATIVE REVIEW.

The Public Health Service Act (42 U.S.C. 201 et seq.) is amended by inserting after section 336A the following new section:

"SEC. 336B. ADMINISTRATIVE REVIEW.

"Not later than January 1, 1993, the General Accounting Office shall complete an administrative review of the Corps including the administration of the Scholarship Program and the Loan Repayment Program.".

SEC. 9. AUTHORIZATION OF APPROPRIATIONS.

(a) NATIONAL HEALTH SERVICE CORPS.—Section 338(a) of the Public Health Service Act (42 U.S.C. 254k(a)) is amended to read as follows:

"(a) To carry out this subpart and section 338K, there are authorized to be appropriated $65,000,000 for fiscal year 1991, and such sums as may be necessary for each of the fiscal years 1992, 1993, and 1994, of which not less than 8 percent should be made available with respect to nurses, nurse practitioners, certified nurse midwives, physician assistants, psychologists, social workers, and other non-physician health providers.".

(b) SCHOLARSHIP AND LOAN REPAYMENT PROGRAM.—Section 338G(b) of such Act (42 U.S.C. 254q(b)) is amended to read as follows:

"(b) AUTHORIZATION OF APPROPRIATIONS.—

"(1) IN GENERAL.—There are authorized to be appropriated $63,900,000 for fiscal year 1991, and such sums as may be necessary for subsequent fiscal years, for scholarships and loan repayments under this subpart.

"(2) SET-ASIDE.—Of the amount appropriated under paragraph (1) for each fiscal year, the Secretary shall make available not less than 10 percent for scholarships and loan repayments under this subpart with respect to nurses, nurse practitioners, nurse midwives, physician assistants, psychologists, social workers, and other non-physician health providers.".

(c) STATE PROGRAMS.—Subsection (d) of section 338H of such Act (42 U.S.C. 254q-1(d)) is amended to read as follows:

"(d)(1) The Secretary shall use such sums as may be necessary from amounts available under section 338G(b)(1) to carry out the physician loan repayment program, and such sums as may be necessary from the amounts available under section 338G(b)(2) for loan repayment for nurses, psychologists, social workers, and other health professionals.

"(2) Nothing in this section shall prohibit a State from entering into multiyear contracts under this section.".

SEC. 10. GRANTS TO STATES FOR OPERATION OF OFFICES OF RURAL HEALTH.

Subpart III of part D of title III of the Public Health Service Act (42 U.S.C. 254l et seq.) (as amended by section 5) is further amended by adding the end thereof the following new section:

"SEC. 338M. STATE OFFICES OF RURAL HEALTH.

"(a) IN GENERAL.—The Secretary shall make grants to States in accordance with this section to enable such States to establish State Offices of Rural Health, or to assist existing State rural health offices, to engage in the activities described in subsection (d)(2).

"(b) AMOUNT OF GRANT.—

"(1) MAXIMUM AMOUNT.—The Secretary shall not make grants to a single State for a fiscal year under this section in an amount that is more than the quotient of the aggregate amount appropriated pursuant to subsection (g) for such fiscal year divided by the number of applications under subsection (f) that are approved for such fiscal year.

"(2) MATCHING REQUIREMENT.—Except as provided in paragraph (3), a State that receives a grant under this section shall provide an amount equal to the amount provided under such grant to establish, administer, or enhance the ongoing operations of the Office. Such amounts may be provided in cash or in-kind.

"(3) EXCEPTION.—To assist in the establishment of new rural health offices, for the first year of operation of a State Office of Rural Health, the Secretary may modify the matching requirement under paragraph (2) to the extent that the State shall contribute not less than $1 for each $3 of Federal funds provided.

"(c) LIMITATION ON USE OF GRANT FOR RESEARCH ACTIVITIES.—Each State receiving a grant under this section shall not use in excess of 5 percent of the amounts provided under such grant for research activities.

"(d) STATE OFFICES OF RURAL HEALTH.—

"(1) ESTABLISHMENT.—Each State that receives a grant under this section may establish, or continue the operations of, the State Office of Rural Health in a State agency, or through contract with a public or private educational institution or other organization, or any combination of the preceding entities, as determined by the State.

"(2) ACTIVITIES.—

"(A) DUTIES.—Each State Office of Rural Health established or operated under a grant made under this section shall—

"(i) provide leadership and advocacy for rural residents with regard to rural health;

"(ii) coordinate the activities of such Offices with Federal, State, local, and private health entities, and with the rural development activities of, and cooperate with, the Agricultural Extension Service;

"(iii) make recommendations to the Federal Office of Rural Health on improving the quality and cost effectiveness in the delivery of rural health care;

"(iv) identify Federal and State programs regarding rural health, and provide technical assistance to public and nonprofit private entities regarding participation in such programs;

"(v) prepare and submit reports periodically to the Office of Rural Health Policy concerning the activities of the office; and

"(vi) communicate and cooperate with rural health research centers established by the Federal Office of Rural Health Policy established under section 301.

"(B) OPTIONAL ACTIVITIES.—Each State Office of Rural Health established under a grant made under this section may—

"(i) assist rural areas in responding to changes in access to health care;

"(ii) plan and assist in the professional recruitment and retention of medical professionals and assistants in rural areas;

"(iii) improve community involvement in health care delivery through methods including the conduct of leadership development programs for the members of the community;

"(iv) improve rural emergency medical services;

"(v) improve access to health care in rural areas through innovative transportation and communications services;

"(vi) encourage the sharing of rural health care information;

"(vii) evaluate data on rural health conditions and needs; and

"(viii) provide technical assistance for rural hospital transition grants.

"(3) ANNUAL MEETINGS.—Representatives from each State Office of Rural Health that receives a grant made under this section shall meet annually with representatives from the Office of Rural Health Policy to share information and coordinate strategies for improving quality and cost effectiveness in the delivery of rural health care.

"(4) LIMITATION.—No amounts appropriated under subsection (g) shall be used for health planning uses of the type performed under title XV (as such title existed prior to January 1, 1987,) such as certificate of need programs.

"(e) STATE DEFINED.—As used in this section, the term 'State' means the 50 States.

"(f) REQUIREMENT OF APPLICATION.—The Secretary shall not make a grant under subsection (a) unless an application for the grant is submitted to the Secretary and the application is in such form, made in such manner, and contains such agreements, assurances, and information as the Secretary determines necessary to carry out such subsection.

"(g) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out this section, $3,750,000, for fiscal year 1991, and such sums as may be necessary for each of the fiscal years 1992 through 1994.".

SEC. 11. ADMITTING PRIVILEGES OF HEALTH CARE PROFESSIONALS.

Section 335(e)(1)(A) of the Public Health Service Act (42 U.S.C. 354h(e)(1)(A)) is amended—

(1) by striking out "or dentist member" and inserting in lieu thereof ", dentist, or other health care professional member"; and

(2) by inserting ", is authorized by State law to have such privileges," after "granting such privileges".

SEC. 12. GRANTS FOR HOME HEALTH ARE DEMONSTRATION PROJECTS.

(a) NUMBER OF GRANTS.—

(1) IN GENERAL.—Section 395(a) of the Public Health Service Act (42 U.S.C. 280c(a)) is amended by striking out "3, and not more than 5, grants to States" and inserting in lieu thereof "10, and not more than 50, grants to States or private entities.

(2) GRANTEES.—Section 395 of such Act (42 U.S.C. 280c) is amended by adding at the end thereof the following new subsection:

"(d) GRANTEES.—In making grants under subsection (a), the Secretary shall—

"(1) award five such grants to the grantees that received grants under such subsection as such subsection existed prior to July 1, 1989;

"(2) award not to exceed 50 percent of such remaining grants to private entities, who shall be considered in the same manner as a State for purposes of administering this subpart; and

"(3) award any remaining grants to States.".

(b) APPLICATION TO STATE CHIEF EXECUTIVE OFFICER.—Section 397(c) of the Public Health Service Act (42 U.S.C. 280c-2(c)) is amended—

(1) in paragraph (2), by striking out "and" at the end thereof

(2) by redesignating paragraph (3) as paragraph (4); and

(3) by inserting after paragraph (2), the following new paragraph:

"(3) include a certification that the applicant has provided he governor of the State in which the applicant resides with a copy of the application, and a certification that the governor of the State will submit comments to the Secretary concerning any such application at such time as the Secretary determines appropriate; and".

(c) MATCHING REQUIREMENT.—Section 396(b) of such Act (42 U.S.C. 280c-1(b)) is amended—

(1) in paragraph (1), by striking out subparagraph (C) and inserting in lieu thereof the following new subparagraph:

"(C) For the third and subsequent years of such payments to a State, the Secretary may not make such payments in an amounts exceeding 75 percent of the costs of such services."; and

(2) in paragraph (2), by striking out subparagraph (C) and inserting in lieu thereof the following new subparagraph:

"(C) for the third and subsequent years of such payments to a State, not less than $25 (in cash or in kind under subsection (c)) for each $75 of such Federal funds.".

(d) AUTHORIZATION OF APPROPRIATIONS.—Section 397(e) of the Public Health Service Act (42 U.S.C. 280c-2(e)) is amended by striking out "$5,000,000 for each of the fiscal years 1988 through 1990" and inserting in lieu thereof "such sums as are necessary in each of the fiscal years 1991 through 1994".

(e) REPORT.—Not later than 18 months after the date of enactment of this Act, the Secretary of Health and Human Services shall prepare and submit, to the appropriate Committees of Congress, a report concerning the effectiveness of programs that receive assistance under the amendments made by this section with regards to the objectives of such programs. The Secretary shall not decrease the amounts appropriated to carry out this section to complete such report.

SEC. 13. TECHNICAL AMENDMENTS.

(a) ASSIGNMENT OF PERSONNEL.—Section 333(h) of the Public Health Service Act (42 U.S.C. 254f(h)) is amended—

(1) in paragraph (1), by inserting "(M.D. and D.O.)" after "physicians"; and

(2) in paragraph (2), by inserting ", payment," after "utilization".

(b) COST SHARING.—Section 334(f)(2)(B)(ii) of such Act (42 254g(f)(2)(B)(ii)) is amended by inserting "payments or" after "third party".

(c) PROVISION OF HEALTH SERVICES.—Section 335 of the Public Health Service Act (42 U.S.C. 254h) is amended—

(1) in subsection (b)(1)(i)(II), by inserting "(M.D. and D.O.)" after "physicians";

(2) in subsection (c), by inserting "(M.D. and D.O.)" after "medical; and

(3) in subsection (e)(1)(A), by inserting "(M.D. and D.O.)" after "physician".

(d) LOAN REPAYMENT PROGRAM.—Section 338B of the Public Health Service Act (42 U.S.C. 254l-1) is amended in subsection (g)—

(1) by inserting "all" after "related expenses on" in paragraph (1);

SEC. 14. NATIONAL HEALTH SERVICE CORPS SCHOLARSHIP TRAINING PROGRAM DEBTS IN BANKRUPTCY NONDISCHARGEABILITY PROVISIONS.

(a) IN GENERAL.—Paragraph (3) of section 338E(d) of the Public Health Service Act (42 U.S.C. 254o(d)(3)) is amended to read as follows:

"(3) Any obligation of an individual under section 408(b) of the Health Professions Educational Assistance Act of 1976 (Public Law 94-484), or under this section may be released by a discharge in bankruptcy under title 11, United States Code, only if that discharge is granted after the expiration of the 5-year period beginning on the first date that payment of that obligation is required, and only if the bankruptcy court finds that the nondischarge of the obligation would be unconscionable.".

(b) EFFECTIVE DATE AND INTERPRETATION.—

(1) OBLIGATIONS UNDER SECTION 225.—With respect to obligations arising under section 225(f) of the Public Health Service Act (as that section existed prior to its repeal by section 408(b) of the Health Professions Educational Assistance Act of 1976 (Public Law 94-484)), the amendment made by subsection (a) shall apply to any bankruptcy proceeding in which the discharge of such an obligation has not been granted before 31 days after the date of enactment of this Act.

(2) OBLIGATIONS UNDER SECTION 338E.—With respect to obligations arising under section 338E of the Public Health Service Act, the amendment made by subsection (a) shall be effective upon the date of enactment of this Act, and shall not be construed as changing or affecting any right, liability, status, or interpretation (pertaining to any such obligation) which existed under such section 338E(d)(3) prior to such date of enactment.

SEC. 15. ESTABLISHMENT OF RURAL HEALTH CARE PROVIDER RECRUITMENT AND EDUCATION PROGRAM.

Subpart III of part D of title III of the Public Health Service Act (as amended by section 10) is further amended by adding at the end thereof the following new section:

"SEC. 338N. RURAL HEALTH CARE PROVIDER RECRUITMENT AND EDUCATION PROGRAM.

"(a) ESTABLISHMENT.—The Secretary shall establish a demonstration program to be known as the Rural Health Care Provider Recruitment and Education Program (hereinafter referred to in this section as the 'Program') to assist rural communities in recruiting and educating eligible individuals to serve as health care providers in such areas. The Secretary shall administer the Program through the existing grant program established under section 338H.

"(b) GRANTS.—

"(1) IN GENERAL.—The Secretary shall make grants under this section to States that meet the eligibility requirements for receiving grants under subsection (c) to share the costs incurred by local communities within such State, and by the State, in providing funds to eligible individuals.

"(2) PROHIBITION.—The Secretary may not make a grant under this section to a State that has not established a State loan repayment program under section 338H unless the State agrees, as a condition of receiving the grant, to designate a State agency to administer the program operated with the grant.

"(c) ELIGIBILITY.—

"(1) STATE APPLICATION.—

"(A) IN GENERAL.—To be eligible to participate in the Program established under this section, a State shall prepare and submit, to the Secretary, an application at such time, in such manner, and containing such information as the Secretary shall require, including—

"(i) the proposal of the State for providing assistance to local communities from amounts received under this section;

"(ii) the estimated expenses that the State expects to incur in providing technical and other assistance to local communities under this section based on the applications that the State receives under paragraph (2);

"(iii) an assurance that the State, shall only provide assistance from amounts received under this section to local communities submitting applications under paragraph (2) who desire to assist eligible individuals who are—

"(I) recommended by local sponsoring organizations within the rural community to be served; and

"(II) residents of the rural community to be served;

"(iv) an assurance that the State will contribute to local communities to which the State provides assistance under a grant awarded under this section, not less than 15 nor more than 25 percent of the cost associated with such local communities providing assistance to eligible individuals under this section;

"(v) an analysis of the potential use of health professions personnel in communities that desire to receive assistance from the State under this section;

"(vi) a determination by the State of the need within the local communities that desire to receive assistance from the State under this section for such health professions personnel;

"(vii) a determination of the extent to which such local communities will have a financial base to support the practice of such health professions personnel; and

"(viii) any other information determined appropriate by the Secretary.

"(B) CONSOLIDATION OF APPLICATIONS.—The application required under this paragraph may be submitted as part of the State application submitted under section 338H.

"(2) LOCAL APPLICATION.—A local community that desires to receive assistance from a State through a grant awarded under this section shall prepare and submit, to the State office that is responsible for the administration of the State loan repayment program established under section 338H within that State, an application at such time, in such form, and containing such information as the State shall require, including—

"(A) the identity and place of residence of the eligible individual for which the local community is providing assistance under this subsection and the relationship, if any, of the eligible individual to the local community;

"(B) the nature and estimated length of the education or training to be provided to such individual with assistance provided under this subsection;

"(C) the estimated costs of the education and training referred to in subparagraph (B), the amount of such costs that will be paid by the applicant, and the amount that the applicant desires to receive from the State under the Program;

"(D) assurances that such individual will comply with the requirements of subsection (e);

"(E) an assurance that the applicant will contribute local funds derived from non-Federal sources in an amount equal to not less than 50 percent nor more than 60 percent of the cost to be paid by the applicant, as described in subparagraph (C); and

"(F) any other information determined appropriate by the Secretary.

"(3) ELIGIBLE INDIVIDUALS.—To be eligible to receive assistance under this section an individual identified in the application submitted under paragraph (2)(A)(i) shall—

"(A) be recommended by a local community and enrolled, or accepted for enrollment, as a full-time student—

"(i) in an accredited educational institution, approved by the Secretary, in a program leading to a degree in medicine or osteopathic medicine;

"(ii) in an approved program leading to eligibility for licensure as a nurse midwife, nurse practitioner, or a physician assistant; or

"(iii) in an approved graduate program leading to eligibility for certification (or the State equivalent) as a nurse midwife, nurse practitioner, or a physician assistant;

"(B) prepare and submit to the local community an application (that shall be submitted to the State as part of the application of the local community under paragraph (2)(A)) to participate in the program established under this subsection; and

"(C) sign and submit to the local community and the State, at the time of the submission of the application, a written contract to serve for not less than 2 years, after licensure or certification, in the rural community, but in no event shall such applicant serve for a period of years that is less than the number of years in which the applicant was provided with assistance under this section.

"(d) USE OF FUNDS.—Amounts provided to a State under a grant awarded under subsection (b) shall be used to reimburse a local community for 25 percent of the costs associated with providing assistance to an eligible individual to enable such individual gain the medical or clinical education necessary to become a primary care physician, a nurse practitioner, a nurse midwife, or a physician assistant.

"(e) SERVICE BY INDIVIDUAL.—An individual that receives assistance under this section shall serve as a primary care allopathic or osteopathic physician (including a family practitioner, an obstetrician/gynecologist, a practitioner of internal medicine or pediatrics) a nurse midwife, a nurse practitioner, or a physician assistant in the rural community represented by the local community that provided assistance to the individual under this section. Such period may be in excess of 4 years if the local community and the individual agree.

"(f) FAILURE TO COMPLY.—The provisions of section 338E regarding the breach of a service contract shall apply to eligible individuals that enter into contracts to receive assistance under this section.

"(g) COORDINATION.—The State shall coordinate and be responsible for the recovery of any payments due from delinquent individuals under this section on behalf of localities and the Federal Government.

"(h) EVALUATION.—The Secretary, acting through the Health Resources and Services Administration, shall evaluate the impact of the program established under this section on the participation of primary care physicians and mid-level practitioners in the program established under this section and prepare and submit, to the appropriate Committees of Congress, a report containing the number of primary care physicians and mid-level practitioners, on a State by State basis, who participate on the program established under this section in the State.

"(i) DEFINITIONS.—As used in this section:

"(1) LOCAL COMMUNITY.—The term 'local community' means a local public or private nonprofit entity or combination of such entities, that is located in or serves a rural community.

"(2) RURAL COMMUNITY.—The term 'rural community' means a Federally designated health manpower shortage area or a medically underserved area designated by a State pursuant to section 338H, that is not within a metropolitan statistical area.

"(j) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out this section, $5,000,000 for fiscal year 1991, $10,000,000 for fiscal year 1992, and such sums as may be necessary for 1993.".

SEC. 16. EMERGENCY MEDICAL SERVICES FOR CHILDREN.

Section 1910(a) of the Public Health Service Act (42 U.S.C. 300w-9(a)) is amended in the first sentence—

(1) by striking out "not more than four";

(2) by striking out "in any fiscal year"; and

(3) by striking out "in such States".

SEC. 17. CONFORMING AMENDMENTS.

(a) UNIFORMED SERVICES HEALTH PROFESSIONS REVITALIZATION ACT OF 1972.— Section 2123(e) of title 10, United States Code, is amended by striking out "an area of health manpower shortage" and inserting in lieu thereof "a health professional shortage area".

(b) PUBLIC HEALTH SERVICE ACT.—

(1) Sections 303(d)(2)(B), 331, 333, 334, 335, 336(a), 336A, 338A, 338B, 338C, 338D, 338F(a)(1), 735, 741(f)(1)(C), 759(a), 781(a)(2)(B)(iii), and 822 of the Public

Health Service Act (42 U.S.C. 242a(d)(2)(B), 254d, 254f, 254g, 254h, 254h-1(a), 254i, 254l, 254l-1, 254m, 254n, 254p(a)(1), 294h, 294n(f)(1)(C), 294aa(a), 295g-1(a)(2)(B)(iii), and 296m) are amended by striking out "health manpower shortage area" each place such appears and inserting in lieu thereof "health professional shortage area".

(2) Section 332 of the Public Health Service Act (42 U.S.C. 254e) is amended—

(A) by striking out the section heading and inserting in lieu thereof the following:

"DESIGNATION OF HEALTH PROFESSIONAL SHORTAGE AREAS";

and

(B) by striking out "health manpower shortage area" each place it appears and inserting in lieu thereof "health professional shortage area".

(c) SOCIAL SECURITY ACT.—The Social Security Act is amended—

(1) in section 1156(b)(5) (42 U.S.C. 1320c-5(b)(5)), by striking out "health manpower shortage area (HMSA)" and inserting in lieu thereof "health professional shortage area"; and

(2) in sections 1833(m), 1842(b)(4)(F), and 1861 (42 U.S.C. 1395l(m), 1395u(b)(4)(F), and 1395x), by striking out "health manpower shortage area" each place it appears and inserting in lieu thereof "health professional shortage area".

(d) COMPREHENSIVE HEALTH MANPOWER TRAINING ACT OF 1971.—Section 202 of the Comprehensive Health Manpower Training Act of 1971 (42 U.S.C. 3505d) is amended—

(1) by striking out the section heading and inserting in lieu thereof the following:

"NATIONAL HEALTH PROFESSIONAL SHORTAGE CLEARINGHOUSE";

and

(2) in subsection (a), by striking out "Manpower" and inserting in lieu thereof "Professional".

(e) HEAD START ACT.—Section 645(a)(2)(B) of the Head Start Act (42 U.S.C. 9840(a)(2)(B)) is amended by striking out "health manpower shortage area" and inserting in lieu thereof "health professional shortage area".

NATIONAL EMERGENCY POLICY

PELL AMENDMENT NO. 2605

Mr. MITCHELL (for Mr. PELL), proposed an amendment to the bill (S. 324) to establish a national energy strategy for the United States that reflects concern for the global environmental consequences of current trends in atmospheric concentrations of greenhouse gases, and for other purposes, as follows:

S. 324 is amended by adding a new Title IV, Subtitle D as follows:

SUBTITLE D—UNITED NATIONS CONFERENCE

SEC. 431. 1992 UNITED NATIONS CONFERENCE ON ENVIRONMENT AND DEVELOPMENT.—

(a) FINDINGS.—The Congress finds that—

(1) the 1992 United Nations Conference on Environment and Development will play a crucial role in advancing efforts to protect the global environment;

(2) international preparations for 1992 Conference have already begun; and

(3) the effectiveness of U.S. participation in the 1992 Conference would be greatly enhanced by the establishment of a secretariat within the Department of state to coordinate U.S. preparations for the Conference.

(b) AUTHORIZATION.—There are authorized to be appropriated to the Secretary of State for fiscal year 1991, $350,000 for the purpose of establishing within the Department of State a secretariat to prepare for the 1992 United Nations Conference on Environment and Development. Such funds shall remain available until expended.

GORE (HATFIELD) AMENDMENT NO. 2606

Mr. MITCHELL (for Mr. GORE, for himself, and Mr. HATFIELD), proposed an amendment to the bill (S. 324) to establish a national energy strategy for the United States that reflects concern for the global environmental consequences of current trends in atmospheric concentrations of greenhouse gases, and for other purposes, as follows:

On page 236, line 19, delete "and"; on-line 23, delete the period and insert a semi-colon; and following line 23, insert the following:

"(4) explore mechanisms for assisting U.S. manufacturers, particularly smaller manufacturers, of energy-efficient and renewable energy technologies, in exporting their goods and services; and

"(5) increase staffing to support the new authority and responsibilities described in this section.".

On page 239, after line 11, insert the following new clause and redesignate clauses "(7)" and "(8)", as "(8)" and "(9)":

"(7) provide mechanisms for assisting U.S. manufacturers, particularly smaller manufacturers, of energy-efficient and renewable energy technologies, in exporting their goods and services;".

On page 239, redesignate section 415 as section 416 and insert a new subsection 415 of follows:

"SEC. 415. JOINT VENTURES IN DEVELOPING, DEMONSTRATING, AND MARKETING ENERGY EFFICIENT AND RENEWABLE ENERGY TECHNOLOGIES IN KEY LESSER DEVELOPED COUNTRIES.—

(a) FIVE YEAR PLAN.—The management plan under section 9(b) of the Renewable Energy and Energy Efficiency Technology Competitiveness Act of 1989 (Public Law 101-218), shall include a five-year implementation plan for:

"(1) pursuing joint ventures with United States manufacturers for the development, demonstration, or marketing of energy efficient and renewable energy technologies for application of use in key lesser-developed countries; and

"(2) providing mechanisms for assisting U.S. manufacturers, particularly smaller manufacturers of energy efficient and renewable energy technologies, in identifying and pursuing opportunities for sales or joint ventures.

In developing the implementation plan required under this subsection, the Secretary shall consult with the Agency for International Development.

"(b) The Secretary shall solicit proposals for joint ventures in the areas described in subsections (a)(1) and (a)(2) as if such joint ventures were required by, and subject to the requirements set forth in, section 6 of Public Law 101-218. The Secretary shall select a total of at least three joint ventures, except that the Secretary may reduce this requirement to the extent that the proposals received do not meet the Secretary's qualifications.

"(c) For the purposes of this section, a lesser-developed country shall be considered a key lesser-developed country if direct export or use of U.S. manufactured energy efficient and renewable energy technologies in such country is inhibited by cultural, or other factors.".

On page 416, after line 3, at the end of the redesignated section 416, add the following new subsection:

"(c) There is authorized to be appropriated for the purposes of section 415, in addition to the amount specified in sections (a) and (b), $1,000,000 for fiscal years 1992, 1993, and 1994.".

LIEBERMAN AMENDMENT NO. 2607

Mr. MITCHELL (for Mr. LIEBERMAN) proposed an amendment to the bill (S. 324) to establish a national energy strategy for the United States that reflects concern for the global environmental consequences of current trends in atmospheric concentrations of greenhouse gases, and for other purposes, as follows:

On page 194 after line 13 add the following:

"Subtitle C—Fuel Cells

"SEC. 221. AMENDMENT.—"Title V of the National Energy Conservation Policy Act (42 U.S.C. 8251-8261) is amended by adding the following new part after section 569:

'PART 5—FUEL CELLS

'SEC. 571. DEFINITIONS.—For purposes of this subtitle the term:

(1) "Federal building" shall mean "Federal building" as defined by section 549(6); and

(2) "Task Force" shall mean the Interagency Energy Management Task Force established pursuant to section 547, except that, for purposes of this subtitle, the term "Task Force" shall include the Environmental Protection Agency.

'SEC. 572. FUEL CELL PROGRAM.—The Secretary, in consultation with the Task Force, shall conduct a program to promote the early commercial application of fuel cell systems for the production of electricity by the demonstration of such systems in Federal buildings.

'SEC. 573. PURPOSES.—The purposes of this program are to:

(1) improve the efficiency and reduce the environmental consequences of the Nation's electric generation capability;

(2) stimulate the creation of new industries and job opportunties in efficient and environmentally sound energy technologies; and

(3) develop cost, efficiency, performance, environmental, and reliability data on fuel cell systems used in the production of electricity.

'SEC. 574. IMPLEMENTATION AND ACQUISITION.—(a) In preparing or updating the plan required by section 543(b)(1), each agency on the Task Force shall identify at least two potential projects for the demonstration of the application of fuel cell systems for the production of energy to satisfy electrical and other energy requirements of such buildings.

(b) Not later than 6 months after the submission to the Secretary of such plan, including the list of potential projects re-

quired under subsection (a), the Secretary, in consultation with the Task Force, shall identify a minimum of ten projects for implementation pursuant to subsection (c) and shall make a report of his selection including the basis therefor, to the Congress.

(c) The Secretary may provide financial assistance to agencies sponsoring projects. identified under subsection (b), to acquire and isntall fuel cell systems manufactured in the United States and any associated equipment which may be necessary for the implementation of any of the listed projects. In order to receive financial assistance from the Secretary, a project identified under subsection (b) must meet the ten-year payback criterion of section 543. The calculation of such ten-year payback period shall take account of cost benefits associated with cogenerated energy to the extent provided under section 544. In selecting qualified projects for financial assistance, the Secretary, in consultation with the Task Force, shall also consider the cost of the electricity to be generated; the extent of cost-sharing provided by other agencies for the acquisition of new equipment; the appropriateness of the locations sites, and structures in question; the adaptability of facilities to program requirements; whether Federal buildings undergoing new construction or renovation offer advantages of cost-efficiency or ease of installation over existing Federal buildings; and such other factors that, in the judgment of the Secretary and the Task Force, may affect the benefits or costs of the fuel cell program.

(d) Not later than January 1, 1996, the Secretary, in consultation with the Task Force, shall submit a report to Congress on the program authorized by this subtitle, which shall include information comparing the cost, efficiency, performance, environmental advantages, and reliability of fuel cells to other existing technological means of generating electricity, using data obtained from the operation of fuel cells acquired under this program. Such report shall also contain a discussion of all technical and economic issues which, in the judgment of the Secretary, might prevent the commercial use of fuel cells or restrict the use of fuel cells in certain applications, and an analysis, including recommendations, of the steps needed to overcome such restrictions. A copy of such report shall be provided to each agency for further implementation of fuel cell projects consistent with the provisions of section 543(a), as appropriate.

'SEC. 575. AUTHORIZATION.—There is authorized to be appropriated to carry out the provisions of this subtitle a total of $15,000,000 for fiscal years 1992 through 1994.'.".

DOMENICI (AND OTHERS) AMENDMENT NO. 2608

Mr. MITCHELL (for Mr. DOMENICI, Mr. WIRTH, Mr. MCCLURE, Mr. REID, Mr. MCCAIN, Mr. BRYAN, Mr. CRANSTON, Mr. WILSON, Mr. HATFIELD, Mr. SYMMS, Mr. HARKIN, Mr. DECONCINI, Mr. PACKWOOD, Mr. ADAMS, Ms. MIKULSKI, Mr. SHELBY, Mr. HOLLINGS, Mr. HATCH, MR. JEFFORDS, Mr. SANFORD, Mr. GARN, Mr. LIEBERMAN, Mr. MURKOWSKI, Mr. DASCHLE, Mr. ROBB, and Mr. AKAKA) proposed an amendment to the bill (S. 324) to remove the regulatory barriers for solar, wind, and geothermal electric energy generation contained in the Public Utility Regulatory Policies Act of 1978, as follows:

At the end of title II add the following new subtitle:

"Subtitle C—Solar, Wind and Geothermal Electric Power Production

"SEC. 221. PURPA AMENDMENTS.—Section 210 of the Public Utility Regulatory Policies Act of 1978 is amended as follows:

"(a) In subsection (a), strike out ", and to encourage geothermal small power production facilities of not more than 80 megawatts capacity,".

"(b) In subsection (e)(2), insert "(other than a qualifying small power production facility which is a solar, wind or geothermal facility as defined in section 3(17)(E) of the Federal Power Act)" after "facility" where it first appears, and by striking out ", or 80 megawatts for a qualifying small power production facility using geothermal energy as its primary energy source,".

"SEC. 222. FEDERAL POWER ACT AMENDMENTS.—(a) Section 3(17)(A) of the Federal Power Act is amended by inserting "a facility which is a solar, wind or geothermal facility, or" after " 'small power production facility' means".

"(b) Section 3(17) of such Act is further amended by inserting at the end thereof the following new subparagraph:

" '(E) "solar, wind or geothermal facility" means a facility which produces electric energy solely by the use, as a primary energy source, of solar energy, wind energy or geothermal resources;".

"SEC. 223. FERC REGULATIONS.—(a) Within 30 days of the date of enactment of this Act, the Federal Energy Regulatory Commission shall issue such proposed modifications to its regulations as may be necessary to implement the amendments made by this subtitle, and within 90 days of such date, the Commission shall issue final regulations.

"(b) Until regulations described in subsection (a) are final and effective, any solar, wind or geothermal facility (as defined in section 3(17)(E) of the Federal Power Act), which is a qualifying small power production facility as defined in subparagraph (C) of section 3(17) of the Federal Power Act (as such section 3(17) is amended by this Act), (A) shall be considered a qualifying small power production facility under part 292 of title 18 of the Code of Federal Regulations, notwithstanding any size limitations contained in such part, and (B) shall not be subject to the size limitation contained in section 292.601(b) of such part.

"(c) The provisions of Subtitle C shall apply to a solar, wind or geothermal facility only if either of the following is submitted to the Federal Energy Regulatory Commission during the two year period beginning on the date of enactment of this Act:

"(1) an application for certification of the facility as a qualifying small power production facility; or

"(2) notice that the facility meets the requirements for qualification.".

JOHNSTON AMENDMENT NO. 2609

Mr. MITCHELL (for Mr. JOHNSTON) proposed an amendment to amendment number 2608, proposed by Mr. DOMENICI (and others) to the bill S. 324, supra, as follows:

Amend the amendment proposed by Mr. Domenici et al. by: (1) adding ", waste" after the words "solar, wind" at every point at which the words appear in the amendment; and (2) adding ", waste resources" after "wind energy".

MCCLURE AMENDMENT NO. 2610

Mr. MITCHELL (for Mr. MCCLURE) proposed an amendment to amendment number 2608, proposed by Mr. DOMENICI (and others) to the bill S. 324, supra, as follows:

On page 2, line 29, following the word "if" insert ": (1)".

On page 3, line 2, strike "1" and insert in lieu thereof "A".

On page 3, line 4, strike "2" and insert in lieu thereof "B".

On page 3, line 5, following "qualification" insert the following: "; and (2) construction of such facility commences within five years of the date of such application or notice and reasonable diligence is exercised towards the completion of such facility taking into account all factors relevant to the construction of the facility."

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON FOREIGN RELATIONS

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Friday, August 3, immediately following the first rollcall vote after 2 p.m., in our Capitol office S-116, to hold a brief business meeting to vote on pending nominations: Mr. Edward William Gnehm, Jr., of Georgia, to be Ambassador to the State of Kuwait; Mr. Townsend B. Friedman, Jr., of Illinois, to be Ambassador to the People's Republic of Mozambique; Mr. Kenneth Noel Peltier, of Texas, to be Ambassador to the Federal and Islamic Republic of the Comoros; Ms. Genta Hawkins Holmes, of California, to be Ambassador to the Republic of Namibia; and Mr. Edwin D. Williamson, of South Carolina, to be Legal Adviser of the Department of State.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON EDUCATION, ARTS, AND THE HUMANITIES

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Subcommittee on Education, Arts, and the Humanities of the Committee on Labor and Human Resources be authorized to meet during the session of the Senate on Friday, August 3, at 10 a.m., for a hearing on the problems confronting the Higher Education Assistance Foundation.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FOREIGN RELATIONS

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Friday, August 3, at 10 a.m., to hold an ambassadorial nomination hearing on Ryan Clark Crocker

to be Ambassador to the Republic of Lebanon.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON PRIVATE RETIREMENT PLANS AND OVERSIGHT

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Subcommittee on Private Retirement Plans and Oversight of the Internal Revenue Service of the Committee on Finance be authorized to meet during the session of the Senate on August 3, 1990, at 9:30 a.m., to hold a hearing on S. 2901, the Employee Benefits Simplification Act, and S. 2902, the Church Retirement Benefits Simlification Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

THE "BETTS" TALKS

● Mr. METZENBAUM. Mr. President, I want to advise the Senate regarding the thus far disappointing nature of our negotiations on S. 1511, the Older Workers Benefit Protection Act. Senators PRYOR, JEFFORDS, and myself sought compromise when we drafted this bill.

That's why we worked closely with the EEOC and with staff from Senators HEINZ, DOMENICI, GRASSLEY, and others before introducing the bill.

We then sought compromise when we marked up the bill in committee.

That's why we made a series of probusiness changes, some of which were very hard for the senior citizen groups to swallow.

For the past 2 months, we have been talking with representatives of the business community and with staff from Senators HATCH and KASSEBAUM. We want to reach a negotiated solution.

But I am frank to say I do not see the same sense of urgency on the other side.

When the Civil Rights Act of 1990 was debated by the Senate last month, my colleagues from Utah and Kansas were unhappy because they felt the bill came to the floor without an adequate effort to work out our differences.

But if we are to work out our differences, both sides must be willing to stand up and take risks, and to make negotiated solution a top priority. We will never get a negotiated bill if the other side follows the lead of the business community, which simply wants to kill this bill, but killing this bill is not a solution.

There are millions of older Americans who are deeply troubled because their employee benefits have been jeopardized. They will not stand for being discriminated against in employee benefits. They will not stand for the two-tier benefit structure that the Supreme Court inexcusably allowed in Betts.

My staff and others have spent countless hours trying to address employer concerns, but time is growing short, and we have yet to see a bottom line from the employer side.

I want the Senate to understand the intent of the sponsors.

We have 43 cosponsors, and I believe we will have 60 votes for cloture on this bill if necessary.

If we do not achieve a compromise solution over the August recess, I will find a way to bring this bill to the floor soon after we return.

I hope it will not be necessary to force votes on this bill, but it has been more than a month since Senator PRYOR and the majority leader urged those Senators with concerns to sit down and work out their problems.

Millions of older Americans want their benefits protected.

They are watching us; they are looking to the U.S. Senate to protect their interests. We must not fail them.●

BETTS LEGISLATION

● Mr. HEINZ. Mr. President, more than 12 months ago I introduced legislation to overturn the U.S. Supreme Court decision in Public Employees Retirement System of Ohio versus Betts, and to make clear Congressional intent to protect the rights of older workers. To date, I regret to say that congressional inaction has resulted in thousands of workers being denied equal rights in the workplace. This, despite months of negotiations between my staff, those of Senator PRYOR, METZENBAUM, JEFFORDS, HATCH, other congressional staffs, representatives of the administration, and the business community, I find that no real progress has been made.

Today U.S. district and circuit courts across the United States have dismissed case after case based on the Supreme Court's decision in Betts. As each case is dismissed, the many rights of older workers now and in the future are further eroded.

Mr. President, congressional inaction is choking off the rights and protections of older workers. This inaction is being fuelded, to some degree, by those in the business community and their lobbying organizations, who are creating hysteria over this issue—many of whom want to push the Age Discrimination in Employment Act [ADEA] into a closet and lock the door. There are some in the business community who want to use this legislation to further erode the rights and protections of older workers that were fought for and won on this very Senate floor.

Mr. President, it is time for the Senate to stand up and be counted and send a clear and unequivocal message to the business lobby and to the U.S. district and circuit courts judges; Congress will enact legislation this year to overturn the Betts decision. This Senator is committed to taking whatever legislative steps are necessary to ensue that the rights of older workers are not compromised.●

THE FUTURE OF OUR SUBMARINE PROGRAMS

● Mr. DODD. Mr. President, while in the Defense authorization debate just completed we did not spend much time discussing our submarine programs, the future of our submarine industry is one of the pivotal questions of our adaptation to the new strategic and political realities of the world.

My colleagues are about to return to their States for a few weeks, and perhaps they will find some time to catch up on readings. I strongly recommend that they include an incisive article from a recent issue of Forbes about the continuing robust Soviet efforts to modernize and expand their underwater forces.

I ask that the article be printed in the RECORD.

The article follows:

THE ULTIMATE WEAPON?

(By Subrata N. Chakravarty)

John Keegan, the brilliant British military historian, recently wrote: "The submarine . . . is the instrument of ultimate nuclear deterrence between the superpowers, holding at risk their cities, industries and populations as it circles their shores. It is now also the ultimate capital ship, deploying the means to destroy any surface fleet."

Just as in World War II, when the carrier replaced the battleship as queen of the sea, Keegan recognizes that nowadays the modern nuclear submarine holds primacy not only over aircraft carriers but even over land-based intercontinental ballistic missiles as the ultimate means of delivering destruction.

But who cares about ultimate weapons? Soviet President Mikhail Gorbachev has declared peace and the U.S. Congress is busy debating how to spend the peace dividend.

Well, even with the Soviet economy in collapse, Moscow clearly cares about ultimate weapons, submarine warfare in particular. While the Soviets junk tanks and demobilize infantry, Moscow's spending continues strong on advanced jet fighter technology, on satellites, on ships and missiles and submarines, especially submarines. U.S. intelligence officials have concluded that Soviet submarine construction shows no signs of slowing. This year the Soviets are expected to add at least nine submarines to their undersea armada, as against three for the U.S. What's more, the latest generation of Soviet subs is far more capable—and deadly—than the ones that went before it.

Glasnost or not, the Kremlin would dearly love to have the ability to slip submarines undetected off U.S. shores and lock the subs' nuclear missiles onto American cities and factories at such short range that no warning would avail. Superquiet Soviet subs could also easily interdict the sea-lanes that tie the U.S. to the rest of the world. Not that the Soviets plan to use such power, but having it would be a bargaining card that

could affect the world balance of power. Says Captain Richard Sharpe, editor of the authoritative Jane's Fighting Ships: "I believe that the Soviets would have no difficulty at all in getting sufficient nuclear attack submarines out into the Atlantic to bring the West to its economic knees." The Soviets understand the power game, even if the U.S. doesn't.

Nor is submarine technology out of reach of vicious dictatorships like those in Syria and Libya. Modern submarines—albeit run not by nuclear power but by electric and diesel engines—are purchasable on the open market. And that could be dangerous for the U.S.

But, of course, the Soviet threat is the clearest. A few years back one of the finest U.S. attack subs, the *Augusta*, moving along in its quietest mode, was tracking a Soviet Sub. Suddenly, the *Augusta* hit another object. That other object was never officially identified, but one naval analyst swears that it was a second Soviet sub—likely laden with ballistic missiles. He reasons that this Soviet sub was so silent that the *Augusta* had no idea it was even there. Offered that version of the incident, Vice Admiral Daniel Cooper, assistant chief of naval operations for undersea warfare, sits back in his Pentagon office and smiles. But he steadfastly refuses to discuss the matter.

A U.S. naval authority once described modern submarine warfare in these terms: Imagine a room as large as a football field but pitch-black and with thick carpeting. Inside the room, two people armed with daggers stalk one another. The one with the quietest threat and most acute hearing has the better chance to win, because he detects his opponent before the opponent detects him. A flash of a blade and the battle is over.

A submarine in the Atlantic or Pacific Ocean seems an even smaller object than a person in a pitch-dark room the size of a football field. The first submarine to slip through the enemy's antisub defenses delivers its missiles and torpedoes first.

For decades American submarines have held a distinct advantage over the Soviets'—in technology and capability, and perhaps most important, in their ability to move silently and to detect the presence of an enemy craft. But now there is a feeling that the U.S. advantage is shrinking.

An indication of how seriously both sides take submarine warfare can be seen from the fact that the three most recent U.S. Navy chiefs of naval operations are all submarine veterans: Admiral James Watkins, 63, who went on last year to become Secretary of Energy, Admiral Carlisle Trost, 60, who retired last month and Admiral Frank Kelso II, 56, who has just assumed the post.

Another veteran submariner is Soviet fleet admiral Vladimir Chernavin, 62, who is now in charge of the entire Soviet navy. Chernavin commanded one of the Soviets' first nuclear submarines, which put to sea in the late 1950s.

Despite all Gorbachev's vexing problems, he has one clear advantage when it comes to military spending. He can decide which military programs to trim and which ones to keep strong, and he can make his decisions on the basis of strategy and technology rather than on pork-barrel strategy and domestic politics. His bustling submarine program indicates he is doing just that.

The U.S. Congress and the Pentagon, by contrast, are dithering about U.S. defense policy. Neither is willing to make the tough decision about future needs. Many congressmen, pre-occupied with saving defense jobs in their home districts, seem to be leaning toward cutting all the defense services equally. While the Soviets trim fat and flab from their military spending, we seem intent on cutting muscle as well—all the while keeping everybody's trough full.

Right now one of the most curious elements of Soviet submarine technology is in an unusual Volkswagen-size pod on the tail of the Soviets' newest attack submarines. The U.S. Navy and some civilian naval analysts think it houses an awkwardly designed sonar device. But others view it as far more ominous. Captain William Ruhe, until recently editor of the Alexandria, VA.-based magazine *Submarine Review*, and Commander Richard Compton-Hall, a British naval analyst and author, among others, believe the pod *(see pictures, p. 91)* to be a magnetohydrodynamic (MHD) propulsion system. That is the system that Tom Clancy called the caterpillar drive in his bestseller *The Hunt For Red October*, the book from which this spring's hit movie was adapted.

Based on a powerful superconducting magnet, such a drive has no moving parts, so it will allow a submarine to move in virtual silence. The U.S. is doing some low-level research in the field, and the Japanese are working on it for commercial applications. But the Soviets are known to be working intensively on it. "The U.S. Navy is not interested in MHD propulsion because they don't believe it's feasible," says Ruhe. "Therefore, they don't believe the Russians could be working on it."

The pod's real purpose probably will not be known for years. But the idea that it is a result of poor design seems implausible. "Whatever it is, they're clearly happy with where it is," says a naval analyst and foremer submariner, pointing out that it first appeared on a sub launched in 1978. His point: A design flaw could easily have been corrected when the next generation of Soviet submarines appeared in 1983.

From the start, the Soviets and the U.S. have had completely different philosophies about designing submarines. The Soviets stressed speed, diving depth and survivability in battle—meaning the ability to take a hit and not sink. [Survivability is the reason all Soviet subs today have double hulls.) The U.S., on the other hand, has emphasized silence, reactor safety, and more silence. "Quieting is *the* most important aspect of submarines," declares Vice Admiral Cooper. "You talk about stealth. We were stealthy before we could even spell it right." Two people groping for each other in a blackened room.

The Soviets may have benefited from their early failures. What that means is that the first U.S. submarine design was so successful that the U.S. stayed with it. The Soviets weren't as lucky, so they have been more adventurous, experimenting with different propulsion systems, designs and materials to explore different capabilities. In the past two decades the Soviets have built about 20 different classes of submarines, according to Norman Polmar, an authority on the Soviet navy; the U.S. has built just 3. Says a former CIA analyst, "The Soviets say the Americans successed their way to mediocrity."

Until the late 1970s the Soviets didn't seem to care much about being quiet. But their Victor III-class attack sub, which first appeared in 1978, was significantly quieter than earlier subs. There followed in 1985 the Akula-class attack submarine, 350 feet long and believed to be titanium-hulled. The Victor III was 15 years behind the best sub in the U.S. fleet in quietness; the Akula-class sub narrowed that gap considerably. Admiral Lee Baggett Jr., former commander of NATO forces in the Atlantic, reportedly said in 1986 that the quietness gap "has now been narrowed to three or four years at the maximum."

Some, including John Engelhardt, a naval architect and former U.S. Navy analyst, believe that the next generation of Soviet submarines, due out before the end of this decade, will stay close on America's heels, perhaps with the use of active sound cancellation techniques—producing white noise to mask the noises that could be picked up by passive sonar. That could neutralize the principal advantage of U.S. submarines, which is highly advanced listening equipment.

All this illustrates an important point about the Soviet Union: While its economy is a mess and its industrial production primitive, the society is capable of high-technology achievements. If the milk is diluted, polluted and watery, the cream can be quite rich. Time after time, the U.S. Navy and intelligence community have underestimated Soviet undersea advances, dismissing new features as ineffective, misapplied, impossible or just plain stupid, only to find later that they served a purpose in the Soviet navy that the U.S. simply hadn't understood.

Whatever it has done elsewhere in the Soviet Union, perestroika has had little effect on the periscopes. The Soviets' sixth Delta IV was launched just last year, for example, and there is no end to the construction program in sight. A ballistic missile sub, the Delta IV carries 16 SS-N-23 missiles, each with up to 10 independently targeted reentry vehicles, each of which is capable of destroying a reinforced target like a missile silo. That missile's U.S. counterpart, the Trident II, was just fitted onto a submarine for the first time this spring, and the Trident program could be slashed before it gets much further. Each missile costs $25 million, and the peace dividend, after all, has to come from somewhere.

According to Jane's Fighting Ships, the Soviet's active submarine fleet has 131 nuclear-powered attack subs. These are designed to attack ships and enemy submarines but are capable as well of hitting shore targets within a limited range. The Soviets also have 136 diesel-electric subs and 63 nuclear-powered ballistic-missile-carrying subs, for a total of 330 submarines. Opposing that massive force are 91 U.S. attack subs (8 of which will be retired under the current defense budget and 34 ballistic missile subs. Vice Admiral Cooper feels he needs a fleet of 100 active attack subs and 24 ballistic missile subs.

Until fairly recently it was believed that the American edge in quality compensated for the Soviet lead in numbers; now many are not so sure. "If you ask which is better, a U.S. surface ship or naval aircraft or its Soviet counterpart, there is no argument, the U.S. is ahead," says Polmar. "But with submarines, there's a debate." Admittedly, many of the Soviet submarines are obsolete ships built in the 1960s, but they still represent a formidable force. Moreover, Rear Admiral Thomas Brooks, director of naval intelligence, recently told Congress that virtually all of the subs Gorbachev has been publicly "retiring" are, in fact, inactive reserve subs which haven't seen service in more than a decade.

In 1988 the Soviets launched eight submarines—four nuclear and four diesel-electric, according to Rear Admiral Brooks. Last year another nine subs were launched. And so far in 1990, says Vice Admiral Cooper, four nuclear submarines have already been launched. Another five or six submarines of various types are expected by the end of the year.

By comparison, the U.S. Navy commissioned four submarines last year and will add another three to the fleet this year.

Yet U.S. sub programs are under threat from the budget ax. At an initial cost of some $2 billion, the cost of the Navy's new Seawolf-class attack submarine is admittedly staggering. The Navy is planning for the cost to decline some 40% in constant dollars as the submarine class begins steady production at the General Dynamics shipyard in Groton, Conn., and at the Tenneco shipbuilding operation at Newport News, Va. The Navy hopes to build 29 of the Seawolf subs, the first of which will join the fleet in 1995. But between post-Cold War euphoria and severe budgetary constraints, it is a particularly tough time to be pitching an expensive sub program on Capitol Hill.

Ultimately the Seawolf class will be built because there is no other design on the drawing boards. But the likelihood of all 29 being built is remote at best. Stretching out the program is poor economy, because as the numbers decline, the cost per sub rises sharply.

Even submarines do not operate in a vacuum. They can be defended against. It was, after all, development of the destroyer and later of antisub aircraft that helped the Allies to counter the Germans submarine menace in both world wars. Faced with the vastly improved Soviet subs, the U.S. Navy has designated antisubmarine warfare as its highest priority in fighting wars.

But here too the competition is growing more fierce. For years, noisy Soviet subs were easily detected by passive sonar sensors (which detect sound without emitting any) embedded in the ocean floor, carried on submarines and surface ships, and dropped from aircraft. Once again, the U.S.' very success made it complacent and overly dependent upon passive sonar technology.

The Soviets, faced with having to detect extremely quiet U.S. submarines, have spent years working on nonacoustic detection systems: tracking submarines by the disturbances they create in magnetic and electrical fields and the minute wake and thermal energy they emit as they move through the ocean. Although U.S. interest in such detection systems has increased, the research remains only marginally funded and the Soviets retain a lead, according to experts.

The U.S. does, of course, pose a threat to the Soviet Union with its own submarines. That's why the Soviets keep seeking agreements limiting sea-launched cruise missiles—to negate the flexibility and capability of the U.S. sub fleet. Peace may be at hand, but Gorbachev, like a prudent leader, measures, capabilities rather than speeches and good intentions.

If the U.S. lets the Soviets get ahead in underwater warfare, it will be putting at risk the most effective leg of its strategic triad. Rear Admiral Brooks has testified that the Soviets probably won't be able to detect U.S. ballistic subs anytime in the 1990s. But by the year 2000, when the Soviets might well be able to find U.S. submarines, the U.S. will have 70% of its nuclear retaliatory capacity traveling undersea, and some of our subs will be a noisy 20 years old. The Soviets, meanwhile, are likely to continue building highly capable, increasingly quiet submarines in large numbers. They will push without stint their antisubmarine development.

In the concluding chapter of his The Price of Admiralty, John Kegan wrote: "Command of the sea in the future unquestionably lies beneath rather than upon the surface." Especially for a nation as dependent upon maritime power as is the U.S. Can any sensible person believe that a mere shift in command of the Kremlin makes control of the seas irrelevant?●

OREGON HEARINGS ON STATUS OF WILD SALMON RUNS

● Mr. PACKWOOD. Mr. President, yesterday I submitted for the RECORD the testimony from the first three of seven hearings I held across the State of Oregon on the possible effects of listing certain species of Columbia and Snake River salmon as threatened or endangered under the Endangered Species Act. Today, I would like to submit the testimony from the remaining four hearings for the RECORD. The material follows:

TESTIMONY OF JAMES S. O'BANION, EXECUTIVE DIRECTOR, PORT OF HOOD RIVER

The Port of Hood River was created in 1933 as a result of the Bonneville Dam Project and has remained a vital force in the economic development and well-being of our community for the ensuing 57 years. Our location along the Columbia in the heart of the Columbia River Gorge gives us a unique appreciation of the river and its importance to our entire region.

The Port of Hood River stands firmly behind the multiple use concept for the Columbia/Snake River System. The system was developed for multiple use purposes and each of the federal projects on the system were authorized for multiple use purposes. Those multiple uses include power generation, irrigation, flood control, navigation, fish and wildlife and recreation.

The Port of Hood River believes that all uses for which the system was developed must be protected and preserved. We recognize that Columbia River salmon are a valuable resource and an important part of the heritage of the Pacific Northwest. The Port of Hood River supports continued biological studies to determine the status of the various species of fish in the Columbia and Snake Rivers. The port advocates an open process in conducting the biological status review.

We further believe that solutions should not be suggested, recommended, or imposed until after the biological review is completed. Only after the status is determined, only if the best scientific review determines protection is required, and only after the causes are determined, should solutions be developed. Those solutions should be developed embracing the multiple use concept and take all recognized uses into account.

The Port of Hood River appreciates this opportunity to present our comments. Thank you.

TESTIMONY OF GLENN TAYLOR, GLENN TAYLOR & ASSOCIATES

Thank you for the opportunity to meet with you today and talk about the possible impact of the proposal filed with the NMFS with regards to Columbia and Snake River salmon runs.

Information to date appears to be somewhat limited on the subject. My concerns as a City of Hood River Councilor and area business person would center around possible economic effect.

1. River access or flowage controls should not be at a time that reduces recreational use of the river (i.e. windsurfing, boating, etc.).

2. Increased flows should not be to the detriment of existing Hydro electric power productions putting further demand on nuclear and fossil fuel generation.

3. Agricultural community should not be further jeopardized by reducing available irrigation water supplies.

4. This issue should not be allowed to grow to the proportion that the spotted owl/old growth timber issue has. The Northwest and Oregon cannot afford another spear in the side of our long overdue economic rebuilding.

Thank you again Senator for the opportunity to have input on this issue.

TESTIMONY OF TED STRONG, EXECUTIVE DIRECTOR, COLUMBIA RIVER INTER-TRIBAL FISH COMMISSION

Senator Packwood, thank you for the opportunity to testify on the subject of the recent petitions requesting protection of Columbia River salmon under the Endangered Species Act. My name is Ted Strong and I am the executive director of the Columbia River Intertribal Fish Commission. As you know, the commission was founded by the confederated tribes and bands of the Yakima Indian Nation, the confederated tribes of the Warm Springs Reservation of Oregon, the confederated tribes of the Umatilla Indian Reservation, and the Nez Perce Tribe. The Commission was formed to supply its member tribes with technical assistance in their management of Columbia River Fisheries.

People are expressing a renewed concern over the fate of Columbia River salmon. A little more than 10 years ago this same concern was expressed and the same question was asked: Should salmon of the Columbia River Basin be protected under the Endangered Species Act? Our tribal perspective, however, predates these recent events. Because of this history, I come before you now with a sense of urgency and frustration. Urgency because certain stocks of salmon have continued to decline in the last ten years; frustration because the tribes' request to bring salmon back to the Upper Columbia River have been ignored for too long.

When the United States negotiated treaties with the Columbia River Tribes, the salmon ran full in the rivers of this basin. The daily lives of our ancestors revolved around the return of each run. The Creator blessed each changing season for our people with the runs of Chinook, Sockeye, Coho and Steelhead. The return of each fish run was welcomed with ceremony, prayer, and celebration. It was because of the culturally unique role that salmon held that each tribe, by treaty, reserved to itself the right to fish at all "usual and accustomed" fishing places. These places are sacred and are named to commemorate their special place in Indian life. As part of the treaties, cessions of these great lands were made by the Indians to the United States. These cessions were based upon the promise of the United States that the tribes would always retain their fishing rights.

Over the course of the last hundred years, much of the salmon resources has been lost due to habitat destruction, lack of fish production programs, and other factors. As more people moved to the Pacific Northwest, the salmon resource faced increasing pressure from the non-Indian commercial fishery and other activities. Tribes were forced to go to court to protect their right to fish.

But those fights were not the greatest obstacles that the tribes have faced. Many stocks of salmon were irretrievably lost as, one by one, dams were built in the Great Columbia River Basin, blocking access to salmon spawning grounds for hundreds of miles. Now, more than 30 percent of the salmon habitat has been destroyed by dams, with additional habitat degraded by mining, timber harvesting, pollution and other activities. The remaining habitat is underutilized by fish because of inadequate passage at the dams, poor flow, and incomplete fish production programs.

Since the formation of the Columbia River Inter-Tribal Fish Commission in 1977, gravel-to-gravel management has been its most important fishery management policy. By this we mean the protection of the salmon resource at each stage of its life cycle. By the 1970's, many public agencies in the northwest had written off the Upper Columbia River salmon, in favor of hydropower development, irrigation and other industrial development. Much of the tribes' efforts therefore focused on harvest regulation, and getting upriver runs recognized as management priorities in harvest, production, and habitat actions. We are hopeful that others now share that priority with us.

I do not come here to mourn the past or repeat the well-known list of what has caused the declines in the salmon. I want to ensure that the U.S. Government honors its promise to the tribes. For their part, the tribes have succeeded in creating a coordinated harvest management system that accounts for fisheries harvest throughout the range of the fish. The tribes took the lead in the push that led to the United States-Canada Pacific Salmon Treaty. Through litigation, the tribes have seen to it that a management plan is now in place on the Columbia River so that the inriver harvest of salmon is controlled. These harvest management regimes have produced a coastwide system of accountability for harvest of Columbia River Fish. As part of that system, fishery and fish run information is continually updated and improved so that rebuilding of chinook is not hindered by harvest management actions. The tribes are committed to regulating their harvest to support rebuilding. But the fishery restrictions cannot rebuild the runs alone. Even in the virtual absence of harvest, stocks such as Snake River, Coho, Sockeye and Chinook will not rebuild to healthy, productive levels.

The tribes do not control the flow of water in the rivers, or the operation of the dams. Nor have the tribes controlled the fish production decisions. Over the past 50 years, fish losses have been most devastating in the Upper Columbia River Basin, but the necessary fish hatcheries were located below the dams, in the lower Columbia River. As a result, the Willamette, and other downstream rivers, have secure, productive fisheries and fish runs. This fish production management decision is a continuing source of our frustration, especially since there are many, many, rivers in the Snake River system and elsewhere, which still have high quality fish habitat, but no fish. Those productive streams remain barren of fish because the necessary hatchery mitigation programs were either never authorized by Congress, or, those that were authorized were incorrectly operated. The dilemma of today's "hatchery versus wild fish" debate is a direct result of those failures.

It is the tribes' position that reprogramming existing hatcheries and building new ones are some of the management tools which will be needed to restore upriver salmon. But those facilities will have to be operated so that they augment, not replace, the natural stocks. This issue of hatchery reform has been led by the tribes, and has resulted in considerable debate because of its political as well as biological implications. We anticipate that this debate will continue, but practical, and biologically appropriate solutions can and must be implemented without further delay. We have already waited nearly 10 years for that implementation to occur. It is a sad comment that in that timeframe, Snake River, Coho, and Sockeye have been allowed to become functionally extinct.

In addition to harvest controls and fish production reform, the waters of the rivers must flow in sufficent quantities, and they must flow clear and clean. The mainstream dams are part of the environment in which the salmon must now exit. Better survival of fish through the mainstem Snake and Columbia Rivers is clearly a fundamental priority.

The tribes have longstanding recommendations for improving Salmon Survival in the mainstem Columbia and Snake Rivers. In 1981, the tribes submitted to the Northwest Power Planning Council an independent mainstem flow proposal that would have increased fish survival, particularly in the Snake River. Our proposal was designed to accomplish a key objective: To accelerate the travel time of juvenile Snake River fish to the ocean, thereby improving their survival. The tribal water budget proposal was rejected by the NPPC in favor of a compromise position. After the council adopted its compromise position, the tribes petitioned the NPPC to reconsider that action. The NPPC denied the tribes' petition, but stated that the tribal recommendation merited further consideration. We were asked to support their action on a trial basis. Since that time, even the flows in the NPPC compromise position have not been achieved. It is difficult to support further compromises, given the poor results of the first compromise as evidenced by continuing low returns of certain stocks.

Regarding the related issue of water spill at the hydroelectric dams, the tribes also have a longstanding position. Water spill is necessary at those dams where structural bypass systems are not present, or are ineffective. Until recently, the spill has not been provided. And we are still troubled by delays in bypass facility construction at The Dalles and Ice Harbor dams. However, we are gratified for the support of Senator Packwood, and others in the northwest delegation, to secure funding for bypass construction despite the Corps of Engineers objections.

The actions I briefly described in the areas of fish production reform, flows, habitat protection, and harvest management are the same actions we have been seeking for the past decade, and longer. Regardless of whether any fish is listed under the Endangered Species Act, the tribes will continue to seek and support actions which promote the rebuilding of each of the river runs. The tools for restoration are available. It is for our children, and our legacy that we must take the necessary actions without further delay.

TESTIMONY OF ZANE JACKSON, CONFEDERATED TRIBES OF THE WARM SPRINGS RESERVATION OF OREGON

Good morning, Senator Packwood. My name is Zane Jackson. I am Chairman of the Warm Springs Tribal Council and I am here today to testify on behalf of the Confederated Tribes of the Warm Springs Reservation of Oregon concerning the recent petitions to list certain Columbia River salmon stocks under the Endangered Species Act.

These petitions will require an examination of many complex scientific and legal issues.

In addition to the primary job of evaluating the biological status of the Columbia River Salmon runs and identifying the reasons for the decline of certain stocks, the inquiry will also have to look at how the Endangered Species Act applies to the unique biological characteristics of anadromous fish.

For example, the upper Columbia River spring chinook run is made up of fish originating from the river's mainstream above Bonneville Dam and from dozens of its tributaries in Oregon, Washington and Idaho. Some of these fish were raised in hatcheries, some have always spawned in the wild, and some presently spawn in the wild but were originally from hatchery stocks. Can any of these myriad stocks comprising the upriver spring chinook run be treated as a separate "species" entited to protection under the Endangered Species Act, or does the term "species" apply only to the run as a whole? And how does the Act deal with the enormous migratory range of these fish and their constant intermingling with other chinook stocks during the course of their migration?

The petitions raise other questions that are unique to Warm Springs and the other Columbia River treaty tribes. For example, what is the legal relationship between the Endangered Species Act and the fishing rights reserved under our 1855 Treaty and confirmed by the United States Supreme Court as the supreme law of the land? In the area of harvest regulation, what does the Endangered Species Act add, if anything, to the existing authority of the tribal governments, and state and federal fisheries agencies to regulate both Indian and non-Indian fishing for conservation purposes?

While the Endangered Species Act petitions raise many new and difficult issues, there is nothing new about the Warm Springs tribe's involvement in fisheries enhancement efforts.

The Warm Springs tribe has been working to preserve, protect and rebuild the Columbia River salmon resource for literally thousands of years. Our people are Columbia River people. Prior to the Treaty of June 25, 1855, which led to the creation of the Warm Springs Indian Reservation, our ancestors lived along the Columbia River and its Oregon tributaries between Cascade Locks in the west and Willow Creek, near Arlington, Oregan on the east. Our tribal culture and spiritual life was then, as it is now, based on salmon and other natural foods. For that reason, our forefather specifically reserved in our 1855 Treaty the right to continue to take fish at all of our usual and accustomed places in the Colum-

bia River basin, no matter how far they may be from the Warm Springs Reservation. From time immemorial until the present day we have used our inherent sovereign powers to regulate our harvest of the Columbia River salmon to ensure that future generations of our people will benefit from this magnificent resource.

There is no higher priority for the Warm Springs Tribal Council than the protection and preservation of our treaty fishing rights. For decades, we have been actively involved in a broad range of activities aimed at preserving and enhancing the tribe's treaty fishing rights and the salmon resources on which the rights are based.

For many years, we were forced to litigate against the states in order to establish the validity of our treaty fishing rights. In recent years, our litigation efforts have taken us downriver and into the ocean and as far north as Alaska in an effort to control the harvest of our salmon so that enough fish will return to the Columbia River to perpetuate the runs and allow our tribal fishermen to exercise their treaty rights.

Our litigation efforts have also led to a court-approved negotiated agreement in *United States* v *Oregon* that aims to rebuild depressed upriver salmon and steelhead stocks through a combination of production changes and harvest restrictions.

We have also been active in the successful effort to negotiate an international treaty between the United States and Canada to rebuild depressed chinook salmon stocks originating from both countries.

Under the Northwest Power Act, we are part of the regional effort to implement the Power Planning Council's Fish and Wildlife Program that calls for doubling the Columbia River salmon and steelhead runs.

Lately, the Warm Springs tribe has devoted a great deal of attention to the role of the federal hydropower system in rebuilding the Columbia River salmon runs. We were involved in litigation challenging the Bonneville Power Administration's expansion of its transmission intertie with the southwest that ultimately led to an agreement providing for improved spill benefitting juvenile salmon migration at several of the Columbia and Snake River dams. We have also been negotiating with BPA and the Army Corps of Engineers concerning the installation of mechanical fish bypass systems at the dams, and the use of Canadian reservoir capacity to benefit fish migration in the upper Columbia River basin.

Finally, we have focused much of our efforts to protect and restore the salmon resource on our own reservation and in the salmon-producing tributaries of our traditional sovereign territory, such as the Deschutes River, Hood River and John Day River systems. Our efforts over the last decade to rebuild the Deschutes River wild spring chinook stock, which originates almost entirely in the Warm Springs River system on the reservation, have involved extensive habitat improvement efforts and, when necessary, harvest restrictions. These efforts have resulted in a much improved Deschutes River spring chinook run, which has benefitted both Indian and non-Indian fishermen. We have had similar success in improving the John Day River wild spring chinook stock.

We are also concerned about the issue of genetic integrity that is the motivating force behind the petitions to list certain wild stocks. Preserving and maintaining genetic integrity has been the goal of our tribe for many years. This is demonstrated by our Warm Springs National Fish Hatchery Operational Plan which allows only natural spawning spring chinook into our tributaries. All Warm Springs hatchery fish, 100 percent of which are marked to distinguish returning hatchery fish from natural stocks, are maintained as brood stock for the hatchery while allowing for infusion of 10% of the naturally spawning spring chinook into the hatchery stock.

The 100 percent marking of all hatchery fish has been insisted upon by our tribal fisheries managers. We view this practice as a method of protecting natural production of native spring chinook stocks while using hatchery production as only a supplement to the natural producers.

Over the years, our efforts to protect and rebuild the salmon resource on which our treaty right is based have taught us several lessons. One of these lessons is that the effort to protect and rebuild salmon stocks must be a cooperative one involving all of the tribal, state, federal and international agencies having management authority over the many activities that affect the health of the salmon resource. These activities range from harvest regulation to water management to habitat protection to hydro system operation. We have also learned that the salmon resource is an exceptionally complex one and that there are no easy answers to questions about why certain salmon stocks have declined and what is the best way to rebuild them.

We see the Endangered Species Act petitions as one among many recent efforts aimed at solving the problems of certain Columbia River salmon stocks. However, it remains to be seen whether the Endangered Species Act is the best approach to the problem. One thing we do know is that our commitment to the protection of our treaty fishing rights and to the preservation and enhancement of the salmon resource on which the treaty right is based is absolute and unwavering. We therefore intend to take an active role in the process that has been initiated by the Endangered Species Act petitions, as well as in all other activities that promote rebuilding of the Columbia River salmon resource.

Thank you very much.

Testimony of Forrest L. Meuret, Oregon Wildlife Federation

It is distressing that we hold separate hearings on so intertwined environmental considerations as the health of the salmon runs, clean water and air, and timber vs owl. Ultra clear, cool, steady and pristine water, the kind that flows mostly from good owl habitat and clean air, is the first requirement in the life of the salmon.

Unlike the owl, the salmon is not only an indicator species, but it is of enormous value all by itself, and its continued existence is just one sample of why the spotted owl is used as an indicator. When we start running short of breath and/or food and water capable of sustaining life, then those jobs dependant on eliminating the last remaining bit of our pristine qualities will not seem so important. Unemployment is not forever, but extinction is.

If and when the ultimate disaster does happen, and we don't know how much it takes to "tip over" our atmospherical processes, it will befall loggers, environmentalists and politicians alike. The penalty for world wide overpopulation and recklessness with our environment could be very, very high.

Oregon first found it necessary to regulate the harvest of salmon from the Columbia in 1878. The resource was over exploited long before dams were even a dream or agriculture or logging became serious factors. It still is. Commercial fishermen, like loggers, seem to really believe since they are just making a living, they couldn't actually be doing that much harm. From the Asiatic drift (gill)nets in Mid Pacific to our own Columbia below Bonneville (drift) gillnets (same indiscriminate killers) need to be reined in and hung up to stay. They do not lend themselves to a totally selective fishery, that would allow the unharmed release of nontarget or endangered species. If the commercial fishery were to develop a terminal harvest and/or a totally selective harvest system, it wouild go far to permit the continued taking of more plentiful runs in the face of an endangered listing. It is time for them to do it. The longer we procrastinate in making needed adjustments, the tougher the cuts will be. Why not now?

We need to get the terms "trade off" and "incidental catch" out of the vocabulary of the agencies regulating the commercial fishery. There are just too many of the weaker runs using the same river at the same time as the stronger, harvestable runs.

Listings are undoubtedly necessary, but we can surely soften the blow with proper preparation. The recreational fishery takes less than 5% of the fish taken in the Columbia system, and they can, and do, release nontarget fish with a high rate of survival.

If we can't extract our living from this earth without diminishing it, we are indeed in deep trouble!!

Testimony of Merritt Tuttle, National Marine Fisheries Service

Mr. Chairman and Members of the Committees: Thank you for inviting me here today to discuss the National Marine Fisheries Service's (NMFS) role in implementing the Endangered Species Act (ESA). I am Merritt Tuttle, Endangered Species Coordinator of the National Marine Fisheries Service Northwest Region, National Oceanic and Atmospheric Administration (NOAA), U.S. Department of Commerce. The NMFS has responsibility for living marine and estuarine resources and anadromous fish.

I propose to address three major issues today: first, the actions that have led to our review of certain stocks of salmon under the Endangered Species Act; second, the legal requirements of the ESA; and third, the actions that NMFS has taken to date to carry out its obligations and the review process we have developed.

NMFS RESPONSIBILITY AND PETITIONS RECEIVED

NMFS is responsible for ESA actions regarding marine fish and certain marine mammals. Since some species of fish, such as anadromous fish, occur both in fresh and marine waters, a Memorandum of Understanding (MOU) between the U.S. Fish and Wildlife Service and NMFS was developed to designate the agency responsible for ESA action on those species. Under the MOU, the NMFS was made responsible for salmon and steelhead.

Within a three-month period, NMFS received five petitions to list certain Columbia River salmon stocks under the Endangered Species Act. First, on April 2, 1990, a petition was received from the Shoshone-Bannock Indian Tribes to list sockeye salmon in the Snake River, Idaho. Then, on June 7, 1990, four petitions were received from Oregon Trout and other co-petitioners to

list Snake River spring, summer, and fall chinook salmon and lower Columbia River coho salmon.

LEGAL ACTIONS REQUIRED UNDER THE ESA

Once NMFS receives a petition to list a species or population, the ESA requires specific actions with regard to the listing process. Briefly, these actions require that NMFS acknowledge receipt of the petition within 30 days of receipt. Within 90 days of receipt, NMFS must announce whether the petition presents substantial scientific or commercial information that a listing may be warranted. If a petition is found to present such information, NMFS must promptly commence a status review of the species concerned. That status review must be based solely upon biological information relating to the species in question. All time references are based upon the date a petition is received by the Secretary of Commerce, or his designee.

If a petition is accepted and a review of the status of the stock is conducted, then within one year of receiving the petition, NMFS must determine whether the petitioned action to list is warranted. If a listing is warranted, NMFS must promulgate a proposed rule to implement the listing action. Within two years of receiving the petition, or within one year of the proposed rule, NMS must determine whether the species is threatened or endangered and promulgate a final rule.

ACTIONS UNDERTAKEN BY NMFS TO DATE ON PETITIONS

A number of actions involving anadromous fish have occurred recently in the Pacific Northwest. In February, NMFS staff independently began an informal status review of sockeye salmon in the Salmon River, Idaho (a tributary of the Snake River).

On April 2, 1990, the Shoshone-Bannock Tribes petitioned NMFS to list sockeye salmon in the Snake River system of Idaho. On June 9, 1990, we published a notice in the Federal Register announcing that this petition presented substantial information and warranted a status review. We are now soliciting information and comments on the status review from concerned entities throughout the region.

On June 7, NMFS received four petitions from Oregon Trout and co-petitioners (Oregon Natural Resources Council, Northwest Environmental Defense Center, the Oregon and Idaho Chapters of the American Fisheries Society, and American Rivers) to list Snake River spring, summer, and fall chinook salmon and lower Columbia River coho salmon. A determination whether to conduct a status review on these populations will be made within the 90-day time period required by the Act (September 5, 1990).

The ESA requires listing decisions to be based solely on scientific and commercial information concerning the biological status of the population in question. During the status review, there is no basis for speculation as to the ultimate outcome of the review or the likely impacts of a decision to list. Consequently, NMFS has avoided such speculation.

To date, there has been little need to develop basic procedures for evaluating the status of anadromous fish under the ESA. Therefore, NMFS is requesting information and currently investigating certain basic biological questions relating to salmon under the ESA. We have two working papers out for widespread scientific review and comment. The first one deals with how to apply the ESA's "species" definition to anadromous fish; and the second addresses how to determine thresholds leading to threatened or endangered status. Responses were due by July 2, 1990. A third working paper dealing with artificial propagation of anadromous fish under the ESA will be distributed soon.

In addition to the broad questions addressed by the working papers, site-specific genetic and biological information on Snake River sockeye is being compiled through a contract with the Idaho Department of Fish and Game. NMFS will continue to collect information from various research and monitoring studies currently underway.

NMFS has been overwhelmed by requests for Columbia River water users for involvement in the process. To reason to these requests and to insure that we obtain all available information, we have developed an open system to provide public access to the record and have established a process that includes their participation.

The scientific information used in the status review will be deposited in our administrative record and will be available for inspection by the public. To help insure the scientific record is complete, we have established a Technical Committee comprised of representatives from state fish and wildlife agencies, other Federal agencies, Indian tribes, public utilities and other interested entities. This Committee will help gather information and discuss the validity of the data base. These committee meetings will be open to the public.

We also have established a Biological Review Team of NMFS scientists and managers to undertake the review. They will seek additional scientific expertise as needed. They will develop preliminary recommendations and the supporting documentation.

We believe that additional expert opinions will be valuable. To assist us we will appoint a "peer" group of academic and other scientists to help analyze certain data or review certain conclusions of the review team.

Within the Northwest Region, we have appointed an Internal Coordinating Committee to assist in the many logistical tasks that develop during the review process. This body develops and coordinates the review process. The NOAA General Counsel for the Northwest Region serves on this Committee to ensure legal consistency. Recommendations relating to listing developed by the Biological Review Team will be submitted to the Regional Director for evaluation and forwarding to Washington, D.C. for a final decision on listing. If there is a proposed rule to list any petitioned species as threatened or endangered, the ESA calls for one public hearing if anyone requests it within 45 days after the proposed rule's publication. It would be my preference to hold more than one public hearing depending on interest at the time. If there is a proposed rule, these hearings would likely occur in late spring of 1991.

In closing, we thank the host for this opportunity. We are optimistic that this hearing will lead to greater understanding of the process which NMFS will allow in proceeding toward an orderly conclusion of this matter.

TESTIMONY OF JOHN W. KEYS III, BUREAU OF RECLAMATION

Mr. Chairman, I am John Keys, Regional Director for the Bureau of Reclamation's Pacific Northwest Region. I appreciate the opportunity afforded today to emphasize the deep interest that the Bureau has in activities related to endangered species considerations for Columbia and Snake River salmon.

For almost ninety years the Reclamation Program has been an integral part of the Pacific Northwest. Today, we are a primary manager and operator of Federal water projects in Idaho, Oregon, Washington, and western Montana. We have responsibility for 60 storage reservoirs with a combined storage capacity of nearly 25 million acre-feet. Main stem Columbia River operations are greatly influenced by our facilities at Grand Coulee and Hungry Horse. Our Minidoka, Palisades, Boise, and Payette Projects in southern Idaho control of much of the Snake River water resource.

Irrigation water serves over 3 million acres of farmland with an annual gross crop value of nearly $2 billion.

Hydroelectric powerplants produce an annual average of over 24 billion kilowatt-hours of electricity, almost three times Seattle's annual power consumption.

Over nine million recreational visits a year are now being enjoyed by the public at our facilities.

The projects provide a portion of local and regional flood control.

While there are many positive aspects that result from the projects, their development earlier in the century had negative aspects such as the impacts upon the anadromous fishery.

Today, we are greatly aware of the competition surrounding the region's water supply and the needs of the region's valued fishery. We recognize and are responding to these challenges by blending traditional project values like irrigation and power production with other values like fish and wildlife enhancement, public recreation, water conservation, streamflow restoration, and storage system optimization.

We are actively participating with the Northwest Power Planning Council, Bonneville Power Administration, Federal and state fishery agencies, Indian nations, and others to improve conditions for salmon and steelhead. We are doing this by providing improved streamflow conditions and modern fish passage and protective facilities in the Yakima and Umatilla Projects. Most recently, we initiated a pilot program for the subordination of generation at our two Yakima Project powerplants to make it possible to improve streamflows for salmon and steelhead. We continue to cooperate in meeting water budget objectives through our Grand Coulee and Hungry House operations as a way to assist migrating juvenile fish on the Columbia River.

While we are attempting to respond to changing needs, the statutory, contractual, and institutional requirements under which we operate must be recognized.

The water services that we provide are regulated by specific project authorizations, hundreds of contracts and agreements with water user groups and resource agencies, and provisions of state water rights held in conjunction with our projects.

Project authorizations specify the purposes for which projects are to be operated and generally allocate water supplies among different uses. Through the years, as demands have increased, we have emphasized flexibility in the operation of our projects to achieve a higher level of multipurpose benefits.

We have mandated repayment requirements on 36 Federal water projects in the

Pacific Northwest and these encompass literally hundreds of contracts and agreements with water user groups and individuals.

We have in excess of 500 water rights held in conjunction with our projects. These rights stipulate the uses of the water in accordance with state water laws.

Senator, our responsibilities in managing the region's water resources require that we have an appropriate and direct involvement in activities related to endangered species considerations for Columbia and Snake River salmon. It is premature today for us to speculate what specific impacts future endangered species actions might have on our project operations and water service obligations. We do know, however, that there is potential for major effect if reallocations of the region's water supply are involved.

In the course of our project planning, development, and operations activities, we have gained significant expertise and experience that we would like to cooperatively "bring to the table" in the current endangered species considerations. It is necessary for the Bureau to be represented in appropriate coordinating activities addressing this important issue. We will continue to cooperate with the National Marine Fisheries Service and other Federal and state agencies to achieve this goal.

Thank you.

Thank you for giving me the opportunity to speak to you on this issue of significant concern to the region.

I'm testifying today on behalf of my company, Northwest Aluminum here in The Dalles, which is a member of Direct Service Industries Inc., a coalition of 11 aluminum and chemical producers throughout the Northwest.

The DSIs have been operating in this region for 50 years and represent more than 40 percent of the nation's aluminum production. Also numbered among the DSIs are producers of other metals and of chemicals vital to the region's pulp and paper industry. We employ about 11,000 people in the region, and pump more than $1 billion into the Northwest economy every year.

Over the years we have enjoyed a strong, mutually beneficial relationship with the Bonneville Power Administration. Electricity sales to the DSIs generate one-third of BPA's annual revenues. As ratepayers of BPA, we participate in the region's fish program in a significant way. Our industries have contributed approximately $350 million to the fish progam since its inception in 1981. Altogether, the region's ratepayers have invested $1 billion in the fish program since passage of the Northwest Power Act in 1980.

We support the Northwest fish program and will continue to do so. We have been directly involved in helping the Power Planning Council design an effective fish program. This program is beginning to achieve the results envisioned by Congress in the Power Act.

Notwithstanding the excellent progress that has been made, there may be problems relating to some fish species that have not been adequately addressed. We do not prejudge this issue. It is our intention to participate cooperatively in the National Marine Fisheries Service (NMFS) process. Properly conducted, the NMFS process can tell us whether there are species in trouble. It can also provide a basis for dealing with any outstanding problems on a case-by-case basis.

Our desires for the process are twofold:

First of all, because of the complex biological questions surrounding this issue, we want to see NMFS conduct an open fact-finding process that all river users can participate in, whether it be through participation in technical review or through submittal of scientific information. To this point Mr. Schmitten and his staff have been cooperative and open to our concerns. If the coming process is to be credible such cooperation must be maintained.

Secondly, if problems with specific fish runs are identified as a result of the fact-finding process, they must be corrected in equitable fashion. In other words, all relevant river users must participate in the recovery plan. This plan must contain measures that are proven to be effective, and, as I said, they must address the specific run in question.

I urge you to monitor the endangered species process closely. The questions that must be answered are extremely complex. The remedies, if such are required, will also be complex. But I do not believe there is any reason for alarm. The Council, BPA, its customers, the fish agencies and the tribes have been working together for many years. This new process creates a new forum, but we are well acquainted with the issues. The issues are manageable.

TESTIMONY OF ERNEST TIBBETS, PRESIDENT, LOCAL 9170, UNITED STEELWORKERS OF AMERICA

I do not feel that I am qualified to speak on the hazards facing our salmon population nor am I qualified to address the implications of providing additional protection for certain species.

However, I am qualified to speak on the economics of plant closures and the effect that it has on communities and individuals.

In December of 1984, The Dalles smelter closed its doors, putting hundreds of people out of work and over a period of twelve months (one year) thousands of people were out of jobs. Businesses were closing, left and right, putting more and more out of work. Over 1,200 homes were up for sale, rentals stood empty. People were moving out of state and looking for jobs.

People who had worked all their lives, lost everything in a matter of months—homes, cars, boats and many filed bankruptcy. Bills piled up—no jobs and things were bad. Personal lives were effected—divorces, family problems. The Dalles and surrounding areas got worse each day. The Dalles never really hit bottom, but it was on a steep downward mode when we opened Northwest Aluminum Company.

The Dalles plant closed because of high power rates. We need a steady flow of power to keep our plant operating and to cut off or reduce our power supply will kill our plant, as well as others, and will cause wide effects throughout this State.

If The Dalles plant closes again—it will be removed and we at this plant, will become the Endangered Species!

There has been a lot of money spent on the plant site to clean it up—Martin Marietta has spent millions and Northwest Aluminum has, in three years of operation, spent millions on a new recycle pond system.

I do feel that more in-depth scientific study should be done on the Columbia and Snake rivers before any further determination is made.

Federal government—States—business and labor, all can work together to solve this problem.

TESTIMONY OF LARRY TROSI, OREGON FARM BUREAU

We have followed and commented with great interest on all of the proposed listings of Endangered Species in the past several years. Although we are extremely concerned with the recent listing of the Spotted Owl as threatened, and its affect on agriculture, we feel that the listing of certain Chinook, Sockeye and Coho Salmon runs will have a much higher degree of impact on agriculture.

The Oregon farmer and rancher has borne the brunt of the responsibility and costs for protecting listed species. Farmers and ranchers are required to forego use and development of their private property and federal grazing allotments in order to protect possible habitat for listed species. With the Endangered Species Pesticide Labeling program now being proposed by EPA, it would also deny farmers and ranchers the use of other necessary and effective products in producing crops under the guise of protection of listed species.

At the same time, the Oregon Farm Bureau and our membership recognize the need to protect listed species. Since the Endangered Species Act is primarily for the public benefit, we believe that costs for protecting these species must be borne by the general public, not by farmers or ranchers or by any one industry. Clearly, the economic impacts of endangered species management must be taken into account. There must be some balance between the listing and management of these species and the economic effects on farmers and ranchers.

Specifically, our concerns relating to the current proposal have to do with the protection of private property rights. One concern is with the flow augmentation that may be required during salmon runs. If listed, we feel this will have the ability to restrict or take away existing water rights of irrigators along the Columbia River. This could apply to permitted and vested, contracted or uncontracted for water at varying times throughout the year. Although uncontracted water is not a given, it does allow farmers the flexibility to manage their production and types of crops grown. In time of drought, uncontracted water has been carried over to the following year in many cases and lessens the potential dramatic affect a drought could have in this region.

Other Agricultural practices may be limited through the Endangered Species Pesticide labeling program. To date this program has not been finalized, but is being held within EPA. This program as proposed by EPA did not take into account any economic assessments, habitat maps were not accurate and alternatives to pesticide use were not given enough consideration. There is a long list of pesticides and their active ingredients which as determined by EPA will affect different species of fish. Although salmon have not been identified as having the same susceptibility to these chemicals, several species of trout have been listed as being in jeopardy if coming in contact with these commonly used agriculture chemicals. This would indicate that similar restrictions on the use of agriculture chemicals would be implemented.

We feel a recent proposal by Senator Hatfield to develop a management plan immediately to avert possible listing has merit. This could achieve the same objective without having the major economic effects as listing these salmon as threatened or endangered. It would allow all affected parties the

opportunity to possibly adjust their operating procedures within a recovery plan. In most cases farmers and ranchers are more receptive to "regulation" if they are involved in the decision making process. This recovery plan could incorporate a "citizens advisory committee" which would represent the various affected industries within the Columbia River area.

TESTIMONY OF PAUL SCHANNO (FOR TERRY WITT)

Senator Packwood, my name is Paul Schanno and I am here today to present comments prepared by Oregonians for Food and Shelter (OFS), regarding the potential listing of the Columbia and Snake River salmon as a threatened or endangered species.

OFS is a non-profit, grass roots coalition of individuals, businesses and organizations in Oregon and the Pacific Northwest. It is headquartered at 567 Union Street in Salem, Oregon. OFS members support activities which promote the efficient and environmentally sound production of food and fiber to meet the expanding demands of a growing world population.

Senator, you and your staff are to be commended for the time and effort you all have given to hold seven Senate field hearings in five days across our state. If we could somehow transplant your level of concern and commitment to the other legislators on Capitol Hill in Washington D.C., I have no doubt we'd already have a workable solution to the "Endangered Species Dilemma" we continue to face in the Pacific Northwest.

We do appreciate all that you are doing and for the opportunity today to address this issue of critical importance to our entire region. On behalf of OFS and all Oregonians, I thank you.

Senator, as you know from your past dealings with OFS, the two core principles upon which OFS operates are first, that any decision or action which impacts our members must be supported by valid scientific data, and two, that it must represent a balanced and reasoned approach. My comments today, will not deviate from those organizational principles.

So there is no doubt in anyone's mind, let me first say that OFS recognized the significance and importance of the Columbia and Snake Rivers fishery resource to the overall quality of life in the Pacific Northwest, both directly and indirectly. We do not wish to see populations of any species reduced to the point of endangerment and extinction, whether that be a Columbia River salmon or the spotted owl.

These major waterways of the Northwest, however, provide much more than habitat for fish. This system, like other natural resource systems, has been managed under a multiple use concept. It is the vital source of water for millions of people. Uses include private consumption, agricultural irrigation, commercial product and raw material processing, navigation and transport of materials, power generation, flood control, and recreation—as well as habitat for fish and wildlife species.

Unfortunately, we also know from painful, first-hand experience, that decisions regarding the listing of an organism under the Endangered Species Act do impact far more than the target species it is attempting to protect.

We also know that these decisions are currently made in a vacuum, narrowly looking at only the petitioned species, with no attention or concern paid to the impact on the human species. It is to this end that a more balanced approach must be established—one which weaves science and economic reality into a workable solution.

Any plan or program which could impact or regulate the use of this essential resource, must consider all uses and user rights. Any program adopted which does otherwise, would create economic devastation in this region and would literally be felt around the world. As serious as the projected spotted owl impacts may be, the potential effects of listing the Columbia and Snake Rivers as an endangered or threatened species habitat would be like comparing a ripple to a tidal wave. Let me give you an example to illustrate this point.

One likely outcome of listing the salmon as an endangered or threatened species and therefore the Columbia River as a critical habitat area, would be to stop the dredging of the shipping channel. This single act would prohibit the large ships used for international trade from accessing the 465-mile Columbia/Snake River system, the second largest cost-efficient, navigable waterway in this country.

Every year more than 2,000 ships call the ports along this system. In 1989 they carried 15 million tons of cargo to and from foreign countries—more tonnage than handled at any other port on the West Coast, including the Bay area.

The river's deep water ports of Astoria, Kalama, Longview, Portland and Vancouver maintain a positive trade balance, exporting $6.2 billion and importing $6 billion annually. More than one-third of all grain exported from the U.S. goes out through the lower Columbia River system.

The Port of Portland estimates that the trickle-down effect of the maritime industry in the Portland area alone is worth approximately $1 billion annually.

When one looks at the potential direct and indirect impacts on agriculture, forestry, manufacturing, processing, power generation, and all related services industries, it is clear that the decision to list and subsequent regulatory prohibitions would have enormous economic ramifications on every person in this region. The price we will pay for an unwise decision will be extremely high. Therefore, it is imperative that it be based on sound information.

OFS does not pretend to have the scientific expertise in fish biology necessary to make definitive pronouncements or to present startling, new data regarding the species petitioned for listing. Based on previously submitted testimony by experts on this subject, it can be clearly stated, however, that not all experts agree with the positions taken by the petitioners regarding these fish species.

Concern for the enhancement and preservation of anadromous fish on this multistate waterway system is not new. Congress has recognized that salmon run sizes were declining in the 1970's. As such, a variety of private and government programs have been underway at the state, regional and federal levels for more than a decade now. It is interesting to note that utility ratepayer dollars have been funding fish hatcheries, ladders, and screens to mitigate the impacts of federal hydropower dams on the Columbia River since 1937.

While most would agree that results of many enhancement efforts to date have not been overwhelming, and that some specific fish counts in a given year may have been depressed—recent data covering the past five year period would seem to indicate that trends in fish numbers are showing a positive change, not a decline.

Some experts also claim that much of the concern raised about decreased fish counts is based on examination of subspecies or subpopulations—and that when the species as a whole is considered, the numbers do not indicate that the species is threatened or endangered at all. While OFS believes that subdivision is being used, the overall strategy goes well beyond this tactic.

At previous public hearings, many were shocked when OFS quoted March 5, 1988 transcripts from the Sixth Annual Western Public Interest Law Conference held at the Universeity of Oregon School of Law in Eugene, Oregon. These quotes clearly document that the Endangered Species Act and other well-intended laws are being used to achieve other agendas by certain, special interest environmental groups. I believe it is most appropriate that portions of that transcript be brought to light here.

In that conference, their specific agenda was to stop the logging of old growth forests. But by simply inserting a blank line into the strategy outlined, you quickly see how it applies equally well to other preservation or obstruction goals. The strategy was explained like this:

"Until legislation is adopted which protects _____, we need at least one surrogate, if you will, that will provide protection for the _____. A surrogate must have three qualities to be a good surrogate. First, it must be unique to _____ (the desired area of impact); secondly, it must be measurable using scientific methods; and third, it must, of course, enjoy some amount of statutory protection."

At the conference, Andy Stahl, the resource analyst for the Sierra Club Legal Defense Fund in Seattle, Washington, explained it this way, (I am quoting directly): "Well, as the strategy for protecting old-growth matured, it appeared that wildlife would offer the most fruitful hunting grounds for a surrogate that meets the three criteria * * *" (Page 15 of transcript).

"Well, the northern spotted owl is the wildlife species of choice to act as a surrogate for old-growth protection, and I've often thought that thank goodness the spotted owl evolved in the Northwest, for if it hadn't, we'd have to genetically engineer it. It's a perfect species for use as a surrogate." (Page 15–16)

"* * * there are four statutes that are being used to delay the harvest of old-growth forests. The first, and to date the most important of these has, of course, been NEPA. We have used NEPA to compel the agencies to admit that the spotted owl might go extinct." (Pages 17–18) "That admission, then, is used to litigate two additional statutes. First, the Endangered Species Act, and second, the National Forest Management Act Regulations." (Page 20)

"Finally, a fourth statute is going to be sort of the wild card in spotted owl protection, and that's the Migratory Bird Treaty Act. . ." (Page 21) "The Migratory Bird Treaty Act is also important because it's the only statute to date that could constrain the activities of private landowners and other agencies * * *" (Page 22).

If this has not convinced you that a real problem exists, the dialog from the question and answer period which followed Andy Stahl's talk should. Quoting Mr. Monteith, ". . . We are not making progress unless, as Dave describes, we turn up the heat. What you've seen so far is just the tip of the iceberg . . . We've elected to turn up the heat,

use the processes, celebrate democracy, if you will; we're going to use them all to the hilt." (Pages 54-56)

The content of this conference alone should raise serious doubt about the basis for and validity of the petitions being filed for the listing of these five salmon species. Whether the petitions for listing these particular species are warranted or not, it would appear that there is little hope that the lengthy and costly listing process mandated by the Endangered Species Act will be avoided.

Based on previous actions and statement made by the environmental organizations who support these petitions, the initiation of the process itself is likely to be considered by them as achievement of a goal.

It ties-up critical experts, utilizes limited agency manpower and budget dollars, and freezes most related private and governmental activities until the final outcome has been challenged all the way through the courts. In essence, the environmental special interests groups are flexing their political muscle, letting government agencies know that if they don't get their way—the entire system will pay the price.

Regardless of the reason, however, if it is determined that a study must be done—then the timely completion of an accurate, scientific investigation and biological review to determine the true status of the species in question must be a top priority.

It should draw upon the best qualified scientists and technical experts available from government agencies, academia and private industry alike, as well as gather all previous and in-process work done on these species.

The process must be open to the public and provide all interested parties ample opportunity to review available information and for input. It is also important that adequate funding be made available for this effort to help ensure that high quality results are achieved on an expedited basis.

The process initiated by the National Marine Fisheries Service (NMFS), which we understand plans to utilize both a Technical Advisory and Peer Review Committee, appears to be an open and credible process for conducting such a scientific review. While OFS does not believe the environmental group's petitions justify the wasting of limited agency resources, we are supportive of the NMFS review process.

Senator Packwood, before closing I would be remiss if I ended this testimony without strongly urging you and your colleagues to vigorously pursue an amendment to the Endangered Species Act—reinstating the consideration of economics within the listing process. It is interesting to note that the original Act passed in 1973 did allow economic criteria to be considered along with the biological criteria to allow for a balanced and reasoned decision.

In 1978, however, the Act was amended to remove economic criteria, but added language authorizing the formation of an Endangered Species Committee which can be convened to consider cases of extreme economic impact. This committee has been nick-named the "God Squad."

I find it hard to believe that the originators of the Endangered Species Act in 1973 could have envisioned the way their law would be modified in 1978, or the way in which it is currently being used.

It is our understanding that some 1,700 species are potential candidates for listing under the Act. This not only includes wildlife species, but also a significant number of plants and even invertebrates (insects). As the number of listings increase, the mandatory restrictions established by the "no jeopardy" requirements of Section 7 will undoubtedly result in overlapping critical habitat areas. It will only be a matter of time before every square acre of this state falls within a area restricted by the Endangered Species Act.

We cannot wait until technological advancement and every job in this State is eliminated before we are concerned enough to act. Now is the time to put economic balance back into the process.

TESTIMONY OF GLENN VANSELOW, EXECUTIVE DIRECTOR, PACIFIC NORTHWEST WATERWAYS ASSOCIATION

The Pacific Northwest Waterways Association (PNWA) is a regional association that has been working for 56 years to maintain the multiple use concept in the development and management of the Northwest region's natural resources, including those of the Columbia/Snake River System.

PNWA membership includes 111 organizations and individuals in Oregon, Washington, Idaho, and Northern California. PNWA represents:

Public port authorities on the Pacific Coast, Puget Sound, and Columbia/Snake River System;

Public utility districts, investor owned utilities, and direct service industries;

Irrigation districts;

Grain growers, grain grower cooperatives, and upriver elevator companies; and

Transportation providers, consulting engineers, and other users of the Columbia/Snake River System.

The Pacific Northwest Waterways Association stands firmly behind the multiple use concept for the Columbia/Snake River System. The system was developed and each of the federal projects on the system was authorized for multiple use purposes. Those multiple uses include power generation, irrigation, flood control, navigation, and recreation, in addition to fish and wildlife.

PNWA believes that all uses for which the system was developed must be protected and preserved. We recognize that Columbia River salmon are a valuable resource and a part of the heritage of the Pacific Northwest.

PNWA supports continued biological studies to determine the status of the various species of fish in the Columbia and Snake Rivers. PNWA advocates an open process in conducting the biological status review. The purposes initiated by the National Marine Fisheries Service (NMFS) should be adopted and funded.

Two elements of that process are extremely important, in fact, necessary to produce credible results and attain the best scientific information available. PNWA supports NMFS including biologists from outside the agency on an active Technical Advisory Committee and the establishment of a Peer Review Committee of the best available scientists from regional universities.

We believe the Bonneville Power Administration, the Pacific Northwest Utilities Conference Committee, Director Service Industries, Inc., and the Port of Portland have qualified biologists that should be included on the Technical Advisory Committee. It is important that the Peer Review Committee be selected in a manner which provides all users with input to the process, and that both committees truly function and participate in the decision making process.

PNWA is particularly concerned about the process and the selection of the participants. Science, like the Constitution, is open to interpretation and human judgement. No one wants a "packed court" deciding this issue. PNWA is seeking, and the proposed NMFS process appears to provide, an open and fair process for conducting the biological status review.

We further believe that solutions should not be recommended or imposed until after the biological review is completed. Having options prepared and available for action is a prudent way to proceed. However, we strongly believe that the determination of cause in the NMFS process must be completed prior to implementation of proposed solutions.

A wide variety of interests have characterized the impacts of potential solutions in very graphic and sometimes disturbing terms. In proposing those solutions, questions have been raised regarding current management practices. Indications are that current management has worked to increase fish runs overall, but may not have provided sufficient focus on the petitioned species. Our concern is that more extreme general solutions some have proposed may or may not be effective in solving the specific needs of these specific fish.

It is for this reason that solutions must be directed at scientifically determined causes and that those solutions should be developed embracing the multiple use concept and take all recognized uses into account.

The Pacific Northwest Waterways Association, in representing a wide variety of water users, would like to participate in the process. PNWA would be happy to assist. We can bring the various users together to help develop solutions to preserve the multiple use concept and protect the beneficial users of the river, including the fish.

PNWA appreciates this opportunity to present our comments. Thank you.

TESTIMONY OF SCOTT DUFF, OREGON WHEAT GROWERS LEAGUE

Senator, my name is Scott W. Duff. I am the acting executive vice president of the Oregon Wheat Growers League (OWGL). The OWGL is the non-profit asociation that represents Oregon's wheat growers. We appreciate the great importance you have expressed in the issue of endangered species petitions for Columbia Basin salmon by holding extensive field hearings. We appreciate the opportunity to express our views.

The OWGL believes that the issue of endangered species petitions for Columbia River salmon will impact the wheat industry. The economic well-being of individual wheat farmers, Oregonians, and the people of the Columbia Basin depends on the river for its success. Competitive and clean hydroelectric power, competitive transportation, and adequate irrigation water are essential for the region's success. International treaties that involve major customers of Oregon's and the nation's wheat growers could be affected.

An open public process that gives the opportunity for all effective parties to have input is essential. The process should emphasize the opportunity to give input in numerous locations within the Columbia Basin. The National Marine Fisheries Service Review (NMFS) of the petitions should be open.

A thorough and credible scientific review is essential. The NMFS needs to have sufficient staff and the funds necessary to complete the review. It will be necessary to support university research in the region to

supplement the review process. The key factors that limit the success of salmon are not well defined and a matter of contention. The review must clearly state what is known, what is not known, and what is speculation.

A thorough and credible economic analysis must be completed within the time frame of the NMFS review. It will be necessary to fund such a study in the Northwest. We need an economic snap shot of the Basin plus its impact on world trade. It is essential that we proceed with an analytical effort aimed at providing public policy makers and private decision makers with a clear picture of the implications and consequences of listing Columbia River salmon as endangered. This will permit an optimal plan to mitigate adverse effects from such an outcome.

A technological solution must not be ignored. The genetic makeup of salmon is not as well understood as wheat or other crops and livestock. With crops like wheat, scientists store and rely on diverse genetic material collected and tested worldwide to develop new varieties. Research into a complete genetic map of wheat is a current priority. It will be necessary to fund the same types of research to identify limiting factors and solutions to these factors in salmon. Technology could provide the solution to this complex problem as it has in the drive to feed a hungry world.

Nearly a billion dollars is being spent by Northwest electric rate payers to improve the condition of fisheries in the Columbia Basin. Public utilities, individual farmers, and others have spent funds to improve the condition of the habitat. This effort alone has a vast economic consequence for the Northwest. The impact of this effort has not yet been felt.

Identifying specific impacts of a listing of salmon is very difficult. The salmon's prime limiting factors are not well understood. Therefore, what impact will this have on the river? For example, will this affect dredging the channel, the use of pesticides within the drainage, minimum stream flows, indiscriminate forms of fishing, USSR and other joint venture fisheries, irrigation systems, and upstream navigation?

The OWGL is deeply concerned that the salmon issue could polarize the people of the Northwest. A "Battle lines form over wild salmon" mentality will doom efforts to create a rational plan to insure the salmon's future. To use the salmon to achieve other goals as the elimination of irrigation, the elimination of pesticides or the elimination of Indian subsidence fishing, for example, must be prevented. To use salmon to build and increase funding for organizations, to launch contentious law suits, and take the decision from the people of the Northwest must be stopped.

It may be time to form a planning group of organizations and their from the northwest to study this issue. A multidisciplinary approach to just framing the problem is needed as soon as possible.

It is not so much the notion that if the salmon disappears it will spell the doom of our society; but, if we cannot use our social and scientific institutions to solve this problem and be able to continue a sustainable and profitable level of economic activity, we are surely doomed.

Testimony of Frank Lamb, Eastern Oregon Farming Co.

The Columbia River is vitally important to all of us who live and work in the Pacific Northwest. The river and the current management of the water that flows in it provide or enhance many of the features of the environment which shapes our lives:

Low cost hydroelectric power is distributed throughout the Northwest.

Reliable supplies of clean water are available for irrigation.

A drainage with very significant scenic and recreation values.

An efficient "highway" for transportation of our supplies and our products.

An environment for many species of fish and wildlife.

Our current management of the flows enables us to avoid the potentially disastrous flooding which can occur.

There are increasing levels of interest and public discussion regarding the concept of the river as a resource and our management of that resource to meet various and often conflicting uses. Examples are: the potential listing of certain species of salmon as endangered; the transfer of Columbia River water to the Southwest; and the potential for significant additional irrigation development.

It is important that all of us who are involved and interested in the river be well informed regarding its capacities, current use and the potential impacts of changing the way in which it is managed. My own understanding of the river improved substantially when I obtained a copy of the enclosed graphic representation of the flows in the river at each point from its headwaters to its mouth.

The graph also shows the amount of water which is withdrawn from the river at each point. The most important point conveyed by the graph is that the current out-of-steam uses of the river cannot be viewed as an average. The conflicting claims that "There is no more water left." and that "There is plenty of water left." are likely both true depending on what part of the drainage is discussed.

The chart was prepared by the U.S. Corps of Engineers in 1958. It is old and needs to be updated. I think we should request that the Corps update the chart and distribute it was widely as possible. It is virtually important to all of us in the Northwest that policy decisions regarding the future use of the river be based on a sound understanding. Information such as is conveyed by this chart can be an important part of the education process.

I would appreciate your help in this regard.

Testimony of Don Cook, Pendleton Grain Growers, Inc.

I am Don Cook, General Manager of Pendleton Grain Growers, Inc., a farmers' cooperative owned by 2300 farmers. In 1989 we did $93,000,000 of business about equally divided between grain storage and marketing and supply sales and distribution.

It is not apparent, in total detail, what the designation of certain species of salmon as endangered in the Columbia, Snake River system would mean to the Pacific Northwest. What is very clear to me is the importance of this river system to the agriculture industry of this area.

I would like the record to show that I believe the best solution to the use of these rivers must fall within the philosophy of multiple use for navigation, irrigation, power generation, fish and wildlife, recreation, and flood control. Any slanting of preferential use to anyone of these purposes at the expense of the others has the potential to effect severe negative impact to the Pacific Northwest economy.

I want to discuss some specific areas of importance to agriculture:

TRANSPORTATION

This is an important use both to deliver commodities to market and to receive production supplies. Approximately fifty percent of the grain produced in Oregon, Washington, Idaho, and Montana goes to market by barge. A vast majority of petroleum used in the entire inland empire arrives up-river by barge. Over 240,000 tons of the fertilizer moves up-river by barge to NcNary and the Tri-Cities annually. Pendleton Grain Growers serving primarily Umatilla County and parts of Morrow County and Benton County, Washington ships processed feed, dry edible peas and our entire handle of cereal grains totalling approximately 400,000 tons annually on the river. We receive 9,000,000 gallons of petroleum and significant amount of liquid fertilizer by barge. All of this because it is the most efficient method of transportation which allows our products to compete in world markets at a profit level which allows the agriculture industry to exist.

IRRIGATION WATER

Over 85,000 acres in Umatilla and Morrow Counties are irrigated from the Columbia River with future potential development of at least this amount or more. Without access to the Columbia these acres produce virtually nothing. These acres produce from $400 to $4000 each depending on the crop grown and market conditions.

POWER GENERATION

Availability of affordable power has been a major ingredient in the agricultural growth in our Company's trade area. Other sources of power are or could be made available, but at two or more times the present costs. I believe many of our irrigated farming operations could not survive this type of cost increase.

Agriculture is one of the three or four largest contributors to the Pacific Northwest economy. Any reduction of present production or future growth has major implications for the entire area and certainly will not just affect agriculture producers.

For these reasons we urge the continued use of the multipurpose of use philosophy as the most balanced and most effective method to utilize the great natural resource of this river system.

Testimony of Gary Neal, Port of Morrow

The Port of Morrow was established in 1959 with the intent to enhance and assist in the development of economy of Morrow County and Eastern Oregon. Since the information of the Port of Morrow, a lot has happened to stimulate the economy and environment that we have come to enjoy in our part of the State.

The Columbia River has played the key role in the development of our current Agricultural and Industrial Base. Without water there would be no Port of Morrow. River Transportation, Irrigation for the Alfalfa, Potatoes, Corn, Wheat, Vegetables, and all of the other crops that we can grow, water for processing plants, drinking water for the people that live in the region, Recreation, Fishing, Hydro power, are all vital to the well being of Eastern Oregon, the Northwest and beyond.

Multiple use of the Columbia-Snake River is the key to the survival and success of our region. This multiple use must be preserved.

We recognize that Columbia River Salmon is a valuable resource and a part of the heritage of the Pacific Northwest. Biological studies need to be continued to help determine the status of the various species of fish in the Columbia and Snake Rivers. Congress needs to fund these studies and give adequate time to complete them. Hasty decisions that disrupt the current balance and use of the river would have long lasting negative impact on the entire Northwest. Once studies are completed, then solutions should be pursued taking into consideration the multiple use of this important River System.

Because of the Port of Morrow's major involvement in the Columbia River: Shipping of products, water supply to processers and irrigation linkages, we would like to be involved in the studies and processes concerning the impact of multiple uses of the Columbia and Snake Rivers.

We appreciate this opportunity to express our position and concerns on this issue.

TESTIMONY OF STEVE ELDRIGE, UMATILLA ELECTRIC COOPERATIVE ASSOCIATION

Senator Packwood, my name is Steve Eldrige, Assistant Manager of the Umatilla Electric Cooperative Association. Umatilla Electric is a non-profit Rural Electric Cooperative recognized locally, regionally and nationally as a leader of water and energy conservation in sprinkler irrigation systems.

Thirty-three years ago this summer, I bought my first fishing pole and tried to catch one of the salmon which seemed to fill the mouth of the Umatilla River. That same summer there were more salmon than water in the little stream near Hat Rock. From that time until a few years ago, not many salmon were caught around Umatilla. Since the 1980 Salmon Recovery Plan has been implemented, thousands of salmon have been harvested from the Columbia River by the Indian people and sport fishermen. Fish nets set by Indian fishermen, appear to stretch the length and breadth of the Columbia.

In 1980, the Northwest Power Planning Council set a goal of doubling the salmon run to 2.5 million fish. As a result, there has been an overall annual increase of 300,000 adult salmon and steelhead. The region's electric utility rate payers have provided one billion dollars ($1,000,000,000) to achieve this increase. Even though many factors affect the salmon runs, eg. dams, (hyroelectric, irrigation and flood control), logging, pulp and paper, fishing (indian, sports, commercial, international), navigation, pollution, fish and game policies, and other factors yet to be identified, electric power users have provided the primary source of funds which have enabled the region to accomplish the fish enhancement goals set in 1980. Umatilla Electric will continue its commitment to enhance salmon runs, but the effort must become a joint one: The responsibilities and costs of fish enhancement must be shared by all groups whose actions affect, either directly or indirectly, the number of fish in the Columbia River.

Several groups have taken issue with the present approach to increasing salmon runs. In response to these concerns, biological studies are under way to increase our information concerning salmon gene pools, river flows, dam reservoir levels, among other issues.

The petitions to list certain salmon species under the endangered species act, provides several opportunities. As the National Marine Fisheries Service conducts the status review, biological studies necessary for the review can be a vehicle for achieving a concensus on fundamental salmon issues. This opportunity remains as long as the status review is conducted in an open, objective way, allowing all interested parties to participate fully. We are not afraid of scientific studies performed without preconceived notions as to their results. Senator Packwood, we ask that you help keep the NMFS process open and accessible.

The Pacific Northwest has been under development now for more than 100 years. During that time, salmon have been one of several resources utilized by the Indian people, commercial ventures, sportsmen and others to serve their own interests. Of this more than 100 year history, it has been in the past 10 years that a major concerted effort has been made to enhance the salmon runs. The progress made in increasing the number of salmon has occurred within the frame work of the Pacific Northwest Electric Power Planning and Conservation Act of 1980. This effort has resulted in possibly the largest fish mitigation program in the world today. Now, if additional enhancement measures are needed, they can be worked out in the Pacific Northwest.

We have revisited two truths during the 10 years of the Pacific Northwest Power Act:

1. Problems within a region are best solved in that region.

2. Public process will result in better decisions.

Thank you Senator Packwood for your support in these matters and the opportunity to share our concerns with you.

TESTIMONY OF HON. CHUCK NORRIS, OREGON HOUSE OF REPRESENTATIVES

Thank you for bringing your public hearing on the petition to list certain Columbia and Snake River salmon species under the Endangered Species Act to Oregon House District 57 so that citizens of this community and myself have the opportunity to share our concerns.

I believe it is generally understood that the National Marine Fisheries Service will have one year from the May 30, 1990 date of submission to conduct the biological studies to reach a conclusion and recommendation whether or not the species concerned are endangered and should be listed. If the finding is to list, then at least another year will be spent on such matters as identifying critical habitat and recovery planning. This process, if listing is recommended casts at least a two year pall of uncertainty over much of the Pacific Northwest.

While the likely adverse effects of a listing and recovery plan are still speculative, it is fair to guess that the socioeconomic consequences may well be severe and could include, for examples, drastic reduction in hydroelectric power production (affecting all the western United States), curtailment of irrigation appropriations and restrictions on barge traffic. The fallout from such condition in the form of individual and community hardship is not difficult to imagine and has been covered in some detail by my predecessors here today.

While extinction of some species is usually regrettable, it is a process which predates recorded history and not one which should be attentuated at a cost in human misery and deprivation. Consider, also, the fact that both the Coho and Chinook salmon exist generally in great numbers over a vast region. (This point was made by Merritt Tuttle of the National Marine Fisheries Service in testimony before the Joint Interim Committee on Water Policy on May 31, 1990—an agenda item arranged at my request.) [1]

We can fulminate and indulge in dire predictions ad infinitum with little, if any, ameliorative effect as long as the Endangered Species Act exists in its current form and force. By its very existence the Act is open invitation for narrowly focused individuals and/or organizations, who themselves are generally insulated from the adverse effects of their actions, to hold entire regions hostage for the sake of some subhuman form of life.

My recommendation, Senator, is that urgent effort be made to repeal or substantially amend the Endangered Species Act in such a manner that the balance is shifted in favor of Homo sapiens. I recognize that this will be a difficult legislative challenge. However, with this salmon issue overlapping the listing of the Northern Spotted Owl and preceding the possible petition to list the mammalian fisher the Pacific Northwest is particularly threatened. I should hope that most of the Northwest Congressional delegation, including the Speaker of the House, could be rallied to such a relief effort. Only then can we begin to feel somewhat secure from these repeated threats to our socioeconomic stability perpetrated by well-intended advocates who are insensitive to the human consequences of their goals.

Thank you, again, for your appearance here today. If I can support in any way your efforts to reduce the likely ill effects of this latest petition for protection of a species, please ask.

TESTIMONY OF ELWOOD PATAWA, CONFEDERATED TRIBES OF THE UMATILLA INDIAN RESERVATION

The Confederated Tribes of the Umatilla Indian Reservation, which is made up of the Cayuse, Walla Walla, and Umatilla tribes, historically fished on abundant salmon runs. The lands ceded by the tribes to the United States Government in 1855, and our ancestorial lands, include the John Day, Umatilla, Grande Ronde, Imnaha, Walla Walla, Tucannon, Yakima, Malheur, Powder, Burnt, Snake, and Columbia Rivers.

We depend upon salmon for spiritual and cultural survival. The salmon is central to our religious beliefs, and the well-being of our tribal members. We honor the earth, water, salmon, roots and berries, and all the living creatures which have relationships and dependencies on each other. They are us. We are one. They are at the heart of our ceremonies, prayers and tribal gatherings. The seasonal tribal celebrations and events have always revolved around the returning salmon. We are just borrowing these natural resources, borrowing them from past and future generations. Therefore, we strive to maintain and preserve these resources for future generations. I am the earth, and the earth is me. What is done to the earth is done to me.

The root of our tribal culture revolves around the natural cycles of this great earth. The life cycle of salmon begins when the salmon emerges from the gravel of freshwater streams. The salmon then migrates to the ocean where it grows big in

---

[1] Mr. Tuttle has been designated to chair the special committee that will be responsible for the first-year biological study.

order to complete the cycle by returning to its freshwater gravel to support itself, man, and other animals. The migratory nature of salmon requires comprehensive management. We call this "gravel-to-gravel" fisheries management, which is the driving concept behind all fisheries restoration and enhancement activities in which the tribe is currently involved. The tribe is active in stream habitat protection and enhancement, instream flow improvements, artificial fish production operations and research, and harvest management in the tributaries, Columbia River, and Pacific Ocean. These activities demonstrate some of the components of gravel-to-gravel management. Programs such as the Northwest Power Act, U.S./Canada Treaty, U.S. versus Oregon Fish Management Plan, and Forest Planning have helped to develop some action plans for recovery and enhancement of fish populations. In addition to these efforts, it is apparent that much stronger management actions must be taken in areas where stocks continue to decline. Obvious weak links in the gravel-to-gravel management chain have resulted in the extinction of some stocks, reduction in other populations, and prevented successful recovery efforts in the Columbia River Basin.

For example, the Malheur, Burnt, and Powder River salmon stocks were completely and forever lost with the construction of the Hell's Canyon Dam Complex on the Snake River. The construction of mainsteam Columbia and Snake River hydroelectric dams have created major water flow and fish passage problems. Also, timber harvest, road building, mining, livestock, grazing, and irrigation withdrawals cumulatively prevent successful gravel-to-gravel management. Recovery efforts have been stalled by these factors. Furthermore, mitigative efforts have not focused on the mid- and upper Columbia and Snake River areas where native populations have been eliminated or reduced. Because of this history, I come before you now with a sense of urgency and frustration.

The treaty the United States Government signed with the tribes in 1855 reserved to the tribes fishing rights in our usual and accustomed areas for all future generations. Tribal fishers have carried the conservation burden for protection of the upriver salmon runs. Tribal fishers continue to be deprived of harvest with the hope that future generations of our people will see the salmon return. Most tributary rivers remain closed to tribal harvest, or are subject to restrictive harvest levels. For Snake River chinook and sockeye, and upriver coho, the tribal harvest has been so restricted that subsistence and ceremonial fisheries do not meet even the most conservative tribal needs. Entire generations of Indian youth have grown into adults without participating in the fishing heritage revered as a religion, and promised in our treaty with the United States government. Senator, we are concerned about the further implications these declining salmon runs may have on our treaty fishing rights. These are rights, not privileges. We do not believe that Congress intended to abrogate our treaty with the passage of the Endangered Species Act.

I do not come here to mourn the past, but rather to suggest solutions and to illustrate currently successful salmon restoration efforts. The local actions being taken in the Umatilla River are significant and are an example of fisheries restoration efforts that should be examined as the Endangered Species Act review proceeds. Umatilla River chinook and coho salmon stocks were extinct by the early 1900s. During the past decade the tribe has been a leader in the development of fish restoration efforts in the Umatilla River Basin. In 1988, for the first time since the turn of the century, coho salmon returned to the Umatilla River. In 1989, 4,500 coho salmon returned to the river. These were harvested by tribal and nontribal fishers, and also spawned successfully in the river.

Fall chinook salmon, also extinct in the Umatilla River since the early 1900s, have been reintroduced, resulting in the return of 650 fish in the fall of 1989. Spring chinook salmon are also returning to the basin for the first time in over 80 years. In 1988, 13 spring chinook returned, in 1989, 164 returned; and this spring, about 2,200 spring chinook returned. This level of success provided for hatchery brood stock needs and harvest opportunities for Indians and non-Indians. The spring chinook natural spawning escapement goal was surpassed two-fold this year.

All of these runs have been re-established using a combination of restoration techniques including; screening irrigation canals; construction of fish ladders at irrigation dams; stream habitat enhancement in the headwaters; fish trap and haul provisions during low flows; and hatchery fish production. This comprehensive program has required close cooperation between the tribe, state, federal, and local agencies and irrigation districts. We recognize and appreciate the cooperation these groups have given us. Continued cooperation will be needed to ensure completion of the Umatilla Basin Flow Enhancement Project. The recent United States House of Representatives funding approval for the initial phase of the Umatilla Basin Project requires Senate approval and support. Continued Congressional support is fundamental to completion of this crucial fish recovery project.

The initial success in the Umatilla Basin is evidence that successful restoration is possible. But the Umatilla River Basin projects are only a part of the activities which need to be done to restore the Columbia River Basin salmon runs. Other actions in our ceded area tributaries have shown some positive results, but these efforts are often over-shadowed by the continued "weak-link" impacts I mentioned earlier. In order to achieve the total run size objectives in the Umatilla River, and begin to realize the objectives in all upriver systems, more attention is needed to address the overshadowing system-wide problems. The Umatilla River salmon have to negotiate three mainstream dams, while the salmon from the Snake River tributaries encounter eight mainstream dams.

Essential ingredients to reverse the declining trends of the Snake River salmon stocks include: (1) improving flows through the eight mainstream dams in order to provide adequate passage of fish through the dams; (2) improving fish bypass facilities through these dams to also provide adequate passage of the fish; (3) improving existing salmon production operations; (4) expanding production programs based on these improvements; and (5) increased protection and enhancement of spawning and rearing habitat.

Forest plans have only recently begun to recognize the commitment necessary to provide adequate water quality, fish habitat and riparian area protection. Though significant gains have been made, habitat continues to be degraded. For example, the last remaining riparian timber in Meadow Creek (a tributary to the upper Grande Ronde formerly used by spring chinook salmon and logged heavily in the past) is presently being harvested. The tribe has spent considerable time and effort trying to reverse these practices. Through continued and expanded cooperation among agencies we are confident that our efforts will succeed.

Regardless of whether or not the salmon stocks are listed as threatened or endangered, we believe that these stocks could begin an upward climb toward recovery tomorrow, if the necessary steps that need to be made today are implemented by all parties. The tribes are committed, have the expertise, and know what needs to be done to initiate recovery now. A comprehensive effort that involves the commitment of the state and federal agencies, and others, is also needed. Specific action plans need to be developed and implemented. The funding and commitments to provide recovery were made in 1980 when the Northwest Power Act was passed, and in 1985 when the U.S./Canada Treaty was signed. Therefore, processes already exist to develop and support the action plan necessary to accomplish rebuilding salmon. Implementation of rebuilding actions is long overdue.

The Confederated Tribes of the Umatilla Indian Reservation is committed to reestablishing salmon in all ceded area tributaries. Recent successes in the Umatilla and other basins will be short-lived without the cooperation and commitment of all parties to protect our resources for future generations.

TESTIMONY OF ANDY BRUNELLE, SPECIAL ASSISTANT TO GOVERNOR ANDRUS

The state of Idaho is pleased to have the opportunity to appear at this hearing and present the state's views on the potential listing of Columbia and Snake River salmon as threatened and endangered species.

Idaho-origin anadromous fish have long been an important mainstay of Idaho's fishing opportunities, and are significant to many local economies in Idaho. The Snake River runs are also important to the region as a whole. The Snake River above Lewiston historically produced an estimated 55 percent of the total summer steelhead trout, 40 percent of the spring chinook salmon, and 45 percent of the summer chinook salmon. Idaho's Stanley Basin was described as "teeming with red fish," or sockeye salmon.

Snake River run coho are extinct, sockeye are nearly gone, and fall chinook are not far behind. Other Idaho runs are in a depressed status. Overall, salmon and steelhead runs in the Columbia River are only 15 percent of previous run sizes.

The state of Idaho has displayed a long and consistent concern for Idaho-origin anadromous fish. The Idaho Fish and Game Commission has taken actions such as: (1) not allowing a general sport-fishing salmon season since 1977; (2) working with the Shoshone-Bannock and Nez Perce tribes to restrict tribal harvest; and (3) requiring catch-and-release sport fishing of wild steelhead. The Idaho Water Resource Board's State Water Plan provides a ". . . policy of the state of Idaho to preserve and enhance the state's anadromous fishery resource." Also, the state is developing a comprehensive river plan that will ensure additional protection for the state's anadromus fish runs.

Habitat protection and enhancement projects are in place. The quality for spawning and rearing anadromous fish is improved. Idaho has in place an innovative

water quality program with interests from industry, conservation, sportsmen and Indian tribes working together to control nonpoint source pollution from logging, mining and agriculture.

Idaho went to court seeking an equal voice with the downriver states top constrain downriver fisheries in order to provide a reasonable margin of safety for Idaho runs. When Bonneville Power Administration (BPA) proposed to expand the intertie, Idaho sued BPA, which forced the agency to enter into a spill agreement that will aid anadromous fish migration. Currently, the state of Idaho is seeking relief for wild "B" run steelhead before the U.S. 9th Circuit Court of Appeals.

Notwithstanding the efforts of the state of Idaho, several important anadromous species are either extinct or close to it. The loss of this resource is largely attributable to one thing—the construction and operation of huge dams on the Columbia and lower Snake rivers. The federal agencies that constructed and operate the Columbia and lower Snake River dams have not successfully protected or increased the remaining fish runs.

Efforts made to conserve and rebuild the fish runs, including hatcheries, habitat improvement, and harvest measures taken by the state of Idaho and other public agencies have not succeeded. The primary reason is that unacceptably high fish mortality occurs during spring out-migration in the lower Snake and Columbia rivers. Overharvest is also a problem, and will remain so as long as runs are depressed.

The Columbia river dams operate to meet hydropower needs to the detriment of anadromous fish—this despite congressional intent that both power generation and fish passage be on an equal basis. Because of this failure to provide for both energy and fish, private citizen groups have acted to petition the National Marine Fisheries Service (NMFS) for listing of spring, summer and fall Snake River chinook, and lower Columbia River wild coho, and the Shoshone-Bannock Tribe has petitioned for listing Snake River sockeye.

While the state of Idaho strongly supports the preservation and enhancement of our anadromous fishery resource, Idaho is very concerned about the potential effects that an endangered species listing will have on the activities of federal government agencies in the Columbia River Basin. There is much speculation that a recovery plan under the Endangered Species Act could cause a major upheaval to existing federal government activities in the region.

The National Marine Fisheries Service and their regional director Mr. Rollie Schmitten have a large task before them. Idaho will support and assist as needed in the biological assessments that will be made on the Snake River runs. Idaho fully agrees with the state of Oregon that NMFS conduct an open scientific review with ample opportunity to comment by interested parties. Far to often, Idaho has not had the opportunity for full participation in downriver fishery decisions that affect Idaho runs.

Idaho believes more can be done in addition to a biological assessment. We prefer that federal agencies and the region begin to act now and examine ways to conserve and rebuild the anadromous fish runs before a possible listing.

The System Operation Review study by the Bonneville Power Administration, U.S. Army Corps of Engineers and Bureau of Reclamation provides one opportunity to formulate a detailed plan of action. Idaho believes that the System Operations Review process should move swiftly, and should comprehensively review all opportunities to improve flow conditions to protect and rebuild the fish. Studies under the Swan Falls agreement will also be helpful.

Idaho believes both federal and state governments have a role in rebuilding the anadromous fish runs. For example, Idaho Fish and Game is involved in negotiations with BPA to ensure the Non-Treaty Storage Agreement does not harm fish. The state gained a tenative commitment from BPA to pursue continued Idaho Power Company participation to enhance flows. Idaho also is negotiating a study of the feasibility and effects of renting water from Idaho Water Banks on the survival rate of smolt through the system. To carry out the study, Idaho supports increased flows from storage projects in Idaho.

Additional flows through the water rental pilot project are, however, only a partial and short term measure. Idaho's willingness to commit storage water for enhanced flows does not imply that we accept this alternatives as the solution to the slackwater problem on the mainstem dams. Idaho believes that the federal projects on the Columbia River must change operation criteria to create flow rather than placing the burden for flows solely on Idaho resevoirs that are not responsible for the flow problem. Additionally, downstream states must commit to supplying water for flows as well as commit to control of harvest in ocean and Columbia River fisheries to allow the limited numbers of adult salmon, especially wild fish, to pass through to Snake River spawning grounds. Idaho believes that downstream water and harvest managers must respond to our commitment to augment water flows for this pilot project.

Finally, Idaho suggests the region begin to explore positive actions toward recovery, while the biological assessment on the fish is moving forward. Congress can play a constructive role here by specifically budgeting some or all of these activities as outlined. Often, without Congressional direction, suggestions to federal agencies to take a different look at their operations fall on deaf ears.

TASKS

Explore ways to modify the Snake River Basin reservoir flood control rule curves, and shift flood control responsibility to Columbia River projects. This shift will allow space now evacuated for flood control to store water for enhancing instream flows.

Implement operation changes at mainstem dams to mitigate their effects on fish passage. For example, consider utilizing the considerable forebay storage in these reservoirs for "flushing" of downstream migrating juvenile fish. Drawing down mainstem reservoirs during the spring migration period would reduce cross sections, increase velocity, reduce demands on upstream storage, and provide flood control protection. Higher velocities would improve flows for fish, thereby reducing the need for greater volumes of water.

Explore the feasibility of constructing and operating smolt collection facilities upstream of Lower Granite Reservoir.

Stop the winter energy releases at Dworshak. This measure will ensure reservoir refill in low-water years and will provide more water for enhancing instream flows.

Use energy-storage options more creatively. For example, store energy surplus generated during fish migration periods with BC Hydro, California, and regional utilities.

Develop a marketing and transmission strategy to shape electrical load so that fish flows are integrated into the Firm Energy Load Carrying Capabilities, i.e., so that fish flows and energy flows are synonymous.

Study opportunities for providing additional water flows (if found to be effective) from new storage reservoirs (such as Galloway) to be constructed in the watershed specifically for such purpose.

Add new generating facilities to other existing dams in the system. For example, in the Willamette, this addition could maintain a supply of firm energy and provide flow relief for fish.

Devote a small percentage of Canadian storage over which the region has control to maintain a supply of firm energy, while providing flow relief in the Snake and Columbia rivers.

Implement water and energy conservation measures. Water conservation offers enormous opportunities to enhance mainstream flows for fish without affecting energy supplies.

Integrate needed fish flows into planning for regional energy and for new generating facilities.

The foregoing represents what the state of Idaho believes should be part of an aggressive plan by the federal agencies to address the declining salmon stocks in the Snake River drainage. Idaho believes that Bonneville and the Corps can move quickly to study and act on these proposed actions.

It is, of course, a given fact that a combination of actions will be required to solve the flow problem faced by salmon and yet provide for the other uses and needs of the region. A true balance of water for fish, wildlife electricity generation, irrigation and recreation must be struck. Action to implement these proposals could provide the basis for avoiding a listing of one or more salmon stocks as threatened or endangered species and would allow the Pacific Northwest to rebuild our fishery without the drastic actions that may come under the Endangered Species Act. Idaho has in the past, and will in the futrure, do its part to protect this valuable resource. It is now time for the federal agencies that constructed and operate the Columbia and lower Snake River dams to increase their efforts.

TESTIMONY OF CLEVE STEWARD, AMERICAN FISHERIES SOCIETY, IDAHO CHAPTER

My name is Cleve Steward and I serve as chairperson for the Chinook Committee of the Idaho Chapter of the American Fisheries Society. The American Fisheries Society is the largest organization of professional fisheries biologists in North America.

A few years ago, the Northwest Power Planning Council estimated the average annual adult salmon and steelhead runs in the Columbia River system before development in the basin ranged from about 10 million to 16 million fish. In contrast, the average annual run size now is around 2.5 million adults. Hydropower, fishing, logging, mining, grazing, agriculture, irrigation, pollution and urban development have all been implicated as causes for this decline.

It has been estimated that over 100 stocks of anadromous fish in the Columbia River basin have gone extinct since 1850. One of these runs, the Snake River coho, is believed to have gone extinct in 1984. Most of the Columbia River stocks that are current-

ly depressed are from areas above Bonneville Dam.

In the Snake River, the following runs have been identified as either depressed and declining or depressed and stable: Snake River fall chinook; Snake River sockeye; Tucannon River spring chinook; Asotin Creek spring chinook and summer steelhead; Grande Ronde River spring chinook; Imnaha River spring and summer chinook, and Salmon River spring chinook, summer chinook and summer steelhead.

Many of these runs show signs of further decline. The numbers of spring, summer and fall chinook estimated to have passed Lower Granite Dam—the last Snake River dam passed by anadromous fish en route to Idaho spawning grounds—were the seventh, third, and smallest counts on record. It is not enough, however, to look at the total number of fish returning to spawn each year. Hatchery fish, which comprise the majority of the run, contribute relatively little to natural production. Of the remaining wild adult chinook passing Lower Granite Dam, roughly half die before reaching their spawning grounds. The survivors are divided among several more or less reproductively isolated subpopulations or stocks. The different stocks are uniquely adapted to the local condition under which they live. Thus, at issue is not simply the number of chinook reaching the upper Snake River, but the viability of individual stocks which make up the run.

We have witnessed in Idaho a gradual diminution and in some cases the outright extinction of naturally spawning stocks of chinook salmon. For example, the number of chinook salmon redds (egg nests) counted each year by Idaho Department of Fish and Game biologists in Herd Creek, a tributary to the East Fork of the Salmon River, averaged 60 during the 18 year period prior to 1979. For the 8 years following 1979 (redd surveys were discontinued in 1987), fewer than 3 redds, on average, were counted annually. Other Idaho streams that have historically supported healthy runs of fish show similar downward trends. Many of these stocks need immediate and drastic attention if they are to avoid extinction.

The status of the sole surviving run of Snake River sockeye salmon is even more alarming. The number of sockeye that have migrated past lower Granite Dam has been less than 50 for the last 5 years. Only two adult sockeye salmon returned to Redfish Lake in the upper Salmon River basin last year (1989). With nearly half of the historical run period already past this summer, no sockeye have been counted at Lower Granite Dam. Sockeye runs throughout the Columbia River basin are down this year, and are projected to be the fourth worst year on record.

The blame for the recent decline extends to the resource management agencies, who have failed to implement the regulatory mechanisms and management programs necessary to halt further declines. The current state of affairs can be traced to a lack of reliable data on stock abundance, to professional indifference and regulatory "inertia", and to a misplaced trust in hatchery programs as a solution to the problem. Fisheries management has been characterized by an inability to accurately predict run sizes and to consistently meet escapement goals.

One of the alternatives available to us, viewed by many as a "last resort" because of the draconian effects it would have on harvest and hydropower, is the Endangered Species Act. Species listing under the ESA could potentially affect the way the Columbia Basin hydropower system is operated, and impose stringent habitat and harvest management constraints. Because the ESA has teeth to it, the possibility that salmon or trout stocks might be listed as a threatened or endangered species will be sure to stir up considerable economic and political controversy, in much the same way as the Spotted Owl issue has this past year.

In 1987 the Idaho Chapter of the AFS, to which the Palouse Unit belongs formally notified the National Marine Fisheries Service that it intended to seek a listing for upriver stocks of Snake River chinook salmon pursuant to the ESA if we did not see a substantive improvement in their status. The NMFS, to their credit, responded by assigning personnel to compile data and begin consultations with affected parties as part of a review process. Our shared concern was that a biological assessement be conducted in an orderly, non-confrontational fashion without the klieg lights and deadlines that the ESA often imposes. NMFS had conducted a similar review in the late 70's, but enough change has occurred that now, a decade later, another review is warranted.

In February of this year, the conservation group Oregon Trout notified NMFS, the Bonneville Power Administration, the U.S. Army Corps of Engineers, and other federal and state agencies that it intends to seek federal protection of remnant stocks of native Snake River chinook salmon and lower Columbia River coho salmon under provisions of the Endangered Species Act. After much debate, members of the Idaho Chapter of the American Fisheries Society voted to join Oregon Trout as cosigners of the petitions, which were delivered to NMFS in late May. We feel strongly that a biological review and further study of Snake River sockeye and chinook stocks should be conducted to evaluate the need for protection and to identify recovery options. Our overall concern is that the numbers of chinook and sockeye salmon do not decline further and thereby reduce the management options available to us now. The Idaho Chapter has received the support of the Western Division and parent society of the American Fisheries Society.

Why are wild, native fish needed? The issue goes beyond aesthetics or fishing opportunity. Probably the most important reason for preserving wild fish is that support a natural ecosystem upon which other organisms, including man, depend. Wild fish are frequently a barometer of how other aquatic organisms and the ecosystem as a whole is faring. By maintaining healthy runs of wild fish, we maintain biodiversity and maximize the natural productivity of our streams and lakes.

Wild stocks should be managed so that genetic diversity is maintained. Genetic diversity provides the basis for adaptation by fish to changing environmental conditions and, ultimately, the survival of the species. Genetic variability has been lost in hatchery stocks due to "founder" effects and artifical selection for economically valuable traits. Healthy native stocks are needed to rejuvenate hatchery stocks that have become genetically impoverished, and to serve as broodstock for new hatchery programs. Moreover, native fish can be used to re-establish natural runs where they no longer exist.

Beyond these issues is the large question of whether society should choose to protect endangered species at the expense of other social values. I think that in general my professional colleagues do not advocate a "preservation at all costs" policy, but believe that we can preserve our fisheries resources without unduly sacrificing economic growth and stability. There are tradeoffs involved but we see ample opportunity to promote the recovery of chinook and sockeye salmon through a mix of conseervation and supplementation measures. However, as Willa Nehlsen of the Northwest Power Planning Council recently put it, "We stand at a crossroads, and the longer we take to choose a course of action, the fewer will be the available options. The challenge facing us in the 90's is to identify and follow the best course available to us now to turn decline into sustainability."

If the status quo is maintained, if no action is taken to shore up Snake River sockeye and chinook salmon, the real danger is random demographic or environmental events or diseases that can easily wipe out a stock while it is still small. However, even small regulatory changes can constitute the basis of a successful effort to salvage these species. Recovery plans will need to focus on three interdependent types of action that heretofore have not been fully integrated: mainstem survival improvement, harvest management, and fish production. In particular, survival of fish in the mainstem of the Snake and Columbia River must be improved through the implementation of improved flows, interim spill, installation of mechanical bypass systems at dams, transportation of juvenile fish, and related research and evaluation. Passage mortality associated wtih hydropower dams has been estimated to average 15 to 30 percent of downstream migrants per dam and 5 to 10 percent of upstream migrants per dam. Cumulative juvenile passage mortality for fish migrating downstream past nine dams has been estimated to be 77 to 96 percent, depending on the volume and timing of streamflows. Cumulative adult passage mortality for fish passing dams upstream to spawning areas has been estimated to be 37 to 61 percent.

A major concern among fisheries biologists is that hydrosystem flexibility in the Colombia River basin is rapidly disappearing and will not be available to improve fish survival in the future. The realization of benefits of future recovery efforts will depend upon the provision of adequate mainstem flows.

Our final comments relate to the interpretation and implementation of the Endangered Species Act. We feel that, in general, federal programs aimed at recovering threatened or endangered species fall short of what the law mandates. Some species are ignored, recovery efforts for other species are underfunded or unacceptably delayed, and, when potential economic conflicts arise, special exemptions are allowed. We feel that, except under unusual circumstances, the listing agencies, the courts, and the administration should be allowed little discretion to modify the Act's automatic prohibitions as applied to endangered species based on economic or political considerations. As allowed by law, special exemption from exceptionally harsh prohibitions may be requested and obtained under Cabinet-level procedures. However, this step should be taken only under the rarest circumstances; it should not be allowed to become the rule rather than the exception. Our recommendation is that Congress not change the language of the Act until it is deter-

mined whether it is being used as originally intended.

With regard to Snake River salmon, we believe that by acting now, protective regulations may be drawn from a wide range of possible alternatives, and therefore can be very flexible. It may be more practical that limited protective regulations and more general guidelines be issued. This will help federal agencies assist in conservation efforts without restricting their actions in the regulatory mode. At this stage of the game, there appears to be sufficient incentives for all parties to strike some creative bargains rather than resort to the more stringent measures of the Endangered Species Act and the courts to solve potential conflicts.

TESTIMONY OF MIKE ROWE, SHOSHONE-BANNOCK TRIBES

As you are aware, the Shoshone-Bannock Tribes initiated the Petition to list the Snake River Race of sockeye salmon as endangered on March 29, 1990. To the Shoshone and Bannock Peoples, the sockeye salmon not only represents a vital and unique component of the Columbia River Basin ecosystem but represents part of their cultural heritage. Historically, tribal people harvested large numbers of sockeye in the Stanley Basin lakes, as did early white settlers. The name of one of the largest lakes in the Stanley Basin, Redfish Lake, attests to the historical abundance of these fish.

As mainstem Columbia River and Snake River dams came online sockeye returning to Stanley Basin declined drastically. Combined with intense lower Columbia River commercial, sport and tribal harvest as well as habitat degradation, the sockeye runs have been reduced to a remnant.

The Snake River race of sockeye salmon is unique in its ability to traverse a 900-mile journey through a gauntlet of obstacles few other living organisms could survive. This race must be protected. It represents an irreplaceable genetic combination that can never be recreated.

Is it worth listing a population that is virtually extirpated? Sockeye, as with all salmon, have an extended life span; that is, they do not hatch, mature, spawn and die in the same year. So despite low returns from the 1989 year-class, there remain 8 year-classes yet to return to Redfish Lake. In fact, as of June 21st, over 14,000 sockeye smolts, a good portion of which are Salmon River fish, have been collected at Lower Granite Dam on their way to the ocean.

Snake River race of sockeye have known tough times before. Sunbeam dam was built on the mainstem Salmon River in 1913 which, according to biologists of the day, blocked sockeye from their natal lakes further upstream. The dam was breached in 1934 and 8 years later in 1942, sockeye were reported in Redfish Lake. In 1964, 45 sockeye returned to Alturas Lake. It is not certain whether Sunbeam dam was not a complete barrier, whether sockeye runs remained in the river below the dam and recolonized the upper river when the barrier was breached, or whether kokanec (which are residual sockeye) from these lakes reestablished the runs. No one is sure except that sockeye did come back.

The Shoshone and Bannock Tribes believe that prompt action to protect and propagate this unique race of sockeye is unquestionably warranted. These efforts coupled with improvements in passage and water flows would insure that the Snake River race of sockeye will remain viable.

In considering the storm of controversy that surrounds the issue of listing the sockeye and chinook salmon as endangered, it is essential to remember that the power system that provides the Pacific Northwest with abundant, economical energy was bought at a high price. That price being the destruction of the biological integrity of the Columbia River esosystem and the virtual destruction of upriver stocks of anadromous fish. The sad situation of the Snake River sockeye salmon is symptomatic of a much larger problem. Not only has this been a biological disaster, but it has been a commercial disaster.

Managed soundly, the Columbia and Snake rivers and their tributaries can produce not only power and irrigation water, but can produce fish and wildlife in abundance. A tremendous commercial fishery has been severely impacted by the creation of the hydropower system—as has the sport fishing industry. One of the most difficult losses to quantify has been the tremendous negative impact of the loss of sockeye and other salmon species on the culture and traditions of Native Americans.

Listing the sockeye under the Endangered Species Act, far from the economic disaster many doomsayers predict, will provide an opportunity to rectify damage done in the past and restore the healthy functioning of the Columbia and Snake River systems that is unavailable under current management scenarios. It can truly be a win/win situation.

TESTIMONY OF ALLEN SLICKPOO, NEZ PERCE TRIBE

Senator Packwood, thank you for the opportunity to testify on the subject of the Endangered Species Act petitions which have been recently filed. My name is Allen Slickpoo and I am a member of the Nez Perce Tribal Executive Committee. I am here today to present the views of the Government of the Nez Perce Tribe.

As you may know, the Nez Perce Tribe has traditionally fished for salmon in the rivers and streams of Idaho, southeast Washington, northeast Oregon, and the mainstem Columbia River. To our people, salmon have always been central to our way of life, our cultural heritage, and our religion.

The Nez Perce Reservation of today is located near Lewiston, ID, and contains within its boundaries approximately 60 miles of the Clearwater River. Nez Perce homelands extend throughout the Clearwater, salmon, and Snake River Basins, and comprise some 13 million acres under the Nez Perce Treaty of 1855. The local foods, including the various runs of salmon, provided a year round subsistence for our people. The Chinook, Sockeye, and Coho each had a seasonal use by the Nez Perce as our people travelled from location to location throughout their regional homelands.

By treaty with the United States in 1855, the Nez Perce Tribe reserved rights to hunt on open and unclaimed land, and to fish at the "usual and accustomed" fishing sites of our tribe. Our goal is to restore the various species of salmon at all usual and accustomed rivers and places in the Columbia Basin where our people fished, and where the salmon still have access.

Many salmon stocks from many rivers pass the usual and accustomed fishing places of the Nez Perce Tribe. We are therefore committed to fisheries harvest management, habitat protection, and fish production improvements throughout the range of the salmon, and particularly those fish that migrate to and spawn in Nez Perce territory.

Under the Tribe's Fishery Program, we actively manage our natural resources for the purpose of restoring salmon throughout the Nez Perce traditional homeland. Our tribe employs a staff of fisheries biologists, engineers, and resource specialists to carry out that task.

The challenge which faces our tribe is one of the most difficult in the Northwest. The Snake River System is recognized as the source of some of the greatest problems confronting Columbia River salmon rebuilding efforts. Dam construction has cut off access to hundreds of miles of salmon habitat. Inadequate environmental conditions, as a result of irrigation, mining, timber harvest, and industrial pollution, have rendered many rivers unsuitable for salmon due to high water temperatures, pollution, and low flows. There are also up to 8 mainstem hydroelectric dams on the Snake and Columbia Rivers which our fish must pass. In too many years, juvenile salmon cannot survive the journey to the ocean because of these manmade hurdles.

The salmon resource must be protected at each stage of its life cycle. This concept is called "gravel-to-gravel" management by our tribe. The primary elements of gravel-to-gravel management are: protection of habitat, improvement in hydroelectric dam passage, fish production reform, and harvest management. The Nez Perce Tribe, along with the other Columbia River Basin tribes, has actively sought to implement these actions since 1980. It is our belief that these are the essential elements for rebuilding salmon stocks, especially the naturally spawning fish.

But those elements have only been partially achieved. Only in the area of harvest management have the tribes succeeded in creating a coordinated harvest management system that accounts for harvest of Columbia River fish throughout their range.

In the area of fish production reform and passage at the dams, the tribe's efforts have been heavily resisted. The fish hatcheries that do exist in Idaho have not achieved the results for which they were designed. Survival of hatchery fish has, in part, been poor due to misguided hatchery programs.

Also, certain runs, such as Snake River sockeye and coho, do not receive any mitigation or compensation under the Lower Snake River Compensation Program, or any other program. Current hatchery programs in Idaho prioritize steelhead and spring chinook, with minor summer chinook production, while no programs exist for sockeye, coho, or fall chinook. The tribe was not consulted, nor do we concur with those priorities. We strongly object to, and condemn the fact that only three of the six species which once returned to the Snake River above Lower Granite Dam remain. It is not difficult to see that the deficiencies in the Lower Snake River Compensation Program have contributed greatly to the present conditions of summer chinook, sockeye, coho and fall chinook in the rivers and streams of Idaho, southeast Washington, and Northeast Oregon. In that regard, we request that the Northwest delegation seek the necessary legislative or administrative remedies under the Water Resources Development Act of 1976, or other appropriate means, to ensure that those species which have been neglected are restored in the Snake River.

Regarding the subject of fish passage, and related habitat issues, the tribe has continually advocated for sufficient water quality

and water quantity for salmon spawning, rearing, and migration. It is now 10 years since the passage of the Northwest Power Planning and Conservation Act, and only the steelhead run in Idaho is in better condition than before the act. Despite the passage of the act, and our tribe's expectation that salmon losses would receive compensation in the form of fish production increases and improvements in dam passage survival, such promises have not been fulfilled. Insufficient fish passage conditions and lack of fish production actions for neglected species in Idaho Rivers during that timeframe, and for the foreseeable future, will continue to frustrate our tribe's fishery rebuilding goals.

In conclusion, it is our position that whether or not any fish is listed under this Endangered Species Act process, the tribe will continue to seek and support actions which promote the rebuilding of not just a few, but all salmon stocks in the Nez Perce traditional homelands. The Nez Perce Tribe is prepared to identify specific actions which will move Snake River Basin salmon recovery forward. Solutions to these problems can be found, as they have been found elsewhere in the Columbia River system. But it will take a cooperative, coordinated effort among all parties who have rights and interests in these stocks of fish. No longer can the Snake River System and its fish resource afford bureaucratic delay. If more studies must be conducted, then those studies must produce actions, and actions must be specific. It is time to move ahead, and to correct the errors that were made in the past.

Our heritage, and our children's future demand that these actions be taken by us.

TESTIMONY OF DARRELL STANDAGE, MALHEUR SOIL AND WATER CONSERVATION DISTRICT

At this point in time I am not sure of all the implications and ramifications that would effect this area if the Chinook Salmon or any other Salmon species were put on the endangered species list. However I am absolutely certain there would be very drastic implications and developments to the Snake River Valley and its tributaries if changes of any kind occur as to the uses and availability of water to this valley.

As we all know water is the lifeblood of this valley. Before we had impoundments of water we had nothing but desert sagebrush and rabbits.

Today thanks to the availability of water to our area we have a very strong and viable agriculture base. For example approximately 25% of the entire nation's supply of onions and 50% of the nation's supply of potatoes are produced with water from the Snake river system. Other crops grown in this area under irrigation are sugar beets, sweet corn, alfalfa hay, field corn, wheat, barley, peppermint, bean, flower seeds & vegetable seeds. A large cattle and dairy industry and crops that support our large food processing plants in the area; such as Ore-Ida Foods, J.R. Simplot, Amalgamated Sugar Co., American Fine Foods, Dairy Creameries, auction stockyards, and many onion packing sheds, all of which employ thousands of people.

The agricultural industry is the backbone of the support for our towns and cities. In other words just about everything in this valley is dependent on water and to place any kind of fish on the endangered species list that would in any way effect our supply of water available for agriculture would be a terrible disaster.

Hydro electric power is without a doubt the cheapest and cleanest form of power available today and to hamper any production of electricity would be a tragic mistake.

As a farmer for the last 38 years and Chairman and Board member of the Malheur Soil and Water Conservation District the past 14 years, I have seen many changes in water uses and irrigation methods. Some people criticize agriculture for wasting water. In past years I have seen miles of cement ditches installed to save water. Thousands of dollars have been spent on land leveling, sprinkler systems and conservation practices by the hundreds all designed to save water and soil.

Farmers today have to be good businessmen to survive and water is such a valuable asset to this area, the majority of them are very conservation minded and doing everything within their power to conserve water.

Again let me emphasize the importance of water to this valley, because before we had water we had desert. Take away the water and it will quickly return to desert.

Many forms of wildlife such as deer, antelope, pheasant, quail, duck, geese, beaver & muskrats are very dependent on irrigated agriculture. Very few if any of these creatures were in abundance in this valley before irrigation was brought in and now they thrive everywhere.

On opening day of hunting my farm looks like Grand Central Station. Other areas that will be impacted are sport fishing, water recreation of all types such as; rafting, boating, rafting and floating rivers' and water skiing.

I will close by making this one statement: That is in the course of recorded history there has never been a civilized nation that has worked so hard to destroy its food supply as what our nation is doing to us today.

TESTIMONY OF JOHN E. ROSS, OWYHEE IRRIGATION DISTRICT

My name is John E. Ross. My residence address is 1212 S.W. 11th, Ontario, Oregon. I am the Project Manager for the Owyhee Irrigation District in Malheur County, Oregon, the address of which is 17 South First Street, Nyssa, Oregon 97913.

The Owyhee Irrigation Project is a U.S. Bureau of Reclamation Project. Appropriations were made by Congress in the 1920's for the construction of the Owyhee Dam on the Owyhee River, approximately 30 miles S. W. of Nyssa.

The Owyhee River prior to construction of the dam, had an average annual stream flow of 852,533 A.F. of water which was discharged into Snake River about 7 miles south of Nyssa. The flow was largely in the months of March, April, May and June of each year. During the spring floods, flows often reached 20,000 to 25,000 cfs. During the hot summer and in the fall months, flows in the river reduced to a trickle, often 100 cfs.

The Owyhee Dam since the early 1930's has provided irrigation water for 120,000 acres of choice farm land in Malheur County and Owyhee County, Idaho. Virtually all of the water which flows in the Owyhee River, except when the reservoir fills in the spring and flood water is released, is stored in the Owyhee Reservoir for use in irrigating the farm land. Three small power plants are being developed in the project but they, for the most part, use only irrigation water.

The Owyhee Irrigation Project was designed to store virtually all of the dependable flow of the Owyhee River for irrigation purposes. Although the irrigation project uses about 460,000 A.F. of water per year for irrigation and the annual average stream flow is now about 750,000 A.F., the project needs a full reservoir each spring to provide assurance that there will be sufficient water for irrigation during the next succeeding two or three years in the event they are low run-off years.

For example, in 1988, the second consecutive low water year, the maximum storage reached was 289,602 A.F. Water for irrigation had to be reduced from the desired 4 A.F. per acre to 3 A.F. per acre. This resulted in reduced yields and increased expenses for farmers.

The point here is that the project was designed to take the water from about 11,000 square miles of desert country and use a reservoir storage of 715,000 A.F. to irrigate 120,000 acres of farm land. Plans were made for a sufficient water supply in all but prolonged periods of drought.

The effect of this planning by the reclamation engineers of the 1920's is that all of the dependable water of the Owyhee River is utilized. There is no dependable excess which can be used for other purposes, such as a fishery. There is no dependable water which can be used to maintain minimum flows during the year. There is no dependable water which could be used to flush fish to the sea.

The U.S.A. and the 2,100 water users of the Owyhee Irrigation Project have made a huge investment in money, effort, sweat, and personal commitment, and they have relied on the future stability of the project for continued farming beyond the foreseeable future.

If a release of water on a dependable basis is required it will do violence to the farming potential and the related economy of the region. If the salmon are to have a dependable source of water on a predictable schedule, it must come from a source other than the Owyhee River.

TESTIMONY OF LARRY WIMER, IDAHO POWER CO.

Senator Packwood, my name is Larry Wimer. I am the Manager of of Hydroelectric Relicensing and Compliance for Idaho Power Company (Idaho Power). On behalf of Idaho Power, I thank you for this opportunity to testify regarding the potential listing of Columbia and Snake River Salmon as threatened and endangered species.

Idaho Power is a privately owned electric utility serving approximately 285,000 commercial and residential customers in Eastern Oregon, Southern Idaho, and Northern Nevada.

Idaho Power operates 16 hydroelectric projects on the Snake River and its tributaries beginning with the American Falls Power Plant at the eastern end of the system and ending with the Hells Canyon Power Plant at the downstream end on the Idaho-Oregon border.

In August, 1955, the Federal Power Commission issued Idaho a license for a three-dam complex in the Hells Canyon reach of the Middle Snake River consisting of Brownlee, Oxbow and Hells Canyon Dams (Project 1971). At that time, most of the spawning areas above Hells Canyon had been blocked by reclamation projects and the anadromous fishery on the Snake River had been drastically reduced.

The license required the Company to construct, maintain and operate facilities for

the purpose of conserving the remaining fishery resources of the Middle Snake River. A task force composed of representatives from each of the state and federal fish and wildlife agencies in the Pacific Northwest was formed to develop plans for handling the anadromous fisheries in the Hells Canyon reach of the Snake River. The studies of this group resulted in a decision to provide experimental facilities for both the upstream and downstream passage of anadromous fish over the three dams. This passage system was not successful. Based upon an extensive study over a three year period starting in 1961, it was concluded that a primary factor in the failure of the passage facilities was the inability of downstream migrants to navigate Brownlee's 58-mile reservoir.

When the decrease in smolts and returning adults became apparent in the Snake River system, the decision was made by the agencies to develop an artificial propagation program and attempt to relocate the Snake River runs of spring chinook and steelhead to other drainages. During the following years, Idaho Power funded a major fish program.

Idaho Power has constructed and funded the maintenance and operational expenses at four (4) fish propagation facilities that are operated by the Idaho Department of Fish and Game. Pursuant to its latest agreement with the United States Department of Commerce—National Marine Fisheries Service (NMFS) and the states of Idaho, Oregon, and Washington, Idaho Power's fish traps, fish handling and transporting facilities, and fish hatchery facilities provide an annual production capability of 1,000,000 fall chinook smolts, 3,000,000 spring and 1,000,000 summer chinook smolts, and 400,000 pounds of steelhead smolts. In every year since 1968 one or all of the hatcheries has produced fish in excess of the production goals. These additional fish have also been made available to the fish agencies.

Idaho Power's hatchery program has been very successful. However, the regional emphasis that has been placed upon increasing the total numbers of fish for harvest may have caused the specific needs of certain wild stocks to be overlooked. In 1958, when Brownlee Dam became operational, there were only three federal dams on the lower Snake and Columbia Rivers impeding the migration of salmon and steelhead downstream of Hells Canyon. By 1975, when Lower Granite Dam became operational, five additional dams had been constructed. The Lower Snake and Columbia Rivers had become one continuous reservoir bisected by eight federal dams.

In recent years, Idaho Power had voluntarily contracted with the Bonneville Power Administration to provide storage for water budget flows to aid in the out migration of juvenile fish.

In 1988, pursuant to authorization from the Congress in Public Law 100-216, Idaho Power, the NMFS, and the United States Fish and Wildlife Service entered into an agreement to jointly fund a one million dollar, three-year study concerning the timing, quantity and quality of instream flows and related matters to protect, enhance and mitigate fish and wildlife resources including anadromous fish. The study plan in the agreement for anadromous fish is underway and includes:

Identification of sources of additional water within the Snake River basin to provide for migrating juvenile anadromous fish;

Alternative flow regime studies; and,

Instream flows for anadromous fish downstream from Hell's Canyon Dam.

Many such studies are either underway or being contemplated by numerous organizations and agencies in the region. Idaho Power believes that an effort to coordinate these studies would be valuable.

Congress should fund and Idaho Power supports a thorough and credible biological review of all of the salmon stocks represented in the petitions that have been filed with the Department of Commerce for Endangered Species Act review. We look forward to providing whatever assistance we can to the NMFS in making its initial determinations regarding the listing of the stocks.

Idaho Power believes that any recovery plan, whether or not mandated by the Endangered Species Act, should fairly assess all of the various factors in addition to migration flows that impede the recovery of anadromous fish runs. A thorough analysis of the region's alternatives should include an assessment of the impacts to anadromous fish from all activities including power production, commercial fishing, mining, logging, and farming. The best recovery plan will be a plan that is not only biologically sound but also a plan that fairly distributes the burden among all user groups.

TESTIMONY OF MARJORIE HAYES

Recently I reported on an article that was printed in the Sunday, June 3rd, 1990, Idaho Statesman. I would like to read you parts from this report, for I came to realize in the research that I did in getting together this information that the struggle in which my husband and I engaged during the last seven years is ending in defeat and the mighty chinook salmon who has become to us a living symbol of our love for this beautiful land may very well be too far down the road to extinction for us to save. I quote from my own paper:

"Although I have not always agreed with Mr. Ed Channey, I have a great deal of respect and admiration for his sincerity and the quality of his character . . . In his interview with Mr. Bagwell in the Statesman he lists the fact that 95% of the Salmon and Steelhead produced in Idaho are killed attempting to migrate through the dams and reservoirs to the ocean . . . With this I do not disagree. He lists habitat degradation and over-fishing as the achilles heel which may wipe out the species. Unfortunately this is very true. He lists the way the dams are managed for the production of power is at the expense of the fishery, and this is also very true and illegal . . . At a Board of Directors meeting of the Northwest Conservation Act Coalition (May 1990) the aspect of management of the dams was discussed. (This group monitors the Northwest Power Planning Council and offers constructive criticism.) It appears that the fish flush which is being used to carry the young smolts through the backwaters of dams works if we have a heavy snow pack year. In a dry year there is not enough water to get them through before their imprinting fails . . . Apparently it is after the initial fish flush that the problems occur. The Corps of Army Engineers and the Power Companies do not release enough water, but hold back to rebuild their generating capacity. This plays havoc with the runs. The thing that is becoming clear is that the fish use the total river systems all year long to make their various journeys to the ocean. Thus the waters from Henry's Fork, the Palisades, the ensuing Snake, the Salmon, the Clearwater, and their tributaries all play a major role in the marvelously engineered plan of nature to get these ocean travelers safely to their destination. There in the salt waters of the ocean they grow and thrive and ultimately return to spawn and die according to their marvelously genetically structured programing.

So far Mr. Chaney was absolutely correct in his interview . . . Where we take exception with him is in his casual dismissal of the Stanley Basin as an area that is only able to provide habitat for the Sockeye Salmon and his listing of the South Fork of the Salmon river as the target area for the recovery of the Fall and Summer Chinook and Steel-head runs . . . I do not wish to diminish the importance of the recovery of the South Fork, for it should be done by all means; and yet it is our opinion (backed by research) that the Stanley Basin is the Crown Jewel of Idaho, with a treasure so rare and unique that it should be honored and protected as the rare jewel that it is. For it is precisely here that the Wild Chinook Salmon have their beginning, safely immune from the advent of disease and genetic infringement from the hatchery fish. This has been accomplished by an impreceptable design of nature. At the top of Blind Summit, going toward Lowman, a division of the waters of the Salmon river takes place. Here all of the waters from the side nearest Stanley go into the main Salmon river. From the other side, up to the top of Banner Creek, the water flows into the mightly Middle Fork of the Salmon, a Wild and Scenic River. The lovely quiet stream which meanders through the meadows near Cape Horn is Marsh Creek, one of the head waters of the Middle Fork of the Salmon river. The Chinook Salmon use the Middle Fork as their highway as they return to their own streams to spawn and die . . . What Mr. Chaney over-looked in his interview, is the fact that Marsh Creek begins a marvelous out-door fishery. The area that it encompasses includes Bear Valley Creek (the other headwater of the Middle Fork) Knapp Creek, Cape Horn Creek, Elk Creek, Beaver Creek, Loon Creek, Sulphur Creek, Rapid River Creek, Pistol Creek, Indian Creek, Marble Creek, Camas Creek, and their tributaries. In the thirteen creeks that I have mentioned there are 449,777 square yards of spawning gravel and a potential for 38,453 redds (female spawning nests).

At a Steel-head Round Table Conference which I attended several years ago at the Rippling Waters Resort, there was a very serious discussion by the technical staff about the looming ineffectiveness of the hatchery fish. They are very prone to disease and too little is known about their survival ratio and their rate of return from the ocean. We have long had a concern about their impact on the ocean voyage for the wild ones.

On the other hand, in the Wild Chinook we have a fish that has survived everything that man could devise to terminate their existence, including making an outdoor cattle toilet for their cradles and in the name of the Centennial Year proposing a trail through shale to further stress the smolts in the upper reaches of Marsh Creek.

My husband and I have been monitoring Marsh Creek for the last seven years and the pictures on the letterhead show what happened to the stream in 1989, a summer when the Fish and Game Department had expected the ranchers to use restraint with their cattle as they were aware that the fish were under stress.

Why are we so intent in destroying this marvelous creature? Why not give it a chance?

You will note in the draft Table 2 of the Idaho Fish and Game Department Salmon River drainage wild spring chinook redd counts, 1957 to 1989 that the 1989 redd count is down to 44 in the Marsh Creek drainage. . . But what causes me even greater distress is the fact that Sulfur Creek, the Creek in which I played a major role in getting into the Frank Church River of No Return Wilderness was down to 2 redds.

I really do not feel that we have any margin of safety left to save the Chinook Salmon. The saving of the old growth forests for the spotted owls protection has turned those who are intent on logging and roading to Idaho and they are coming in at an alarming rate. In our opinion they will be destroying something that is of more value to the world than they will ever be able to replace; for Lester Brown in World Watch has stated that a piece of dried fish (and the chinook salmon is a high grade protein) can mean the difference between starvation and a diet that is adequate in protein. Will future generations look at this marvelous design of nature in Idaho, and ask "Of what were they thinking with the world population at 5.3 billion and climbing rapidly . . . For this reason, my husband and I are supporting the recovery of the Salmon through the Endangered Species Act, and we are requesting, that due to the fragile eco-system of our Batholith and the tenuous hold that our Salmon now have reached in their valiant fight for survival that you do not delay . . . for time is of the essence."

TESTIMONY OF GEORGE KING, OREGON TRAIL ELECTRIC COOPERATIVE

I'm a native Oregonian. I have lived and worked in the Northwest all of my life. We take many things for granted in our beautiful corner of the world—such as our unique salmon runs and our low cost, abundant and clean electric power.

These two valuable regional resources are not, I believe, mutually exclusive. The electric industry has spent more than a billion of ratepayers' dollars with the best technology available to preserve our salmon runs. There have been successes. More will have to be done.

Now some well-meaning individuals are stridently pushing to list the wild salmon on the "endangered species list." If you think the spotted owl controversy is going to play havoc with the economy of the Northwest, you haven't seen anything yet.

For decades, the Northwest enjoyed a surplus of power. Waterpower is the cleanest and cheapest way to generate the large amount of power we need to support the quality of life we know today. Now mainly due to load growth, we are in resource balance with loads and we are already looking at new sources of energy to make up the projected shortfall in the 1990's.

Have our blessings been too good to be true? No. We simply have had the foresight to take advantage of waterpower to keep our costs relatively low and our environment relatively clean.

Nobody has had to put a gun to the electric industry's head to force it to make provisions for wildlife such as river salmon. This industry understands and accepts its role to help protect the magnificent salmon. All others who benefit from the water and fish resources must also participate in the solution to and the costs involved with the problem. The entire burden should not be borne by the electric ratepayer.

The Northwest cannot stand the shock that will hit if we list the salmon at this time. And that shock will affect every person living here. It could mean a drastic reduction in hydro-generated electricity. It could force a move to other major sources of power that are far costlier and more damaging to the environment. It could even sink the region into a depression that would make the early '80s seem like the "good old days."

Are we ready for that? I don't think so. Are those who want to list the salmon ready for that? I doubt it. Contrary to what some may tell you, we are very concerned about the future of wild salmon and stand ready to do our share to preserve the species. Those who propose the listing of the salmon as endangered should also be prepared to share in all aspects of a solution to the problem.

We aren't wearing the black hats in this issue. The electric industry must wear two hats—supplying the Northwest with power it demands and protecting the species that are affected by supplying that demand. Both those hats are white.

Our quality of life cannot stand the shock of listing the salmon and quickly plunging our way of life into a precipitous and costly decline. We live here, too, and we can share our region with the salmon.

My suggestion is that the electric industry—cooperatives, investor-owned utilities, PUDs, municipals and industry associations join forces with federal, state and local governments to push for more reasonable and well-considered solutions.

I believe we can halt the decline of our salmon population and retain the precious way of life affored us by hydropower. We do not have to give one up for the other.

I realize we must find an acceptable solution soon. The electric utilities of the Northwest are concerned for the salmon. We believe we can help protect it for future generations. We are also concerned about this region's vitality—which will be crippled if we make a hasty and irretrievable decision without careful, thorough investigation of the problem and the impact of solutions.

We cannot tolerate myopic, quick fix solutions. It is time to look at the big picture. That picture frames far more than our fish population.

Thank you for the opportunity to speak on this issue.●

PRICE GOUGING AS A RESULT OF EVENTS IN IRAQ AND KUWAIT

● Mr. HEINZ. Mr. President, I rise to bring to the attention of the Senate disturbing reports of price gouging in gasoline and home heating fuels as well as panic buying by consumers as a consequence of recent events in the Middle East.

The invasion of Kuwait by Iraq and its potential long-term impact on oil supplies and prices are serious concerns, but price gouging by retailers, wholesalers, and refiners or panic buying by consumers is simply unjustified by the circumstances.

There have been scattered reports that some retailers of petroleum products have increased prices and that some wholesalers may be limiting supply to retailers.

The current situation is similar to the events following the *Exxon Valdez* oilspill and during last year's colder than expected winter. Despite the negligible impact on supply due to these events, prices for gasoline and home heating oil spiked upwards sharply.

There are always people ready to use any excuse to rip off the consumer. The global supply of oil has not been affected in any meaningful way by the actions of Iraq and the United States has substantial oil in the strategic petroleum reserve. Immediate price hikes in these circumstances should be vigorously investigated by the Department of Justice.●

UNITED STATES ASSISTANCE TO EL SALVADOR

● Mr. McCAIN. Mr. President, I am one of seven Republican Senators charged by the minority leader to explore with Democratic Senators the possibility of forging a bipartisan agreement on United States assistance to El Salvador. I was pleased to undertake this assignment, and I took my responsibility very seriously. I sincerely believe that the most important means at our disposal to improve the prospects for peace and justice in El Salvador is strong, serious, and united action by Congress and the administration.

Mr. President, I assure the Senate that I, my Republican colleagues, and the administration are very earnest in our desire to achieve a bipartisan consensus on our relationship with El Salvador. We remember how, with great difficulty, Congress and the administration forged a bipartisan agreement on Nicaragua that survived repeated challenges to its integrity, and worked to such good effect on what had become the most divisive foreign policy problem of the 1980's. Mr. President, that extraordinary success is reason enough to vigorously pursue bipartisanship on the question of El Salvador.

There are, of course, other compelling reasons for bipartisanship on this question. Contrary to patronizing attitudes that cloud some perceptions of El Salvador, Salvadorans pay close attention to what occurs in the U.S. Congress. Unfortunately, those Salvadorans who are most opposed to the democratization of their country pay the closest attention to our proceedings here. The death squads and the FMLN are awaiting the action of Congress before resuming their cooperative association to destroy Salvadoran democracy.

Mr. President, as most Senators know, our recent efforts regarding El Salvador have not been very bipartisan. There are a number of proposals

in both Houses of Congress to reconfigure our assistance to El Salvador, one of which I was happy to cosponsor. The administration has also recently proposed legislation strictly conditioning our assistance. The stated purposes of everyone of these proposals is to enhance the prospects for peace and compel respect for human rights in El Salvador. All the measures share some similarities. There are, of course, serious differences as well.

Ideally, Mr. President, Members of Congress and the administration would work out the differences and unite the similarities in an assistance package that would send a message to all Salvadorans: We are serious about peace; we are serious about justice; we are serious about human rights. Together we could, if we are so inclined, construct a relationship with El Salvador that makes unmistakably clear our intention to serve not only American security interests in El Salvador, but American values as well.

With regret, Mr. President, I fear that we are not so inclinced. Thus far, I suspect that many of my friends on the other side of the aisle are not really interested in uniting Congress on this issue. I feel that Senators LUGAR, MCCONNELL, and I sponsored good-faith legislation that addressed not only the failures of the Salvadoran Government and the machinations of subversives in the Salvadoran military, but also addressed the ruthless opposition of the FMLN to the success of Salvadoran democracy.

Our proposal did not thrill everyone on all sides of this issue. It had conservative and liberal critics. Our proposal was not intended to be the final word on the subject. It was not nonnegotiable. None of its sponsors feels that he has cornered the market on justice for El Salvador. It was however a sincere attempt to address the concerns that I would hope we all share for El Salvador.

The administration's proposal goes even further to answer some of the compliants voiced by Democratic critics of our current relationship with El Salvador. It was a bold, serious, wellcrafted proposal that would clearly impress the Government and military of El Salvador with United States dissatisfaction over the sorry condition of Salvadoran justice. Yet, the proposal also carefully avoided providing incentives to the FMLM to disengage from the peace process and throw El Salvador further into the chaos of war. Frankly, Mr. President, I thought most Members would recognize the seriousness and efficacy of the administration's proposal. I was wrong.

I am afraid that Democratic critics of administration policy have not even seriously examined the administration bill, nor the Lugar bill, nor any suggestions to construct a balanced, fair, and useful assistance package that might positively affect the situation in El Salvador. I fear that in some quarters of the Senate there is at present a determination to avoid cooperating with the administration and with the rest of Congress, unless that cooperation is based in total acquiescence in a policy that very well might contribute to the breakdown of cease-fire negotiations in El Salvador.

At one point in our negotiations on this question, I was instructed by a colleague to stop fighting the cold war in El Salvador. Well, that is not what I intend to do, Mr. President. But I do mean to hold all terrorists in El Salvador, whether they come from the right or the left, to the same standards. I do mean to oppose every impediment to Salvadoran democracy. I do mean to ensure that American aid serves American values. El Salvador can ill-afford any further experience with double standards.

Neither Republicans in Congress nor the Administration seek to sustain cold war hostilities in El Salvador. I might remind my colleagues that the perceived irrelevancy of cold war pursuits does not mean that the world will suddenly be free from conflict and threats to our security, as we were so vividly reminded by Saddam Hussein yesterday.

Further, I might suggest to those that accuse us of cold war thinking, that they save their injunction for the Cubans. Castro does seem intent on using El Salvador to pursue his cold war objectives. But no matter, our anticommunism, as I hope it is expressed in El Salvador, will be a component of our support for democracy. That support will include opposition to any threat to Salvadoran democracy whether it comes from Castro, or the FMLN, the military, the death squads—anywhere.

For some Senators to dismiss the administration as unserious about arriving at a sensible policy in cooperation with Congress is grossly unfair, unhelpful, and downright dangerous for Salvadorans. Their attitude strikes me as a significant step toward the reckless abandonment of Salvadorans to suffer the inhumanity of both the death squads and the FMLN.

Yesterday, I heard reports that 11 Salvadoran peasants were taken from their homes and killed. Those reports appear to have been a hoax. If they are, in our relief over this apparent fabrication, we should not forget how familar those reports sound when considering El Salvador's violent history. My first reaction to the reports was renewed despair. It is a feeling many of us have experienced before regarding El Salvador. To acquiesce in the abandonment of El Salvador is to submit to our despair. That is not a common characteristic of American policy.

We have responsibilities to help those people. Those responsibilities are not met and Salvadorans are not well-served by demagoguery and political posturing. We can do better than this.

My objections to the proposals from the other side of the aisle are numerous. Most obvious, is that they would effectively withhold 81 percent of all military assistance. This would be a powerful incentive for the FMLN to leave the negotiating table and pursue the fortunes of war before the United States recognizes what they have done, appropriates new money, and get it through the pipeline in what might be a vain attempt to save the constitutional Government of El Salvador. Obviously, rightwing death squads prefer to operate in a climate of violence created by FMLN offensives and would welcome the launching of a new one.

I have other concerns, about holding both leftwing terrorists and rightwing terrorists accountable for human rights abuses, for instance. I am also concerned that in our pursuit of justice in El Salvador we will go far beyond influencing judicial reform, separation of police functions from military functions—all worthy pursuits of American policy.

However, it is not the brief of the United States to order that—irrespective of the outcome of trials, irrespective of the process of judicial reform, irrespective of thorough and professional investigations of human rights abuses, irrespective of Government intentions to build a democratic political culture in El Salvador, irrespective of all these things—American outrage over the many gross human rights abuses that have been committed in El Salvador will not be satisfied unless we have a hanging.

No doubt, there are many Salvadorans who deserve to be executed for crimes against their people and their country. And let me add, Mr. President, those criminals are to be found on the left and on the right. Nevertheless, the United States can only hope to help serve the cause of Salvadoran justice by contributing to a reformation of the process. We cannot insist on the outcomes of trials. We can insist that El Salvador rapidly improve its system of justice. We cannot serve as the executioner of Salvadoran criminals.

Mr. President, at a later date I fear I will have further opportunity to discuss in more detail the various Salvador legislation pending in Congress. But I hope not. I hope that the next time I address the Senate on this subject it will be to announce my support for a bipartisan consensus on assistance to El Salvador. I sincerely hope that we do not let our differences come to a vote on the floor. For we know what the consequences will be. If one side prevails, then the FMLN will

be encouraged. If the other side prevails, the death squads will take comfort. No matter which side prevails, the long-suffering people of El Salvador will lose.

With the glaring exception of Cuba, the Western Hemisphere has made extraordinary progress toward democratization. The day of the autocrat, the totalitarian, the caudillo is closing forever in the Americas. Admittedly, that progress has been agonizingly slow and fitful in El Salvador. The United States must insist on a substantial strengthening of democratic values in El Salvador, and on permanent progress toward a resolution of conflict there.

To do that we will have to stay engaged in the problems of El Salvador, no matter how difficult and trying that obligation is. That must be the essence of a bipartisan agreement on El Salvador. I reemphasize my belief that this consensus could be achieved to the enormous benefit of El Salvador and to the eternal credit of the Congress, the administration, and the United States of America.

Mr. President, I implore my colleagues to work together with the administration to craft and conduct a policy in El Salvador that will better serve the interests of Salvadorans and will better serve American values. Let us abandon our own political agendas so that we will not abandon Salvadorans. Let us unite in our objectives for another, better El Salvador, at peace with itself and devoted to the rights of man.●

TEN-YEAR ANNIVERSARY OF SOLIDARITY

● Mr. RIEGLE. Mr. President, August 31 will mark the 10-year anniversary of Solidarity, the independent Polish trade union. I would like to take this opportunity to honor the members of Solidarity for their profound sacrifice and courageous struggle on behalf of freedom and democracy in Poland.

From its earliest days, Solidarity was a symbol of the right of people to determine their own future. It was a magnetic movement which drew together the Polish people in the hope that they would someday regain their liberty. With this appeal, Solidarity expanded in the early 1980's from a humble trade union to a national opposition movement; and, eventually to the only officially recognized independent trade union in the Eastern Bloc.

Solidarity, through the use of nonviolent strikes and demonstrations, brought the plight of the Polish worker to the attention of the world. With its popularity increasing faster than ever, the union expanded until its membership encompassed one-third of the entire Polish labor force. Tragically, Solidarity's challenge to the Communist government was brought to a screeching halt.

Fearing its own demise and a likely Soviet military intervention, Poland's Government invoked martial law, outlawed the union, and began a systematic crackdown on the leaders of Solidarity. Unwarranted jailings of Solidarity leaders, beatings of peaceful demonstrators by riot police, and constant surveillance of all Solidarity members were the tools of the brutal and entrenched Government. Solidarity, however, displayed the courage and resilience of a people staunchly dedicated to their freedom by enduring this persecution.

In the fall of 1988, after 7 years as an underground movement, economic stagnation and a new, more liberal Government in the Soviet Union allowed Solidarity to once again emerge as the leader in the Eastern European drive for democracy. The Polish Government, fearing an economic and political collapse, opened negotiations with Solidarity in an attempt to secure the support of the Polish people in solving Poland's economic woes. As a result of these negotiations, Poland entered uncharted waters—Solidarity was legalized and elections were scheduled for June 1988. Under this agreement, Solidarity was allowed to compete as a political party in the first fair elections in modern Eastern European history.

Solidarity flooded the country with campaign banners and posters, breathing life into the Polish people whose freedoms had been stifled under decades of Communist rule. The outcome of the elections was truly momentous. In less than 1 year, Solidarity went from the status of an outlawed, underground trade union to the dominant political force in the new Polish democracy. Never before had an Eastern European people so strongly rejected communism.

Recently, I met with a delegation from the Polish Legislature and discussed several serious challenges that lie ahead for Solidarity and Poland, such as a devastated economy, high unemployment, and tremendous labor unrest left behind by the previous Government. Though news of democracy in Eastern Europe is cause for celebration, let us not lose sight of Poland's formidable uphill battle in the transition to a republican form of government and a market economy. I firmly believe that we should fully support Poland and the other new, fledgling democracies. Increased financial aid and investment in Poland will help assure that Poland flourishes as a democracy and that it eventually develops into a leader among nations.

Mr. President, the Senate is unanimous in its profund respect and admiration for Solidarity and its leader Lech Walesa. Had it not been for the spark which Solidarity provided for the changes in Eastern Europe, the democratic revolution of 1989 and 1990 may not even have ever transpired. Therefore, as we look to the future and our relations with a free Poland and Eastern Europe, let us not forget the example set by Solidarity in enduring the subjugation of communism and fighting from the freedom of the Polish people.●

TRIBUTE TO THE ALLIED SERVICES' JOHN HEINZ INSTITUTE OF REHABILITATION MEDICINE

● Mr. HEINZ. Mr. President, I wish to pay tribute to the Heinz Senators, an award-winning junior wheelchair sports team from Wilkes-Barre, PA. The Heinz Senators, a wheelchair sports team sponsored by Allied Services' John Heinz Institute of Rehabilitation Medicine in Wilkes-Barre, are continuing a winning tradition. Since 1984, the team has showcased the courage, determination, and skill of wheelchair athletes. The athletes' accomplishments have been an inspiration to countless others, with and without disabilities.

The team started in 1984 when Pat Patterson, a spinal cord injured patient who was completing his rehabilitation at the Heinz Institute, expressed an interest in joining a wheelchair basketball team. However, finding enough young, physically disabled, wheelchair-bound individuals interested in competing in basketball was difficult. Patterson's recreational therapist at the institute encouraged him to become involved in individual and dual competition sports that would permit additional participation for the disabled. He and Danny Hergert, another rehabilitation patient at the institute, accepted the challenge.

In his first meet at Ellis Island, NY, Patterson won two gold medals, one bronze medal, and was named "Outstanding Novice." Hergert said the competition was tougher than he had imagined. "When you first start you don't know how fast the competition can be. It takes constant learning, mastering new techniques to gain speed." Hergert, Patterson, and the team's first female competitor, Denise Filippini, collected more than 100 medals, awards, and trophies, each in their first 3 years of competition.

The athletes compete in classes determined by their age, gender, location of the spinal cord injury, and the level of physical functioning. By 1987, the team had six active members who competed in track and field events, the slalom, which is an obstacle course, and table tennis. The team won 50 medals in sanctioned competitions in Maryland, Delaware, New Jersey, New York, and Washington, DC.

Ms. Filippini attended her first national championships in 1987 in Lawrenceville, NJ, and brought home a bronze medal in the discus. In 1988, the team topped the 100 mark in medals won in sanctioned competitions.

Three of the Heinz Senators competed at the 1988 Junior National Wheelchair Games at Johnson City, TN. David Birch won gold medals in the slalom and 50-meter freestyle swimming and Brian Thomas won a gold medal in the slalom. Denise Filippini also competed in the national championships but was not a medalist.

The 1989 Heinz Senators were truly a force to be reckoned with. The team won more than 130 medals during the season in meets sanctioned by the National Wheelchair Athletic Association. The team also garnered 15 medals at the 1990 Junior National Wheelchair Games at DeAnza College, Cupertino, CA. Four of the Heinz Senators, David Birch, Mark Cassarella, Denise Filippini, and Brian Thomas, competed at the national games. Mark Cassarella and Brian Thomas were among the 40 athletes chosen to compete for the United States in the World Disability Games in Miami, FL. The two northeastern Pennsylvania teenagers were the sole representatives of the State of Pennsylvania at the international games which attracted more than 600 of the top wheelchair athletes from 40 countries. Cassarella won three gold medals—in the 200-meter race, 400-meter race, and the slalom—and a commemorative third-place medal in the 1,500-meter race. Thomas earned the gold medal in the slalom.

Head coach Kelly Martin was 1 of only 10 of the Nation's coaches chosen to manage and coach the U.S. Junior Wheelchair Sports Team at the prestigious international competition. Currently, the team includes eight athletes, seven from northeastern Pennsylvania and one from New Jersey. Team members include David Bartnick, 18, of Mountaintop; David Cassarella, 19, of Drums; Denise Filippini, 17, of Larksville; Jason Salawu, 10, of Somerset, NJ; Jamie Saunders, 17, of Plymouth; and Brian Thomas, 18, of Shickshinny.

All members of the Heinz Senators compete in track and field events. Two of the athletes also compete in table tennis, two in weightlifting, and one in swimming.

The 1990 season has been another recordsetter for the Heinz Senators. In 5 regional competitions the team earned 181 medals, including 122 gold medals. In addition, three of the Senators won special awards in regional competition.

David Bartnick was named most outstanding male novice athlete at the Children's Specialized Hospital Invitational Wheelchair Meet, Rosello, NJ. David Birch was named most outstanding junior athlete at the Maryland Wheelchair Games at Salisbury. Brian Thomas was named most outstanding male athlete at the Tri-State Junior Regional Wheelchair Meet, North Brunswick, NJ.

Seven members of the team qualified to compete at the 1990 Junior National Wheelchair Games at Colorado State University, Fort Collins, CO, in July, although only six were able to attend. The Heinz Senators' relay team won two silver medals in the 4 x 100-meter relay and the 800-meter medley. Five of the athletes also won individual medals. Those include David Birch, gold medals in table tennis, 50-meter freestyle swimming, 25-meter butterfly swimming and the slalom (he also won a bronze medal in the 1,500-meter race); Jill Bodek, a bronze medal in the slalom; Mark Cassarella, gold medals in the javelin throw, shotput, discus, and slalom (he also won a silver medal in the 200-meter race and a bronze in the 100-meter race); Denise Filippini, a silver medal in the slalom; Brian Thomas, silver medals in table tennis, the slalom, and the 800-meter race. In addition, Thomas was chosen from among the 254 athletes in the competition to participate in the Prince of the Straits race. This honor is granted to the eight athletes with the fastest times in the 100-meter race without consideration of age or classification. The race can pit the youngest competitor against the oldest in an all-out sprint for the crown.

Mr. President, I am sure that you and my colleagues would agree that the athletes, under the direction of head coach Kelly Martin, director of therapeutic recreation at the Heinz Institute, and assistant coaches Dawn Hendrick and Mark Johnson, have made and continue to make sports history.●

WENDELL KIMBROUGH

● Mr. PRYOR. Mr. President, friends, relatives, and coworkers will gather in Arkansas to pay tribute to a man who has dedicated his life to public service in the U.S. Postal Service.

Wendell Kimbrough of Pocahontas, AR, retired as postmaster of that city after a career of more than 41 years in various posts within the Postal Service.

Beginning as a postal clerk in May of 1950, Wendell was elevated to the postmaster position at Alicia—Lawrence County—in 1954. While serving at Alicia, Wendell was instrumental in the training of more than 300 postmasters in Arkansas, Missouri, and Iowa. In 1978, he was promoted to the postmaster position at Pocahontas.

Throughout his career, Wendell has also been active in national postmaster organizations, serving as national vice president of the National League of Postmasters from 1974 to 1979. The league elected him national president in 1980. Wendell was of immense council to me when I came to the Senate in 1979 on matters of concern to the postal worker, as well as the postal customer.

Mr. President, while Wendell has retired from the Postal Service, he has certainly not retired from helping meet the needs of his local community. Wendell now serves as executive director of the Randolph County Chamber of Commerce.

Wendell Kimbrough is a prime example of the many dedicated public servants throughout the Federal Government who do their jobs without fanfare. I join his many friends in the tribute they give to him and his wife Erma Lee.●

EAS PROGRAM

● Mr. CONRAD. Mr. President, I strongly support passage of the Department of Transportation appropriations bill for fiscal year 1991, which the Senate passed August 4.

The bill contains two provisions which are of critical importance to North Dakota. First, the bill funds the Essential Air Service Program at a level which will allow the continued service to all communities which now participate in the program. While I would like to see the program expanded, I understand that budgetary pressures prevent such an expansion at this time.

I am a strong supporter of the EAS program. I believe that the commitment to continue air service to rural communities that was made when the airline industry was deregulated in 1978 must be continued. The citizens and businesses of the three communities in North Dakota which now participate in the program—Jamestown, Devils Lake, and Williston—depend on the air service that the program facilitates. Air service is crucial to rural communities' attempts to diversify their economies base. I am pleased that the Senate Appropriations Committee included $26 million for this program.

Second, the bill contains $4 million for the University of North Dakota's Center for Aerospace Sciences. These funds will allow transmission of aviation education classes to other designated airway science schools. Funds provided to the center since 1982 by the FAA and other private sources have resulted in an internationally acclaimed aviation education program. The center offers five 4-year degree programs which now enroll more than 1,000 students. The goals of the project are to improve curricula and to address the critical shortage of qualified and experienced aviation educa-

tion instructors in our Nation's colleges and universities.

I thank the chairman of the Transportation Subcommittee, Senator LAUTENBERG, for his consideration and support of these two very important programs.●

INTERPARLIAMENTARY CONFERENCE ON THE GLOBAL ENVIRONMENT

● Mr. GORE. Mr. President, it is increasingly apparent that many of the serious environmental problems that we see are not restricted to a given area, region or country, and are in fact, interregional or international. It is encouraging to see that the attention of the international community is being increasingly directed to these issues and to the need to develop cooperative and support programs to deal with them.

A recent article by Robert Cahn from the summer issue of 1990 Amicus Journal entitled "The Globetrotters" discusses these issues and some of the current efforts to deal with them.

Mr. Cahn attended and his article discusses the recent Interparliamentary Conference on the Global Environment, which the Senate had the honor to host and I had the honor to chair. I believe that this article will be of interest to my colleagues.

The material follows:

[From the Amicus, Journal, Summer 1990]

THE GLOBETROTTERS

(By Robert Cahn)

It would appear that arms control is out and global environmental solutions are in as legislative priorities worldwide. "We need to put and end to the arms race and convert it into a race for stabilizing the natural balance and preserving the environment. The new problem is to translate the environmental problem from the scientific question into a political question and the central political strategy of our time." That statement by Hermann Scheer, a member of the West German Bundestag, heralds the new priority among nations, as expressed at the recent Interparliamentary Conference on Global Environment (ICGE).

Scheer was one of 170 legislators from thirty-six nations convening in Washington this spring for working sessions aimed at finding legislative solutions to global environmental problems. In September, 1989, fifty-five legislators from seventeen countries had met for the same purpose in Tokyo. This June, members of the European Parliament, the Japanese Diet, and the U.S. Congress tackled global climate change, biodiversity of species, ocean pollution, toxic waste, and a host of other environmental challenges that know no national boundaries. Also in June, another group of environmental legislators met in Bellagio, Italy.

These conferences tap and strengthen the growing awarness among legislators throughout the the world that a shift in political priorities is under way, a redefining of national security in environmental rather than military terms. The old fear that a few national leaders with fingers on the nuclear button might change the face of the planet is being replaced by a new call for tangible laws and actions to avert disastrous global warming, reduce air and water polution, protect the world from toxic wastes and chemical and nuclear contaminants, preserve threatened plant and animal species and their habitats, and slow the pace of population growth.

At the World Environment Legislators Forum (WELF) in Tokyo last year, most of the meeting was taken up with presentations by parliamentarians on environmental problems in their own countries—mainly air and water pollution and toxic waste—although other environmental problems were discussed. The forum, organized by Diet member Takashi Kosugi, and supported by a grant from the Sasakawa Peace Foundation, was dominated by the Japanese. Twenty members of the Diet from six political parties attended, while the other nations were each represented by only one legislator.

Representative James Scheuer (D-New York) took part in the Tokyo meeting, and a year earlier had addressed the European Parliament on the need to start an organization of parliamentarians from industrialized nations to deal with the environment. In November 1989, Scheuer, Senators Al Gore (D-Tennessee), John Heinz (R-Pennsylvania), and a dozen colleagues met in Washington with fifteen legislators from the European Parliament to form Global Legislators Organized for a Balanced Environment (GLOBE). This June, Scheuer, Heinz, and Represenative Constance Morella (R-Maryland) met in Brussels with European Parliament legislators and six members of the Japanese Diet for a second GLOBE session. Among actions taken was an agreement to work for a ban on the export of toxic wastes to Third World countries. GLOBE has invited the Soviet Union to join, and expects to meet twice a year. Small teams of GLOBE members have been formed to deal with some of the environmental issues, exchange information, and highlight problems and potential legislative actions to solve them.

Also in June, legislators met in Bellagio to form a Planetary Partnership Coalition for Environment and Development to help developing and industrialized countries work together on the global environmental crisis. The legislators passed resolutions recommending actions by their respective countries on global climate change and other issues. The Bellagio workshop, attended by twenty-five legislators from thirteen countries, was sponsored by the Global Environment Program of the New York-based Parliamentarians for Global Action, which until recently had been working mainly on disarmament, peace, international debt, and monetary reform.

Also, an ad hoc, seven-member committee on the environment of the Interparliamentary Union (IPU) has been formed and is working to develop issues and proposals for the 1992 Conference on Environment and Development in Brazil.

The largest and most comprehensive of these environmental initiatives by legislators was the April conference in Washington, which was hosted by the U.S. Senate and organized and chaired by Gore with help from Senate colleagues John Chafee (R-Rhode Island), Heinz, Rudy Boschwitz (R-Minnesota), John Kerry (D-Massachusetts), Tim Wirth (D-Colorado), and Max Baucus (D-Montana).

As the leading global environmentalist in Congress, Gore introduced legislation authorizing the conference, and won approval for $500,000 in Senate funding. He is the author of several bills now before Congress, including the World Environment Policy Act, which addresses virtually all areas of the global environment: a package of legislation addressing protection of the stratospheric ozone layer; a resolution that would protect Antarctica from mining and minerals development and preserve the continent as a global ecological commons; and a bill for a Strategic Environmental Initiative focusing on developing marketing, and exporting technologies that will allow economic growth to continue in an environmentally sustainable manner.

When industrial and Third World nations having democratically elected members were invited to send delegations of up to seven members of their legislative bodies to the ICGE conference, the Senate sponsors were worried that it might not draw high level participants. They need not have been concerned. Five heads of senates or national assemblies, two former prime ministers, and more than a dozen legislators who are leading activists on environmental legislative committees were among the 170 delegates.

In his opening charge to the conference, Gore predicted that in the 1990s, the effort to save the world's environment will emerge as the central organizing principle for achieving and safeguarding human progress. "For the first time, all humankind stands united in the face of destruction of the earth's ecological system which supports life as we have known it," Gore said. "The fear of self-annihilation draws us even closer, perhaps, than did the threat of nuclear holocaust. The decisions to avoid nuclear war rest primarily in the hands of a few leaders in a handful of nations. But the choice to save our global environment will be made not by the few but by the many—billions of us on our own and with each other. The issues involved in living in balance with the earth's natural systems will demand scientific advances and tax the ingenuity of decision makers," he added. "But they are, at bottom, political challenges because real progress on the environment inevitably requires important changes in society. If prime ministers or presidents cannot or will not provide environmental leadership, then with or without them, the elected representatives of the peoples of the world will do whatever it takes to protect the global environment."

Responding to Gore's keynote, French National Assembly president Laurent Fabius affirmed that the two great interrelated questions of the twenty-first century will be the environment and development. "These questions will not be solved spontaneously, but by voluntary, organized, directed action taken by men and women who think not only in terms of individuals, but in terms of mankind," Fabius said. "We must address these two major questions in our parliaments because they do not have any solutions outside of democracy. The time has come for the parliaments of each nation to deal with the environment together."

The conferees put in long, full days. In small working groups they thrashed out goals and devised proposals and strategies, then debated the proposed actions in plenary sessions until reaching consensus on the issues. The legislators passed a number of general, and a few significant, specific proposals for action. And they established networks for continuing the dialogue and helping one another draft and perfect national legislation and develop international cooperation strategies for global treaties wherev-

er possible. They established a computer network for making data available and aiding in communication.

In the talks by experts such as Brazil's new secretary of the environment, Jose Lutzenberger; Jacques Cousteau; Carl Sagan; executive director of the United Nations Population Fund, Nafis Sadik; Indonesia's state minister for population and environment, Emil Salim; and atmospheric scientist Sherwood Rowland, delegates were afforded opportunities to ask questions or make comments.

The final package the legislators took home to use in their parliaments, assemblies, or senates was an eighty-seven page, single-spaced document (printed on recycled paper) full of legislative actions on global climate change, ozone depletion, sustainable development, population, deforestation, desertification, safeguarding of oceans and water resources, and preservation of biological diversity. The document included proposals for:

Global agreement to climate change to reduce greenhouse gas emissions by 50 percent from 1990 levels by 2010;

A global Marshall plan for sustainable development and the environment, initiated by developed nations to share the burdens in proportion to their abilities;

Establishing a Bank for Sustainable Development, funded so far as possible from the military and defense budgets of the major industrialized nations;

Doubling, to $9 billion a year; worldwide funding for population programs;

Granting Antarctia special protective status as a land of science, treaty park, and international wilderness area; and

Adoption of a convention on the preservation of biological diversity to be opened for signature by 1992.

In several hours of debate just before leaving Washington, 155 of the delegates agree on and signed a "Declaration of Environmental Interdependence." They pledged, "As the faithful stewards for future generations of the natural heritage," to take effective action now on a comprehensive set of fundamental principles, and to support personally, and urge their respective governments to implement the agreed-upon principles.

One regret to ICGE delegates was that the world's two most populous nations, China and India, were not represented. India did not send delegates because the Indian parliament was in session. China, which had sent a delegate to the WELF conference in Tokyo last year, was not invited to ICGE because of the U.S. Senate's expressed disapproval of the Tiananmen Square massacre, and also because without a democratically elected legislature. Chinese representatives would not have a means for implementing the legislative ideas worked out at the conference.

At the final session in Washington, a delegate from Czechoslovakia said he had received word from President Vaclav Havel to invite the Interparliamentary Conference to come to Prague in 1991 for a follow-up meeting. The acceptance of the invitation to meet in Czechoslovakia was followed by an invitation, and acceptance, for a third ICGE conference in Paris in 1992.

Legislators who have attended previous global environmental conferences acknowledged a number of unique elements of the ICGE meeting in Washington: recognizing the controversial topic of population growth as one of the major global environmental problems for discussions and action proposals; allowing sufficient time for workshops and for questions at all plenary sessions; and addressing the needs of developing countries and the importance of equity in dealing with the poorer nations. One-third of the delegates were from Third World countries, and the gathering was also unusual in the large number of women members of parliaments present.

One of the women, Attiya Inayatullah, was acclaimed by Gore as the "star" of the conference. The Pakistani legislator cochaired the population discussions, was a member of the conference coordinating committee, and her eloquent and timely interventions drew attention in plenary sessions. "I carry back to Pakistan not just a vision of what I am going to try to do in Pakistan or South Asia, but a global vision that we have to work together and that parliamentarians in many nations are now aware of the need for equity in dealing with the Third World and for sustainable development," Inayatullah said. While acknowledging the importance of the meeting and saying that she would present the conference recommendations to the speaker of the Pakistan assembly and the environment committee of the parliament, and to President Benazir Bhuto, Inayatullah startled the delegates with her concluding remark, "Many of us do not believe in conferences." Delegates gave her an ovation when she added: "We believe in work. We know the scientific facts. What we need is political action."

THE CUMBERLAND VALLEY VOLUNTEER FIREMEN'S ASSOCIATION

● Mr. SARBANES. Mr. President, the Cumberland Valley Volunteer Firemen's Association has worked to improve fire prevention and control efforts since its founding in 1901. As the association prepares for its 89th annual convention, I want to commend its members for their commitment to serving the people of Maryland and the surrounding States.

As a member of the congressional fire service caucus, I certainly recognize that fire prevention and control is a problem of significant national importance. Firefighters are our Nation's first line of defense against fires, floods, and an endless number of manmade and natural disasters. The work of volunteer firefighters is of critical importance and I want to thank them for the tremendous service that they provide to their fellow citizens.

In recent years, many have bemoaned our country's lack of national heroes. However, what they fail to realize is that we do have heroes in every fire hall across our Nation—men and women who risk their lives serving their fellow Americans. In my view, there are few persons more deserving of our respect and admiration than those who serve as firefighters.

Throughout my service in Congress, I have been a strong supporter of legislation designed to enhance our Nation's ability to prevent and fight fires. Following passage of the Federal Fire Prevention and Control Act, which I strongly supported, the National Fire Academy was established in the shadow of the Catoctin Mountains in Emmitsburg, MD. My State is proud to be the home of this respected and important Federal institution.

As my colleagues know, I have fought hard over the past few years for Congress to pass legislation that would designate the Fallen Firefighters Memorial on the National Fire Academy campus as the national memorial to all firefighters career or volunteer who die in the line of duty. This memorial, located in a beautiful setting on the Emmitsburg campus, is a fitting tribute to those who die in service to their communities. Mr. President, I am very pleased that my resolution, Senate Joint Resolution 77, was signed into law earlier this month.

The people of Maryland and neighboring States are indeed fortunate to be able to rely on the members of the Cumberland Valley Volunteer Firemen's Association and I hope that their convention will be both informative and enjoyable.●

EXTENDING AUTHORIZATION OF THE DEFENSE PRODUCTION ACT

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of H.R. 5432, a bill to extend the authorization of the Defense Production Act until September 30, 1990.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A bill (H.R. 5432) to extend the expiration date of the Defense Production Act of 1950.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 5432) was ordered to a third reading, was read the third time, and passed.

Mr. MITCHELL. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AUTHORIZING PRINTING OF EXHIBITION POSTERS

Mr. MITCHELL. Mr. President, I send a resolution to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A resolution (S. Res. 323) to authorize printing of exhibition posters.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 323) was agreed to, as follows:

Resolved, That 1,000 sets of posters, prepared by the U.S. Senate Commission on Art for the exhibition, "A Necessary Fence," shall be authorized for the use of the Senate.

Mr. MITCHELL. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

FEDERAL MARITIME COMMISSION AUTHORIZATION

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar No. 775, S. 2759, the Federal Maritime Commission authorization.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A bill (S. 2759) to authorize appropriations for fiscal year 1991 for the Federal Maritime Commission, and for other purposes, which had been reported from the Committee on Commerce, Science, and Transportation, with an amendment to strike all after the enacting clause, and inserting in lieu thereof the following:

That in fiscal year 1991, $15,894,000 is authorized to be appropriated for the use of the Federal Maritime Commission; except that for fiscal year 1991, and for each fiscal year thereafter, not to exceed $2,000 may be expended for official reception and representation expenses.

SEC. 2. Subsection (h) of section 18 of the Shipping Act of 1984 (46 App. U.S.C. 1718(h)) is amended by inserting "Advisory" immediately before "Commission shall", and by striking "its establishment" and inserting in lieu thereof "all of its members have been duly appointed".

SEC. 3. Section 19 of the Merchant Marine Act, 1920 (46 App. U.S.C. 876) is amended—

(1) in subdivision (b) of paragraph (1) by inserting "including intermodal movements, terminal operations, cargo solicitation, forwarding and agency services, non-vessel-operating common carrier operations, and other activities and services integral to transportation systems," immediately after "generally,"; and

(2) by adding at the end the following new paragraphs:

"(5) The Commission may initiate a rule or regulation under paragraph (1)(b) of this section either on its own motion or pursuant to a petition. Any person, including a common carrier, tramp operator, bulk operator, shipper, shippers' association; ocean freight forwarder, marine terminal operator, or any component of the Government of the United States, may file a petition for relief under paragraph (1)(b) of this section.

"(6) In furtherance of the purposes of paragraph (1)(b) of this section—

"(a) the Commission may, by order, require any person (including any common carrier, tramp operator, bulk operator, shipper, shippers' association, ocean freight forwarder, or marine terminal operator, or an officer, receiver, trustee, lessee, agent, or employee thereof) to file with the Commission a report, answers to questions, documentary material, or other information which the Commission considers necessary or appropriate;

"(b) the Commission may require a report or answers to questions to be made under oath;

"(c) the Commission may prescribe the form and the time for response to a report and answers to questions; and

"(d) a person who fails to file a report, answer, documentary material, or other information required under this paragraph shall be liable to the United States Government for a civil penalty of not more than $5,000 for each day that the information is not provided.

"(7) In proceedings under paragraph (1)(b) of this section—

"(a) the Commission may authorize a party to use depositions, written interrogatories, and discovery procedures that, to the extent practicable, are in conformity with the rules applicable in civil proceedings in the district courts of the United States;

"(b) the Commission may by subpoena compel the attendance of witnesses and the production of books, papers, documents, and other evidence;

"(c) subject to funds being provided by appropriations Acts, witnesses are, unless otherwise prohibited by law, entitled to the same fees and mileage as in the courts of the United States;

"(d) for failure to supply information ordered to be produced or compelled by subpoena in proceedings under paragraph (1)(b)(7) of this section, the Commission may—

"(i) after notice and an opportunity for hearing, suspend tariffs of a common carrier or that common carrier's right to use the tariffs of conferences of which it is a member, or

"(ii) assess a civil penalty of not more than $5,000 for each day that the information is not provided; and

"(e) when a person violates an order of the Commission or fails to comply with a subpoena, the Commission may seek enforcement by a United States district court having jurisdiction over the parties, and if, after hearing, the court determines that the order was regularly made and duly issued, it shall enforce the order by an appropriate injunction or other process, mandatory or otherwise.

"(8) Notwithstanding any other law, the Commission may refuse to disclose to the public a response or other information provided under the terms of this section.

"(9) If the Commission finds that conditions that are unfavorable to shipping under paragraph (1)(b) of this section exist, the Commission may—

"(a) limit sailings to and from United States ports or the amount or type of cargo carried;

"(b) suspend, in whole or in part, tariffs filed with the Commission for carriage to or from United States ports, including a common carrier's right to use tariffs of conferences in United States trades of which it is a member of any period the Commission specifies;

"(c) suspend, in whole or in part, an ocean common carriers right to operate under an agreement filed with the Commission, including any agreement authorizing preferential treatment at terminals, preferential terminal leases, space chartering, or pooling of cargoes or revenue with ocean common carriers;

"(d) impose a fee, not to exceed $1,000,000 per voyage; or

"(e) take any other action the Commission finds necessary and appropriate to adjust or meet any condition unfavorable to shipping in the foreign trade of the United States.

"(10) Upon request by the Commission—

"(a) the collector of customs at the port or place of destination in the United States shall refuse the clearance required by section 4197 of the Revised Statutes (46 App. U.S.C. 91) to a vessel of a country that is named in a rule or regulation issued by the Commission under paragraph (1)(b) of this section, and shall collect any fees imposed by the Commission under paragraph (9)(d) of this section; and

"(b) the Secretary of the department in which the Coast Guard is operating shall deny entry for purpose of oceanborne trade, of a vessel of a country that is named in a rule or regulation issued by the Commission under paragraph (1)(b) of this section, to any port or place in the United States or the navigable waters of the United States, or shall detain that vessel at the port or place in the United States from which it is about to depart for another port or place in the United States.

"(11) A common carrier that accepts or handles cargo for carriage under a tariff that has been suspended under paragraph (7)(d) or (9)(b) of this section, or after its right to use another tariff has been suspended under those paragraphs, is subject to a civil penalty of not more than $50,000 for each day that it is found to be operating under a suspended tariff.

"(12) The Commission may consult with, seek the cooperation of, or make recommendations to other appropriate Government agencies prior to taking any action under this section.".

SEC. 4. Notwithstanding sections 12106, 12107, and 12108 of title 46, United States Code, and section 27 of the Merchant Marine Act, 1920 (46 App. U.S.C. 883), the Secretary of Transportation may issue a certificate of documentation for the following vessels:

(1) Cherokee V (United States official number 570746).

(2) Ernestina (United States official number 136423).

(3) Salisa M (United States official number 265653).

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

Mr. BREAUX. Mr. President, I rise in support of S. 2759, a bill to authorize the appropriations for the Federal Maritime Commission, FMC, for fiscal year 1991. The bill simply authorizes $15,894,000 to be used for the functions of the FMC. This is the same amount requested by the President in his budget request and the same amount included in the FMC authorization bill passed by the House.

The FMC is an independent agency whose primary function is to regulate the practices of both international and domestic maritime trade. Its regulatory authority is contained in the Shipping Act of 1984, the Shipping Act of 1916, and other related statutes. The FMC reviews tariff filings and service contracts, but does not regulate international ocean transportation rates. It does approve freight rates for transportation between domestic ports and domestic offshore ports such as Hawaii and Puerto Rico. In addition to those duties, the FMC investigates and takes enforcement action in instances where unjust discriminatory rates have been found, or other improper activities exist among shippers, carrriers, and terminal operations.

This legislation is necessary for the FMC to carry out all of these functions that are so important to regulation of the waterborne commerce of the United States. I, therefore, urge its quick passage.

Mr. MITCHELL. Mr. President, on behalf of Senator BREAUX, I send to the desk a substitute amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Maine [Mr. MITCHELL], for Mr. BREAUX, proposes an amendment numbered 2600.

AMENDMENT NO. 2600

(Purpose: To make an amendment in the nature of a substitute)

Strike all after the enacting clause and insert in lieu thereof the following:

That in fiscal year 1991, $15,894,000 is authorized to be appropriated for the use of the Federal Maritime Commission; except that for fiscal year 1991, and for each fiscal year thereafter, not to exceed $2,000 may be expended for official reception and representation expenses.

SEC. 2. (Subsection 9h) of section 18 of the Shipping Act of 1984 is amended by inserting "Advisory" immediately before "Commission shall", and by striking "its establishment" and inserting in lieu thereof "all of its members have been duly appointed".

SEC. 3. Section 19 of the Merchant Marine Act, 1920 (46 App. U.S.C. 876) is amended—

(1) in subdivision (b) of paragraph (1) by inserting "including intermodal movements, terminal operations, cargo solicitation, forwarding and agency services, non-vessel-operating common carrier operations, and other activities and services integral to transportation systems," immediately after "generally,"; and

(2) by adding at the end the following new paragraphs:

"(5) The Commission may initiate a rule or regulation under paragraph (1)(b) of this section either on its own motion or pursuant to a petition. Any person, including a common carrier, tramp operator, bulk operator, shipper, shippers' association, ocean freight forwarder, marine terminal operator, or any component of the Government of the United States, may file a petition for relief under paragraph (1)(b) of this section.

"(6) In furtherance of the purposes of paragraph (1)(b) of this section—

"(a) the Commission may, by order, require any person (including any common carrier, tramp operator, bulk operator, shipper, shippers' association, ocean freight forwarder, or marine terminal operator, or an officer, receiver, trustee, lessee, agent, or employee thereof) to file with the Commission a report, answers to questions, documentary material, or other information which the Commission considers necessary or appropriate;

"(b) the Commission may prescribe the form and the time for response to a report and answers to questions; and

"(d) a person who fails to file a report, answer, documentary material, or other information required under this paragraph shall be liable to the United States Government for a civil penalty of not more than $5,000 for each day that the information is not provided.

"(7) In proceedings under paragraph (1)(b) of this section—

"(a) the Commission may authorize a party to use depositions, written interrogatories, and discovery procedures that, to the extent practicable, are in conformity with the rules applicable in civil proceedings in the district courts of the United States;

(b) the Commission may by subpoena compel the attendance of witnesses and the production of books, papers, documents, and other evidence;

"(c) subject to funds being provided by appropriations Act, witnesses are, unless otherwise prohibited by law, entitled to the same fees and mileage as in the courts of the United States;

"(d) for failure to supply information ordered to be produced or compelled by subpoena in proceedings under paragraph (1)(b)(7) of this section, the Commission may—

"(i) after notice and an opportunity for hearing, suspend tariffs of a common carrier or that common carrier's right to use the tariffs of conferences of which it is a member, or

"(ii) assess a civil penalty of not more than $5,000 for each day that the information is not provided; and

"(e) when a person violates an order of the Commission or fails to comply with a subpoena, the Commission may seek enforcement by a United States district court having jurisdiction over the parties, and if, after hearing, the court determines that the order was regularly made and duly issued, it shall enforce the order by an appropriate injunction or other process, mandatory or otherwise.

"(8) Notwithstanding any other law, the Commission may refuse to disclose to the public a response or other information provided under the terms of this section.

"(9) If the Commission finds that conditions that are unfavorable to shipping under paragraph (1)(b) of this section exist, the Commission may—

"(a) limit sailings to and from United States ports or the amount or type of cargo carried;

"(b) suspend, in whole or in part, tariffs filed with the Commission for carriage to or from United States ports, including a common carrier's right to use tariffs of conferences in United States trades of which it is a member of any period the Commission specifies;

"(c) suspend, in whole or in part, an ocean common carrier's right to operate under an agreement filed with the Commission, including any agreement authorizing preferential treatment at terminals, preferential terminal leases, space chartering, or pooling of cargoes or revenue with ocean common carriers;

"(d) impose a fee, not to exceed $1,000,000 per voyage; or

"(e) take any other action the Commission finds necessary and appropriate to adjust or meet any condition unfavorable to shipping in the foreign trade of the United States.

"(10) Upon request by the Commission—

"(a) the collector of customs at the port or place of destination in the United States shall refuse the clearance required by section 4197 of the Revised Statutes (46 App. U.S.C. 91) to a vessel of a country that is named in a rule or regulation issued by the Commission under paragraph (1)(b) of this section, and shall collect any fees imposed by the Commission under paragraph (9)(d) of this section; and

"(b) the Secretary of the department in which the Coast Guard is operating shall deny entry for purpose of oceanborne trade, of a vessel of a country that is named in a rule or regulation issued by the Commission under paragraph (1)(d) of this section, to any port or place in the United States or the navigable waters of the United States, or shall detain that vessel at the port or place in the United States from which it is about to depart for another port or place in the United States.

"(11) A common carrier that accepts or handles cargo for carriage under a tariff that has been suspended under paragraph (7)(d) or (9)(b) of this section, or after its right to use another tariff has been suspended under those paragraphs is subject to a civil penalty of not more than $50,000 for each day that it is found to be operating under a suspended tariff.

"(12) The Commission may consult with, seek the cooperation of, or make recommendations to other appropriate Government agencies prior to taking any action under this section.".

SEC. 4. Notwithstanding sections 12106, 12107, and 12108 of title 46, United States Code, and section 27 of the Merchant Marine Act, 1920 (46 App. U.S.C. 883), the Secretary of Transportation may issue a certificate of documentation for the following vessels:

(1) Angelos, hull identification number HAZ1432C0173 and State of Hawaii registration number HA 1432 C.

(2) Arctic Sounder, United States official number 569927.

(3) Bounty, United States official number 950956.

(4) Camelot, United States official number 923202.

(5) Cherokee V, United States official number 570746.

(6) Ernestina, United States official number 136423.

(7) Ghostrider, United States official number 906121.

(8) He'Enalu, State of Hawaii registration number HA 843 CP.

(9) Job Site, United States official number 595013.

(10) Kainalu, State of Hawaii registration number HA 779 CP.

(11) Lady Rose Anne, United States official number 603040.

(12) Mariner III, United States official number 225459.

(13) Ocean Prowler, United States official number 632751.

(14) Pacific Pearl, hull identification number MRY10161M76H414.

(15) Pumpkin, United States official number 627259.

(16) Rose, United States official number 928811.

(17) Salisa M, United States official number 265653.

(18) Sea Devil, United States official number 569316.

(19) Sea Nugget, State of Alaska registration number AK 2233 E.

(20) Sinbad, formerly Sangria, hull identification number 15846 and State of Alaska registration number AK 3650.

(21) Solitaire, United States official number 521894.

(22) Swee'Pea, hull identification number PBL32012K990 and State of Alaska registration number AK 8550 L.

(23) Weatherbird, United States official number 527918.

(24) Weatherbird II, United States official number 652213.

The PRESIDING OFFICER. The question is on agreeing to the amendment in the nature of a substitute.

The amendment (No. 2600) was agreed to.

Mr. MITCHELL. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on agreeing to the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, and was read the third time.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Commerce Committee be discharged from H.R. 4009, the House companion, and that the Senate proceed to its immediate consideration; that all after the enacting clause be stricken, and the text of S. 2759, as amended, be inserted in lieu thereof; that the bill be read a third time and passed; and the motion to reconsider be laid upon the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

MEASURES INDEFINITELY POSTPONED

Mr. MITCHELL. Mr. President, I ask unanimous consent that the following Calendar items be indefinitely postponed: 525, 527, 528, 529, 530, 591, 594, 596, 597, 598, 599, 752, and 764.

The PRESIDING OFFICER. Without objection, it is so ordered.

MEASURE INDEFINITELY POSTPONED

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Calendar Item No. 775 be indefinitely postponed.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONSUMER PRODCT SAFETY COMMISSION AUTHORIZATION

Mr. MITCHELL. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 605.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House insist upon its amendments to the bill (S. 605) entitled "An Act to authorize appropriations for the Consumer Product Safety Commission, and for other purposes", and ask a conference with the Senate on the disagreeing votes of the two Houses thereon.

Ordered, That Mr. Dingell, Mr. Walgren, Mr. Slattery, Mr. Lent, and Mr. Ritter be the managers of the conference on the part of the House.

Mr. MITCHELL. I move the Senate disagree to the House amendments, and agree to the request of the House for a conference on the disagreeing votes of the two Houses, and that the Chair be authorized to appoint conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. HOLLINGS, Mr. BRYAN, Mr. GORE, Mr. DANFORTH, and Mr. GORTON conferees on the part of the Senate.

TONGASS NATIONAL FOREST WILDERNESS ACT

Mr. MITCHELL. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on H.R. 987.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House disagree to the amendments of the Senate to the bill (H.R. 987) entitled "An Act to amend the Alaska National Interest Lands Conservation Act, to designate certain lands in the Tongass National Forest as wilderness, and for other purposes", and ask a conference with the Senate on the disagreeing votes of the two Houses thereon.

Ordered, That the following Members be the managers of the conference on the part of the House:

From the Committee on Interior and Insular Affairs, for consideration of the House bill and the Senate amendment, and modifications committed to conference: Mr. Udall, Mr. Miller of California, Mr. Sharp, Mr. Markey, Mr. Rahall, Mr. Vento, Mr. Gejdenson, Mr. Kostmayer, Mr. Young of Alaska, Mr. Marlenee, Mr. Craig, Mr. Rhodes, and Mr. Robert F. Smith.

From the Committee on Agriculture, for consideration of titles I, II, and IV of the House bill, and titles I and III and section 402 of the Senate amendment, and modifications committed to conference: Mr. de la Garza, Mr. Volkmer, and Mr. Morrison of Washington.

As an additional conferee, for consideration of the House bill and the Senate amendment, and modifications committed to conference: Mr. Mrazek.

Mr. MITCHELL. I move that the Senate insist on its amendments, and agree to the request for a conference and that the Chair be authorized to appoint conferees on the part of the Senate.

The motion was agreed to; and the Chair appointed Mr. JOHNSTON, Mr. BUMPERS, Mr. FORD, Mr. BRADLEY, Mr. WIRTH, Mr. MCCLURE, Mr. MURKOWSKI, Mr. WALLOP, and Mr. GARN conferees on the part of the Senate.

RYAN WHITE COMPREHENSIVE AIDS RESOURCES EMERGENCY ACT—CONFERENCE REPORT

Mr. MITCHELL. Mr. President, I submit a report of the committee of conference on S. 2240 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 2240) to amend the Public Health Service Act to provide grants to improve the quality and availability of care for individuals and families with HIV disease, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of Friday, August 3, 1990.)

Mr. KENNEDY. Mr. President, I am pleased to bring to the floor of the Senate the conference report on the Ryan White Comprehensive AIDS Resources Emergency Act of 1990. I am also proud to stand once again with my friend and colleague from Utah, Senator HATCH, who has made an ex-

traordinary contribution to our Nation's battle against AIDS.

For 9 years, America has been grappling with the devastating effects of AIDS. Up to a million of our fellow citizens are already infected with the virus and are almost certain to face serious health problems as a result of HIV disease.

This critically important legislation provides emergency relief for the cities hit hardest by AIDS and funding for States to respond to the mounting need for AIDS health care, early intervention, and essential support services in both urban and rural areas.

In terms of pain, suffering and cost, AIDS is a disaster as severe as any earthquake, hurricane or drought. Because this tragedy continues to unfold, even now we cannot tally the full extent of devastation.

Health care institutions—and the vulnerable Americans who depend on these institutions—are in crisis.

AIDS by itself is certainly not the only cause of these problems. But it is adding to the stress that is leading toward a total breakdown of our health care system.

In passing this conference report, we respond to this emergency with financial assistance essential to the operation of effective and cost efficient alternatives for the delivery of health and support services to individuals and families with HIV disease.

This report is the product of months of consensus building and bipartisan cooperation. It consolidates the best efforts of both the Senate and the House in an effort to provide comprehensive care to hundreds of thousands of Americans in need.

The report contains essentially all of the components of the Senate bill which passed in late May by an overwhelming vote of 95 to 4. In addition, the Senate conferees have protected the integrity of all amendments that were added on the floor during consideration of the legislation.

The conference report also includes a State and a categorical HIV early intervention program and a pediatric AIDS research initiative which have been put forward by the House. These provisions had strong bipartisan support in that body and passed by a vote of 403 to 18.

Two successive, national commissions on AIDS have recommended Federal funding to develop the kind of care networks authorized in this report. Hundreds of national professional, business, labor, and religious organizations have helped to shape the Ryan White Act.

It is supported by the mayors, county executives, and Governors—and requires that all levels of government join together in providing services and maximizing resources in the battle against AIDS.

Until we take action to organize and integrate HIV health services, both costs and chaos will continue to increase—with devastating consequences for individuals and families throughout the United States.

This Nation can, and now will, do better.

America responded within days to the California earthquake last fall. We have pledged hundreds of billions of dollars to rescue the savings and loan industry. AIDS is a comparable disaster and we now begin to respond accordingly.

This conference report is about more than money. It is about caring and the American tradition of reaching out to people who are suffering and in desperate need of help.

As a nation, we pride ourselves on our ability to rally in the face of adversity. I am pleased that the Congress has affirmed its commitment to providing care and to showing compassion to people living with AIDS in communities throughout America.

I urge the Senate to approve the conference report.

Mr. LAUTENBERG. Mr. President, I rise in strong support of the conference report on the Ryan White Comprehensive AIDS Resources Emergency Act of 1990. I was an original cosponsor of this legislation which authorizes critical funds to help our cities, States, hospitals, and health care workers meet the needs of the ever-growing AIDS population.

The AIDS epidemic in this Nation has reached crisis proportions. To date, nearly 140,000 AIDS cases have been reported to the Centers For Disease Control. The Ryan White Comprehensive AIDS Resources Emergency Act of 1990 reponds to the spiraling AIDS epidemic by authorizing critically needed funds for AIDS care programs.

In our cities and countries throughout the Nation, hospitals, clinics, and health care providers are struggling to provide services to people with AIDS and HIV disease. Many States and local governments lack the necessary resources to develop long-term strategies to combat the epidemic.

Public health systems are being pushed to the absolute limits as they struggle to fight the AIDS epidemic. Particularly our urban hospitals—already overburdened and understaffed—have described a "Calcutta-like" environment where patients spend weeks lying in the corridors waiting for hospital beds that are occupied. Rural areas have been reporting the most dramatic increases in AIDS cases over the past 3 years, and rural health care systems are having an increasingly difficult time meeting the challenges of AIDS care.

The Federal Government has spent money on AIDS research. However, 10 years into the AIDS epidemic, the Federal response to AIDS care has been minimal. Without Federal assistance this year, many health care professionals say that the AIDS crisis will result in the collapse of the public health system as we currently know it.

When Hurricane Hugo struck South Carolina, we responded immediately with assistance to help devastated cities and counties recover from the damage.

When an earthquake rocked northern California, we responded immediately with the assistance needed to rebuild roads and bridges.

When a drought threatened our farm States, we responded with assistance to avert a crisis in the agricultural community and to sustain the livelihood of our farmers.

The AIDS disaster is no different, and we must respond in the same way. We must provide relief to the areas where the AIDS epidemic is threatening public health systems and devastating entire communities. We must provide resources to help our States, cities, counties, and health care providers develop long-term plans to address the AIDS epidemic.

The Ryan White Comprehensive AIDS Resources Emergency Act of 1990 is a balanced bill that responds to the AIDS epidemic on a number of fronts. It authorizes $275 million in fiscal year 1991 for areas that have been hardest hit by the AIDS epidemic and are in desperate need of emergency relief.

Two of those areas—Newark and Jersey City—are in my own State of New Jersey. The Newark metro area has reported 3,885 AIDS cases to the Centers For Disease Control through June 1989. The Jersey City metro area has reported 1,537 AIDS cases. The funds authorized for these and other hard-hit areas will help ease the tremendous burden on health care systems.

I would like to thank the chairman and ranking minority member of the Labor and Human Resources Committee for agreeing to include the Jersey City area in title I of the bill. Although Jersey City has the third highest AIDS incidence rate in the Nation, it was not eligible for emergency relief in the original House and Senate versions of the bill because it had not reported 2,000 AIDS cases to the Centers For the Disease Control.

I submitted an amendment to the chairman and ranking minority member of the committee urging that a modification be made to include incidence rates in the emergency relief section of the bill so Jersey City would be able to qualify for the relief it so desperately needs. I also testified before the House Health and Environment Subcommittee of the Energy and Commerce Committee on this amendment and asked that the language be

included in the House version of the bill.

With the critical support of Representatives GUARINI and RINALDO, the amendment was included in the House version of the bill. I intended to offer the amendment during Senate consideration of the bill. However, the chairman and ranking minority member of the Labor and Human Resources Committee assured me that they would accept the language during conference, which they did. For that reason I did not offer the amendment.

I thank the chairman and ranking minority member of the Labor and Human Resources Committee for accepting the language which would enable the Jersey City metro area to qualify for emergency relief grants because it has an incidence rate that exceeds 0.25 percent of the population. Emergency relief aid is critical to the area, and I appreciate their cooperation on this matter.

Mr. President, this bill goes well beyond providing emergency relief to hard-hit areas. It also authorizes dollars for States to assist additional impacted areas and to support comprenhesive programs that respond to the devastating AIDS epidemic. For fiscal year 1991, it authorizes $275 million for these programs. These funds will be critical to my State of New Jersey. New Jersey has the fifth largest AIDS population nationwide, and through June 1989 the State had reported 9,143 AIDS cases to the Centers for Disease Control.

The bill authorizes $20 million in fiscal year 1991 for HIV health services research, including a Pediatric AIDS Research Demonstration Program. New Jersey has the third largest number of pediatric AIDS victims nationwide—237 reported cases. The University of Medicine and Dentistry of New Jersey in collaboration with Children's Hospital of Newark recently received a $1.3 million Federal grant for a Pediatric AIDS Resource Center to help address this sad problem in New Jersey and elsewhere. The need to provide more Federal dollars for pediatric AIDS research and services to tackle the tragic pediatric AIDS problem in New Jersey and throughout the Nation is critical.

And, the bill authorizes $230 million in fiscal year 1991 for early intervention programs.

Mr. President, this is a landmark piece of legislation, and I am proud to be an original cosponsor. But our efforts cannot stop with approval of this conference report. Our efforts must now focus on securing appropriations for the programs authorized in this bill. Six members of the Senate Appropriations Committee—Senators ADAMS, D'AMATO, LEAHY, MIKULSKI, FOWLER, and JOHNSTON—have already joined me in sending a letter to the chairman and ranking minority member of the Labor, Health and Human Services, Education Subcommittee urging them to fully fund the programs authorized in the Senate-passed version of the bill.

Mr. President, our hospitals and cities and counties are in dire need of the help offered by the programs in the Ryan White Comprehensive AIDS Resources Emergency Act of 1990. Today, we are one step closer to providing them with the assistance they need and deserve.

Mr. CRANSTON. Mr. President, I strongly support the pending conference report on S. 2240, the Ryan White Comprehensive AIDS Resource Emergency Care Act of 1990. As a cosponsor of the original Senate bill, and as author of legislation that led to the model of care consortia incorporated herein, I am deeply pleased that this report is before us today.

I believe this legislation is among the most important pieces of health legislation yet to pass the Congress. This bill provides Federal leadership to ensure that people with AIDS have access to vital health and social services. I recently met with representatives of State AIDS organizations and community-based service organizations that provide services to people with AIDS in California. These leaders gave me a compelling presentation of the facts of the AIDS care crisis. There is no doubt in my mind that without this legislation, people with AIDS will not get the services they need.

Mr. President, as of July 1, more than 139,000 Americans have been diagnosed with AIDS and 84,000 Americans have died of this terrible disease. As many as 1 million Americans may be infected with the HIV. By 1993—just 3 short years from now—we can expect anywhere from 61,000 to 98,000 new cases of AIDS and between 150,000 and 225,000 people alive with AIDS. In addition to the human tragedy, the impact on our health care systems has been and will continue to be devastating.

It is estimated that by next year providing direct medical care to persons with AIDS will cost $8.5 billion. The number of with AIDS who are without health insurance is increasing. Disease-slowing drugs—the only available tool to fight AIDS—are extremely expensive. The cost of uncompensated care to people with AIDS is being borne by public hospitals, who treat the largest proportion of low-income patients. Many of our public health systems are on the verge of collapsing because of the growing numbers of people with AIDS.

Without question, Federal help is needed. And this bill provides that help.

SUMMARY OF THE CARE ACT

Mr. President, this legislation would provide emergency relief to those metropolitan areas hardest hit by the AIDS epidemic. Funds would be available to support hospitals, clinics, community health centers, and other facilities serving a disproportionate share of low-income individuals and families with HIV disease. The bill also provides funds for delivery of early intervention services and for HIV health services research.

Fifty percent of the funding under title I—for which $275 million is authorized—would be distributed immediately to areas with more than 2,000 AIDS cases, or a per capita incidence of 25 per 100,000. The remaining funds would be awarded to areas on the basis of need, local investment, and other factors.

Title II—for which $275 million is authorized—would provide funds to develop networks of consortia of care to provide a continuum of care to individuals and families with HIV disease in both urban and rural areas. In addition, the funds can be used to deliver outpatient, home health, and support services to low-income individuals with HIV, developing and funding mechanisms to assure continuity of health insurance coverage, and to provide therapeutics that can prevent serious health deterioration.

Title III—authorized at $230 million—is for the early intervention services. Tests, drugs, and treatments are available to slow the progress of HIV infection. Under this title, individuals who test HIV positive could receive HIV testing, pretesting and posttesting counseling, diagnostics, and therapeutics. As a condition of receiving funds, grantees must agree to maintain confidentiality. An additional $75 million is authorized in the form of categorical grants for public and nonprofit entities delivering primary health care in community and migrant centers, home health centers, hemophilia centers, and others.

Title IV—authorized at $20 million—directs the Agency for Health Care Policy and Research to evaluate the impact and cost effectiveness of various models of AIDS care and to assess the special needs of rural areas and establishes a Pediatric AIDS Research Demonstration Program to be administered cooperatively by the HRSA and the NIH.

Mr. President, I want to congratulate the chairman and ranking member of the Labor and Human Resources Committee, Mr. KENNEDY and Mr. HATCH, for their truly outstanding efforts in bringing this bill to the Senate today. My distinguished House colleague from California [Mr. WAXMAN], is also to be congratulated for his leadership. They have brought us an outstanding conference report on a most critical health issue, and I am proud to support it.

Mr. DURENBERGER. Mr. President, I rise to ask for a clarification

from the managers of this conference report. It is my understanding that in drafting the conference report, language concerning the coordination of counselor training under section 2651 of the report was inadvertently excluded. Mr. President, I would like to know if it is the managers' intention that entities which receive funding under section 2651 should, to the extent practicable and appropriate for the needs of the populations to be served through the entity, make a good-faith effort to coordinate their training programs for counselors with training programs offered by the State?

Mr. KENNEDY. Mr. President, I thank my colleague from Minnesota for raising this issue. He is correct in stating that this language was inadvertently excluded, and I will state, for the record, that it is the managers' intention that entities which receive funding under section 2651 should, to the extent practicable and appropriate for the needs of the populations to be served through the entity, make a good-faith effort to coordinate their training programs for counselors with training programs offered by the State.

Mr. HATCH. Mr. President, I also thank the Senator from Minnesota for raising this issue, and I agree with Senator KENNEDY's statement on the managers' intention concerning coordination of counselor training under section 2651 of the conference report.

Mr. President, I urge my colleagues to join me in supporting the conference report on S. 2240. This legislation responds to the diverse treatment needs of those who have AIDS, including children, and provides relief for hospitals and other community programs straining under the economic burden to provide compassionate care.

Mr. President, most of us have heard the stories of family members whose loved ones are suffering from AIDS. We have seen babies with AIDS abandoned in hospital wards. And, we have seen both our rural and urban health care systems strained to the very limit.

The conference report responds to these cries for help. It will fill in the cracks in our health care system, and it sends a message of hope, care, and charity. It sends the message to families who have a child with HIV that they are not forgotten, that we want to help.

SUMMARY OF THE CONFERENCE AGREEMENT

Title I of the legislation provides emergency relief to metropolitan areas hardest hit by the AIDS epidemic—those with more than 2,000 reported cases of AIDS. First, funds would be used to support health care facilities serving a disproportionate share of low-income individuals with HIV disease and to enhance inpatient care. Second, funds would be used to deliver comprehensive outpatient health care and support services, including home care and management.

Title II provides block grants to States to improve the quality, availability, and effectiveness of health care to individuals and families with HIV disease. I believe block grants are the best way for States to retain flexibility in serving their citizens. Each State has differing needs when it comes to caring for their citizens with the HIV disease.

States could use funds to develop consortia in both urban and rural areas to deliver a comprehensive continuum of care to individuals, children, and families with HIV disease. Funds would also be used to provide outpatient health care, including home health care, and support services to low-income AIDS patients.

Title II also contains a requirement that up to 15 percent of a State's funds shall be used to provide services to infants, children, women, and families with HIV disease.

Title III of the bill provides State and categorical grants for the delivery of early intervention services for individuals with HIV disease and those who may be at increased risk. Grantees must provide HIV testing, counseling, diagnostics, and such therapeutics as are medically indicated. In addition, case management and referral to comprehensive service providers would be covered under this title.

Title IV of the bill requires the Department of Health and Human Services to evaluate the impact and cost effectiveness of various models of AIDS care and to assess the special needs of rural areas. It also establishes a pediatric AIDS research demonstration program to provide experimental treatment to children and family members under one roof and in the context of comprehensive primary care.

CONCLUSION

This Nation owes a debt of thanks to those health care institutions and health care professionals that have reached out to help patients, particularly poor patients, with this terrible disease. But they need more than our thanks.

The conference report supports hospitals and care facilities that have been serving the largest number of low-income AIDS patients. It not only helps these facilities directly, but also by expanding the availability of better, more appropriate, and less costly alternatives to hospital care. Community-based outpatient services, such as home care, offer patients and their families more compassionate, dignified, and cost-effective care. Taken together with the support for early intervention services, this is a comprehensive response to the public health crisis brought on by the AIDs virus.

Today, in adopting the conference report, we join together to fight a common enemy—the AIDS epidemic and the pain and suffering it causes. Through this legislation, we show our compassion for its victims and their families and demonstrate to those who feel abandoned that we care.

In closing, I compliment my fellow conferees and the many staff members who have worked diligently to come up with this conference report. I congratulate the many Senators and Representatives who have contributed to it.

Mr. President, I urge the Senate to adopt the conference report on S. 2240 and send this legislation expeditiously to President Bush for his signature.

Mr. MACK. Mr. President, I want to commend Senator KENNEDY and Senator HATCH, as well as the other members of the Conference Committee, for their diligence, leadership, and persistence in successfully completing this important conference. I am particularly pleased that this bill recognizes that public or nonprofit entities which are not health care providers per se, but which research, develop, and coordinate comprehensive HIV case management and care delivery services are eligible to receive some of the principle providers of AIDS services throughout the United States are not health care providers.

Mr. GRAHAM. It is our understanding that such nonprofit organizations may enter into contracts and agreements with both for-profit and nonprofit health care providers and professionals. Are we correct in our understanding that such a nonprofit organization is permitted under this bill to contract for direct health care services with for-profit, as well as nonprofit, providers?

Mr. HATCH. Yes. Nonprofit organizations which are not health care providers per se can certainly receive grant money under this bill and use that money to enter into contracts and other agreements with for-profit health care providers and professionals.

Mr. MACK. We also want to ensure that such organizations would be eligible to be a member of a local health services planning council. Is this correct?

Mr. HATCH. Yes. Such an organization, while not a health care provider, but which is coordinator of local services for people with AIDS, certainly would be eligible to be a member of a local planning council.

The PRESIDING OFFICER. Is there further debate? If not the question is on agreeing to the conference report.

The conference report was agreed to.

THANK YOUS

Mr. KENNEDY. Mr. President, in passing the conference report on the

Ryan White CARE Act of 1990, the Congress sends a strong message of hope—that help is on the way.

At this time I would like to thank the Senate and House conferees and their staffs who worked tirelessly on this critically important initiative. I would like to thank Terry Beirn, Deborah vonZinkernagel, and Michael Iskowitz of my staff for their efforts. I would also like to salute Senator HATCH and his staff, Nancy Taylor and her twins, Judy Lewis, and Chris Iverson for their ongoing willingness to be partners in this important work.

I would also like to salute Senator PELL and Lauren Gross, Senator DURENBERGER and Tom Bour, Senator JEFFORDS and Vicki Caldiera, Senator DODD and Jeff Anders, and Senator METZENBAUM and Joel Johnson. The Senate conferees worked closely together and should be extremely pleased with the final result. We could not proceed without thanking Bill Baird of the Senate Legislative Counsel who, on several occasions, worked around the clock and 7 days a week in order to complete this conference report prior to the August recess. His dedication is much appreciated.

I would also like to take the opportunity to thank some of the countless individuals and organizations who helped to make this legislation possible.

First, I would like to thank Jeannie White for her courage and her willingness to open her life to the Congress and the American people and to carry on Ryan's work.

She has given us the strength to embrace AIDS as a human issue and not a political issue.

I would like to thank Tom Sheridan of the AIDS Action Council who has been the chief organizer behind this legislation; his efforts have gone far beyond the call of duty. He has galvanized the NORA Coalition to an extremely productive end.

Among the member organization I would like to thank Jean McGuire, Donna Richardson, Richard Johnson, Tom Josephs, Dave Cavenaugh, Herb Kuhn, George Degnon, Margret Skelley, Ann Danelski, Karen Friedman, Steve Smith, Lori Rogovin, Bill Baily, Sandy Harding, Miguel Gomez, Ken South, Susan Cambell, Vivian Gabor, Jay Michaud, Leslie Wolfe, Diane Burke, Jane O'Grady, and Bill Borweegan.

I would also like to thank several special individuals from the National Commission on AIDS for their invaluable contributions—Dr. June Osborn, Belinda Mason, and Carlton Lee.

I would like to thank Elizabeth Taylor, Matilde Krim, and the staff at the American Foundation for AIDS Research for their ongoing support. I would also like to thank Elizabeth Glaser and Susan DeLaurentis, of the Pediatric AIDS Foundation, for their commitment.

Finally, I would like to thank people living with AIDS and their caregivers for alerting us to a crisis that could not be ignored and for helping us to be a more humane and compassionate society.

Mr. MITCHELL. I move to reconsider the vote by which the conference report was agreed to.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

INDIAN LAW ENFORCEMENT REFORM ACT

Mr. MITCHELL. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on H.R. 498.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House agree to the amendment of the Senate to the bill (H.R. 498) entitled "An Act to clarify and strengthen the authority for certain Department of the Interior law enforcement services, activities, and officers in Indian country, and for other purposes," with the following amendments:

Page 12, strike out all after line 19 over to and including line 18 on page 13.

Page 13, line 20, strike out "Sec. 12", and insert "Sec. 11".

Page 14, strike out lines 4 through 18.

Page 14, line 20, strike out "Sec. 14", and insert "Sec. 12".

Mr. MITCHELL. I move that the Senate concur in the House amendments to the Senate amendment.

The PRESIDING OFFICER. The question is on the motion.

The motion was agreed to.

Mr. MITCHELL. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

VLADIMIR TSIVKIN

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar No. 782, Senate Resolution 313, relating to Vladimir Tsivkin.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A resolution (S. Res. 313) relating to Valdimir Tsivkin.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

Mr. LAUTENBERG. Mr. President, I very much appreciate the willingness of the leadership to bring Senate Resolution 313 before the Senate, given the crush of work we face before we recess until September. The resolution is cosponsored by Senators DECONCINI, LIEBERMAN, DODD, METZENBAUM, BINGAMAN, MIKULSKI, WIRTH, WALLOP, D'AMATO, DIXON, LEVIN, FOWLER, and BRADLEY. It was approved this afternoon by the Senate Foreign Relations Committee. In this regard, I very much appreciate the assistance of the Senator from Delaware, Senator BIDEN, who raised it at my request and the cooperation of the committee chairman, Senator PELL, and the ranking minority member, Senator HELMS.

Mr. President, Senate approval of this resolution could make the difference between Vladimir Tsivkin's freedom and his virtual imprisonment within the Soviet Union. The resolution urges the Soviet Union to grant Vladimir Tsivkin, a Soviet refusenik from Leningrad, permission to emigrate. Its unanimous approval will send a strong signal to the Soviets that despite increased emigration now being permitted, we haven't forgotten those long-term refuseniks who only ask to be given their freedom.

Vladimir Tsivkin told me his story personally when I visited Moscow in March. Although he lives in Leningrad, he traveled to Moscow in the hope that I could help him. I was impressed by his keen intelligence and by the desperation of his plight. More than anything, he wants to join his wife and daughter in the United States. Vladimir Tsivkin is one of the few remaining long-term refuseniks. He has been in refusal for more than 10 years, making him one of the longest remaining Soviet Jews in refusal. We cannot lose sight of his quest for freedom just because others are now being permitted to leave.

Vladimir's wife and daughter left the Soviet Union earlier this year and now live in the United States. It is very hard on him to be separated from his family. His isolation is even greater as more of his friends leave the Leningrad area for the United States or Israel.

Vladimir also suffers from an endocrine disorder and needs an operation. Since applying to leave the Soviet Union, Vladimir has lost his military card, and therefore he has no way to earn a living. This situation makes him liable to criminal prosecution. Vladimir has been repeatedly refused permission to emigrate since 1979 on the grounds of state secrets. But what secrets he could possibly possess are beyond me. He has not worked at the Defense Ministry since 1978. My staff and I spent days with Vladimir in the Soviet Union, and I can attest that he possesses no such secrets.

Despite repeated refusals, the Tsivkin family received official permission to emigrate on March 14, 1989. Based on this permission, they relinquished their jobs, sold almost all their belongings and returned their official documents. Eight days later the Visa Department called to inform the family that the permission had been granted by mistake. No additional information was given.

Mr. President, the continued denial of Vladimir Tsivkin serves no rational purpose. It is inhumane. It is an irritant in the Soviet-American relationship. He cannot work. His family is gone. Through no fault of his own, he is not a productive member of Soviet society any longer. Quite simply, the Soviets have nothing to lose and everything to gain by resolving this case.

Perhaps Mr. Tsivkin's emigration has been blocked due to a vendetta of a petty bureaucrat at his former workplace who is flexing his muscles and trying to prevent Vladimir's departure for reasons that have nothing to do with state secrecy. But, it is clear that Soviet officials can let him go if they want to.

Mr. President, Vladimir's case is once again being considered by the Commission on Citizenshp of the Supreme Soviet, a special commission in the Soviet Union set up to resolve difficult cases. Although the Commission refused him permission last fall, it is now considering his case again. It is expected that the Commission and Soviet leaders at the highest level will be making a decision on Vladimir's case very soon. His files have been moved from Leningrad to Moscow and are under review there. Our approval of this resolution may given the Soviets the extra push necessary to let him go. I have also officially invited Vladimir to visit me in the United States and he has a request pending with Soviet officials to apply for a tourist visa to visit me in Washington. So far, he has not received permission to even apply for a visa, much less to secure one.

Mr. President, I hope that this resolution, which is cosponsored by all Senate members of the Helsinki Commission, as well as others, sends the Commission on Citizenship and other Soviet officials at the highest levels a message that the United States Senate wants Vladimir Tsivkin, who has been granted refugee status by our Government, to be given permission to leave the Soviet Union.

Mr. President, I have raised this case repeatedly with various Soviet officials, including former Soviet Ambassador to the United States Yuri Dubinin, and also urged the President to add Vladimir Tsivkin to his personal list of refuseniks. Secretary Baker met with Vladimir Tsivkin on a recent visit to Moscow, underscoring the importance our Government and our people attach to Vladimir's freedom. Assistant Secretary Schifter has consistently raised Vladimir's case with Soviet officials. Max Kampelman, acting in his capacity as head of the United States delegation to the Copenhagen Conference on the Human Dimension, held as part of the Helsinki process during June, also pressed the Soviets to let Vladimir go as a humanitarian gesture.

I know that if the Soviets make the determination to release him, it will happen very quickly. I hope they will make that determination.

I urge the Senate to pass this resolution unanimously to send a signal to the Soviets that we are watching what they do. We want Mr. Tsvikin to be granted permission to emigrate without further delay. Mr. President, I urge the adoption of the resolution.

The PRESIDING OFFICER. Is there further debate on the resolution? If not, the question is on agreeing to the resolution.

The resolution was agreed to.

The preamble was agreed to.

The resolution, and the preamble, are as follows:

S. RES. 313

Whereas Vladimir Tsivkin is a Soviet refusenik from Leningrad who has been repeatedly refused permission to emigrate since 1979;

Whereas Vladimir Tsivkin is one of only nine refuseniks in the Soviet Union who have been refused permission to leave for more than ten years;

Whereas he has been denied on the grounds of state secrets although he has not worked at the Defense Ministry since 1978;

Whereas despite repeated refusals, the Tsivkin family received official permission to emigrate on March 14, 1989, and based on this permission, they relinquished their jobs, sold almost all their belongings and returned their official documents; eight days later the Visa Department called to inform the family that the permission had been granted "by mistake", and no additional information was given;

Whereas Vladimir's wife and daughter left the Soviet Union on a tourist visa and now live in the United States;

Whereas the Soviet refusal to allow Vladimir to emigrate has meant a forced separation from his wife and child;

Whereas Vladimir suffers from an endocrine disorder and is in ill health;

Whereas Vladimir Tsivkin is a case of special humanitarian interest to the United States because he has been in refusal for more than ten years; making him one of the longest remaining Soviet Jews in refusal, and because his family already lives in the United States;

Whereas there is no purpose served by keeping Vladimir Tsivkin in the Soviet Union against his will since, through no fault of his own, he is no longer a productive member of Soviet society;

Whereas the Soviet Union is a signatory to the Final Act of the Conference on Security and Cooperation in Europe and the United Nations Universal Declaration of Human Rights, which obligate it to allow all citizens to leave the Soviet Union if they so desire, and to facilitate the reunification of families and respect human rights and fundamental freedoms;

Whereas the Soviet Union's continued refusal to grant Vladimir Tsivkin permission to emigrate violates those commitments; and

Whereas the Soviet Union's continued refusal to grant Vladimir Tsivkin permission to emigrate violates the spirit of statements made by President Gorbachev before the United Nations and in other forums that the problem of entry and exit from the Soviet Union will be dealt with in a humane spirit, and that strictly warranted time limitations on the secrecy rule will now be applied: Now, therefore, be it

Resolved, That the Senate declares that—

(1) The Soviet Union's continued refusal to permit Vladimir Tsivkin to emigrate violates its international obligations and is not in keeping with its recent practice of permitting thousands of Soviet Jews to emigrate;

(2) Whereas high United States Government officials have expressed to the Soviet Union the strong desire that Vladimir Tsivkin be granted permission to leave the Soviet Union; and

(3) Vladimir Tsivkin should immediately be granted permission to emigrate from the Soviet Union.

Mr. MITCHELL. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

"NATIONAL GIVE KIDS A FIGHTING CHANCE WEEK" AND "COMMUNITY CENTER MONTH"

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Judiciary Committee be discharged en bloc from further consideration of Senate Joint Resolution 357 and House Joint Resolution 515, and that the Senate proceed to their immediate consideration en bloc, that the joint resolutions be deemed read a third time and passed, and that the preambles be deemed agreed to, that the motion to reconsider passage of these joint resolutions be laid upon the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

The joint resolutions, considered and passed, are as follows:

S.J. RES. 357

Whereas Community Centers are large and complex cultural, social, and recreational institutions dedicated to preserving the well-being of a vital and vibrant segment of the United States;

Whereas there are Community Center branches, and camps serving a large clientele of people across the continent;

Whereas Community Center feature programs and services for all age groups, from infants through the elderly, and for people with disabilities and special needs;

Whereas Community Centers serve as gathering places for people of all denominations and offer a rich and varied program of educational and cultural opportunities;

Whereas the first Community Centers came into being during the second half of

the nineteenth century to provide social, recreational, and intellectual activities for community members in the United States;

Whereas as the nineteenth century progressed into the twentieth and the United States became a haven for hundreds of thousands of people fleeing the oppression and pograms of Eastern Europe, Community Centers turned their energies and attention to the enormous task of acculturating the new immigrants, teaching them English and the meaning of United States citizenship;

Whereas after the influx diminished and Community Centers evolved once again into institutions dedicated to preserving good citizenship through educational, cultural, social, and recreational programs; and

Whereas as Community Centers enter their second century of providing service, it is most fitting that we recognize their important contribution to the fabric of life in the United States: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That September 15, 1990 to October 15, 1990 is designated as "Community Center Month," and the President of the United States is authorized and requested to issue a proclamation calling upon the people of the United States to observe the month with appropriate ceremonies and activities.

H.J. RES. 515

Whereas as many as 200,000 children of less than 5 years of age suffer from severe craniofacial deformity;

Whereas individuals who suffer from craniofacial deformity, including children and adults, are too often forced to live secluded lives, hidden from society;

Whereas individuals who suffer from craniofacial deformity and their families experience severe emotional and behavioral difficulties;

Whereas the International Craniofacial Foundations, Inc., its affiliated centers, the National Foundation for Facial Reconstruction, and other organizations dedicated to craniofacial reconstruction fund programs for research and education regarding craniofacial deformity and treatment of individuals who suffer from craniofacial deformity;

Whereas the International Craniofacial Foundations, Inc., its affiliated centers, the National Foundation for Facial Reconstruction, and other organizations dedicated to craniofacial reconstruction have funded surgical and nonsurgical treatment for more than 10,000 patients from throughout the United States and 12 countries; and

Whereas the International Craniofacial Foundations, Inc., its affiliated centers, the National Foundation for Facial Reconstruction and other organizations dedicated to craniofacial reconstruction have begun to aggressively seek out individuals who can be aided by the services of the organizations: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week beginning September 16, 1990, is designated as "National Give the Kids a Fighting Chance Week", and the President is authorized and requested to issue a proclamation calling on the people of the United States to observe such week with appropriate ceremonies and activities.

MEASURE INDEFINITELY POSTPONED—SENATE JOINT RESOLUTION 284

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Judiciary Committee be discharged from further consideration of Senate Joint Resolution 284, the Senate companion to House Joint Resolution 515, and that the measure be indefinitely postponed.

The PRESIDING OFFICER. Without objection, it is so ordered.

INTER-AMERICAN CONVENTION ON INTERNATIONAL COMMERCIAL ARBITRATION

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Foreign Relations Committee be discharged from further consideration of H.R. 4314, regarding the Inter-American Convention on International Commercial Arbitration, and that the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. Without objection it is so ordered.

The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 4314) to implement the Inter-American Convention on International Commercial Arbitration.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

Mr. PELL. Mr. President, today the Senate is considering H.R. 4314, a bill to implement the obligations of the United States under the International Commercial Arbitration (the convention). The Senate gave its advice and consent to ratification of the convention on October 9, 1986, but the convention has not entered into force for the United States because Congress has not yet enacted the necessary implementing legislation. H.R. 4314 is designed to accomplish this.

The convention entered into force on June 16, 1976. Chile, Costa Rica, El Salvador, Guatemala, Honduras, Mexico, Panama, Paraguay, Uruguay, and Venezuela are already parties to the convention. This convention is modeled after the New York Convention on the Recognization and Enforcement of Foreign Arbitral Awards, to which the United States became a party in 1970.

H.R. 4314 is similarly modeled after, and incorporates the legislation which implements the New York convention, 9 U.S.C. 201–208. Several new provisions are also incorporated into the pending bill, to clarify the sphere of application of the convention and to safeguard its provisions respecting arbitral procedures.

The Convention has received the support of a large number of interested and representative organizations, including the American Bar Association, the American Arbitration Association, the U.S. Chamber of Commerce in Latin America, the American Foreign Law Association, and a number of State and local bar associations.

Mr. President, the Senate has twice considered and approved implementing legislation virtually identical to the legislation currently before us today, in the 99th Congress and again in the closing days of the 100th Congress. In each case, the measure failed to become law because the House of Representatives did not act.

Today, if we act favorably on H.R. 4314—a bill which has already passed the House—we can be assured that this time, the measure will become law. I urge my colleagues to support this legislation.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 4314) was ordered to a third reading, was read the third time, and passed.

Mr. MITCHELL. Mr. President, I move to reconsider the vote.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

MEASURE INDEFINITELY POSTPONED—S. 1941

Mr. MITCHELL. Mr. President, I ask unanimous consent that Calendar No. 572, S. 1941, the Senate companion bill, be indefinitely postponed.

DRUG ABUSE TREATMENT WAITING PERIOD REDUCTION AMENDMENTS

Mr. MITCHELL. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 2461.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 2461) entitled "An Act to reauthorize appropriations to provide for and improve the drug treatment waiting period reduction grant program under the Public Health Service Act, and for other purposes," do pass with the following amendments:

Strike out all after the enacting clause and insert:

SECTION 1. SHORT TITLE.

This Act may be cited as the "Drug Abuse Treatment Waiting Period Reduction Amendments of 1990".

SEC. 2. REVISION AND EXTENSION OF PROGRAM FOR REDUCING WAITING PERIOD FOR DRUG ABUSE TREATMENT.

(a) TECHNICAL AMENDMENT REGARDING WAITING PERIOD.—Section 509E(a) of the

Public Health Service Act (42 U.S.C. 290aa-12(a)) is amended by striking "the waiting list" and all that follows and inserting the following: "the waiting period for receiving, with respect to drug abuse, treatment services from public and nonprofit private providers of such services.".

(b) PRIORITIES IN MAKING GRANTS; AUTHORITY FOR POSTTREATMENT SERVICES.—Section 509E of the Public Health Service (42 U.S.C. 290aa-12) is amended—

(1) by striking subsection (d);

(2) by redesignating subsections (c), (e), and (f) as subsections (e), (f), and (g), respectively; and

(3) by inserting after subsection (b) the following new subsections:

"(c) Subject to the availability of qualified applicants, the Secretary shall, in making grants under subsection (a), give priority to applicants that will provide, directly or through arrangements with public or nonprofit private entities, treatment services for drug abuse to pregnant or postpartum women.

"(d) A grantee under subsection (a) may expend nor more than 50 percent of the grant to develop and provide, directly or through arrangements with public or nonprofit private entities, follow-up services to prevent the renewed abuse of drugs by individuals who have successfully completed with respect to such abuse, a program of treatment provided by the grantee.".

(c) FUNDING.—

(1) INCREASE IN AUTHORIZATION OF APPROPRIATIONS.—Paragraph (1) of section 509(g) of the Public Health Service Act, as redesignated by subsection (a)(2) of this section, is amended to read as follows:

"(1) In addition to amounts otherwise appropriated to carry out this section prior to fiscal year 1991, there are authorized to be appropriated an additional $40,000,000 to carry out this section.".

(2) INCREASE REGARDING LIMITATION ON AGGREGATE AMOUNT OF GRANTS.—Paragraph (2) of section 509E(g) of the Public Health Service Act, as redesignated by subsection (a)(2) of this section, is amended by striking "$100,000,000" and inserting "$140,000,000".

(3) AVAILABILITY OF CERTAIN FUNDS.—Notwithstanding section 307 of Public Law 101-164, amounts appropriated in such Public Law for the purpose of carrying out section 509E of the Public Health Service Act shall remain available for obligation for such purposes through December 31, 1990.

(d) REPORT.—Not later than 6 months after the date of the enactment of this Act, the Administrator of the Alcohol, Drug Abuse, and Mental Health Administration shall prepare and submit to the Senate Committee on Labor and Human Resources, and the House Committee on Energy and Commerce, a report concerning the waiting-period reduction grant program under section 509E of the Public Health Service Act. Such report shall include—

(1) a list and description of the programs that have been awarded grants under such section;

(2) with respect of the process by which funds awarded under such section are expended for treatment services for drug abuse, a description of the extent to which such process is different than the process by which funds received by the States under subpart B of title XIX of such Act are expended by entities to which the States have awarded such funds for the purpose of providing treatment services (including a description of the extent to which there are differences in the 2 processes in the manner in which the providers of such treatment services obligate and draw down funds);

(3) an assessment of the validity of waiting lists as a measure of treatment need and, if the report concludes that waiting lists are not the most accurate measure of treatment needed, a description of other, more accurate means of measuring the need for treatment services within a specified geographic area;

(4) the views of State, local, and nongovernmental treatment experts with respect to the validity of waiting lists as a measure of treatment need and with respect to the efficacy of the waitng period reduction grant program; and

(5) an assessment of the effectiveness of the treatment programs that receive funding under such section, including the usefulness of mechanisms, such as drug testing, that detect renewed substance abuse, and information with respect to the current use of such mechanisms.

(e) EFFECTIVE DATE.—This section and the amendments made by this section shall take effect upon the date of the enactment of this Act.

SEC. 3. AUTHORIZATION OF APPROPRIATIONS FOR CERTAIN DRUG ABUSE DEMONSTRATION PROJECTS.

(a) IN GENERAL.—Section 517 of the Public Health Service Act (42 U.S.C. 290cc-1) is amended by striking "There are" and all that follows through "section 515" and inserting the following: "For the purpose of carrying out this subpart, there are authorized to be appropriated".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall take effect October 1, 1990, or upon the date of the enactment of this Act, whichever occurs later.

SEC. 4. TECHNICAL AMENDMENTS TO CERTAIN PROGRAMS.

(a) FORM OF ASSISTANCE FOR CONSTRUCTION OF FACILITIES TO SUPPLY SPECIALIZED MICE FOR BIOMEDICAL RESEARCH.—Public law 101-190 (42 U.S.C. 289e note) is amended—

(1) in section 1—

(A) in the heading for the section, by striking "CONTRACT" and inserting "GRANT";

(B) in subsection (a), by striking "entering into a contract with" and inserting "making a grant to"; and

(C) in subsection (b), by striking "contract" and inserting "grant";

(2) in section 2—

(A) in subsection (a), in the matter preceding paragraph (1), by striking "enter into a contract" and inserting "make a grant";

(B) in subsection (a)(1), by striking "contract" and inserting "grant";

(C) in subsection (b)(1), in the matter preceding supbaragraph (A), by striking "contractor" and inserting "grantee";

(D) in subsection (b)(1), in subparagraphs (A) and (B), by striking "a contract" each place such term appears and inserting "an agreement";

(E) in subsection (b)(2), by striking "contractor" and inserting "grantee";

(F) in subsection (d)(1), in the heading, by striking "contractor' and inserting "grantee"; and

(G) in subsection (d)(1)—

(i) by striking "enter into a contract" and inserting "make a grant"; and

(ii) by striking "the contract" and inserting the grant";

(3) in section 3(a)—

(A) by striking "enter into a contract" and inserting "making a grant"; and

(B) by striking "the contract" and inserting "the grant";

(4) in section 4—

(A) in subsection (a)(1), in the first sentence—

(i) by striking "enter into a contract" and inserting "make a grant"; and

(ii) by striking "the contract" and inserting "the grant";

(B) in subsection (a)(2)(A), in the second sentence, by striking "in the contract";

(C) in subsection (b), in the matter preceding paragraph (1), by striking "enter into a contract" and inserting "make a grant";

(D) in subsection (b)(1), by striking "contract" and inserting "grant";

(E) in subsection (c), in the matter preceding paragraph (1), by striking "enter into a contract" and inserting "make a grant"; and

(F) in subsection (c)(1), by striking "contract" and inserting "grant";

(5) in section 5—

(A) in subsection (a), in paragraphs (1) and (2), by striking "contractor" each place such term appears and inserting "grantee";

(B) in subsection (b), in paragraphs (1) through (3), by striking "contractor" each place such term appears and inserting "grantee"; and

(C) in subsection (c), by striking "contractor" and inserting "grantee"; and

(6) in section 6(a), in the matter preceding paragraph (1), by striking "contractor" and inserting "grantee".

(b) INTRASTATE ALLOCATIONS FOR SUBSTANCE ABUSE PROGRAMS UNDER CERTAIN BLOCK GRANTS TO THE STATES.—Section 1916(c)(6)(A) of the Public Health Service Act is amended—

(1) in clause (i)—

(A) by striking "and" before "(III) in fiscal year 1989"; and

(B) by inserting before the period the following: "; and (IV) in fiscal year 1990 under appropriations made in Public Law 101-164 for allotments under this subpart"; and

(2) in clause (ii)—

(A) by striking "and" before "(III) in fiscal year 1989"; and

(B) by inserting before "bore to the funds" the following: ", and (IV) in fiscal year 1990 under appropriations made in Public Law 101-164 for allotments under this subpart".

(c) EFFECTIVE DATES FOR TECHNICAL AMENDMENTS.—

(1) CONSTRUCTION OF BIOMEDICAL FACILITIES.—The amendments made by subsection (a) shall take effect as if included in Public Law 101-190.

(2) INTRASTATE ALLOCATIONS FOR BLOCK GRANTS.—The amendments made by subsection (b) shall take effect October 1, 1990, or upon the date of the enactment of this Act, whichever occurs later.

Amend the title so as to read: "An Act to amend the Public Health Service Act to revise and extend the program grants for reducing the waiting period for receiving treatment services for drug abuse, and for other purposes.".

Mr. MITCHELL. Mr. President, I move that the Senate concur in the House amendments.

The PRESIDING OFFICER. Without objection, the motion is agreed to.

Mr. MITCHELL. Mr. President, I move to reconsider the vote.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

MEASURE PLACED ON CALENDAR—H.R. 3562

Mr. MITCHELL. Mr. President, I ask unanimous consent that H.R. 3562, the nutrition labeling bill, just received from the House, be placed on the calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

TUBERCULOSIS PREVENTION AMENDMENTS OF 1990

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Labor Committee be discharged from further consideration of H.R. 4273, the Tuberculosis Prevention Amendments of 1990, and that the Senate then proceed to its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 4273) to amend the Public Health Service Act to extend the program of grants for preventive health services with respect to tuberculosis, and for other purposes.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

Mr. KENNEDY. Mr. President, an estimated 10 million Americans are infected with tuberculosis. If symptoms are left untreated, about 50 percent of tuberculosis patients die within 2 years. Although modern medicine has considered tuberculosis to be a curable and preventable disease for more than a quarter of a century, over 20,000 new cases of TB are reported annually.

The remaining high level of tuberculosis is due, at least in part, to the occurrence of the disease among persons infected with Human Immunodeficiency Virus [HIV]. In addition to the resurgence of the disease among HIV-infected persons, tuberculosis continues to strike hard at some of the most vulnerable members of our society—the economically disadvantaged and the medically underserved, with particularly devastating impact on minorities, the foreign-born, children, and the elderly.

Despite these challenges, the Centers for Disease Control recommends that a targeted effort can lead to the elimination of tuberculosis in the United States by the year 2010. As an essential step in achieving this goal, H.R. 4273 reauthorizes CDC's tuberculosis programs for $36 million in fiscal year 1991, and such sums as may be necessary through 1995. These funds will assist States and local areas in establishing preventive health services and provide for research, reporting, and education regarding tuberculosis. The bill also establishes an Advisory Council for the Elimination of Tuberculosis to advise the Secretary of HHS as efforts continue toward the elimination of TB by 2010.

I urge my colleagues to join with me in supporting H.R. 4273 and working toward the elimination of tuberculosis.

The PRESIDING OFFICER. The bill is before the Senate and open the amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 4273) was ordered to a third reading, was read the third time, and passed.

Mr. MITCHELL. Mr. President, I move to reconsider the vote.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration, en bloc, of Calendar Nos. 771 and 773; that the resolutions be agreed to, and that the preambles be agreed to; that the motion to reconsider the passage of these and resolutions be laid upon the table.

I further ask unanimous consent that any statements relating to these calendar items appear at the appropriate place in the RECORD and that the consideration of these items appear individually in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

EDUCATION IN HISTORY OF THE CONSTITUTION

The concurrent resolution (S. Con. Res. 123) to encourage State governments, local governments, and local educational agencies to adopt a comprehensive curricular program which provides elementary and secondary students with a thorough knowledge of the history and principles of the Constitution and the Bill of Rights and which fosters civic competence and civic responsibility, was considered and agreed to.

The preamble was agreed to.

The concurrent resolution, and the preamble, are as follows:

S. CON RES. 123

Whereas a study conducted on behalf of the Hearst Corporation found that nearly 50 percent of Americans cannot identify the original purpose of the Constitution and nearly 60 percent of Americans do not know what the Bill of Rights is;

Whereas a study conducted on behalf of the Hearst Corporation found that nearly half of all Americans thought that the Marxist credot "From each according to his ability, to each according to his need" is found in the Constitution;

Whereas a recent study conducted by the Center for Civic Education found that—

(1) 7 out of 10 students did not know that in the American political tradition, governments derive their authority from the consent of the governed;

(2) 2 out of 3 students did not know the essential differences between constitutional and dictatorial governments; and

(3) 6 out of 10 students did not know the meaning of due process of law;

Whereas a recent study conducted by the Educational Testing Service on behalf of the Congress of the United States found that—

(1) only 19 percent of all high school seniors tested could write an extensive description of the President responsibilities;

(2) only 39 percent of all high school seniors tested knew that presidential candidates were nominated at conventions;

(3) 62 percent of all high school seniors tested did not recognize the opening passage of the Declaration of Independence;

(4) only 25 percent of all eighth grade students tested knew why Columbus sailed for the Americas; and

(5) only 36 percent of all fourth grade students tested knew that Abraham Lincoln's stated goal in the Civil War was to preserve the union;

Whereas young people do not have a clear understanding of the history and principles of the Constitution, the Bill of Rights and the rights and responsibilities of citizenship;

Whereas it is only through education that our youth can acquire the understanding of, and reasoned commitment to, the principles of constitutional democracy that the Founders recognized as the essential prerequisite of a free government; and

Whereas the young people of the Nation are entrusted with the responsibility of safeguarding the future of American constitutional democracy: Now therefore, be it

Resolved by the Senate (the House of Representatives concurring), That the Senate encourages State governments, local governments and local education agencies to adopt a comprehensive curricular program for each of the grades kindergarten through 12 which—

(1) provides elementary and secondary students with a thorough knowledge of the history and principles of the Constitution and the Bill of Rights; and

(2) fosters civic competence and civic responsibility.

LAND-GRANT INSTITUTIONS CENTENNIAL RECOGNITION DAY

The concurrent resolution (S. Con. Res. 132) expressing the sense of the Congress that August 30, 1990, be observed as "1890 Land-Grant Institutions Centennial Recognition Day," was considered and agreed to.

The preamble was agreed to.

The concurrent resolution, and the preamble, are as follows:

S. CON. RES. 132

Whereas the Act of August 30, 1890 (7 U.S.C. 321), popularly known as the "Second Morrill Act", designated an historically black institution in 16 southern States, and Tuskegee University, as Federal land-grant educational institutions;

Whereas the 16 Historically Black Colleges identified as land-grant institutions in 1890 are: Lincoln University, Alcorn State University, the University of Arkansas at Pine Bluff, Alabama A&M University, Prairie View A&T University, Southern University, Virginia State University, Kentucky State University, the University of Maryland-Eastern Shore, Florida A&M University, Delaware State College, North Carolina

A&T University, Fort Valley State College, South Carolina State College, Langston University, and Tennessee State University;

Whereas these institutions have well demonstrated their ability to meet the special needs of black students;

Whereas the Act of May 8, 1914 (7 U.S.C. 341), popularly known as the "Smith-Lever Act", provided for the establishment of the Cooperative Extension Service within the Department of Agriculture for the dissemination, through Federal land grant-institutions, of information pertaining to agriculture and home economics; and

Whereas appropriate recognition should be given to the contributions made by the 1890 land-grant institutions and Tuskegee University to the heritage, educational development, and agricultural strength of the United States: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That it is the sense of the Congress that August 30, 1990, should be designated as "1890 Land-Grant Institutions Centennial Recognition Day", and that such day should be observed with appropriate ceremonies and activities to recognize the collective contributions that those institutions have made to the United States.

NEGOTIATIONS TO RESOLVE THE GREYHOUND STRIKE

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar No. 772, Senate Concurrent Resolution 127, regarding settlement of the Greyhound dispute.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report.

The legislative clerk read as follows:

A concurrent resolution (S. Con. Res. 127) to express the sense of Congress that Greyhound Lines Inc., and the Amalgamated Transit Union should pursue meaningful negotiations under the auspices of the Federal Mediation and Conciliation Service and the Secretary of Labor to resolve their dispute and restore vital transportation services to American communities.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the concurrent resolution?

There being no objeciton, the Senate proceeded to consider the concurrent resolution.

AMENDMENT NO. 2601

(Purpose: To modify the resolution, and for other purposes)

Mr. MITCHELL. Mr. President, I send to the desk an amendment on behalf of Senator KENNEDY and ask for its immediate consideration.

The PRESIDING OFFICER. The Clerk will report the amendment.

The legislative clerk read as follows:

The Senator from Maine [Mr. MITCHELL], for Mr. KENNEDY, proposes an amendment numbered 2601.

Mr. MITCHELL. Mr. President, I ask that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Amend the resolved clause by striking "and the Secretary of Labor".

Amend the title by striking "and the Secretary of Labor".

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Massachusetts.

The amendment (No. 2601) was agreed to.

Mr. MITCHELL. Mr. President, I move to reconsider the vote.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution, as amended.

The concurrent resolution (S. Con. Res. 127), as amended, was agreed to.

The preamble was agreed to.

The concurrent resolution, as amended, with its preamble, reads as follows:

S. CON. RES. 127

Whereas since March 2, 1990, 9,300 Greyhound employees have been on strike against Greyhound Lines, Inc., the only nationwide interstate bus carrier;

Whereas nearly 10,000 communities throughout the United States served by Greyhound have felt the impact of this dispute, including significant reductions in vital bus services;

Whereas for most of these communities bus service is the sole transportation link to the rest of the Nation;

Whereas Congress is concerned about the serious loss of service, especially in rural areas;

Whereas Congress is concerned that this strike causes hardship to Greyhound employees, their families, and to the traveling public;

Whereas Congress deplores the continued incidents of sporadic violence occurring during this dispute; and

Whereas Congress believes that the best way to settle this dispute is for Greyhound and the Amalgamated Transit Union to resolve their differences at the bargaining table; Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That it is the sense of Congress that Greyhond Lines, Inc., and the Amalgamated Transit Union should—

(1) pursue meaningful negotiations under the auspices of the Federal Mediation and Conciliation Service and the Secretary of Labor; and

(2) make every effort to resolve their dispute promptly and restore vital transportation services to American communities.

Mr. MITCHELL. Mr. President, I move to reconsider the vote.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

HUMANITARIAN ASSISTANCE TO LITHUANIA

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 674, S. 2757, a bill to provide medical supplies and other humanitarian supplies to the Lithuanian people.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (S. 2757) to amend the foreign Assistance Act of 1961 to authorize the provision of medical supplies and other humanitarian assistance to the Lithuanian people to allevate suffering during the current emergency.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill. There being no objection, the Senate proceeded to consider the bill which had been reported from the Committee on Foreign Relations, with an amendment to strike all after the enacting clause and inserting in lieu thereof the following:

That chapter 9 of part I of the Foreign Assistance Act of 1961 (relating to international disaster assistance) is amended by adding at the end thereof the following new section:

"SEC. 495L. LITHUANIAN EMERGENCY RELIEF.—(a) The Congress recognizes that prompt United States assistance is necessary to alleviate the emergency existing in the Republic of Lithuania caused by the economic blackade imposed by the Union of Soviet Socialist Republics which has caused great suffering among the Lithuanian people, especially with regard to a severe shortage of medical supplies and the basic necessities of life.

"(b)(1) The Administrator of the Agency for International Development shall—

"(A) furnish, in accordance with the authorities of this chapter, of humanitarian assistance for the relief of the Lithuanian people during the existing emergency;

"(B) solicit private sector donations of humanitarian assistance for Lithuania; and

"(C) cooperate with private relief agencies attempting to provide humanitarian aid to Lithuania.

"(2) The Commander-in-Chief of United States Transportation Command is authorized to provide all airlift and sealift necessary, thoughout the course of the Lithuanian blockade, to transport United States public and private donations of medical supplies to Lithuania on a regular basis and should begin such transport as soon as the agreement decribed in subsection (e) has been concluded.

"(c)(1) In addition to funds authorized to be appropriated to carry out his chapter, there are authorized to be appropriated to the President $10,000,000 to carry out subsections (b)(1) and (b)(2).

"(2) Funds appropriated pursuant to paragraph (1) are authorized to remain available until expended.

"(3) The authority contained in the Foreign Assistance Act of 1961 to transfer funds between accounts shall not apply with respect to funds appropriated pursuant to paragraph (1).

"(d) Assistance may be provided under this section notwithstanding any other provisions of law other than laws referred to in section 503(b) of the Support for East European Democracy (SEED) Act of 1989.

"(e) The Congress urges the President to begin negotiations with the nations surrounding Lithuania, including Latvia, Estonia, the Union of Soviet Socialist Republics, and Poland, regarding the importation of

critical humanitarian assistance. Pending conclusion of these negotiations, the Administrator of the United States Agency for International Development shall furnish the necessary humanitarian assistance through the International Red Cross, the Lithuanian Red Cross, CARITAS, and other relief agencies, to ensure the Lithuanians begin to receive critical humanitarian assistance immediately.

"(f) For purposes of this section, the term 'humanitarian assistance' includes—

"(1) oil, gas, and fuel for emergency vehicles and medical facilities;

"(2) water purification supplies, materials for immunization, and other materials needed to prevent the outbreak of contagious diseases and to safeguard public health;

"(3) medical supplies; and

"(4) food and clothing.".

HUMANITARIAN AID TO LITHUANIA

Mr. MOYNIHAN. Mr. President, S. 2757 authorizes up to $10 million in humanitarian assistance to Lithuania. The bill was reported unanimously, as amended, by the Committee on Foreign Relations, and is cosponsored by 23 Senators, including Senators PELL and SIMON as original cosponsors. The partial lifting of the Soviet Union's economic blockade of Lithuania has somewhat eased the crisis which prompted my bill. But the blockade has not been completely lifted. Moreover, its effects are still being felt.

I will ask unanimous consent to submit for the RECORD a letter from President Landsbergis, Prime Minister Prunskiene, and Minister of Health Olekas which states "we appeal to the members of the United States Senate to approve the Lithuanian humanitarian assistance package sponsored by Senator MOYNIHAN at the earliest possible time." I have been informed that energy supplies have not been fully restored. Medical supplies are still in short supply. There are great backlogs in all nonemergency surgical procedures, maternal care and other health care areas.

And if negotiations between Lithuania and the Soviet Union fail? Mr. President, this amendment will be a strong expression of support for Lithuania. Restoring Lithuania's exhausted medical supplies will greatly strengthen its negotiating position. The Soviet blockade reduced Lithuania to a pitiable state. Diabetics had literally begun to die due to the shortage of insulin. The blockade had become a matter of life and death. It can be reimposed at any moment. So long as Lithuanians are subject to the whims of the Soviet Government we should not hesitate. We should move ahead vigorously to put into place the authorization for humanitarian aid. We provided little more than rhetorical support to the Baltic States for 50 years. Now that they are struggling for their freedom—with Lithuania in the forefront of that fight—we should move to do more than just talk. This amendment offers us the chance to do just that.

Two days ago another small nation, Kuwait, was invaded and subjugated by a large aggressive neighbor. Stalin bought Lithuania from Hitler. Saddam Hussein did not even bother to barter. The United States must move vigorously to oppose this violation of international law. We should at the same time help the Lithuanian people to rectify a half century old violation of international law—the occupation of the sovereign state of Lithuania by the Soviet Union—by adopting this legislation. I believe that recent events make this a most opportune moment to help Lithuania regain its freedom and I urge the adoption of S. 2757.

I ask unanimous consent that the letter I referred to earlier be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

SUPREME COUNCIL OF THE
REPUBLIC OF LITHUANIA,
July 21, 1990.

Senator GEORGE MITCHELL,
U.S. Senate,
Washington, DC.

DEAR SENATOR MITCHELL: We would like to extend our thanks to the United States Senate for its efforts to secure humanitarian assistance to Lithuania in this, our time of need. We are heartened by the continued support shown us by the American people and the U.S. Congress. Although the economic blockade imposed upon our country by the Soviet Union has been officially lifted, its practical limitations remain in effect.

The economic blockade has disrupted virtually all efforts to maintain a consistent flow of medical products to the Lithuanian people Antibiotics, insulin, syringes, anesthetics and other crucial products are in critical supply.

Lithuanian agricultural production has been endangered due to lack of adequate supplies of fuel, motor oil, various parts and new machinery. Lithuanian farmers are growing increasingly concerned over the coming harvest as fuel supplies are held up due to the slow recovery of the Lithuanian petroleum industry following months of imposed inactivity.

With these and other formidable obstacles before us, we appeal to the members of the U.S. Senate to approve the Lithuanian humanitarian assistance package sponsored by Senator Patrick Moynihan at the earliest possible time. The passage of such legislation would not only help us to ensure the most basic of services to our people, but would also strengthen the independence of our country.

Once again, please convey our greetings and thanks to the members of the U.S. Senate for their concern for the fate of the Lithuanian nation.

Vytautas Lansbergis, President, Supreme Council Republic of Lithuania; Kazimiera Prunskiene, Prime Minister, Republic of Lithuania; Juozas Olekas, Minister of Health and Social Security.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on agreeing to the committee amendment in the nature of a substitute.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading and was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

So the bill (S. 2757) was passed.

Mr. MITCHELL. Mr. President, I move to reconsider the vote.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

CIVIL AVIATION PENALTY ASSESSMENT DEMONSTRATION PROJECT

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar No. 780, H.R. 5131, civil aviation penalty assessment demonstration project; that the bill be deemed read for the third time, passed, and the motion to reconsider be laid upon the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

So, the bill (H.R. 5131) was passed.

NATIONAL DRIVE FOR LIFE WEEKEND

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of House Joint Resolution 627, designating National Drive for Life Weekend, just received from the House.

The PRESIDING OFFICER. The joint resolution will be stated by title.

The legislative clerk read as follows:

A joint resolution (H.J. Res. 627), Designating Labor Day weekend, September 1 through September 3, 1990, as "National Drive for Life Weekend".

The PRESIDING OFFICER. Is there objection to the immediate consideration of the joint resolution?

There being no objection, the Senate proceeded to consider the joint resolution.

The PRESIDING OFFICER. The joint resolution is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the joint resolution.

The joint resolution (H.J. Res. 627) was ordered to a third reading, was read the third time, and passed.

The preamble was agreed to.

Mr. MITCHELL. Mr. President, I move to consider the vote.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

MENTAL HEALTH AMENDMENTS OF 1990

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar No. 712, S. 2628, regarding mental health grants.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 2628) to amend the Public Health Service Act to reauthorize certain National Institutes of Mental Health grants and to improve provisions concerning the State comprehensive mental health services plan, and for other purposes.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Labor and Human Resources, with an amendment to strike all after the enacting clause and inserting in lieu thereof the following:

SECTION 1. SHORT TITLE

The Act may be cited as the "Mental Health Amendments of 1990".

SEC. 2. REAUTHORIZATION OF DEMONSTRATION GRANTS FOR MENTAL HEALTH SERVICES.

Section 520A of the Public Health Service Act (42 U.S.C. 290cc-13) is amended—

(1) in subsection (b), to read as follows:

"(a) SERIOUSLY MENTALLY ILL INDIVIDUALS AND CHILDREN AND ADOLESCENTS WITH SERIOUS EMOTIONAL AND MENTAL DISTURBANCES.—

"(1) IN GENERAL.—The Secretary, acting through the Director, may make grants to State, political subdivisions of States, and nonprofit private agencies for—

"(A) mental health services demonstration projects for the planning, coordination and improvement of community services (including outreach and self-help services) for seriously mentally ill individuals and their families, seriously emotionally and mentally disturbed children and youth and their families, seriously mentally ill homeless and elderly individuals;

"(B) demonstration projects for the prevention of youth suicide;

"(C) demonstration projects for the improvement of the recognition, assessment, treatment and clinical management of depressive disorders;

"(D) demonstration projects for programs to prevent the occurrence of sex offenses, and for the provision of treatment and psychological assistance to the victims of sex offenses; and

"(E) demonstration projects for programs to provide mental health services to victims of family violence.

"(2) MENTAL HEALTH SERVICES.—Mental health services provided under paragraph (1)(A) should encompass a range of delivery systems designed to permit individuals to receive treatment in the most therapeutically appropriate, least restrictive setting. Grants shall be awarded under such paragraph for—

"(A) research demonstration programs concerning such services; and

"(B) systems improvements to assist State and local entities to develop appropriate comprehensive mental health systems for adults with serious long-term mental illness and children and adolescents with serious emotional and mental disturbance.";

(2) in subsection (c), by striking out "three" and inserting in lieu thereof "five"; and

(3) in subsection (e), by striking out paragraph (1) and inserting in lieu thereof the following new paragraph:

"(1) For the purposes of carrying out this section, there are authorized to be appropriated $60,000,000 for fiscal year 1991, $62,000,000 for fiscal year 1992, and $65,000,000 for fiscal year 1993.".

SEC. 3. STATE COMPREHENSIVE MENTAL HEALTH SERVICES PLAN.

(a) REAUTHORIZATION.—Subsection (c) of section 1924 of the Public Health Service Act (42 U.S.C. 300x-10(c)) is amended to read as follows:

"(c) There are authorized to be appropriated to carry out this section, $5,000,000 for each of the fiscal years 1991 through 1993.".

(b) REQUIREMENTS.—Section 1925 of such Act (42 U.S.C. 300x-11) is amended—

(1) by striking out "chronically mentally ill individual" each place that such appears and inserting in lieu thereof "individual with a serious mental illness";

(2) by striking out "chronically mentally ill individual" each place that such appears and inserting in lieu thereof "individual with a serious mental illness";

(3) in subsection (b)—

(A) by inserting before the period in paragraph (1) the following: ", individuals with serious mental illnesses and children with serious emotional and mental disorders";

(B) by inserting after "describe services" in paragraph (3) ", available treatment options and resources, including Federal, State and local public services and resources, and to the extent practicable private services and resources,";

(C) by redesignating paragraph (5) through (8) as paragraphs (6) through (9), respectively;

(D) by striking out paragraph (4 and inseting in lieu thereof the following new paragraphs:

"(4) The State plan shall describe health and mental health services, rehabilitation services, employment services, housing services, educational services, medical and dental care, and other support services to be provided to individuals and children with serious emotional and mental disorders with Federal, State and local public and private resources to enable such individuals to function outside of inpatient or residential institutions to the maximim extent of their capabilities, including services to be provided by local school systems under the Education of the Handicapped Act (20 U.S.C. 1401 et seq.).

"(5) The State plan shall describe the financial resources and staffing necessary to implement the requirements of the State Comprehensive Mental Health Services plan."; and

(E) by adding at the end thereof the following new paragraph:

"(10) The State plan shall describe a system of integrated social services, educational services, juvenile services, substance abuse services which together with health and mental health services, should be provided in order for children and adolescents with serious emotional and mental disorders to receive care appropriate for their multiple needs, including services to be provided by local school systems under the Education of the Handicapped Act (20 U.S.C. 1401 et seq.).";

(4) in subsection (d)—

(A) by striking out "subsections (a), (b), and (c)" in the first sentence and inserting in lieu thereof "section 1924'; and

(B) by striking out "the State is permitted to expend for administrative expenses" in the second sentence and inserting in lieu thereof "that the State received under subpart 1 as such subpart existed on October 1, 1985'; and

(5) by adding at the end thereof the following new subsections:

"(e) The State shall utilize the State Mental Health Planning Council described in section 1916(e), or establish a new council with comparable membership requirements, to advise, review, monitor and evaluate all aspects of the development and implementation of the State Comprehensive Mental Health Services Plan. The comments of such Council shall be formally transmitted to the Governor of the State prior to the submission of such Plan to the Secretary and such comments should be transmitted to the Secretary together with such Plan.

"(f) Not late than March 30 of each year, the Secretary shall prepare and submit, to the appropriate Committees of Congress, a report concerning the development and implementaton of the State Comprehensive Mental Health Services Plans. Such reports shall include—

"(1) the status of the implementation of such plans by the States;

"(2) a description of the extent of the participation of the Councils described in subsection (e) in such development and implementations;

"(3) a description of the coordinated services for children and adults conducted under such Plans;

"(4) the extent to which State and local public, and private resources are utilized in the enhancement and delivery of designated services; and

"(5) a quantitative measurement of the improvement in services projected and achieved under the plan.".

SEC. 4. ENFORCEMENT

(a) ADMINISTRATION EXPENSES.—Section 1926(d) of the Public Health Service Act (42 U.S.C. 300x-12(d)) is amended—

(1) by striking out "subsections (a), (b), and (c)" in the first sentence and inserting in lieu thereof "section 1924"; and

(2) by striking out "the State is permitted to expend for administrative expenses" in the second sentence and inserting in lieu thereof "that the State received under subpart 1 as such subpart existed on October 1, 1985".

(b) LIMITATION ON EXPENDITURES.—Section 1926(e) of Act (42 U.S.C. 300x-12(e)) is amended—

(1) by striking out "for any fiscal year" and inserting in ieu thereof "during the period covered by the plan";

(2) by striking out "for such fiscal year" and inserting in lieu thereof "during such period"; and

(3) by inserting before the period the following: ", taking into consideration savings on inpatient hospitalization that can reasonably be anticipated to result from a well designed and implemented plan".

Mr. KENNEDY. Mr. President, I rise to urge passage of the Mental Health Amendments of 1990.

This legislation reauthorizes the authority of the National Institute of Mental Health to conduct demonstrations to improve the delivery of mental health services, reauthorizes

the State mental health services plan development grants, and clarifies state requirements for planning and implementation of comprehensive State mental health community-based services. It was reported unanimously by the Labor and Human Resources Committee.

DEMONSTRATIONS

NIMH is authorized to conduct demonstrations in a variety of key mental health areas, including grants to plan, coordinate, and improve community mental health services to seriously mentally ill adults, children, and the elderly; grants for prevention of youth suicide; grants to improve recognition, treatment an assessment of depressive disorders, and to meet other priority needs. Grants conducted under this authority have been immensely effective in improving services to the mentally ill and reducing hospitalization rates. There is now a particular focus on children, one of the most underserved of the populations in need of mental health services. Continuation of these programs is extremely important in linking research findings to improved practice in the field.

The bill would authorize $60 million for 1991, $62 million for 1992; and $65 million for fiscal year 1993.

PLANNING GRANTS

Under legislation enacted in 1986, States are required to plan and implement comprehensive community-based programs of care for the seriously mentally ill. Such programs are essential in providing humane treatment for the seriously mentally ill and allowing them to perform to their fully potential. In addition, community-based programs actually save money through reduced use of inpatient hospital care. But despite the moral imperative to provide all seriously mentally ill Americans with effective community-based services, most States and communities are still failing to do an adequate job.

The planning and implementation process mandated udner the 1986 law is showing the potential to make a major contribution to this problem. All States have completed plans which are generally viewed as high quality, and the crucial implementation phase is now beginning.

The small planning grant program provides funds to States, hire extra staff to meets the requirements of the law and to fund broad-based advisory groups. Particularly in smaller States, this modest funding, minimum grants are $150,000, has often been crucial in assisting States to meet the requirements. This legislation would reauthorize the planning grants for an additional 3 years at $5 million.

STATE PLAN AMENDMENTS

The amendments included under this section of the legislation make primarily technical changes in the current law. The planning and implementation requirements are clarified to emphasize that seriously mentally ill children must be included in the scope of the State plan, the requirement for involvement of broad-based advisory panels in the development and implementation of the plan is strengthened, and technical corrections and improvements are made in several other aspects of the statute.

The programs covered in this legislation hold the promise of improving the lives of millions of mentally ill patients and their families. I urge prompt adoption of this legislation.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on agreeing to the committee amendment in the nature of a substitute.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading and was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

So the bill (S. 2628) was passed.

Mr. MITCHELL. Mr. President, I move to reconsider the vote.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

COMMISSIONED CORPS OF THE PUBLIC HEALTH SERVICE REVITALIZATION AMENDMENTS

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar No. 415, S. 1963, the Corps of Public Health Service revitalization amendments of 1989.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 1963) to amend the Public Health Service Act to facilitate the revitalization of the Commissioned Corps of the Public Health Service, and for other purposes.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

AMENDMENT NO. 2602

(Purpose: To authorize the Secretary of Health and Human Services to award a grant rather that a contract for the construction of mouse breeding facilities)

Mr. MITCHELL. Mr. President, on behalf of Senator KENNEDY, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from Maine [Mr. MITCHELL], for Mr. KENNEDY, proposes an amendment numbered 2602.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 8, after line 24, add the following new section:

SEC. . MOUSE BREEDING FACILITIES GRANTS.

(a) IN GENERAL.—Public Law 101-190 (103 Stat. 1691) is amended—

(1) in section 1—

(A) by striking out "CONTRACT" in the heading and inserting in lieu thereof "GRANT";

(B) by striking out "for entering into a contract with" in subsection (a), and inserting in lieu thereof "to make a grant to"; and

(C) by striking out "contract" in subsection (b), and insering in lieu thereof "grant".

(2) in section 2—

(A) by striking out "enter into a contract" in the matter preceding paragraph (1) in subsection (a), and inserting in lieu thereof "make a grant";

(B) by striking out "contract" in subsection (a)(1), and inserting in lieu thereof "grant";

(C) by striking out "contractor" in the matter preceding subparagraph (A) in subsection (b)(1), and inserting in lieu thereof "grantee";

(D) by striking out "a contract" each place that such occurs in subparagraphs (A) and (B) of subsection (b)(1), and inserting in lieu thereof "an agreement";

(E) by striking out "contractor" in subsection (b)(2) and inserting in lieu thereof "grantee";

(F) by striking out "CONTRACTOR" in the heading of paragraph (1) of subsection (d), and inserting in lieu thereof "GRANTEE";

(G) by striking out "enter into a contract" in subsection (d)(1), and inserting in lieu thereof "make a grant"; and

(H) by striking out "the contract" in subsection (d)(1), and inserting in lieu thereof "the grant";

(3) in section 3(a)—

(A) by striking out "enter into a contract" and inserting in lieu thereof "make a grant"; and

(B) by striking out "the contract" each place that such occurs and inserting in lieu therof "the grant";

(4) in section 4—

(A) by striking out "enter into a contract under section 1 unless the applicant for the contract" in the first sentence of subsection (a)(1), and inserting in lieu thereof "make a grant under section 1 unless the applicant for the grant";

(B) by striking out "in the contract" in the second sentence of subsection (a)(2)(A);

(C) by striking out "enter into a contract" in the matter preceding paragraph (1) in subsection (b), and inserting in lieu thereof "make a grant";

(D) by striking out "contract" in subsection (b)(1), and inserting in lieu thereof "grant";

(E) by striking out "enter into a contract" in the matter preceding paragraph (1) in subsection (c), and insert in lieu thereof "make a grant"; and

(F) by striking out "contract" in subsection (w)(1), and insert in lieu therof "grant";

(5) in section 5, by striking out "contractor" each place that such occurs and inserting in lieu thereof "grantee"; and

(6) in the matter preceding paragraph (1) in section 6(a), by striking out "contractor" and inserting in lieu thereof "grantee".

(c) EFFECTIVE DATE.—The amendments made by section (a) shall be retroactively effective as of November 29, 1989.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 2602) was agreed to.

Mr. MITCHELL. Mr. President, I move to reconsider the vote.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossd for a third reading, was read the third time, and passed, as follows:

S. 1963

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Commissioned Corps of the Public Health Service Revitalization Amendments of 1990".

SEC. 2. TRAINING OF COMMISSIONED OFFICERS.

(a) IN GENERAL.—Section 218 of the Public Health Service Act (42 U.S.C. 218a) is amended by striking out subsection (b) and inserting in lieu thereof the following new subsections:

"(b)(1) Any officer on active duty who attends an educational institution or training program as part of the service of such individual in the Public Health Service for a period in excess of 30 days shall be obligated to pay to the Service an amount equal to two times the total amount of any such tuition, fees, and other necessary expenses received by such officer during such period, and two times the total amount of any compensation received by, and any allowance paid to, such officer during such period, if after completion of such attendance such officer voluntarily leaves the Service within—

"(A) 6 months; or

"(B) a period that is equal to twice the period of such attendance;

whichever is greater. Such subsequent period of service shall begin on the date of cessation of such attendance at the educational institution or training program. The Secretary may waive, in whole or in part, any payment that may be required by this paragraph on a determination that such payment would be inequitable or would not be in the public interest.

"(2) Any obligation to make a payment in lieu of service pursuant to paragraph (1) may be released by a discharge in bankruptcy under title 11, United States Code, if—

"(A) the discharge is granted after the expiration of the 5-year period beginning on the first date that such payment is required; and

"(B) the Bankruptcy Court finds that the nondischarge of the obligation would be unconscionable.

"(c) A commissioned officer may be placed on leave without pay status while attending an educational institution or training program whenever the Secretary determines that such status is in the best interest of the Service. For purposes of the computation of basic pay, promotion, retirement, compensation for injury or death, the benefits provided by section 212, and section 224, an officer in such status shall be considered as performing service in the Service.".

(b) BANKRUPTCY.—Section 523(a) of title 11, United States Code, is amended—

(1) by striking out "or" at the end of paragraph (9);

(2) by striking out the period at the end of paragraph (10) and inserting in lieu thereof "; or"; and

(3) by adding at the end thereof the following new paragraph:

"(11) that under provisions of the Public Health Service Act is not to be discharged.".

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect on the date of the enactment of this Act, and shall apply, in the case of proceedings under the Bankruptcy Act, to any obligation arising under the Public Health Service Act that has not been granted a discharge prior to such date.

SEC. 3. INSTALLMENT DEDUCTION FOR INDEBTEDNESS TO THE UNITED STATES.

(a) IN GENERAL.—Section 5514 of title 5, United States Code, is amended—

(1) in the first sentence of subsection (a)(1), by striking out "Armed Forces" both places it appears and inserting in lieu thereof "uniformed services"; and

(2) in the second sentence of subsection (b)(1), by—

(A) striking out "Secretaries of the military departments" and inserting in lieu thereof "Secretaries concerned"; and

(B) striking out "military services" and inserting in lieu thereof "uniformed services".

(b) EFFECTIVE DATE.—The amendments made by this section shall take effect on the date of the enactment of this Act and shall apply to any debt outstanding on or after such date.

SEC. 4. DENIAL OF ANNUAL BONUS TO MEDICAL OFFICERS PARTICIPATING IN A CLINICAL, RESEARCH, OR STAFF ASSOCIATE PROGRAM.

(a) IN GENERAL.—Section 208(a)(2)(B) of the Public Health Service Act (42 U.S.C. 210(a)(2)(B)) is amended by inserting "is assigned to a clinical, research, or staff associate program administered by the National Institutes of Health or the Alcohol, Drug Abuse, and Mental Health Administration, or" before "is providing".

(b) EFFECTIVE DATE.—The amendment made by this section shall take effect on October 1, 1989, and shall apply with respect to pay periods beginning on or after such date.

SEC. 5. SPECIAL PAY FOR FOREIGN LANGUAGE PROFICIENCY.

(a) IN GENERAL.—Section 316 of title 37, United States Code, is amended—

(1) in subsection (a) in the matter preceding paragraph (1), by striking out "armed forces" and inserting in lieu thereof "uniformed services";

(2) in subsection (a)(2)—

(A) by striking out "Secretary of Defense" and inserting in lieu thereof "Secretary concerned"; and

(B) by inserting "or public health" immediately after "national defense";

(3) in subsection (a)(3)(A), by striking out "military" and inserting in lieu thereof "uniformed services";

(4) in subsection (a)(3)(C), by striking out "military";

(5) in subsection (a)(3)(D)—

(A) by striking out "Department of Defense" and inserting in lieu thereof "uniformed service"; and

(B) by striking out "Secretary of Defense" and inserting in lieu thereof "Secretary concerned"; and

(6) in subsection (d)—

(A) by striking out "and"; and

(B) by inserting "by the Secretary of Health and Human Services for the Commissioned Corps of the Public Health Service, and by the Secretary of Commerce for the National Oceanic and Atmospheric Administration" immediately before the period.

(b) EFFECTIVE DATE.—The amendments made by this section shall take effect on October 1, 1989, and shall apply with respect to pay periods beginning on or after such date.

SEC. 6. AUTHORIZATION OF RETIREMENT PAY FOR NON-REGULAR SERVICE IN THE RESERVE CORPS.

(a) IN GENERAL.—Section 221(a) of the Public Health Service Act (42 U.S.C. 213a(a)) is amended by adding at the end thereof a new paragraph as follows:

"(16) Chapter 67, Retired Pay for Non-Regular Service.".

(b) EFFECTIVE DATE.—The amendment made by this section shall take effect on October 1, 1989.

SEC. 7. CLARIFICATION OF NONAPPLICABILITY OF LENGTH-OF-SERVICE CREDIT FOR SERVICE AT U.S. MILITARY ACADEMIES.

Section 971(b) of title 10, United States Code, is amended—

(1) by striking out "and" at the end of paragraph (2);

(2) by striking out the period at the end of paragraph (3) and inserting in lieu thereof "; and"; and

(3) by adding at the end thereof the following new paragraph:

"(4) no officer of the Commissioned Corps of the Public Health Service may be credited with service as a midshipman at the United States Naval Academy or as a cadet at the United States Military Academy, United States Air Force Academy, or United States Coast Guard Academy.".

SEC. 8. CLARIFICATION REGARDING DESIGNATION OF LEGAL RESIDENCE FOR PURPOSES OF STATE AND LOCAL INCOME TAX WITHHOLDING.

(a) DISTRICT OF COLUMBIA INCOME TAXES.—The fourth sentence of section 5516(a) of title 5, United States Code, is amended by striking out "armed forces" and inserting in lieu thereof "uniformed services".

(b) STATE INCOME TAXES.—Section 5517 of title 5, United States Code, is amended—

(1) in the third sentence of subsection (a), by striking out "armed forces" and inserting in lieu thereof "uniformed services"; and

(2) in subsection (d) in the matter preceding paragraph (1), by striking out "terms 'serve as a member of the armed forces' and 'service as a member of the Armed Forces' do" and inserting in lieu thereof "term 'service as Forces' does".

(c) CITY OF COUNTY INCOME OR EMPLOYMENT TAXES.—The third sentence of section 5520(a) of title 5, United States Code, is amended by striking out "Armed Forces" and inserting in lieu thereof "uniformed services".

SEC. 9. MOUSE BREEDING FACILITIES GRANTS.

(a) IN GENERAL.—Public Law 101-190 (103 Stat. 1691) is amended—

(1) in section 1—

(A) by striking out "CONTRACT" in the heading and inserting in lieu thereof "GRANT";

(B) by striking out "for entering into a contract with" in subsection (a), and inserting in lieu thereof "to make a grant to"; and

(C) by striking out "contract" in subsection (b), and inserting in lieu thereof "grant".

(2) in section 2—

(A) by striking out "enter into a contract" in the matter preceding paragraph (1) in subsection (a), and inserting in lieu thereof "make a grant";

(B) by striking out "contract" in subsection (a)(1), and inserting in lieu thereof "grant";

(C) by striking out "contractor" in the matter preceding subparagraph (A) in subsection (b)(1), and inserting in lieu thereof "grantee";

(D) by striking out "a contract" each place that such occurs in subparagraphs (A) and (B) of subsection (b)(1), and inserting in lieu thereof "an agreement";

(E) by striking out "contractor" in subsection (b)(2), and inserting in lieu thereof "grantee";

(F) by striking out "CONTRACTOR" in the heading of paragraph (1) of subsection (d), and inserting in lieu thereof "GRANTEE";

(G) by striking out "enter into a contract" in subsection (d)(1), and inserting in lieu thereof "make a grant"; and

(H) by striking out "the contract" in subsection (d)(1), and inserting in lieu thereof "the grant";

(3) in section 3(a)—

(A) by striking out "enter into a contract" and inserting in lieu thereof "make a grant"; and

(B) by striking out "the contract" each place that such occurs and inserting in lieu thereof "the grant";

(4) in section 4—

(A) by striking out "enter into a contract under section 1 unless the applicant for the contract" in the first sentence of subsection (a)(1), and inserting in lieu thereof "make a grant under section 1 unless the applicant for the grant";

(B) by striking out "in the contract" in the second sentence of subsection (a)(2)(A);

(C) by striking out "enter into a contract" in the matter preceding paragraph (1) in subsection (b), and inserting in lieu thereof "make a grant";

(D) by striking out "contract" in subsection (b)(1), and inserting in lieu thereof "grant";

(E) by striking out "enter into a contract" in the matter preceding paragraph (1) in subsection (c), and inserting in lieu thereof "make a grant"; and

(F) by striking out "contract" in subsection (w)(1), and inserting in lieu thereof "grant";

(5) in section 5, by striking out "contractor" each place that such occurs and inserting in lieu thereof "grantee"; and

(6) in the matter preceding paragraph (1) in section 6(a), by striking out "contractor" and inserting in lieu thereof "grantee".

(c) EFFECTIVE DATE.—The amendments made by subsection (a) shall be retroactively effective as of November 29, 1989.

Mr. MITCHELL. Mr. President, I move to reconsider the vote.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NATIONAL CENTER FOR HEALTH STATISTICS REAUTHORIZATION ACT

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar No. 706, S. 2632, the National Center for Health Statistics Reauthorization Act of 1990.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (S. 2632) to amend the Public Health Service Act to reauthorize the National Center for Health Statistics, and for other purposes.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

Mr. KENNEDY. Mr. President, the National Center for Health Statistics serves as the primary source of Federal Government health statistics, providing essential health care data to policymakers and researchers. NCHS maintains four major data systems: the National Vital Statistics System; the National Health and Nutrition Examination Survey; the National Health Care Survey; and the National Health Interview Survey. In addition to these principal data systems, NCHS conducts a number of other targeted surveys, including data regarding HIV and AIDS, maternal and infant health, and aging, and coordinates with other Federal agencies to provide assistance in health data collection and to serve the needs of the Federal Government.

S. 2632 will reauthorize NCHS for $58 million in fiscal year 1991, and such sums as may be necessary through 1995. The legislation also ensures the uninterrupted annual collection of the National Health Interview Survey, which has been the principal source of Federal data on the general health, illness, and disability status of the population since 1957.

The collection of health care data provides the information necessary to help us make effective decisions regarding the health care needs of America. I urge my colleagues to join in supporting S. 2632.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 2632

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "National Center for Health Statistics Reauthorization Act of 1990".

SEC. 2. REAUTHORIZATION OF NATIONAL CENTER FOR HEALTH STATISTICS.

Section 306 of the Public Health Service Act (42 U.S.C. 242k) is amended—

(1) in subsection (c), by striking out "Committee on Human Resources" and inserting in lieu thereof "Committee on Labor and Human Resources";

(2) in subsection (h)—

(A) by inserting "(1)" after the subsection designation; and

(B) by adding at the end thereof the following new paragraph:

"(2) There shall be an annual collection of data from a statistically valid sample concerning the general health, illness, and disability status of the civilian noninstitutionalized population. Specific topics to be addressed under this paragraph on an annual or rotating basis, shall include the incidence of illness and accidental injuries, prevalence of chronic diseases and impairments, disability, physician visits, hospitalizations, and the relationship between demographic and socioeconomic characteristics and health characteristics."; and

(3) in subsection (m), by striking out "$55,000,000 for fiscal year 1988" and all that follows through the period and inserting in lieu thereof "$58,000,000 for fiscal year 1991, and such sums as may be necessary for each of the fiscal years 1992 through 1995.".

Mr. MITCHELL. Mr. President, I move to reconsider the vote.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

MINIMUM WAGE DETERMINATION FOR AMERICAN SAMOA

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Labor Committee be discharged from further consideration of S. 2930, regarding documentary evidence requirement for minimum wage determination for American Samoa, and that the Senate then proceed to its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report.

The assistant legislative clerk read as follows:

A bill (S. 2930) to eliminate "substantial documentary evidence" requirement for minimum wage determination for American Samoa.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 2930

Be it enacted by the Senate and House of Representatives of the United States of

America in Congress assembled, That the last sentence of subsection (b) of section 8 of the Fair Labor Standards Act of 1938, as amended (29 U.S.C. 208(b)) is amended by striking out the semicolon and the material following the semicolon and inserting a period in lieu thereof.

Mr. MITCHELL. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

MARKET REFORM ACT

Mr. MITCHELL. I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar No. 562, S. 648, a bill to amend the Securities Exchange Act of 1934.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A bill (S. 648) to amend the Securities Exchange Act of 1934.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Banking, Housing, and Urban Affairs, with an amendment to strike all after the enacting clause and insert in lieu thereof the following:

SECTION 1. SHORT TITLE.

This Act may be cited as the "Market Reform Act of 1990".

SEC. 2. EMERGENCY AUTHORITY; TRADING HALTS.

Section 12(k) of the Securities Exchange Act (15 U.S.C. 781(k)) is amended to read as follows:

"(k)(1) If in its opinion the public interest and the protection of investors so require, the Commission may by order—

"(A) summarily to suspend trading in any security (other than an exempted security) for a period not exceeding 10 days, and

"(B) summarily to suspend all trading on any national securities exchange or otherwise, in securities other than exempted securities, for a period not exceeding 90 days.

The action described in subparagraph (B) shall not take effect unless the Commission notifies the President of its decision and the Commission is advised that the President does not disapprove of such decision.

"(2)(A) The Commission, in an emergency, may by order summarily take such action to alter, supplement, suspend, or impose requirements or restrictions with respect to any matter or action subject to regulation by the Commission or a self-regulatory organization under this title, as the Commission determines is necessary in the public interest and for the protection of investors—

"(i) to maintain or restore fair and orderly securities markets (other than markets in exempted securities); or

"(ii) to ensure prompt and accurate clearance and settlement of transactions in securities (other than exempted securities).

"(B) An order of the Commission under this paragraph shall continue in effect for the period specified by the Commission and may be extended, except that in no event shall the Commission's action continue in effect for more than 10 business days, including extensions. In exercising its authority under this paragraph, the Commission shall not be required to comply with the provisions of section 553 of title 5, United States Code, or with the provisions of section 19(c) of this title.

"(3) Upon direction by the President, any order or action by the Commission under paragraph (1)(B) or paragraph (2) shall cease to be effective.

"(4) No member of a national securities exchange, broker, or dealer shall make use of the mails or any means or instrumentality of interstate commerce to effect any transaction in, or to induce the purchase or sale of, any securities in contravention of an order of the Commission under this subsection unless such order has been stayed, modified, or set aside as provided in paragraph (5), or has ceased to be effective pursuant to paragraph (3).

"(5) An order of the Commission pursuant to this subsection shall be subject to review only as provided in section 25(a) of this title. Review shall be based on an examination of all the information before the Commission at the time of such order. The reviewing court shall not enter a stay, writ of mandamus, or similar relief unless the court finds, after notice and hearing before a panel of the court, that the Commission's action is arbitrary, capricious, an abuse of discretion, or otherwise not in accordance with law.

"(6) For purposes of this subsection, the term 'emergency' means a major market disturbance characterized by, or constituting—

"(A) a substantial threat of sudden and excessive fluctuations of securities prices generally that threaten fair and orderly markets, or

"(B) a substantial disruption of the safe or efficient operation of the national system for clearance and settlement of securities.".

SEC. 3. LARGE TRADER REPORTING.

Section 13 of the Securities Exchange Act of 1934 (15 U.S.C. 78m) is amended by adding at the end the following:

"(h)(1) For the purpose of monitoring the impact on the securities markets of securities transactions involving a substantial volume or a large fair market value or exercise value, each large trader shall provide such information to the Commission as the Commission may by rule prescribe as necessary or appropriate, identifying such person and all accounts in or through which such large trader effects such transactions.

"(2) Every registered broker or dealer shall make and keep for prescribed periods such records as the Commission by rule prescribes as necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of this title, with respect to securities transactions of large traders effected directly or indirectly by or through such registered broker or dealer that equal or exceed the reporting activity level. Such records shall be available for reporting to the Commission, or any self-regulatory organization that the Commission shall designate to receive such reports, on the morning of the day following the day the transactions were effected, and shall be reported to the Commission immediately upon request by the Commission or a self-regulatory organization designated by the Commission. Such records and reports shall be in a format and transmitted in a manner prescribed by the Commission (including, but not limited to, machine readable form).

"(3) The Commission may prescribe rules governing the manner in which transactions and accounts shall be aggregated for the purpose of this subsection.

"(4) All records required to be made and kept by registered brokers and dealers pursuant to this subsection with respect to transactions effected by large traders are subject at any time, or from time to time, to such reasonable, special, or other examinations by representatives of the Commission as the Commission deems necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of this title.

"(5) In exercising its authority under this subsection, the Commission shall take into account—

"(A) existing reporting systems;

"(B) the costs associated with maintaining information with respect to transactions effected by large traders and reporting such information to the Commission or self-regulatory organizations; and

"(C) the relationship between the United States and international securities markets.

"(6) The Commission by rule or order, may exempt any person or classes of persons or any transaction or classes of transactions, either conditionally or upon specified terms and conditions or for stated periods, from the operation of this subsection, and the rules thereunder.

"(7) Notwithstanding the provisions of any law, the Commission shall not be compelled to disclose any information required to be kept or reported under this subsection. Nothing in this subsection shall authorize the Commission to withhold information from Congress, or prevent the Commission from complying with a request for information from any other Federal department or agency, or complying with an order of a court of the United States in an action commenced by the United States or the Commission. This subsection shall be considered a statute described in section 552(b)(3)(B) of title 5, United States Code.

"(8) For purposes of this subsection—

"(A) the term 'large trader' means every person who, for his own account or an account for which he exercises investment discretion, effects transactions for the purchase or sale of any publicly traded security by use of any means or instrumentality of interstate commerce or of the mails, or of any facility of a national securities exchange, directly or indirectly by or through a registered broker or dealer during any 24-hour period in an aggregate amount equal to or in excess of the identifying activity level;

"(B) the term 'publicly traded security' means any equity security (including an option on individual equity securities, and an option on a group or index of such securities) listed, or admitted to unlisted trading privileges, on a national securities exchange, or quoted in an automated interdealer quotation system;

"(C) the term 'identifying activity level' means transactions in any publicly traded security at or above a level of volume, fair market value, or exercise value as shall be fixed from time to time by the Commission by rule;

"(D) the term 'reporting activity level' means transactions in any publicly traded security at or above a level of volume, fair market value, or exercise value as shall be fixed from time to time by the Commission by rule or order; and

"(E) the term 'person' includes, in addition to the definition given such term under

section 3(a)(9), two or more persons acting as a partnership, limited partnership, syndicate, or other group, but shall not include a foreign central bank.".

SEC. 4. RISK ASSESSMENT FOR HOLDING COMPANY SYSTEMS.

(a) AMENDMENT.—Section 17 of the Securities Exchange Act of 1934 (15 U.S.C. 78q) is amended by adding at the end the following:

"(h)(1) Every person who is (A) a registered broker or dealer, or (B) a registered municipal securities dealer for which the Commission is the appropriate regulatory agency, shall obtain such information and make and keep such records as the Commission, by rule, prescribes concerning such registered person's policies, procedures, or systems for monitoring and controlling financial and operational risks to it resulting from the activities of any of such registered person's associated persons, other than a natural person. Such records shall describe in the aggregate each of the financial and securities activities conducted by, and the customary sources of capital and funding of such registered person's associated persons whose business activities are reasonably likely to have a material impact on the financial or operational condition of such registered person, including its net capital, its liquidity, or its ability to conduct or finance its operations. The Commission, by rule, may require summary reports of such information to be filed with the Commission no more frequently than quarterly.

"(2) If, as a result of adverse market conditions or based on reports provided to the Commission pursuant to paragraph (1) of this subsection or other available information, the Commission reasonably concludes that it has concerns regarding the financial or operational condition of (A) any registered broker or dealer, or (B) registered municipal securities dealer, government securities broker, or government securities dealer for which the Commission is the appropriate regulatory agency, the Commission may require such registered person to make reports concerning the financial and securities activities of any of such registered person's associated persons, other than a natural person, whose business activities are reasonably likely to have a material impact on the financial or operational condition of such registered person. The Commission, in requiring reports pursuant to this paragraph, shall specify the information required, the period for which it is required, the time and date on which the information must be furnished, and whether the information is to be furnished directly to the Commission or to a self-regulatory organization with primary responsibility for examining such registered person's financial and operational condition.

"(3) The Commission, by rule or order, may exempt any person or classes of persons under such terms and conditions and for such periods as the Commission shall provide, from the provisions of this subsection and the rules thereunder. In granting such exemptions, the Commission shall consider, among other factors—

"(A) whether information of the type required under this subsection is available from a supervisory agency (as defined in section 1101(6) of the Right to Financial Privacy Act of 1978 (12 U.S.C. 3401(6))), a State insurance commission or similar State agency, the Commodity Futures Trading Commission, or a similar foreign regulator;

"(B) the primary business of any associated person;

"(C) the nature and extent of domestic or foreign regulation of the associated person's activities;

"(D) the nature and extent of the registered person's securities activities; and

"(E) with respect to the registered person and its associated persons, on a consolidated basis, the amount and proportion of assets devoted to, and revenues derived from, activities in the United States securities markets.

"(4) Notwithstanding the provisions of any law, the Commission shall not be compelled to disclose any information required to be reported under this subsection, or any information supplied to the Commission by any domestic or foreign regulatory agency that relates to the financial or operational condition of any associated person of a registered broker, dealer, government securities broker, government securities dealer, or municipal securities dealer. Nothing in this subsection shall authorize the Commission to withhold information from Congress, or prevent the Commission from complying with a request for information from any other Federal department or agency requesting the information for purposes within the scope of its jurisdiction, or complying with an order of a court of the United States in an action commenced by the United States or the Commission. This subsection shall be considered a statute described in section 552(b)(3)(B) of title 5, United States Code.".

(b) CONFORMING AMENDMENT.—Section 15C(b) of the Securities Exchange Act of 1934 (15 U.S.C. 78o-4(b)) is amended—

(1) by redesignating paragraphs (2) through (5) as paragraphs (3) through (6), respectively; and

(2) by inserting after paragraph (1) the following new paragraph:

"(2)(A) Every person who is registered as a government securities broker or government securities dealer under this section shall obtain such information and make and keep such records as the Secretary, by rule, prescribes concerning such registered person's policies, procedures, or systems for monitoring and controlling financial and operational risks to it resulting from the activities of any of such registered person's associated persons, other than a natural person. Such records shall describe, in the aggregate, each of the financial and securities activities conducted by, and customary sources of capital and funding of such registered person's associated persons whose business activities are reasonably likely to have a material impact on the financial or operational condition of such registered person, including its capital, its liquidity, or its ability to conduct or finance its operations. The Secretary, by rule, may require summary reports of such information to be filed with it and the registered person's appropriate regulatory agency no more frequently than quarterly.

"(B) If, as a result of adverse market conditions or based on reports provided pursuant to subparagraph (A) of this paragraph or other available information, the Secretary or the appropriate regulatory agency reasonably concludes that it has concerns regarding the financial or operational condition of any government securities broker or government securities dealer registered under this section, the Secretary or such agency may require such registered person to make reports concerning the financial and securities activities of any of such registered person's associated persons, other than a natural person, whose business activities are reasonably likely to have a material impact on the financial or operational condition of such registered person. The Secretary or the appropriate regulatory agency, in requiring reports pursuant to this subparagraph, shall specify the information required, the period for which it is required, the time and date on which the information must be furnished, and whether the information is to be furnished directly to the Secretary and the appropriate regulatory agency or to a self-regulatory organization with primary responsibility for examining such registered person's financial and operational condition.

"(C) The Secretary, by rule or order, may exempt any person or classes of persons, under such terms and conditions and for such periods as the Secretary shall provide, from the provisions of this subsection and the rules thereunder. In granting such exemptions, the Secretary shall consider, among other factors—

"(i) whether information of the type required under this subsection is available from a supervisory agency (as defined in section 1101(6) of the Right to Financial Privacy Act of 1978 (12 U.S.C. 3401(6))), a State insurance commission or similar State agency, the Commodity Futures Trading Commission, or a similar foreign regulator;

"(ii) the primary business of any associated person;

"(iii) the nature and extent of domestic or foreign regulation of the associated person's activities;

"(iv) the nature and extent of the registered person's securities transactions; and

"(v) with respect to the registered person and its associated persons, on a consolidated basis, the amount and proportion of assets devoted to, and revenues derived from, activities in the United States securities markets.

"(D) In exercising authority pursuant to paragraph (2)(A) concerning information with respect to associated persons of government securities brokers and government securities dealers who are also associated persons of registered brokers or dealers reporting to the Commission pursuant to section 17(h) of this title, the requirements relating to such associated persons shall conform, to the greatest extent practicable, to the requirements of section 17(h).

"(E) Notwithstanding the provisions of any law, the Secretary and any appropriate regulatory agency shall not be compelled to disclose any information required to be reported under this subsection, or any information supplied to the Secretary or any appropriate regulatory agency by any domestic or foreign regulatory agency that relates to the financial or operational condition of any associated person of a registered government securities broker or a government securities dealer. Nothing in this subsection shall authorize the Secretary or any appropriate regulatory agency to withhold information from Congress, or prevent the Secretary or any appropriate regulatory agency from complying with a request for information from any other Federal department or agency requesting the information for purposes within the scope of its jurisdiction, or complying with an order of a court of the United States in an action commenced by the United States or the Commission. This subsection shall be considered a statute described in section 552(b)(3)(B) of title 5, United States Code.".

SEC. 5. COORDINATED CLEARING.

(a) AUTHORITY TO FACILITATE COORDINATED CLEARING MECHANISMS.—Section 17A(a)(2) of the Securities Exchange Act of 1934 (15 U.S.C. 78q-1(a)(2)) is amended to read as follows:

"(2)(A) The Commission is directed, therefore, having due regard to the public interest, the protection of investors, the safeguarding of securities and funds, and maintenance of fair competition among brokers and dealers, clearing agencies, and transfer agents, to use its authority under this title—

"(i) to facilitate the establishment of a national system for the prompt and accurate clearance and settlement of transactions in securities (other than exempt securities); and

"(ii) to facilitate the establishment of linked or coordinated facilities for clearance and settlement of transactions in securities, securities options, contracts of sale for future delivery and options thereon, and commodity options;

in accordance with the findings and to carry out the objectives set forth in paragraph (1) of this subsection.

"(B) The Commission shall use its authority under this title to assure equal regulation under this title of registered clearing agencies and registered transfer agents. In carrying out its responsibilities set forth in subparagraph (A)(ii) of this paragraph, the Commission shall consult with the Commodity Futures Trading Commission and the Board of Governors of the Federal Reserve System.".

(b) TRANSFER AND PLEDGE OF SECURITIES.—Section 17A of the Securities Exchange Act of 1934 (15 U.S.C. 78q-1) is amended by adding at the end the following:

"(f)(1) Notwithstanding any provision of State law, the Commission is authorized to adopt rules concerning the transfer of certificated or uncertificated securities (other than government securities issued pursuant to chapter 31 of title 31, United States Code, or securities otherwise processed within a book-entry system operated by the Federal Reserve Banks) or limited interests (including security interests) therein, and rights and obligations of purchasers, sellers, investors, financial intermediaries, and lenders to such transfers, and the rights of third parties whose interests in such securities devolve from such transfers, if the Commission finds—

"(A) that such rule is necessary or appropriate for the protection of investors or in the public interest and is reasonably designed to promote the prompt, accurate, and safe clearance and settlement of securities transactions;

"(B) that in the absence of a uniform rule, the safe and efficient operation of the national system for clearance and settlement of securities transactions will be or is substantially impeded; and

"(C) that to the extent such rule will impair or diminish directly or indirectly rights of investors under State law concerning transfers of securities (or limited interests therein), that the benefits of such rule exceed the detriment to investors.

In making such determinations, the Commission shall give consideration to the recommendations of the Advisory Committee established under paragraph (2), and it shall consult with and consider the views of the Secretary of the Treasury and the Board of Governors of the Federal Reserve System. If the Secretary of the Treasury shall object, in writing, to the Commission's findings with respect to the factors set forth in subparagraphs (A), (B), or (C) of this paragraph, the Commission shall consider all feasible alternatives to the proposed rule, and it shall not adopt any such rule unless the Commission shall make an explicit determination that the rule is the most practicable method for achieving safe and efficient operation of the national clearance and settlement system.

"(2)(A) Within 90 days after the effective date of this section, the Commission shall (and at such times thereafter as the Commission may determine, the Commission may), after consultation with the Secretary of the Treasury and the Board of Governors of the Federal Reserve System, establish an advisory committee under the Federal Advisory Committee Act (5 U.S.C. App.). The Advisory Committee shall be directed to consider and report to the Commission on such matters as the Commission, after consultation with the Secretary of the Treasury and the Board of Governors of the Federal Reserve System, determines, including the areas, if any, where State commercial laws and related Federal laws concerning the transfer of certificated or uncertificated securities, limited interests (including security interests) in such securities, or the creation or perfection of security interests in such securities do not provide the necessary certainty, uniformity, and clarity for purchasers, sellers, investors, financial intermediaries, and lenders concerning their respective rights and obligations.

"(B) The Advisory Committee shall consist of 15 members, of which the Commission shall designate 11 in accordance with the Federal Advisory Committee Act. The Board of Governors of the Federal Reserve System and the Secretary of the Treasury each shall be authorized to designate 2 such members of the Advisory Committee.

"(C) The Advisory Committee shall conduct its activities in accordance with the Federal Advisory Committee Act. Within 6 months of its designation or such longer time as the Commission may designate, the Advisory Committee shall issue a report to the Commission, and shall cause copies of that report to be delivered to the Secretary of the Treasury and the Chairman of the Board of Governors of the Federal Reserve System.".

(c) COORDINATED FACILITIES FOR CLEARANCE AND SETTLEMENT OF CERTAIN CONTRACTS AND OPTIONS.—The Commodity Exchange Act is amended by inserting after section 5b (7 U.S.C. 7b) the following new section:

"SEC. 5c. COORDINATED FACILITIES FOR CLEARANCE AND SETTLEMENT OF CERTAIN CONTRACTS AND OPTIONS.

"(a) IN GENERAL.—With due regard for the public interest and maintenance of fair competition among contract markets, commodities and futures clearing organizations, members thereof, and futures commission merchants, the Commission shall facilitate the establishment of linked or coordinated facilities for clearance and settlement of contracts of sale for future delivery and options thereon, commodity options, securities, and securities options.

"(b) CONSULTATION.—In carrying out its responsibilities under this section, the Commission shall consult with the Securities and Exchange Commission and the Board of Governors of the Federal Reserve System.".

SEC. 6. REPORTS TO CONGRESS.

(a) FACILITIES FOR CLEARANCE AND SETTLEMENT.—The Securities and Exchange Commission and the Commodity Futures Trading Commission, in consultation with the Board of Governors of the Federal Reserve System, shall examine progress toward establishing linked or coordinated facilities for clearance and settlement of transactions in securities, securities options, contracts of sale for future delivery and options thereon, and commodity options, and shall submit to Congress, not later than 1 year from the date of enactment of this Act, a report detailing and evaluating such progress.

(b) COORDINATED MECHANISMS AND MARGIN LEVELS.—The Secretary of the Treasury, the Chairman of the Board of Governors of the Federal Reserve System, the Chairman of the Securities and Exchange Commission, and the Chairman of the Commodities Futures Trading Commission, shall report to the Congress not later than May 31, 1990 and annually thereafter until May 31, 1995, on the following:

(1) The efforts such individuals have made relating to the coordination of regulatory activities to ensure the integrity and competitiveness of United States financial markets;

(2) The efforts such individuals have made to formulate coordinated mechanisms across marketplaces to protect the payments and market systems during market emergencies;

(3) The views of such individuals with respect to the adequacy of margin levels and use of leverage by market participants; and

(4) Such other issues and concerns relating to the soundness, stability, and integrity of domestic and international capital markets as may be appropriate.

(c) SEC AUTHORITY OVER MARKET MANIPULATION.—Not later than 90 days after the date of enactment of this Act, the Securities and Exchange Commission shall report to the Committee on Banking, Housing, and Urban Affairs of the Senate and to the Committee on Energy and Commerce of the House of Representatives regarding whether the Commission has sufficient statutory authority to prohibit practices in the purchase and sale of securities to protect against market manipulation or fraud through program trading, including any practices or activities that are inconsistent with the statutory mission of the Commission to protect investors. If the Commission concludes that it lacks such authority, the Commission shall include in its report recommendations for legislative action to confer such authority.

Amend the title so as to read: "A bill to amend the Securities Exchange Act of 1934 to strengthen regulatory oversight of the United States securities markets, improve supervision of financial market participants, and improve the safety and efficiency of market mechanisms, and for other purposes.".

AMENDMENT NO. 2603.

(Purpose: To specify the recordkeeping and reporting procedures applicable to certain associated persons)

Mr. MITCHELL. On behalf of Senator DODD, I send to the desk an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Maine [Mr. MITCHELL] for Mr. DODD, proposes an amendment numbered 2603.

Mr. MITCHELL. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection it is so ordered.

The amendment is as follows:

On page 22, between lines 13 and 14, insert the following new paragraph, and renumber accordingly:

"(3)(A) In developing and implementing reporting requirements pursuant to paragraph (1) of this subsection with respect to associated persons subject to examination by or reporting requirements of a Federal banking agency, the Commission shall consult with and consider the views of each such Federal banking agency.

"(B) A registered broker, dealer, or municipal securities dealer shall be in compliance with any recordkeeping or reporting requirement adopted pursuant to paragraph (1) of this subsection concerning an associated person that is subject to examination by or reporting requirements of an appropriate Federal banking agency if such broker, dealer, or municipal securities dealer utilizes for such recordkeeping or reporting requirement copies of reports filed by the associated person with the Federal banking agency pursuant to section 5211 of the Revised Statutes, section 9 of the Federal Reserve Act, section 7(a) of the Federal Deposit Insurance Act, section 10(b) of the Home Owners' Loan Act, or section 8 of the Bank Holding Company Act of 1956. The Commission may, however, by rule adopted pursuant to paragraph (1), require any broker, dealer, or municipal securities dealer filing such reports with the Commission to obtain, maintain, or report supplemental information if the Commission makes an explicit finding that such supplemental information is necessary to inform the Commission regarding potential risks to such broker, dealer, or municipal securities dealer. Prior to requiring any such supplemental information, the Commission shall first request the appropriate Federal banking agency to expand its reporting requirements to include such information.

"(C) Prior to making a request pursuant to paragraph (2) of this subsection for information with respect to an associated person that is subject to examination by or reporting requirements of a Federal banking agency, the Commission shall—

"(i) notify such agency of the information required with respect to such associated person; and

"(ii) consult with such agency to determine whether the information required is available from such agency and for other purposes, unless the Commission determines that any delay resulting from such consultation would be inconsistent with ensuring the financial and operational condition of the broker, dealer, or municipal securities dealer, government securities broker, or government securities dealer or the stability or integrity of the securities markets.

"(D) Nothing in this subsection shall be construed to permit the Commission to require any broker, dealer, or municipal securities dealer, government securities broker, or government securities dealer for which the Commission is the appropriate regulatory agency, to obtain, maintain, or furnish any examination report of any Federal banking agency or any supervisory recommendations or analysis contained therein.

On page 25, line 4, strike "it and".

On page 25, lines 9 and 10, strike "the Secretary or".

On page 25, lines 13 and 14, strike "the Secretary or".

On page 25, lines 19 and 20, strike "Secretary or the".

On page 25, line 24, strike "the Secretary and".

On page 26, between lines 2 and 3, insert the following new subparagraph, and renumber accordingly:

"(C) (i) In developing and implementing reporting requirements pursuant to subparagraph (A) of this paragraph with respect to associated persons subject to examination by or reporting requirements of a Federal banking agency, the Commission shall consult with and consider the views of each such Federal banking agency.

"(ii) A registered broker, dealer, or municipal securities dealer shall be in compliance with any recordkeeping or reporting requirement adopted pursuant to subparagraph (A) of this paragraph concerning an associated person that is subject to examination by or reporting requirements of an appropriate Federal banking agency if such broker, dealer, or municipal securities dealer utilizes for such recordkeeping or reporting requirement copies of reports filed by the associated person with the Federal banking agency pursuant to section 5211 of the Revised Statutes, section 9 of the Federal Reserve Act, section 7(a) of the Federal Deposit Insurance Act, section 10(b) of the Home Owners' Loan Act, or section 8 of the Bank Holding Company Act of 1956. The Commission may, however, by rule adopted pursuant to subparagraph (A), require any broker, dealer, or municipal securities dealer filing such reports with the Commission to obtain, maintain, or report supplemental information if the Commission makes an explicit finding that such supplemental information is necessary to inform the Commission regarding potential risks to such broker, dealer, or municipal securities dealer. Prior to requiring any such supplemental information, the Commission shall first request the appropriate Federal banking agency to expand its reporting requirements to include such information.

"(iii) Prior to making a request pursuant to subparagraph (B) of this paragraph for information with respect to an associated person that is subject to examination by or reporting requirements of a Federal banking agency, the Commission shall—

"(I) notify such agency of the information required with respect to such associated person; and

"(II) consult with such agency to determine whether the information required is available from such agency and for other purposes, unless the Commission determines that any delay resulting from such consultation would be inconsistent with ensuring the financial and operational condition of the broker, dealer, municipal securities dealer, government securities broker, or government securities dealer or the stability or integrity of the securities markets.

"(iv) Nothing in this paragraph shall be construed to permit the Commission to require any broker or dealer, or any municipal securities dealer, government securities broker, or government securities dealer for which the Commission is the appropriate regulatory agency, to obtain, maintain, or furnish any examination report of any Federal banking agency or any supervisory recommendations or analysis contained therein.

On page 28, line 2, strike "subsection" and insert "paragraph".

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 2603) was agreed to.

Mr. MITCHELL. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. RIEGLE. Mr. President, I want to commend Senator DODD, as chairman of the Securities Subcommittee, and Senator HEINZ, as ranking Republican on that subcommittee, for their excellent work on the Market Reform Act. Senator DODD has held several days of hearings directly on this legislation and countless days of hearings on issues related to the securities market's structure, its participants, and its stability. The Banking Committee thus had a substantial foundation when it considered this bill in markup. The result of this serious and substantive work is that this bill was passed out of committee by voice with only one recorded nay.

The Market Reform Act will improve regulatory oversight over the financial markets and its participants and promote coordination among the financial regulators. Enactment of this bill is necessary to ensure that this Nation's capital markets—which are probably the best in the world—remain strong, fair, and liquid. The market crash of 1987, and the market instability in October 1989, revealed serious weaknesses in the markets' structure and lapses in regulatory oversight. The Market Reform Act is designed to correct a number of these deficiencies. The thousands of American corporations which rely on those markets to finance their growth need these steps to be taken to maintain the vitality and strength of these markets.

EMERGENCY AUTHORITY FOR THE SEC

The Market Reform Act's first substantive title clarifies the authority of the Securities and Exchange Commission to suspend market trading and authorizes the SEC, in emergency situations, to issue temporary orders designed to stabilize the securities markets.

To ensure that the SEC's power is only used in appropriate circumstances, the Market Reform Act defines the term "emergency" to mean a major market disturbance characterized by, or constituting, first, a substantial threat of sudden and excessive fluctuations of securities prices generally that threaten fair and orderly markets, or, second, a substantial dis-

ruption of the sale or efficient operation of the national system for clearance and settlement of securities. This definition anticipates extraordinary situations in which there is a major disturbance in the securities markets, such as the October 1987 market crash.

LARGE TRADER REPORTING

The Market Reform Act also requires large traders and registered broker-dealers to retain records regarding large securities transactions. These records, which would be available to the SEC upon request, would allow the SEC quickly to recreate trading activities during periods of market stress, such as the 1987 market crash or the market volatility in October 1989. This information could also be used for surveillance, enforcement, and other appropriate regulatory purposes.

The need for this information is readily apparent in light of the fact it took the SEC more than 7 months after the October 1989 market events to collect and analyze the relevant trading activities. Much of this work was done manually, using extensive staff resources; after enactment of the Market Reform Act, much of this information would be collected and transmitted by computer.

Because much of the information recorded and reported under the large trader provisions of the Market Reform Act will be confidential, the bill includes protections to prevent the public disclosure of this information.

RISK ASSESSMENT

Possibly the most important provisions of the Market Reform Act authorize the SEC to obtain information from registered broker-dealers concerning their procedures and systems for monitoring or controlling risks resulting from their activities or the financial activities of their affiliates. As a result of this information, the SEC can better evalute the stability of the broker-dealer, and regulate it accordingly, by taking into account events transpiring in the broker-dealer affiliates.

I want to underscore the need and importance of the risk assessment provisions. In February of this year, the bankruptcy filing of Drexel Burnham Lambert Group, Inc., vividly demonstrated that the financial stability and viability of a regulated broker-dealer is directly connected to its affiliates, many of which may be unregulated. In the Drexel situation, the unregulated holding company of the registered broker-dealer and the Government securities dealer began experiencing financial problems. As a result, the holding company's commercial paper rating was lowered and unsecured lenders were no longer willing to extend funds. As its outside financing disappeared, the holding company turned to its registered broker-dealer and Government securities dealer for financing, eventually withdrawing approximately $400 million in capital from these entities. Neither the SEC—nor any other Government entity—was aware of these transfers, which had the direct effect of reducing the capital cushion for the regulated entities. Upon becoming aware of the seriousness of the holding company's problems, the SEC and the New York Stock Exchange prevented further withdrawals from the regulated entities. The SEC was active in monitoring the broker-dealer, but since the problem was with the holding company, the SEC was not able to take action—if action would have been appropriate—to limit the upstreaming of funds from the broker-dealer to the holding company. As we all know, when the Drexel holding company filed for bankruptcy protection, the registered broker-dealer went into liquidation proceedings. The corporate veil separating the holding company from the broker-dealer—which is so important in law—was irrelevant to the markets; the broker-dealer could not survive once the holding company failed.

The Drexel case is a vivid illustration of the need to allow the SEC to see the activities of affiliates of broker-dealers, as provided for in the risk assessment provisions of the Market Reform Act.

Here again, because much of the information recorded and reported under the risk assessment provisions of the Market Reform Act will be confidential, the bill includes protections to prevent the public disclosure of this information.

COORDINATED CLEARING AND SETTLEMENT

The Market Reform Act also directs the SEC and the Commodity Futures Trading Commission to use their authority to facilitate the establishment of a national and coordinated clearance and settlement system and to consult with each other in order to establish coordinated regulation of clearing agencies and registered transfer agents.

In addition, the Market Reform Act gives the SEC authority to adopt rules concerning the transfer and pledge of securities other than Government securities, where the SEC determines that the absence of Federal rules substantially impedes the safe and efficient operation of the national system for the clearance and settlement of securities transactions.

This last provision has created some controversy because it would allow the SEC, after engaging in a lengthy procedure, to preempt State commercial law on technical issues related to the transfer of securities. Eight Senators on the Banking Committee filed additional views to the committee report in which they argued that the power to preempt State law should be reserved to Congress and should not be delegated to a Federal agency.

I agree with my colleagues that preemption is a serious step. However, the importance of our clearance and settlement system to the functioning of our markets cannot be overstated. Many of the market studies conducted since the market crash of 1987 have concluded that weaknesses in the clearance and settlement systems are the principal risks associated with market volatility. Secretary Brady testified before the committee that the clearance and settlement systems are the weakest link in the financial system. His views have been supported by Federal Reserve Chairman Greenspan, Gerald Corrigan, President of the New York Federal Reserve Bank, and a recent GAO report.

As a congressional body, we know that steps must be taken to strengthen the clearance and settlement systems. The SEC, however, is the body with the technical expertise to evaluate the specific provisions of State laws that need to be amended for the safety of the Federal system. We could wait, as my colleagues have suggested, for the SEC to propose legislative recommendations and then wait the months or years that it would take such a bill to work its way through Congress. But while we could wait, the markets will not. If another market crash should occur, the weaknesses in the clearance and settlement system could lead—we have repeatedly been told—to collapse. We must take reasonable steps to move as expeditiously as possible.

Moreover, the SEC's authority under this provision is sharply limited. Before preempting State law, the SEC must make three specific findings: First, that the rule is necessary and appropriate for the protection of investors or in the public interest; second, that the safe and efficient clearance and settlement of securities will be impeded absent a rule; and third, that the benefits of the rule exceed the detriments. Any State that is affected by an SEC preemptive rule can challenge the SEC's action in Federal court. Further, before promulgating such a rule, the SEC must consider the recommendations of a 15-member advisory committee and consult with the Secretary of the Treasury and the Board of Governors of the Federal Reserve System. If the Secretary of the Treasury objects to the SEC's determination that promulgation of a rule is appropriate, the SEC must consider all feasible alternatives to the proposed rule. I think this procedure makes clear our intent that the SEC is to take this responsibility very seriously; but enactment of this provision ensures that this critical issue is dealt with as quickly as possible.

REPORTS TO CONGRESS

Finally, the Market Reform Act requires certain reports to Congress. First, the SEC and the CFTC are required to report to Congress detailing progress in establishing linked and coordinated facilities for clearance and settlement. In addition, the SEC is required to report within 90 days of enactment of this bill on whether it has sufficient authority to prohibit securities trading practices in order to protect against market manipulation or fraud through program trading and other practices that may be inconsistent with the SEC's duty to protect investors.

A third report is on going in nature. Annually for 5 years, the Secretary of the Treasury and the Chairmen of the SEC, CFTC, and the Federal Reserve would be required to report on their efforts to coordinate financial regulation. They are specifically asked to report on their efforts relating to the coordination of regulatory activities to ensure the integrity and competitiveness of U.S. financial markets, their efforts to formulate coordinated mechanisms across marketplaces to protect the payments and market systems during market emergencies, and their views on the adequacy of margin levels and the use of leverage by market participants. In addition, the Secretary and the Chairmen should report on such other issues and concerns relating to the soundness, stability, and integrity of domestic and international capital markets as may be appropriate.

I close by once again complimenting Senator DODD, chairman of the Securities Subcommittee, and Senator HEINZ, ranking Republican on that subcommittee, for their fine work on the Market Reform Act. This is a sound piece of legislation. I strongly urge its enactment.

Mr. DODD. Mr. President, I rise in support of S. 648, the Market Reform Act of 1990. This is legislation designed to strengthen regulatory oversight of the U.S. securities markets, improve supervision of financial market participants, and improve the safety and efficiency of the capital formation mechanisms in this country.

S. 648 was developed after extensive hearings following the October 1987 market break. The bill addresses certain regulatory weaknesses revealed by that event and by the numerous studies that followed. This legislation has the strong support of the Banking Committee, as well as Treasury Secretary Brady and SEC Chairman Breeden. It is absolutely critical that we pass this legislation to give the SEC the tools it needs to protect investors and maintain the integrity of the U.S. capital markets.

Let me begin by thanking my friend and ranking minority member of the subcommittee, JOHN HEINZ, for joining with me in sponsoring the bill in March of last year and for working as a partner with me over the past year as we further developed the legislation.

I also want to thank Chairman RIEGLE for his strong support of our efforts in this area. Chairman RIEGLE held extensive hearings on market reform initiatives following the October 1987 market break, and much of his good work is reflected in the bill.

We all agree that our securities markets are a vital national asset. They have long been considered the strongest, fairest, and most liquid markets in the world. Our markets are strong because, for many decades, investors have had confidence in them. Congress has a responsibility to ensure that that confidence is maintained, and to ensure the continued vitality of the Nation's capital formation mechanisms.

As we noted in the committee's report on the legislation, there have been major changes in the U.S. capital markets during the decade of the 1980's. The volume of trading on the securities exchanges and in the over-the-counter market has grown dramatically. New financial products, such as stock index futures, have linked the securities and commodity futures markets. Advances in communications technology, together with the growth of institutional investors, has resulted in significant changes in trading activity and trading strategies. With huge pools of cash and the use of computer-driven automated trading strategies, institutions can rapidly trade millions of shares of stock and thousands of futures contracts in seconds. The markets of 1990 bear little resemblance to the markets of only a decade ago.

There also has been a restructuring of the securities industry itself. The largest broker-dealers are now part of holding company systems, with unregulated affiliates conducting billions of dollars of potentially high-risk financial activities outside of the supervision of the SEC or other financial regulators. The interdependence of securities firms, banks, and other major participants in the financial markets has linked the securities clearance and settlement systems to the financial payments systems, creating the potential for a ripple-effect systemic crisis triggered by the failure of a single large participant.

The October 1987 market break revealed that this new environment presents serious threats to the Nation's securities markets. The more than 500-point drop in the Dow Jones industrial average on October 19, 1987, was the largest single-day market decline in the Nation's history. This price movement was accompanied by an extraordinary surge in trading volume and price volatility, as well as extreme order imbalances. Market mechanisms were overwhelmed and, in some cases, failed. Individual investors found it difficult, and in some cases impossible, to communicate with their brokers.

As numerous reports on the October events have noted, the convergence of many factors caused substantial uncertainty, drove down prices, depleted much of the available liquidity in the markets, and generated unprecedented volatility. The dramatic increase in the number of stock transactions contributed to clearance and settlement problems near gridlock in the financial payments system.

Following the market break of 1987, a number of important reforms were undertaken by the private markets, as well as by market regulators. Even so, the market turbulence of October 1989, revealed that there continue to be periods of sharp price movements and extreme volatility. On Friday, October 13, 1990, during a period of less than 90 minutes, the Dow Jones industrial average plunged over 190 points. Regulators worked through the weekend to determine potential problems that might occur when the market opened the following Monday. It was clear from the events of last October, just as it had been in October 1987, that the regulators did not have sufficient information to fully assess the risks to the system, nor did they have adequate tools to address potential problems that could have arisen if the market's decline had been more severe.

The Market Reform Act provides the SEC with important, new authority to address a number of weaknesses in our current system of market regulation. First, it clarifies and broadens the SEC's authority to take appropriate actions to ensure fair and orderly markets during periods of market stress. Second, it enhances the SEC's ability to obtain information necessary to monitor the activities and assess the impact of large traders and to detect manipulative or other illegal trading activity. Third, the act enhances the SEC's ability to identify and evaluate risks to the financial integrity of broker-dealers within holding company systems. A fourth major objective of the act is to strengthen the coordination of clearance and settlement systems for stocks, options, and futures, and thereby reduce threats to the financial system as a whole. Finally, the act promotes greater coordination among market regulators by requiring periodic reporting by financial regulators on a range of issues affecting the Nation's securities markets and investors.

Mr. President, the committee's report on the legislation discusses these provisions extensively, and I therefore will not discuss them in greater detail.

39-059 O-91-41 (Pt. 16)

Let me close by saying that this bill represents a major step in giving our market regulators the tools they need to ensure the continued integrity of our capital markets. In hearings and in communications with the committee subsequent to our vote on this legislation, Secretary Brady, SEC Chairman Breeden, and Federal Reserve Chairman Greenspan have raised further concerns about what they view as weaknesses in our market regulatory system, and the administration has proposed new legislation in this area. The Senate will have ample opportunity to consider those issues in the future, and I intend to be an active participant in that important debate. At this time, however, I believe it is important that we pass this critically important legislation to give the SEC the tools it needs to carry out its important mission of protecting investors and ensuring the continued integrity of the U.S. capital markets.

EXPLANATION OF AMENDMENT TO S. 648

The bill as reported authorizes the SEC to require registered entities to monitor and maintain records on certain affiliated companies. In particular, this requirement applies to affiliates whose business activities are reasonably likely to have a material impact on the financial or operational condition of the registered entity, as determined by the SEC. The Commission may require, by regulation, that summaries of this information be filed with the SEC. Additionally, in certain circumstances, the SEC may also require a specific registered entity to make reports to it concerning the financial and securities activities of such affiliates.

As reported, the bill would cover affiliated companies that are also regulated by the Federal bank regulatory agencies. Since these companies are already examined by and required to file reports with these bank regulatory agencies, the reported bill might impose duplicative and unnecessary reporting requirements on these institutions. This amendment addresses this concern by specifying that, with respect to federally regulated financial institutions, the SEC is to utilize reports filed with the Federal banking agencies unless the Commission makes a specific finding that supplementary information is needed, and the Federal banking agency does not expand its reporting requirement to include such information.

Under this amendment, the SEC is also required to consult with the appropriate Federal banking agency before making a request for additional reports on the condition or activities of a specific affiliate. These consultations are to determine if the information is available from the banking agency. When exigent circumstances exist, the SEC could require such additional specific reports without consulting the Federal banking agencies, so long as the agencies were notified of the problem. The SEC is to consider the comments of the Federal banking agencies when promulgating regulations under this authority.

The amendment also includes provisions to avoid an unnecessary overlapping of supervisors for Government securities brokers and dealers. The Government Securities Act of 1986 gave the Treasury Department rulemaking authority and split general supervisory and regulatory authority among the SEC and financial institution regulators, as appropriate. The Market Reform Act of 1990 extends the Treasury's rulemaking authority to cover the contents of recordkeeping and summary filing made under that act. The act also requires brokers and dealers to send such filings to, and respond to requests for supplementing information, from their normal appropriate regulators. This amendment would delete the requirement that the Treasury Department also receive summary filings and delete provisions giving the Treasury the authority to require additional information. The amendment thereby avoids placing Treasury in a supervisory role with respect to Government securities brokers and dealers, which would be inconsistent with the existing law.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on agreeing to the committee amendment in the nature of a substitute, as amended.

The amendment, as amended, was agreed to.

The bill was ordered to be engrossed for a third reading and was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

So the bill (S. 648), as amended, was passed, as follows:

S. 648

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Market Reform Act of 1990".

SEC. 2. EMERGENCY AUTHORITY; TRADING HALTS.

Section 12(k) of the Securities Exchange Act (15 U.S.C. 781(k)) is amended to read as follows:

"(k)(1) If in its opinion the public interest and the protection of investors so require, the Commission may by order—

"(A) summarily to suspend trading in any security (other than an exempted security) for a period not exceeding 10 days, and

"(B) summarily to suspend all trading on any national securities exchange or otherwise, in securities other than exempted securities, for a period not exceeding 90 days.

The action described in subparagraph (B) shall not take effect unless the Commission notifies the President of its decision and the Commission is advised that the President does not disapprove of such decision.

"(2)(A) The Commission, in an emergency, may by order summarily take such action to alter, supplement, suspend, or impose requirements or restrictions with respect to any matter or action subject to regulation by the Commission or a self-regulatory organization under this title, as the Commission determines is necessary in the public interest and for the protection of investors—

"(i) to maintain or restore fair and orderly securities markets (other than markets in exempted securities); or

"(ii) to ensure prompt and accurate clearance and settlement of transactions in securities (other than exempted securities).

"(B) An order of the Commission under this paragraph shall continue in effect for the period specified by the Commission and may be extended, except that in no event shall the Commission's action continue in effect for more than 10 business days, including extensions. In exercising its authority under this paragraph, the Commission shall not be required to comply with the provisions of section 553 of title 5, United States Code, or with the provisions of section 19(c) of this title.

"(3) Upon direction by the President, any order or action by the Commission under paragraph (1)(B) or paragraph (2) shall cease to be effective.

"(4) No member of a national securities exchange, broker, or dealer shall make use of the mails or any means or instrumentality of interstate commerce to effect any transaction in, or to induce the purchase or sale of, any securities in contravention of an order of the Commission under this subsection unless such order has been stayed, modified, or set aside as provided in paragraph (5), or has ceased to be effective pursuant to paragraph (3).

"(5) An order of the Commission pursuant to this subsection shall be subject to review only as provided in section 25(a) of this title. Review shall be based on an examination of all the information before the Commission at the time of such order. The reviewing court shall not enter a stay, writ of mandamus, or similar relief unless the court finds, after notice and hearing before a panel of the court, that the Commission's action is arbitrary, capricious, an abuse of discretion, or otherwise not in accordance with law.

"(6) For purposes of this subsection, the term 'emergency' means a major market disturbance characterized by, or constituting—

"(A) a substantial threat of sudden and excessive fluctuations of securities prices generally that threaten fair and orderly markets, or

"(B) a substantial disruption of the safe or efficient operation of the national system for clearance and settlement of securities.".

SEC. 3. LARGE TRADER REPORTING.

Section 13 of the Securities Exchange Act of 1934 (15 U.S.C. 78m) is amended by adding at the end the following:

"(h)(1) For the purpose of monitoring the impact on the securities markets of securities transactions involving a substantial volume or a large fair market value or exercise value, each large trader shall provide such information to the Commission as the Commission may by rule prescribe as necessary or appropriate, identifying such person and all accounts in or through which such large trader effects such transactions.

"(2) Every registered broker or dealer shall make and keep for prescribed periods such records as the Commission by rule prescribes as necessary or appropriate in the

public interest, for the protection of investors, or otherwise in furtherance of the purposes of this title, with respect to securities transactions of large traders effected directly or indirectly by or through such registered broker or dealer that equal or exceed the reporting activity level. Such records shall be available for reporting to the Commission, or any self-regulatory organization that the Commission shall designate to receive such reports, on the morning of the day following the day the transactions were effected, and shall be reported to the Commission immediately upon request by the Commission or a self-regulatory organization designated by the Commission. Such records and reports shall be in a format and transmitted in a manner prescribed by the Commission (including, but not limited to, machine readable form).

"(3) The Commission may prescribe rules governing the manner in which transactions and accounts shall be aggregated for the purpose of this subsection.

"(4) All records required to be made and kept by registered brokers and dealers pursuant to this subsection with respect to transactions effected by large traders are subject at any time, or from time to time, to such reasonable, special, or other examinations by representatives of the Commission as the Commission deems necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of this title.

"(5) In exercising its authority under this subsection, the Commission shall take into account—

"(A) existing reporting systems;

"(B) the costs associated with maintaining information with respect to transactions effected by large traders and reporting such information to the Commission or self-regulatory organizations; and

"(C) the relationship between the United States and international securities markets.

"(6) The Commission by rule or order, may exempt any person or classes of persons or any transaction or classes of transactions, either conditionally or upon specified terms and conditions or for stated periods, from the operation of this subsection, and the rules thereunder.

"(7) Notwithstanding the provisions of any law, the Commission shall not be compelled to disclose any information required to be kept or reported under this subsection. Nothing in this subsection shall authorize the Commission to withhold information from Congress, or prevent the Commission from complying with a request for information from any other Federal department or agency, or complying with an order of a court of the United States in an action commenced by the United States or the Commission. This subsection shall be considered a statute described in section 552(b)(3)(B) of title 5, United States Code.

"(8) For purposes of this subsection—

"(A) the term 'large trader' means every person who, for his own account or an account for which he exercises investment discretion, effects transactions for the purchase or sale of any publicly traded security by use of any means or instrumentality of interstate commerce or of the mails, or of any facility of a national securities exchange, directly or indirectly by or through a registered broker or dealer during any 24-hour period in an aggregate amount equal to or in excess of the identifying activity level;

"(B) the term 'publicly traded security' means any equity security (including an option on individual equity securities, and an option on a group or index of such securities) listed, or admitted to unlisted trading privileges, on a national securities exchange, or quoted in an automated interdealer quotation system;

"(C) the term 'identifying activity level' means transactions in any publicly traded security at or above a level of volume, fair market value, or exercise value as shall be fixed from time to time by the Commission by rule;

"(D) the term 'reporting activity level' means transactions in any publicly traded security at or above a level of volume, fair market value, or exercise value as shall be fixed from time to time by the Commission by rule or order; and

"(E) the term 'person' includes, in addition to the definition given such term under section 3(a)(9), two or more persons acting as a partnership, limited partnership, syndicate, or other group, but shall not include a foreign central bank.".

SEC. 4. RISK ASSESSMENT FOR HOLDING COMPANY SYSTEMS.

(a) AMENDMENT.—Section 17 of the Securities Exchange Act of 1934 (15 U.S.C. 78q) is amended by adding at the end the following:

"(h)(1) Every person who is (A) a registered broker or dealer, or (B) a registered municipal securities dealer for which the Commission is the appropriate regulatory agency, shall obtain such information and make and keep such records as the Commission, by rule, prescribes concerning such registered person's policies, procedures, or systems for monitoring and controlling financial and operational risks to it resulting from the activities of any of such registered person's associated persons, other than a natural person. Such records shall describe in the aggregate each of the financial and securities activities conducted by, and the customary sources of capital and funding of such registered person's associated persons whose business activities are reasonably likely to have a material impact on the financial or operational condition of such registered person, including its net capital, its liquidity, or its ability to conduct or finance its operations. The Commission, by rule, may require summary reports of such information to be filed with the Commission no more frequently than quarterly.

"(2) If, as a result of adverse market conditions or based on reports provided to the Commission pursuant to paragraph (1) of this subsection or other available information, the Commission reasonably concludes that it has concerns regarding the financial or operational condition of (A) any registered broker or dealer, or (B) registered municipal securities dealer, government securities broker, or government securities dealer for which the Commission is the appropriate regulatory agency, the Commission may require such registered person to make reports concerning the financial and securities activities of any of such registered person's associated persons, other than a natural person, whose business activities are reasonably likely to have a material impact on the financial or operational condition of such registered person. The Commission, in requiring reports pursuant to this paragraph, shall specify the information required, the period for which it is required, the time and date on which the information must be furnished, and whether the information is to be furnished directly to the Commission or to a self-regulatory organization with primary responsibility for examining such registered person's financial and operational condition.

"(3)(A) In developing and implementing reporting requirements pursuant to paragraph (1) of this subsection with respect to associated persons subject to examination by or reporting requirements of a Federal banking agency, the Commission shall consult with and consider the views of each such Federal banking agency.

"(B) A registered broker, dealer, or municipal securities dealer shall be in compliance with any recordkeeping or reporting requirement adopted pursuant to paragraph (1) of this subsection concerning an associated person that is subject to examination by or reporting requirements of an appropriate Federal banking agency if such broker, dealer, or municipal securities dealer utilizes for such recordkeeping or reporting requirement copies of reports filed by the associated person with the Federal banking agency pursuant to section 5211 of the Revised Statutes, section 9 of the Federal Reserve Act, section 7(a) of the Federal Deposit Insurance Act, section 10(b) of the Home Owners' Loan Act, or section 8 of the Bank Holding Company Act of 1956. The Commission may, however, by rule adopted pursuant to paragraph (1), require any broker, dealer, or municipal securities dealer filing such reports with the Commission to obtain, maintain, or report supplemental information if the Commission makes an explicit finding that such supplemental information is necessary to inform the Commission regarding potential risks to such broker, dealer, or municipal securities dealer. Prior to requiring any such supplemental information, the Commission shall first request the appropriate Federal banking agency to expand its reporting requirements to include such information.

"(C) Prior to making a request pursuant to paragraph (2) of this subsection for information with respect to an associated person that is subject to examination by or reporting requirements of a Federal banking agency, the Commission shall—

"(i) notify such agency of the information required with respect to such associated person; and

"(ii) consult with such agency to determine whether the information required is available from such agency and for other purposes, unless the Commission determines that any delay resulting from such consultation would be inconsistent with ensuring the financial and operational condition of the broker, dealer, municipal securities dealer, government securities broker, or government securities dealer or the stability or integrity of the securities markets.

"(D) Nothing in this subsection shall be construed to permit the Commission to require any broker or dealer, or any municipal securities dealer, government securities broker, or government securities dealer for which the Commission is the appropriate regulatory agency, to obtain, maintain, or furnish any examination report of any Federal banking agency or any supervisory recommendations or analysis contained therein.

"(4) The Commission, by rule or order, may exempt any person or classes of persons under such terms and conditions and for such periods as the Commission shall provide, from the provisions of this subsection and the rules thereunder. In granting such exemptions, the Commission shall consider, among other factors—

"(A) whether information of the type required under this subsection is available

from a supervisory agency (as defined in section 1101(6) of the Right to Financial Privacy Act of 1978 (12 U.S.C. 3401(6))), a State insurance commission or similar State agency, the Commodity Futures Trading Commission, or a similar foreign regulator;

"(B) the primary business of any associated person;

"(C) the nature and extent of domestic or foreign regulation of the associated person's activities;

"(D) the nature and extent of the registered person's securities activities; and

"(E) with respect to the registered person and its associated persons, on a consolidated basis, the amount and proportion of assets devoted to, and revenues derived from, activities in the United States securities markets.

"(5) Notwithstanding the provisions of any law, the Commission shall not be compelled to disclose any information required to be reported under this subsection, or any information supplied to the Commission by any domestic or foreign regulatory agency that relates to the financial or operational condition of any associated person of a registered broker, dealer, government securities broker, government securities dealer, or municipal securities dealer. Nothing in this subsection shall authorize the Commission to withhold information from Congress, or prevent the Commission from complying with a request for information from any other Federal department or agency requesting the information for purposes within the scope of its jurisdiction, or complying with an order of a court of the United States in an action commenced by the United States or the Commission. This subsection shall be considered a statute described in section 552(b)(3)(B) of title 5, United States Code.".

(b) CONFORMING AMENDMENT.—Section 15C(b) of the Securities Exchange Act of 1934 (15 U.S.C. 78o-4(b)) is amended—

"(1) by redesignating paragraphs (2) through (5) as paragraphs (3) through (6), respectively; and

(2) by inserting after paragraph (1) the following new paragraph:

"(2)(A) Every person who is registered as a government securities broker or government securities dealer under this section shall obtain such information and make and keep such records as the Secretary, by rule, prescribes concerning such registered person's policies, procedures, or systems for monitoring and controlling financial and operational risks to it resulting from the activities of any of such registered person's associated persons, other than a natural person. Such records shall describe, in the aggregate, each of the financial and securities activities conducted by, and customary sources of capital and funding of such registered person's associated persons whose business activities are reasonably likely to have a material impact on the financial or operational condition of such registered person, including its capital, its liquidity, or its ability to conduct or finance its operations. The Secretary, by rule, may require summary reports of such information to be filed with the registered person's appropriate regulatory agency no more frequently than quarterly.

"(B) If, as a result of adverse market conditions or based on reports provided pursuant to subparagraph (A) of this paragraph or other available information, the appropriate regulatory agency reasonably concludes that it has concerns regarding the financial or operational condition of any government securities broker or government securities dealer registered under this section, such agency may require such registered person to make reports concerning the financial and securities activities of any of such registered person's associated persons, other than a natural person, whose business activities are reasonably likely to have a material impact on the financial or operational condition of such registered person. The Secretary or the appropriate regulatory agency, in requiring reports pursuant to this subparagraph, shall specify the information required, the period for which it is required, the time and date on which the information must be furnished, and whether the information is to be furnished directly to the appropriate regulatory agency or to a self-regulatory organization with primary responsibility for examining such registered person's financial and operational condition.

"(C)(i) In developing and implementing reporting requirements pursuant to subparagraph (A) of this paragraph with respect to associated persons subject to examination by or reporting requirements of a Federal banking agency, the Commission shall consult with and consider the views of each such Federal banking agency.

"(ii) A registered broker, dealer, or municipal securities dealer shall be in compliance with any recordkeeping or reporting requirement adopted pursuant to subparagraph (A) of this paragraph concerning an associated person that is subject to examination by or reporting requirements of an appropriate Federal banking agency if such broker, dealer, or municipal securities dealer utilizes for such recordkeeping or reporting requirement copies of reports filed by the associated person with the Federal banking agency pursuant to section 5211 of the Revised Statutes, section 9 of the Federal Reserve Act, section 7(a) of the Federal Deposit Insurance Act, section 10(b) of the Home Owners' Loan Act, or section 8 of the Bank Holding Company Act of 1956. The Commission may, however, by rule adopted pursuant to subparagraph (A), require any broker, dealer, or municipal securities dealer filing such reports with the Commission to obtain, maintain, or report supplemental information if the Commission makes an explicit finding that such supplemental information is necessary to inform the Commission regarding potential risks to such broker, dealer, or municipal securities dealer. Prior to requiring any such supplemental information, the Commission shall first request the appropriate Federal banking agency to expand its reporting requirements to include such information.

"(iii) Prior to making a request pursuant to subparagraph (B) of this paragraph for information with respect to an associated person that is subject to examination by or reporting requirements of a Federal banking agency, the Commission shall—

"(I) notify such agency of the information required with respect to such associated person; and

"(II) consult with such agency to determine whether the information required is available from such agency and for other purposes, unless the Commission determines that any delay resulting from such consultation would be inconsistent with ensuring the financial and operational condition of the broker, dealer, or municipal securities dealer, government securities broker, or government securities dealer or the stability or integrity of the securities markets.

"(iv) Nothing in this paragraph shall be construed to permit the Commission to require any broker or dealer, or any municipal securities dealer, government securities broker, or government securities dealer for which the Commission is the appropriate regulatory agency, to obtain, maintain, or furnish any examination report of any Federal banking agency or any supervisory recommendations or analysis contained therein.

"(D) The Secretary, by rule or order, may exempt any person or classes of persons, under such terms and conditions and for such periods as the Secretary shall provide, from the provisions of this paragraph and the rules thereunder. In granting such exemptions, the Secretary shall consider, among other factors—

"(i) whether information of the type required under this subsection is available from a supervisory agency (as defined in section 1101(6) of the Right to Financial Privacy Act of 1978 (12 U.S.C. 3401(6))), a State insurance commission or similar State agency, the Commodity Futures Trading Commission, or a similar foreign regulator;

"(ii) the primary business of any associated person;

"(iii) the nature and extent of domestic or foreign regulation of the associated person's activities;

"(iv) the nature and extent of the registered person's securities transactions; and

"(v) with respect to the registered person and its associated persons, on a consolidated basis, the amount and proportion of assets devoted to, and revenues derived from, activities in the United States securities markets.

"(E) In exercising authority pursuant to paragraph (2)(A) concerning information with respect to associated persons of government securities brokers and government securities dealers who are also associated persons of registered brokers or dealers reporting to the Commission pursuant to section 17(h) of this title, the requirements relating to such associated persons shall conform, to the greatest extent practicable, to the requirements of section 17(h).

"(F) Notwithstanding the provisions of any law, the Secretary and any appropriate regulatory agency shall not be compelled to disclose any information required to be reported under this paragraph, or any information supplied to the Secretary or any appropriate regulatory agency by any domestic or foreign regulatory agency that relates to the financial or operational condition of any associated person of a registered government securities broker or a government securities dealer. Nothing in this paragraph shall authorize the Secretary or any appropriate regulatory agency to withhold information from Congress, or prevent the Secretary or any appropriate regulatory agency from complying with a request for information from any other Federal department or agency requesting the information for purposes within the scope of its jurisdiction, or complying with an order of a court of the United States in an action commenced by the United States or the Commission. This paragraph shall be considered a statute described in section 552(b)(3)(B) of title 5, United States Code.".

SEC. 5. COORDINATED CLEARING.

(a) AUTHORITY TO FACILITATE COORDINATED CLEARING MECHANISMS.—Section 17A(a)(2) of the Securities Exchange Act of 1934 (15 U.S.C. 78q-1(a)(2)) is amended to read as follows:

"(2)(A) The Commission is directed, therefore, having due regard to the public inter-

est, the protection of investors, the safeguarding of securities and funds, and maintenance of fair competition among brokers and dealers, clearing agencies, and transfer agents, to use its authority under this title—

"(i) to facilitate the establishment of a national system for the prompt and accurate clearance and settlement of transactions in securities (other than exempt securities); and

"(ii) to facilitate the establishment of linked or coordinated facilities for clearance and settlement of transactions in securities, securities options, contracts of sale for future delivery and options thereon, and commodity options;

in accordance with the findings and to carry out the objectives set forth in paragraph (1) of this subsection.

"(B) The Commission shall use its authority under this title to assure equal regulation under this title of registered clearing agencies and registered transfer agents. In carrying out its responsibilities set forth in subparagraph (A)(ii) of this paragraph, the Commission shall consult with the Commodity Futures Trading Commission and the Board of Governors of the Federal Reserve System.".

(b) TRANSFER AND PLEDGE OF SECURITIES.—Section 17A of the Securities Exchange Act of 1934 (15 U.S.C. 78q-1) is amended by adding at the end the following:

"(f)(1) Notwithstanding any provision of State law, the Commission is authorized to adopt rules concerning the transfer of certificated or uncertificated securities (other than government securities issued pursuant to chapter 31 of title 31, United States Code, or securities otherwise processed within a book-entry system operated by the Federal Reserve Banks) or limited interests (including security interests) therein, and rights and obligations of purchasers, sellers, investors, financial intermediaries, and lenders to such transfers, and the rights of third parties whose interests in such securities devolve from such transfers, if the Commission finds—

"(A) that such rule is necessary or appropriate for the protection of investors or in the public interest and is reasonably designed to promote the prompt, accurate, and safe clearance and settlement of securities transactions;

"(B) that in the absence of a uniform rule, the safe and efficient operation of the national system for clearance and settlement of securities transactions will be or is substantially impeded; and

"(C) that to the extent such rule will impair or diminish directly or indirectly rights of investors under State law concerning transfers of securities (or limited interests therein), that the benefits of such rule exceed the detriment to investors.

In making such determinations, the Commission shall give consideration to the recommendations of the Advisory Committee established under paragraph (2), and it shall consult with and consider the views of the Secretary of the Treasury and the Board of Governors of the Federal Reserve System. If the Secretary of the Treasury shall object, in writing, to the Commission's findings with respect to the factors set forth in subparagraphs (A), (B), or (C) of this paragraph, the Commission shall consider all feasible alternatives to the proposed rule, and it shall not adopt any such rule unless the Commission shall make an explicit determination that the rule is the most practicable method for achieving safe and efficient operation of the national clearance and settlement system.

"(2)(A) Within 90 days after the effective date of this section, the Commission shall (and at such times thereafter as the Commission may determine, the Commission may), after consultation with the Secretary of the Treasury and the Board of Governors of the Federal Reserve System, establish an advisory committee under the Federal Advisory Committee Act (5 U.S.C. App.). The Advisory Committee shall be directed to consider and report to the Commission on such matters as the Commission, after consultation with the Secretary of the Treasury and the Board of Governors of the Federal Reserve System, determines, including the areas, if any, where State commercial laws and related Federal laws concerning the transfer of certificated or uncertificated securities, limited interests (including security interests) in such securities, or the creation or perfection of security interests in such securities do not provide the necessary certainty, uniformity, and clarity for purchasers, sellers, investors, financial intermediaries, and lenders concerning their respective rights and obligations.

"(B) The Advisory Committee shall consist of 15 members, of which the Commission shall designate 11 in accordance with the Federal Advisory Committee Act. The Board of Governors of the Federal Reserve System and the Secretary of the Treasury each shall be authorized to designate 2 such members of the Advisory Committee.

"(C) The Advisory Committee shall conduct its activities in accordance with the Federal Advisory Committee Act. Within 6 months of its designation or such longer time as the Commission may designate, the Advisory Committee shall issue a report to the Commission, and shall cause copies of that report to be delivered to the Secretary of the Treasury and the Chairman of the Board of Governors of the Federal Reserve System.".

(c) COORDINATED FACILITIES FOR CLEARANCE AND SETTLEMENT OF CERTAIN CONTRACTS AND OPTIONS.—The Commodity Exchange Act is amended by inserting after section 5b (7 U.S.C. 7b) the following new section:

"SEC. 5c. COORDINATED FACILITIES FOR CLEARANCE AND SETTLEMENT OF CERTAIN CONTRACTS AND OPTIONS.

"(a) IN GENERAL.—With due regard for the public interest and maintenance of fair competition among contract markets, commodities and futures clearing organizations, members thereof, and futures commission merchants, the Commission shall facilitate the establishment of linked or coordinated facilities for clearance and settlement of contracts of sale for future delivery and options thereon, commodity options, securities, and securities options.

"(b) CONSULTATION.—In carrying out its responsibilities under this section, the Commission shall consult with the Securities and Exchange Commission and the Board of Governors of the Federal Reserve System.".

SEC. 6. REPORTS TO CONGRESS.

(a) FACILITIES FOR CLEARANCE AND SETTLEMENT.—The Securities and Exchange Commission and the Commodity Futures Trading Commission, in consultation with the Board of Governors of the Federal Reserve System, shall examine progress toward establishing linked or coordinated facilities for clearance and settlement of transactions in securities, securities options, contracts of sale for future delivery and options thereon, and commodity options, and shall submit to Congress, not later than 1 year from the date of enactment of this Act, a report detailing and evaluating such progress.

(b) COORDINATED MECHANISMS AND MARGIN LEVELS.—The Secretary of the Treasury, the Chairman of the Board of Governors of the Federal Reserve System, the Chairman of the Securities and Exchange Commission, and the Chairman of the Commodities Futures Trading Commission, shall report to the Congress not later than May 31, 1990 and annually thereafter until May 31, 1995, on the following:

(1) The efforts such individuals have made relating to the coordination of regulatory activities to ensure the integrity and competitiveness of United States financial markets;

(2) The efforts such individuals have made to formulate coordinated mechanisms across marketplaces to protect the payments and market systems during market emergencies;

(3) The views of such individuals with respect to the adequacy of margin levels and use of leverage by market participants; and

(4) Such other issues and concerns relating to the soundness, stability, and integrity of domestic and international capital markets as may be appropriate.

(c) SEC AUTHORITY OVER MARKET MANIPULATION.—Not later than 90 days after the date of enactment of this Act, the Securities and Exchange Commission shall report to the Committee on Banking, Housing, and Urban Affairs of the Senate and to the Committee on Energy and Commerce of the House of Representatives regarding whether the Commission has sufficient statutory authority to prohibit practices in the purchase and sale of securities to protect against market manipulation or fraud through program trading, including any practices or activities that are inconsistent with the statutory mission of the Commission to protect investors. If the Commission concludes that it lacks such authority, the Commission shall include in its report recommendations for legislative action to confer such authority.

Mr. MITCHELL. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The title was amended so as to read: "A bill to amend the Securities Exchange Act of 1934 to strengthen regulatory oversight of the United States securities markets, improve supervision of financial market participants, and improve the safety and efficiency of market mechanisms, and for other purposes.".

NATIONAL ENERGY POLICY ACT

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 680, S. 324, the global warming bill; that the committee substitute be agreed to as amended by the following amendments now at the desk, and offered by the following Senators: PELL, GORE, and HATFIELD, LIEBERMAN, DOMENICI, JOHNSTON, and MCCLURE; that statements by Senators JOHNSTON, MCCLURE, PELL, WIRTH, Do-

MENICI, PELL, LIEBERMAN, and GORE appear at the appropriate place in the RECORD as though read; that the bill be read a third time and passed; and that the motion to reconsider be laid upon the table; and that title amendment be agreed to.

The Senate considered the bill (S. 324) to establish a national policy to reduce global warming, and for other purposes, which has been reported from the Committee on Energy and Natural Resources, with an amendment to strike all after the enacting clause, and inserting in lieu thereof the following:

SECTION 1. SHORT TITLE.—This Act, together with the following table of contents, may be cited as the "National Energy Policy Act of 1990".

SEC. 2. TABLE OF CONTENTS.—

Sec. 1. Short title.
Sec. 2. Table of contents.
Sec. 3. Findings.
Sec. 4. Purposes.
Sec. 5. Goals.
Sec. 6. Definitions.
TITLE I—ENERGY POLICY INITIATIVES
Subtitle A—National Energy Strategy
Sec. 101. Least-cost energy strategy.
Sec. 102. Conforming amendments.
Subtitle B—Director of Climate Protection
Sec. 111. Appointment.
Subtitle C—National Academies of Science and Engineering
Sec. 121. Review.
Sec. 122. Report to the Congress.
TITLE II—ENERGY EFFICIENCY INITIATIVES
Subtitle A—Energy Efficiency
Sec. 201. Report.
Sec. 202. Energy-intensive industries.
Sec. 203. Federal energy management amendments.
Sec. 204. Fuel cells.
Sec. 205. Repeal of prohibitions on supply and installation of residential energy conservation measures by utilities.
Sec. 206. Energy efficiency labeling for windows and window systems.
Sec. 207. Energy efficiency information.
Sec. 208. Compact fluorescent lamps in Federal facilities.
Sec. 209. Demonstration.
Sec. 210. Home energy efficiency ratings.
Subtitle B—Amendments to the Public Utility Regulatory Policies Act of 1978
Sec. 211. Encouragement of investments in conservation and energy efficiency resources and study of certain state ratemaking policies.
TITLE III—ENERGY RESEARCH AND DEVELOPMENT INITIATIVES
Subtitle A—General
Sec. 301. Energy research and development priorities.
Sec. 302. Management plan.
Sec. 303. Joint ventures.
Subtitle B—Engine and Vehicle Fuel Research
Sec. 311. Vehicle engine fuel research.
Sec. 312. High efficiency heat engines.
Sec. 313. Natural gas cofiring research, development and demonstration.
Subtitle C—Hydrogen Research
Sec. 321. Short title.
Sec. 322. Purpose and definition.
Sec. 323. Comprehensive management plan.
Sec. 324. Research and development.
Sec. 325. Demonstrations.
Sec. 326. Technology Transfer Program.
Sec. 327. Coordination and consultation.
Sec. 328. Technical panel.
Sec. 329. Authorizations.
Subtitle D—Fusion
Sec. 331. Programs.
Subtitle E—Coal
Sec. 341. Coal Program Goals.
Sec. 342. Non Fuel Use of Coal.
Sec. 343. Authorizations.
Subtitle F—Natural Gas and Other Alternative Fuels
Sec. 351. Mass Transit Program.
Sec. 352. Natural Gas and Other Alternative Fuel Use in Fleet Vehicles.
Sec. 353. Training Program.
Sec. 354. Vehicle Research, Development and Demonstration Program.
Sec. 355. Natural Gas Recovery Research, Development and Demonstration Program.
Sec. 356. Natural gas and electric heating and cooling technologies.
Sec. 357. Vehicle and Battery Research, Development, and Demonstration Program.
Sec. 358. Definitions.
Subtitle G—Hydropower
Sec. 361. Program.
Sec. 362. Report.
Subtitle H—Electric Vehicle Technology Development and Demonstration
Sec. 371. Short title.
Sec. 372. Findings.
Sec. 373. Definitions.
Sec. 374. Identification of nonattainment areas.
Sec. 375. Applications from manufacturers.
Sec. 376. Selection of manufacturers.
Sec. 377. Discounts to purchasers.
Sec. 378. Reports to Congress.
Sec. 379. Authorizations.
Subtitle I—Advanced Nuclear Reactor Study
Sec. 381. Report.
Subtitle J—Technology Development Program
Sec. 391. Program.
Sec. 392. Authorizations.
TITLE IV—MISCELLANEOUS
Subtitle A—Methane Assessment
Sec. 401. Objective.
Sec. 402. Domestic methane source inventory and control options.
Sec. 403. International studies.
Subtitle B—Committee on Renewable Energy Commerce and Trade
Sec. 411. Duties of CORECT.
Sec. 412. Additional duties of CORECT.
Sec. 413. Outreach.
Sec. 414. Comprehensive energy technology evaluation.
Sec. 415. Authorizations.
Subtitle C—Fuel Cycle Costs Analysis
Sec. 421. Program.
Sec. 422. Report.
TITLE V—NATURAL RESOURCE POLICY
Sec. 501. Ecological and environmental resource study.
Sec. 502. National forestation initiative.
Sec. 503. Urban forestry and energy savings.

SEC. 3. FINDINGS.—The Congress finds that—

(1) scientific evidence indicates that the atmosphere of the Earth is being affected by the generation from natural and manmade sources of carbon dioxide and other greenhouse gases;

(2) trends in the concentration of such greenhouse gases in the atmosphere may result in global changes in climate, with potentially significant economic, social and environmental implications for humankind, including effects on agricultural production, water supplies, wetlands, weather, and human health and welfare;

(3) a scientific understanding of the causes and economic effects of global climate change is necessary to formulate effective policies;

(4) the formulation of domestic and international energy and natural resource policies may be necessary in order to reduce the generation of carbon dioxide and other greenhouse gases and mitigate or adapt to potential adverse consequences of human-induced global climate change;

(5) the formulation of such policies by the Government will include an effort involving the private sector and the laboratories of the Department of Energy; and

(6) the United States should pursue a framework convention on global climate change by the year 1992 through the Intergovernmental Panel on Climate Change (IPCC) of the United Nations Environmental Program and the World Meteorological Organization.

SEC. 4. PURPOSES.—The overall purpose of this Act is to establish a national energy policy that will fully consider the contribution of energy use to potential changes in global climate and will include cost-effective strategies to lessen the generation of energy-related greenhouse gases consistent with the achievement of other domestic energy, economic, social, and environmental goals. The specific purposes of the Act are to—

(1) improve scientific understanding of the natural and manmade sources of greenhouse gases and their relative contributions to global climate change;

(2) evaluate the environmental, social, and economic consequences of global climate change;

(3) evaluate the environmental, social, and economic consequences of domestic and international policies for mitigating or adapting to global climate change;

(4) identify the actions required to mitigate current trends in atmospheric concentrations of greenhouse gases and analyze their relative cost-effectiveness;

(5) identify the actions necessary to mitigate or adapt to adverse consequences of global climate change;

(6) identify and evaluate the domestic policies required to mitigate or adapt to the possible adverse social and economic consequences of a reduction or stabilization in the generation of greenhouse gases;

(7) encourage the formulation of effective domestic and international energy and natural resource policies that will mitigate adverse consequences of human-induced global climate change;

(8) foster the development of technologies that will advance the goals and purposes of the Act and the transfer of such technologies to lesser-developed countries; and

(9) establish programs within the Department of Energy for the achievement of these purposes.

SEC. 5. GOALS.—(a) The goals of this Act are to—

(1) foster the identification of an appropriate mix of policies referred to in subsection (b) that have the potential, if fully implemented, to stabilize the generation of

carbon dioxide and other greenhouse gases in the United States;

(2) assess the feasibility of further limiting, or reducing, the generation of carbon dioxide and other greenhouse gases not controlled by the 1987 Montreal Protocol on Substances that Deplete the Ozone Layer;

(3) investigate the feasibility and economic, energy, social, and environmental implications of achieving a 20 per centum reduction in the generation of carbon dioxide by the year 2005 as recommended by the 1988 Toronto Scientific World Conference on the Changing Atmosphere;

(4) investigate the feasibility and economic, energy, social, and environmental implications of stabilizing carbon dioxide emissions by the year 2005; and

(5) evaluate the potential social, economic, energy, and environmental implications of implementing the policies mentioned in paragraphs (1), (2), (3), and (4) in order to enable the United States to comply with any obligations under an international global climate change framework convention or agreement.

(b) Policies to be considered in section 5(a) for the stabilization or reduction in the generation of carbon dioxide and other greenhouse gases include, but are not limited to, policies that—

(1) implement standards for more efficient use of fossil fuels;

(2) increase the energy efficiency of existing technologies;

(3) encourage technologies, including clean coal technologies, that generate lower levels of carbon dioxide and other greenhouse gases;

(4) promote the use of renewable energy resources, including solar, geothermal, sustainable biomass, hydropower, and wind energy;

(5) affect the development and consumption of energy and energy efficiency resources and electricity through tax policy;

(6) encourage investment in energy efficient equipment and technology;

(7) encourage the development of energy technologies, such as advanced nuclear fission and nuclear fusion, that produce energy without carbon dioxide and other greenhouse gases as a byproduct, and encourage the deployment of nuclear electric generating capacity; and

(8) encourage afforestation and reforestation.

(c) The reduction of the generation of chlorofluorocarbons shall be in accordance with the provisions of the Montreal Protocol, unless subsequent Federal legislation is enacted establishing new guidelines for the reduction or elimination of the use of chlorofluorocarbons.

(d) In order to promote international cooperation in addressing potential global climate change, it is the goal of the United States to establish by 1992, an international framework convention on global climate change through the activities of the Intergovernmental Panel on Climate Change of the United Nations International Environmental Program and the World Meteorological Organization and secure the commitment of the community of nations to such convention.

SEC. 6. DEFINITIONS.—For the purposes of this Act, the term—

(1) "Department" means the Department of Energy;

(2) "energy efficiency resource" means energy saved through improvements in the efficiency of energy production, transportation, or utilization;

(3) "energy resources" includes, but is not limited to, supplies of natural gas, crude oil and petroleum products, coal, nuclear energy, and renewable energy;

(4) "global climate change" means changes in the climate of the Earth that result from increases in the atmospheric concentrations of greenhouse gases;

(5) "greenhouse gases" means carbon dioxide and other gases such as chlorofluorocarbons, methane, ozone, and nitrous oxides that contribute to global climate change;

(6) "lesser-developed countries" shall include, but not be limited to, Eastern Europe and the Soviet Union; and

(7) "Secretary" means the Secretary of Energy.

TITLE I—ENERGY POLICY INITIATIVES

Subtitle A—National Energy Strategy

SEC. 101. LEAST-COST ENERGY STRATEGY.—(a)(1) The first National Energy Policy Plan (the "Plan") under section 801 of the Department of Energy Organization Act (42 U.S.C. 7321) prepared and submitted by the President to Congress after the date of the enactment of this Act, and each subsequent such Plan, shall include a least-cost energy strategy prepared by the Secretary.

(2) The Secretary need not prepare and submit a least-cost energy strategy with the National Energy Plan scheduled to be submitted in April of 1991.

(b)(1) The least-cost energy strategy shall identify Federal priorities for the encouragement of the use of energy and energy efficiency resources. In developing the least-cost energy strategy, the Secretary shall take into consideration the economic, energy, social, and environmental consequences of his choices. Such strategy shall be designed to achieve to the maximum extent practicable and at least-cost to the Nation—

(A) the energy production, utilization, and conservation objectives of the Plan; and

(B) the stabilization and eventual reductions in the generation of carbon dioxide and other greenhouse gases mentioned in section 5(a).

(2) The least-cost energy strategy shall include—

(A) a comprehensive inventory of available energy and energy efficiency resources and their projected costs, taking into account all costs of production, transportation, and utilization of such resources, including—

(i) coal, clean coal technologies, coal seam methane, and underground coal gasification;

(ii) energy efficiency, including existing technologies for increased efficiency in production, transportation, and utilization of energy, and other technologies that are anticipated to be available through further research and development; and

(iii) other energy resources, such as renewable energy, solar energy, nuclear fission, fusion, geothermal, biomass, fuel cells, and hydropower;

(B) a proposed two-year program for assuring adequate supplies of energy and energy efficiency resources under paragraph (1), and an identification of actions that can be undertaken within existing Federal authority; and

(C) recommendations for any new Federal authority needed to achieve the purposes of this Act.

(c)(1) The relative costs of energy and energy efficiency resources under this section shall be determined based upon a comparison of the estimated system costs of other similarly reliable and available resources.

(2) System costs under paragraph (1) are all direct and quantifiable net costs for the resource over its available life, including the cost of production, transportation, utilization, waste management, environmental compliance, and, in the case of imported energy resources, maintaining access to foreign sources of supply.

(3) When comparing an energy efficiency resource to an energy resource, a higher priority shall be assigned to the energy efficiency resource whenever its estimated system cost is equal to the estimated system cost of the energy resource.

SEC. 102. CONFORMING AMENDMENTS.—(a) Section 801 of Public Law 95-91 is amended in subsection (c)(1) by inserting "cost estimates," after "whatever data and analysis are necessary to support the".

(b) Title III of the Energy Security Act (42 U.S.C. 7361, et seq.) is hereby repealed.

Subtitle B—Director of Climate Protection

SEC. 111. APPOINTMENT.—(a) Within six months after the date of the enactment of this Act, the Secretary shall appoint within the Department, a Director of Climate Protection (the "Director"). The Director shall:

(1) in the absence of the Secretary, serve as his representative for interagency and multilateral policy discussions of global climate change;

(2) monitor domestic and international policies for their effects on the generation of carbon dioxide and other greenhouse gases; and

(3) have the authority to participate in the planning activities in relevant Departmental programs.

(b) Beginning eighteen months after the date of the enactment of this Act, and annually thereafter, the Director shall participate in the formulation of the least-cost energy strategy under section 101, research and development priorities under section 301, and the management plan under section 302.

Subtitle C—National Academies of Science and Engineering

SEC. 121. REVIEW.—(a) Within ninety days after his appointment under section 111, the Director, in consultation with the Office of Science and Technology Policy (the "Office"), shall seek to enter into an agreement with the National Research Council to use the services of the National Academy of Sciences and the National Academy of Engineering (the "Academies") to conduct an ongoing review of current knowledge regarding—

(1) trends in the atmospheric concentrations of greenhouse gases, including current capabilities to model such trends with sufficient reliability to support international, domestic, and regional policy formulation;

(2) the causes of global climate change and the relative contribution of various sources of greenhouse gases including, but not limited to, fossil fuel production and use, forest management practices, agricultural practices, and other sources;

(3) the climatic, physical, economic, social and environmental consequences of current trends in atmospheric concentration of greenhouse gases;

(4) actions that might be taken to mitigate or adapt to possible adverse economic, social, and environmental consequences of global climate change and the relative cost-effectiveness of these actions;

(5) the generation and disposition of greenhouse gases into the environment including the relative contribution of the oceans, clouds, and biosphere; and

(6) current knowledge on the relationship between those policies that mitigate or abate stratospheric ozone depletion and those policies that mitigate or abate global climate change.

(b) In conducting such review, the Academies are encouraged to consult with international scientific and technical entities to determine where there is a consensus in current knowledge with respect to paragraphs (a)(1) through (6).

(c) The Secretary, the Secretary of Commerce, the Secretary of the Interior, the Secretary of Transportation, the Secretary of Agriculture, the Administration of the Environmental Protection Agency, and the Director of the National Science Foundation shall, upon request, furnish to the Office and the National Research Council any information that such Office or Council determines to be necessary for purposes of conducting the review required under subsection (a).

SEC. 122. REPORT TO THE CONGRESS.—(a) Within one year after the date of the enactment of this section and periodically thereafter the Academies shall submit a report containing the findings and recommendations resulting from the review conducted under section 121 to the Office and the Congress. The findings and recommendations contained in such report shall not be subject to any prior clearance or review, nor shall any prior clearance conditions be imposed on the National Research Council, as part of the agreement made by the Office.

(b) Within six months after the transmission of such report to the Congress, the President shall transmit to the Congress his assessment of the findings and recommendations in the report pursuant to subsection (a) and any recommendations therein.

TITLE II—ENERGY EFFICIENCY INITIATIVES

Subtitle A—Energy Efficiency

SEC. 201 REPORT.—The Secretary, in consultation with the Council of Economic Advisors, shall submit to the Congress within one year after the date of the enactment of this subtitle, and every three years thereafter through the year 2003, a report evaluating energy efficiency policy options that would be necessary to produce decreases of one, two, three, and four per centum per year in overall United States, energy use per unit of GNP through the year 2005. These policy options shall be ranked according to their cost-effectiveness and feasibility of implementation.

SEC. 202. ENERGY-INTENSIVE INDUSTRIES.—(a) The Secretary, acting in accordance with authority contained in the Federal Nonnuclear Energy Research and Development Policy Act of 1974 (42 U.S.C. 5901-5920) and other laws applicable to the Secretary, shall—

(1) pursue a research and development program intended to improve energy efficiency and productivity in energy-intensive industries and industrial processes; and

(2) undertake joint ventures to encourage commercialization of technologies developed under paragraph (1).

(b)(1) The Secretary shall—

(A) conduct a competitive solicitation for proposals from specialized private firms and investors for such joint ventures under subsection (a)(2); and

(B) provide financial assistance to at least five such joint ventures.

(2) The purpose of the joint ventures shall be to design, test and demonstrate changes to industrial processes that will result in improved energy efficiency and productivity. The joint ventures may also demonstrate other improvements of benefit to such industries so long as demonstration of energy efficiency improvements is the principal objective of this joint venture.

(3) In evaluating proposals for financial assistance and joint ventures under this section, the Secretary shall consider—

(A) whether the research and development efforts under this section (i) improve the quality and efficiency of industrial processes, and (ii) reduce the generation of carbon dioxide and other greenhouse gases into the atmosphere; and

(B) the regional distribution of energy-intensive industries and whether the joint-venture projects are located in the region in which the energy-intensive industries are located.

(c) There is authorized to be appropriated to the Secretary $5,000,000 for fiscal year 1992, $15,000,000 for fiscal year 1993, and $25,000,000 for fiscal year 1994.

SEC. 203. FEDERAL ENERGY MANAGEMENT AMENDMENTS.—Part 3 of title V of the National Energy Conservation Policy Act (NECPA) (42 U.S.C. 8251 et seq.), as amended, is further amended as follows:

(a) In section 543:

(1) Strike subsection (a) and insert the following new text in lieu thereof:

"(a) ENERGY MANAGEMENT REQUIREMENT FOR FEDERAL BUILDINGS.—(1) Not later than January 1, 2000, each Federal agency shall, to the maximum extent practicable, install in Federal buildings under the control of such agency in the United States, all energy conservation measures with payback periods of less than ten years as calculated using the methods and procedures developed pursuant to section 544. By January 1, 1993, each agency shall submit to the Secretary a list of projects meeting the ten-year payback criterion, the energy that each project will save and total energy and cost savings involved. Subject to the availability of appropriated funds, each Federal agency shall have substantially completed at least 25 per centum of the projects on the list or projects on the list that would account for 25 per centum of total energy savings, by January 1, 1995. If any agency has not met this requirement, such agency shall spend no funds in States where this requirement has not been met for the construction or acquisition of a Federal building except to meet the requirements of this section. If any agency has not met the requirements of this section for the year 2000, then such agency shall spend no funds in States where this requirement has not been met for the construction or acquisition of a Federal building except to meet the requirements of this section. The Secretary may waive the requirements of this section if the Secretary finds that an agency is taking all practicable steps to meet the requirement and that the sanctions of this section will pose an unacceptable burden upon the agency. If the Secretary waives the requirements of this section, he shall notify Congress promptly.

"(2) An agency may exclude from the requirements of paragraph (1) any Federal building or collection of Federal buildings, and the associated energy consumption and gross square footage, if the head of such agency finds that compliance with the requirements of paragraph (1) would be impractical. A finding of impracticability shall be based on the energy intensiveness of activities carried out in such Federal buildings or collection of Federal buildings, the type and amount of energy consumed, the technical feasibility of making the desired changes, and the unique character of many facilities operated by the Departments of Defense and Energy. Each agency shall identify and list in each report made under section 548 the Federal buildings designated by it for such exclusion. The Secretary of Energy shall review such findings for consistency with the impracticability standards set forth herein, and may within ninety days after receipt of the findings, reverse a finding of impracticability, in which case, the agency shall comply with the requirements of paragraph (1). This section shall not apply to an agency's facilities that generate or transmit electric energy, nor to the uranium enrichment facilities operated by the Department of Energy.";

(3) In subsection (b):

(A) after the words "subsection (a)," insert the following:

"The Secretary of Energy shall consult with the Secretary of Defense and the Administrator of the General Services Administration in developing guidelines for the implementation of this part, and";

(B) strike the phrase "Federal Energy Management Improvement Act of 1988," in paragraph (1) and insert in thereof "National Energy Policy Act of 1990, and submit to the Secretary of Energy";

(C) after the words "high priority projects;" insert the following; "and such plan shall include steps to take maximium advantage of contracts authorized under title VIII of this Act (42 U.S.C. 8287 et seq.), financial incentives, and other services provided by utilities for efficiency investment and other forms of financing to reduce the direct costs to the government;";

(D) at the end of paragraph (2), strike the semicolon and insert the following: ", and update such surveys periodically, but not less than every three years;";

(E) replace paragraph (3) with the following new paragraph:

"(3) using such surveys, determine the cost and payback period of energy conservation measures likely to achieve the goals of this section;"; and

(F) insert a new paragraph (4) as follows, and renumber paragraph (4) and "(5)"

"(4) install those energy conservation measures that will attain the requirements of this section in a cost-effective manner as defined in Section 544, and".

(b) in section 544:

(1) Strike "National Bureau of Standards," in subsection (a) and insert in lieu thereof "National Institute of Standards and Technology,"; and

(2) strike all after word "each", in paragraph (b)(2) and insert in lieu thereof: "agency shall, after January 1, 1994, fully consider the energy efficiency of all potential building space at the time of renewing or entering into a new lease. Further, all government owned and leased space constructed after January 1, 1994, shall meet model Federal building standards for energy efficiency.".

(c) In section 545, add after the word "measures" the following: "as needed to meet the requirements of section 543.".

(d) in section 546, strike the text of subsection "(b)" and insert in lieu thereof the following:

"IMPLEMENTATION.—To facilitate the financing of energy conservation energy measures, each Federal agency shall promote the use of contracts authorized by title VIII of this Act (42 U.S.C. 8287 et seq.). The Secretary, in consultation with the Secretary of Defense and the Administrator of the General Services Administration, within six months after the date of the enactment of

the National Energy Policy Act of 1990, shall develop appropriate procedures and methods for use by Federal agencies to select energy service contractors that will achieve the intent of this section in a cost-effective manner. Notwithstanding any other procurement laws and regulations, such procedures and methods shall apply to the selection of energy service contractors by each Federal agency.".

(e) In section 548:

(1) strike the word "Each" in subsection (a) and insert in lieu thereof the following:

"In addition to the plan required to be submitted to the Secretary pursuant to Section 543(b)(1), each";

(2) insert the phrase "by April 2 of each year," after the word "annually" in subsection (b); and

(3) insert the words "by each agency", after the words "under this part" in subsection (b)(1).

SEC. 204. FUEL CELLS.—Subsection 6(c) of the Renewable Energy and Energy Efficiency Technology Competitiveness Act of 1989 (Public Law 101-218) is amended by adding a new paragraph (6) as follows:

"(6)(A) The Secretary shall solicit proposals for, and provide financial assistance to, at least one joint venture for the demonstration of fuel cells technology in accordance with the provisions of this paragraph.

"(B) The purpose of joint ventures supported under this paragraph shall be to design, test, and demonstrate critical enabling technologies for the production of electric energy from fuel cells in order to accelerate commercial application of fuel cells.

"(C) There are authorized to be appropriated to the Secretary not to exceed $3,000,000 for each of the fiscal years 1992, 1993, and 1994 to carry out this paragraph.".

SEC. 205. REPEAL OF PROHIBITIONS ON SUPPLY AND INSTALLATION OF RESIDENTIAL ENERGY CONSERVATION MEASURES BY UTILITIES.—Section 216 of the National Energy Conservation Policy Act (42 U.S.C. 8217) is repealed and subsequent sections are renumbered accordingly.

SEC. 206. ENERGY EFFICIENCY LABELING FOR WINDOWS AND WINDOW SYSTEMS.—(a)(1) The Secretary shall provide financial assistance to support a voluntary, national window rating program to develop energy ratings and labels for windows and window systems. The rating program shall be developed in order to be implemented by December 31, 1992. The rating program shall include specifications and guidelines that will enable all window buyers to make more informed purchasing decisions about the energy efficiency of windows and window systems. The rating program shall also contain information that allows window buyers to assess the energy consumption and potential cost savings of alternative window products.

(2) The rating program shall be administered by the National Fenestration Rating Council. The National Fenestration Rating Council shall periodically report to Congress and the Secretary on the progress being made toward establishing the voluntary, national window rating program.

(b) The Secretary shall monitor and evaluate the efforts of the National Fenestration Rating Council and make determinations whether the voluntary, national window rating system established within the National Fenestration Rating Council is consistent with subsection (a) of this section.

(c)(1) If the objectives of subsection (a) are not met by December 31, 1992, the Secretary shall, in consultation with the National Institute of Standards and Technology, develop, within one year, rating procedures under section 323 of the Energy Policy and Conservation Act (42 U.S.C. 6293) for windows and window systems.

(2) The Federal Trade Commission (hereafter in this section, the "Commission") shall prescribe labeling rules under section 324 of said Act (42 U.S.C. 6294) for windows and window systems except to the extent that with respect to any type of window or window system (or class thereof), the Commission determines that labeling in accordance with this section is not technologically or economically feasible or is not likely to assist consumers in making purchasing decisions; and

(3) For purposes of sections 323 and 324 of said Act, windows and window systems shall be considered covered products under section 322 of such Act (42 U.S.C. 6292).

(d) There are authorized to be appropriated to the Secretary $750,000 for each of the fiscal years 1992, 1993, and 1994 for the purposes of this section.

SEC. 207. ENERGY EFFICIENCY INFORMATION.—(a) Within one year after the date of the enactment of this section, the Administrator of the Energy Information Administration shall report to Congress on the information being collected or otherwise acquired by the Administrator with respect to the efficiency of energy consumption. The report shall estimate future needs for collection of additional information related to energy efficiency and environmental impacts. The report shall also consider the feasibility of—

(1) increasing the frequency of collection of information on the utilization of energy;

(2) including additional energy-using classes and sectors in surveys conducted; and

(3) collecting additional information to assist in the analysis of barriers to improvement in energy efficiency.

(b) The report shall take into account reporting burdens and the protection of proprietary information under law.

(c) The Administrator shall periodically publish measures of energy efficiency in classes, sectors, and regions that consume significant amounts of energy.

SEC. 208. COMPACT FLUORESCENT LAMPS IN FEDERAL FACILITIES.—Not later than one hundred and eighty days after the date of the enactment of this section, the Secretary shall submit to the Congress a report on the feasibility and effectiveness of requiring some or all Federal facilities to use compact fluorescent lamps instead of incandescent lamps in order to reduce the use of electrical energy and thereby reduce the generation of carbon dioxide and sulfur dioxide.

SEC. 209. DEMONSTRATION.—(a) Within one year after the date of the enactment of this Act, the Secretary shall submit a plan to Congress for the demonstration in Federal facilities, or by Federal agencies, of energy and energy efficiency resource technologies that have received Federal financial assistance for research and development. The technologies shall be those that are ready for commercial demonstration but are not widely commercially available. The Plan shall include—

(1) a listing of those technologies with specific candidate sites for the demonstration;

(2) the energy, environmental, cost savings or other expected benefits;

(3) a timetable for implementation; and

(4) a process for evaluation of the performance of the technologies.

(b) The Plan shall be updated every two years.

SEC. 210. HOME ENERGY EFFICIENCY RATINGS.—(a) Title II of the National Energy Conservation Policy Act is amended by adding a new part 6 as follows:

"PART 6—RESIDENTIAL ENERGY EFFICIENCY RATINGS

"SEC. 271. RATINGS.—(a) Within twelve months after the date of the enactment of the National Energy Policy Act of 1990, the Secretary, in consultation with the Secretary of Housing and Urban Development and State governments, shall, by rule, promulgate guidelines for procedures to be implemented by State governments that would enable the assignment of an energy efficiency rating to residential buildings.

"(b) The rule under subsection (a) shall—

"(1) provide for a numerical rating of the efficiency with which any residential building may be supplied with heating and cooling energy on an annual basis, and evaluate the practicality of including major energy consuming appliances in such rating;

"(2) provide that all residential buildings can receive a rating at time of sale;

"(3) ensure that the rating is prominently communicated to potential buyers and renters; and

"(4) ensure that the rating system is designed to facilitate its use by lenders and the secondary mortgage markets to promote energy efficiency.

"(c) For purposes of the rule under subsection (a), supply of energy to any residential building from renewable sources shall not result in a reduction in the energy efficiency rating of such building.

"SEC. 272. TECHNICAL ASSISTANCE.—Within twelve months of the date of the enactment of this section the Secretary shall establish a program to provide technical assistance for State and local governments adopting energy efficiency rating systems or building codes. The program shall utilize the Federal Government's experience in developing Federal building energy performance standards and shall provide compliance methods, educational materials for builders and code officials, and other technical support.

"SEC. 273. AUTHORIZATION.—There are hereby authorized to be appropriated such funds as are necessary to carry out the purposes of this subtitle.".

(b) The National Energy Conservation Policy Act should be further amended by adding in the table of contents at the end of Title II—Residential Energy Conservation, the following items:

"Part 6—Residential Energy Efficiency Ratings

"Sec. 271. Ratings.
"Sec. 272. Technical Assistance.
"Sec. 273. Authorization.".

Subtitle B—Amendments to the Public Utility Regulatory Policies Act of 1978

SEC. 211. ENCOURAGEMENT OF INVESTMENTS IN CONSERVATION AND ENERGY EFFICIENCY RESOURCES AND STUDY OF CERTAIN STATE RATEMAKING POLICIES.—(a) The Public Utility Regulatory Policies Act of 1978 (92 Stat. 3117), as amended, is further amended by inserting the following new paragraph at the end of section 111:

"(7) ENCOURAGEMENT OF INVESTMENTS IN CONSERVATION AND ENERGY EFFICIENCY RESOURCES.—

"(A) The rates allowed to be charged by a State-regulated electric utility shall be such that the utility's investments in and expenditures for energy conservation, energy efficiency resources, and other demand side

management measures are as profitable as its investments in and expenditures for the construction of new generation facilities.

"(B) For purposes of implementing the provisions of this paragraph, any reference contained in this title to the date of enactment of the Public Utility Regulatory Policies Act of 1978 shall be deemed to be a reference to the date of enactment of the National Energy Policy Act of 1990.".

(b) Not later than two years after the date of the enactment of this Act, the Secretary shall submit a report to the President and to the Congress containing—

(1) a survey of all State laws, regulations, practices, and policies under which State regulatory authorities require or permit rates charged by an electric utility to reflect least-cost planning;

(2) an evaluation by the Secretary of whether, and to what extent, least-cost planning is likely to result in: (A) higher or lower electricity costs to an electric utility's ultimate consumers or to classes or groups of such consumers, (B) enhanced or reduced reliability of electric service, and (C) increased or decreased dependence on particular energy resources; and

(3) an evaluation by the Secretary of whether, and to what extent, ratemaking methodologies implementing least-cost planning adequately take into account the impact of such measures on electric utilities' costs, operations, and rate of return on investment.

(c) For purposes of this subtitle, the term "least-cost planning" means any standard, regulation, practice, or policy by which a State regulatory agency considers, or requires an electric utility to consider, actions (including, but not limited to, the construction of or purchase of electric energy from new generation facilities and investment in or expenditures for conservation, energy efficiency resources, or other demand side management measures) taken by a State regulated utility to provide adequate and reliable service to its electric consumers with the incurrence of lowest costs by such utility and its customers.

TITLE III—ENERGY RESEARCH AND DEVELOPMENT INITIATIVES

Subtitle A—General

SEC. 301. ENERGY RESEARCH AND DEVELOPMENT PRIORITIES.—In establishing research and development priorities, the Secretary shall include consideration of the following criteria:

(a) the potential to reduce generation of carbon dioxide and other greenhouse gases sooner than alternative projects;

(b) the projected cost-effectiveness of the energy or energy efficiency resource to be produced or saved, including an evaluation of the likelihood of the research contributing to the achievement of the purposes of this Act;

(c) the comparative environmental and public health impacts of the energy to be produced or saved by the specific research;

(d) the national security impact of the energy produced or saved, including its projected contribution to the reduction of oil imports and to the diversity of the domestic energy resource mix;

(e) the obstacles inherent in private industry's development of new energy technologies and steps necessary for establishing or maintaining technological leadership in the area of energy and energy efficiency resource technologies, including, but not limited to, solar, fuel cells, fusion, clean-coal technologies, and hydrogen;

(f) the contribution of a given research activity to fundamental scientific knowledge;

(g) the anticipated impact of the results of research activities on special or targeted populations, including low-income or aged persons; and

(h) the contribution to United States competitiveness.

SEC. 302. MANAGEMENT PLAN.—(a) The Secretary, in consultation with the Energy Advisory board to the Secretary, shall prepare a management plan for the conduct of research, development, and commercialization of energy technologies that is consistent with the purposes of this Act and guided by the priorities set forth in section 301.

(b) The management plan under subsection (a) shall contain proposals for—

(1) investigation of promising but unproven energy and energy efficiency resource technologies that have been identified as potentially significant future contributors to the least-cost energy strategy under section 101;

(2) development of contingency energy and energy efficiency resource technologies that have the potential to mimimize adverse impacts on the environment, the global climate, and the economy; and

(3) creation of opportunities for export of energy and energy efficiency resource technologies from the United States that can make a substantial contribution to reducing the impact on the global climate of the energy resource supply and use patterns of foreign nations.

(c) Within one year after the date of the enactment of this section, the Secretary shall submit the first management plan under this section to Congress. Thereafter, the Secretary shall submit a revised management plan biennially at the time of submittal of the President's annual budget submission to the Congress.

SEC. 303. JOINT VENTURES.—Joint ventures authorized under this Act shall be conducted pursuant to the Renewable Energy and Energy Efficiency Technology Competitiveness Act of 1989 (Public Law 101-218).

Subtitle B—Engine and Vehicle Fuel Research

SEC. 311. VEHICLE ENGINE FUEL RESEARCH.—The Secretary shall establish and carry out a program of research, development, and demonstration on advanced vehicle engine systems (including engine systems that rely on alternative fuels, reformulated gasoline, or advanced, high efficiency materials) that offer the potential to reduce the generation of greenhouse gases and improve the efficiency of energy in transportation uses.

SEC. 312. HIGH EFFICIENCY HEAT ENGINES.—(a) In carrying out a program of research, development, and demonstration on high efficiency heat engines, the Secretary shall emphasize advanced gas turbine cycles, and the incorporation of energy efficient materials in advanced gas turbine cycles for high efficiency electric and automotive power generation, such as—

(1) advanced combined cycle turbines;

(2) steam-injected gas turbines (STIG); and

(3) intercooled steam-injected gas turbines (ISTIG).

(b) The Secretary may enter into joint ventures with the appropriate parties to construct and demonstrate high efficiency heat engines.

(c) There is authorized to be appropriated not more than $25,000,000 for each of the fiscal years 1992, 1993, and 1994, for purposes of this section.

SEC. 313. NATURAL GAS COFIRING RESEARCH, DEVELOPMENT AND DEMONSTRATION.—(a) DEFINITIONS.—For the purposes of this section, the term—

(1) "cofiring" means the injection of natural gas and pulverized coal into the primary combustion zone of an electric utility unit or an industrial boiler and shall include gas reburn technologies; and

(2) "gas reburn" means the injection of natural gas into the upper furnace region of an electric utility unit or an industrial boiler to produce a fuel-rich zone thereby reducing nitrogen oxide emissions.

(b) The Secretary shall conduct a program of research, development and demonstration of cofiring in electric utility units and large industrial boilers in order to determine optimal natural gas injection levels for both environmental and operational benefits.

(c) The Secretary may provide financial assistance under this section to public entities or interested or affected private firms to perform the research, development and demonstration of cofiring technologies.

(d) The Secretary may enter into cooperative agreements with, and provide financial assistance under this section to, public entities or interested or affected private firms willing to provide at least 50 per centum of the costs of such programs to perform the research, development and demonstration of confiring technologies.

(e) For purposes of this section, there is authorized to be appropriated to the Secretary not more than $9,000,000 for each of the fiscal years 1992, 1993 and 1994.

Subtitle C—Hydrogen Research

SEC. 321. SHORT TITLE.—This subtitle may be referred to as the "Spark M. Matsunaga Hydrogen Research and Development Act of 1990".

SEC. 322. PURPOSE AND DEFINITION.—(a) The purposes of this subtitle are—

(1) to direct the Secretary to prepare a comprehensive five-year program management plan that will identify and resolve critical technical issues necessary for the realization of a domestic capability to produce, distribute, and use hydrogen economically within the shortest time practicable;

(2) to direct the Secretary to develop a technology assessment and information transfer program among the Federal agencies and aerospace, transportation, energy, and other entities; and

(3) to develop renewable energy resources as a primary source of energy for the production of hydrogen.

(b) As used in this subtitle, the term "critical technology" or "critical technology issue" means a technology or issue that, in the opinion of the Secretary, requires understanding and development in order to take the next needed step in the development of hydrogen as an economic fuel or storage medium.

SEC. 323. COMPREHENSIVE MANAGEMENT PLAN.—(a) The Secretary shall prepare a comprehensive five-year program management plan for research and development activities, which shall be conducted over a period of no less than five years and shall be consistent with the provisions of sections 324 and 325. In the preparation of such plan, the Secretary shall consult with the Administrator of the National Aeronautics and Space Administration, the Secretary of Transportation, the Hydrogen Technical Advisory Panel, and the heads of such other Federal agencies and such public and private organizations as he deems appropriate. The plan shall be structured to identify and address areas of research critical to the real-

ization of a domestic hydrogen production capability within the shortest time practicable.

(b) Within one hundred and eighty days after the date of the enactment of this Act, the Secretary shall transmit the comprehensive program management plan to the Committee on Science, Space, and Technology of the United States House of Representatives and the Committee on Energy and Natural Resources of the United States Senate. Subsequent plans shall be incorporated in the management plan under section 302. The plan shall include—

(1) a prioritization of research areas critical to the economic use of hydrogen as a fuel and energy storage medium;

(2) the program elements, management structure, and activities, including program responsibilities of individual agencies and individual institutional elements;

(3) the program strategies including technical milestones to be achieved toward specific goals during each fiscal year for all major activities and projects;

(4) the estimated costs of individual program items, including current as well as proposed funding levels for each of the five years of the plan for each of the participating agencies;

(5) a description of the methodology of coordination and technology transfer; and

(6) the proposed participation by industry and academia in the planning and implementation of the program.

(c) The Secretary shall, in consultation with the Secretary of Transportation, the Administrator of the National Aeronautics and Space Administration, and the Hydrogen Technical Advisory Panel, also prepare a comprehensive large-scale hydrogen demonstration plan with respect to demonstrations carried out pursuant to section 325. Subsequent plans shall be incorporated in the management plan under section 302. Such plan shall include—

(1) a description of the necessary research and development activities that must be completed before initiation of a large-scale hydrogen production and storage demonstration program;

(2) an assessment of the appropriateness of a large-scale demonstration immediately upon completion of the necessary research and development activities;

(3) an implementation schedule with associated budget and program management resource requirements; and

(4) a description of the role of the private sector in carrying out the demonstration program.

SEC. 324. RESEARCH AND DEVELOPMENT.—(a) The Secretary shall conduct a research and development program, consistent with the comprehensive five-year program management plan under section 323, to ensure the development of a domestic hydrogen fuel production capability within the shortest time practicable consistent with market conditions.

(b)(1) Particular attention shall be given to developing and understanding and resolution of all critical technical issues preventing the introduction of hydrogen into the marketplace.

(2) The Secretary shall initiate research or accelerate existing research in critical technical issues that will contribute to the development of more economic hydrogen production and use, including, but not limited to, critical technical issues with respect to production, liquefaction, transmission, distribution, storage, and use (including use of hydrogen in surface transportation).

(c) The Secretary shall give priority to those production techniques that use renewable energy resources as their primary source of energy for hydrogen production.

(d) The Secretary shall, for the purpose of performing his responsibilities pursuant to this subtitle, solicit proposals for and evaluate any reasonable new or improved technology that could lead or contribute to the development of economic hydrogen production storage and utilization.

(e) The Secretary shall conduct evaluations, arrange for tests and demonstrations, and disseminate to developers information, data, and materials necessary to support efforts undertaken pursuant to this section, consistent with section 336.

SEC. 325. DEMONSTRATIONS.—(a) The Secretary shall conduct demonstrations of critical technologies, preferably in self-contained locations, so that technical and non-technical parameters can be evaluated to best determine commercial applicability of the technology.

(b) Concurrently with activities conducted pursuant to section 324, the Secretary shall conduct small-scale demonstrations of hydrogen technology at self-contained sites.

SEC. 326. TECHNOLOGY TRANSFER PROGRAM.—(a) The Secretary shall conduct a program designed to accelerate wider application of hydrogen production, storage, utilization, and other technologies available in near term as a result of aerospace experience as well as other research progress by transferring critical technologies to the private sector. The Secretary shall direct the program with the advice and assistance of the Hydrogen Technical Advisory Panel. The objective in seeking this advice is to increase participation of private industry in the demonstration of near commercial applications through cooperative research and development arrangements, joint ventures or other appropriate arrangements involving the private sector.

(b) The Secretary, in carrying out the program authorized by subsection (a), shall—

(1) undertake an inventory and assessment of hydrogen technologies and their commercial capability to economically produce, store, or utilize hydrogen in aerospace, transportation, electric utilities, petrochemical, chemical, merchant hydrogen, and other industrial sectors; and

(2) develop a National Aeronautics Space Administration, Department of Energy, and industry information exchange programs to improve technology transfer for—

(A) application of aerospace experience by industry;

(B) application of research progress by industry and aerospace;

(C) application of commercial capability of industry by aerospace; and

(D) expression of industrial needs to research organizations.

The information exchange program may consist of workshops, publications, conferences, and a data base for the use by the public and private sectors.

SEC. 327. COORDINATION AND CONSULTATION.—(a) The Secretary shall have overall management responsibility for carrying out programs under this subtitle. In carrying out such programs, the Secretary, consistent with such overall management responsibility—

(1) shall use the expertise of the National Aeronautics and Space Administration and the Department of Transportation; and

(2) may use the expertise of any other Federal agency in accordance with subsection (b) in carrying out any activities under this subtitle, to the extent that the Secretary determines that any such agency has capabilities which would allow such agency to contribute to the purpose of this subtitle.

(b) The Secretary may, in accordance with subsection (a), obtain the assistance of any department, agency, or instrumentality of the Executive branch of the Federal Government upon written request, on a reimbursable basis or otherwise and with the consent of such department, agency, or instrumentality. Each such request shall identify the assistance the Secretary deems necessary to carry out any duty under this subtitle.

(c) The Secretary shall consult with the Administrator of the National Aeronautics and Space Administration, the Administrator of the Environmental Protection Agency, the Secretary of Transportation, and the Hydrogen Technical Advisory Panel established under section 328 in carrying out his authorities pursuant to this subtitle.

SEC. 328. TECHNICAL PANEL.—(a) There is hereby established a technical panel, to be known as the Hydrogen Technical Advisory Panel (the "technical panel"), to advise the Secretary on the programs under this subtitle.

(b) The technical panel shall be appointed by the Secretary and shall be comprised of such representatives from domestic industry, universities, professional societies, Government laboratories, financial, environmental, and other organizations as the Secretary deems appropriate based on his assessment of the technical and other qualifications of such representatives. Appointments to the technical panel shall be made within ninety days after the enactment of this subtitle. The technical panel shall have a chairman, who shall be elected by the members from among their number.

(c) The heads of the departments, agencies, and instrumentalities of the Executive branch of the Federal Government shall cooperate with the technical panel in carrying out the requirements of this section and shall furnish to the technical panel such information as the technical panel deems necessary to carry out this section.

(d) The technical panel shall review and make any necessary recommendations to the Secretary on the following items—

(1) the implementation and conduct of programs under this subtitle;

(2) the economic, technological, and environmental consequences of the deployment of hydrogen production and use systems; and

(3) comments on and recommendations for improvements in the comprehensive five year program management plan required under section 323.

(e) The Secretary shall provide such staff, funds and other support as may be necessary to enable the technical panel to carry out the functions described in this section.

SEC. 329. AUTHORIZATIONS.—There is hereby authorized to be appropriated to carry out the purposes of this subtitle (in addition to any amounts made available for such purposes pursuant to other Acts)—

(1) $3,000,000 for the fiscal year beginning October 1, 1992;

(2) $7,000,000 for the fiscal year beginning October 1, 1993; and

(3) $10,000,000 for the fiscal year beginning October 1, 1994.

Subtitle D—Fusion

SEC. 331. PROGRAMS.—(a) The Secretary shall conduct research, development, and demonstration programs to address in a timely fashion questions concerning the de-

velopment of magnetic and inertial confinement fusion for the production of electricity consistent with the purposes of this Act. Such programs shall include by the year 2010—

(1) a demonstration of the achievement of ignition conditions in both magnetic and inertial confinement fusion test facilities; and

(2) a demonstration of the technological feasibility of magnetic and inertial confinement fusion for the production of electricity.

(b) In the event such feasibility is determined for a fusion technology pursuant to subsection (a), the Secretary shall prepare a design for a prototype commercial fusion reactor using such technologies, including associated cost estimates and specifications shall be in sufficient detail to permit bids for construction.

Subtitle E—Coal

SEC. 341. COAL PROGRAM GOALS.—(a) The Secretary shall establish research, development, and demonstration goals to assure the timely development of technologies for the production, transportation, and utilization of coal consistent with this Act.

(b) The Secretary shall establish a research, development, and demonstration program within the Department designed to assure the timely development of cost-effective advanced coal based technologies to be available for widespread commercial use after the year 2010, which are capable of achieving the control of sulfur oxides and oxides of nitrogen at levels of proficiency greater than currently available commercial control technology. The coal technology development program shall also be designed to assure the timely development of cost-effective technologies or energy production processes or systems utilizing coal which achieve greater efficiency in the conversion of coal to useful energy when compared to currently available commercial technology for the use of coal and the control of emissions from coal.

(c) The Secretary shall develop the program described herein, for technologies that include, but are not limited to, the following:

(1) advanced integrated gasification combined cycle;

(2) pressurized fluidized bed combustion technology capable of achieving higher conversion efficiency than can be achieved through on-going demonstration projects;

(3) direct and indirect coal-fired turbines;

(4) coal refining processes capable of efficiently producing or utilizing the energy contained in coal and also utilizing the by-products thereof;

(5) technologies for the cost-effective control and disposition of carbon dioxide produced during the combustion of coal;

(6) magnetohydrodynamics;

(7) molten carbonate and solid oxide fuel cells; and

(8) other coal based technologies or processes on systems that are capable of achieving conversion efficiency greater than currently available technology.

SEC. 342. NON-FUEL USE OF COAL.—(a) Not later than one hundred and twenty days after the date of the enactment of this Act, the Secretary shall submit to Congress a plan for research, development, and demonstration with respect to technologies for non-fuel use of coal, including—

(1) production of coke and other carbon products derived from coal;

(2) production of coal-derived, carbon-based chemical intermediates that are precursors of value-added chemicals and polymers;

(3) production of chemicals from coal-derived synthesis gas;

(4) coal treatment processes, including methodologies such as solvent-extraction techniques that produce low ash, low sulfur, coal-based chemical feedstocks; and

(5) waste utilization, including recovery, processing, and marketing of products derived from sulfur, carbon dioxide, nitrogen, and ash from coal.

(b) As part of the plan under subsection (a), the Secretary may propose specific joint ventures to accelerate the development and commercialization of technologies for non-fuel uses of coal.

(c) The plan under subsection (a) shall address and evaluate:

(1) the known and potential products and processes for the use of coal for products in the chemical, utility, fuel, and carbon-based materials industries;

(2) the costs, benefits and economic feasibility of using coal products in the chemical and materials industries, including value-added chemicals, carbon-based products, coke, and waste derived from coal;

(3) the economics of co-production of products from coal in conjunction with production of electric power, thermal energy, and fuel;

(4) the economics of coal utilization in comparison with other feedstocks that might be used for the same purposes;

(5) the steps that can be taken by the public and private sectors to bring about commercialization of research results produced by the research program recommended; and

(6) the past development, current status, and future potential of coal products and processes associated with non-fuel use of coal.

(d) The Secretary shall conduct a program of research and development under the plan under subsection (a).

(e) The Secretary may provide financial assistance for a research project under the plan using funds authorized by section 343(b) to the extent he finds that such project—

(1) furthers achievement of the goals and purposes of this Act;

(2) offers promise for commercial application; and

(3) has a reasonable prospect of support in at least 50 per centum of its direct costs from non-Federal funds.

(f) In preparing the plan and carrying out research under this section, including evaluating the technical progress, feasibility, and most effective means for utilizing the results of research, the Secretary shall consult with the private sector.

SEC. 343. AUTHORIZATIONS.—(a) There is authorized to be appropriated such sums as are necessary for each of fiscal years 1992, 1993, and 1994 for purposes of implementing the program pursuant to section 341.

(b) There is authorized to be appropriated to carry out section 342, a total of $20,000,000 for fiscal years 1992 through 1994.

Subtitle F—Natural Gas and Other Alternative Fuels

SEC. 351. MASS TRANSIT PROGRAM.—(a)(1) The Secretary, consistent with this Act, in consultation with the Administrator of the Urban Mass Transit Administration, may, consistent with the Alternative Motor Fuels Act of 1988 (Public Law 100-404), enter into cooperative agreements and joint ventures with any municipal, county, or regional transit authority in an urban area with a population over 100,000 (according to latest available census information) to demonstrate the feasibility, including safety of specific vehicle design, of using natural gas or other alternative fuels for mass transit.

(2) The program of the Secretary to implement the agreements under paragraph (1) may include interested or affected private firms willing to provide assistance in cash, or in kind, for any such demonstration.

(b)(1) The Secretary may not enter into any agreement or joint venture under subsection (a) with any municipal, county or regional transit authority unless such government body agrees to provide at least 25 per centum of the costs of such demonstration.

(2)(A) A transit authority may petition the Secretary for priority in allocating financial assistance under this section.

(B) The Secretary, at his discretion, may grant such priority under this section to any authority that demonstrates that the use of natural gas or other alternative fuels used for transportation would have a significant effect on the ability of an air quality region to comply with applicable regulations governing ambient air quality.

(c) There is authorized to be appropriated not more than $30,000,000 for each of fiscal years 1992, 1993, and 1994 for purposes of this section.

SEC. 352. NATURAL GAS AND OTHER ALTERNATIVE FUEL USE IN FLEET VEHICLES.—(a) The Secretary, consistent with the Alternative Motor Fuels Act of 1988 (Public Law 100-494), and in consultation with the Administrator of the United States Environmental Protection Agency and the Secretary of Transportation, shall establish and carry out a program, and provide financial assistance to encourage the development and commercialization of natural gas and other alternative fuels for use in passenger fleets, light-duty trucks, and heavy-duty trucks consistent with the purposes of this Act. Such assistance shall provide for the purchase and construction of vehicles dedicated to the use of natural gas or other alternative fuels and of vehicles dually fueled by natural gas or other alternative fuels and gasoline or diesel, and associated refueling equipment.

(b) Public and private fleets may be eligible for financial assistance under this section. A public or private fleet operator may petition the Secretary for priority in allocating financial assistance under this section.

(c) The Secretary, at this discretion, may grant such priority to those fleets where the use of natural gas and other alternative transportation fuels would have a significant effect on the ability of an air quality region to comply with applicable regulations governing ambient air quality.

(d) To facilitate the use of natural gas and other alternative fueled vehicles, the conversion of a vehicle from either gasoline or diesel alone to natural gas or other alternative fuels alone, or to natural gas or other alternative fuels and either gasoline or diesel, shall not be considered a violation of any anti-tampering provisions of the Federal law and implementing regulations, provided that the conversion complies with emissions standards issued by the Administrator of the Environmental Protection Agency.

(e) Any program established under this section that applies to existing vehicles shall take into consideration the safety of specific vehicle design and the compatibility of natural gas and other alternative fuel use with the original components of such existing vehicles.

(f) There is authorized to be appropriated not more than $30,000,000 for each of fiscal years 1992, 1993, and 1994, for purposes of this section.

SEC. 353. TRAINING PROGRAM.—(a) The Secretary of the Department of Labor shall establish and carry out a training and certification program for technicians who are responsible for vehicle installation of equipment that converts gasoline or diesel-fueled vehicles to the capability to run on natural gas or other alternative fuels alone, or on natural gas or other alternative fuels and either diesel fuel or gasoline, and for the maintenance of such converted vehicles. Such training and certification programs shall provide these technicians with instruction on the correct installation procedures and techniques, adherence to specifications, vehicle operating procedures, emissions testing, and other appropriate mechanical concerns applicable to these vehicle conversions.

(b) The Secretary, may enter into cooperative agreements with, and provide financial assistance, under this section, to appropriate parties to provide training programs that will ensure the proper operation and performance of conversion equipment.

(c) The program under this section shall be consistent with the Alternative Motor Fuels Act of 1988 (Public Law 100-494).

(d) There is authorized to be appropriated not more than $5,000,000 for each of the fiscal years 1992, 1993, and 1994 for purposes of this section.

SEC. 354. VEHICLE RESEARCH, DEVELOPMENT, AND DEMONSTRATION PROGRAM.—The Secretary shall carry out a program of research, development, and demonstration on techniques related to improving natural gas and other alternative fueled vehicle technology including, but not limited to, the following areas—

(1) fuel injection;
(2) carburetion;
(3) manifolding;
(4) combustion;
(5) power optimization;
(6) efficiency;
(7) lubricants and detergents;
(8) engine durability;
(9) ignition, including fuel additives to assist ignition;
(10) multifuel engines;
(11) emissions control, including catalysts;
(12) novel gas compression concepts;
(13) advanced storage systems;
(14) advanced gaseous fueling technologies; and
(15) the incorporation of advanced materials in these areas.

(b) The Secretary, consistent with the Alternative Motor Fuels Act of 1988 (Public Law 100-494), may enter into cooperative agreements with, and provide financial assistance under this section to, public entities or interested or affected private firms willing to provide 50 per centum of the costs of such programs to perform the research and development necessary to improve natural gas vehicle and other alternative fuel vehicle technology.

(c) There is authorized to be appropriated not more than $10,000,000 for each of the fiscal years 1992, 1993, and 1994 for purposes of this section.

SEC. 355. NATURAL GAS RECOVERY, RESEARCH, DEVELOPMENT AND DEMONSTRATION PROGRAM.—(a) The Secretary shall expand and continue a program of research, development, and demonstration on techniques to increase the availability of natural gas from—

(1) intensive recovery of natural gas in place in discovered reservoirs or formations; and

(2) economic recovery of unconventional natural gas, including gas from tight sands, Eastern shales, gas from less permeable formations, coal-bed methane, and geopressured reservoirs.

(b) The Secretary shall seek to enter into joint ventures with persons engaged in the production, transportation, distribution, or major use of natural gas to implement the program under subsection (a).

(c) There is authorized to be appropriated not more than $25,000,000 for each of the fiscal years 1992, 1993, and 1994 for purposes of this section.

SEC. 356. NATURAL GAS AND ELECTRIC HEATING AND COOLING TECHNOLOGIES.—(a) The Secretary shall expand the program for research, development, and demonstration for natural gas and electric heating and cooling technologies for residential and commercial buildings.

(b) The natural gas heating and cooling program shall increase research on thermally-activated heat pumps including:

(1) absorption heat pumps; and
(2) engine-driven heat pumps.

(c) The electric heating and cooling program shall increase research on:

(1) advanced heat pumps;
(2) thermal storage; and
(3) advanced electrically-driven HVAC (heating, ventilation, and cooling) and refrigeration systems that utilize replacements for chlorofluorocarbons, including HCFC-22.

(d) There is authorized to be appropriated to the Secretary, not more than $15,000,000 for each of the fiscal years 1992, 1993, and 1994 for purposes of this section in addition to current authorizations.

SEC. 357. VEHICLE AND BATTERY RESEARCH, DEVELOPMENT, AND DEMONSTRATION PROGRAM.—(a) The Secretary shall conduct a program of research, development, and demonstration on techniques related to improving electric vehicle and battery technology including, but not limited to, the following areas:

(1) high efficiency electric power trains, including advanced motors and hybrid power trains for vehicle range improvement;
(2) light-weight body structures for vehicle weight reduction;
(3) advanced batteries with high specific energy and specific power for electric vehicle application; and
(4) primary batteries and fuel cells for hybrid vehicle application.

(b) The Secretary shall enter into joint ventures with, and provide financial assistance under this section to, public entities or interested or affected private firms willing to provide at least 50 per centum of the costs of the joint ventures.

(c) There is authorized to be appropriated not more than $10,000,000 for each of the fiscal years 1992, 1993, and 1994 for purposes of this section.

SEC. 358. DEFINITIONS.—For purposes of this subtitle natural gas includes natural gas derived fuels.

Subtitle G—Hydropower

SEC. 361. PROGRAM.—The Secretary, in consultation with the Federal Energy Regulatory Commission, the Secretary of the Interior, the Secretary of the Army, the Secretary of Agriculture, and the Secretary of Commerce shall undertake an assessment of the statutory, economic, and regulatory barriers to expanded hydroelectric capacity development at existing dams. The assessment shall quantify the contribution that expanded hydroelectric power development could reasonably be expected to make to national energy needs and a reduction in the generation of greenhouse gases.

SEC. 362. REPORT.—The Secretary will submit a report to Congress containing the results of the assessment by December 31, 1991.

Subtitle H—Electric Vehicle Technology Development and Demonstration

SEC. 371. SHORT TITLE.—This subtitle may be cited as the "Electric Vehicle Technology Development and Demonstration Act of 1990".

SEC. 372. FINDINGS.—The Congress finds that:

(1) electric vehicles may be recharged primarily during times of nonpeak use of electricity, which will permit the most efficient utilization of electrical generating capacity, produce economic benefits for purchasers and producers of electricity, and improve the quality of air;

(2) the development, demonstration, and commercialization of electric vehicles in the United States will enhance the energy security of the United States and will encourage electric vehicle production in the United States;

(3) the use of electric vehicles rather than vehicles powered by conventionally fueled internal combustion engines could significantly improve the quality of air by allowing areas of the country that have not attained a quality of air that meets minimum health standards to meet such standards;

(4) because initial production of electric vehicles will not have economies of scale associated with mass production, the price to a user or owner may be so high as to discourage vehicle purchase and use; and

(5) because the substantial potential environmental and domestic energy security benefits that will result from the commercialization of electric vehicles are so great for the United States, it is in the public interest for the United States Government to assist in the development, demonstration, and commercialization of domestically produced, cost competitive, electric vehicles.

SEC. 373. DEFINITIONS.—For purposes of this Act, the term—

(1) "Administrator" means the Administrator of the Environmental Protection Agency;

(2) "conventionally fueled vehicle" means a vehicle powered by an internal combustion engine that utilizes gasoline or diesel fuel as its fuel source;

(3) "electric vehicle" means a vehicle powered by an electric motor that draws current from rechargeable storage batteries, fuel cells, or other portable sources of electrical current, and that may include a nonelectrical source of power designed to charge batteries and components;

(4) "eligible nonattainment area" means a nonattainment area that the Secretary designates as an eligible nonattainment area under section 374(b);

(5) "life cycle costs" means all costs associated with the purchase, operation, maintenance, and disposal of a vehicle; and

(6) "nonattainment area" means a nonattainment area identified by the Administrator pursuant to section 107(d) of the Clean Air Act (42 U.S.C. 7407(d)).

SEC. 374. IDENTIFICATION OF NONATTAINMENT AREAS.—(a) The Secretary, in consultation with the Administrator, shall identify, not later than thirty days after the date of the enactment of this Act, the nonattainment

areas in the United States in which the use of conventionally fueled vehicles contributes significantly to that nonattainment and in which the use of electric vehicles could contribute to attainment of applicable National Ambient Air Quality Standards.

(b) The Secretary, after consultation with the Administrator and not later than thirty days after notification of the nonattainment areas identified under subsection (a), shall designate nonattainment areas eligible to participate in the program authorized by this subtitle. Geographical diversity shall be among the factors to be considered by the Secretary in making such designations.

SEC. 375. APPLICATIONS FROM MANUFACTURERS.—(a) Not later than thirty days after the Secretary designated the eligible nonattainment areas under section 374(b), the Secretary shall make an initial request for applications from manufacturers to develop, demonstrate, certify, manufacture, sell, warranty, and service electric vehicles in one or more eligible nonattainment areas. Additional requests for applications may be made if the Secretary determines that the responses to the initial request are inadequate.

(b) The request for applications shall require a manufacturer to identify the following:

(1) SALES AREA.—Any eligible nonattainment area in which the electric vehicles will be sold;

(2) QUANTITY.—The quantity of vehicles that will be available for sale in each area;

(3) DISTRIBUTION.—The dealership network or other means to be used by a manufacturer to distribute, market, and sell vehicles;

(4) TYPE.—The type of vehicle (which may include light to medium duty cargo or passenger vehicles);

(5) CHARACTERISTICS.—The specifications and performance characteristics of each vehicle;

(6) SERVICE.—The maintenance and other support services that will be available to a purchaser;

(7) PRICE.—The selling price of a manufacturer for varying volumes of production of each type of vehicle;

(8) LIFE CYCLE COSTS.—Information regarding the life cycle costs, including projected costs of operating and maintaining an electric vehicle in comparison with operating and maintaining a conventionally fueled vehicle;

(9) STATE AND LOCAL INVOLVEMENT.—The level of involvement (cost-sharing or otherwise), if any, that State or local government entities will have in the manufacturer's proposal, and how that involvement will affect the level of Federal cost-sharing required; and

(10) OTHER.—Other information that the Secretary deems necessary.

SEC. 376. SELECTION OF MANUFACTURERS.—(a) After consulting with the Secretary of Commerce, the Secretary of Transportation, and the Administrator, and not later than one hundred and eighty days after the initial request for applications is made under section 375, the Secretary may select one or more manufacturers eligible to receive reimbursement payments for the development, demonstration, manufacture, and sale of electric vehicles.

(b) The Secretary shall select a manufacturer based upon the overall quality of the proposal, including the following:

(1) CAPABILITY.—The ability of a manufacturer, directly or indirectly, to develop, demonstrate, manufacture, distribute, sell and service a significant number of electric vehicles;

(2) GEOGRAPHIC DIVERSITY.—The commitment of the manufacturer to distribute, sell and service electric vehicles in various regions of the country.

(3) SUITABILITY.—The suitability of the vehicles for use as a cargo or passenger vehicle;

(4) SAFETY AND ENVIRONMENTAL BENEFIT.—The quality of the vehicle with respect to safety and environmental considerations;

(5) VIABILITY.—The long-term technical viability of the vehicle, and the ability of the manufacturer to incorporate subsequent advancements, modifications, and technology;

(6) LIFE CYCLE COST REDUCTION.—The ability and commitment of a manufacturer to reduce the life cycle costs of electric vehicles over a period of five years or less after selection to a level at least equal to comparable conventionally fueled vehicles;

(7) PRICE.—The selling price of a manufacturer for varying volumes of production of vehicles, the proposed discount (as defined in section 377), and life cycle costs of the electric vehicles;

(8) STATE AND LOCAL SUPPORT.—The extent to which the involvement of state or local government in the program will permit the reduction of the Federal costs share per vehicle to be supported or will otherwise be used to leverage the federal cost-sharing to be provided among a greater number of vehicles;

(9) OTHER.—Other criteria that the Secretary deems necessary.

SEC. 377. DISCOUNTS TO PURCHASERS.—(a) A manufacturer selected by the Secretary shall offer a purchaser a discount equal to either:

(1) LIFE CYCLE COST DIFFERENTIAL.—An amount which represents the excess of the estimated life cycle costs of the electric vehicle over the life cycle costs of a conventionally fueled vehicle of comparable type; or

(2) PURCHASE PRICE COST DIFFERENTIAL.—An amount by which the selling price of the electric vehicle exceeds the suggested retail price of a conventionally fueled vehicle of comparable type.

In no case shall the discount be greater than 50 per centum of the selling price by varying volumes of production.

(b) The Secretary, not later than thirty days after a manufacturer has provided notice in the form and manner specified by the Secretary of the sale of an electric vehicle, shall pay a manufacturer a payment not to exceed the discount for each electric vehicle sold.

(c) To be eligible for payment subsection (b), a manufacturer shall certify to the Secretary the following:

(1) PURCHASER DISCOUNT LIMITATION.—The discount to the purchaser does not lower the selling price of each electric vehicle below the suggested retail price of a conventionally fueled vehicle of comparable type;

(2) DISCOUNT PASSTHROUGH.—The actual selling price of the vehicle is equal to the selling price specified in the manufacturer's proposal to the Secretary reduced by the full amount of the discount received, calculated as specified above, unless the Secretary agrees to a request by the manufacturer to adjust the selling price as specified in the contract to reflect higher costs actually incurred in production;

(3) NONATTAINMENT AREA USE.—The vehicle will be used primarily in the eligible nonattainment area in which the vehicle will be purchased;

(4) INFORMATION FROM PURCHASER.—The purchaser has agreed to provide the manufacturer with information regarding operation, maintenance, and usability of the vehicle for five years after purchase; and

(5) INFORMATION FROM MANUFACTURER.—The manufacturer will povide such information regarding the development, demonstration, manufacture, sale, and maintenance of electric vehicles that the Secretary requests for a period of five years, beginning in fiscal year 1992.

(d) The Secretary may enter into contracts with manufacturers of electric vehicles for purposes of carrying out this Act.

SEC. 378. REPORTS TO CONGRESS.—The Secretary shall report to Congress in fiscal years 1992 and 1994 on the programs and projects supported under this subtitle and the progress being made toward accomplishing the goals of this subtitle.

SEC. 379. AUTHORIZATIONS.—There is authorized to be appropriated for purposes of this subtitle $10,000,000 for each of the five fiscal years following the date of enactment of this Act.

Subtitle I—Advanced Nuclear Reactor Study

SEC. 381. REPORT.—Within one hundred and eighty days after the date of the enactment of this Act, the Secretary shall transmit to the Congress a report on whether, and to what extent, continued or increased use of energy generated from nuclear fission can contribute substantially to safe and reliable supplies of electricity and reduce the generation of carbon dioxide and other greenhouse gases in the United States and internationally. The report shall include data on the extent to which additional increments of nuclear-generated electrictiy can reduce the generation of greenhouse gases and over what period of time. In preparing such report, the Secretary shall consider and make recommendations on the appropriate level of Federal support for research, development, and demonstration of advanced nuclear reactor technologies to support these objectives. Such report shall also include the recommendations of the Secretary regarding the necessary restructuring of existing nuclear fission research programs to achieve these objectives and the role of joint funding and cost-sharing in these activities.

Subtitle J—Technology Development Program

SEC. 391. PROGRAM.—The Secretary shall establish a program to develop technologies originating with the Department that is directed at the stage of technology development beyond the basic research stage. The purpose of such program shall be to develop technologies, determined by the Secretary to have significant promise for commercial and public benefit to the Nation, to a point where private industry will undertake further scientific and commercial development. Technology development programs may be conducted at any Department facility and would be intended to enhance the commercial development and transfer to private industry of technologies originating with the Department, consistent with the technology transfer mission of the Department. As a condition for supporting specific projects, the Secretary may require a private sector commitment to future, and wholly non-Federal, funding of commercial development of particular technologies.

SEC. 392. AUTHORIZATIONS.—For the purposes of carrying out this subtitle, there are authorized to be appropriated such sums as are necessary for fiscal years 1992, 1993, and 1994.

TITLE IV—MISCELLANEOUS

Subtitle A—Methane Assessment

SEC. 401. OBJECTIVE.—The objective of this subtitle is to identify and analyze options to

reduce the risks of global climate change by—

(1) reducing worldwide generation of methane;

(2) identifying and analyzing the relationships between methane and other greenhouse gases to determine the synergies that may contribute to global climate change;

(3) promoting additional analyses of the factors causing methane concentrations to increase, and of the sources of methane generation, and the opportunities for reducing such generation; and

(4) identifying options for the reduction of methane generation that are economically as well as environmentally advantageous.

SEC. 402. DOMESTIC METHANE SOURCE INVENTORY AND CONTROL OPTIONS.—(a) Not later than two years after the date of the enactment of this Act, the Secretary, in consultation with the Secretary of Agriculture and the Secretary of the Interior, shall submit to the Congress reports on:

(1) methane emissions from biogenic sources such as

(A) tropical, temperate, and subarctic forests;

(B) tundra; and

(C) freshwater and saltwater wetlands;

(2) changes in the generation of methane from biogenic sources that may occur as a result of predicted increases in temperatures and atmospheric concentrations of carbon dioxide;

(3) methane operation associated with natural gas extraction, transportation, distribution, storage and use, including an inventory of methane generation associated with such activities within the United States, information on accidental and intentional methane releases from natural gas and oil wells, pipelines, processing facilities, and gas burners;

(4) methane generation associated with coal extraction, transportation, storage, and utilization, including, but not limited to, an inventory of methane generation associated with such activities within the United States, information on accidental and intentional releases from mining shafts, degasification wells, gas recovery wells and equipment, and from the processing and use of coal; and

(5) other sources of methane generation associated with human activities that are deemed by the Secretary to be significant.

(b) Not later than two years after the date of the enactment of this Act, the Secretary shall submit to the Congress a report that outlines measures that could be implemented to reduce the growth in atmospheric concentrations of methane from sources within the United States. This report shall identify and evaluate the technical options for reducing the generation of methane from each of the sources listed in paragraph (a) as well as other sources deemed by the Secretary to be significant, and shall include an evaluation of costs.

SEC. 403. INTERNATIONAL STUDIES.—Not later than two years after the date of the enactment of this Act, the Secretary, in consultation with the Secretary of State, shall submit to Congress a report on methane emissions from countries other than the United States. Such report shall include inventories of methane generation associated with the activities listed in section 402(a). The report shall also identify the United States and international lending agency programs, and an itemization of the costs of each category of reductions, that may be used to induce lesser-developed countries to undertake measures that could reduce the generation of methane and the resource needs of such programs.

Subtitle B—Committee on Renewable Energy Commerce and Trade

SEC. 411. DUTIES OF CORECT.—The Committee on Renewable Energy Commerce and Trade (CORECT) shall seek to enhance economic development in lesser-developed countries by expanding the transfer of energy efficient and renewable energy technologies to such countries.

SEC. 412. ADDITIONAL DUTIES OF CORECT.—(a) CORECT shall promote the development and application in lesser-developed countries of energy and energy efficiency resource technologies that—

(1) promote more efficient use of fossil fuels;

(2) may reduce dependence on the importation of fossil fuels by encouraging the use of sustainable biomass, wind power, hydropower, solar, geothermal and other energy and energy efficiency resource technologies; and

(3) foster rural and urban energy development and energy self-sufficiency through the use of reliable and economical renewable energy and energy efficiency resource technologies.

(b) In furthering the purposes of this section, CORECT shall—

(1) provide aggressive in-country technical training for local users and international development personnel;

(2) establish feasibility and loan guarantee programs to facilitate access to capital and credit; and

(3) support, through financial incentives, private sector efforts to commercialize and export renewable energy and energy efficiency resource technologies.

(c) CORECT shall be responsible for the development of a comprehensive data base and information dissemination system. The system shall provide information on the specific energy technology needs of lesser-developed countries, the technical and economic competitiveness of various renewable energy and energy efficiency resource technologies, and the status of ongoing technology assistance programs. CORECT shall make such information available to industry, Federal and multilateral lending agencies, non-governmental organizations, host-country and donor-agency officials, and such others as the Secretary deems necessary.

SEC. 413. OUTREACH.—CORECT may establish renewable energy industry outreach offices in the Pacific Rim and in the Caribbean Basin for the purpose of providing information concerning renewable energy technologies and industries of the United States to governments, industries, and others outside of the continental United States.

SEC. 414. COMPREHENSIVE ENERGY TECHNOLOGY EVALUATION.—(a) Not later than June 1, 1991, and biennially thereafter, the Secretary shall prepare and submit to Congress, a comprehensive report evaluating the full range of energy and environmental technologies necessary to meet the energy needs of developing countries while reducing the generation of carbon dioxide and other greenhouse gases. This report shall also provide information on the specific needs of lesser-developed countries, an inventory of United States technologies and services to meet those needs, and an update on the status of ongoing bilateral and multilateral technology assistance and renewable energy resource programs.

(b) The report should also include an evaluation of current programs and recommendations for future programs that—

(1) develop and promote sustainable use of indigenous renewable energy resources in lesser-developed countries in order to reduce the generation of greenhouse gases that may contribute to global climate change;

(2) given the credit and capital restrictions in lesser-developed countries, focus on technologies that are both appropriate and economically viable;

(3) meet the needs of lesser-developed countries for energy rather than creating new needs, in order to ensure immediate income-generating use of the power generated;

(4) work with local individuals to assure that programs and projects meet specific national and local needs;

(5) use indigenous materials and associated hardware, wherever possible, in order to reduce costs and ensure project duplication;

(6) provide examples of cost-effective systems and applications for in-country nongovernmental organizations and project technical personnel;

(7) expand technical and administrative training programs, as well as distribution of multilingual technical training manuals and related materials; and

(8) examine the potential for using economic incentives to promote technology transfer (e.g. shared savings contracts, loan guarantees, tax incentives, etc.) to lesser-developed countries.

SEC. 415. AUTHORIZATIONS.—(a) There is authorized to be appropriated $10,000,000 for fiscal year 1992, and such sums as may be necessary for fiscal year 1993 and 1994 to carry out the purposes of this subtitle except for section 413.

(b) There is authorized to be appropriated for the purposes of section 413, in addition to the amount specified in the previous sentence, $2,750,000 for fiscal year 1992, and such sums as may be necessary for fiscal years 1993 and 1994.

Subtitle C—Fuel Cycle Costs Analysis

SEC. 421. PROGRAM.—The Secretary shall undertake a comparative analysis of United States, European, and Asian fuel cycle costs. The analysis shall be undertaken for five fuel cycles: coal, oil, natural gas, nuclear, and renewable energy. The renewable energy fuel cycle shall include solar, hydro, wind, and biomass. The analysis shall be based on comparable assumptions, data, and methodologies and will explicitly address the extent to which environmental and other externalities are, or are not, reflected in the energy prices paid by consumers in the United States, Western Europe, and in the market economies of Asia.

SEC. 422. REPORT.—The Secretary will submit a report to Congress containing the results of the comparative fuel cycle cost analysis by December 31, 1991.

TITLE V—NATURAL RESOURCE POLICY

SEC. 501. ECOLOGICAL AND ENVIRONMENTAL RESOURCE STUDY.—(a) The Secretary of the Interior, in consultation with the Secretary of Agriculture, shall conduct a study of the ecological and environmental resources in the United States that could be affected by a global climate change. The study should include implications for wildlife habitat preservation, coastal protection, inland rivers and lakes, irrigation and reclamation, ground water protection, and the natural resources within the boundaries of the Nation's Wildlife refuges and parks, national forests, and other Federal lands.

(b) The study should—

(1) include specific regional climatic and resource base information useful in anticipatory and mitigatory planning;

(2) identify actions that, if taken, could help mitigate the effects of global climate change; and

(3) evaluate the cost-effectiveness, including the environmental effects of possible action.

SEC. 502. NATIONAL FORESTATION INITIATIVE.—The Secretary of Agriculture, in cooperation with the Secretary of the Interior, shall report to the President and the Congress on the feasibility of a National Reforestation Initiative. Such report shall include—

(a) in coordination with the Resources Planning Act of 1974, an inventory of Federal, State, and private forested lands;

(b) an evaluation of the status of timber harvesting on those lands, including the extent to which those lands are being reforested;

(c) an assessment of the extent to which Federal, State, and private lands can be reforested, including lands not necessarily suitable for timber harvesting such as urban areas;

(d) an evaluation of the potential of a national reforestation initiative for mitigating climate change, and the measures needed to achieve that potential; and

(e) an assessment of the potential economic and environmental benefits and costs of such an initiative, the measures available to mitigate such costs, and an evaluation of the effectiveness of such measures.

SEC. 503. URBAN FORESTRY AND ENERGY SAVINGS.—(a) The Secretary, in consultation with the Secretary of Agriculture, and other relevant Federal agencies, shall conduct a study of the potential for reducing carbon dioxide emissions by undertaking targeted urban tree and vegetative plantings, including landscaping and the use of natural windbreaks, designed to reduce the air-conditioning and heating needs of buildings. The study shall provide estimates of the cost-effectiveness of such a program and shall outline a range of Federal, State, and local public policies and incentives that would encourage public and private efforts to undertake such plantings.

(b) Within eighteen months after the date of enactment, the Secretary shall complete the study and transmit it to the Congress.

AMENDMENT NO. 2605

Subtitle D—United Nations Conference

SEC. 431. 1992 UNITED NATIONS CONFERENCE ON ENVIRONMENT AND DEVELOPMENT.—

(a) FINDINGS.—The Congress finds that—

(1) the 1992 United Nations Conference on Environment and Development will play a crucial role in advancing efforts to protect the global environment;

(2) international preparations for 1992 Conference have already begun; and

(3) the effectiveness of U.S. participation in the 1992 Conference would be greatly enhanced by the establishment of a secretariat within the Department of State to coordinate U.S. preparations for the Conference.

(b) AUTHORIZATION.—There are authorized to be appropriated to the Secretary of State for fiscal year 1991, $350,000 for the purpose of establishing within the Department of State a secretariat to prepare for the 1992 United Nations Conference on Environment and Development. Such funds shall remain available until expended.

AMENDMENT NO. 2606

On page 236, line 19, delete "and"; on line 23, delete the period and insert a semicolon; and following line 23, insert the following:

"(4) explore mechanisms for assisting U.S. manufacturers, particularly smaller manufacturers, of energy-efficient and renewable energy technologies, in exporting their goods and services; and

"(5) increase staffing to support the new authority and responsibilities described in this section.".

On page 239, after line 11, insert the following new clause and redesignate clauses "(7)" and "(8)" as "(8)" and "(9)".

"(7) provide mechanisms for assisting U.S. manufacturers, particularly smaller manufacturers, of energy-efficient and renewable energy technologies, in exporting their goods and services;".

On page 239, redesignate section 415 as section 416 and insert a new subsection 415 as follows:

"SEC. 415. JOINT VENTURES IN DEVELOPING, DEMONSTRATING, AND MARKETING ENERGY EFFICIENT AND RENEWABLE ENERGY TECHNOLOGIES IN KEY LESSER DEVELOPED COUNTRIES.—

"(a) FIVE YEAR PLAN.—The management plan under section 9(b) of the Renewable Energy and Energy Efficiency Technology Competitiveness Act of 1989 (Public Law 101-218), shall include a five-year implementation plan for:

"(1) pursuing joint venture with United States manufacturers for the development, demonstration, or marketing of energy efficient and renewable energy technologies for application of use in key lesser-developed countries; and

"(2) provided mechanisms to assist U.S. manufacturers, particularly smaller manufacturers of energy efficient and renewable energy technologies, in identifying and pursuing opportunities for sales or joint ventures.

In developing the implementation plan required under this subsection, the Secretary shall consult with the Agency for International Development.

"(b) The Secretary shall solicit proposals for joint ventures in the areas described in subsections (a)(1) and (a)(2) as if such joint ventures were required by, and subject to the requirements set forth in, section 6 of Public Law 101-218. The Secretary shall select a total of at least three joint ventures, except that the Secretary may reduce this requirement to the extent that the proposals received do not meet the Secretary's qualifications.

"(c) For the purposes of this section, a lesser-developed country shall be considered a key lesser-developed country if direct export or use of U.S. manufactured energy efficient and renewable energy technologies in such country is inhibited by cultural, or other factors.".

On page 416, after line 3, at the end of the redesignated section 416, add the following new subsection:

"(c) There is authorized to be appropriated for the purposes of section 415, in addition to the amount specified in sections (a) and (b), $1,000,000 for fiscal years 1992, 1993, and 1994.".

AMENDMENT NO. 2607

On page 194, after line 13, add the following:

"Subtitle C—Fuel Cells

"SEC. 221. AMENDMENT.—"Title V of the National Energy Conservation Policy Act (42 U.S.C. 8251-8261) is amended by adding the following new part after section 569:

"Part 5—Fuel Cells

"SEC. 571. DEFINITIONS.—For purposes of this subtitle the term:

(1) "Federal building" shall mean "Federal building" as defined by Section 549(6); and

(2) "Task Force" shall mean the Interagency Energy Management Task Force established pursuant to section 547, except that, for purposes of this subtitle, the term "Task Force" shall include the Environmental Protection Agency.

SEC. 572. FUEL CELL PROGRAM.—The Secretary, in consultation with the Task Force, shall conduct a program to promote the early commercial application of fuel cell systems for the production of electricity by the demonstration of such systems in Federal buildings.

SEC. 573. PURPOSES.—The purposes of this program are to:

(1) improve the efficiency and reduce the environmental consequences of the nation's electric generation capability;

(2) stimulate the creation of new industries and job opportunities in efficient and environmentally sound energy technologies; and

(3) develop cost, efficiency, performance, environmental, and reliability data on fuel cell systems used in the production of electricity.

SEC. 574. IMPLEMENTATION AND ACQUISITION.—(a) In preparing or updating the plan required by section 543(b)(1), each agency on the Task Force shall identify at least two potential projects for the demonstration of the application of fuel cell systems for the production of energy to satisfy electrical and other energy requirements of such buildings.

(b) Not later than 6 months after the submission to the Secretary of such plan, including the list of potential projects required under subsection (a), the Secretary, in consultation with the Task Force, shall identify a minimum of ten projects for implementation pursuant to subsection (c) and shall make a report of his selection including the basis therefor, to the Congress.

(c) The Secretary may provide financial assistance to agencies sponsoring projects, identified under subsection (b), to acquire and install fuel cell systems manufactured in the United States and any associated equipment which may be necessary for the implementation of any of the listed projects. In order to receive financial assistance from the Secretary, a project identified under subsection (b) must meet the ten-year payback criterion of section 543. The calculation of such ten-year payback period shall take account of cost benefits associated with cogenerated energy to the extent provided under section 544. In selecting qualified projects for financial assistance, the Secretary, in consultation with the Task Force, shall also consider the cost of the electricity to be generated; the extent of cost-sharing provided by other agencies for the acquisition of new equipment; the appropriateness of the locations, sites, and structures in question; the adaptability of facilities to program requirements; whether Federal buildings undergoing new construction or renovation offer advantages of cost-efficiency or ease of installation over existing Federal buildings; and such other factors that, in the judgement of the Secretary and the Task Force, may affect the benefits or costs of the fuel cell program.

(d) Not later than January 1, 1996, the Secretary, in consultation with the Task Force, shall submit a report to Congress on the program authorized by this subtitle, which shall include information comparing the cost, efficiency, performance, environ-

mental advantages and reliability of fuel cells to other existing technological means of generating electricity, using data obtained from the operation of fuel cells acquired under this program. Such report shall also contain a discussion of all technical and economic issues which, in the judgment of the Secretary, might prevent the commercial use of fuel cells or restrict the use of fuel cells in certain applications and an analysis, including recommendations, of the steps needed to overcome such restrictions. A copy of such report shall be provided to each agency for further implementation of fuel cell projects consistent with the provisions of section 543(a), as appropriate.

'SEC. 575. AUTHORIZATION.—There is authorized to be appropriated to carry out the provisions of this subtitle a total of $15,000,000 for fiscal years 1992 through 1994.'."

AMENDMENT NO. 2608

(Purpose: To remove the regulatory barriers for solar, wind and geothermal electric energy generation contained in the Public Utility Regulatory Policies Act of 1978)

At the end of Title II add the following new subtitle:

"Subtitle C—Solar, Wind and Geothermal Electric Power Production

"SEC. 221. PURPA AMENDMENTS.—Section 210 of the Public Utility Regulatory Policies Act of 1978 is amended as follows:

"(a) In subsection (a), strike out ", and to encourage geothermal small power production facilities of not more than 80 megawatts capacity,".

"(b) In subsection (e)(2), insert "(other than a qualifying small power production facility which is a solar, wind or geothermal facility as defined in section 3(17)(E) of the Federal Power Act)" after "facility" where it first appears, and by striking out ", or 80 megawatts for a qualifying small power production facility using geothermal energy as its primary energy source,".

"SEC. 222. FEDERAL POWER ACT AMENDMENTS.—(a) Section 3(17)(A) of the Federal Power Act is amended by inserting "a facility which is a solar, wind or geothermal facility, or" after " 'small power production facility' means".

"(b) Section 3(17) of such Act is further amended by inserting at the end thereof the following new subparagraph:

" '(E) "solar, wind or geothermal facility" means a facility which produces electric energy solely by the use, as a primary energy source, of solar energy, wind energy or geothermal resources;".

"SEC. 223. FERC REGULATIONS.—(a) Within 30 days of the date of enactment of this Act, the Federal Energy Regulatory Commission shall issue such proposed modifications to its regulations as may be necessary to implement the amendments made by this subtitle, and within 90 days of such date, the Commission shall issue final regulations.

"(b) Until regulations described in subsection (a) are final and effective, any solar, wind or geothermal facility (as defined in section 3(17)(E) of the Federal Power Act), which is a qualifying small power production facility as defined in subparagraph (C) of section 3(17) of the Federal Power Act (as such section 3(17) is amended by this Act), (A) shall be considered a qualifying small power production facility under part 292 of title 18 of the Code of Federal Regulations, notwithstanding any size limitations contained in such part, and (B) shall not be subject to the size limitation contained in section 292.601(b) of such part.

"(c) The provisions of Subtitle C shall apply to a solar, wind or geothermal facility only if either of the following is submitted to the Federal Energy Regulatory Commission during the two year period beginning on the date of enactment of this Act:

"(1) an application for certification of the facility as a qualifying small power production facility; or

"(2) notice that the facility meets the requirements for qualification.".

AMEMDMENT NO. 2609 TO AMENDMENT NO. 2608

(Purpose: To remove size limitations for a period of 2 years on qualifying small power production facilities using waste as a primary energy source)

Amend the amendment proposed by Mr. DOMENICI et al. by: (1) adding ", waste" after the words "solar, wind" at every point at which the words appear in the amendment; and (2) adding ", waste resources" after "wind energy".

AMENDMENT NO. 2610 TO AMENDMENT NO. 2608

On page 2, line 29, following the word "if" insert ": (1)"

On page 3, line 2, strike "1" and insert in lieu thereof "A".

On page 3, line 4, strike "2" and insert in lieu thereof "B".

On page 3, line 5, following "qualification" insert the following: "; and (2) construction of such facility commences within five years of the date of such application or notice and reasonable diligence is exercised towards the completion of such facility taking into account all factors relevant to the construction of the facility."

MR. LIEBERMAN ON AMENDMENT TO S. 324

Mr. LIEBERMAN. Mr. President, in the areas of energy efficiency and pollution protection, this Nation has a great need to put its house in order. Our dependence on foreign imports to meet our voracious energy appetite has wreaked havoc with our balance of payments and, just as surely, the shear bulk of our energy use has placed great burdens on our fragile environment.

It is time we seek out new ways to meet our energy requirements which are both more efficient and less harmful to the environment. That is why, Mr. President, I have introduced this amendment to title V of the National Energy Conservation Policy Act, which would provide for the use of fuel cells to meet electrical requirements in Federal buildings.

Fuel cells are essentially large-scale batteries which use hydrocarbon fuels, without combustion, to produce electricity, but they are remarkable batteries indeed. They are superlative energy producers, reaching efficiencies of over 80 percent if heat energy is recovered, compared to about 30 percent for traditional power plants. They are virtually pollution free and, because of their great efficiency, emit far less carbon dioxide per unit of energy produced than do traditional power-generating devices. They are quiet and modular, making them ideal for use onsite and in situations where variable power demands allow fuel cells to be combined or separated as needed. In short, the widespread use of fuel cell technology promises to reduce the nation's energy consumption, clean up our air, reduce the threat of global warming, and improve the versatility of our energy base.

Mr. President, these are only some of the numerous benefits offered by fuel cell technology. The amendment I introduce today provides for the installation of fuel cell systems to meet energy requirements in at least 10 Federal facilities. This should do much to highlight the attributes of this technology. It requires selected agencies to provide a list of candidate facilities from which the Secretary of Energy, in consultation with other interested officials, would select project sites for installation of fuel cell systems. It requires the Secretary to prepare a comprehensive report detailing the results of the program, so that we are provided information which might point the way to wide scale commercial application.

Mr. President, I like to think of a day when our Nation comes to grips with our collective energy wastefulness and environmental despoliation. Programs to decrease the consumption of energy are vital, but they are not enough. We need also to increase the efficiency of the energy we do use and to positively influence the environmental cosnequences of that energy use. Fuel cells are one of the promising technologies that can achieve these goals, if only we reach out for them. With the introduction of this amendment, I hope we can begin to work toward these goals.

STATEMENT OF MR. DOMENICI ON AMENDMENT NO. 2608

Mr. DOMENICI. Mr. President, the amendment now pending before the Senate proposes to remove the size limitations for solar, wind and geothermal power plants contained in the Public Utility Regulatory Policies Act of 1978.

This amendment is similar to S. 2415, which I introduced and is presently cosponsored by Senators MCCLURE, WIRTH, REID, MCCAIN, BRYAN, CRANSTON, WILSON, HATFIELD, SYMMS, HARKIN, DECONCINI, PACKWOOD, ADAMS, MIKULSKI, SHELBY, HOLLINGS, HATCH, JEFFORDS, SANFORD, GARN, LIEBERMAN, MURKOWSKI, DASCHLE, ROBB, and AKAKA. The only difference is that the amendment encompasses wind power, whereas S. 2415 does not. That addition was made at the request of Senator HATFIELD and other Senators.

There is one important difference, however, between the pending amendment and S. 2415, and that is the 2-year sunset provision. This has been added at the request of Senator JOHNSTON, not because I am in favor of it; and, as a matter of fact, if I had my

way there would be no such sunset provision. But in order to obtain a time agreement on this amendment and to ensure that the global warming bill passes the Senate, it has been necessary to add at Senator JOHNSTON's request a 2-year sunset provision.

In a hearing before the Committee on Energy and Natural Resources, the administration testified in support of the changes in law that my amendment proposes to make.

This amendment is also supported by Public Citizen, by the National Association of State Energy Officials and by the electricity committee of the National Association of Regulatory Utility Commissioners. I ask unanimous consent that letters and resolutions from these groups be included in the RECORD at the conclusion of my statement.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. DOMENICI. Mr. President, before I explain why it is in the public interest to eliminate PURPA's size restrictions on solar, wind, and geothermal powerplants, I will briefly summarize the underlying law my amendment proposes to change.

PURPA was enacted in 1978 as one of the five parts of President Carter's national energy plan to address our energy crisis. One key goal of PURPA was to expand our supply of electricity, which it did by encouraging the construction of nonconventional power-generating facilities by companies other than traditional electric utilities.

In the vernacular of PURPA, these nonconventional electric powerplants are known as qualified facilities or QF's. A QF can be a solar, geothermal, wind, or other renewable energy-based electrical generating facility. A QF can also be a fossil fuel-fired cogeneration facility, which is a type of powerplant that produces and sells steam heat as well as electricity.

PURPA encourages the construction of QF powerplants by giving them enhanced regulatory treatment: QF's are exempted from the Public Utility Holding Company Act, the Federal Power Act and from regulation as an local electric utility; and QF's are given the right to connect into the local utility's power grid and the right to sell their power to the utility at avoided cost.

Without this regulatory treatment, these powerplants would be caught in a regulatory tangle and could not be built; and even if built, traditional electric utilities could refuse to purchase the electricity produced by a QF powerplant. In other words, without PURPA, nonconventional powerplants could not exist.

One provision of PURPA—which is the focus of the pending amendment—places a size limitation on renewable-based QF powerplants. Under this provision, solar, wind and other renewable QF's can not be built larger than 30 megawatts without losing their PURPA benefits, and geothermal facilities can not be built larger than 80 megawatts.

Curiously, however, PURPA has no similar size limitation on fossil fuel-fired cogeneration facilities, which account for three-fourths of QF capacity; they can be built to any size without the loss of their PURPA benefits. And while cogeneration facilities are typically built in the 100- to 500-megawatt size range, earlier this year the largest cogeneration facility ever—a 1,240 megawatt powerplant—went into operation in Michigan. That is the size of a major base-load nuclear or coal-fired powerplant.

Now compare PURPA's 30-megawatt limitation for solar and wind facilities and its 80-megawatt limitation for geothermal facilities to the size of the Michigan cogeneration facility—some 15 to 40 times larger—and you will see one key need for this amendment.

One question relevant to this debate is why did Congress originally impose a size limitation on solar, wind and geothermal facilities, but not on fossil fuel-fired cogeneration facilities?

I was on the Energy and Natural Resources Committee back then and, quite frankly, I can't recall the reason; nor can anyone else. My guess is that when we were writing PURPA someone felt that it was a good idea, and so it was done. But who and why—your guess is as good as mine.

But laying that historical question aside, whatever public policy reasons Congress had back then, there is no valid reason today for these size limitations. On that there is no disagreement.

Mr. President, if we remove PURPA's size limitations for solar, wind, and geothermal facilities we can enhance our supply of electrical power, and that is clearly in the public interest.

Since 1978 nearly 5,000 megawatts of new solar, wind, and geothermal power have already obtained QF status. That is the equivalent of five traditional baseload nuclear or fossil fuel-fired powerplants. Now, while that may already seem like a lot, much more can be done—and will be done if we adopt this amendment.

Over the past decade, there has been a technological revolution which not only makes larger sized solar, wind, and geothermal projects possible, it also makes them far more efficient, which lowers the cost of power production.

Solar technology, for example, has evolved rapidly since the first utility-scale electric generating facility was placed in service back in 1984. Nearly 300 megawatts of solar thermal capacity have since been put into operation, and these plants have won high praise for both their design and reliability from the utility which purchases the power.

Geothermal technology has similarly demonstrated both cost-effectiveness and reliability. Over 2,000 megawatts of geothermal-generating capacity are currently in service in the United States.

And wind energy is likewise taking off. There are now about 14,000 wind turbines in operation, which now satisfy about 1 percent of California's electricity demand.

More can be done, but only if these renewable powerplants are allowed to remain price competitive through economies of scale, which the pending amendment would make possible.

There already have been dramatic improvements in efficiency which have significantly lowered the cost of production. For example, solar facilities built in 1984 generate electricity at a life cycle cost of 24 cents per kilowatt hour. In contrast, the most recently built solar powerplant, an 80 megawatt facility placed in service at the end of 1989, has a lifecycle cost of only 8 cents per kilowatthour. And larger, more efficient, solar facilities could be put on line at a production cost of 6 cents per kilowatthour.

But this cannot occur unless PURPA's size limitations are removed, and that brings me back to my amendment, which I will now explain.

Mr. President, the amendment before the Senate is really very simple: it removes PURPA's size limitations for solar, geothermal, and wind facilities. Nothing more.

Another way of looking at this amendment is that it gives solar, wind, and geothermal QF's the same PURPA treatment as PURPA now gives to fossil fuel-fired cogenerators. On its face that is only equitable.

As modest as this change may seem, without it, solar, wind, and geothermal powerplants will not have a place in the future wholesale power supply market where competition is increasingly intense. They need to be able to reduce the cost of production, for which economies of scale are critical; and that cannot occur unless this amendment is adopted.

Now some will assert that lifting these limitations will harm ratepayers because there is a requirement in PURPA that electric utilities purchase QF power at what is known as full avoided cost. But it should be noted that neither PURPA, nor the Federal regulations implementing PURPA, require state public utility commissions to force their electric utilities to pay more for QF power than it is worth. PURPA's implementation, including the setting of the avoided cost purchase rate for QF power, is left to

State commissions which are given broad discretion.

In the first few years following PURPA's enactment, there is no question that a number of State commissions overshot the mark. But over the past decade, State commissions have become far more expert in projecting and planning to meet future power needs, and that translates into more realistic numbers for avoided cost. As a consequence, State commissions have modified their implementing regulations to keep their rates in line, including the use of competitive bidding.

Thus, while the avoided cost rate may have once been a controversial matter, it no longer is. So, I find it hard to accept the argument made by some that if we remove the PURPA size limitations on solar, wind, and geothermal facilities, as this amendment proposes to do, ratepayers will be harmed.

Mr. President, let take a moment to put this amendment into a broader context. There is little question that our Nation has an increasingly serious energy problem. Each day our foreign energy dependence increases, and no end is in sight. Back in 1973, the year of the Arab oil embargo, we were about 36 percent foreign oil dependent; last year we were 46 percent foreign dependent; and so far this year we have inched up to 50 percent dependency. By almost every estimate, in just a few more years we will be two-thirds foreign dependent. And hardly a week goes by without reading one report or another that says that we are stretching our existing power production resources to their limit, and that we increasingly need to build new powerplants.

That trend not only has significant implications for the future price and reliability of our energy supplies, it also has broader economic, military and geopolitcal implications. Let us not forget that not too long ago the United States had naval warships in the Persian Gulf escorting Kuwait oil tankers against the threat of attack—protection which was provided at a time when only a tiny fraction of the United States' oil came directly from that region. Now, with the ongoing invasion of Kuwait by Iraq, we have the very real prospect of an international oil supply interruption of the size that sent prices soaring back in 1973 and 1979, and caused us to sit in long gasoline lines waiting to fill up our cars.

Mr. President, in terms of our national energy polices, it is important that we take reasonable steps to encourage a wide variety of options to help meet this Nation's future energy needs. We will never find a single or simple answer, but incremental steps to promote domestic energy production are very important and must be taken.

This amendment will take one such step, and it will help! For example, over its life each 80 megawatts of solar, wind, or geothermal generating capacity backs out the equivalent of 14 million barrels of foreign oil.

Mr. President, this is not the first time the Congress has addressed the PURPA size issue. Since its enactment in 1978, twice it has been necessary to raise PURPA's size restrictions to reflect the increased capabilties of maturing technologies. PURPA was amended in 1980 to increase from 30 to 80 megawatts the size limitation for geothermal facilities. Three years ago there was legislation enacted to temporarily lift the size limitation on solar facilities to 80 megawatts. And our experience with these changes have been only positive; new, more efficient facilities have been put on line at lower prices to consumers.

Mr. President, some will argue today that this amendment does not belong on the pending global warming bill, noting could be further from the truth. Solar facilities have minor emissions only when they burn natural gas as a backup source of energy; wind-driven generators have absolutely no emissions of any sort; and geothermal facilities have no combustion-related emissions.

In summary, it is clear that PURPA's size limitations on solar, wind, and geothermal power plants are no longer necessary, appropriate or in the public interest. It is also clear that these limitations unduly burden technological development. It is evident that their removal will bring forth lower cost and environmentally benign electrical generating capacity. And it is without question that encouraging this kind of new generation capacity will help our national energy security.

Simply put, adoption of this amendment is good public policy.

As a Senator from the sunny Southwest, I look forward to the day when my region will more fully utilize its abundant solar resources to generate electricity.

Mr. President, that is why I introduced this legislation, that is why I support it, and that is why I am urging the Senate to adopt this amendment.

EXHIBIT 1

PUBLIC CITIZEN,
CRITICAL MASS,
Washington, DC, May 10, 1990.

Hon. PETE V. DOMENICI,
U.S. Senate,
Washington, DC.

DEAR SENATOR DOMENICI: We are writing to support S. 2415 which you have introduced to remove the size limits imposed by the Public Utility Regulatory Policies Act (PURPA) for solar and geothermal power facilities. In addition, we urge you to expand your proposal to include wind energy power plants.

In a May 1989 Public Citizen report, "Power Surge: The Status and Near-Term Potential of Renewable Energy Technologies," we made this same policy recommendation as one that would allow more rapid development of renewable energy. There is no public benefit gained by restricting the size of renewable energy projects that can qualify under PURPA, nor is there a need to restrict the regulatory exemptions afforded by PURPA to renewable energy facilities of certain sizes.

Renewable energy projects should be treated in the same manner as cogenerators are under PURPA, allowing them to be developed in sizes that relate to resource, market, and other relevant considerations rather than to artificial size restrictions now imposed by PURPA. This will allow renewable energy technologies to be developed in a more cost-effective manner.

We would not be opposed to lifting the size limits under PURPA for all renewable energy technologies. At a minimum, however, we believe that wind should be included in your proposal since the same rationale for removing the size restrictions on solar and geothermal facilities applies to wind projects as well. Optimal project sizes for all of these technologies are encumbered under current law.

We applaud you for sponsoring this much needed legislation, and urge you to expand it to include wind energy.

Sincerely,

NANCY RADER,
Energy Policy Analyst.

P.S. As you may know, Public Citizen is a research and advocacy organization founded by Ralph Nader in 1971 to address a broad range of consumer and environmental issues. Critical Mass is Public Citizen's energy policy arm.

NATIONAL ASSOCIATION
OF STATE ENERGY OFFICIALS,
Washington, DC, July 5, 1990.

Re Solar and Geothermal Power Production Incentives Act (S. 2415).

Hon. PETE V. DOMENICI,
Dirksen Senate Office Building,
Washington, DC.

DEAR SENATOR DOMENICI: On behalf of the National Association of State Energy Officials (NASEO), I wanted to take this opportunity to express our strong support of S. 2415, which you introduced on April 4, 1990. This bill would increase the size of solar (above 30 MW) and geothermal (above 80 MW) power plants that qualify for Qualifying Facility benefits under PURPA.

Hopefully, the passage by the House Energy and Commerce Committee of H.R. 4808, introduced by Mr. Sharp, will encourage the Senate to act on your legislation. We also support the expansion of the bill to cover wind power.

NASEO is composed of energy officials from 49 states, territories and the District of Columbia and we are dedicated to promotion of a balanced national energy policy which enhances energy security, environmental stability and economic development within our states. The states have long supported promotion of renewable energy and we see it as a necessary part of our future national energy supply. This support has included state funding, tax credit and rebates, use of oil overcharge refunds and use of the federally-supported State Energy Conservation Program (SECP) and the Energy Extension Service (EES) to implement renewable energy programs. With oil imports again crossing the 50% mark, concerns over global climate change and the expected passage of Clean Air Act amendments this year,

renewable energy and energy efficiency programs have become even more important.

NASEO strongly supports your legislation and we urge rapid consideration and passage.

Sincerely,

MITCH BEAVER.

RESOLUTION SUPPORTING LEGISLATION TO LIFT SIZE RESTRICTIONS ON SOLAR, GEOTHERMAL AND WIND ENERGY PROJECTS

Whereas, legislation has been introduced in the Congress that lifts the megawatt restrictions under the Public Utility Regulatory Policies Act (PURPA) for qualifying facilities; and

Whereas, this legislation applies to qualifying solar, geothermal and wind energy projects; and

Whereas, this legislation would make these renewable energy technologies more cost effective and would not alter existing State commission authority under PURPA to regulate facilities that use these technologies; now, therefore be it

Resolved, That the Executive Committee of the National Association of Regulatory Utility Commissioners (NARUC) assembled at its 1990 Summer Committee Meeting in Los Angeles, California, supports legislation amending the PURAP to lift the 30 megawatt restriction for qualifying solar and wind facilities and the 80 megawatt restriction on qualifying geothermal projects; and be it further

Resolved, That the Executive Committee of the NARUC supports only legislation that would lift the size restrictions for the above mentioned renewable technologies and opposes any legislation to expand the list beyond these technologies.

Mr. JOHNSTON. Mr. President, I rise today to urge my colleagues to join me in supporting S. 324, the National Energy Policy Act of 1990.

S. 324 seeks to identify an appropriate mix of policies to stabilize the generation of carbon dioxide and other greenhouse gases. The legislation also seeks to foster a better understanding of the causes, magnitude, and regional variations in global climate change and identifying the feasibility and implications of proposed policies to abate or mitigate global climate change.

The legislation supports international cooperation on efforts to address global climate change through the U.N. Intergovernmental Panel on Climate Change [IPCC] and specifically supports the objective to establish, by 1992, an international framework convention on global climate change. Consistent with this objective, the substitute supports efforts to evaluate the potential implications of the strategies to enable the United States to comply with any obligations under an international global climate change framework convention or agreement.

The bill focuses on: First, the formulation of a national energy strategy that includes least-cost planning as a component; second, energy efficiency initiatives; third, energy research and development initiatives including, innovative clean-coal and renewable energy technologies; fourth, use of natural gas and alternative fuels; fifth, reforestation and natural resource management policies; and sixth, international energy technology transfer. These programs would help to ensure sustained economic growth and development, achieve a secure domestic energy supply, and mitigate potential adverse global climate changes.

To many environmentalists and policymakers existing evidence on global warming is solid enough to begin taking steps to curb greenhouse gas emissions, while others have reserved judgment until more scientific data can be accumulated. Everyone agrees that there is a considerable amount of information on what we don't know, however, there is also a considerable amount of knowledge regarding what we do know: That a majority of the world's climatologists place the global average temperature rise in the next century at 1.5 to 4.5 degrees centigrade if current trends in the generation of greenhouse gases continue. Temperature changes of this magnitude may alter climatic patterns with subsequent effects on agriculture, forests, water supplies, ecosystems, endangered species, sea level, and coastlines.

In light of these alarming statistics, the National Energy Policy Act of 1990 is based on the premise that continued development of energy efficiency as well as more environmentally benign renewable energy resource technologies is a logical energy policy path to pursue regardless of the outcome of research efforts into global warming. The bill outlines prudent energy policy measures that can, and should be, taken in the near term to mitigate the effects of global warming.

Energy efficiency is a major component of this sensible domestic energy policy, not only to control emissions of CO_2 and trace gases caused by the combustion of fossil fuels, but to reduce the grave threat posed to our Nation's national security by unreliable fuel imports. The recent events in the Middle East dramatically illustrate the need for a strong national energy policy that recognizes not only the vital importance of our Nation's fossil fuel resources but also the importance of energy efficiency and renewable energy resources.

In addition, improvements in energy efficiency are consistent with long-term strategies for reducing the generation of carbon dioxide and other greenhouse gases. Efficiencies in the residential, commercial, industrial, and transportation sectors have risen dramatically in recent years. For example, the United States used approximately the same amount of primary energy in 1987, as it did in 1973, even though the economy grew almost 40 percent in real terms during that period.

Despite these gains in efficiencies, American energy needs continue to rise. In order to meet the challenge of increased energy demand, means must not only be found for making energy use more efficient, but for producing and utilizing energy in more environmentally benign ways. Efforts to strengthen funding and research into energy efficiency resource technologies and nonfossil energy resources and the encouragement of appropriate end-use are also important for several other reasons. Improvements in the efficiency of energy use may also lead to greater U.S. industrial competitiveness abroad, a decline in the cost of energy services at home thus freeing more capital for alternative investment in infrastructure or consumer purchases, reductions in the environmental impacts associated with the use of fossil fuels, and benefits for the Nation's energy security.

The legislation also increases funds available for research and development in order to help spur the advance and application of promising new energy technologies. Enhanced government/industry cooperation in research and development could cut costs and facilitate the dissemination of improved renewable energy technologies. The United States has the capability to make energy efficiency technology a viable domestic industry. If this technology can be taken to the rapidly industrializing countries of the Third World, our domestic industries can play a major role in helping these developing countries to restructure their economies. But we must not let this valuable opportunity pass us by. Already the Japanese and the Europeans stand poised to take advantage of the market opportunities that may exist for energy efficiency and renewable energy technologies.

As I have said many times before, energy efficiency must remain an important component of any national energy policy both to preserve domestic energy resources and to reduce emissions of CO_2 and trace gases which come from the burning of fossil fuels. As policymakers we must begin to seriously examine available strategies for minimizing future growth in greenhouse gas emissions while promoting sustainable economic growth.

Innovative policies are necessary not only to meet the domestic energy needs of this Nation, but to address the environmental and social problems posed by the greenhouse effect, acid rain, and the destruction of the ozone layer. As policymakers, we must also begin to examine seriously possible strategies for minimizing the rates of future greenhouse gas emissions while promoting sustained economic growth.

In many of the developing countries, efforts to explore the potential of renewable energy technologies as well as more efficient use of fossil fuel technologies have been stymied by a severe shortage of capital and political will.

The National Energy Policy Act of 1990 contains language to strengthen and broaden the mandate of the Committee on Renewable Energy, Commerce and Trade in order to help avert further environmental degradation and emissions of greenhouse gases and preserve valuable capital for use in developing infrastructure, et cetera.

Mr. President, in closing let me state that few people believe that the United States can end its dependence on fossil fuels overnight. However, the need for sound policies to address our Nation's energy policy has never been more apparent than it is today. Actions to mitigate global climate change will require initiative, risk, and perseverance. I'm pleased to stand before you today to urge your support for a bill which lays the foundation for a comprehensive national energy policy to tackle this enormous potential threat to our planet.

Mr. McCLURE. Mr. President, I rise in support of S. 324, as reported by the Committee on Energy and Natural Resources. Unlike the original bill, the National Energy Policy Act of 1990, as reported by the committee, recognizes that many scientific uncertainties surround our understanding of the causes and effects of global climate change which must be addressed. The substitute also recognizes that there are a number of policy initiatives which may contribute to abating and mitigating global climate change that should be pursued because they merit attention, in any case, on national energy policy grounds.

In November 1987, the Energy and Natural Resources Committee convened oversight hearings on the energy policy implications of what is now commonly referred to as the greenhouse effect or global climate change. Over the last 3 years the committee has held 18 days of oversight and legislative hearings related to this issue. In the process, the committee has compiled a record consisting of thousands of pages of testimony, statements, and documents.

Two conclusions emerge clearly from this effort: First, there is no question that mankind has significantly altered the composition of the atmosphere by the combustion of fossil fuels, by the clearing of forests to expand agricultural production, and by the production and use of synthetic chemicals such as chlorofluorocarbons. Over the past two centuries the amount of greenhouse gases in the atmosphere has increased sufficiently to raise questions regarding their effects on the temperature of the planet.

The second, and perhaps the most important, conclusion is that while scientific research is making progress in advancing our understanding of the relationship between greenhouse gases and global climate change, the state of scientific research remains imprecise and inadequate for the formulation of national and international policies.

Advancing our understanding in these areas is essential before the Congress and the administration can be expected to agree to an international framework convention on global climate change. Our global environment is under stress on many fronts. Global climate change is but one. As Dr. Robert M. White observed in the July 1990 Scientific American:

> What would be unwise is to lapse into apocalyptic thinking or ostrich-like denial. We like to believe ourselves far more sophisticated, more enlightened, than preceding generations. Until we can calmly and objectively approach our environmental challenges without promoting public hysteria and exciting shortsighted, self-interested reaction, we cannot claim that we are.

Mr. President, as I discussed in my additional views in the committee's report on S. 324, for too long the United States has lacked a long-term, comprehensive, and consensus-based national energy strategy that fosters not only the efficient use of available energy supplies, but also encourages domestic energy production consistent with the protection of environmental values. What is also missing is a national energy awareness.

The committee substitute fosters the formulation of a national energy strategy that reflects long-term concern for the provisions of adequate energy supplies at the least cost to our Nation, taking into consideration the overall economic, energy, social, and environmental costs. Among these concerns is the formulation of policies that address the adverse effects of global climate change.

However, there is a great need to improve scientific understanding of the natural and manmade sources of greenhouse gases and their relative contributions to the problem. Similarly, there is a need to understand the social, economic, energy, and environmental consequences of both global climate change and any actions proposed to mitigate or adapt to such changes.

As scientific knowledge is refined, our understanding of the causes of global climate change becomes more certain. At some point scientific knowledge will be sufficient for the purpose of formulating comprehensive policies to deal with global climate change. However, until there is some modicum of agreement on not only the timing and magnitude of the physical effects of global climate change, but also their ecological and economic consequences, perhaps we should resist calls for immediate and drastic unilateral reductions in the generation of carbon dioxide and other greenhouse gases.

Progress is being made through international cooperation and coordination. Policy statements already are mutually agreed concerning control targets for greenhouse gases and the negotiation timetable for formulation of an international convention on global climate change and associated control protocols. These ministerial declarations are contained in the November 1989 Noordwijk Declaration and the May 1990 Bergen Declaration.

Mr. President, I ask unanimous consent that excerpts from these declarations be printed in the RECORD following my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. McCLURE. It would be useful, Mr. President, to understand what the United States has agreed to at these international meetings. In summary:

The United States agreed to stabilize greenhouse gas emissions as soon as possible, while ensuring economic stability. The United States did not agree to stabilize greenhouse gas emissions by the year 2000 at present levels or any other specified year or level.

The United States agreed to conduct analyses of the potential to limit these emissions on specific timetables within the framework of the U.N. Intergovernmental Panel on Climate Change.

The United States agreed to initiate negotiations to agree to a framework convention to be concluded, if possible, by June 1992, and to hold the first negotiation session in the United States at least early next year. The United States did not agree to conduct simultaneous negotiations of the framework convention and protocols dealing with greenhouse gases and forestation, among other topics; rather the current U.S. position is that protocol negotiations should follow the negotiations of the framework convention.

The United States position is that the base for development of the framework convention and associated protocols should be the best scientific information, primarily the reports of the U.N. Intergovernmental Panel on Climate Change.

The United States agreed to commit to establishment of national strategies and/or targets and schedules to limit or reduce the generation of carbon dioxide and other greenhouse gases; however, the United States did not agree to establish a national strategy for greenhouse gas emissions control before the start of negotiations.

Mr. President, S. 324 as reported by the Energy and Natural Resources Committee supports these international negotiations by addressing the gaps in our knowledge of the causes and consequences of global climate change. Both the goals and purposes of the legislation emphasize the need to identify, assess, and investigate the potential social, economic, energy, and environmental consequences of global climate change so as to enable us to understand the consequences of any pro-

posed policies for mitigating or adapting to global climate change.

However, Mr. President, there is a need for international cooperation and coordination if our quest for the necessary knowledge to formulate cost-effective technologies to deal with the potential adverse effects of global climate change is to be effective. Any change in the global climate will affect all nations, and it will affect each one differently. To fully understand the differences in how various countries will be affected will require additional research on a wide range of climate issues including historic natural changes in the environment, the ocean-atmosphere relationship, and the influence of clouds in the global climate equation.

International cooperation and coordination is essential to the success of this effort. And one goal of S. 324 is to secure the commitment of the community of nations to a framework convention on global climate change. Such an international collaboration will produce in relatively short order the quality information so desperately needed by policymakers during the current worldwide debate and is relatively inexpensive compared to the costs associated with many of the current proposals being made without knowledge of their social, economic, energy, and environmental consequences.

In this regard the committee substitute contains several scientific and energy initiatives that will advance our understanding of the causes and consequences of global climate change. However, the measure also contains energy initiatives for which there is general support and they are accompanied by the added benefit that they contribute to stabilization of the generation of greenhouse gases. Among these are research and development initiatives in the areas of energy conservation, advanced vehicle fuel and engine systems, natural gas and other alternative fuels, fusion energy, and hydrogen.

The Department of Energy can serve a unique role both in advancing our understanding of the causes and consequences of global climate change and in supporting energy initiatives that reflect national enrivonmental objectives.

There still is considerable debate going on in the scientific community among climatologists and geophysicists regarding the timing and magnitude of global climate change. This disagreement even extends to the relative roles of various greenhouse gases, such as carbon dioxide and methane, to name two.

The acrimonious nature of the debate within the scientific community is not in our mutual interest and signicantly detracts from the issue at hand—the identification of any adverse consequences of global climate change and the formulation of sensible policies to deal with them. Clearly there is need for an aggressive research program on the causes and the timing, magnitude, and regional consequences of these changes.

Let us assume for the sake of argument that the signs of global climate change are clear and the change is going to be accompanied by adverse consequences. If we are going to be successful in providing viable alternatives to our current energy policies then we must be receptive to new ideas, new developments, new ways of viewing circumstances, and new ways of achieving energy and environmental objectives.

As we enter the 21st century, advanced reactor development is crucial to the Nation and, possibly, to our entire globe. Greater use of nuclear power can contribute significantly to the mitigation or abatement of the generation of greenhouse gases. But the fact remains, as it exists today the future of nuclear power is not assured.

Failure to address this situation in the legislation approved by the committee is inconceivable to me. The measure addresses global climate change due to the generation of greenhouse gases, but it ignores the one technology most readily available to provide electricity without the concomitant generation of CO_2.

We must look ahead. We must anticipate the future. Nuclear power is a prime example of what happens when conditions change and our technology stays the same. Nuclear technologies that were good enough to lead the world when they were chosen in the 1950's are not good enough now, or for the 21st century. What is needed is advanced nuclear reactor technologies for the generation of electric power that, compared to currently operating technologies, offer the potential to advance the passive safety features, reliability, and ease of construction of nuclear reactors. An added benefit of such technologies is that they reduce the generation of carbon dioxide and other greenhouse gases.

As reported by the committee, S. 324, the National Energy Act of 1990, will advance our knowledge of the timing, magnitude, and regional variations in global climate change. The measure also will advance our understanding of the social, economic, energy, and enrivonmental implications of global climate change. But more importantly, the legislation will advance our understanding of the social, economic, energy, and environmental consequences of proposed policy initiatives. While these various implications of global climate change are potentially significant, so are the consequences of any proposed policy initiatives to stabilize or reduce the generation of greenhouse gases.

Mr. President, for the reasons stated here and in my additional views, I urge adoption of the committee-reported substitute for S. 324 as introduced.

ADDITIONAL VIEWS

For too long the United States has lacked a long-term, comprehensive, and consensus-based national energy strategy that fosters not only the efficient use of available energy supplies, but also encourages domestic energy production consistent with the protection of environmental values. What is missing is a national energy awareness.

The committee's reported substitute, unlike the original bill, recognizes that many scientific uncertainties exist which must be addressed. The substitute also recognizes that there are a number of policy initiatives which may contribute to abating and mitigating global climate change that should be pursued because they merit attention in any case—policies such as energy conservation. The committee substitute fosters the formulation of a national energy strategy that reflects long-term concern for the provision of adequate energy supplies at the least-cost to our Nation, taking into consideration the overall economic, energy, social and environmental costs to the Nation.

I wholeheartedly support these aspects of the committee substitute. A major weakness of the measure, however, is the lack of comparable attention to the advanced nuclear power option as a critical element of national energy and environmental policies.

OVERVIEW

Any change in the global climate not only will affect all nations but it will affect them differently. And one goal of S. 324 is to secure the commitment of the community of nations to a framework convention on global climate change.

If policies to deal with the potential adverse effects of global climate change are to be effective, there is a need for international cooperation and coordination. In response to this concern, the United States recently joined with over 70 other nations in supporting stabilization of the generation of carbon dioxide.

In support of this international effort, additional research is needed on a wide range of climate issues, including historic natural changes in the environment, the ocean-atmosphere relationship, and the influence of clouds in the global climate equation. Such an undertaking will produce in relatively short order the quality information so desperately needed by policy-makers during the current world-wide debate and is relatively inexpensive compared to the costs associated with many of the current proposals being made without knowledge of their effectiveness.

Concurrently, aggressive energy conservation and reforestation programs in the United States already are playing a leading role in the reduction of the generation of greenhouse gases. The Federal Government is committed to total phaseout of CFC's by the year 2000. Anticipated Clean Air Act amendments and improved automobile fuel efficiency will further reduce greenhouse gases.

In support of these parallel efforts, the committee substitute contains several scientific and energy initiatives that will advance our understanding of the causes and consequences of global climate change. However, the measure also contains energy initiatives for which there is general support and they are accompanied by the added benefit that they contribute to stabilization of the generation of greenhouse gases. Among these are research and development initiatives in the areas of energy conservation, advanced vehicle fuel and engine systems, natural gas and other alternative fuels, fusion energy, and hydrogen.

Several of these provisions deserve particular mention both for what they do, and what they do not do. However, noticeably absent from the measure are initiatives in the area of advanced nuclear reactor development.

But before proceeding with that discussion, the following observations are warranted: The Department of Energy can serve a unique role both in advancing our understanding of the causes and consequences of global climate change and in supporting energy initiatives consistent with national environmental objectives. The committee substitute attempts to better define this role.

GOALS

The findings in S. 324 recognize that an understanding of the scientific causes and economic effects of global climate change is necessary for the formulation of effective policies.

Before the Congress can formulate policies that will mitigate or adapt to the adverse effects of global climate change, there is a great need to improve scientific understanding of the natural and manmade sources of greenhouse gases and their relative contributions to the problem. Similarly, there is a need to understand the consequences of global climate change as well as the consequences of any policies for mitigating or adapting to global climate change.

Until there is some modicum of agreement on not only the timing and magnitude of the physical effects of global climate change, but also their ecological and economic consequences, perhaps we should resist calls for immediate and drastic unilateral reductions in the generation of carbon dioxide.

SCIENTIFIC UNCERTAINTIES

Scientific research is making significant progress in our understanding of both the scientific causes and economic consequences of global climate change. Testifying before the Committee on the state of current scientific knowledge on the causes of global climate change, Dr. D. Allan Bromley, the assistant to the President for Science and Technology, observed, "few scientists would argue with the contention that if we continue to load the atmosphere with greenhouse gases, we will eventually experience some degree of warming."

Dr. Bromley also referred in testimony to several recent studies suggesting that changes in global climate and their potential impacts may be more moderate than previous predictions. Within the last 6 months, for example:

A National Academy of Sciences panel estimated in January 1990, on the basis of current climate change models, that predicted global warming over the next fifty years is closer to 2 degrees Celsius, rather than the previous range of 1.5 to 4.5 degrees Celsius.

The American Geophysical Union in December 1989 revised earlier estimates of rise in sea level by the year 2100 from the previous estimate of between 20 and 120 inches to a new estimate of between 0 and 30 inches.

Following recent introduction by United Kingdom scientists of a better representation of cloud processes into their global climate change model, the model now predicts that a doubling of current CO_2 atmospheric levels will result in a warming of 1.9 degrees Celsius, down from the previous estimate of 5.2 degrees Celsius.

Following inclusion of more realistic ocean simulations into its global climate model, NOAA reported in January 1990 that even with a doubling of current CO_2 levels there would not be warming in the Southern Hemisphere.

As scientific knowledge is refined, our understanding of the causes of global climate change becomes more certain. At some point scientific knowledge will be sufficient for the purpose of formulating comprehensive policies to deal with global climate change.

However, at the present time there still is considerable debate going on in the scientific community among climatologists and geophysicists regarding the timing and magnitude of global climate change. This disagreement even extends to the relative roles of various greenhouse gases, such as carbon dioxide and methane, to name a few.

The acrimonious nature of the debate is not in our mutual interest and significantly detracts from the issue at hand—the identification of any adverse consequences of global climate change and the formulation of sensible policies to deal with them.

If we are to effectively exercise our responsibilities as policy makers, we must fully understand the basis for this disagreement, which is reflected in the following statement:

Current forecasts of the man-made greenhouse effect do not appear to be sufficiently accurate to be used as a basis for sound national policy decisions.

This view was recently expressed by three notable scientists: Frederick Seitz, past president of the NAS; Robert Jastrow, founder and former Director of the NASA's Goddard Institute for Space Studies; and William Nierenberg, director emeritus of the Scripps Institution of Oceanography. "Scientific Perspectives on the Greenhouse Problem," George C. Marshall Institute, Washington, 1989. These distinguished scientists also wrote that—

In fact it is possible that a combination of natural and solar variability is the cause of the entire temperature increase—about 0.5 degrees centigrade—observed since 1890.

If this review of the science is correct then human activity may have little, if any, impact on the earth's atmosphere and/or global temperatures in the last century. The words of Doctors Seitz, Jastrow, and Nierenberg were penned two summers ago as Washington, DC, and much of the rest of the Nation sweltered through a record-setting summer of heat, drought, and natural disasters. Nevertheless, perhaps we should pay close attention to these authors' advice. These men do not dismiss the greenhouse effect or its potential adverse impacts; in fact, they judge the warming of the earth in the last 100 years to be a real phenomenon. However, they do suggest that any policies we adopt be reasonable and carefully thought out.

Given this level of uncertainty in predictions about the timing and magnitude of global climate change, as policy makers we must proceed with restraint to ensure that we do not overreact while, at the same time, recognize that mankind has become a more important agent of environmental change than nature.

ECONOMIC AND ECOLOGICAL UNCERTAINTIES

Testifying before the committee on the economic and ecological uncertainties associated with the consequences of global climate change, Dr. Bromley observed that—

It is also important to recognize that developing an improved understanding of geophysical climate processes is only the first step in developing appropriate policies. Estimates of the human and social consequences stemming from actions that might be taken to curtail the generation of greenhouse gases, as well as those stemming from predictions on future warming and ancillary changes associated with it, must then be developed and used as the basis for policy formulation.

As Frank Press, the distinguished president of the National Academy of Sciences (NAS), observed at the June 1989 Paris symposium on "Planet Earth":

Substantial reductions of carbon dioxide emissions—will require a change in the economy of the world, at costs ranging from hundreds of billions to perhaps trillions of dollars, and may not be technically feasible over the next 40 years.

In view of the costs associated just with addressing carbon dioxide as one cause of global temperature increases, Frank Press recommended against making "such large investments at this time."

The economically wealthy nations of the world have the resiliency and resources to deal with the consequences of global climate change. But the economic development of the rest of the world is intimately bound to our success in the quest to find cost-effective solutions to such global issues as climate change.

RESEARCH NEEDS

Clearly there is need for an aggressive research program on the causes and the timing, magnitude, and regional consequences of global climate change. Such an investment is needed on a wide-range of climate issues, including historic natural changes in the environment, the ocean-atmosphere relationship, and the influence of clouds in the global climate equation.

Through such an investment, the government can accelerate the pace of climate research to yield the information in years rather than decades, so that timely action can be taken if needed. Such an approach is comparatively inexpensive compared to the costs associated with proposed environmental controls.

In the area of energy policy, we can pursue initiatives to conserve energy and water resources, to further research and development of promising alternative energy sources, and to develop programs to spur reforestation and slow deforestation. These initiatives also include continued support for the development and deployment of clean coal technologies which offer the best opportunity to reduce carbon dioxide emissions both here and abroad, while improving the efficiency of coal-fired electricity generation.

These policies should be pursued regardless of the outcome of current research efforts on global climate change. While this research is being undertaken, we can pursue more aggressively measures to reduce the greenhouse gases where those measures also serve other energy policy objectives.

NUCLEAR POWER

Let us assume for the sake of argument that the signs of global climate change are clear and the change is going to be accomplished by adverse consequences. If we are going to be successful viable alternatives to our current energy policies then we must be receptive to new ideas, new development, new ways of viewing circumstances, and new ways of achieving energy and environmental objectives.

As we enter the 21st century, advanced reactor development is crucial to the Nation and, possibly, to our entire globe. Greater use of nuclear power can contribute significantly to the mitigation or abatement of the generation of greenhouse gases. But the fact remains, as it exists today, the future of nuclear power is not assured.

Failure to address this situation in the legislation approved by the Committee is inconceivable to me. The measure addresses global climate change due to the generation of greenhouse gases, but it ignores the one technology most readily available to provide electricity without the concomitant generation of CO_2.

If the scientific community is correct about the causes of climate change, and we are serious about the stabilization or reduction of the generation of CO_2, then we have to be serious about finding the means to generate electricity needed for the prosperity of this world without the accompanying generation of greenhouse gases. I do not know how the Senate can rationally consider legislation to deal with global climate change without concurrently addressing the one technology that must be an indispensable component in any long-term strategy to deal with the stablization or reduction of the generation of greenhouse gases; namely, advanced nuclear reactors.

To do otherwise is to transform this legislation into an exercise in symbolism—without a conscience and without any realistic hope of coming to grips with the issue. In every other area we have gone beyond studies to propose some specific policy initiative. We would do the same for nuclear technology.

For example, one reactor type that could have a significant impact on the abatement of greenhouse gas effects in a sustained way is the breeder reactor. The breeder reactor's utilization of uranium is much more efficient than that of other reactor technologies, by a factor of 70 times or so. Use of our uranium by this means could theoretically produce enough energy to displace all fossil fuel consumption for at least 1,000 years. Such forms of nuclear power could play a significant role in any permanent solution to global climate change.

If nuclear energy is to fuel mankind's energy needs, and maintain the present atmospheric environment, that is to say provide an energy source for the millennia that need not pollute at all, breeding of nuclear fuel is a fundamental requirement. However, the whole question of the closing of the fuel cycle and breeding are inextricably linked.

A closed fuel cycle is needed for breeding to really be useful. Spent fuel must be processed, the accumulated fission products removed and the cladding material renewed. By this means, the fuel can be used over and over again.

A closed fuel cycle opens new possibilities for dealing with nuclear waste. Unlike conventional nuclear reactors, in a breeder reactor, all the actinides are effectively fuels, even the minor ones, so they can be recycled and consumed in the reactor, producing power and adding to the amount of energy that a given uranium resource can produce.

When reprocessing is tied to the breeder reactor, the nuclear wastes no longer have to be just whatever the reactor happened to leave over. Instead, the fission product wastes created during reactor operation can be separated from the actinides such as uranium, plutonium, and others created in smaller amounts, such as neptunium and americium. And the actinides and unspent uranium can be recycled as fuels.

But of more interest is what this does to the waste that is left over. In addition to being one-tenth the volume, this nuclear waste contains only fission products, and fission products die away relatively quickly compared to the time scale for decay of today's typical nuclear reactor wastes. Thus, in 200 years—not a million years, as is the case today—the carcinogenic risk drops below that of the original mined uranium ore. This difference significantly changes the character of the debate on this issue. The everlasting character of today's nuclear wastes is no longer an issue in view of breeder reactors that recycle actinides.

We must look ahead. We must anticipate the future. Nuclear power is a prime example of what happens when conditions change and our technology stays the same. Nuclear technologies that were good enough to lead the world when they were chosen in the 1950's, are not good enough now or for the 21st century. What is needed is advanced nuclear reactor technologies for the generation of electric power that, compared to currently operating technologies, offer the potential to advance the passive safety features, reliability, and ease of construction of nuclear reactors. An added benefit of such technologies is that they reduce the generation of carbon dioxide and other greenhouse gases.

CONCLUSION

In November 1987, the Energy and Natural Resources Committee convened oversight hearings on the energy policy implications of what is now commonly referred to as the "Greenhouse Effect" or "Global Climate Change". Over the last 3 years the committee has held 18 days of oversight and legislative hearings related to this issue. In the process, the

committee has compiled a record consisting of thousands of pages of testimony, statements, and documents.

Two conclusions emerge clearly from this effort: First, there is no question that mankind has significantly altered the composition of the atmosphere by the combustion of fossil fuels, by the clearing of forests to expand agricultural production, and by the production and use of synthetic chemicals such as chlorofluorocarbons. Over the past two centuries the amount of greenhouse gases in the atmosphere has increased sufficiently to raise questions regarding their effects on the temperature of the planet.

Second, and perhaps the most important conclusion, is that while scientific research is making progress in advancing our understanding of the relationship between greenhouse gases and global climate change, the state of scientific research remains imprecise and inadequate for the formulation of national and international policies.

As reported by the committee, S. 324, the National Energy Act of 1990, will advance our knowledge of the timing, magnitude, and regional variations in global climate change. The measure also will advance our understanding of the social, economic, energy and environmental implications of global climate change. But more importantly, the legislation will advance our understanding of the social, economic, energy, and environmental consequences of proposed policy initiatives. While these various implications of global climate change are potentially significant, so are the consequences of any proposed policy to stabilize or reduce the generation of greenhouse gases.

Advancing our understanding in these areas is essential before the Congress and the Administration can be expected to agree to an international framework convention on global climate change. Our global environment is under stress on many fronts. Global climate change is but one. As Dr. Robert M. White observed in the July 1990 Scientifc American:

What would be unwise is to lapse into apocalyptic thinking or ostrich-like denial. We like to believe ourselves far more sophisticated, more enlightened, than preceding generations. Until we can calmly and objectively approach our environmental challenges without promoting public hysteria and exciting shortsighted, self-interested reaction, we cannot claim that we are.

EXHIBIT 1

[Attachment 1]

EXCERPTS FROM THE NOORDWIJK DECLARATION ON CLIMATE CHANGE

III. SUSTAINABLE ENERGY USE

14. Taking into consideration that the ECE region presently accounts for about 70% of global primary energy and fossil fuel use, we assume a major responsibility to limit or reduce greenhouse gases and other emissions and to lead a global effort to address this matter by promoting energy efficiency, energy conservation and the use of environmentally sound and renewable energy sources.

(b) To reaffirm our continued support for the IPCC as the principal forum for scientific assessment related to climate change, the potential impacts of such changes, and the options available for preventing or adapting to changes in the climate of the earth. The process of the IPCC should be supported by the investigation of the feasibility of achieving targets to limit or reduce CO_2 and other greenhouse gas emissions including e.g. a 20% reduction of CO_2 emission level by the year 2005 as recommended by the Scientific World Conference on the Changing Atmosphere in Toronto 1988.

(c) To pledge our full support for the early completion of the work on a framework convention on climate change and the development of protocols dealing with, inter alia, greenhouse gases and forestation, with a view to signing not later than at the 1992 Conference on Environment and Development. The development of the convention and its associated protocols should be based on the best scientific evidence available, provided primarily by the report of the IPCC, and drawing upon the Toronto Conference recommendations, the Noordwijk 1989 declaration, and the report of the Bergen Conference on Sustainable Development, Science and Policy.

(d) To recognize the need to stabilize, while ensuring stable development of the world economy, CO_2 emissions and emissions of other greenhouse gases not controlled by the Montreal Protocol. The industrialized nations have agreed to Noordwijk that such stabilization should be achieved by them as soon as possible, at levels to be considered by the IPCC and the Second World Climate Conference. To fulfil this need, and

Noting with appreciation that some countries have already committed themselves in advance to stabilize CO_2 emissions at present levels or to reduce them by the year 2000;

Recognizing that countries with, [as yet, relatively low] energy requirements, which can reasonably be expected to grow in step with their development, may need strategies or targets which can accommodate that development;

Also recognizing that strategies or targets could be based, for example, on total emission levels, per capita emissions, climate conditions or other equitable considerations.

We urge all ECE countries to take action now, and we agree to commit to establish national strategies and/or targets and schedules following the report of the IPCC and no later than the start of the negotiations of a framework convention on climate change to limit or reduce CO_2 emissions and other greenhouse gas emissions as much as possible and to stabilize them. In the view of most ECE countries, such stabilization at the latest by the year 2000 and at present level must be the first step.

[Attachment 2]

EXCERPTS FROM BERGEN CONFERENCE SUSTAINABLE DEVELOPMENT MAY 8-16, 1990

(7) Climate change is a common concern of mankind. All countries should now, according to their capabilities and the means at their disposal, initiate actions and develop and maintain effective and operational strategies to control, limit or reduce emissions of greenhouse gases. As a first step, they should take those actions which are beneficial in their own right. Industrialized countries, in view of their contribution to the increase of greenhouse gas concentrations, and in view of their capabilities, have specific responsibilities of different kinds: (i) they should set an example by initiating domestic action, (ii) they should support, financially and otherwise, the action by countries to which the protection of the atmosphere and adjustment to climate change would prove to be an excessive burden and (iii) they should reduce emissions of greenhouse gases, also taking into account the need of the developing countries to have sustainable development. Developing countries establishing industrial facilities for the first time have a unique opportunity to include up-to-date technologies for controlling the emissions of greenhouse gases.

(8) For the long term safeguarding of our planet and maintaining its ecological balance, joint effort and action should aim at limiting or reducing emissions and increasing sinks for greenhouse gases to a level consistent with the natural capacity of the planet. Such a level should be reached within a time frame sufficient to allow ecosystems to adapt naturally to climate change, to ensure that food production is not threatened and permit economic activity to develop in a sustainable and environmentally sound manner. Stabilizing the atmospheric concentrations of greenhouse gases is an imperative goal. The IPCC will need to report on the best scientific knowledge as to the options for containing climate change within tolerable limits. Some currently available estimates indicate that this could require a reduction of global antropogenic greenhouse gas emissions by more than 50 per cent. These estimates should be the subject of further examination by the IPCC.

(9) While striving to preserve the global environment, it is important to work at the same time to ensure stable development of the world economy, in line with the concept of "sustainable development". Effort and action should include: (i) the phasing-out of CFCs controlled by the Montreal Protocol, which are responsible for about one-fifth of projected global warming, by national action and international co-operation in the context of the Montreal Protocol. This includes financial assistance and transfer of technology and information. In this connection, it is important that the substitutes for CFCs also should not contribute significantly to the global warming problem, (ii) action especially by industrialized countries to limit or reduce CO_2-emissions, (iii) action to reduce deforestation, prevent soil erosion and desertification; increase afforestation, and sound forest management in the temperate as well as the tropical zones, (iv) action to limit or reduce the emissions of all greenhouse gases other than CO_2 and their precursors and to increase the sinks for such substances and (v) intensified efforts for technological breakthroughs, for example with regards to renewable energy and removal and re-utilization of CO_2.

(10) The conference recommends that appropriate fora, including the IPCC, consider the necessity and efficiency of the introduction of the concept of CO_2-equivalence. This would provide a single parameter to describe the radiative effects of the various greenhouse gases, including CFCs. Such a concept, after taking into account other environmental considerations, creates a basis for negotiations in response measures for different greenhouse gases in the most cost-effective manner. The Conference further recommends the development of common defi-

nitions and the harmonization of methods to calculate CO_2-emissions.

Given this stage of development of the issue of climate change, the Conference more specifically:

CARBON DIOXIDE (CO_2)

(14) Urges all countries to take steps individually and collectively, to promote better energy conservation and efficiency and the use of environmentally sound energy sources, practices and technologies with no or minimum environmentally damaging characteristics. These policies should be reflected in short and long term energy policies and be pursued by all relevant sectors, including industry and transport, taking into account the need of developing countries for an adaptation period in order to enable them to meet their technological and other developmental needs. One direct means of allowing markets to incorporate the risk of climate change could be to ensure that the price of all fuels reflect their full social, long run marginal and environmental costs and benefits.

(15) Agrees that it is timely to investigate quantitative emission targets to limit or reduce CO_2 emissions and encourages the IPCC, in their interim report due in 1990, to include an analysis of target options.

(16) Recognizes the need to stabilize, while ensuring stable development of the world economy, CO_2 emissions and emissions of other greenhouse gases not controlled by the Montreal Protocol. Industrialized nations agree that such stabilization should be achieved by them as soon as possible, at levels to be considered by the IPCC and the Second World Climate Conference of November 1990. In the view of many industrialized nations such stabilization of CO_2 emissions should be achieved as a first step at the latest by the year 2000.

Urges all industrialized countries to support the process of IPCC through the investigation of the feasibility of achieving targets to limit or reduce CO_2 emissions including e.g. a 20 percent reduction of CO_2 emission levels by the year 2005 as recommended by the scientific World Conference on the Changing Atmosphere in Toronto 1988.

Urges all industrialized countries to intensify their efforts in this respect, while ensuring sustainable development and taking into account the specific circumstances of individual countries.

(17) Agrees that industrialized countries with, as yet, relatively low energy requirements, which can reasonably be expected to grow in step with their development, may have targets that accommodate that development.

(18) Calls on the IPCC to present the analysis and conclusions referred to above to the Second World Climate Conference in November 1990.

(19) Agrees that developing countries endeavour to meet future targets for CO_2-emissions and sinks, with due regard to their development requirements and within the limits of their financial and technical capabilities. International co-operation, whenever available, would be a contributing factor for greater action. New processes or industries to be introduced should, as far as possible, incorporate technologies which are more energy-efficient and produce less pollution than present technologies.

(20) Agrees that developing countries will need to be assisted financially and technically, including assistance with training, i.e. by strengthening relevant mechanisms to ensure that they will be in a position to manage, develop, and conserve their forest resources in a sustainable and environmentally sound manner. This will also contribute to combating erosion and desertification. Recognition by the market of the total value of forests, including non-wood values, is a precondition for developing countries' being able to successfully use such financial and technical assistance for sustainable forest management.

CHLOROFLUOROCARBONS (CFC'S)

(22) Welcomes the commitment of the industrialized countries to amend the Montreal Protocol and to phase out the production and consumption of controlled chlorofluorocarbons by the year 2000, and of other controlled ozone depleting substances as soon as feasible. Urges all countries to become Parties to the Vienna Convention for the Protection of the Ozone Layer and to the Montreal Protocol. To facilitate this broad participation suitable amendments of the Montreal Protocol should be considered urgently by the Parties to the Protocol.

Urges industrialized countries to use financial and other means to assist developing countries in phasing out their production and consumption of controlled substances as soon as possible, by providing them with sufficient means to enable them to meet their target date. The development of alternative technologies and products in developing countries should be promoted.

OTHER GREENHOUSE GASES

(23) Recommends that the development and implementation of specific means of limiting the atmospheric concentrations of greenhouse gases other than CO_2 and CFCs should be energetically pursued, taking into consideration the special situation of developing countries.

CLIMATE CHANGE CONVENTION

(29) 1. Urges all countries to join and intensify the ongoing work within UNEP and WMO through the IPCC with respect to the compilation of elements for a framework convention on climate change so that negotiations upon it can start as soon as possible after the adoption of the interim report of the IPCC.

2. Recommends that such convention will be framed in such a way as to gain the adherence of the largest possible number and most suitably balanced spread of countries.

3. Agrees that to this end the framework convention and associated protocols should commit the parties inter alia to:

Enhancement of research and systematic observation of climate, aimed at detecting and monitoring climate variations and change;

Action to deal with greenhouse gas emissions and the effects of global warming;

Address the particular financial needs of the developing countries in the access to and transfer of technology; and

Strengthen sustainable forest management.

4. Agrees further that in developing the framework convention on climate change special attention should be given to ensuring that provision is made for appropriate decision making procedures and powers.

5. Urges all involved or to be involved in the negotiations to do their utmost to conclude these negotiations to ensure adoption of the convention as early as 1991 if possible and no later than at the Conference of the United Nations on Environment and Development in 1992.

6. Considers that in the preparation of the framework convention and protocols the relevant aspects of the Vienna Convention on the Protection of the Ozone Layer should be taken into account, as well as innovative approaches as may be required by the complex character of the problem.

(30) Recommends that this declaration and the supporting papers be conveyed to the IPCC at the conclusion of this Conference for further consideration and action.

EXCERPTS FROM THE PRESIDENT'S APRIL WHITE HOUSE CONFERENCE

(Remarks by the President in the Closing Address to the White House Conference on Science and Economics Research Related to Global Change)

To those who suggest we're only trying to balance economic growth and environmental protection, I say they miss the point. We are calling for an early new way of thinking to achieve both while compromising neither. By applying the power of the marketplace in the service of the environment.

And we cannot allow a question like climate change to be characterized as a debate between economists versus environmentalists. To say that this issue has sides is about as productive as saying that the Earth is flat. It may simplify things, but it just doesn't do justice to the facts or to our future. The truth is, strong economies allow nations to fulfill the obligations of stewardship. And environmental stewardship is crucial to sustaining strong economies. If we lose sight of the forest for the trees we risk losing both.

But above all, the climate change debate is not about research versus action, for we've never considered research a substitute for action. Over the last two days, you've heard, formally and informally, that the United States is already taking action to stabilize and reduce emissions through our clean air legislation, our use of market-based incentives to control pollution, our search for alternative energy sources, our emphasis on energy efficiency, our reforestation initiatives, and our technical assistance programs to developing nations.

These policies were developed to address a broad range of environmental concerns, in particular our phaseout of CFCs, the impact of our Clean Air Act on emissions, our tree-planting initiative, and other strategies will produce reductions in greenhouse gas emissions that will reach 15 percent in 10 years—and considerably more later on.

We're also making a leading investment in climate change research—absolutely essential because it will tell us what to do next. But what bears emphasis is that we are committed to domestic and international policies that are environmentally aggressive, effective, and efficient.

And we are deeply committed to an international partnership, through the IPCC process. We look forward to its interim assessment. And we would encourage a framework convention a part of a comprehensive approach to address the system, sources, and sinks as a whole if a decision is made that environmental action is needed to reduce net emissions. We hope to provide a venue for the first negotiating sessions here in the United States.

And finally, here in conference working groups, we've offered four new ideas—a charter for cooperation in science and economic research related to global change; possible creation of international institutes for research on the science and economics or global change; data and information transfers through a global change communications network; and a statement of princi-

ples for implementing international cooperation in scientific and economic research related to global change.

[Attachment 4]

BERGEN MINISTERIAL DECLARATION ON SUSTAINABLE DEVELOPMENT IN THE ECE REGION

Sustainable development meets the needs of the present without compromising the ability of the future generations to meet their own needs.

1. We, the Ministers from 34 countries in the ECE region and the Commissioner for the Environment of the European Community, met at Bergen, Norway, from 14 to 16 May 1990, at the Regional Conference on "Action for a Common Future" organized by the Government of Norway in co-operation with the United Nations Economic Commission for Europe (ECE).

2. Our meeting, the second on an interministerial basis at the regional level, is part of the international follow-up for the report of the World Commission on Environment and Development. Our meeting is also a demonstration of our intention to take an active and constructive role in the preparations for the 1992 UN Conference on Environment and Development.

3. We have had the benefit of a preparatory process which included as full partners the representatives of a wide cross-section of groups in our society: industry, scientists, trade unions, voluntary environmental organizations and youth. Representatives of these groups have together with governments prepared the Bergen Agenda for Action of which we take note.

4. That process included four workshops focused on the following four themes: the Economics of Sustainability; Sustainable Energy Use; Sustainable Industrial Activities; and Awareness Raising and Public Participation.

I. COMMON CHALLENGES

5. Today destruction of the biosphere and its ecosystems, environmental degradation, population pressures, depleting of resources, and extinction of species threaten the quality of human life as well as human health and many of earth's biological systems. Unsustainable patterns of production and consumption, particularly in industrialized countries, are at the root of numerous environmental problems, notably foreclosing options for future generations by depletion of the resource base.

6. The challenge of sustainable development of humanity depends on providing sustainability of the biosphere and its ecosystems, and also requires action by national governments, as well as collaborative action by national governments and international and non-governmental organizations. Within the concept of sustainability, common objectives and concrete measures must be defined. Since sustainability cannot simply be achieved by action only at the level of individual ecosystems, economic sectors and geographic regions, a combination of national assessment and response and international co-ordination and cooperation is needed.

7. In order to achieve sustainable development, policies must be based on the precautionary principle. Environmental measures must anticipate, prevent and attack the causes of environmental degradation. Where there are threats of serious or irreversible damage, lack of full scientific certainty should not be used as a reason for postponing measures to prevent environmental degradation.

8. Environmental problems require greater and more systematic use of science and scientific knowledge. Environmental science activities must therefore be strengthened nationally and internationally. We invite the international science community to contribute toward the advancement of sustainable development policies and programmes. Scientific analyses and forecasts and especially needed to help identify longer term policy options.

9. The evolving political and economic processes in Europe will provide new opportunities for member countries of ECE to cooperate more actively in implementing the provisions of the Helsinki Final Act of the Conference on Security and Co-operation in Europe (CSCE) and in particular the conclusions and recommendations of the concluding documents of the Vienna Meeting of the CSCE (1989), of the CSCE Meeting on the Protection of the Environment, held in 1989 in Sofia and of the Bonn Conference on Economic Co-operation in Europe (1990) as well as the ECE Regional Strategy for Environmental Protection and Rational Use of Natural Resources.

10. We believe that the attainment of sustainable development on the national, regional and global levels requires fundamental changes in human values toward the environment and in patterns of behaviour and consumption as well as the establishment of necessary democratic institutions and processes.

11. Member countries of the ECE and the European Community are fully cognizant of their special responsibilities in relation to global environmental problems and are ready to take a lead in the effort toward solving those problems and to assist developing countries in their environmental and developmental efforts.

12. We have agreed to the following policies, objectives, principles and commitments in support of sustainable development nationally, regionally and globally.

II. THE ECONOMICS OF SUSTAINABILITY

13. Taking into account the symbiotic nature of economy and the environment:

(a) To integrate environmental considerations with economic and sectoral planning and policies and to encourage all relevant institutions to be accountable for evaluating environmental effects of their programmes and policies.

(b) To develop sound national indicators for sustainable development to be taken account of in economic policy making. One of the ways to achieve this is to supplement national accounting systems in order to reflect as fully as possible the importance of natural resources as depletable or renewable economic assets. To this end we call upon the United Nations to accelerate its work on natural resource accounting and pollution control expenditures as production costs, and the Organization for Economic Co-operation and Development (OECD) to intensify its work on economic indicators. To investigate the possibilities of changing the present forms of resource accounting in investment analysis in order to give greater emphasis to long term sustainability compared with short term considerations.

(c) To make more extensive use of economic instruments in conjunction with a balanced mix of regulatory approaches in order to increase efficiency of environmental protection, of the use of natural resources and of energy consumption. Such instruments may include:

Taxes on environmentally damaging activities and products or energy inefficient products,

Reduction or, wherever possible, elimination of subsidies to resource-intensive or environmentally damaging activities,

Other measures such as emission charges and fees, deposit refund systems and tradeable permits and fiscal incentives.

Such actions would make prices, particularly those related to energy, reflect environmental costs and benefits more fully, and thus send market signals and provide incentives. They would modify production and consumption patterns and encourage use of environmentally sound and energy efficient technologies.

(d) To work towards a coordinated approach to the use of economic instruments which would be facilitated by guidelines and studies by international organizations, particularly the OECD, ECE and EC. In this context, we welcome the OECD's work on preparing principles and international guidelines which will be presented to its meeting of Environment Ministers in 1991.

(e) To support, in addition to present development assistance, programmes to increase the flow of capital and environmentally sound technology to developing and East European countries to assist the efforts by the receiving countries on high priority resource and environmental management projects and to meet their international obligations to protect the global environment. In particular it will be necessary to identify new ways and means of providing such resources to developing countries. We welcome the decision of the Development Committee of the World Bank and the International Monetary Fund on May 8, 1990, which urges the Bank, in close collabortion with UNEP and UNDP and other interested parties, to proceed expeditiously with the development of proposals for a pilot global environmental mechanism.

(f) To urge donors and multilateral agencies to take into account the relationship between debt service burdens and the ability of countries both within and outside the ECE to carry out measures to ensure the protection of the environment. We will also urge bilateral and multilateral partners and financial institutions to take full account of environmental considerations and opportunities for natual resource savings in their project and structural adjustment lending operations and debt-for-nature swaps, so that these operate in accordance with the principles of sustainable development.

(g) To address the relationship between population pressures and sustainable development. ECE donors should work with countries experiencing rapid population growth to assist them at their request in implementing their population policies.

(h) To accelerate in the OECD, ECE, GATT, UNCTAD, the European Community and other appropriate fora the dialogue on the interlinkages between environmental and trade policies. The dialogue should focus on, inter alia, the role of international trade in promoting sustainable development and on how to ensure that trade does not being about harmful environmental consequences.

(i) To encourage the extension of public purchasing practices which favour environmentally sound products and services.

III. SUSTAINABLE ENERGY USE

14. Taking into consideration that the ECE region presently accounts for about 70% of global primary energy and fossil fuel

use, we assume a major responsibility to limit or reduce greenhouse gases and other emissions and to lead a global effort to address this matter by promoting energy efficiency, energy conservation and the use of environmentally sound and renewable energy sources.

(a) To initiate an ECE wide campaign "Energy Efficiency 2000" to enhance trade and co-operation in energy efficient, environmentally sound techniques and management practices to close the energy efficiency gap between actual practice and best technologies, and between our countries, in particular between East and West, through national actions, bilaterally, multilaterally and especially through the ECE. We envisage that, through these efforts, this gap will be considerably narrowed by 2000.

(b) To reaffirm our continued support for the IPCC as the principal forum for scientific assessment related to climate change, the potential impacts of such changes, and the options available for preventing or adapting to changes in the climate of the earth. The process of the IPCC should be supported by the investigation of the feasibility of achieving targets to limit or reduce CO_2 and other greenhouse gas emissions including e.g. a 20% reduction of CO_2 emission level by the year 2005 as recommended by the scientific World Conference on the Changing Atmosphere in Toronto 1988.

(c) To pledge our full support for the early completion of the work on a framework convention on climate change and the development of protocols dealing with, inter alia, greenhouse gases and forestation, with a view to signing not later than at the 1992 Conference on Environment and Development. The development of the convention and its associated protocols should be based on the best scientific evidence available, provided primarily by the report of the IPCC, and drawing upon the Toronto Conference recommendations, the Noordwijk 1989 declaration, and the report of the Bergen Conference on Sustainable Development, Science and Policy.

(d) To recognize the need to stabilize, while ensuring stable development of the world economy, CO_2 emissions and emissions of other greenhouse gases not controlled by the Montreal Protocol. The industrialized nations have agreed at Noordwijk that such stabilization should be achieved by them as soon as possible, at levels to be considered by the IPCC and the Second World Climate Conference. To fulfil this need, and

Noting with appreciation that some countries have already committed themselves in advance to stabilize CO_2 emissions at present levels or to reduce them by the year 2000;

Recognizing that countries with, as yet, relatively low energy requirements, which can reasonably be expected to grow in step with their development, may need strategies or targets which can accommodate that development;

Also recognizing that strategies or targets could be based, for example, on total emission levels, per capita emissions, climatic conditions or other equitable considerations.

We urge all ECE countries to take action now, and we agree to commit to establish national strategies and/or targets and schedules following the report of the IPCC and no later than the start of the negotiations of a framework convention on climate change to limit or reduce CO_2 emissions and other greenhouse gas emissions as much as possible and to stabilize them. In the view of most ECE countries, such stabilization at the latest by the year 2000 and at present levels must be the first step.

(e) All ECE member countries should work individually and collectively toward reducing SO_2 and NO_x emissions and to support the early completion of a protocol on VOCs (volatile organic compounds).

(f) To recommend that the establishment and implementation of adequate abatement and conservation strategies should be guided by the principle of prevention and minimization of emissions in the most cost beneficial and cost-effective way and making use, as appropriate, of the best available technologies, which continuously should be improved, not entailing excessive costs. The concept of critical loads should serve as a guideline to formulate these strategies where science has provided the necessary information.

(g) To introduce and update an energy labelling system and voluntary agreements or mandatory standards, as may be appropriate, for products and processes aimed at improving energy efficiency of buildings and appliances. Governments should promote improved energy-efficiency in motor vehicles by use of labels and other measures that provide information on expected energy consumption and by the setting of guidelines or standards for fuel efficiency for new vehicles. These approaches should be facilitated by cooperative action of interested countries and organizations. We ask ECE to review progress in this regard at regular intervals.

(h) To introduce and update comprehensive policies to remove the existing barriers for market penetration of energy efficient technology, renewable energy and clean lifecycle technology and to promote energy efficient processes in all sectors. The funding of research, development and demonstration for renewable and non-renewable energy sources should be brought into a reasonable balance. in some countries, this should result in increased funding for renewables.

(i) To reduce the harmful effects of the transport sector on the environment by promoting fast, safe and convenient urban and regional transport services and reducing urban car traffic by means of a coordinated strategy reflecting national circumstances to:

Improve the efficiency of public transport services such as railways, underground trains, and buses;

Favour use of more energy efficient motor vehicles with low emission levels through economic, regulatory or other instruments noting, inter alia, the encouraging progress in the development of the lean-burn engine and that small car prototypes have achieved 2-4 litres per hundred kilometre in test conditions;

Consider the introduction of maximum speed limits, bans on idling, traffic-free urban areas, and bicycle paths;

Encourage physical planning and traffic management as instruments for promoting an urban development with a sound and clean transport infrastructure and low transport demand; encourage development of environmentally preferable alternative fuel vehicles and technologies;

Utilize information campaigns or other measures to encourage a change in transport behaviour;

Pay increased attention to air transport efficiency;

Further develop a joint strategy within the ECE framework for improving and integrating public and goods transportation with railways and waterways in mainland Europe including the harmonization of technical standards in rail transportation, particularly with a view to developing transportation between East and West Europe.

(j) All relevant international organizations are requested:

To exchange environmentally favourable proposals, ideas and recommendations in order to emphasize and implement the most progressive standards;

To facilitate and support the use of existing services for international transfer of energy and environmental technologies and related management skills, especially to developing countries;

(k) All ECE member countries should work individually and collectively toward redressing any imbalances which may exist in international institutional arrangements for addressing questions related to renewable sources of energy compared to other energy sources. Similarly the balance between institutional arrangements for different modes of transport should be examined.

IV. SUSTAINABLE INDUSTRIAL ACTIVITIES

15. Taking note of the need for our countries to further develop national and regional strategies for preventing pollution from industrial activities:

(a) To encourage in industry and in society approaches which address all phases of the life cycle of a product with the objective of minimization of short and long term risks to human health and the environment.

(b) To strengthen regulations and economic incentives for promoting environmentally sound production processes which include, inter alia, the modification of processes to make more efficient use of raw materials and to reduce generation of pollutants and to encourage recycling and other methods to minimize waste. To work actively towards replacing hazardous chemicals with ones that are less hazardous or can be handled in a safer way.

(c) To encourage the safe and appropriate use and disposal of hazardous substances based on a full assessment of risks to human health and the environment. To accelerate work on reducing the use and emission of hazardous substances that are toxic, persistent and bioaccumulative with the ultimate aim of phasing out those uses which cannot be adequately controlled, and by 1992, agree regional timetables for such phasing out. Disposal at sea, whether by dumping or incineration of wastes should not be allowed, unless such disposal poses no threat to the marine emvironment, in accordance with the provisions of the London Dumping Convention.

(d) To ratify as soon as possible the Basel Convention on the control of the transboundary movements of hazardous wastes and their disposal. This would constitute an important step towards reducing the generation of such wastes and ensure their disposal in an environmentally sound way.

(e) To stimulate transfer of environmentally sound technologies, particularly to East European and developing countries and to support the efforts of those countries to create and develop appropriate indigenous capacities. International organizations concerned should explore effective modalities, including funding mechanisms, to assure access to such technologies while ensuring the protection of proprietary rights.

(f) To encourage investors to apply environmental analysis procedures and the environmental standards required in their home

country to investments abroad. We encourage UNEP, UNIDO, UNDP, IBRD, ILO and appropriate international organizations to support their member countries, in particular developing countries, in establishing legislation, requirements and administrative systems for ensuring environmentally sound industrial investments. Industry and government should co-operate in establishing guidance for this purpose.

(g) To strengthen co-operation on the prevention and control of transboundary impacts of industrial accidents. In particular, to aim for a rapid elaboration of the ECE legal instrument on transboundary impacts of industrial accidents. To urge governments and international organizations to render assistance in overcoming the consequences of industrial accidents, especially those with transboundary effects such as the accident at Chernobyl nuclear power station. The proposal for a centre on emergency environmental assistance and identification of possible gaps in existing response networks should be taken into account in this work, as should relevant activities undertaken within other international organizations.

(h) To strengthen cooperation with industry through mutual consultation with regard to the development of environmental policies and encouraging industry to report annually on their environmental records, including information on the efficiency of the use of energy and raw materials.

(i) To encourage constructive and effective co-operation between governments, industry and labour in order to protect and improve safety and health conditions at the workplace in the light of the close link that exists between the general environment and the working environment.

(j) To strengthen sustainability in every sector of production, including forestry, agriculture and fisheries. Initiatives for sustainable development in these sectors are required for all ECE countries. This should be undertaken through appropriate plans at regional and national levels, and initiatives at the global level should be supported. The ECE countries should fully support the UNEP/FAO conference in 1991 in order to achieve substantial progress ahead of the global conference on environment and development in 1992.

V. AWARENESS RAISING AND PUBLIC PARTICIPATION

16. Emphasizing the importance of participation by a well-informed and well-educated society so as to allow the public to mobilize itself to effect political change consistent with sustainable development. The Bergen process is an important step forward in optimizing democratic decision making related to environment and development issues.

(a) To promote environmental education, including non-formal education, for all ages and sectors of society. This could be achieved, *inter alia*, by adapting school curricula and educational material on sustainable development and by designing education and training programmes that enable students, workers, businessmen and decision-makers to appreciate the connection between their specialisms and environmental issues. To integrate and use environmental knowledge in all sectors of society.

(b) To reaffirm the special role of women in promoting sustainable development and to improve their economic and educational opportunities, especially in developing countries.

(c) To stimulate national and international exchanges of environmental information and foster scientific and technological co-operation in order to achieve sustainable development.

(d) To encourage the use of schemes for informing the consumer of the environmental qualities and of the risks of industrial products from "cradle to grave". Such schemes could include environmental labelling, logos, product declarations and process declarations based on up-to-date and improved methods of analysis.

(e) To develop further national and international systems of periodic reporting of the state of the environment and to encourage open debate on the enviornmental implications of national policies.

(f) To undertake the prior assessment and public reporting of the environmental impact of projects which are likely to have a significant effect on the human health and the environment and, so far as practicable, of the policies, programmes and plans which underlie such projects and to ensure that East European and developing countries are assisted through bilateral and multilateral channels in evaluating the environmental impact and sustainability of their own development projects. To develop or expand procedures to assess the risks and potential environmental impacts of products.

(g) To reaffirm and build on the CSCE conclusions regarding the rights of individuals, groups and organizations concerned with environmental issues, and in addition to safeguard the rights of individuals and concerned groups to have access to all relevant information and to be consulted and participate in the planning and decision-making concerning activities which may affect health and environment with reasonable access to appropriate legal or administrative remedies and redress. In this connection to contribute to the preparation of a document on environmental rights and obligations for possible adoption at the 1992 Conference on Environment and Development, drawing on all relevant texts available.

(h) To develop rules for free and open access to information on the environment. Such rules can increase public participation in the procedures to control pollution and prevent damage to the environment.

(i) To ensure that members of the public are kept informed and that every effort is extended to consult them and to facilitate their participation in the decisionmaking process on plans to prevent industrial and technological hazards in areas where they live or work.

(j) To increase co-operation among representatives of government, international organizations and all sectors of society, including the Bergen partners, on developing and implementing national and international strategies for achieving sustainable development.

VI. THE FOLLOW-UP PROCESS

17. We, the governments and the European Community participating in this Conference, agree to continue our efforts towards reconciling our different needs so that we can work towards sustainable development not only within the ECE region but also globally, with due attention to the needs of developing countries.

18. We recognize that the different levels of economic and technological development among the ECE countries are an obstacle to progress within the region. Therefore it is of crucial importance to accelerate the ongoing process on closer economic and environmental cooperation, taking into account the need for more differentiated commitments. Means to this end should include proper financing and promoting transfer of environmentally sound technology, while ensuring that assistance to East Europe for environmental purposes does not reduce our aid to developing countries.

19. We will promote active and close cooperation between the ECE and relevant multilateral organizations and institutions and between the Governments of the ECE region on the most effective forms of future cooperation on sustainable development.

20. We invite the OECD and the ECE to strengthen their cooperation in relation to regional environmental policies, including the possibility for suitable policy reviews and, where it is appropriate, on follow-up to international commitments. We welcome the decision of the European Communities to establish an Environmental Agency and a European Environment Information and Observation Network, charged with the collection of objective, reliable and comparable information at the European level to asist in the effective implementation of environmental policies, and to inform the public on the state of the European environment. We also welcome the decision that participation in this Agency should be open on mutually acceptable terms to other countries of the ECE region. We invite UNEP, WMO, ECE and the OECD to cooperate actively in the work of the Agency.

21. We recommend the establishment or continued use of Round Tables or Committees or comparable processes to promote the integration of environmental considerations in all economic and social activities and thereby contribute to sustainable development with a view to improving the accountability of all participants in decisionmaking. Such bodies should take account of the Bergen model.

22. We will continue to improve national and international processes within the ECE region in the light of the important multisectoral dialogue among Governments and non-government sectors which was initiated by the Bergen process.

23. We will aim for the early completion, if possible in 1991, of the ECE Convention on environmental impact assessment in a transboundary context and to promote the further development of international environmental law.

24. We call on those ECE members who have not already done so to ratify or accede to the Montreal Protocol. We also call on the meeting of the Parties to the Montreal Protocol in London in June 1990 to strengthen international action to protect the ozone layer including, for example, through addtional resources and technology transfer. It will be necessary to contribute to the fulfilment of the financial and other conditions to be agreed by the Parties to encourage a broader participation in the Protocol. In the ECE region we are prepared to do so.

25. We will consider strengthening international programmes, existing institutions and law leading up to the 1992 United Nations Conference on the Environment and Development, taking into account, inter alia, the conclusions of the Siena forum on international environmental law.

26. We recognize the need to evaluate progress in the follow-up to the Bergen Conference and in the outcome for our region of the 1992 Conference and recommend the convening of a high-level meeting of countries in the ECE region, in full cooperation with nongovernmental organizations and with the ECE.

27. We invite the ECE to prepare a report on the Bergen Conference as a contribution to the 1992 Conference on Environment and Development.

28. We urge governments and others concerned to contribute generously to the voluntary fund established for the purpose of assisting developing countries, in particular the least developed among them, to participate fully and effectively in the 1992 Conference and in its preparatory process.

29. We strongly recommend that the experience gained in the preparation and conduct of the Bergen Conference with respect to the full involvement of nongovernmental organizations, be used by other Regional Commissions of the United Nations and by the Preparatory Committee of the 1992 Conference on Environment and Development and in this regard, welcome the organization of an NGO's meeting to be held in Paris in 1991, in order to prepare for their participation at the 1992 Conference.

Mr. WIRTH. Mr. President, this time 2 years ago, the United States was in the grips of one of the worst droughts in our history. The Farm Belt was scorching. The Mississippi River dropped so low it had to be closed to barge traffic. And all over the country, people developed a sense that something was amiss.

It was in this context that the Committee on Energy and Natural Resources held a hearing in late June 1988 on the subject of global warming. At that hearing, a little-known, but well-respected scientist named Dr. James Hansen told a packed committee room that he was 99 percent certain that global temperature increases during the 1980's were outside the range of natural variability. Dr. Hansen told us at that hearing that "the greenhouse effect has been detected, and it is changing our climate now." Dr. Hansen's testimony was front-page news in the New York Times and newspapers across the country. For the first time, global warming had emerged from the pages of arcane scientific journals to the lead stories on the evening news.

About 1 month after that hearing, together with 16 of my colleagues, I introduced a bill to help prevent global warming. Shortly, thereafter, we began a series of hearings on that bill in the Senate Energy Committee. When this Congress began, I introduced my bill again, this time with 32 of my Senate colleagues. We continued our hearings in the Energy Committee until the end of this spring. In all, 10 full days of hearings were held with dozens of witnesses from the public and private sector. Under the leadership of the chairman and ranking member of the committee, we reported a bill this summer.

The bill before us today establishes a timeframe under which the Department of Energy shall develop for the Congress and the American people a least-cost national energy plan, a plan that sets forth strategies that will reduce greenhouse gases and meet the Nation's energy needs at the least-cost to society. In addition, this bill would initiate a series of energy efficiency and energy research and development programs that will enable our country to use energy more wisely and to develop new technologies to meet our energy needs.

Mr. President, the development of international policies on global warming is emerging very rapidly. Several months ago, the scientific assessment panel of the Intergovernmental Panel on Climate Change [IPCC] presented its report on the state of global warming science. The IPCC was convened by the United Nations and the World Meterological Organization to study the science, impacts, and policy responses for global warming and has been endorsed by our Government and others around the world. The scientists on the IPCC panel found that prospect of global warming is a certainty. Unquestionably, the Earth will warm as a result of the gases generated by human activity—primarily the burning of fossil fuels. Despite the rhetoric of a few naysayers, the globe will warm, with the only remaining question being how much and how fast?

In order to stabilize the atmospheric concentrations of the so-called greenhouse gases, the IPCC found that emissions of carbon dioxide, chlorofluorocarbons, methane, nitrous oxide, and other trace gases must be reduced by 60 percent based on current emissions.

In response to these findings, the Netherlands plans to stabilize carbon dioxide emissions at 1990 levels by 1995; Sweden and Canada plan to stabilize 1990 emissions by the year 2000; Denmark and West Germany will reduce emissions from 1990 levels by 20 and 25 percent, respectively 20 percent in the year 2005; and most recently, Great Britain announced that it would stabilize emissions at 1990 levels by the year 2005.

In the context of these announcements, it is discouraging that our own Government has not come forward with a commitment to reduce greenhouse gas emissions. Indeed, the President has stated that the science is not in, despite the findings of the most respected scientists in the world; despite an appeal from half the Nation's Nobel laureates and members of the National Academy of Sciences; and despite the wishes of the vast majority of Americans. In addition, it is troubling that the Department of Energy is developing a national energy strategy without the objective of reducing greenhouse gas emissions to a specific level. In fact, I am unaware of any specific objectives of the national energy strategy.

Mr. President, this legislation is intended to fill this void. This bill is a guide, not a mandate, that will lead us toward greenhouse gas reductions. The international process is moving purposefully toward a multilateral agreement to reduce greenhouse gas emissions. If I had to estimate the schedule for his agreement, I would assume that serious negotiations on an international agreement will begin next year. I suspect that proposals will be discussed throughout 1991 and that a tentative agreement will be reached in the summer of 1992, when the United Nations will convene its second conference on the environment and development in Brazil. Under this kind of schedule, the United States will be in the position of having to ratify a multilateral agreement in early 1993.

The legislation before us will prepare us for that decisionmaking process. This bill would require the Department of Energy to set forth the necessary steps to reduce greenhouse gas emissions up to 20 percent by the year 2005. The DOE report will be submitted as part of the biennial national energy plan. Under this schedule, we will have a comprehensive report before us during 1993, and I would expect that preliminary findings will be available in 1992. At the same time, this bill would initiate a series of energy efficiency and alternative energy programs that will reduce greenhouse gas emissions and that make sense for other reasons. We propose an action-oriented program that moves toward tapping the energy efficiency resource, developing alternatives like hydrogen energy, and expanding the use of natural gas and other alternative fuels. As the current situation in the Middle East has made clear, steps to use energy more efficiently, steps to tap alternative energy resources—these are the things we should be doing regardless of concerns about global warming. In short, this bill represents the coalesence of good energy policy, good environmental policy, good economic policy and good long-term planning.

A detailed assessment of the bill is contained in the committee's report, which I commend to all of my colleagues.

Mr. President, this is a significant piece of legislation and represents hundreds of hours of work and a great deal of effort to find common ground among a diverse group of Senators. I cannot come close to expressing my gratitude for the work done by the staff of the Committee on Energy and Natural Resources. Suffice it to say that the work on this bill has been nothing short of extraordinary.

In particular, I would like to thank the majority staff—under the leadership of Daryl Owen and Mike Harvey. Bill Conway, Al Stayman, and Joel Saltzman were instrumental to the development of this bill on the majority side, as were Howard Useem, Frank

Cushing, and Gary Ellsworth for the minority. I would also like to thank Mark Mahoney, John Donaldson, and Bill Bonvillian of Senator LIEBERMAN's staff, Steve Polansky with Senator PELL, and Rick Adcock of Senator GORE's staff, with whom my office has been honored to collaborate on so many initiatives.

There are three additional staff members who deserve special recognition for their work on this bill. Ben Cooper and Richard Grundy, and the quarterback of this effort, Leslie Black did an exceptionally professional job in crafting this legislation. It simply would not have been possible without their dedicated stewardship of this legislation. Again, I am deeply grateful.

In conclusion, Mr. President, this legislation is a giant step forward in the search for policy solutions to the very serious threat of global climate change. This bill was a monumental, but cooperative task and I am grateful for the assistance of the leadership of the Energy Committee, Senator JOHNSTON and Senator MCCLURE, and all of their staffs.

Mr. PELL. Mr. President, in just 2 short years, the U.N. Conference on the Environment and Development will convene in Brazil. The 1992 Conference follows by 20 years the historic U.N. Conference on the Human Environment held in Stockholm, Sweden.

The Stockholm Conference proved to be a turning point in international efforts to protect the environment. Perhaps the most enduring legacy of the Conference was the creation of the United Nations Environment Programme. Today, UNEP stands out as the premier international environmental organization. In its 17 years of existence, UNEP has played an extraordinary catalytic role in developing international environmental law. It was under UNEP auspices that the landmark Montreal Protocol on Substances that Deplete the Ozone Layer was negotiated and UNEP played a key role in the creation of the Intergovernmental Panel on Climate Change.

My hope is that the achievements of the 1992 Conference will stand up to, and if possible exceed, the accomplishments of the Stockholm Conference. Already the agenda for the Conference is being set. At this time, the Assistant Secretary of State for Oceans and International Environmental and Scientific Affairs is in Nairobi for a meeting of the Preparatory Committee of the Conference. The Prep Com is charged, among other things, with preparing draft decisions for consideration and adoption at the Conference. In short, if the United States is to play an effective role in advancing efforts to protect the global environment at the conference, we must begin those efforts now.

My amendment is simple: It authorizes $350,000 for the establishment within the Department of State of a secretariat to coordinate United States preparations for the Brazil Conference. I believe that such a step is essential if the United States is to be a positive and effective force at the 1992 Conference.

For my colleagues' information about the Conference, I am submitting for the RECORD a copy of the resolution calling for the 1992 Conference that was passed on December 18, 1989, by the U.N. General Assembly. I ask unanimous consent at this time that the resolution be placed in the RECORD following my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. PELL. Finally, Mr. President, I thank Senators WIRTH, JOHNSTON, and MCCLURE for their help in securing approval of this amendment. I believe the Senate has taken a significant step in underscoring the importance of U.S. participation in the 1992 Conference.

EXHIBIT 1

DEVELOPMENT AND INTERNATIONAL ECONOMIC COOPERATION: ENVIRONMENT—UNITED NATIONS CONFERENCE ON ENVIRONMENT AND DEVELOPMENT, 1992

DRAFT RESOLUTION SUBMITTED BY THE CHAIRMAN

The General Assembly,

Recalling its resolution 43/196 of 20 December 1988 on a United Nations conference on environment and development,

Taking note of decision 15/3 of 25 May 1990 of the Governing Council of the United Nations Environment Programme on a United Nations conference on environment and development.

Taking note also of Economic and Social Council resolution 1989/87 of 26 July 1989 on the convening of a United Nations conference on environment and development,

Taking note also of Economic and Social Council resolution 1989/87 of 26 July 1989 on the convening of a United Nations conference on environment and development,

Taking note of Economic and Social Council resolution 1989/101 of 27 July 1989 entitled "Strengthening international co-operation on environment: provision of additional financial resources to developing countries",

Recalling also General Assembly solution 42/186 of 11 December 1987 on the Environmental Perspective to the Year 2000 and Beyond and resolution 42/187 of 11 December 197 on the report of the World Commission on Environment and Development,

Taking note of the report of the Secretary-General on the question of the convening of a United Nations conference on environment and development,[1]

Mindful of the views expressed by Governments in the plenary debate held at its forty-fourth session on the convening of a United Nations conference on environment and development,

Recalling the Declaration of the United Nations Conference on the Human Environment,

Deeply concerned by the continuing deterioration of the state of the environment and the serious degradation of the global life-support systems, as well as by trends that, if allowed to continue, could disrupt the global ecological balance, jeopardize the life-sustaining qualities of the Earth and lead to an ecological catastrophe, and recognizing that decisive, urgent and global action is vital to protecting the ecological balance of the Earth,

Recognizing the importance for all countries of the protection and enhancement of the environment,

Recognizing also that the global character of environmental problems, including climate change, depletion of the ozone layer, transboundary air and water pollution, the contamination of the oceans and seas and degradation of land resources, including drought and desertification requires actions at all levels, including the global, regional and national levels and involving the commitment and participation of all countries,

Gravely concerned that the major cause of the continuing deterioration of the global environment is the unsustainable pattern of production and consumption, particularly in industrialized countries,

Stressing that poverty and environmental degradation are closely interrelated and that environmental protection in developing countries must, in this context, be viewed as an integral part of the development process and cannot be considered in isolation from it,

Recognizing that measures to be undertaken at the international level for the protection and enhancement of the environment must take fully into account the current imbalances in global patterns of production and consumption,

Affirming that the responsibility for containing, reducing, and eliminating global environmental damage must be borne by the countries causing such damage, must be in relation to the damage caused and must be in accordance with their respective capabilities and responsibilities,

Recognizing the environmental impact of material remnants of war and the need for further international co-operation for their removal,

Stressing the importance for all countries to take effective measures for the protection, restoration and enhancement of the environment in accordance, inter alia, with their respective capabilities, while at the same time acknowledging the efforts being made in all countries in this regard, including international co-operation between developed and developing countries.

Stressing the need for effective international co-operation in the area of research, development and application of environmentally sound technologies.

Conscious of the crucial role of science and technology in the field of environmental protection and of the need of developing countries, in particular, concerning favourable access to environmentally sound technologies, processes, equipment and related research and expertise through international co-operation designed to further global efforts for environmental protection, including the use of innovative and effective means.

Recognizing that new and additional financial resources will have to be channelled to developing countries in order to ensure their full participation in global efforts for environmental protection.

[1] A/44/256-E/1989/66 and Corr. 1 and Add. 1 and 2.

I

1. Decides to convene a United Nations Conference on Environment and Development of two weeks' duration and at the highest possible level of participation to coincide with World Environment Day, 5 June, 1992;

2. Accepts with deep appreciation the generous offer of the Government of Brazil to host the Conference;

3. Affirms that the Conference should elaborate strategies and measures to halt and reverse the effects of environmental degradation in the context of strengthened national and international efforts to promote sustainable and environmentally sound development in all countries;

4. Affirms that the protection and enhancement of the environment are major issues that affect the well-being of peoples and economic development throughout the world;

5. Also affirms that the promotion of economic growth in developing countries is essential to address problems of environmental degradation;

6. Further affirms the importance of a supportive international economic environment that would result in sustained economic growth and development in all countries for protection and sound management of the environment;

7. Reaffirms that States have, in accordance with the Charter of the United Nations and the applicable principles of international law, the sovereign rights to exploit their own resources pursuant to their environmental policies, and also reaffirms their responsibility to ensure that activities within their jurisdiction or control do not cause damage to the environment of other States or of areas beyond the limits of national jurisdiction and the need for States to play their due role in preserving and protecting the global and regional environment in accordance with their capacities and specific responsibilities;

8. Affirm the responsibility of States for the damage to the environment and natural resources caused by activities within their jurisdiction or control through transboundary inteference, in accordance with national legislation and applicable international law;

9. Notes that the largest part of the current emission of pollutants into the environment, including toxic and hazardous wastes, originates in developed countries, and therefore recognizes that those countries have the main responsibility for combating such pollution;

10. Stresses that large industrial enterprises, including transnational corporations, are frequently the repositories of scarce technical skills for the preservation and enhancement of the environment, conduct activities and sectors that have an impact on the environment and, to that extent, have specific responsibilities and that, in this context, efforts need to be encouraged and mobilized to protect and enhance the environment in all countries;

11. Reaffirms that the serious external indebtedness of developing countries, and other countries with serious debt-servicing problems, has to be addressed efficiently and urgently in order to enable those countries to contribute fully and in accordance with their capacities and responsibilities to global efforts to project enhance the environment;

12. Affirm that in the light of the above, the following environmental issues, which are not listed in any particular order of priority, are among those of major concern in maintaining the quality of the Earth's environment and especially in achieving environmentally sound and sustainable development in all countries:

(a) Protection of the atmosphere by combating climate change, depletion of the ozone layer and transboundary air pollution;

(b) Protection of the quality and supply of freshwater resources;

(c) Protection of the oceans and all kinds of seas, including enclosed and semi-enclosed seas, and of coastal areas and the protection, rational use and development of their living resources;

(d) Protection and management of land resources by, inter alia, combating deforestation, desertification and drought;

(e) Conservation of biological diversity;

(f) Environmentally sound management of biotechnology;

(g) Environmentally sound management of wastes, particularly hazardous wastes, and of toxic chemicals, as well as prevention of illegal international traffic in toxic and dangerous products and wastes;

(h) Improvement of the living and working environment of the poor in urban slums and rural areas, through eradicating poverty, inter alia, by implementing integrated rural and urban development programmes, as well as taking other appropriate measures at all levels necessary to stem the degradation of the environment;

(i) Protection of human health conditions and improvement of the quality of life;

13. Emphasizes the need for strengthening international co-operation for the management of the environment to ensure its protection and enhancement and the need to explore the issue of benefits derived from activities, including research and development, related to the protection and development of biological diversity;

14. Reaffirms the need to strengthen international co-operation, particularly between developed and developing countries, in research and development and the utilization of environmentally sound technologies;

15. Decides that the Conference, in addressing environmental issues in the developmental context, should have the following objectives:

(a) To examine the state of the environment and changes that have occurred since the 1972 United Nations Conference on the Human Environment and since the adoption of such international agreements as the Plan of Action to Combat Desertification, the Vienna Convention for the Protection of the Ozone Layer, adopted on 22 March 1985, and the Montreal Protocol on Substances that Deplete the Ozone Layer, adopted on 16 September 1987, taking into account the actions taken by all countries and intergovernmental organizations to protect and enhance the environment;

(b) To identify strategies to be co-ordinated regionally and globally, as appropriate, for concerted action to deal with major environmental issues in the socio-economic development processes of all countries within a particular time-frame;

(c) To recommend measures to be taken at the national and international levels to protect and enhance the environment, taking into account the specific needs of developing countries, through the development and implementation of policies for sustainable and environmentally sound development with special emphasis on incorporating environmental concerns in the economic and social development process, and of various sectoral policies and through, inter alia, preventive action at the sources of environmental degradation, clearly identifying the sources of such degradation and appropriate remedial measures, in all countries;

(d) To promote the further development of international environmental law, taking into account the Declaration of the United Nations Conference on Human Environment, as well as the special needs and concerns of the developing countries, and to examine in this context the feasibility of elaborating general rights and obligations of States, as appropriate, in the field of the environment, also taking into account relevant existing international legal instruments;

(e) To examine ways and means further to improve co-operation in the field of protection and enhancement of the environment between neighbouring countries with a view to eliminating adverse environmental effects;

(f) To examine strategies for national and international action with a view to arriving at specific agreements and commitments by Governments for defined activities to deal with major environmental issues, in order to restore the global ecological balance and to prevent further deterioration of the environment, taking into account the fact that the largest part of the current emission of pollutants into the environment, including toxic and hazardous wastes, originates in developed countries, and therefore recognizing that those countries have the main responsibility for combating such pollution;

(g) To accord high priority to drought and desertification control and to consider all means necessary, including financial, scientific and technological resources, to halt and reverse the process of desertification with a view to preserving the ecological balance of the planet;

(h) To examine the relationship between environmental degradation and the structure of the international economic environment, with a view to ensuring a more integrated approach to environment-and-development problems in relevant international forums without introducing new forms of conditionality;

(i) To examine strategies for national and international action with a view to arriving at specific agreements and commitments by Governments and by intergovernmental organizations for defined activities to promote a supportive international economic environment that would result in sustained and environmentally sound development in all countries, with a view to combating poverty and improving the quality of life, and bearing in mind that the incorporation of environmental concerns and considerations in development planning and policies should not be used to introduce new forms of conditionality in aid or in development financing and should not serve as a pretext for creating unjustified barriers to trade;

(j) To identify ways and means to provide new and additional financial resources, particularly to developing countries, for environmentally sound development programmes and projects in accordance with national development objectives, priorities and plans and to consider ways of establishing effective monitoring of the implementation of the provision of such new and additional financial resources, particularly to developing countries, so as to enable the international community to take further appropriate action on the basis of accurate and reliable data;

(k) To identify ways and means to provide additional financial resources for measures directed towards solving major environmental problems of global concern and especially to support those countries, in particular developing countries, for whom the implementation of such measures would entail a special or abnormal burden, in particular owing to their lack of financial resources, expertise or technical capacity;

(l) To consider various funding mechanisms, including voluntary ones, and to examine the possibility of a special international fund and other innovative approaches, with a view to ensuring the carrying out, on a favourable basis, of the most effective and expeditious transfer of environmentally sound technologies to developing countries;

(m) To examine with the view to recommending effective modalities for favourable access to, and transfer of, environmentally sound technologies, in particular to the developing countries, including on concessional and preferential terms, and for supporting all countries in their efforts to create and develop their endogenous technological capacities in scientific research and development, as well as in the acquisition of relevant information, and, in this context, to explore the concept of assured access, for developing countries to environmentally sound technologies in its relation to proprietary rights with a view to developing effective responses to the needs of developing countries in this area;

(n) To promote the development of human resources, particularly in developing countries, for the protection and enhancement of the environment;

(o) To recommend measures to Governments and the relevant bodies of the United Nations system, with a view to strengthening technical co-operation with the developing countries to enable them to develop and strengthen their capacity for identifying, analyzing, monitoring, managing or preventing environmental problems in accordance with their national development plans, objectives and priorities;

(p) To promote open and timely exchange of information on national environmental policies, situations and accidents;

(q) To review and examine the role of the United Nations system in dealing with the environment and possible ways of improving it;

(r) To promote the development or strengthening of appropriate institutions at the national, regional and global levels to address environmental matters in the context of the socio-economic development processes of all countries;

(s) To promote environmental education, especially of the younger generation, as well as other measures to increase awareness of the value of the environment;

(t) To promote international co-operation within the United Nations system in monitoring, assessing and anticipating environmental threats and in rendering assistance in cases of environmental emergency;

(u) To specify the respective responsibilities of and support to be given by the organs, organizations and programmes of the United Nations system for the implementation of the conclusion of the Conference;

(v) To quantify the financial requirements for the successful implementation of Conference decisions and recommendations and to identify possible sources, including innovative ones, of additional resources;

(w) To assess the capacity of the United Nations system to assist in the prevention and settlement of disputes in the environmental sphere and to recommend measures in this field, while respecting existing bilateral and international agreements that provide for the settlement of such disputes;

II

1. Decides to establish a Preparatory Committee of the General Assembly open to all States Members of the United Nations or members of the specialized agencies, with the participation of observers in accordance with the established practice of the General Assembly;

2. Decides that the Preparatory Committee shall hold an organizational session of two weeks' duration in March 1990 and a final session, both at United Nations Headquarters, in New York, and three additional substantive sessions, the first in Nairobi and the following two in Geneva, the timing and duration of which shall be determined by the Preparatory Committee at its organizational session;

3. Decides that the Preparatory Committee, at its organizational session, shall elect, with due regard to equitable geographic representation, the Chairman and other members of its bureau, comprising a substantial number of vice-chairmen and a rapporteur;

4. Decides that the host country of the Conference, Brazil, shall be ex officio a member of the Bureau;

5. Requests the Secretary-General of the United Nations, following the organizational session of the Preparatory Committee, to establish an appropriate ad hoc secretariat in Geneva, with a unit in New York and another unit in Nairobi, taking into account the decisions to be made by the Preparatory Committee regarding the preparatory process for the Conference and based on the principle of equitable geographic distribution;

6. Decides that the ad hoc secretariat will be headed by a Secretary-General of the Conference to be appointed by the Secretary-General of the United Nations;

(7) Requests the Secretary-General of the United Nations to prepare a report for the organizational session of the Preparatory Committee containing recommendations on an adequate preparatory process, taking into account the provisions of the present resolution and the views expressed by Governments in the plenary debate at the forty-fourth session of the General Assembly;

8. Decides that the Preparatory Committee shall;

(a) Draft the provisional agenda of the Conference, in accordance with the provisions of the present resolution;

(b) Adopt guidelines to enable States to take a harmonized approach in their preparations and reporting;

(c) Prepare draft decisions for the Conference and submit them to the Conference for consideration and adoption;

9. Request the United Nations Environment Programmes, as the main organ for the environment, and requests the other organs, organizations and programmes of the United Nations system, as well as other relevent intergovernmental organizations, to contribute fully to the preparations of the Conference on the basis of guidelines and requirements to be established by the Preparatory Committee;

10. Requests the Secretary-General of the United Nations to ensure the co-ordination of contributions from the United Nations system, through the Administrative Committee on Co-ordination;

11. Invites all States to take an active part in the preparations for the Conference, to prepare national reports, as appropriate, to be submitted to the Preparatory Committee in a timely manner and to promote international co-operation and broad-based national preparatory processes involving the scientific community, industry, trade unions and concerned non-governmental organizations;

12. Requests relevent non-governmental organizations in consultative status with the Economic and Social Council to contribute to the Conference, as appropriate;

13. Stresses the importance of holding regional conferences on environment and development with the full co-operation of the regional commissions, and recommends that the results of regional conferences be introduced into the preparatory process for the 1992 Conference, bearing in mind that regional conferences should make important substantive contributions to the Conference;

14. Decides that the preparatory process and the Conference itself should be funded through the regular budget of the United Nations without adversely affecting other, ongoing activities and without prejudice to the provision of sources of extrabudgetary resources;

15. Decides to establish a voluntary fund for the purpose of supporting developing countries, in particular the least developed among them, in participating fully and effectively in the Conference and in its preparatory process, and invites Governments to contribute to the fund;

16. Requests the Chairman of the Preparatory Committee to report to the General Assembly at its forty-fifth and forty-sixth sessions on the progress of the work of the Committee;

17. Decides to include in the provisional agenda of its forty-fifth and forty-sixth sessions an item entitled "United Nations Conference on Environment and Development".

Mr. GORE. Mr. President, I am a proud cosponsor of the National Energy Policy Act of 1990. I wish to commend my good friend, the Senator from Colorado, Senator WIRTH, on the passage of this most important piece of legislation. He has worked very hard on this day, and I am sure that this legislation will go very far indeed toward addressing many of the local, regional, and global environmental problems that we face.

Mr. President, energy is the very lifeblood of development. It warms our homes, fuels our vehicles, lights the darkness, and powers our industry. Unfortunately, its ubiquity also puts it at the very heart of many of the environmental problems that we face.

Here in the United States, we have spent the last decade basking in the glow of falling real energy prices. We have been lulled into a complacency that cannot last. We have been muddling along with an energy policy that is virtually nonexistent, all the while ignoring the recurrent rise in our oil imports, the dangerously poor air quality in our cities, and an ecomomy whose energy intensity—measured as the energy consumed to produce a dollar of GNP—is twice that of some of our competitors.

Now, we are witnessing what promises to be a sharp rise in energy prices,

in the wake of the Iraqi invasion of Kuwait, highlighting in cold reality just how vulnerable the United States is to the actions of a ruthless and calculating dictator in a land 10,000 miles from our shores.

Concerns over national security, the environment, public health, and economic competitiveness have not been viewed as pressing enough for either the Bush or the Reagan administration to face up to our energy problems, and to work on real solutions. But the threat of global warming, and the severe economic and environmental impacts that it implies, will no longer allow us—or any other nation—to remain complacent. Nature is forcing us to behave responsibly, even when markets and policies have not.

What has finally gotten our attention is the link between energy and global warming. That link, of course, is massive worldwide emissions of carbon dioxide: the exhaling breath of our industrial civilization.

And, the great potential for growth in fossil fuel and other emissions from Third World nations, makes their cooperation also crucial for stabilizing the level of greenhouse gases in the atmosphere. Estimates are that the developing world's share of greenhouse gas emissions from fossil fuels could grow from about 20 percent today, to as much as 50 to 60 percent by 2050.

Energy efficiency and conservation are the best, cheapest, and environmentally safest means for meeting the challenges of continued economic development in the near term. Efficiency gains and conservation will also buy us the critical time required to develop other alternatives and reduce greenhouse gas emissions. Although great strides were made in the developed world after the oil shocks of the 1970's, U.S. efficiency gains leveled off in 1986. In the past 2 years, U.S. energy demand has increased over 8 percent, in tandem with GNP growth. Global and U.S. energy use reached alltime highs in 1988 and 1989. Greenhouse gas emission rates are accelerating, not diminishing.

Low energy prices and a decreased federal commitment to efficiency and conservation have led to this slowdown in efficiency improvements. Our Nation's leadership has failed—or refused—to fill the policy vacuum created by cheap energy. I commend the Senator from Colorado for emphasis that this legislation places on the need to regain the trend toward higher energy efficiency in our economy.

In a few areas, the United States leads the world in energy-efficient technologies. Our companies produce outstanding appliances, lighting products, and windows, for example. In particular, a typical refrigerator produced in the United States today consumes half as much energy as the equivalent model produced 15 years ago. New, "low-emissivity" windows, a high-tech energy-conserving product developed in the United States, are rapidly catching on.

But today, the United States is not the world's leader in all energy-efficient technologies. Other nations—most notably Japan—are busy developing and marketing their own energy-efficient technologies, recognizing that the global environmental crisis is as much a business opportunity as any other. The Japanese already produce the world's most efficient automobiles, and their super-efficient prototypes do even better.

The global energy-efficiency race is on, and the United States is rapidly falling behind.

The same is true of renewable energy sources, such as solar and biomass. Just as with energy efficiency, we had an initial technological advantage in renewable energy, followed by a plunge in national commitment. Just a decade ago, the United States was in a class by itself in developing all of the promising renewable energy technologies—particularly the most promising of all, photovoltaics. Today, we are handing our lead to the Japanese, who have recognized the technology's importance to the 21st century, and are well on their way to becoming the dominant supplier of that critical technology.

Mr. President, our Nation must recapture the lead in conservation and renewable energy technologies that we have lost, and aggressively help our private sector to export these technologies to where they are needed around the world. We must aggressively funnel more resources into research and development, and into developing market incentives for energy efficiency, conservation, and renewable energy technologies such as photovoltaics, solar thermal, biomass, wind, and ocean thermal energy conversion.

We should also begin to collaborate intensively with Third World nations in their development planning. For example, it would be both an environmental and an economic disaster if the Third World were to follow down the same energy path previously traveled by the industrialized nations. Further, the Third World must be helped to plan and implement modern, efficient, diverse energy programs that reflect their unique resource capabilities and constraints.

We should move beyond studies of energy planning for developing countries, to programs of active joint ventures with Third World nations. This would not only be valuable to the developing countries, but it would also give the United States private sector a head start in marketing the technologies needed in the Third World's energy future. On this point, I was proud to sponsor an amendment to this legislation that addresses this goal.

Mr. President, for the first time, we are realizing that our destiny is really interlocked with the destiny of the developing world. We need development to proceed forward in areas lagging behind us, to create markets for the sake of our own economic growth and prosperity. But that development must now be understood to entail accelerated damage to the environment, with sharply accumulating risks not only for the developing countries, but for ourselves.

Responding in time and on a necessary scale to this challenge is no longer a matter of compassion. Properly understood, it is a matter of national security and self-preservation.

Again, I commend the Senator from Colorado for his work in this area, and I congratulate him on the passage by the Senate of the National Energy Policy Act of 1990.

So the bill (S. 324), as amended, was passed.

Mr. WIRTH. Mr. President, I ask unanimous consent to print S. 324 in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

S. 324

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.—This Act, together with the following table of contents, may be cited as the "National Energy Policy Act of 1990".

SEC. 2. TABLE OF CONTENTS.—

Sec. 1. Short title.
Sec. 2. Table of contents.
Sec. 3. Findings.
Sec. 4. Purposes.
Sec. 5. Goals.
Sec. 6. Definitions.

TITLE I—ENERGY POLICY INITIATIVES

Subtitle A—National Energy Strategy

Sec. 101. Least-cost energy strategy.
Sec. 102. Conforming amendments.

Subtitle B—Director of Climate Protection

Sec. 111. Appointment.

Subtitle C—National Academies of Science and Engineering

Sec. 121. Review.
Sec. 122. Report to the Congress.

TITLE II—ENERGY EFFICIENCY INITIATIVES

Subtitle A—Energy Efficiency

Sec. 201. Report.
Sec. 202. Energy-intensive industries.
Sec. 203. Federal energy management amendments.
Sec. 204. Fuel cells.
Sec. 205. Repeal of prohibitions on supply and installation of residential energy conservation measures by utilities.
Sec. 206. Energy efficiency labeling for windows and window systems.
Sec. 207. Energy efficiency information.
Sec. 208. Compact fluorescent lamps in Federal facilities.

Sec. 209. Demonstration.
Sec. 210. Home energy efficiency ratings.
Subtitle B—Amendments to the Public Utility Regulatory Policies Act of 1978
Sec. 211. Encouragement of investments in conservation and energy efficiency resources and study of certain State ratemaking policies.
Subtitle C—Fuel Cells
Sec. 221. Amendment.
Subtitle D—Solar, Wind, waste and Geothermal Electric Power Production
Sec. 231. PURPA amendments.
Sec. 232. Federal Power Act Amendments.
Sec. 233. FERC regulations.
TITLE III—ENERGY RESEARCH AND DEVELOPMENT INITIATIVES
Subtitle A—General
Sec. 301. Energy research and development priorities.
Sec. 302. Management plan.
Sec. 303. Joint ventures.
Subtitle B—Engine and Vehicle Fuel Research
Sec. 311. Vehicle engine fuel research.
Sec. 312. High efficiency heat engines.
Sec. 313. Natural gas cofiring research, development and demonstration.
Subtitle C—Hydrogen Research
Sec. 321. Short title.
Sec. 322. Purpose and definition.
Sec. 323. Comprehensive management plan.
Sec. 324. Research and development.
Sec. 325. Demonstrations.
Sec. 326. Technology Transfer Program.
Sec. 327. Coordination and consultation.
Sec. 328. Technical panel.
Sec. 329. Authorizations.
Subtitle D—Fusion
Sec. 331. Programs.
Subtitle E—Coal
Sec. 341. Coal Program Goals.
Sec. 342. Non Fuel Use of Coal.
Sec. 343. Authorizations.
Subtitle F—Natural Gas and Other Alternative Fuels
Sec. 351. Mass Transit Program.
Sec. 352. Natural Gas and Other Alternative Fuel Use in Fleet Vehicles.
Sec. 353. Training Program.
Sec. 354. Vehicle Research, Development, and Demonstration Program.
Sec. 355. Natural Gas Recovery Research, Development and Demonstration Program.
Sec. 356. Natural gas and electric heating and cooling technologies.
Sec. 357. Vehicle and Battery Research, Development, and Demonstration Program.
Sec. 358. Definitions.
Subtitle G—Hydropower
Sec. 361. Program.
Sec. 362. Report.
Subtitle H—Electric Vehicle Technology Development and Demonstration
Sec. 371. Short title.
Sec. 372. Findings.
Sec. 373. Definitions.
Sec. 374. Identification of nonattainment areas.
Sec. 375. Applications from manufacturers.
Sec. 376. Selection of manufacturers.
Sec. 377. Discounts to purchasers.
Sec. 378. Reports to Congress.
Sec. 379. Authorizations.
Subtitle I—Advanced Nuclear Reactor Study
Sec. 381. Report.
Subtitle J—Technology Development Program
Sec. 391. Program.
Sec. 392. Authorizations.
TITLE IV—MISCELLANEOUS
Subtitle A—Methane Assessment
Sec. 401. Objective.
Sec. 402. Domestic methane source inventory and control options.
Sec. 403. International studies.
Subtitle B—Committee on Renewable Energy Commerce and Trade
Sec. 411. Duties of CORECT.
Sec. 412. Additional duties of CORECT.
Sec. 413. Outreach.
Sec. 414. Comprehensive energy technology evaluation.
Sec. 415. Joint ventures in developing, demonstrating, and marketing energy efficient and renewable energy technologies in key lesser developed countries.
Sec. 416. Authorizations.
Subtitle C—Fuel Cycle Costs Analysis
Sec. 421. Program.
Sec. 422. Report.
Subtitle D—United Nations Conference
Sec. 431. 1992 United Nations Conference on Environment and Development.
TITLE V—NATURAL RESOURCE POLICY
Sec. 501. Ecological and environmental resource study.
Sec. 502. National forestation initiative.
Sec. 503. Urban forestry and energy savings.

SEC. 3. FINDINGS.—The Congress finds that—

(1) scientific evidence indicates that the atmosphere of the Earth is being affected by the generation from natural and manmade sources of carbon dioxide and other greenhouse gases;

(2) trends in the concentration of such greenhouse gases in the atmosphere may result in global changes in climate, with potentially significant economic, social and environmental implications for human-kind, including effects on agricultural production, water supplies, wetlands, weather, and human health and welfare;

(3) a scientific understanding of the causes and economic effects of global climate change is necessary to formulate effective policies;

(4) the formulation of domestic and international energy and natural resource policies may be necessary in order to reduce the generation of carbon dioxide and other greenhouse gases and mitigate or adapt to potential adverse consequences of human-induced global climate change;

(5) the formulation of such policies by the Government will include an effort involving the private sector and the laboratories of the Department of Energy; and

(6) the United States should pursue a framework convention on global climate change by the year 1992 through the Intergovernmental Panel on Climate Change (IPCC) of the United Nations Environmental Program and the World Meteorological Organization.

SEC. 4. PURPOSES.—The overall purpose of this Act is to establish a national energy policy that will fully consider the contribution of energy use to potential changes in global climate and will include cost-effective strategies to lessen the generation of energy-related greenhouse gases consistent with the achievement of other domestic energy, economic, social, and environmental goals. The specific purposes of the Act are to—

(1) improve scientific understanding of the natural and manmade sources of greenhouse gases and their relative contributions to global climate change;

(2) evaluate the environmental, social, and economic consequences of global climate change;

(3) evaluate the environmental, social, and economic consequences of domestic and international policies for mitigating or adapting to global climate change;

(4) identify the actions required to mitigate current trends in atmospheric concentrations of greenhouse gases and analyze their relative cost-effectiveness;

(5) identify the actions necessary to mitigate or adapt to adverse consequences of gloal climate change;

(6) identify and evaluate the domestic policies required to mitigate or adapt to the possible adverse social and economic consequences of a reduction or stabilization in the generation of greenhouse gases;

(7) encourage the formulation of effective domestic and international energy and natural resource policies that will mitigate adverse consequences of human-induced global climate change;

(8) foster the development of technologies that will advance the goals and purposes of the Act and the transfer of such technologies to lesser-developed countries; and

(9) establish programs within the Department of Energy for the achievement of these purposes.

SEC. 5. GOALS.—(a) The goals of this Act are to—

(1) foster the identification of an appropriate mix of policies referred to in subsection (b) that have the potential, if fully implemented, to stabilize the generation of carbon dioxide and other greenhouse gases in the United States;

(2) assess the feasibility of further limiting, or reducing, the generation of carbon dioxide and other greenhouse gases not controlled by the 1987 Montreal Protocol on Substances that Deplete the Ozone Layer;

(3) investigate the feasibility and economic, energy, social, and environmental implications of achieving a 20 per centum reduction in the generation of carbon dioxide by the year 2005 as recommended by the 1988 Toronto Scientific World Conference on the Changing Atmosphere;

(4) investigate the feasibility and economic, energy, social, and environmental implications of stabilizing carbon dioxide emissions by the year 2005; and

(5) evaluate the potential social, economic, energy, and environmental implications of implementing the policies mentioned in paragraphs (1), (2), (3), and (4) in order to enable the United States to comply with any obligations under an international global climate change framework convention or agreement.

(b) Policies to be considered in section 5(a) for the stabilization or reduction in the generation of carbon dioxide and other greenhouse gases include, but are not limited to, policies that—

(1) implement standards for more efficient use of fossil fuels;

(2) increase the energy efficiency of existing technologies;

(3) encourage technologies, including clean coal technologies, that generate lower levels of carbon dioxide and other greenhouse gases;

(4) promote the use of renewable energy resources, including solar, geothermal, sustainable biomass, hydropower, and wind energy;

(5) affect the development and consumption of energy and energy efficiency resources and electricity through tax policy;

(6) encourage investment in energy efficient equipment and technology;

(7) encourage the development of energy technologies, such as advanced nuclear fission and nuclear fusion, that produce energy without carbon dioxide and other greenhouse gases as a byproduct, and encourage the deployment of nuclear electric generating capacity; and

(8) encourage afforestation and reforestation.

(c) The reduction of the generation of chlorofluorocarbons shall be in accordance with the provisions of the Montreal Protocol, unless subsequent Federal legislation is enacted establishing new guidelines for the reduction or elimination of the use of chlorofluorocarbons.

(d) In order to promote international cooperation in addressing potential global climate change, it is the goal of the United States to establish by 1992, an international framework convention on global climate change through the activities of the Intergovernmental Panel on Climate Change of the United Nations International Environmental Program and the World Meteorological Organization and secure the commitment of the community of nations to such convention.

SEC. 6. DEFINITIONS.—For the purposes of this Act, the term—

(1) "Department" means the Department of Energy;

(2) "energy efficiency resource" means energy saved through improvements in the efficiency of energy production, transportation, or utilization;

(3) "energy resources" includes, but is not limited to, supplies of natural gas, crude oil and petroleum products, coal, nuclear energy, and renewable energy;

(4) "global climate change" means changes in the climate of the Earth that result from increases in the atmospheric concentrations of greenhouse gases;

(5) "greenhouse gases" means carbon dioxide and other gases such as chlorofluorocarbons, methane, ozone, and nitrous oxides that contribute to global climate change;

(6) "lesser-developed countries" shall include, but not be limited to, Eastern Europe and the Soviet Union; and

(7) "Secretary" means the Secretary of Energy.

TITLE I—ENERGY POLICY INITIATIVES

Subtitle A—National Energy Strategy

SEC. 101. LEAST-COST ENERGY STRATEGY.—(a)(1) The first National Energy Policy Plan (the "Plan") under section 801 of the Department of Energy Organization Act (42 U.S.C. 7321) prepared and submitted by the President to Congress after the date of the enactment of this Act, and each subsequent such Plan, shall include a least-cost energy strategy prepared by the Secretary.

(2) The Secretary need not prepare and submit a least-cost energy strategy with the National Energy Plan scheduled to be submitted in April of 1991.

(b)(1) The least-cost energy strategy shall identify Federal priorities for the encouragement of the use of energy and energy efficiency resources. In developing the least-cost energy strategy, the Secretary shall take into consideration the economic, energy, social, and environmental consequences of his choices. Such strategy shall be designed to achieve to the maximum extent practicable and at least-cost to the Nation—

(A) the energy production, utilization, and conservation objectives of the Plan; and

(B) the stabilization and eventual reductions in the generation of carbon dioxide and other greenhouse gases mentioned in section 5(a).

(2) The least-cost energy strategy shall include—

(A) a comprehensive inventory of available energy and energy efficiency resources and their projected costs, taking into account all costs of production, transportation, and utilization of such resources, including—

(i) coal, clean coal technologies, coal seam methane, and underground coal gasification;

(ii) energy efficiency, including existing technologies for increased efficiency in production, transportation, and utilization of energy, and other technologies that are anticipated to be available through further research and development; and

(iii) other energy resources, such as renewable energy, solar energy, nuclear fission, fusion, geothermal, biomass, fuel cells, and hydropower;

(B) a proposed two-year program for assuring adequate supplies of energy and energy efficiency resources under paragraph (1), and an identification of actions that can be undertaken within existing Federal authority; and

(C) recommendations for any new Federal authority needed to achieve the purposes of this Act.

(c)(1) The relative costs of energy and energy efficiency resources under this section shall be determined based upon a comparison of the estimated system costs of other similarly reliable and available resources.

(2) System costs under paragraph (1) are all direct and quantifiable net costs for the resource over its available life, including the cost of production, transportation, utilization, waste management, environmental compliance, and, in the case of imported energy resources, maintaining access to foreign sources of supply.

(3) When comparing an energy efficiency resource to an energy resource, a higher priority shall be assigned to the energy efficiency resource whenever its estimated system cost is equal to the estimated system cost of the energy resource.

SEC. 102. CONFORMING AMENDMENTS.—(a) Section 801 of Public Law 95-91 is amended in subsection (c)(1) by inserting "cost estimates," after "whatever data and analysis are necessary to support the".

(b) Title III of the Energy Security Act (42 U.S.C. 7361, et seq.) is hereby repealed.

Subtitle B—Director of Climate Protection

SEC. 111. APPOINTMENT.—(a) Within six months after the date of the enactment of this Act, the Secretary shall appoint within the Department, a Director of Climate Protection (the "Director"). The Director shall:

(1) in the absence of the Secretary, serve as his representative for interagency and multilateral policy discussions of global climate change;

(2) monitor domestic and international policies for their effects on the generation of carbon dioxide and other greenhouse gases; and

(3) have the authority to participate in the planning activities in relevant Departmental programs.

(b) Beginning eighteen months after the date of the enactment of this Act, and annually thereafter, the Director shall participate in the formulation of the least-cost energy strategy under section 101, research and development priorities under section 301, and the management plan under section 302.

Subtitle C—National Academies of Science and Engineering

SEC. 121. REVIEW.—(a) Within ninety days after his appointment under section 111, the Director, in consultation with the Office of Science and Technology Policy (the "Office"), shall seek to enter into an agreement with the National Research Council to use the services of the National Academy of Sciences and the National Academy of Engineering (the "Academies") to conduct an ongoing review of current knowledge regarding—

(1) trends in the atmospheric concentrations of greenhouse gases, including current capabilities to model such trends with sufficient reliability to support international, domestic, and regional policy formulation;

(2) the causes of global climate change and the relative contribution of various sources of greenhouse gases including, but not limited to, fossil fuel production and use, forest management practices, agricultural practices, and other sources;

(3) the climatic, physical, economic, social and environmental consequences of current trends in atmospheric concentration of greenhouse gases;

(4) actions that might be taken to mitigate or adapt to possible adverse economic, social, and environmental consequences of global climate change and the relative cost-effectiveness of these actions;

(5) the generation and disposition of greenhouse gases into the environment including the relative contribution of the oceans, clouds, and biosphere; and

(6) current knowledge on the relationship between those policies that mitigate or abate stratospheric ozone depletion and those policies that mitigate or abate global climate change.

(b) In conducting such review, the Academies are encouraged to consult with international scientific and technical entities to determine where there is a consensus in current knowledge with respect to paragraphs (a)(1) through (6).

(c) The Secretary, the Secretary of Commerce, the Secretary of the Interior, the Secretary of Transportation, the Secretary of Agriculture, the Administration of the Environmental Protection Agency, and the Director of the National Science Foundation shall, upon request, furnish to the Office and the National Research Council any information that such Office or Council determines to be necessary for purposes of conducting the review required under subsection (a).

SEC. 122. REPORT TO THE CONGRESS.—(a) Within one year after the date of the enactment of this section and periodically thereafter the Academies shall submit a report containing the findings and recommendations resulting from the review conducted under section 121 to the Office and the Congress. The findings and recommendations contained in such report shall not be subject to any prior clearance or review, nor shall any prior clearance conditions be im-

posed on the National Research Council, as part of the agreement made by the Office.

(b) Within six months after the transmission of such report to the Congress, the President shall transmit to the Congress his assesment of the findings and recommendations in the report pursuant to subsection (a) and any recommendations therein.

TITLE II—ENERGY EFFICIENCY INITIATIVES

Subtitle A—Energy Efficiency

SEC. 201. REPORT.—The Secretary, in consultation with the Council of Economic Advisors, shall submit to the Congress within one year after the date of the enactment of this subtitle, and every three years thereafter through the year 2003, a report evaluating energy efficiency policy options that would be necessary to produce decreases of one, two, three, and four per centum per year in overall United States, energy use per unit of GNP through the year 2005. These policy options shall be ranked according to their cost-effectiveness and feasibility of implementation.

SEC. 202. ENERGY-INTENSIVE INDUSTRIES.—(a) The Secretary, acting in accordance with authority contained in the Federal Nonnuclear Energy Research and Development Policy Act of 1974 (42 U.S.C. 5901-5920) and other laws applicable to the Secretary, shall—

(1) pursue a research and development program intended to improve energy efficiency and productivity in energy-intensive industries and industrial processes; and

(2) undertake joint ventures to encourage commercialization of technologies developed under paragraph (1).

(b)(1) The Secretary shall—

(A) conduct a competitive solicitation for proposals from specialized private firms and investors for such joint ventures under subsection (a)(2); and

(B) provide financial assistance to at least five such joint ventures.

(2) The purpose of the joint ventures shall be to design, test and demonstrate changes to industrial processes that will result in improved energy efficiency and productivity. The joint ventures may also demonstrate other improvements of benefit to such industries so long as demonstration of energy efficiency improvements is the principal objective of this joint venture.

(3) In evaluating proposals for financial assistance and joint ventures under this section, the Secretary shall consider—

(A) whether the research and development efforts under this section (i) improve the quality and efficiency of industrial processes, and (ii) reduce the generation of carbon dioxide and other greenhouse gases into the atmosphere; and

(B) the regional distribution of energy-intensive industries and whether the joint-venture projects are located in the region in which the energy-intensive industries are located.

(c) There is authorized to be appropriated to the Secretary $5,000,000 for fiscal year 1992, $15,000,000 for fiscal year 1993, and $25,000,000 for fiscal year 1994.

SEC. 203. FEDERAL ENERGY MANAGEMENT AMENDMENTS.—Part 3 of title V of the National Energy Conservation Policy Act (NECPA) (42. U.S.C. 8251 et seq.), as amended, is further amended as follows:

(a) In section 543:

(1) Strike subsection (a) and insert the following new text in lieu thereof:

"(a) ENERGY MANAGEMENT REQUIREMENT FOR FEDERAL BUILDINGS.—(1) Not later than January 1, 2000, each Federal agency shall, to the maximum extent practicable, install in Federal buildings under the control of such agency in the United States, all energy conservation measures with payback periods of less than ten years as calculated using the methods and procedures developed pursuant to section 544. By January 1, 1993, each agency shall submit to the Secretary a list of projects meeting the ten-year payback criterion, the energy that each project will save and total energy and cost savings involved. Subject to the availability of appropriated funds, each Federal agency shall have substantially completed at least 25 per centum of the projects on the list or projects on the list that would account for 25 per centum of total energy savings, by January 1, 1995. If any agency has not met this requirement, such agency shall spend no funds in States where this requirement has not been met for the construction or acquisition of a Federal building except to meet the requirements of this section. If any agency has not met the requirements of this section for the year 2000, then such agency shall spend no funds in States where this requirement has not been met for the construction or acquisition of a Federal building except to meet the requirements of this section. The Secretary may waive the requirements of this section if the Secretary finds that an agency is taking all practicable steps to meet the requirement and that the sanctions of this section will pose an unacceptable burden upon the agency. If the Secretary waives the requirements of this section, he shall notify Congress promptly.

"(2) An agency may exclude from the requirements of paragraph (1) any Federal building or collection of Federal buildings, and the associated energy consumption and gross square footage, if the head of such agency finds that compliance with the requirements of paragraph (1) would be impractical. A finding of impracticability shall be based on the energy intensiveness of activities carried out in such Federal buildings or collection of Federal buildings, the type and amount of energy consumed, the technical feasibility of making the desired changes, and the unique character of many facilities operated by the Departments of Defense and Energy. Each agency shall identify and list in each report made under section 548 the Federal buildings designated by it for such exclusion. The Secretary of Energy shall review such findings for consistency with the impracticability standards set forth herein, and may within ninety days after receipt of the findings, reverse a finding of impracticability, in which case, the agency shall comply with the requirements of paragraph (1). This section shall not apply to an agency's facilities that generate or transmit electric energy, nor to the uranium enrichment facilities operated by the Department of Energy.";

(3) In subsection (b):

(A) after the words "subsection (a)," insert the following:

"The Secretary of Energy shall consult with the Secretary of Defense and the Administrator of the General Services Administration in developing guidelines for the implementation of this part, and";

(B) strike the phrase "Federal Energy Management Improvement Act of 1988," in paragraph (1) and insert in thereof "National Energy Policy Act of 1990, and submit to the Secretary of Energy";

(C) after the words "high priority projects;" insert the following; "and such plan shall include steps to take maximium advantage of contracts authorized under title VIII of this Act (42 U.S.C. 8287 et seq.), financial incentives, and other services provided by utilities for efficiency investment and other forms of financing to reduce the direct costs to the government;";

(D) at the end of paragraph (2), strike the semicolon and insert the following: ", and update such surveys periodically, but not less than every three years;";

(E) replace paragraph (3) with the following new paragraph:

"(3) using such surveys, determine the cost and payback period of energy conservation measures likely to achieve the goals of this section;"; and

(F) insert a new paragraph (4) as follows, and renumber paragraph (4) and "(5)"

"(4) install those energy conservation measures that will attain the requirements of this section in a cost-effective manner as defined in Section 544, and".

(b) in section 544:

(1) Strike "National Bureau of Standards," in subsection (a) and insert in lieu thereof "National Institute of Standards and Technology,"; and

(2) strike all after word "each", in paragraph (b)(2) and insert in lieu thereof: "agency shall, after January 1, 1994, fully consider the energy efficiency of all potential building space at the time of renewing or entering into a new lease. Further, all government owned and leased space constructed after January 1, 1994, shall meet model Federal building standards for energy efficiency.".

(c) In section 545, add after the word "measures" the following: "as needed to meet the requirements of section 543.".

(d) in section 546, strike the text of subsection "(b)" and insert in lieu thereof the following:

"IMPLEMENTATION.—To facilitate the financing of energy conservation energy measures, each Federal agency shall promote the use of contracts authorized by title VIII of this Act (42 U.S.C. 8287 et seq.). The Secretary, in consultation with the Secretary of Defense and the Administrator of the General Services Administration, within six months after the date of the enactment of the National Energy Policy Act of 1990, shall develop appropriate procedures and methods for use by Federal agencies to select energy service contractors that will achieve the intent of this section in a cost-effective manner. Notwithstanding any other procurement laws and regulations, such procedures and methods shall apply to the selection of energy service contractors by each Federal agency.".

(e) In section 548:

(1) strike the word "Each" in subsection (a) and insert in lieu thereof the following:

"In addition to the plan required to be submitted to the Secretary pursuant to Section 543(b)(1), each";

(2) insert the phrase "by April 2 of each year," after the word "annually" in subsection (b); and

(3) insert the words "by each agency", after the words "under this part" in subsection (b)(1).

SEC. 204. FUEL CELLS.—Subsection 6(c) of the Renewable Energy and Energy Efficiency Technology Competitiveness Act of 1989 (Public Law 101-218) is amended by adding a new paragraph (6) as follows:

"(6)(A) The Secretary shall solicit proposals for, and provide financial assistance to, at least one joint venture for the demonstration of fuel cells technology in accordance with the provisions of this paragraph.

"(B) The purpose of joint ventures supported under this paragraph shall be to design, test, and demonstrate critical enabling technologies for the production of electric energy from fuel cells in order to accelerate commercial application of fuel cells.

"(C) There are authorized to be appropriated to the Secretary not to exceed $3,000,000 for each of the fiscal years 1992, 1993, and 1994 to carry out this paragraph.".

SEC. 205. REPEAL OF PROHIBITIONS ON SUPPLY AND INSTALLATION OF RESIDENTIAL ENERGY CONSERVATION MEASURES BY UTILITIES.—Section 216 of the National Energy Conservation Policy Act (42 U.S.C. 8217) is repealed and subsequent sections are renumbered accordingly.

SEC. 206. ENERGY EFFICIENCY LABELING FOR WINDOWS AND WINDOW SYSTEMS.—(a)(1) The Secretary shall provide financial assistance to support a voluntary, national window rating program to develop energy ratings and labels for windows and window systems. The rating program shall be developed in order to be implemented by December 31, 1992. The rating program shall include specifications and guidelines that will enable all window buyers to make more informed purchasing decisions about the energy efficiency of windows and window systems. The rating program shall also contain information that allows window buyers to assess the energy consumption and potential cost savings of alternative window products.

(2) The rating program shall be administered by the National Fenestration Rating Council. The National Fenestration Rating Council shall periodically report to Congress and the Secretary on the progress being made toward establishing the voluntary, national window rating program.

(b) The Secretary shall monitor and evaluate the efforts of the National Fenestration Rating Council and make determinations whether the voluntary, national window rating system established within the National Fenestration Rating Council is consistent with subsection (a) of this section.

(c)(1) If the objectives of subsection (a) are not met by December 31, 1992, the Secretary shall, in consultation with the National Institute of Standards and Technology, develop, within one year, rating procedures under section 323 of the Energy Policy and Conservation Act (42 U.S.C. 6293) for windows and window systems.

(2) The Federal Trade Commission (hereafter in this section, the "Commission") shall prescribe labeling rules under section 324 of said Act (42 U.S.C. 6294) for windows and window systems except to the extent that with respect to any type of window or window system (or class thereof), the Commission determines that labeling in accordance with this section is not technologically or economically feasible or is not likely to assist consumers in making purchasing decisions; and

(3) For purposes of sections 323 and 324 of said Act, windows and window systems shall be considered covered products under section 322 of such Act (42 U.S.C. 6292).

(d) There are authorized to be appropriated to the Secretary $750,000 for each of the fiscal years 1992, 1993, and 1994 for the purposes of this section.

SEC. 207. ENERGY EFFICIENCY INFORMATION.—(a) Within one year after the date of the enactment of this section, the Administrator of the Energy Information Administration shall report to Congress on the information being collected or otherwise acquired by the Administrator with respect to the efficiency of energy consumption. The report shall estimate future needs for collection of additional information related to energy efficiency and environmental impacts. The report shall also consider the feasibility of—

(1) increasing the frequency of collection of information on the utilization of energy;

(2) including additional energy-using classes and sectors in surveys conducted; and

(3) collecting additional information to assist in the analysis of barriers to improvement in energy efficiency.

(b) The report shall take into account reporting burdens and the protection of proprietary information under law.

(c) The Administrator shall periodically publish measures of energy efficiency in classes, sectors, and regions that consume significant amounts of energy.

SEC. 208. COMPACT FLUORESCENT LAMPS IN FEDERAL FACILITIES.—Not later than one hundred and eighty days after the date of the enactment of this section, the Secretary shall submit to the Congress a report on the feasibility and effectiveness of requiring some or all Federal facilities to use compact fluorescent lamps instead of incandescent lamps in order to reduce the use of electrical energy and thereby reduce the generation of carbon dioxide and sulfur dioxide.

SEC. 209. DEMONSTRATION.—(a) Within one year after the date of the enactment of this Act, the Secretary shall submit a plan to Congress for the demonstration in Federal facilities, or by Federal agencies, of energy and energy efficiency resource technologies that have received Federal financial assistance for research and development. The technologies shall be those that are ready for commercial demonstration but are not widely commercially available. The Plan shall include—

(1) a listing of those technologies with specific candidate sites for the demonstration;

(2) the energy, environmental, cost savings or other expected benefits;

(3) a timetable for implementation; and

(4) a process for evaluation of the performance of the technologies.

(b) The Plan shall be updated every two years.

SEC. 210. HOME ENERGY EFFICIENCY RATINGS.—(a) Title II of the National Energy Conservation Policy Act is amended by adding a new part 6 as follows:

"PART 6—RESIDENTIAL ENERGY EFFICIENCY RATINGS

"SEC. 271. RATINGS.—(a) Within twelve months after the date of the enactment of the National Energy Policy Act of 1990, the Secretary, in consultation with the Secretary of Housing and Urban Development and State governments, shall, by rule, promulgate guidelines for procedures to be implemented by State governments that would enable the assignment of an energy efficiency rating to residential buildings.

"(b) The rule under subsection (a) shall—

"(1) provide for a numerical rating of the efficiency with which any residential building may be supplied with heating and cooling energy on an annual basis, and evaluate the practicality of including major energy consuming appliances in such rating;

"(2) provide that all residential buildings can receive a rating at time of sale;

"(3) ensure that the rating is prominently communicated to potential buyers and renters; and

"(4) ensure that the rating system is designed to facilitate its use by lenders and the secondary mortgage markets to promote energy efficiency.

"(c) For purposes of the rule under subsection (a), supply of energy to any residential building from renewable sources shall not result in a reduction in the energy efficiency rating of such building.

"SEC. 272. TECHNICAL ASSISTANCE.—Within twelve months of the date of the enactment of this section the Secretary shall establish a program to provide technical assistance for State and local governments adopting energy efficiency rating systems or building codes. The program shall utilize the Federal Government's experience in developing Federal building energy performance standards and shall provide compliance methods, educational materials for builders and code officials, and other technical support.

"SEC. 273. AUTHORIZATION.—There are hereby authorized to be appropriated such funds as are necessary to carry out the purposes of this subtitle.".

(b) The National Energy Conservation Policy Act should be further amended by adding in the table of contents at the end of Title II—Residential Energy Conservation, the following items:

"PART 6—RESIDENTIAL ENERGY EFFICIENCY RATINGS

"Sec. 271. Ratings.

"Sec. 272. Technical Assistance.

"Sec. 273. Authorization.".

Subtitle B—Amendments to the Public Utility Regulatory Policies Act of 1978

SEC. 211. ENCOURAGEMENT OF INVESTMENTS IN CONSERVATION AND ENERGY EFFICIENCY RESOURCES AND STUDY OF CERTAIN STATE RATEMAKING POLICIES.—(a) The Public Utility Regulatory Policies Act of 1978 (92 Stat. 3117), as amended, is further amended by inserting the following new paragraph at the end of section 111:

"(7) ENCOURAGEMENT OF INVESTMENTS IN CONSERVATION AND ENERGY EFFICIENCY RESOURCES.—

"(A) The rates allowed to be charged by a State-regulated electric utility shall be such that the utility's investments in and expenditures for energy conservation, energy efficiency resources, and other demand side management measures are as profitable as its investments in and expenditures for the construction of new generation facilities.

"(B) For purposes of implementing the provisions of this paragraph, any reference contained in this title to the date of enactment of the Public Utility Regulatory Policies Act of 1978 shall be deemed to be a reference to the date of enactment of the National Energy Policy Act of 1990.".

(b) Not later than two years after the date of the enactment of this Act, the Secretary shall submit a report to the President and to the Congress containing—

(1) a survey of all State laws, regulations, practices, and policies under which State regulatory authorities require or permit rates charged by an electric utility to reflect least-cost planning;

(2) an evaluation by the Secretary of whether, and to what extent, least-cost planning is likely to result in: (A) higher or lower electricity costs to an electric utility's ultimate consumers or to classes or groups of such consumers, (B) enhanced or reduced reliability of electric service, and (C) increased or decreased dependence on particular energy resources; and

(3) an evaluation by the Secretary of whether, and to what extent, ratemaking methodologies implementing least-cost planning adequately take into account the impact of such measures on electric utilities' costs, operations, and rate of return on investment.

(c) For purposes of this subtitle, the term "least-cost planning" means any standard, regulation, practice, or policy by which a State regulatory agency considers, or requires an electric utility to consider, actions (including, but not limited to, the construction of or purchase of electric energy from new generation facilities and investment in or expenditures for conservation, energy efficiency resources, or other demand side management measures) taken by a State regulated utility to provide adequate and reliable service to its electric consumers with the incurrence of lowest costs by such utility and its customers.

Subtitle C—Fuel Cells

SEC. 221. AMENDMENT.—Title V of the National Energy Conservation Policy Act (42 U.S.C. 8251-8261) is amended by adding the following new part after section 569:

"PART 5—FUEL CELLS

"SEC. 571. DEFINITIONS.—For purposes of this subtitle the term:

"(1) 'Federal building' shall mean 'Federal building' as defined by section 549(6); and

"(2) 'Task Force' shall mean the Interagency Energy Management Task Force established pursuant to section 547, except that, for purposes of this subtitle, the term 'Task Force' shall include the Environmental Protection Agency.

"SEC. 572. FUEL CELL PROGRAM.—The Secretary, in consultation with the Task Force, shall conduct a program to promote the early commercial application of fuel cell systems for the production of electricity by the demonstration of such systems in Federal buildings.

"SEC. 573. PURPOSES.—The purposes of this program are to:

"(1) improve the efficiency and reduce the environmental consequences of the nation's electric generation capability;

"(2) stimulate the creation of new industries and job opportunities in efficient and environmentally sound energy technologies; and

"(3) develop cost, efficiency, performance, environmental, and reliability data on fuel cell systems used in the production of electricity.

"SEC. 574. IMPLEMENTATION AND ACQUISITION.—(a) In preparing or updating the plan required by section 543(b)(1), each agency on the Task Force shall identify at least two potential projects for the demonstration of the application of fuel cell systems for the production of energy to satisfy electrical and other energy requirements of such buildings.

"(b) Not later than 6 months after the submission to the Secretary of such plan, including the list of potential projects required under subsection (a), the Secretary, in consultation with the Task Force, shall identify a minimum of ten projects for implementation pursuant to subsection (c) and shall make a report of his selection including the basis therefor, to the Congress.

"(c) The Secretary may provide financial assistance to agencies sponsoring projects, identified under subsection (b), to acquire and install fuel cell systems manufactured in the United States and any associated equipment which may be necessary for the implementation of any of the listed projects. In order to receive financial assistance from the Secretary, a project identified under subsection (b) must meet the ten-year payback criterion of section 543. The calculation of such ten-year payback period shall take account of cost benefits associated with cogenerated energy to the extent provided under section 544. In selecting qualified projects for financial assistance, the Secretary, in consultation with the Task Force, shall also consider the cost of the electricity to be generated; the extent of cost-sharing provided by other agencies for the acquisition of new equipment; the appropriateness of the locations, sites, and structures in question; the adaptability of facilities to program requirements; whether Federal buildings undergoing new construction or renovation offer advantages of cost-efficiency or ease of installation over existing Federal buildings; and such other factors that, in the judgment of the Secretary and the Task Force, may affect the benefits or costs of the fuel cell program.

"(d) Not later than January 1, 1996, the Secretary, in consultation with the Task Force, shall submit a report to Congress on the program authorized by this subtitle, which shall include information comparing the cost, efficiency, perfomance, environmental advantages, and reliability of fuel cells to other existing technological means of generating electricity, using data obtained from the operation of fuel cells acquired under this program. Such report shall also contain a discussion of all technical and economic issues which, in the judgment of the Secretary, might prevent the commercial use of fuel cells or restrict the use of fuel cells in certain applications and an analysis, including recommendations, of the steps needed to overcome such restrictions. A copy of such report shall be provided to each agency for further implementation of fuel cell projects consistent with the provisions of section 543(a), as appropriate.

"SEC. 575. AUTHORIZATION.—There is authorized to be appropriated to carry out the provisions of this subtitle a total of $15,000,000 for fiscal years 1992 through 1994.".

Subtitle D—Solar, Wind, Waste and Geothermal Electric Power Production

SEC. 231. PURPA AMENDMENTS.—Section 210 of the Public Utility Regulatory Policies Act of 1978 is amended as follows:

(a) In subsection (a), strike out ", and to encourage geothermal small power production facilities of not more than 80 megawatts capacity,".

(b) In subsection (e)(2), insert "(other than a qualifying small power production facility which is a solar, wind, waste or geothermal facility as defined in section 3 (17)(E) of the Federal Power Act)" after "facility" where it first appears, and by striking out ", or 80 megawatts for a qualifying small power production facility using geothermal energy as its primary energy source."

SEC. 232. FEDERAL POWER ACT AMENDMENTS.—(a) Section 3(17)(A) of the Federal Power Act is amended by inserting "a facility which is a solar, wind, waste or geothermal facility, or" after " 'small power production facility' means".

(b) Section 3(17) of such Act is further amended by inserting at the end thereof the following new subparagraph:

[1](E) "solar, wind or geothermal facility" means a facility which produces electric energy solely by the use, as a primary energy source, of solar energy, wind energy or geothermal resources;"

SEC. 233. FERC REGULATIONS.—(a) Within 30 days of the date of enactment of this Act, the Federal Energy Regulatory Commission shall issue such proposed modifications to its regulations as may be necessary to implement the amendments made by this subtitle, and within 90 days of such date, the Commission shall issue final regulations.

(b) Until regulations described in subsection (a) are final and effective, and solar, wind, waste or geothermal facility (as defined in section 3(17)(E) of the Federal Power Act), which is a qualifying small power production facility as defined in subparagraph (C) of section 3(17) of the Federal Power Act (as such section 3(17) is amended by this Act), (A) shall be considered a qualifying small power production facility under part 292 of title 18 of the Code of Federal Regulations, notwithstanding any size limitations contained in such part, and (B) shall not be subject to the size limitation contained in section 292.601(b) of such part.

(c) The provisions of Subtitle C shall apply to a solar, wind or geothermal facility only if

(1) either of the following is submitted to the Federal Energy Regulatory Commission during the two year period beginning on the date of enactment of this Act:

(A) an application for certification of the facility as a qualifying small power production facility; or

(B) notice that the facility meets the requirements for qualification; and

(2) construction of such facility commences within five years of the date of such application or notice and reasonable diligence is exercised toward the completion of such facility, taking into account all factors relevant to the construction of the facility.

TITLE III—ENERGY RESEARCH AND DEVELOPMENT INITIATIVES

Subtitle A—General

SEC. 301. ENERGY RESEARCH AND DEVELOPMENT PRIORITIES.—In establishing research and development priorities, the Secretary shall include consideration of the following criteria:

(a) the potential to reduce generation of carbon dioxide and other greenhouse gases sooner than alternative projects;

(b) the projected cost-effectiveness of the energy or energy efficiency resource to be produced or saved, including an evaluation of the likelihood of the research contributing to the achievement of the purposes of this Act;

(c) the comparative environmental and public health impacts of the energy to be produced or saved by the specific research;

(d) the national security impact of the energy produced or saved, including its projected contribution to the reduction of oil imports and to the diversity of the domestic energy resource mix;

(e) the obstacles inherent in private industry's development of new energy technologies and steps necessary for establishing or maintaining technological leadership in the area of energy and energy efficiency resource technologies, including, but not limited to, solar, fuel cells, fusion, clean-coal technologies, and hydrogen;

(f) the contribution of a given research activity to fundamental scientific knowledge;

(g) the anticipated impact of the results of research activities on special or targeted populations, including low-income or aged persons; and

(h) the contribution to United States competitiveness.

SEC. 302. MANAGEMENT PLAN.—(a) The Secretary, in consultation with the Energy Advisory board to the Secretary, shall prepare a management plan for the conduct of research, development, and commercialization of energy technologies that is consistent with the purposes of this Act and guided by the priorities set forth in section 301.

(b) The management plan under subsection (a) shall contain proposals for—

(1) investigation of promising but unproven energy and energy efficiency resource technologies that have been identified as potentially significant future contributors to the least-cost energy strategy under section 101;

(2) development of contingency energy and energy efficiency resource technologies that have the potential to mimimize adverse impacts on the environment, the global climate, and the economy; and

(3) creation of opportunities for export of energy and energy efficiency resource technologies from the United States that can make a substantial contribution to reducing the impact on the global climate of the energy resource supply and use patterns of foreign nations.

(c) Within one year after the date of the enactment of this section, the Secretary shall submit the first management plan under this section to Congress. Thereafter, the Secretary shall submit a revised management plan biennially at the time of submittal of the President's annual budget submission to the Congress.

SEC. 303. JOINT VENTURES.—Joint ventures authorized under this Act shall be conducted pursuant to the Renewable Energy and Energy Efficiency Technology Competitiveness Act of 1989 (Public Law 101-218).

Subtitle B—Engine and Vehicle Fuel Research

SEC. 311. VEHICLE ENGINE FUEL RESEARCH.—The Secretary shall establish and carry out a program of research, development, and demonstration on advanced vehicle engine systems (including engine systems that rely on alternative fuels, reformulated gasoline, or advanced, high efficiency materials) that offer the potential to reduce the generation of greenhouse gases and improve the efficiency of energy in transportation uses.

SEC. 312. HIGH EFFICIENCY HEAT ENGINES.—(a) In carrying out a program of research, development, and demonstration on high efficiency heat engines, the Secretary shall emphasize advanced gas turbine cycles, and the incorporation of energy efficient materials in advanced gas turbine cycles for high efficiency electric and automotive power generation, such as—

(1) advanced combined cycle turbines;

(2) steam-injected gas turbines (STIG); and

(3) intercooled steam-injected gas turbines (ISTIG).

(b) The Secretary may enter into joint ventures with the appropriate parties to construct and demonstrate high efficiency heat engines.

(c) There is authorized to be appropriated not more than $25,000,000 for each of the fiscal years 1992, 1993, and 1994, for purposes of this section.

SEC. 313. NATURAL GAS COFIRING RESEARCH, DEVELOPMENT AND DEMONSTRATION.—(a) DEFINITIONS.—For the purposes of this section, the term—

(1) "cofiring" means the injection of natural gas and pulverized coal into the primary combustion zone of an electric utility unit or an industrial boiler and shall include gas reburn technologies; and

(2) "gas reburn" means the injection of natural gas into the upper furnace region of an electric utility unit or an industrial boiler to produce a fuel-rich zone thereby reducing nitrogen oxide emissions.

(b) The Secretary shall conduct a program of research, development and demonstration of cofiring in electric utility units and large industrial boilers in order to determine optimal natural gas injection levels for both environmental and operational benefits.

(c) The Secretary may provide financial assistance under this section to public entities or interested or affected private firms to perform the research, development and demonstration of cofiring technologies.

(d) The Secretary may enter into cooperative agreements with, and provide financial assistance under this section to, public entities or interested or affected private firms willing to provide at least 50 per centum of the costs of such programs to perform the research, development and demonstration of confiring technologies.

(e) For purposes of this section, there is authorized to be appropriated to the Secretary not more than $9,000,000 for each of the fiscal years 1992, 1993 and 1994.

Subtitle C—Hydrogen Research

SEC. 321. SHORT TITLE.—This subtitle may be referred to as the "Spark M. Matsunaga Hydrogen Research and Development Act of 1990".

SEC. 322. PURPOSE AND DEFINITION.—(a) The purposes of this subtitle are—

(1) to direct the Secretary to prepare a comprehensive five-year program management plan that will identify and resolve critical technical issues necessary for the realization of a domestic capability to produce, distribute, and use hydrogen economically within the shortest time practicable;

(2) to direct the Secretary to develop a technology assessment and information transfer program among the Federal agencies and aerospace, transportation, energy, and other entities; and

(3) to develop renewable energy resources as a primary source of energy for the production of hydrogen.

(b) As used in this subtitle, the term "critical technology" or "critical technology issue" means a technology or issue that, in the opinion of the Secretary, requires understanding and development in order to take the next needed step in the development of hydrogen as an economic fuel or storage medium.

SEC. 323. COMPREHENSIVE MANAGEMENT PLAN.—(a) The Secretary shall prepare a comprehensive five-year program management plan for research and development activities, which shall be conducted over a period of no less than five years and shall be consistent with the provisions of sections 324 and 325. In the preparation of such plan, the Secretary shall consult with the Administrator of the National Aeronautics and Space Administration, the Secretary of Transportation, the Hydrogen Technical Advisory Panel, and the heads of such other Federal agencies and such public and private organizations as he deems appropriate. The plan shall be structured to identify and address areas of research critical to the realization of a domestic hydrogen production capability within the shortest time practicable.

(b) Within one hundred and eighty days after the date of the enactment of this Act, the Secretary shall transmit the comprehensive program management plan to the Committee on Science, Space, and Technology of the United States House of Representatives and the Committee on Energy and Natural Resources of the United States Senate. Subsequent plans shall be incorporated in the management plan under section 302. The plan shall include—

(1) a prioritization of research areas critical to the economic use of hydrogen as a fuel and energy storage medium;

(2) the program elements, management structure, and activities, including program responsibilities of individual agencies and individual institutional elements;

(3) the program strategies including technical milestones to be achieved toward specific goals during each fiscal year for all major activities and projects;

(4) the estimated costs of individual program items, including current as well as proposed funding levels for each of the five years of the plan for each of the participating agencies;

(5) a description of the methodology of coordination and technology transfer; and

(6) the proposed participation by industry and academia in the planning and implementation of the program.

(c) The Secretary shall, in consultation with the Secretary of Transportation, the Administrator of the National Aeronautics and Space Administration, and the Hydrogen Technical Advisory Panel, also prepare a comprehensive large-scale hydrogen demonstration plan with respect to demonstrations carried out pursuant to section 325. Subsequent plans shall be incorporated in the management plan under section 302. Such plan shall include—

(1) a description of the necessary research and development activities that must be completed before initiation of a large-scale hydrogen production and storage demonstration program;

(2) an assessment of the appropriateness of a large-scale demonstration immediately upon completion of the necessary research and development activities;

(3) an implementation schedule with associated budget and program management resource requirements; and

(4) a description of the role of the private sector in carrying out the demonstration program.

SEC. 324. RESEARCH AND DEVELOPMENT.—(a) The Secretary shall conduct a research and development program, consistent with the comprehensive five-year program management plan under section 323, to ensure the development of a domestic hydrogen fuel production capability within the shortest time practicable consistent with market conditions.

(b)(1) Particular attention shall be given to developing and understanding and resolution of all critical technical issues preventing the introduction of hydrogen into the marketplace.

(2) The Secretary shall initiate research or accelerate existing research in critical technical issues that will contribute to the development of more economic hydrogen production and use, including, but not limited to, critical technical issues with respect to production, liquefaction, transmission, distribution, storage, and use (including use of hydrogen in surface transportation).

(c) The Secretary shall give priority to those production techniques that use renewable energy resources as their primary source of energy for hydrogen production.

(d) The Secretary shall, for the purpose of performing his responsibilities pursuant to this subtitle, solicit proposals for and evalu-

ate any reasonable new or improved technology that could lead or contribute to the development of economic hydrogen production storage and utilization.

(e) The Secretary shall conduct evaluations, arrange for tests and demonstrations, and disseminate to developers information, data, and materials necessary to support efforts undertaken pursuant to this section, consistent with section 336.

SEC. 325. DEMONSTRATIONS.—(a) The Secretary shall conduct demonstrations of critical technologies, preferably in self-contained locations, so that technical and non-technical parameters can be evaluated to best determine commercial applicability of the technology.

(b) Concurrently with activities conducted pursuant to section 324, the Secretary shall conduct small-scale demonstrations of hydrogen technology at self-contained sites.

SEC. 326. TECHNOLOGY TRANSFER PROGRAM.—(a) The Secretary shall conduct a program designed to accelerate wider application of hydrogen production, storage, utilization, and other technologies available in near term as a result of aerospace experience as well as other research progress by transferring critical technologies to the private sector. The Secretary shall direct the program with the advice and assistance of the Hydrogen Technical Advisory Panel. The objective in seeking this advice is to increase participation of private industry in the demonstration of near commercial applications through cooperative research and development arrangements, joint ventures or other appropriate arrangements involving the private sector.

(b) The Secretary, in carrying out the program authorized by subsection (a), shall—

(1) undertake an inventory and assessment of hydrogen technologies and their commercial capability to economically produce, store, or utilize hydrogen in aerospace, transportation, electric utilities, petrochemical, chemical, merchant hydrogen, and other industrial sectors; and

(2) develop a National Aeronautics Space Administration, Department of Energy, and industry information exchange programs to improve technology transfer for—

(A) application of aerospace experience by industry;

(B) application of research progress by industry and aerospace;

(C) application of commercial capability of industry by aerospace; and

(D) expression of industrial needs to research organizations.

The information exchange program may consist of workshops, publications, conferences, and a data base for the use by the public and private sectors.

SEC. 327. COORDINATION AND CONSULTATION.—(a) The Secretary shall have overall management responsibility for carrying out programs under this subtitle. In carrying out such programs, the Secretary, consistent with such overall management responsibility—

(1) shall use the expertise of the National Aeronautics and Space Administration and the Department of Transportation; and

(2) may use the expertise of any other Federal agency in accordance with subsection (b) in carrying out any activities under this subtitle, to the extent that the Secretary determines that any such agency has capabilities which would allow such agency to contribute to the purpose of this subtitle.

(b) The Secretary may, in accordance with subsection (a), obtain the assistance of any department, agency, or instrumentality of the Executive branch of the Federal Government upon written request, on a reimbursable basis or otherwise and with the consent of such department, agency, or instrumentality. Each such request shall identify the assistance the Secretary deems necessary to carry out any duty under this subtitle.

(c) The Secretary shall consult with the Administrator of the National Aeronautics and Space Administration, the Administrator of the Environmental Protection Agency, the Secretary of Transportation, and the Hydrogen Technical Advisory Panel established under section 328 in carrying out his authorities pursuant to this subtitle.

SEC. 328. TECHNICAL PANEL.—(a) There is hereby established a technical panel, to be known as the Hydrogen Technical Advisory Panel (the "technical panel"), to advise the Secretary on the programs under this subtitle.

(b) The technical panel shall be appointed by the Secretary and shall be comprised of such representatives from domestic industry, universities, professional societies, Government laboratories, financial, environmental, and other organizations as the Secretary deems appropriate based on his assessment of the technical and other qualifications of such representatives. Appointments to the technical panel shall be made within ninety days after the enactment of this subtitle. The technical panel shall have a chairman, who shall be elected by the members from among their number.

(c) The heads of the departments, agencies, and instrumentalities of the Executive branch of the Federal Government shall cooperate with the technical panel in carrying out the requirements of this section and shall furnish to the technical panel such information as the technical panel deems necessary to carry out this section.

(d) The technical panel shall review and make any necessary recommendations to the Secretary on the following items—

(1) the implementation and conduct of programs under this subtitle;

(2) the economic, technological, and environmental consequences of the deployment of hydrogen production and use systems; and

(3) comments on and recommendations for improvements in the comprehensive five year program management plan required under section 323.

(e) The Secretary shall provide such staff, funds and other support as may be necessary to enable the technical panel to carry out the functions described in this section.

SEC. 329. AUTHORIZATIONS.—There is hereby authorized to be appropriated to carry out the purposes of this subtitle (in addition to any amounts made available for such purposes pursuant to other Acts)—

(1) $3,000,000 for the fiscal year beginning October 1, 1992;

(2) $7,000,000 for the fiscal year beginning October 1, 1993; and

(3) $10,000,000 for the fiscal year beginning October 1, 1994.

Subtitle D—Fusion

SEC. 331. PROGRAMS.—(a) The Secretary shall conduct research, development, and demonstration programs to address in a timely fashion questions concerning the development of magnetic and inertial confinement fusion for the production of electricity consistent with the purposes of this Act. Such programs shall include by the year 2010—

(1) a demonstration of the achievement of ignition conditions in both magnetic and inertial confinement fusion test facilities; and

(2) a demonstration of the technological feasibility of magnetic and inertial confinement fusion for the production of electricity.

(b) In the event such feasibility is determined for a fusion technology pursuant to subsection (a), the Secretary shall prepare a design for a prototype commercial fusion reactor using such technologies, including associated cost estimates and specifications shall be in sufficient detail to permit bids for construction.

Subtitle E—Coal

SEC. 341. COAL PROGRAM GOALS.—(a) The Secretary shall establish research, development, and demonstration goals to asssure the timely development of technologies for the production, transportation, and utilization of coal consistent with this Act.

(b) The Secretary shall establish a research, development, and demonstration program within the Department designed to assure the timely development of cost-effective advanced coal based technologies to be available for widespread commercial use after the year 2010, which are capable of achieving the control of sulfur oxides and oxides of nitrogen at levels of proficiency greater than currently available commercial control technology. The coal technology development program shall also be designed to assure the timely development of cost-effective technologies or energy production processes or systems utilizing coal which achieve greater efficiency in the conversion of coal to useful energy when compared to currently available commercial technology for the use of coal and the control of emissions from coal.

(c) The Secretary shall develop the program described herein, for technologies that include, but are not limited to, the following:

(1) advanced integrated gasification combined cycle;

(2) pressurized fluidized bed combustion technology capable of achieving higher conversion efficiency than can be achieved through on-going demonstration projects;

(3) direct and indirect coal-fired turbines;

(4) coal refining processes capable of efficiently producing or utilizing the energy contained in coal and also utilizing the by-products thereof;

(5) technologies for the cost-effective control and disposition of carbon dioxide produced during the combustion of coal;

(6) magnetohydrodynamics;

(7) molten carbonate and solid oxide fuel cells; and

(8) other coal based technologies or processes on systems that are capable of achieving conversion efficiency greater than currently available technology.

SEC. 342. NON-FUEL USE OF COAL.—(a) Not later than one hundred and twenty days after the date of the enactment of this Act, the Secretary shall submit to Congress a plan for research, development, and demonstration with respect to technologies for non-fuel use of coal, including—

(1) production of coke and other carbon products derived from coal;

(2) production of coal-derived, carbon-based chemical intermediates that are precursors of value-added chemicals and polymers;

(3) production of chemicals from coal-derived synthesis gas;

(4) coal treatment processes, including methodologies such as solvent-extraction techniques that produce low ash, low sulfur, coal-based chemical feedstocks; and

(5) waste utilization, including recovery, processing, and marketing of products derived from sulfur, carbon dioxide, nitrogen, and ash from coal.

(b) As part of the plan under subsection (a), the Secretary may propose specific joint ventures to accelerate the development and commercialization of technologies for non-fuel uses of coal.

(c) The plan under subsection (a) shall address and evaluate:

(1) the known and potential products and processes for the use of coal for products in the chemical, utility, fuel, and carbon-based materials industries;

(2) the costs, benefits and economic feasibility of using coal products in the chemical and materials industries, including value-added chemicals, carbon-based products, coke, and waste derived from coal;

(3) the economics of co-production of products from coal in conjunction with production of electric power, thermal energy, and fuel;

(4) the economics of coal utilization in comparison with other feedstocks that might be used for the same purposes;

(5) the steps that can be taken by the public and private sectors to bring about commercialization of research results produced by the research program recommended; and

(6) the past development, current status, and future potential of coal products and processes associated with non-fuel use of coal.

(d) The Secretary shall conduct a program of research and development under the plan under subsection (a).

(e) The Secretary may provide financial assistance for a research project under the plan using funds authorized by section 343(b) to the extent he finds that such project—

(1) furthers achievement of the goals and purposes of this Act;

(2) offers promise for commercial application; and

(3) has a reasonable prospect of support in at least 50 per centum of its direct costs from non-Federal funds.

(f) In preparing the plan and carrying out research under this section, including evaluating the technical progress, feasibility, and most effective means for utilizing the results of research, the Secretary shall consult with the private sector.

SEC. 343. AUTHORIZATIONS.—(a) There is authorized to be appropriated such sums as are necessary for each of fiscal years 1992, 1993, and 1994 for purposes of implementing the program pursuant to section 341.

(b) There is authorized to be appropriated to carry out section 342, a total of $20,000,000 for fiscal years 1992 through 1994.

Subtitle F—Natural Gas and Other Alternative Fuels

SEC. 351. MASS TRANSIT PROGRAM.—(a)(1) The Secretary, consistent with this Act, in consultation with the Administrator of the Urban Mass Transit Administration, may, consistent with the Alternative Motor Fuels Act of 1988 (Public Law 100-404), enter into cooperative agreements and joint ventures with any municipal, county, or regional transit authority in an urban area with a population over 100,000 (according to latest available census information) to demonstrate the feasibility, including safety of specific vehicle design, of using natural gas or other alternative fuels for mass transit.

(2) The program of the Secretary to implement the agreements under paragraph (1) may include interested or affected private firms willing to provide assistance in cash, or in kind, for any such demonstration.

(b)(1) The Secretary may not enter into any agreement or joint venture under subsection (a) with any municipal, county or regional transit authority unless such government body agrees to provide at least 25 per centum of the costs of such demonstration.

(2)(A) A transit authority may petition the Secretary for priority in allocating financial assistance under this section.

(B) The Secretary, at his discretion, may grant such priority under this section to any authority that demonstrates that the use of natural gas or other alternative fuels used for transportation would have a significant effect on the ability of an air quality region to comply with applicable regulations governing ambient air quality.

(c) There is authorized to be appropriated not more than $30,000,000 for each of fiscal years 1992, 1993, and 1994 for purposes of this section.

SEC. 352. NATURAL GAS AND OTHER ALTERNATIVE FUEL USE IN FLEET VEHICLES.—(a) The Secretary, consistent with the Alternative Motor Fuels Act of 1988 (Public Law 100-494), and in consultation with the Administrator of the United States Environmental Protection Agency and the Secretary of Transportation, shall establish and carry out a program, and provide financial assistance to encourage the development and commercialization of natural gas and other alternative fuels for use in passenger fleets, light-duty trucks, and heavy-duty trucks consistent with the purposes of this Act. Such assistance shall provide for the purchase and construction of vehicles dedicated to the use of natural gas or other alternative fuels and of vehicles dually fueled by natural gas or other alternative fuels and gasoline or diesel, and associated refueling equipment.

(b) Public and private fleets may be eligible for financial assistance under this section. A public or private fleet operator may petition the Secretary for priority in allocating financial assistance under this section.

(c) The Secretary, at this discretion, may grant such priority to those fleets where the use of natural gas and other alternative transportation fuels would have a significant effect on the ability of an air quality region to comply with applicable regulations governing ambient air quality.

(d) To facilitate the use of natural gas and other alternative fueled vehicles, the conversion of a vehicle from either gasoline or diesel alone to natural gas or other alternative fuels alone, or to natural gas or other alternative fuels and either gasoline or diesel, shall not be considered a violation of any anti-tampering provisions of the Federal law and implementing regulations, provided that the conversion complies with emissions standards issued by the Administrator of the Environmental Protection Agency.

(e) Any program established under this section that applies to existing vehicles shall take into consideration the safety of specific vehicle design and the compatibility of natural gas and other alternative fuel use with the original components of such existing vehicles.

(f) There is authorized to be appropriated not more than $30,000,000 for each of fiscal years 1992, 1993, and 1994, for purposes of this section.

SEC. 353. TRAINING PROGRAM.—(a) The Secretary of the Department of Labor shall establish and carry out a training and certification program for technicians who are responsible for vehicle installation of equipment that converts gasoline or diesel-fueled vehicles to the capability to run on natural gas or other alternative fuels alone, or on natural gas or other alternative fuels and either diesel fuel or gasoline, and for the maintenance of such converted vehicles. Such training and certification programs shall provide these technicians with instruction on the correct installation procedures and techniques, adherence to specifications, vehicle operating procedures, emissions testing, and other appropriate mechanical concerns applicable to these vehicle conversions.

(b) The Secretary, may enter into cooperative agreements with, and provide financial assistance, under this section, to appropriate parties to provide training programs that will ensure the proper operation and performance of conversion equipment.

(c) The program under this section shall be consistent with the Alternative Motor Fuels Act of 1988 (Public Law 100-494).

(d) There is authorized to be appropriated not more than $5,000,000 for each of the fiscal years 1992, 1993, and 1994 for purposes of this section.

SEC. 354. VEHICLE RESEARCH, DEVELOPMENT, AND DEMONSTRATION PROGRAM.—The Secretary shall carry out a program of research, development, and demonstration on techniques related to improving natural gas and other alternative fueled vehicle technology including, but not limited to, the following areas—

(1) fuel injection;
(2) carburetion;
(3) manifolding;
(4) combustion;
(5) power optimization;
(6) efficiency;
(7) lubricants and detergents;
(8) engine durability;
(9) ignition, including fuel additives to assist ignition;
(10) multifuel engines;
(11) emissions control, including catalysts;
(12) novel gas compression concepts;
(13) advanced storage systems;
(14) advanced gaseous fueling technologies; and
(15) the incorporation of advanced materials in these areas.

(b) The Secretary, consistent with the Alternative Motor Fuels Act of 1988 (Public Law 100-494), may enter into cooperative agreements with, and provide financial assistance under this section to, public entities or interested or affected private firms willing to provide 50 per centum of the costs of such programs to perform the research and development necessary to improve natural gas vehicle and other alternative fuel vehicle technology.

(c) There is authorized to be appropriated not more than $10,000,000 for each of the fiscal years 1992, 1993, and 1994 for purposes of this section.

SEC. 355. NATURAL GAS RECOVERY, RESEARCH, DEVELOPMENT AND DEMONSTRATION PROGRAM.—(a) The Secretary shall expand and continue a program of research, development, and demonstration on techniques to increase the availability of natural gas from—

(1) intensive recovery of natural gas in place in discovered reservoirs or formations; and

(2) economic recovery of unconventional natural gas, including gas from tight sands, Eastern shales, gas from less permeable formations, coal-bed methane, and geopressured reservoirs.

(b) The Secretary shall seek to enter into joint ventures with persons engaged in the production, transportation, distribution, or major use of natural gas to implement the program under subsection (a).

(c) There is authorized to be appropriated not more than $25,000,000 for each of the fiscal years 1992, 1993, and 1994 for purposes of this section.

SEC. 356. NATURAL GAS AND ELECTRIC HEATING AND COOLING TECHNOLOGIES.—(a) The Secretary shall expand the program for research, development, and demonstration for natural gas and electric heating and cooling technologies for residential and commercial buildings.

(b) The natural gas heating and cooling program shall increase research on thermally-activated heat pumps including:

(1) absorption heat pumps; and

(2) engine-driven heat pumps.

(c) The electric heating and cooling program shall increase research on:

(1) advanced heat pumps;

(2) thermal storage; and

(3) advanced electrically-driven HVAC (heating, ventilation, and cooling) and refrigeration systems that utilize replacements for chlorofluorocarbons, including HCFC-22.

(d) There is authorized to be appropriated to the Secretary, not more than $15,000,000 for each of the fiscal years 1992, 1993, and 1994 for purposes of this section in addition to current authorizations.

SEC. 357. VEHICLE AND BATTERY RESEARCH, DEVELOPMENT, AND DEMONSTRATION PROGRAM.—(a) The Secretary shall conduct a program of research, development, and demonstration on techniques related to improving electric vehicle and battery technology including, but not limited to, the following areas:

(1) high efficiency electric power trains, including advanced motors and hybrid power trains for vehicle range improvement;

(2) light-weight body structures for vehicle weight reduction;

(3) advanced batteries with high specific energy and specific power for electric vehicle application; and

(4) primary batteries and fuel cells for hybrid vehicle application.

(b) The Secretary shall enter into joint ventures with, and provide financial assistance under this section to, public entities or interested or affected private firms willing to provide at least 50 per centum of the costs of the joint ventures.

(c) There is authorized to be appropriated not more than $10,000,000 for each of the fiscal years 1992, 1993, and 1994 for purposes of this section.

SEC. 358. DEFINITIONS.—For purposes of this subtitle natural gas includes natural gas derived fuels.

Subtitle G—Hydropower

SEC. 361. PROGRAM.—The Secretary, in consultation with the Federal Energy Regulatory Commission, the Secretary of the Interior, the Secretary of the Army, the Secretary of Agriculture, and the Secretary of Commerce shall undertake an assessment of the statutory, economic, and regulatory barriers to expanded hydroelectric capacity development at existing dams. The assessment shall quantify the contribution that expanded hydroelectric power development could reasonably be expected to make to national energy needs and a reduction in the generation of greenhouse gases.

SEC. 362. REPORT.—The Secretary will submit a report to Congress containing the results of the assessment by December 31, 1991.

Subtitle H—Electric Vehicle Technology Development and Demonstration

SEC. 371. SHORT TITLE.—This subtitle may be cited as the "Electric Vehicle Technology Development and Demonstration Act of 1990".

SEC. 372. FINDINGS.—The Congress finds that:

(1) electric vehicles may be recharged primarily during times of nonpeak use of electricity, which will permit the most efficient utilization of electrical generating capacity, produce economic benefits for purchasers and producers of electricity, and improve the quality of air;

(2) the development, demonstration, and commercialization of electric vehicles in the United States will enhance the energy security of the United States and will encourage electric vehicle production in the United States;

(3) the use of electric vehicles rather than vehicles powered by conventionally fueled internal combustion engines could significantly improve the quality of air by allowing areas of the country that have not attained a quality of air that meets minimum health standards to meet such standards;

(4) because initial production of electric vehicles will not have economies of scale associated with mass production, the price to a user or owner may be so high as to discourage vehicle purchase and use; and

(5) because the substantial potential environmental and domestic energy security benefits that will result from the commercialization of electric vehicles are so great for the United States, it is in the public interest for the United States Government to assist in the development, demonstration, and commercialization of domestically produced, cost competitive, electric vehicles.

SEC. 373. DEFINITIONS.—For purposes of this Act, the term—

(1) "Administrator" means the Administrator of the Environmental Protection Agency;

(2) "conventionally fueled vehicle" means a vehicle powered by an internal combustion engine that utilizes gasoline or diesel fuel as its fuel source;

(3) "electric vehicle" means a vehicle powered by an electric motor that draws current from rechargeable storage batteries, fuel cells, or other portable sources of electrical current, and that may include a nonelectrical source of power designed to charge batteries and components;

(4) "eligible nonattainment area" means a nonattainment area that the Secretary designates as an eligible nonattainment area under section 374(b);

(5) "life cycle costs" means all costs associated with the purchase, operation, maintenance, and disposal of a vehicle; and

(6) "nonattainment area" means a nonattainment area identified by the Administrator pursuant to section 107(d) of the Clean Air Act (42 U.S.C. 7407(d)).

SEC. 374. IDENTIFICATION OF NONATTAINMENT AREAS.—(a) The Secretary, in consultation with the Administrator, shall identify, not later than thirty days after the date of the enactment of this Act, the nonattainment areas in the United States in which the use of conventionally fueled vehicles contributes significantly to that nonattainment and in which the use of electric vehicles could contribute to attainment of applicable National Ambient Air Quality Standards.

(b) The Secretary, after consultation with the Administrator and not later than thirty days after notification of the nonattainment areas identified under subsection (a), shall designate nonattainment areas eligible to participate in the program authorized by this subtitle. Geographical diversity shall be among the factors to be considered by the Secretary in making such designations.

SEC. 375. APPLICATIONS FROM MANUFACTURERS.—(a) Not later than thirty days after the Secretary designated the eligible nonattainment areas under section 374(b), the Secretary shall make an initial request for applications from manufacturers to develop, demonstrate, certify, manufacture, sell, warranty, and service electric vehicles in one or more eligible nonattainment areas. Additional requests for applications may be made if the Secretary determines that the responses to the initial request are inadequate.

(b) The request for applications shall require a manufacturer to identify the following:

(1) SALES AREA.—Any eligible nonattainment area in which the electric vehicles will be sold;

(2) QUANTITY.—The quantity of vehicles that will be available for sale in each area;

(3) DISTRIBUTION.—The dealership network or other means to be used by a manufacturer to distribute, market, and sell vehicles;

(4) TYPE.—The type of vehicle (which may include light to medium duty cargo or passenger vehicles);

(5) CHARACTERISTICS.—The specifications and performance characteristics of each vehicle;

(6) SERVICE.—The maintenance and other support services that will be available to a purchaser;

(7) PRICE.—The selling price of a manufacturer for varying volumes of production of each type of vehicle;

(8) LIFE CYCLE COSTS.—Information regarding the life cycle costs, including projected costs of operating and maintaining an electric vehicle in comparison with operating and maintaining a conventionally fueled vehicle;

(9) STATE AND LOCAL INVOLVEMENT.—The level of involvement (cost-sharing or otherwise), if any, that State or local government entities will have in the manufacturer's proposal, and how that involvement will affect the level of Federal cost-sharing required; and

(10) OTHER.—Other information that the Secretary deems necessary.

SEC. 376. SELECTION OF MANUFACTURERS.—(a) After consulting with the Secretary of Commerce, the Secretary of Transportation, and the Administrator, and not later than one hundred and eighty days after the initial request for applications is made under section 375, the Secretary may select one or more manufacturers eligible to receive reimbursement payments for the development, demonstration, manufacture, and sale of electric vehicles.

(b) The Secretary shall select a manufacturer based upon the overall quality of the proposal, including the following:

(1) CAPABILITY.—The ability of a manufacturer, directly or indirectly, to develop, demonstrate, manufacture, distribute, sell and

service a significant number of electric vehicles;

(2) GEOGRAPHIC DIVERSITY.—The commitment of the manufacturer to distribute, sell and service electric vehicles in various regions of the country.

(3) SUITABILITY.—The suitability of the vehicles for use as a cargo or passenger vehicle;

(4) SAFETY AND ENVIRONMENTAL BENEFIT.—The quality of the vehicle with respect to safety and environmental considerations;

(5) VIABILITY.—The long-term technical viability of the vehicle, and the ability of the manufacturer to incorporate subsequent advancements, modifications, and technology;

(6) LIFE CYCLE COST REDUCTION.—The ability and commitment of a manufacturer to reduce the life cycle costs of electric vehicles over a period of five years or less after selection to a level at least equal to comparable conventionally fueled vehicles;

(7) PRICE.—The selling price of a manufacturer for varying volumes of production of vehicles, the proposed discount (as defined in section 377), and life cycle costs of the electric vehicles;

(8) STATE AND LOCAL SUPPORT.—The extent to which the involvement of state or local government in the program will permit the reduction of the Federal costs share per vehicle to be supported or will otherwise be used to leverage the federal cost-sharing to be provided among a greater number of vehicles;

(9) OTHER.—Other criteria that the Secretary deems necessary.

SEC. 377. DISCOUNTS TO PURCHASERS.—(a) A manufacturer selected by the Secretary shall offer a purchaser a discount equal to either:

(1) LIFE CYCLE COST DIFFERENTIAL.—An amount which represents the excess of the estimated life cycle costs of the electric vehicle over the life cycle costs of a conventionally fueled vehicle of comparable type; or

(2) PURCHASE PRICE COST DIFFERENTIAL.—An amount by which the selling price of the electric vehicle exceeds the suggested retail price of a conventionally fueled vehicle of comparable type.

In no case shall the discount be greater than 50 per centum of the selling price by varying volumes of production.

(b) The Secretary, not later than thirty days after a manufacturer has provided notice in the form and manner specified by the Secretary of the sale of an electric vehicle, shall pay a manufacturer a payment not to exceed the discount for each electric vehicle sold.

(c) To be eligible for payment subsection (b), a manufacturer shall certify to the Secretary the following:

(1) PURCHASER DISCOUNT LIMITATION.—The discount to the purchaser does not lower the selling price of each electric vehicle below the suggested retail price of a conventionally fueled vehicle of comparable type;

(2) DISCOUNT PASSTHROUGH.—The actual selling price of the vehicle is equal to the selling price specified in the manufacturer's proposal to the Secretary reduced by the full amount of the discount received, calculated as specified above, unless the Secretary agrees to a request by the manufacturer to adjust the selling price as specified in the contract to reflect higher costs actually incurred in production;

(3) NONATTAINMENT AREA USE.—The vehicle will be used primarily in the eligible nonattainment area in which the vehicle will be purchased;

(4) INFORMATION FROM PURCHASER.—The purchaser has agreed to provide the manufacturer with information regarding operation, maintenance, and usability of the vehicle for five years after purchase; and

(5) INFORMATION FROM MANUFACTURER.—The manufacturer will povide such information regarding the development, demonstration, manufacture, sale, and maintenance of electric vehicles that the Secretary requests for a period of five years, beginning in fiscal year 1992.

(d) The Secretary may enter into contracts with manufacturers of electric vehicles for purposes of carrying out this Act.

SEC. 378. REPORTS TO CONGRESS.—The Secretary shall report to Congress in fiscal years 1992 and 1994 on the programs and projects supported under this subtitle and the progress being made toward accomplishing the goals of this subtitle.

SEC. 379. AUTHORIZATIONS.—There is authorized to be appropriated for purposes of this subtitle $10,000,000 for each of the five fiscal years following the date of enactment of this Act.

Subtitle I—Advanced Nuclear Reactor Study

SEC. 381. REPORT.—Within one hundred and eighty days after the date of the enactment of this Act, the Secretary shall transmit to the Congress a report on whether, and to what extent, continued or increased use of energy generated from nuclear fission can contribute substantially to safe and reliable supplies of electricity and reduce the generation of carbon dioxide and other greenhouse gases in the United States and internationally. The report shall include data on the extent to which additional increments of nuclear-generated electrictiy can reduce the generation of greenhouse gases and over what period of time. In preparing such report, the Secretary shall consider and make recommendations on the appropriate level of Federal support for research, development, and demonstration of advanced nuclear reactor technologies to support these objectives. Such report shall also include the recommendations of the Secretary regarding the necessary restructuring of existing nuclear fission research programs to achieve these objectives and the role of joint funding and cost-sharing in these activities.

Subtitle J—Technology Development Program

SEC. 391. PROGRAM.—The Secretary shall establish a program to develop technologies originating with the Department that is directed at the stage of technology development beyond the basic research stage. The purpose of such program shall be to develop technologies, determined by the Secretary to have significant promise for commercial and public benefit to the Nation, to a point where private industry will undertake further scientific and commercial development. Technology development programs may be conducted at any Department facility and would be intended to enhance the commercial development and transfer to private industry of technologies originating with the Department, consistent with the technology transfer mission of the Department. As a condition for supporting specific projects, the Secretary may require a private sector commitment to future, and wholly non-Federal, funding of commercial development of particular technologies.

SEC. 392. AUTHORIZATIONS.—For the purposes of carrying out this subtitle, there are authorized to be appropriated such sums as are necessary for fiscal years 1992, 1993, and 1994.

TITLE IV—MISCELLANEOUS

Subtitle A—Methane Assessment

SEC. 401. OBJECTIVE.—The objective of this subtitle is to identify and analyze options to reduce the risks of global climate change by—

(1) reducing worldwide generation of methane;

(2) identifying and analyzing the relationships between methane and other greenhouse gases to determine the synergies that may contribute to global climate change;

(3) promoting additional analyses of the factors causing methane concentrations to increase, and of the sources of methane generation, and the opportunities for reducing such generation; and

(4) identifying options for the reduction of methane generation that are economically as well as environmentally advantageous.

SEC. 402. DOMESTIC METHANE SOURCE INVENTORY AND CONTROL OPTIONS.—(a) Not later than two years after the date of the enactment of this Act, the Secretary, in consultation with the Secretary of Agriculture and the Secretary of the Interior, shall submit to the Congress reports on:

(1) methane emissions from biogenic sources such as

(A) tropical, temperate, and subarctic forests;

(B) tundra; and

(C) freshwater and saltwater wetlands;

(2) changes in the generation of methane from biogenic sources that may occur as a result of predicted increases in temperatures and atmospheric concentrations of carbon dioxide;

(3) methane operation associated with natural gas extraction, transportation, distribution, storage and use, including an inventory of methane generation associated with such activities within the United States, information on accidental and intentional methane releases from natural gas and oil wells, pipelines, processing facilities, and gas burners;

(4) methane generation associated with coal extraction, transportation, storage, and utilization, including, but not limited to, an inventory of methane generation associated with such activities within the United States, information on accidental and intentional releases from mining shafts, degasification wells, gas recovery wells and equipment, and from the processing and use of coal; and

(5) other sources of methane generation associated with human activities that are deemed by the Secretary to be significant.

(b) Not later than two years after the date of the enactment of this Act, the Secretary shall submit to the Congress a report that outlines measures that could be implemented to reduce the growth in atmospheric concentrations of methane from sources within the United States. This report shall identify and evaluate the technical options for reducing the generation of methane from each of the sources listed in paragraph (a) as well as other sources deemed by the Secretary to be significant, and shall include an evaluation of costs.

SEC. 403. INTERNATIONAL STUDIES.—Not later than two years after the date of the enactment of this Act, the Secretary, in consultation with the Secretary of State, shall submit to Congress a report on methane emissions from countries other than the United States. Such report shall include inventories of methane generation associated

with the activities listed in section 402(a). The report shall also identify the United States and international lending agency programs, and an itemization of the costs of each category of reductions, that may be used to induce lesser-developed countries to undertake measures that could reduce the generation of methane and the resource needs of such programs.

Subtitle B—Committee on Renewable Energy Commerce and Trade

SEC. 411. DUTIES OF CORECT.—The Committee on Renewable Energy Commerce and Trade (CORECT) shall seek to enhance economic development in lesser-developed countries by expanding the transfer of energy efficient and renewable energy technologies to such countries.

SEC. 412. ADDITIONAL DUTIES OF CORECT.—(a) CORECT shall promote the development and application in lesser-developed countries of energy and energy efficiency resource technologies that—

(1) promote more efficient use of fossil fuels;

(2) may reduce dependence on the importation of fossil fuels by encouraging the use of sustainable biomass, wind power, hydropower, solar, geothermal and other energy and energy efficiency resource technologies;

(3) foster rural and urban energy development and energy self-sufficiency through the use of reliable and economical renewable energy and energy efficiency resource technologies;

(4) explore mechanisms for assisting United States manufacturers, particularly smaller manufacturers, of energy-efficient and renewable energy technologies, in exporting their goods and services; and

(5) increase staffing to support the new authority and responsibilities described in this section.

(b) In furthering the purposes of this section, CORECT shall—

(1) provide aggressive in-country technical training for local users and international development personnel;

(2) establish feasibility and loan guarantee programs to facilitate access to capital and credit; and

(3) support, through financial incentives, private sector efforts to commercialize and export renewable energy and energy efficiency resource technologies.

(c) CORECT shall be responsible for the development of a comprehensive data base and information dissemination system. The system shall provide information on the specific energy technology needs of lesser-developed countries, the technical and economic competitiveness of various renewable energy and energy efficiency resource technologies, and the status of ongoing technology assistance programs. CORECT shall make such information available to industry, Federal and multilateral lending agencies, non-governmental organizations, host-country and donor-agency officials, and such others as the Secretary deems necessary.

SEC. 413. OUTREACH.—CORECT may establish renewable energy industry outreach offices in the Pacific Rim and in the Caribbean Basin for the purpose of providing information concerning renewable energy technologies and industries of the United States to governments, industries, and others outside of the continental United States.

SEC. 414. COMPREHENSIVE ENERGY TECHNOLOGY EVALUATION.—(a) Not later than June 1, 1991, and biennially thereafter, the Secretary shall prepare and submit to Congress, a comprehensive report evaluating the full range of energy and environmental technologies necessary to meet the energy needs of developing countries while reducing the generation of carbon dioxide and other greenhouse gases. This report shall also provide information on the specific needs of lesser-developed countries, an inventory of United States technologies and services to meet those needs, and an update on the status of ongoing bilateral and multilateral technology assistance and renewable energy resource programs.

(b) The report should also include an evaluation of current programs and recommendations for future programs that—

(1) develop and promote sustainable use of indigenous renewable energy resources in lesser-developed countries in order to reduce the generation of greenhouse gases that may contribute to global climate change;

(2) given the credit and capital restrictions in lesser-developed countries, focus on technologies that are both appropriate and economically viable;

(3) meet the needs of lesser-developed countries for energy rather than creating new needs, in order to ensure immediate income-generating use of the power generated;

(4) work with local individuals to assure that programs and projects meet specific national and local needs;

(5) use indigenous materials and associated hardware, wherever possible, in order to reduce costs and ensure project duplication;

(6) provide examples of cost-effective systems and applications for in-country non-governmental organizations and project technical personnel;

(7) provide mechanisms for assisting U.S. manufacturers, particularly smaller manufacturers, of energy-efficient and renewable energy technologies, in exporting their goods and services;

(8) expand technical and administrative training programs, as well as distribution of multilingual technical training manuals and related materials; and

(9) examine the potential for using economic incentives to promote technology transfer (e.g. shared savings contracts, loan guarantees, tax incentives, etc.) to lesser-developed countries.

SEC. 415. JOINT VENTURES IN DEVELOPING, DEMONSTRATING, AND MARKETING ENERGY EFFICIENT AND RENEWABLE ENERGY TECHNOLOGIES IN KEY LESSER DEVELOPED COUNTRIES.—

(a) FIVE YEAR PLAN.—The management plan under section 9(b) of the Renewable Energy and Energy Efficiency Technology Competitiveness Act of 1989 (Public Law 101-218), shall include a five-year implementation plan for:

(1) pursuing joint ventures with United States manufacturers for the development, demonstration, or marketing of energy efficient and renewable energy technologies for application of use in key lesser-developed countries; and

(2) providing mechanisms to assist U.S. manufacturers, particularly smaller manufacturers of energy efficient and renewable energy technologies, in identifying and pursuing opportunities for sales or joint ventures.

In developing the implementation plan required under this subsection, the Secretary shall consult with the Agency for International Development.

(b) The Secretary shall solicit proposals for joint ventures in the areas described in subsections (a)(1) and (a)(2) as if such joint ventures were required by, and subject to the requirements set forth in, section 6 of Public Law 101-218. The Secretary shall select a total of at least three joint ventures, except that the Secretary may reduce this requirement to the extent that the proposals received do not meet the Secretary's qualifications.

(c) For the purposes of this section, a lesser-developed country shall be considered a key lesser-developed country if direct export or use of United States manufactured energy efficient and renewable energy technologies in such country is inhibited by cultural, or other factors.

SEC. 416. AUTHORIZATIONS.—(a) There is authorized to be appropriated $10,000,000 for fiscal year 1992, and such sums as may be necessary for fiscal year 1993 and 1994 to carry out the purposes of this subtitle except for section 413.

(b) There is authorized to be appropriated for the purposes of section 413, in addition to the amount specified in the previous sentence, $2,750,000 for fiscal year 1992, and such sums as may be necessary for fiscal years 1993 and 1994.

(c) There is authorized to be appropriated for the purposes of section 415, in addition to the amount specified in sections (a) and (b), $1,000,000 for fiscal years 1992, 1993, and 1994.

Subtitle C—Fuel Cycle Costs Analysis

SEC. 421. PROGRAM.—The Secretary shall undertake a comparative analysis of United States, European, and Asian fuel cycle costs. The analysis shall be undertaken for five fuel cycles: coal, oil, natural gas, nuclear, and renewable energy. The renewable energy fuel cycle shall include solar, hydro, wind, and biomass. The analysis shall be based on comparable assumptions, data, and methodologies and will explicitly address the extent to which environmental and other externalities are, or are not, reflected in the energy prices paid by consumers in the United States, Western Europe, and in the market economies of Asia.

SEC. 422. REPORT.—The Secretary will submit a report to Congress containing the results of the comparative fuel cycle cost analysis by December 31, 1991.

Subtitle D—United Nations Conference

SEC. 431.—1992 UNITED NATIONS CONFERENCE ON ENVIRONMENT AND DEVELOPMENT.—(a) Findings.—The Congress finds that—

(1) the 1992 United Nations Conference on Environment and Development will play a crucial role in advancing efforts to protect the global environment;

(2) international preparations for 1992 Conference have already begun; and

(3) the effectiveness of U.S. participation in the 1992 Conference would be greatly enhanced by the establishment of a secretariat within the Department of State to coordinate U.S. preparations for the Conference.

(b) AUTHORIZATION.—There are authorized to be appropriated to the Secretary of State for fiscal year 1991, $350,000 for the purpose of establishing within the Department of State a secretariat to prepare for the 1992 United Nations Conference on Environment and Development. Such funds shall remain available until expended.

TITLE V—NATURAL RESOURCE POLICY

SEC. 501. ECOLOGICAL AND ENVIRONMENTAL RESOURCE STUDY.—(a) The Secretary of the Interior, in consultation with the Secretary of Agriculture, shall conduct a study of the ecological and environmental resources in the United States that could be affected by

a global climate change. The study should include implications for wildlife habitat preservation, coastal protection, inland rivers and lakes, irrigation and reclamation, ground water protection, and the natural resources within the boundaries of the Nation's Wildlife refuges and parks, national forests, and other Federal lands.

(b) The study should—

(1) include specific regional climatic and resource base information useful in anticipatory and mitigatory planning;

(2) identify actions that, if taken, could help mitigate the effects of global climate change; and

(3) evaluate the cost-effectiveness, including the environmental effects of possible action.

SEC. 502. NATIONAL FORESTATION INITIATIVE.—The Secretary of Agriculture, in cooperation with the Secretary of the Interior, shall report to the President and the Congress on the feasibility of a National Reforestation Initiative. Such report shall include—

(a) in coordination with the Resources Planning Act of 1974, an inventory of Federal, State, and private forested lands;

(b) an evaluation of the status of timber harvesting on those lands, including the extent to which those lands are being reforested;

(c) an assessment of the extent to which Federal, State, and private lands can be reforested, including lands not necessarily suitable for timber harvesting such as urban areas;

(d) an evaluation of the potential of a national reforestation initiative for mitigating climate change, and the measures needed to achieve that potential; and

(e) an assessment of the potential economic and environmental benefits and costs of such an initiative, the measures available to mitigate such costs, and an evaluation of the effectiveness of such measures.

SEC. 503. URBAN FORESTRY AND ENERGY SAVINGS.—(a) The Secretary, in consultation with the Secretary of Agriculture, and other relevant Federal agencies, shall conduct a study of the potential for reducing carbon dioxide emissions by undertaking targeted urban tree and vegetative plantings, including landscaping and the use of natural windbreaks, designed to reduce the air-conditioning and heating needs of buildings. The study shall provide estimates of the cost-effectiveness of such a program and shall outline a range of Federal, State, and local public policies and incentives that would encourage public and private efforts to undertake such plantings.

(b) Within eighteen months after the date of enactment, the Secretary shall complete the study and transmit it to the Congress.

The title was amended so as to read: "A bill to establish a national energy strategy for the United States that reflects concern for the global environmental consequences of current trends in atmospheric concentrations of greenhouse gases, and for other purposes.".

NATIONAL HEALTH SERVICE CORPS REAUTHORIZATION ACT

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar No. 691, S. 2617, to make improvements in the scholarship and loan repayment program.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A bill (S. 2617) to amend the Public Health Service Act to make various improvements in existing scholarships and loan repayment programs, and for other purposes.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

Mr. MITCHELL. Mr. President, I am pleased that the Senate will today pass the Rural Health Care Provider Recruitment and Education Act of 1990 as an amendment to the National Health Service Corps Revitalization Act of 1990. Both of these important pieces of legislation will go a long way in addressing the critical problem of geographic maldistribution of physicians and primary health care services.

During the last decade, the National Health Service Corps [NHSC] was nearly eliminated, compromising the ability of this important program to meet the needs of rural and urban underserved areas around the Nation. I am pleased that the Congress has recognized that the corps must be rebuilt and revitalized if we are to provide primary health care to millions of Americans in underserved areas of our country.

The legislation I introduced several weeks ago, the Rural Health Care Provider Recruitment and Education Act of 1990, will become a 3-year demonstration program under the NHSC. This demonstration is intended to provide an innovative tool for rural communities who want to make a commitment to help finance the medical or clinical education of a primary care physician or midlevel practitioner.

The underlying concept for this demonstration program is based on the experience of Dr. Roger Pelli, formerly a physician assistant—now a primary care physician from Aroostook County, ME—who received his Osteopathic education at the University of New England College of Osteopathic Medicine in Biddeford, ME.

Six towns in northern Maine voted to levy a tax of about $5 on each taxpayer for 4 years to help finance Dr. Pelli's medical education in exchange for a commitment that he serve the towns for 8 years or repay the funds.

Since Dr. Pelli's successful experience, the Office of Planning, Research, and Development in the State of Maine has had numerous inquiries from students interested in making similar agreements with local communities. Unfortunately, there are more students interested in such arrangements than there are communities willing or able to make commitments. I hope that this demonstration program will enable more localities to enter into agreements with students who want to provide health care in their own communities.

The introduction of the Rural Health Care Provider Recruitment and Education Act of 1990, has received positive reaction. Kevin Flynn, a recruiter for Franklin Memorial Hospital in Farmington, ME called the proposal "an excellent idea." It is not uncommon for doctors to enter practices with $100,000 in student loan debts, he said.

Jim Harner, spokesperson for the Maine Hospital Association, said, "Many parts of Maine, though, do have shortages of family practitioners. The problem exists in western Maine, adding that the Senator's bill would be a "very innovative way to retain services," and a way for rural communities to "join forces to address a common problem."

This demonstration program will allow funding from local communities to be matched with Federal and State dollars through the State loan repayment program of the National Health Service Corps. The Federal Government will provide a 25- percent match to local communities that raise at least 50 percent of the necessary funds to finance a student's medical or clinical education. States will be required to contribute at least 15 percent, but no more than 25 percent, of the total obligation. Eligibility will be limited to students who are residents of the areas to be served and who are sponsored by local communities.

The demonstration will be authorized at $5 million in the fiscal year 1991, $10 million in fiscal year 1992, and such sums as may be necessary in fiscal year 1993.

In order to be eligible, students would first have to meet the criteria established for NHSC loans and scholarships. Students participating in this demonstration program would have available to them the same support services offered by others participating in the National Health Service Corps. It is important that students maintain regular contact with mentors during the period of their education.

I believe that this demonstration program will provide an opportunity for both local communities and enthusiastic students to come together in an effort to provide quality health care services in rural areas of our country. We have seen such an experiment succeed in rural Maine and I am confident that Dr. Pelli's experience can serve as a model for other communities in desperate need of a doctor and for students unable to finance their own medical education.

I hope that the 3-year demonstration will eventually become a permanent part of the National Health Service Corps.

AMENDMENT NO. 2604

Mr. MITCHELL. Mr. President, on behalf of Senator Kennedy, I send to the desk an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Maine [Mr. MITCHELL] for Mr. KENNEDY, proposes an amendment numbered 2604.

Mr. MITCHELL. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment reads as follows:

Strike out all after the enacting clause and insert in lieu thereof the following:

SECTION 1. SHORT TITLE.

This Act may be cited as the "National Health Service Corps Revitalization Act of 1990".

SEC. 2. FINDINGS AND PURPOSE.

(a) FINDINGS.—Congress finds that—

(1) the mission of the National Health Service Corps is to improve access to primary health care services through coordinated systems of care for medically underserved populations by addressing the geographic maldistribution of physicians and other health care personnel;

(2) over the years, more than 16,500 health care providers have been placed in communities that greatly needed their services with the peak field strength of the National Health Service Corps occurring in 1986 with 3,127 providers;

(3) the key contributor to this field strength were the individuals who had received medical school scholarships in return for a commitment to serve with such Corps;

(4) the number of scholarship awards by the National Health Service Corps peaked in 1978 when 3,150 were awarded;

(5) due to a planned phase out of the scholarship program combined with reductions in funding, the number of scholarships and commitments to serve in the Corps declined steadily throughout the 1980's, and between 1986 and 1989, the number of providers in place around the country declined by over 1000;

(6) the cut back described in paragraph (5) was based on the theory that a physician surplus would drive physicians into underserved communities, but the anticipated overflow of physicians into underserved areas did not happen and many communities lost their sole provider of health services due to the cutback in this Federal program;

(7) inner city and rural communities face an especially serious deterioration in the availability of health services that has been greatly exacerbated by the decline in the strength of the Corps with the situation reaching a crisis level in some communities;

(8) as of December 1988, the Department of Health and Human Services had designated the following number of health personnel shortage areas—

(A) 793 dental shortage areas;

(B) 592 psychiatry shortage areas; and

(C) 1,944 primary care shortage areas;

(9) it would take more than 4,000 physicians to fill the primary care shortage areas and eliminate the designations referred to in paragraph (8);

(10) approximately 50 percent of the medically indigent population in the shortage areas reside in rural areas and rural areas constitute roughly 70 percent of the shortage area designations;

(11) in 1987, to begin to address the shortage created by the cuts in the scholarship program, a new loan repayment program for health professionals was established;

(12) the loan repayment program referred to in paragraph (11) was offered to doctors and nurses with the response making it clear that additional funds were needed for such program;

(13) the number of mid-level health practitioners, including nurse practitioners and physicians assistants, in underserved areas, and especially in rural areas, has increased significantly in recent years, and such practitioners have provided an important source of care and have often been complementary to existing physician services;

(14) a mix of providers that include nurses, nurse practitioners, certified nurse midwives, physicians assistants, psychologists, social workers, other mental health workers, dentists, podiatrists, and physicians is needed in order to provide for the full range of services needed by underserved communities;

(15) though loan repayment may represent a useful incentive to bring such health personnel to underserved areas, scholarships are specially needed in order to successfully recruit physicians, nurses, certified nurse midwives, and nurse practitioners to serve in such areas; and

(16) due to the high turnover of health professionals in underserved areas, improved methods of retention are needed to keep existing National Health Service Corps personnel in underserved communities to which such personnel are assigned to serve.

(b) PURPOSE.—It is the purpose of this Act—

(1) to increase the supply of primary care providers to urban and rural underserved health professional shortage areas;

(2) to halt proposals to phase out the National Health Service Corps scholarship program and to increase the number of scholarships and loan repayments for physicians and other providers to address the serious decline in the availability of health professionals in underserved areas; and

(3) to revitalize the National Health Service Corps by improving the recruitment and retention of providers and by diversifying the Corps so that it includes mid-level practitioners, psychologists, social workers, and other mental health professionals.

SEC. 3. PUBLICITY AND RECRUITMENT.

Section 338A(c)(2) of the Public Health Service Act (42 U.S.C. 254l(c)(2)) is amended by inserting before the period the following: ", including a statement of all factors considered in the selection of applicants and the assignment of corps members".

SEC. 4. SCHOLARSHIP AND LOAN REPAYMENT PROGRAM PRIORITIES.

(a) SCHOLARSHIP PROGRAM.—Section 338A(d) of the Public Health Service Act (42 U.S.C. 2541(d)) is amended to read as follows:

"(d)(1) The Secretary shall consider the following factors in selecting applicants to participate in the Scholarship Program—

"(A) the applicant's demonstrated interest in providing primary services;

"(B) the applicant's demonstrated interest in providing health services to individuals residing in underserved areas;

"(C) the applicant's connection to a health professional shortage area (designated under section 332) at the time of the submission of the application;

"(D) the need and demand for nurses, certified nurse midwives, nurse practitioners, physicians assistants, podiatrists, dentists, psychologists, social workers, and other mental health professionals;

"(E) the school attended by the applicant with regard to its demonstrated record of success or its effort to train individuals to enter primary care fields, and to serve underserved areas; and

"(F) any other factors which the Secretary determines are relevant to the selection of qualified applicants.

"(2) In determining which applications under the Scholarship Program to approve (and which contracts to accept), the Secretary shall give priority—

"(A) first, to applications made (and contracts submitted) by individuals who have previously received scholarships under the Scholarship Program or under section 758; and

"(B) second, to applications made (and contracts submitted) by individuals from disadvantaged and minority backgrounds.".

(b) LOAN REPAYMENT PROGRAM.—Section 338B(d) of the Public Health Service Act (42 U.S.C. 254l-1(d)) is amended to read as follows:

"(d)(1) The Secretary shall consider the following factors in selecting applicants to participate in the Loan Repayment Program—

"(A) the applicant's demonstrated interest in providing primary services;

"(B) the applicant's demonstrated interest in providing health services to individuals residing in underserved areas;

"(C) the applicant's connection to a health professional shortage area (designated under section 332) at the time of the submission of the application;

"(D) the need and demand for nurses, certified nurse midwives, nurse practitioners, physicians assistants, podiatrists, dentists, psychologists, social workers, and other mental health professionals;

"(E) the training program attended by the applicant with regard to its demonstrated record of success or its effort to train individuals to enter primary care fields, and to serve underserved areas; and

"(F) any other factors which the Secretary determines are relevant to the selection of qualified applicants.

"(2) In determining which applications under the Loan Repayment Program to approve (and which contracts to accept), the Secretary shall give priority—

"(A) first, to applications made (and contracts submitted) by individuals who have previously received scholarships under the Loan Repayment Program or under section 758, and then;

"(B) to applications made (and contracts submitted) by individuals from disadvantaged and minority backgrounds;

"(C) to applications from individuals who are legal residents of health professional shortage areas or who, at the time of the submission of the application, reside in a health professional shortage area; and

"(D) to applications from individuals who have demonstrated an interest in providing primary care service for the underserved through the participation of such individuals in clinical programs.".

SEC. 5. INCENTIVES AND ADMINISTRATIVE PROVISIONS.

Subpart III of part D of title III of the Public Health Service Act (42 U.S.C. 254l et seq.) is amended by adding at the end thereof the following new sections:

"SEC. 338K. INCENTIVES FOR RECRUITMENT AND RETENTION.

"(a) IN GENERAL.—The Secretary shall establish and implement a program of incentives, as described in subsection (b), to improve National Health Service Corps recruitment and retention.

"(1) MATERIALS.—The Secretary shall distribute materials that encourage the financial aid offices of medical, dental, nursing, graduate departments of psychology, and social work schools, primary care oriented medical school departments, and residency programs to inform all students and residents about the Scholarship and Loan Repayment Program.

"(2) STUDENT TRAINING AND EXTERNSHIP PROGRAM.—The Secretary shall make grants and enter into contracts with health professions institutions and public and private nonprofit entities for the conduct of programs that would expose and train health professions students throughout their academic careers to clinical settings administered by countries, States, or the Public Health Service that provide primary care services to medically underserved areas.

"(3) CAREER ADVISOR.—The Secretary shall assure the availability of career advisors to assist Corps members from the time such members enter into a contract with the Corps until such members complete their obligation.

"(4) FELLOWSHIPS IN PRIMARY CARE.—The Secretary, in conjunction with eligible residency programs and other training programs, shall establish fellowship programs for physicians, dentists, nurse practitioners, nurse midwives, and physician assistants who have an interest and commitment to primary care, to enable such health professionals to gain exposure and expertise in the delivery of medical services to underserved populations in health professional shortage areas.

"(5) FACULTY APPOINTMENTS.—The Secretary shall encourage the provision of faculty appointments for Corps providers at health professional schools, to provide access for such providers, and the communities they serve, to university facilities and to make such providers a source of expertise for health professions students.

"(6) EXCHANGE PROGRAMS, ETC.—The Secretary shall establish exchange programs with teaching centers, leave time for professional conferences, sabbatical leave, and traveling medical consultation teams to increase opportunities for patient case presentations and discussions and research by Corps personnel.

"(7) JOB SHARING, ETC.—The Secretary shall establish options, such as job sharing and couple recruitment, and other flexible work programs for Corps members to be available after the period of obligated service.

"(8) RESPITE SQUAD.—The Secretary shall establish a 'respite squad' that shall consist of mid-career health professionals who would work in underserved areas on a short-term basis, such as a two-week period or a one day a month basis.

"(9) INDEPENDENT RECRUITMENT.—The Secretary shall maintain a recruitment program to recruit individuals, who are not participants in the Scholarship or Loan Repayment Programs, to become Corps members.

"(c) TRACKING AND EVALUATION.—

"(1) IN GENERAL.—The Secretary shall track and evaluate the incentive programs established under subsection (b), to determine the effectiveness of such programs in increasing the participation of individuals in the programs established under this part, and in the continuing participation of such individuals in such programs.

"(2) EFFECTIVENESS.—The Secretary shall evaluate the effectiveness of the programs established in paragraphs (3) and (5) of subsection (b) in influencing the specialty choice and practice setting of program participants.

"(3) REPORTING.—Not later than March 1 of every even numbered year, the Secretary shall prepare and submit to the appropriate Committees of Congress, a report concerning the evaluations conducted under paragraphs (1) and (2).

"SEC. 338L. INCREASE IN STAFF.

"The Secretary shall ensure that the administrative staff of the National Health Service Corps is adequate and appropriate to administer the programs established and operated under this subpart. The Secretary shall increase such staff if such increase is necessary to effectively administer such programs.".

SEC. 6. TRACKING AND EVALUATION REQUIREMENTS.

(a) SCHOLARSHIP PROGRAM.—Section 338A(i) of the Public Health Service Act (42 U.S.C. 254l(i)) is amended—

(1) in paragraph (3), by striking out "and" at the end thereof;

(2) in paragraph (4), by striking out the period and inserting in lieu thereof "; and"; and

(3) by adding at the end thereof the following new paragraphs:

"(5) the effectiveness in maintaining or increasing the interest in and commitment of individuals participating in the Scholarship Program to primary care and service to the underserved; and

"(6) the retention rate of participants in the Scholarship Program.".

(b) LOAN REPAYMENT PROGRAM.—Section 338B(i) of such Act (42 U.S.C. 254l-1(i)) is amended—

(1) in paragraph (3), by striking out "and" at the end thereof;

(2) in paragraph (4), by striking out the period and inserting in lieu thereof "; and"; and

(3) by adding at the end thereof the following new paragraphs:

"(5) the effectiveness in maintaining or increasing the interest in and commitment of individuals participating in the Loan Repayment Program to primary care and service to the underserved; and

"(6) the retention rate of participants in the Loan Repayment Program.".

SEC. 7. TRANSFER OF FUNDS.

Section 338G of the Public Health Service Act (42 U.S.C. 254q) is amended by adding at the end thereof the following new subsection:

"(c) TRANSFER OF FUNDS.—The Secretary may transfer funds between the Scholarship Program and the Loan Repayment Program as needed due to the availability of applicants for such programs.".

SEC. 8. ADMINISTRATIVE REVIEW.

The Public Health Service Act (42 U.S.C. 201 et seq.) is amended by inserting after section 336A the following new section:

"SEC. 336B. ADMINISTRATIVE REVIEW.

"Not later than January 1, 1993, the General Accounting Office shall complete an administrative review of the Corps including the administration of the Scholarship Program and the Loan Repayment Program.".

SEC. 9. AUTHORIZATION OF APPROPRIATIONS.

(a) NATIONAL HEALTH SERVICE CORPS.—Section 338(a) of the Public Health Service Act (42 U.S.C. 254k(a)) is amended to read as follows:

"(a) To carry out this subpart and section 338K, there are authorized to be appropriated $65,000,000 for fiscal year 1991, and such sums as may be necessary for each of the fiscal years 1992, 1993, and 1994, of which not less than 8 percent should be made available with respect to nurses, nurse practitioners, certified nurse midwives, physician assistants, psychologists, social workers, and other non-physician health providers.".

(b) SCHOLARSHIP AND LOAN REPAYMENT PROGRAM.—Section 338G(b) of such Act (42 U.S.C. 254q(b)) is amended to read as follows:

"(b) AUTHORIZATION OF APPROPRIATIONS.—

"(1) IN GENERAL.—There are authorized to be appropriated $63,900,000 for fiscal year 1991, and such sums as may be necessary for subsequent fiscal years, for scholarships and loan repayments under this subpart.

"(2) SET-ASIDE.—Of the amount appropriated under paragraph (1) for each fiscal year, the Secretary shall make available not less than 10 percent for scholarships and loan repayments under this subpart with respect to nurses, nurse practitioners, nurse midwives, physician assistants, psychologists, social workers, and other non-physician health providers.".

(c) STATE PROGRAMS.—Subsection (d) of section 338H of such Act (42 U.S.C. 254q-1(d)) is amended to read as follows:

"(d)(1) The Secretary shall use such sums as may be necessary from amounts available under section 338G(b)(1) to carry out the physician loan repayment program, and such sums as may be necessary from the amounts available under section 338G(b)(2) for loan repayment for nurses, psychologists, social workers, and other health professionals.

"(2) Nothing in this section shall prohibit a State from entering into multiyear contracts under this section.".

SEC. 10. GRANTS TO STATES FOR OPERATION OF OFFICES OF RURAL HEALTH.

Subpart III of part D of title III of the Public Health Service Act (42 U.S.C. 254l et seq.) (as amended by section 5) is further amended by adding the end thereof the following new section:

"SEC. 338M. STATE OFFICES OF RURAL HEALTH.

"(a) IN GENERAL.—The Secretary shall make grants to States in accordance with this section to enable such States to establish State Offices of Rural Health, or to assist existing State rural health offices, to engage in the activities described in subsection (d)(2).

"(b) AMOUNT OF GRANT.—

"(1) MAXIMUM AMOUNT.—The Secretary shall not make grants to a single State for a fiscal year under this section in an amount that is more than the quotient of the aggregate amount appropriated pursuant to subsection (g) for such fiscal year divided by the number of applications under subsection (f) that are approved for such fiscal year.

"(2) MATCHING REQUIREMENT.—Except as provided in paragraph (3), a State that receives a grant under this section shall provide an amount equal to the amount provided under such grant to establish, administer, or enhance the ongoing operations of the Office. Such amounts may be provided in cash or in-kind.

"(3) EXCEPTION.—To assist in the establishment of new rural health offices, for the first year of operation of a State Office of

Rural Health, the Secretary may modify the matching requirement under paragraph (2) to the extent that the State shall contribute not less than $1 for each $3 of Federal funds provided.

"(c) LIMITATION ON USE OF GRANT FOR RESEARCH ACTIVITIES.—Each State receiving a grant under this section shall not use in excess of 5 percent of the amounts provided under such grant for research activities.

"(d) STATE OFFICES OF RURAL HEALTH.—

"(1) ESTABLISHMENT.—Each State that receives a grant under this section may establish, or continue the operations of, the State Office of Rural Health in a State agency, or through contract with a public or private educational institution or other organization, or any combination of the preceding entities, as determined by the State.

"(2) ACTIVITIES.—

"(A) DUTIES.—Each State Office of Rural Health established or operated under a grant made under this section shall—

"(i) provide leadership and advocacy for rural residents with regard to rural health;

"(ii) coordinate the activities of such Offices with Federal, State, local, and private health entities, and with the rural development activities of, and cooperate with, the Agricultural Extension Service;

"(iii) make recommendations to the Federal Office of Rural Health on improving the quality and cost effectiveness in the delivery of rural health care;

"(iv) identify Federal and State programs regarding rural health, and provide technical assistance to public and nonprofit private entities regarding participation in such programs;

"(v) prepare and submit reports periodically to the Office of Rural Health Policy concerning the activities of the office; and

"(vi) communicate and cooperate with rural health research centers established by the Federal Office of Rural Health Policy established under section 301.

"(B) OPTIONAL ACTIVITIES.—Each State Office of Rural Health established under a grant made under this section may—

"(i) assist rural areas in responding to changes in access to health care;

"(ii) plan and assist in the professional recruitment and retention of medical professionals and assistants in rural areas;

"(iii) improve community involvement in health care delivery through methods including the conduct of leadership development programs for the members of the community;

"(iv) improve rural emergency medical services;

"(v) improve access to health care in rural areas through innovative transportation and communications services;

"(vi) encourage the sharing of rural health care information;

"(vii) evaluate data on rural health conditions and needs; and

"(viii) provide technical assistance for rural hospital transition grants.

"(3) ANNUAL MEETINGS.—Representatives from each State Office of Rural Health that receives a grant made under this section shall meet annually with representatives from the Office of Rural Health Policy to share information and coordinate strategies for improving quality and cost effectiveness in the delivery of rural health care.

"(4) LIMITATION.—No amounts appropriated under subsection (g) shall be used for health planning uses of the type performed under title XV (as such title existed prior to January 1, 1987,) such as certificate of need programs.

"(e) STATE DEFINED.—As used in this section, the term 'State' means the 50 States.

"(f) REQUIREMENT OF APPLICATION.—The Secretary shall not make a grant under subsection (a) unless an application for the grant is submitted to the Secretary and the application is in such form, made in such manner, and contains such agreements, assurances, and information as the Secretary determines necessary to carry out such subsection.

"(g) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out this section, $3,750,000, for fiscal year 1991, and such sums as may be necessary for each of the fiscal years 1992 through 1994.".

SEC. 11. ADMITTING PRIVILEGES OF HEALTH CARE PROFESSIONALS.

Section 335(e)(1)(A) of the Public Health Service Act (42 U.S.C. 354h(e)(1)(A)) is amended—

(1) by striking out "or dentist member" and inserting in lieu thereof ", dentist, or other health care professional member"; and

(2) by inserting ", is authorized by State law to have such privileges," after "granting such privileges".

SEC. 12. GRANTS FOR HOME HEALTH ARE DEMONSTRATION PROJECTS.

(a) NUMBER OF GRANTS.—

(1) IN GENERAL.—Section 395(a) of the Public Health Service Act (42 U.S.C. 280c(a)) is amended by striking out "3, and not more than 5, grants to States" and inserting in lieu thereof "10, and not more than 50, grants to States or private entities.

(2) GRANTEES.—Section 395 of such Act (42 U.S.C. 280c) is amended by adding at the end thereof the following new subsection:

"(d) GRANTEES.—In making grants under subsection (a), the Secretary shall—

"(1) award five such grants to the grantees that received grants under such subsection as such subsection existed prior to July 1, 1989;

"(2) award not to exceed 50 percent of such remaining grants to private entities, who shall be considered in the same manner as a State for purposes of administering this subpart; and

"(3) award any remaining grants to States.".

(b) APPLICATION TO STATE CHIEF EXECUTIVE OFFICER.—Section 397(c) of the Public Health Service Act (42 U.S.C. 280c-2(c)) is amended—

(1) in paragraph (2), by striking out "and" at the end thereof

(2) by redesignating paragraph (3) as paragraph (4); and

(3) by inserting after paragraph (2), the following new paragraph:

"(3) include a certification that the applicant has provided he governor of the State in which the applicant resides with a copy of the application, and a certification that the governor of the State will submit comments to the Secretary concerning any such application at such time as the Secretary determines appropriate; and".

(c) MATCHING REQUIREMENT.—Section 396(b) of such Act (42 U.S.C. 280c-1(b)) is amended—

(1) in paragraph (1), by striking out subparagraph (C) and inserting in lieu thereof the following new subparagraph:

"(C) For the third and subsequent years of such payments to a State, the Secretary may not make such payments in an amounts exceeding 75 percent of the costs of such services."; and

(2) in paragraph (2), by striking out subparagraph (C) and inserting in lieu thereof the following new subparagraph:

"(C) for the third and subsequent years of such payments to a State, not less than $25 (in cash or in kind under subsection (c)) for each $75 of such Federal funds.".

(d) AUTHORIZATION OF APPROPRIATIONS.—Section 397(e) of the Public Health Service Act (42 U.S.C. 280c-2(e)) is amended by striking out "$5,000,000 for each of the fiscal years 1988 through 1990" and inserting in lieu thereof "such sums as are necessary in each of the fiscal years 1991 through 1994".

(e) REPORT.—Not later than 18 months after the date of enactment of this Act, the Secretary of Health and Human Services shall prepare and submit, to the appropriate Committees of Congress, a report concerning the effectiveness of programs that receive assistance under the amendments made by this section with regards to the objectives of such programs. The Secretary shall not decrease the amounts appropriated to carry out this section to complete such report.

SEC. 13. TECHNICAL AMENDMENTS.

(a) ASSIGNMENT OF PERSONNEL.—Section 333(h) of the Public Health Service Act (42 U.S.C. 254f(h)) is amended—

(1) in paragraph (1), by inserting "(M.D. and D.O.)" after "physicians"; and

(2) in paragraph (2), by inserting ", payment," after "utilization".

(b) COST SHARING.—Section 334(f)(2)(B)(ii) of such Act (42 254g(f)(2)(B)(ii)) is amended by inserting "payments or" after "third party".

(c) PROVISION OF HEALTH SERVICES.—Section 335 of the Public Health Service Act (42 U.S.C. 254h) is amended—

(1) in subsection (b)(1)(i)(II), by inserting "(M.D. and D.O.)" after "physicians";

(2) in subsection (c), by inserting "(M.D. and D.O.)" after "medical; and

(3) in subsection (e)(1)(A), by inserting "(M.D. and D.O.)" after "physician".

(d) LOAN REPAYMENT PROGRAM.—Section 338B of the Public Health Service Act (42 U.S.C. 254l-1) is amended in subsection (g)—

(1) by inserting "all" after "related expenses on" in paragraph (1);

SEC. 14. NATIONAL HEALTH SERVICE CORPS SCHOLARSHIP TRAINING PROGRAM DEBTS IN BANKRUPTCY NONDISCHARGEABILITY PROVISIONS.

(a) IN GENERAL.—Paragraph (3) of section 338E(d) of the Public Health Service Act (42 U.S.C. 254o(d)(3)) is amended to read as follows:

"(3) Any obligation of an individual under section 408(b) of the Health Professions Educational Assistance Act of 1976 (Public Law 94-484), or under this section may be released by a discharge in bankruptcy under title 11, United States Code, only if that discharge is granted after the expiration of the 5-year period beginning on the first date that payment of that obligation is required, and only if the bankruptcy court finds that the nondischarge of the obligation would be unconscionable.".

(b) EFFECTIVE DATE AND INTERPRETATION.—

(1) OBLIGATIONS UNDER SECTION 225.—With respect to obligations arising under section 225(f) of the Public Health Service Act (as that section existed prior to its repeal by section 408(b) of the Health Professions Educational Assistance Act of 1976 (Public Law 94-484)), the amendment made by subsection (a) shall apply to any bankruptcy proceeding in which the discharge of such

an obligation has not been granted before 31 days after the date of enactment of this Act.

(2) OBLIGATIONS UNDER SECTION 338E.—With respect to obligations arising under section 338E of the Public Health Service Act, the amendment made by subsection (a) shall be effective upon the date of enactment of this Act, and shall not be construed as changing or affecting any right, liability, status, or interpretation (pertaining to any such obligation) which existed under such section 338E(d)(3) prior to such date of enactment.

SEC. 15. ESTABLISHMENT OF RURAL HEALTH CARE PROVIDER RECRUITMENT AND EDUCATION PROGRAM.

Subpart III of part D of title III of the Public Health Service Act (as amended by section 10) is further amended by adding at the end thereof the following new section:

"SEC. 338N. RURAL HEALTH CARE PROVIDER RECRUITMENT AND EDUCATION PROGRAM.

"(a) ESTABLISHMENT.—The Secretary shall establish a demonstration program to be known as the Rural Health Care Provider Recruitment and Education Program (hereinafter referred to in this section as the 'Program') to assist rural communities in recruiting and educating eligible individuals to serve as health care providers in such areas. The Secretary shall administer the Program through the existing grant program established under section 338H.

"(b) GRANTS.—

"(1) IN GENERAL.—The Secretary shall make grants under this section to States that meet the eligibility requirements for receiving grants under subsection (c) to share the costs incurred by local communities within such State, and by the State, in providing funds to eligible individuals.

"(2) PROHIBITION.—The Secretary may not make a grant under this section to a State that has not established a State loan repayment program under section 338H unless the State agrees, as a condition of receiving the grant, to designate a State agency to administer the program operated with the grant.

"(c) ELIGIBILITY.—

"(1) STATE APPLICATION.—

"(A) IN GENERAL.—To be eligible to participate in the Program established under this section, a State shall prepare and submit, to the Secretary, an application at such time, in such manner, and containing such information as the Secretary shall require, including—

"(i) the proposal of the State for providing assistance to local communities from amounts received under this section;

"(ii) the estimated expenses that the State expects to incur in providing technical and other assistance to local communities under this section based on the applications that the State receives under paragraph (2);

"(iii) an assurance that the State, shall only provide assistance from amounts received under this section to local communities submitting applications under paragraph (2) who desire to assist eligible individuals who are—

"(I) recommended by local sponsoring organizations within the rural community to be served; and

"(II) residents of the rural community to be served;

"(iv) an assurance that the State will contribute to local communities to which the State provides assistance under a grant awarded under this section, not less than 15 nor more than 25 percent of the cost associated with such local communities providing assistance to eligible individuals under this section;

"(v) an analysis of the potential use of health professions personnel in communities that desire to receive assistance from the State under this section;

"(vi) a determination by the State of the need within the local communities that desire to receive assistance from the State under this section for such health professions personnel;

"(vii) a determination of the extent to which such local communities will have a financial base to support the practice of such health professions personnel; and

"(viii) any other information determined appropriate by the Secretary.

"(B) CONSOLIDATION OF APPLICATIONS.—The application required under this paragraph may be submitted as part of the State application submitted under section 338H.

"(2) LOCAL APPLICATION.—A local community that desires to receive assistance from a State through a grant awarded under this section shall prepare and submit, to the State office that is responsible for the administration of the State loan repayment program established under section 338H within that State, an application at such time, in such form, and containing such information as the State shall require, including—

"(A) the identity and place of residence of the eligible individual for which the local community is providing assistance under this subsection and the relationship, if any, of the eligible individual to the local community;

"(B) the nature and estimated length of the education or training to be provided to such individual with assistance provided under this subsection;

"(C) the estimated costs of the education and training referred to in subparagraph (B), the amount of such costs that will be paid by the applicant, and the amount that the applicant desires to receive from the State under the Program;

"(D) assurances that such individual will comply with the requirements of subsection (e);

"(E) an assurance that the applicant will contribute local funds derived from non-Federal sources in an amount equal to not less than 50 percent nor more than 60 percent of the cost to be paid by the applicant, as described in subparagraph (C); and

"(F) any other information determined appropriate by the Secretary.

"(3) ELIGIBLE INDIVIDUALS.—To be eligible to receive assistance under this section an individual identified in the application submitted under paragraph (2)(A)(i) shall—

"(A) be recommended by a local community and enrolled, or accepted for enrollment, as a full-time student—

"(i) in an accredited educational institution, approved by the Secretary, in a program leading to a degree in medicine or osteopathic medicine;

"(ii) in an approved program leading to eligibility for licensure as a nurse midwife, nurse practitioner, or a physician assistant; or

"(iii) in an approved graduate program leading to eligibility for certification (or the State equivalent) as a nurse midwife, nurse practitioner, or a physician assistant;

"(B) prepare and submit to the local community an application (that shall be submitted to the State as part of the application of the local community under paragraph (2)(A)) to participate in the program established under this subsection; and

"(C) sign and submit to the local community and the State, at the time of the submission of the application, a written contract to serve for not less than 2 years, after licensure or certification, in the rural community, but in no event shall such applicant serve for a period of years that is less than the number of years in which the applicant was provided with assistance under this section.

"(d) USE OF FUNDS.—Amounts provided to a State under a grant awarded under subsection (b) shall be used to reimburse a local community for 25 percent of the costs associated with providing assistance to an eligible individual to enable such individual gain the medical or clinical education necessary to become a primary care physician, a nurse practitioner, a nurse midwife, or a physician assistant.

"(e) SERVICE BY INDIVIDUAL.—An individual that receives assistance under this section shall serve as a primary care allopathic or osteopathic physician (including a family practitioner, an obstetrician/gynecologist, a practitioner of internal medicine or pediatrics) a nurse midwife, a nurse practitioner, or a physician assistant in the rural community represented by the local community that provided assistance to the individual under this section. Such period may be in excess of 4 years if the local community and the individual agree.

"(f) FAILURE TO COMPLY.—The provisions of section 338E regarding the breach of a service contract shall apply to eligible individuals that enter into contracts to receive assistance under this section.

"(g) COORDINATION.—The State shall coordinate and be responsible for the recovery of any payments due from delinquent individuals under this section on behalf of localities and the Federal Government.

"(h) EVALUATION.—The Secretary, acting through the Health Resources and Services Administration, shall evaluate the impact of the program established under this section on the participation of primary care physicians and mid-level practitioners in the program established under this section and prepare and submit, to the appropriate Committees of Congress, a report containing the number of primary care physicians and mid-level practitioners, on a State by State basis, who participate on the program established under this section in the State.

"(i) DEFINITIONS.—As used in this section:

"(1) LOCAL COMMUNITY.—The term 'local community' means a local public or private nonprofit entity or combination of such entities, that is located in or serves a rural community.

"(2) RURAL COMMUNITY.—The term 'rural community' means a Federally designated health manpower shortage area or a medically underserved area designated by a State pursuant to section 338H, that is not within a metropolitan statistical area.

"(j) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out this section, $5,000,000 for fiscal year 1991, $10,000,000 for fiscal year 1992, and such sums as may be necessary for 1993.".

SEC. 16. EMERGENCY MEDICAL SERVICES FOR CHILDREN.

Section 1910(a) of the Public Health Service Act (42 U.S.C. 300w-9(a)) is amended in the first sentence—

(1) by striking out "not more than four";

(2) by striking out "in any fiscal year"; and

(3) by striking out "in such States".

SEC. 17. CONFORMING AMENDMENTS.

(a) UNIFORMED SERVICES HEALTH PROFESSIONS REVITALIZATION ACT OF 1972.— Section 2123(e) of title 10, United States Code, is amended by striking out "an area of health manpower shortage" and inserting in lieu thereof "a health professional shortage area".

(b) PUBLIC HEALTH SERVICE ACT.—

(1) Sections 303(d)(2)(B), 331, 333, 334, 335, 336(a), 336A, 338A, 338B, 338C, 338D, 338F(a)(1), 735, 741(f)(1)(C), 759(a), 781(a)(2)(B)(iii), and 822 of the Public Health Service Act (42 U.S.C. 242a(d)(2)(B), 254d, 254f, 254g, 254h, 254h-1(a), 254i, 254l, 254l-1, 254m, 254n, 254p(a)(1), 294h, 294n(f)(1)(C), 294aa(a), 295g-1(a)(2)(B)(iii), and 296m) are amended by striking out "health manpower shortage area" each place such appears and inserting in lieu thereof "health professional shortage area".

(2) Section 332 of the Public Health Service Act (42 U.S.C. 254e) is amended—

(A) by striking out the section heading and inserting in lieu thereof the following:

"DESIGNATION OF HEALTH PROFESSIONAL SHORTAGE AREAS";

and

(B) by striking out "health manpower shortage area" each place it appears and inserting in lieu thereof "health professional shortage area".

(c) SOCIAL SECURITY ACT.—The Social Security Act is amended—

(1) in section 1156(b)(5) (42 U.S.C. 1320c-5(b)(5)), by striking out "health manpower shortage area (HMSA)" and inserting in lieu thereof "health professional shortage area"; and

(2) in sections 1833(m), 1842(b)(4)(F), and 1861 (42 U.S.C. 1395l(m), 1395u(b)(4)(F), and 1395x), by striking out "health manpower shortage area" each place it appears and inserting in lieu thereof "health professional shortage area".

(d) COMPREHENSIVE HEALTH MANPOWER TRAINING ACT OF 1971.—Section 202 of the Comprehensive Health Manpower Training Act of 1971 (42 U.S.C. 3505d) is amended—

(1) by striking out the section heading and inserting in lieu thereof the following:

"NATIONAL HEALTH PROFESSIONAL SHORTAGE CLEARINGHOUSE";

and

(2) in subsection (a), by striking out "Manpower" and inserting in lieu thereof "Professional".

(e) HEAD START ACT.—Section 645(a)(2)(B) of the Head Start Act (42 U.S.C. 9840(a)(2)(B)) is amended by striking out "health manpower shortage area" and inserting in lieu thereof "health professional shortage area".

The PRESIDING OFFICER, The question is on agreeing to the amendment.

The amendment (No. 2604) was agreed to.

Mr. MITCHELL. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

Mr. MITCHELL. Mr. President, I ask unanimous consent to now proceed to consideration of Calendar No. 758, H.R. 4487, the House companion bill, and that all after the enacting clause be stricken; that the text of S. 2617 be inserted in lieu thereof; that the bill be read a third time and passed; and the motion to reconsider be laid upon the table.

I further ask unanimous consent that the Senate insist on its amendment and request a conference with the House on the disagreeing votes of the two Houses; and that the Chair be authorized to appoint conferees.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MITCHELL. I ask unanimous consent that S. 2617, Calendar No. 691, be indefinitely postponed.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MITCHELL. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDERS FOR MONDAY, SEPTEMBER 10, 1990

MORNING BUSINESS

Mr. MITCHELL. Mr. President, I ask unanimous consent that when the Senate reconvenes on Monday, September 10 at 10 a.m., following time for the two leaders there be a period for morning buisness not to extend beyond 10:30 a.m., with Senators permitted to speak therein for up to 5 minutes each. I further ask unanimous consent that, at 10:30 a.m., the Senate turn to the consideration of H.R. 5241, the Treasury and Postal appropriations bill.

The PRESIDENT pro tempore. Is there objection? The Chair hears no objection. It is so ordered.

ADJOURNMENT UNTIL MONDAY, SEPTEMBER 10, 1990

Mr. MITCHELL. Mr. President, if there is no further business to come before the Senate today, I now ask unanimous consent that the Senate stand adjourned under the provisions of House Concurrent Resolution 360, until 10 a.m., on Monday, September 10, 1990.

There being no objection, the Senate, at 6:20 p.m., adjourned until Monday, September 10, 1990, at 10 a.m.

HOUSE OF REPRESENTATIVES—*Wednesday, September 5, 1990*

The House met at 12 noon and was called to order by the Speaker pro tempore [Mr. GEPHARDT].

DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, DC,
September 5, 1990.

I hereby designate the Honorable RICHARD A. GEPHARDT to act as Speaker pro tempore today.

THOMAS S. FOLEY,
Speaker of the House of Representatives.

PRAYER

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

During all the seasons of life, gracious God, Your presence has been a judgment on the oppressors and a source of hope for the oppressed. In good times of celebration and joy Your Word of blessing has been our companion and in the dark moments of despair Your Word of comfort has sustained and made whole. We pray, O God, that Your Word of judgment and blessing that has been spoken to those who have gone before us may be heard in our day and time. May Your judgment be known by those who take advantage over people and may Your peace that passes all understanding be with those who suffer and are alone. Let us, O God, search our own hearts and our own attitudes that we will truly do justice, love mercy, and walk humbly with You. This is our earnest prayer. Amen.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

PLEDGE OF ALLEGIANCE

The SPEAKER pro tempore. The Chair recognizes the gentleman from Wyoming [Mr. THOMAS] to lead the House in the Pledge of Allegiance.

Mr. THOMAS of Wyoming led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Hallen, one of its clerks, announced that the Senate had passed with amendments in which the concurrence of the House is requested, bills of the House of the following titles:

H.R. 94. An act to amend the Federal Fire Prevention and Control Act of 1974 to allow for the development and issuance of guidelines concerning the use and installation of automatic sprinkler systems and smoke detectors in places of public accommodation affecting commerce, and for other purposes;

H.R. 987. An act to amend the Alaska National Interest Lands Conservation Act, to designate certain lands in the Tongass National Forest as wilderness, and for other purposes;

H.R. 2575. An act to establish a congressional commemorative medal for members of the Armed Forces who were present during the attack on Pearl Harbor on December 7, 1941, to provide for the striking of medals in commemoration of the centennial of Yosemite National Park, and for other purposes;

H.R. 4009. An act to authorize appropriations for fiscal year 1991 for the Federal Maritime Commission, and for other purposes;

H.R. 5229. An act making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1991, and for other purposes; and

H.R. 5256. An act to amend the American Indian, Alaska Native, and Native Hawaiian Culture and Art Development Act, and for other purposes.

The message also announced that the Senate insists upon its amendments to the bill (H.R. 987) "An act to amend the Alaska National Interest Lands Conservation Act, to designate certain lands in the Tongass National Forest as wilderness, and for other purposes," disagreed to by the House, and agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. JOHNSTON, Mr. BUMPERS, Mr. FORD, Mr. BRADLEY, Mr. WIRTH, Mr. MCCLURE, Mr. MURKOWSKI, Mr. WALLOP, and Mr. GARN, to be the conferees on the part of the Senate.

The message also announced that the Senate insists upon its amendments to the bill (H.R. 5229) "An act making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1991, and for other purposes," and request a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. LAUTENBERG, Mr. BYRD, Mr. HARKIN, Mr. SASSER, Ms. MIKULSKI, Mr. INOUYE, Mr. D'AMATO, Mr. KASTEN, Mr. DOMENICI, Mr. GRASSLEY, and Mr. HATFIELD, to be the conferees on the part of the Senate.

The message also announced that the Senate had passed bills, a joint resolution and concurrent resolutions of the following titles, in which the concurrence of the House is requested:

S. 324. An act to establish a national energy strategy for the United States that reflects concern for the global environmental consequences of current trends in atmospheric concentrations of greenhouse gases, and for other purposes;

S. 605. An act to authorize appropriations for the Consumer Product Safety Commission, and for other purposes;

S. 648. An act to amend the Securities Exchange Act of 1934 to strengthen regulatory oversight of the United States securities markets, improve supervision of financial market participants, and improve the safety and efficiency of market mechanisms, and for other purposes;

S. 1289. An act to improve the management of forests and woodlands and the production of forest resources on Indian lands, and for other purposes;

S. 1834. An act to recognize and grant a Federal charter to the organization known as the Supreme Court Historical Society;

S. 1913. An act to require the use of child restraint systems on commercial aircraft;

S. 1963. An act to amend the Public Health Service Act to facilitate the revitalization of the Commissioned Corps of the Public Health Service, and for other purposes;

S. 1974. An act to require new televisions to have built in decoder circuitry;

S. 2176. An act to provide better enforcement of the environmental laws of the United States, and for other purposes;

S. 2340. An act to develop and improve child protective service programs on Indian reservations and to strengthen Indian families;

S. 2628. An act to amend the Public Health Service Act to reauthorize certain National Institute of Mental Health grants and to improve provisions concerning the State comprehensive mental health services plan, and for other purposes;

S. 2632. An act to amend the Public Health Service Act to reauthorize the National Center for Health Statistics, and for other purposes;

S. 2636. An act to authorize the Board of Regents of the Smithsonian Institution to plan and design an extension of the National Air and Space Museum at Washington Dulles International Airport, and for other purposes;

S. 2753. An act to reauthorize the Developmental Disabilities Assistance and Bill of Rights Act;

S. 2757. An act to amend the Foreign Assistance Act of 1961 to authorize the provision of medical supplies and other humanitarian assistance to the Lithuanian people

to alleviate suffering during the current emergency;

S. 2834. An act to authorize appropriations for fiscal year 1991 for the intelligence activities of the U.S. Government, the Intelligence Community Staff, and the Central Intelligence Agency Retirement and Disability System, and for other purposes;

S. 2841. An act, the Omnibus Territories Act of 1990;I21S. 2884. An act to authorize appropriations for fiscal year 1991 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe personnel strengths for such fiscal year for the Armed Forces, and for other purposes;I21S. 2905. An act to authorize appropriations for fiscal year 1991 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe personnel strengths for such fiscal year for the Armed Forces, and for other purposes;

S. 2906. An act to authorize appropriations for fiscal year 1991 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe personnel strengths for such fiscal year for the Armed Forces, and for other purposes;

S. 2907. An act to provide for the utilization, force structure, and preservation of personnel of the Reserve components, for procurement for such components, and for other purposes;

S. 2908. An act to provide transition assistance for military personnel involuntarily discharged or released from active duty, and for other purposes;

S. 2909. An act expressing the sense of Congress relating to the reduction of nuclear risk, requiring the Secretary of Defense to report on measures to reduce such risk, and for other purposes;

S. 2910. An act to authorize appropriations for fiscal year 1991 drug interdiction and counter-drug activities of the Department of Defense, to allow the Department of Defense to provide additional support to State and local agencies for such activities, and for other purposes;

S. 2911. An act to authorize appropriations for fiscal year 1991 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe personnel strengths for such fiscal year for the Armed Forces, and for other purposes;

S. 2912. An act to authorize appropriations for fiscal year 1991 for military activities of the Department of Defense, to prescribe personnel strengths for such fiscal years for the Armed Forces, and for other puproses;

S. 2913. An act to authorize certain construction at military installations for fiscal year 1991, and for other purposes;

S. 2914. An act to authorize funds for Department of Energy national security programs, the Defense Nuclear Facilities Safety Board, civil defense; to authorize expenditures by the Panama Canal Commission, and for other purposes;

S. 2915. An act to amend title 10, United States Code, to require the Secretary of Defense to establish a strategic environmental research program;

S. 2916. An act to amend title 10, United States Code, to encourage the development and transfer of critical technologies and to improve acquisition actitivties of the Department of Defense, to authorize acquisitions and dispositions for the National Defense Stockpile for fiscal year 1991, and for other purposes;

S. 2930. An act to eliminate "substantial documentary evidence" requirement for minimum wage determination for American Samoa;

S. 3000. An act to strike congressional medals for Pearl Harbor Veterans and the Yosemite National Park Centennial and bicentennial coins commemorating the U.S. Constitution.

S.J. Res. 357. Joint resolution to designate September 15, 1990 to October 15, 1990, as "Community Center Month";

S. Con. Res. 99. Concurrent resolution Expressing the sense of the Congress concerning the 25th anniversary of the Older Americans Act of 1965;

S. Con. Res. 123. Concurrent resolution to encourage State governments, local governments and local educational agencies to adopt a comprehensive curricular program which provides elementary and secondary students with a thorough knowledge of the history and principles of the Constitution and the Bill of Rights and which fosters civic competence and civic responsibility;

S. Con. Res. 127. Concurrent resolution to express the sense of Congress that Greyhound Lines, Inc., and the Amalgamated Transit Union should pursue meaningful negotiations under the auspices of the Federal Mediation and Conciliation Service to resolve their dispute and restore vital transportation services to American communities;

S. Con. Res. 132. Concurrent resolution expressing the sense of the Congress that August 30, 1990, be observed as "1890 Land-Grant Institutions Centennial Recognition Day"; and

S. Con. Res. 145. Concurrent resolution to salute and congratulate the people of Poland as they commemorate the two-hundredth anniversary of the adoption of the Polish Constitution.

The message also announced that the Senate disagrees to the amendments of the House to the bill (S. 605) "An act to authorize appropriations for the Consumer Product Safety Commission, and for other purposes," and agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. HOLLINGS, Mr. BRYAN, Mr. GORE, Mr. DANFORTH, and Mr. GORTON, to be the conferees on the part of the Senate.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER pro tempore laid before the House the following communication from the Clerk of the House of Representatives:

WASHINGTON, DC, *August 6, 1990.*

Hon. THOMAS S. FOLEY,
The Speaker, House of Representatives, Washington, DC.

DEAR MR. SPEAKER: Pursuant to the permission granted in Clause 5 of Rule III of the Rules of the U.S. House of Representatives, the Clerk received at 12:45 p.m. on Monday, August 6, 1990 the following message from the Secretary of the Senate: That the Senate agreed to the Conference Report on S. 2240, that the Senate agreed to the House amendments to S. 2461, that the Senate agreed to the House amendments to the Senate amendment to H.R. 498, that the Senate passed without amendment H.R. 3048, H.R. 3248, H.R. 4035, H.R. 4273, H.R. 4314, H.R. 5131, H.R. 5432, H.J. Res. 467, H.J. Res. 515, Res. 554, and H.J. Res. 627.

With great respect, I am,

Sincerely yours,

DONNALD K. ANDERSON,
Clerk, House of Representatives.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The Chair desires to announce that pursuant to clause 4 of rule I, the Speaker signed the following enrolled bills and joint resolutions on Thursday, August 9, 1990:

H.R. 498. An act to clarify and strengthen the authority for certain Department of the Interior law enforcement services, activities, and officers in Indian country, and for other purposes;

H.R. 1159. An act to amend the National Trails System Act by designating the Juan Bautista de Anza National Historic trail, and for other purposes;

H.R. 1199. An act to amend title 38, United States Code, to establish a system of competitive pay for nurses employed by the Department of Veterans Affairs, to authorize the Secretary of Veterans Affairs to make such system applicable to certain other health-care personnel, to make certain improvements in veterans' health and education programs, and for other purposes;

H.R. 1465. An act to establish limitations on liability for damages resulting from oil pollution, to establish a fund for the payment of compensation for such damages, and for other purposes;

H.R. 1594. An act to make miscellaneous and technical changes to various trade laws;

H.R. 3048. An act to designate the Agricultural Research Service, United States Department of Agriculture, Animal Health Research Building in Clay Center, Nebraska, as the "Virginia D. Smith Animal Health Research Laboratory";

H.R. 3086. An act to amend title 5, United States Code, to grant appeal rights to members of the excepted service affected by adverse personnel actions, and for other purposes;

H.R. 3248. An act to revise the boundary of Gettysburg National Military Park in the Commonwealth of Pennsylvania, and for other purposes;

H.R. 4035. An act to designate the Federal building located at 777 Sonoma Avenue in Santa Rosa, CA, as the "John F. Shea Federal Building";

H.R. 4273. An act to amend the Public Health Service Act to extend the program of grants for preventive health services with respect to tuberculosis, and for other purposes;

H.R. 4314. An act to implement the Inter-American Convention on International Commercial Arbitration;

H.R. 4790. An act to amend the Public Health Service Act to establish a program of grants for the detection and control of breast and cervical cancer;

H.R. 5131. An act to amend the Federal Aviation Act of 1958 to extend the civil penalty assessment demonstration program, and for other purposes;

H.R. 5350. An act to provide for a temporary increase in the public debt limit;

H.R. 5432. An act to extend the expiration date of the Defense Production Act of 1950;

H.J. Res. 467. Joint resolution designating September 21, 1990, as "National POW/MIA Recognition Day," and recognizing the National League of Families POW/MIA flag;

H.J. Res. 515. Joint resolution designating the week beginning September 16, 1990, as "National Give Kids a Fighting Chance Week";

H.J. Res. 554. Joint resolution designating January 6, 1991, as "National Law Enforcement Training Week";

H.J. Res. 627. Joint resolution designating Labor Day weekend, September 1 through September 3, 1990, as "National Drive for Life Weekend";

S. 666. An act to enroll twenty individuals under the Alaska Native Claims Settlement Act;

S. 2461. An act to amend the Public Health Service Act to revise and extend the programs of grants for reducing the waiting period for receiving treatment services for drug abuse, and for other purposes;

S. 2952. An act to amend the Energy Policy and Conservation Act to extend the authority for titles I and II;

S.J. Res. 248. Joint resolution to designate the month of September 1990 as "International Visitors' Month";

S.J. Res. 296. Joint resolution designating August 7, 1990, as "National Neighborhood Crime Watch Day"; and

S.J. Res. 343. Joint resolution to designate August 13 through August 19, 1990, as "Home Health Aide Week."

The following enrolled bill was signed by the Speaker pro tempore on Monday, August 13, 1990:

S. 2240. An act to amend the Public Health Service Act to provide grants to improve the quality and availability of care for individuals and families with HIV disease, and for other purposes.

CONSTITUENTS ARE MAD AS HELL OVER S&L DEBACLE AND OIL COMPANIES' RIPOFF

(Mr. KANJORSKI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KANJORSKI. Mr. Speaker, as we return to the session after our August break, many of us in the Congress have had an occasion to talk to our constituents, and I find my constituents in Pennsylvania mad as hell over two particular issues.

One, of course, is the S&L debacle and the tremendous cost to the American taxpayers of that cleanup. But the second is even a more rude action by the multinational oil companies of the world who have not only drilled for oil but who intend to drill the American people. They are now attempting to rip off the American people in the midst of an international crisis, and the American people and my constituents are mad as hell.

Mr. Speaker, I suggest, and am introducing today, a piece of legislation to try to cure a little bit of both of these problems. I am asking the Congress of the United States to reenact the windfall profits tax so that we can take these obscene profits that will be made by these multinational oil companies away from them in the time that they are ripping off the American taxpayer, and help the American taxpayer by contributing those windfall profits to the bailout of the S&L crisis, to alleviate the tax pressure on the American taxpayer.

Mr. Speaker, I ask you and my colleagues in the Congress of the United States to take heed: We are mad as hell, and it is time we cured two problems, the ripoff by the oil companies and the S&L debacle, at the same time.

SEQUESTRATION WOULD BE DEVASTATING, WOULD PROMOTE A NATIONAL RECESSION

(Mr. CONTE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CONTE. Mr. Speaker, without decisive action to bring our deficit under control, sequestration will devastate the Federal Government and promote a national recession. Sequestration is 3 weeks away. The threat of a sequester is real, and imposition of a sequester will hurt. Badly.

Departments and agencies were asked to submit sequester plans to OMB by August 27. I am currently reviewing those plans, and I will soon be issuing a report on the effects of a full-year sequester. In the meantime, here are a few things to think about. A sequester will result in:

A 1-month furlough for about 1 million civilian employees of the Department of Defense;

A complete shutdown of the Court of Veterans Appeals;

Suspension of meat and poultry inspections for 137 days, crippling those industries;

The unprecedented release of 46,000 potentially dangerous probationers and parolees;

Termination of 6,160 FBI staff, drastically impairing investigations of S&L fraud and other crimes;

The threat of terminations and 60-90 day furloughs for 50,000 employees of the VA.

The sequester time bomb is ticking. Without full cooperation from both sides of the aisle and a willingness to advance and consider meaningful proposals, the sequester bomb will explode in 3 weeks.

□ 1210

NEW MEXICANS QUESTION DESERT SHIELD

(Mr. RICHARDSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RICHARDSON. Mr. Speaker, President Bush deserves credit for the Persian Gulf operation. So far, he has done everything right and deserves our bipartisan support. Having just returned from nearly 40 town meetings in my district, New Mexicans are asking plenty of questions about operation desert shield.

Why are we there? To stop Iraqi aggression or to protect oil?

What is more important? Arab oil or American blood?

How much of American intervention is aimed at preserving the profits of big oil companies? Why did gasoline prices shoot up the day after Iraq invaded Kuwait? Why have the prices continued to rise? Why can the Government not stop this price gouging?

Why are our friends, like Germany and Japan, doing so little to help? Where are their troops and money?

Is the Persian Gulf going to be another protracted conflict like Vietnam?

Whose side is Jordan on? Is that what we get after billions of dollars of U.S. aid?

What will it take to convince our Government to establish a sound energy policy, one that reduces our dependence on foreign oil and stimulates alternative energy sources?

These are just some of the questions New Mexicans have been asking—questions that we in the Congress must continue to ask in the coming months and demand appropriate answers.

CONGRATULATIONS TO HOUSE MINORITY WHIP

(Mr. DELAY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DELAY. Mr. Speaker, I would like to take this time to applaud my colleague, the House minority whip, NEWT GINGRICH. Congressman GINGRICH has outlined a 4-percent budget strategy for all Americans and especially for those who support a progrowth budget solution. The 4-percent solution allows Congress to increase total Federal spending by no more than 4 percent of previous years spending levels for the next 6 years thus balancing the budget in fiscal 1997.

Congressman GINGRICH has taken a bold stand in favor of the American people and revealed the truth about the Federal budget. The truth being that the Washington establishment favors the Federal budget over the family budget. That Congress has developed a tax system that is antichild, antifamily, antiwork, antisavings, antiinvestment, and antijobs. Congressman GINGRICH has courageously voiced loud and clear what the Democrats and those so driven by money politics fail to recognize, that the budget system is broken and in desperate need of repair. I applaud the Con-

gressman and support his efforts to avoid a recession.

STATUS OF EL SALVADOR NEGOTIATIONS

(Mr. MOAKLEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MOAKLEY. Mr. Speaker, last month another round in the negotiations between the Government of El Salvador and the opposition FMLN was held in San Jose, Costa Rica. The goal of the negotiations is a peaceful settlement to a long and brutal war that has already claimed over 70,000 lives.

Unfortunately the negotiations last month did not go well. Almost no progress was made on the key issue of military reform. The FMLN's proposal on this subject was particularly extreme and unrealistic and provided no opportunity for the United Nations mediator to bring the two sides closer together.

Another round of negotiations is scheduled to begin next week. I hope that the FMLN position will be more flexible at that time, and that the mediators will be encouraged by both sides, to develop proposals aimed at establishing a middle ground.

I also condemn, in the strongest possible terms, FMLN threats of another military offensive. The Salvadoran people are sick of war, and sick of people, who talk of nothing but war.

In this connection, I think it ironic that last May, this House voted to provide strong incentives for the FMLN to refrain from a new offensive, to refrain from purchasing arms, to refrain from attacks against civilians, and to negotiate in good faith.

The administration opposed that plan and, as a result, those incentives are not now in law. I only hope that the administration's opposition to the proposal, which was offered by Rep. JOHN MURTHA and myself, does not lead inadvertently to further violence in El Salvador.

And I hope that we will, in the weeks ahead, pass legislation that will provide strong incentives for both sides in El Salvador to respect human rights and to end this senseless war.

I would also add that I am encouraged by the administration's willingness to attempt to reach an accommodation on this issue with the Congress, and I am confident in the weeks ahead. This will happen.

FURLOUGHING OF FEDERAL EMPLOYEES

(Mr. PARRIS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PARRIS. Mr. Speaker, once again, Federal employees have become the scapegoats of our seriously troubled budget process. Over and over again, this country's civil servants are threatened by the legislature tampering with their retirement funds, not receiving cost of living adjustments, and just plain lack of respect. The most recent slap in the face is the proposal to furlough Federal employees. Does anyone really believe that it is fair to balance the budget on the backs of Government workers?

Furloughing Federal employees for up to 22 days is not simply a blow to morale. Our Nation's 2.4 million civil servants are paying mortgages, feeding children, and working hard to enhance their quality of life. And now we propose cutting them off at the knees by taking chunks of their salaries to meet budget constraints. Even a 2-day furlough can have devastating effect on a struggling worker or family.

I can't imagine anything more unfair to these dedicated people and potentially damaging to the Federal work force, and, in turn, the productivity of this country. At this moment, Federal employees at the Department of Defense are working night and day to sustain our activities in the Persian Gulf crisis, and other Government workers are engaged in vital activities all across the country. There are other ways of solving our budget woes, and we must find them but an extensive furlough of essential employees is not the way. I urge my colleagues to move decisively to reach a responsible budget agreement by October 1.

CONDOLENCES TO FAMILY OF U.S. AIR FORCE S. SGT. JOHN CAMPISI

(Mr. TORRES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TORRES. Mr. Speaker, let me say to my colleagues, ever since I was allowed the privilege and honor of serving with you, I never have had to stand before you for the reason I do now.

It is with profound regret and sadness that I must now inform you of the death of one of our young servicemen while on duty in the Middle East. U.S. Air Force S. Sgt. John Campisi, of West Covina, CA, was hit and killed by a truck on Sunday, August 12, while on duty in Saudi Arabia.

As a member of our Armed Forces, John was one of the first of our personnel to arrive in the Middle East.

A career military man, John, at age 31, was married and had four young children.

His death, one of the first to occur as a result of this current crisis, was both grievous and damaging to those who knew him. He leaves four children.

My sympathies and those of my fellow members, go out to his family and loved ones.

Unfortunately, John's death is also a reminder. A reminder to us in the Congress of the United States, that an important responsibility of our office is to provide for the welfare of American personnel overseas.

Let us remember our duty to bring them home safely, so that their families can be spared an anguish similar to that of John Campisi's family.

Mr. Speaker, I send a message to those families who have loved ones overseas during this tense and emotive period.

By saying that a peaceful and negotiated settlement is the primary goal of this Government, we are letting them know that the lives of their loved ones, for their husbands and sons, wives and daughters, brothers and sisters, are just as important to us as they are to them.

Most of us do, indeed, have families, and so our sympathy, too, is genuine. Thus, we in the Congress of the United States, must work together toward reaching a peaceful agreement. But in so long, we must move quickly.

Let the times be few and far between that I or any of my colleagues need come to the floor and announce the death of a constituent in the current crisis.

THE UNITED STATES DESERVES ALLIES' HELP IN PERSIAN GULF

(Mr. GIBBONS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GIBBONS. Mr. Speaker, along with majority and minority Members, I was privileged to visit Saudi Arabia over this last weekend. It was a moving experience and one that makes all Americans very proud. We can be very proud of the way that our military forces have conducted themselves in both the planning and the execution of the Operation Desert Shield.

This is a dangerous and hazardous mission, as all Americans know. We are there because we want a peaceful world. We are there because we want to see that nobody ever takes advantage of their neighbor and gobbles up their country such as Saddam Hussein had done to Kuwait. We are there because we know that history teaches that that kind of aggression is infectious, and if we do not stop it now we will have to stop it later at even greater cost. We are there because we can allow no one to drive up the price of our fuel to such an extent that it would wreck our economy and perhaps wreck the economy of this planet.

We need help. Our allies in Europe and our allies in the Pacific should speedily send their armed forces also to that area.

□ 1220

Some are there, but more are needed and more are expected to be sent, expected by the American people to be sent.

Before we adjourned we sent to the Senate a piece of legislation that would greatly enhance the power of the President in dealing with those allies. I hope the Senate will take it up and pass it on.

I think we ought to say a word about Saddam Hussein. Saddam Hussein has already qualified as an international war criminal, and those around him have also qualified. I would urge the civilized people of this Earth to form the appropriate tribunal to collect the evidence and to present the case against him. We must stop aggression before it gets started.

In conclusion, Mr. Speaker, the American people must learn to do something that we are not very good at, and that is to have patience. But patience is in our self-interest. The embargo will work if we will give it a chance to work. It is working right now, and if we are patient, we will save lives, American lives. Let us all remember that as we go forward in this very difficult task.

ISRAEL'S ACTIONS IN THE MIDDLE EAST JUSTIFIED

(Mr. MARKEY asked and was given permission to address the House for 1 minute.)

Mr. MARKEY. Mr. Speaker, I spent the last week in the State of Israel, and it is abundantly clear to me that in June 1981 the Israelis were 100 percent correct in sending in 14 F-15's and F-16's to destroy the Osirak Nuclear Reactor near Baghdad, and that our Government and the United Nations were wrong in condemning Menachem Begin and the Israeli Government in 1981 for halting Iraq's efforts to obtain nuclear weapons. They were right. They were warning us. They were telling us about Saddam's nuclear ambitions, and we were turning a deaf ear to them, as did the entire United Nations. We owe them an apology. We owe them a debt of gratitude.

Similarly, Israel has been right in its assessment of the reliability of the Palestinian leadership as a negotiating partner and the PLO's ties to radical Arab states. The Palestinians, who have no military card, who have no economic card, who had only one card, a moral card to play in the Middle East. In 1948, 1967, and 1973 they chose to help lead attacks on Israel. And once again this year they had another opportunity to show which side they were on, the side of peace or the side of war. As other Arab nations aligned against Saddam Hussein, the Palestinians aligned themselves with Saddam. Again, the Israelis have warned us. The Israelis have told us that we cannot find peace in this region until the Saddams and Assads and the others will grant the right of Israel to exist peacefully.

The Palestinians have lost an incredible opportunity to demonstrate their commitment to peace, and unless and until they realign themselves so they are aligned against Saddam and with the cause of peace in the Middle East, they will have set back by many years their opportunity to find a place of permanence in the Middle East and resolve a debate that has been raging over the last century.

VIRGIN ISLANDS NEEDS FEDERAL JUDGES

(Mr. DE LUGO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DE LUGO. Mr. Speaker, the U.S. Virgin Islands is suffering from an intolerable crisis in its Federal court system. We do not have a single permanent judge.

Our senior district court judge went into retirement more than 2 years ago, after giving a year's advance notice to Justice. Our other judge died tragically 9 months ago, after an unsuccessful battle with cancer. In all this time, from 1987 until now, Justice has failed to submit an acceptable nominee.

Just last month, the only nomination ever forwarded to the Senate was sent back to the White House, based on bipartisan agreement in the Senate Judiciary Committee.

True, visiting judges are sent down on a rotating basis to keep our courts afloat. But the backlog of cases is growing enormously. And public confidence in the courts is suffering, as the people of the Virgin Islands see long delays, and watch a procession of new judges file through our courts, with one judge handling the trial and another judge handling the sentencing, and no continuity.

The Department of Justice has to make the appointment of Federal judges in the Virgin Islands a top priority.

We have a pool of talented, native-born Virgin Islands lawyers from which Justice can select judicial nominees if the White House is willing to put aside politics and put priority where it belongs—on the administration of justice.

COMMUNICATION FROM THE CHAIRMAN OF THE COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION

The SPEAKER pro tempore (Mr. MOAKLEY) laid before the House the following communication from the chairman of the Committee on Public Works and Transportation, which was read and, without objection, referred to the Committee on Appropriations:

COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION,
Washington, DC, August 7, 1990.

Hon. THOMAS S. FOLEY,
The Speaker, House of Representatives, Washington, DC.

DEAR MR. SPEAKER: Pursuant to the provisions of the Public Buildings Act of 1959, the House Committee on Public Works and Transportation approved the following resolutions on August 1, 1990:

CONSTRUCTION RESOLUTIONS

Federal Building-United States Courthouse (amendment), Los Angeles, California.

Federal Building-United States Courthouse, Lake or Porter Counties, Indiana.

Federal Building-United States Courthouse (amendment), St. Croix, United States Virgin Islands.

Field Office, Federal Bureau of Investigation, Washington, DC.

Facades on the Internal Revenue Service Building, Washington, DC.

REPAIR AND ALTERATION RESOLUTIONS

John F. Kennedy Federal Building (amendment), Boston, Massachusetts.

LEASE RESOLUTIONS

Department of the Treasury, Philadelphia, Pennsylvania.

Federal Aviation Administration, Fort Worth, Texas.

Internal Revenue Service (amendment), Covington, Kentucky.

11(b) RESOLUTIONS

Federal Building-United States Courthouse, Tampa-St. Petersburg, Florida area.

Federal Building-United States Courthouse, Fargo, North Dakota.

Food and Drug Administration, Jamaica, Queens, New York.

In addition, I have enclosed a copy of the Committee Resolution adopted on June 28, 1990 for the Customs Service at John F. Kennedy Airport that corrects a typographical error in the Resolution transmitted to you on July 2, 1990.

The original and one copy of the authorizing resolution is enclosed.

Sincerely,

GLENN M. ANDERSON,
Chairman.

There was no objection.

A POLICY TO PROVIDE ENERGY SECURITY FOR THE FREE WORLD

(Mr. TAUZIN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TAUZIN. Mr. Speaker, I, too, was privileged to join the leader and the minority leader in our visit to Saudi Arabia just this weekend. I saw the young men and young women on

the front lines for America whose lives are now at risk in our policy of opposing Saddam Hussein's aggression and partially in support of our efforts to provide energy security for the free world.

□ 1230

It is partially because of our extraordinary dependence upon oil from that region that the lives of our young men and women are on the line today.

Mr. Speaker, I was appalled today to hear that the first speech given on this House floor was a call again for the reenactment for some failed energy policies which have brought us that kind of reliance, the policy of windfall profits tax, the policy of moratoriums against development of energy in America, a policy that would put the life of caribou ahead of the life of our own boys and girls, our children, as they face the danger in the Middle East.

It seems to me, Mr. Speaker, that our President has proceeded extremely professionally. His mastery of the international situation has been applauded by all of us on both sides of this aisle. It seems to me the Members of this body ought to proceed as professionally, as cautiously, as carefully, to build an energy policy that works for America instead of one that leads us into further and further dependence upon those sources in the Middle East.

Mr. Speaker, the lives of our children are all at stake. Can we not indeed build an energy policy that makes us more secure at home?

FILING OF AMENDMENTS ON THE COMPREHENSIVE CRIME CONTROL ACT OF 1990

(Mr. MOAKLEY asked and was given permission to address the House for 1 minute.)

The SPEAKER pro tempore (Mr. TAUZIN). Without objection, the gentleman from Massachusetts [Mr. MOAKLEY] is recognized for 1 minute.

There was no objection.

Mr. MOAKLEY. Mr. Speaker, this is to notify Members of the House of the Rules Committee's plans regarding H.R. 5269, the Comprehensive Crime Control Act of 1990. The committee is planning to meet on Wednesday, September 12, 1990, to take testimony on the bill. In order to assure timely consideration on the floor, the Rules Committee is considering a rule that may limit the offering of amendments.

Any Member who is contemplating an amendment to H.R. 5269 should submit, to the Rules Committee in H-312 in the Capitol 35 copies of the amendment and a brief explanation of the amendment not later than 5 p.m. on Tuesday, September 11, 1990.

We appreciate the cooperation of all Members in this effort to be fair and orderly in granting a rule for H.R. 5269.

SEEKING LOCAL INVOLVEMENT IN O'HARE DECISIONS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois [Mr. ANNUNZIO] is recognized for 5 minutes.

Mr. ANNUNZIO. Mr. Speaker, noise pollution, congestion, and increased delays have been continuing problems at Chicago's O'Hare International Airport, the busiest in the Nation and the major crossover station between East and West in the United States. During my 26 years in Congress, I have tried hard to change the thinking of the Federal bureaucracy to alleviate the ever-growing air traffic in and out of O'Hare, which has made life miserable for residents near the airport.

It seems that each time the subject of noise pollution is broached with the Federal Government, the bureaucrats confer with the airline executives and other industry officials and conclude there is no problem. In fact, the meetings often result in more aircraft being permitted to land and take off at O'Hare.

The Federal Government has an important role in insuring that the United States maintains a modern and safe national and international aviation system. But the Government must also make sure that local residents are included in the formulation of any policy dealing with the Nation's airports. Too often, solutions to the problems are made without any substantial input from the segment of the population that is most affected by the traffic at the busy airport—the local residents. It is about time this situation is changed.

There are a couple of opportunities presenting themselves that can facilitate this change. Last fall, U.S. Transportation Secretary Samuel K. Skinner created a task force to, in his words, "tackle the crucial task of modernizing and expanding our aviation system capacity."

The Aviation System Capacity task force is a Government-private sector group which consists of representatives of the major airlines, airport operators and executives, and the Federal Aviation Administration. I would like to point out that there was no formal participation by local citizens to help develop this national policy.

Secretary Skinner said there were several important issues before the task force. He said, among other things, there must be a balancing of the prerogatives of local autonomy with the need for some degree of standardization regarding acceptable environmental quality and the airlines' tendency to overschedule prime time flight times, creating unnecessary congestion.

At the same time, the task force established a noise working group to draw up a set of recommendations for the task force which would become part of any proposed Federal rules or regulations on noise abatement. At an April 24 meeting, it was reported that the rulemaking implementation for the transportation policy was scheduled for the end of the year. Therefore, the noise working group's activity needed to be completed by the end of this summer.

Mr. Speaker, my staff, after some research, learned that the noise group submitted its recommendations to the task force which, in turn, is to make a report to the FAA Administrator, but has not done so yet. So, I don't know what is in or will be in the report. It is important for Members of Congress who have busy airports in their districts to know what the new regulations will be. Or what are being contemplated. I hope this is not another case where the Federal Government will, without notice, publish new regulations and tell local residents they must live with them.

I have written Secretary Skinner in an attempt to receive answers to these important questions. If the residents near O'Hare do not know what is being planned, they will not be able to react to any proposal. This must not be the case in this instance.

I am not the only Member who is deeply concerned about the issue of noise pollution and the congestion and increased delays which contribute to the undesirable environment in the vicinity of O'Hare International. Chairman JAMES L. OBERSTAR of the Aviation Subcommittee of the House Public Works and Transportation Committee has scheduled hearings later this month on the subject of noise pollution, including Federal versus local rights in limiting the burden on communities surrounding an airport. I will take an active role in the hearings in looking out for the interests of the residents near O'Hare.

Mr. Speaker, earlier this year, I reported on legislation working its way through the other body which would end the limits on the number of landings and takeoffs from four of the busiest airports in the country, including O'Hare. This, naturally, would increase the number of flights into those airports and, therefore, add to the noise. The Transportation Department opposes the measure which would eliminate the limit on the number of airline, commuter and general aviation flights into the four airports, a rule that has been in effect since 1969. I oppose the legislation, and will fight it as strongly as I can to keep it from becoming law.

Mr. Speaker, aircraft noise has become a major environmental headache for the many communities near O'Hare. I have received hundreds upon hundreds of letters over the years from citizens living in Norridge, Harwood Heights, Schiller Park, Franklin Park, Niles, and northwest Chicago, areas surrounding O'Hare or underneath its flight paths.

A recent letter from the village of Harwood Heights told me the neighborhood has been plagued with noise and pollution for years. They have been experiencing flights 24 hours a day. The letter writer said the aircraft get into a holding pattern over Lake Michigan. When clearance is received for landing, she said, "it is like a 'Blitz' coming at us. Our skies light up, like it is the "Fourth of July." This can go on from 2 to 3 hours. Counted from 50 to 60 aircraft per hour, coming over our area, for a landing." This is not imagined. This is a real letter from a real person who lives with the noise every day, 7 days and nights a week.

Another letter was from a woman in Melrose Park, a resident there since 1948. She said the noise is getting worse all the time. It gets to the point, she said, when two people

can hardly hear each other when they try to talk. And, she points out, when a plane goes over her yard "the stink from the jet fuel is so bad."

A third letter came from Niles in which a person representing a group of residents said, "Please fight the increase—in air traffic—as hard as you can. I know I can speak for everyone around here when I say we cannot tolerate it now and cannot imagine it becoming worse."

Mr. Speaker, these are just a small sampling of the views of the residents near O'Hare International Airport. There is no reason that the Federal Government cannot exert a strong hand in seeking a solution to their cries for help from the noise emanating from the airport. I will do everything within my power to prevent an increase in the noise pollution in the area. I hope the Bush administration will do the same.

TOWARD DEPOSIT INSURANCE REFORM

The SPEAKER pro tempore (Mr. MOAKLEY). Under a previous order of the House, the gentleman from Texas [Mr. GONZALEZ] is recognized for 60 minutes.

Mr. GONZALEZ. For many years, I have been concerned about the deposit insurance system, one of the cornerstones of our Nation's financial and economic stability. It was evident to me that the deposit insurance system was vulnerable to abuse, to economic adversity and to regulatory failure years ago. The savings and loan insurance fund was insolvent as early as 1986, but the response of the Reagan administration was hesitant and inadequate. If anything, the response of the Congress was pathetic. Only last year did we finally take decisive steps to deal with the failure of the savings and loan insurance fund; and only this year have we fully realized the extent of the disaster. In the failure of FSLIC, we have the greatest financial scandal in the history of the Nation. No one knows what the cost will be; that figure remains for history to determine, but actually, as I have said all along, it is going to be determined by what we do and the administration will do from here on out, as it should have been since 2 years ago. What we do know is that we must solve the problems left by a decade of financial excesses, legislative errors, and unprecedented regulatory failure.

We must now confront what some of us have been asking that we confront for more than 24 years, what no one wanted to admit, particularly in the last 4 or 5 years: the deposit insurance system is in urgent need of repair. Not only did the savings and loan insurance fund fail—today the bank insurance fund is facing a fifth consecutive year of multi-billion-dollar losses, and its reserve level is at less than half the amount required for minimum safety. Even though bank deposit insurance premiums have more than doubled since last year, the bank insurance fund remains at risk and at best will not reach a reasonably safe level for perhaps 5 more years. With the economy in fragile condition, and with the bank insurance fund at less than half a safe level, we must recognize the critical need to deal with the problem. Deposit insurance is at the heart of our financial and economic stability; we ignore its problems only with the greatest peril. The failure of the FSLIC, the hundreds of billions of dollars it will cost, the present weakness of the bank insurance fund, are warnings we cannot ignore, particularly in the midst of spreading problems in the banking industry and continued weakness in the savings and loan industry. Reform is imperative.

My purpose today is to outline my proposal for deposit insurance reform. My committee will conduct hearings throughout this month to learn more about the scope of the problem and how it might be addressed. I hope that despite all the distractions we face in the closing days of this Congress, my colleagues will pay close attention to this problem, because it must be dealt with, and the sooner the better. My proposal will be controversial—truthfully, any realistic proposal will be controversial. But no matter how much controversy reform might create, I can assure you that it would be small compared to the outrage that would occur if the deposit insurance system suffers another scandalous failure.

Reform must be guided by clear principles. If we keep these principles in mind, we can overcome the complex problems that lie along the road to reform. This is the goal that guides my proposal:

We must strengthen and protect the deposit insurance funds.

We can reach the goal of strengthening and protecting the insurance funds by adhering to four basic principles, which are these:

First, ensure stringently and enforce adequate capital standards.

Second, limit insurance coverage to the amount authorized by law.

Third, require regulators to take strong, certain and prompt action when an institution begins to lose capital.

Fourth, make holding companies responsible for losses incurred by their insured depository institutions.

These ideas are simple, but they involve many complex details and much controversy. But I submit that if these principles are followed faithfully, the goal of a strong deposit insurance system can be reached, and so can the goal of protecting that system from further erosion.

We learned a great deal from the failure of the savings and loan insurance system, and many of those lessons were applied in last year's reform bill, the Financial Institutions Reform, Recovery and Enforcement Act. We learned that it is fatal to permit insured institutions to operate with little or no capital, because the money they risk is not their own, but that of depositors and ulitmately, the money of the taxpayers who insure the safety of those deposits. We also learned that temporizing only allows embedded weaknesses to fester and grow. We learned that permitting too much discretion to regulators only allows them to postpone the day of reckoning, which is not a case today and has not been for some years, as it has with the politician and the Members of Congress, in all truthfulness, and tempts them to delay action when institutions are hopelessly insolvent.

We learned that a deposit insurance fund must be strong enough to handle problems far greater than anyone had previously imagined.

□ 1240

We learned, most of all, that certain fundamental principles must be clearly known, well understood and faithfully adhered to, if insured institutions are to remain safe and sound.

Many of the reforms contained in last year's bill, known as FIRREA, are in fact deposit insurance reforms. This is the issue. The use of bailout terms is a misnomer. If I had thought that any owner, stockholder, bond holder, investor, or speculator was going to be bailed out, I would not have lifted one finger last year. What we are trying to do is rescue, preserve and reintegrate the viability of the deposit insurance fund. This is where the money is going. The sustenance of the American unique deposit insurance fund, which over the years has so become distorted, diverted from its original intent, and today is in chaotic condition.

Those reforms are intended both to strengthen the insurance funds and to protect them against future loss. But much more remains to be done.

Under FIRREA, we established two separate deposit insurance funds, both administered by FDIC. The Savings and Loan Insurance Fund [SAIF] will become operative in 1992, and will be responsible for resolving failures after that date; meanwhile this task is done by the Resolution Trust Corporation. The Bank Insurance Fund [BIF] covers deposits in banks.

The Bank Insurance Fund [BIF] and SAIF both are required under FIRREA to have a reserve of at least $1.25 for each $100 covered. But the Bank Insurance Fund has suffered enormous losses, and today stands at less than half the required amount. In fact, the bank's fund has lost money every year since 1983, and just since 1987, the BIF, the Bank Insurance

Fund reserve has fallen from $1.10 per $100 insured to 60 cents, more or less, with recent predictions it will fall still further, and is falling to 50 cents per $100 of insured. Even though BIF premiums were drastically increased in FIRREA, and even though the FDIC has put in place the maximum permissible premium increase for 1991, the fund remains perilously low and is of much concern.

The deposit insurance system has been distorted and put at risk of failure because it now extends coverage to virtually all deposits.

As a matter of fact, I have been saying for years that the original intent was to insure depositors, not deposits, but today even the name indicates that you are insuring deposits, not just those of individuals, and particularly when those deposits are placed in large institutions deemed "too large to fail," a doctrine announced very imperiously in 1984 on the occasion of the failure of the Continental Illinois, in which in effect if it had been another country, we would have said we had nationalized it, and there was in fact a little better than a $6 billion tab attached to that; but everybody was paid, including foreign depositors, and it was those foreign depositors and their ficklenesss that was the immediate cause, not the underlying cause, but the immediate cause of the fall of the Continental Illinois. No bank can have in 3 days, suffer the loss of $8.3 billion in deposits, and that is what happened when the Japanese and the European depositors pulled them out in 3 days, and then on top of that, where were the regulators when the bank had exceeded the 10 percent limit that has been in the law for years on loans to any one borrower? Without even the bank realizing itself, it had become so big that the right hand did not know what the left hand was doing, and so the Penn Square, the little shopping mall bank in Oklahoma, was able to come in and borrow with little or no collateral over $1.3 billion, way in excess of the 10 percent allowed by the law. That can still happen today, because the regulatory system certainly has not been reformed.

Moreover, this virtually unlimited coverage magnifies the so-called moral hazard of deposit insurance—that is, it increases the temptation of managers to take unwise risks in the hope of making big gains, because ultimately the risk of loss is borne by the insurance system, and that means ultimately the taxpayers. This risk is particularly great where an institution has little or no capital, cash money, and thus nothing to lose and everything to gain by taking these risks.

Our system of deposit insurance is unique. There is no other of its like in any of the industrialized nations. Both State and federally chartered institutions are covered; it provides explicit guarantees, and it is explicitly backed by the Federal Government. For all these reasons, and most especially because it is backed by the taxpayers, the distortions and weaknesses of the system cannot any longer be ignored. Reform is inescapable, and I repeat, imperative. The task will be neither simple nor will it be pleasant, of course, no problem is, but it is essential if this unique system is to be preserved, or what is more important, the safety and soundness of our financial system.

These are the actions that I propose we take: First, to strengthen the insurance funds, I propose that we:

One, remove the current ceilings on deposit insurance premium assessments, and give the FDIC the authority to set premiums as needed and as appropriate. The existence of the premium ceiling creates false expectations that deposit insurance will be cheap, regardless of the underlying risks.

Two, extend assessments to foreign deposits and the various bank debt obligations, which are treated as insured in any event. This would increase revenues to the insurance funds, and would also be fundamentally fair, since what is insured should also be assessed a premium.

Three, establish a risk-based premium system. Presently, an institution pays a flat premium regardless of how risky its activities are. FIRREA requires the FDIC to study such a system and report to the Congress by January 1. I recognize that not every risk can be quantified and that risks can change over time, but I also believe that risks can and should be taken into account, certainly they should be, in the premium assessment system, so that institutions that take greater risks will pay insurance premiums commensurate to that risk. That is certainly done by all private insurers. Why should the government be less considerate.

Four, limit the risk of investments permissible for insured funds. In FIRREA, we adopted limits on investments savings and loan associations can make—no junk bonds, limits on loans to one borrower, and other restrictions. In addition, we established risk-based capital standards. In each instance, the idea is to provide limits on risks, and to provide incentives to reduce the risks taken with insured funds.

The steps I have outlined are not merely prudent, but I believe essential to build a deposit insurance fund that has strength approaching a reasonable level.

Not only do we have to strengthen the funds, we have to protect them. No insurance system can survive unlimited risks, nor can it survive wanton recklessness and irresponsibility. Therefore reform must protect those funds, not merely to prevent payouts, but to ensure the basic safety of the financial system itself. The weakness of the fund clearly reveals the underlying weakness of the nation's banking system.

These are the steps necessary to protect the banking system and the insurance that stands behind it:

□ 1250

First, and most important, strengthen capital. Capital is the money that the owners of financial institutions have at risk. if owners have little or no capital, the only money they are risking is the money of the insurance system and the taxpayers who back it up. Conversely, if the owners of an institution have a great deal of capital at risk, they are much more likely to be two things: more profitable and more prudent. Capital is the key, the indispensable element.

In FIRREA, we went a long way toward taking the necessary action. We prevented insured institutions from operating without capital; we eliminated the idea that phony capital is a substitute for the real thing; and we firmly established the principle that capital should reflect the risk of the underlying assets—the greater the risk, the higher the capital.

But we need to do more.

Accounting standards that overstate the value of assets or that understate liabilities ought to be eliminated. Whenever possible, assets ought to be computed on a market value basis; book values sometimes fail to reflect what an asset can be sold for, and thus distort economic reality. Where assets are of a type that are not often traded and thus can't readily be marked to market, independent valuations should be made on a regular basis.

The regulator, who must be independent, must regularly evaluate capital requirements. In a dynamic and rapidly changing world, no one capital standard is right for all institutions at all times. There must be certain absolute minimums, but regulators must routinely determine appropriate levels for minimum capital, and must regularly assess the need to change risk weighting.

Regulatory staffs must be sufficient and sufficiently trained, to enable more frequent determinations of institution strengths. Never again should there be institutions that are not regularly examined. Never again should there be any notion of substituting phony capital for the real thing, or of allowing institutions to operate without a safe level of capital.

Probably the best way to assure that capital standards are uniform and uniformly enforced, would be to consolidate regulatory functions in a single, truly independent agency. Such an

agency would provide consistent administration of laws intended to protect safety and soundness of insured institutions. Studies through the years have revealed a crazy-quilt pattern of interpretations and enforcement standards. I can recall every one of the major studies that our committees have authorized and paid for since the 1960's, and every one of them revealed strong deficiencies about which unfortunately we could never, never muster our leadership at the time from following through on some minimal legislative recommendations that resulted from the studies and the hearings. A single agency would eliminate the remnants of the age-old tradition of agency-constituency relationships that sometimes have led agencies to become cheerleaders for their segment of the industry, rather than objective, flinty supervisors. A case in point is the former Federal Home Loan Bank Board, widely and justifiably seen as a captive of the savings and loan industry it was supposed to regulate.

In fact, in my area, Home Loan Bank Board of Dallas, TX, was inseparable. The members were members of the industry. They were regulating themselves and leading the regulation. All the plans that were developed in 1988 came from that source.

At the moment, two key regulatory agencies, the Office of the Comptroller of Currency and the Office of Thrift Supervision, are components of the Treasury, while a third bank supervisor is in the Federal Reserve. The Treasury has multiple functions and distractions, while the Federal Reserve must focus on monetary policy. It makes sense to create an independent agency whose sole function would be to provide the kind of consistent, hard-nosed regulation that would protect the insurance funds.

Additionally, we must enforce the insurance limit per account. As matters stand today, better than 99 percent of all deposits are effectively insured, notwithstanding the $100,000 limit, believe it or not. It is incredible. The present regulations effectively evade limits because they allow coverage of giant accounts to be "passed through" to clients of pension systems; and because a single individual can have multiple disaggregated—they call it technically—insured accounts in a single institution.

In addition, the resolution methods commonly used simply pass all accounts, regardless of size, from a failed institution to an acquirer. For example, the failed National Bank of Washington's deposit and loan accounts were sold to the Riggs Bank, which apparently intends to keep only a tiny handful of the old bank's loans. Thus, everybody in the bank, regardless of their deposit size, was protected as if the whole bank had been taken over, when in fact the acquiring bank just wanted the deposit customers, not the loan business with its attendant risks. A deposit payoff, which would have protected only those within the limit, might well have been less, and I am sure it would have been a lot less expensive.

I would consider actually reducing the $100,000 deposit coverage. That is not holy skrit. That is not set on tablets of stone. I was here on this floor with less than 15 Members present when in less than 15 minutes the insurance amount of coverage was raised from $40,000 to $100,000, and with no discussion, no debate, no hearings at any time, at least not on the House side that I can recall. So what is the sanctity of that amount, even though, in my opinion, the other more fundamental reforms should be a matter of priority. The average account in this country is only about $8,700. The overwhelming majority of depositors would be fully protected with far less insurance coverage than the law currently provides. The great preponderant majority of depositors today, over 80–85 percent, do not even have over $10,000 in an insured institution. So where are all of these payouts going in the case of the failed ones? They are going to these giant disaggregated and rich depositors. The purpose of deposit insurance is not to totally protect all depositors—it is to protect small depositors who do not have the means to investigate the safety of a given investment. If we were to reduce the amount of coverage, we would encourage greater prudence by investors and bank management alike. This is what we said as soon as we discovered belatedly what was contained in that motion to accept the Senate bill that fateful day, and some say it was 1980. I recall it was 1979, and the reason I recall it is that some have mistakenly said that the immediate predecessor chairman of the Committee on Banking, Finance and Urban Affairs was the one that was chairman then. He was not. He was then handling it as chairman of the subcommittee. The full committee chairman at that time had delegated him to handle that matter. As it is, everyone feels free to take a flyer in a weak bank, knowing that Uncle Sam will pick up the pieces if the place fails. This hot money phenomenon would be diminished with a lower amount of coverage, without adversely affecting the overwhelming majority of depositors.

I also propose preventing multiple insured accounts. It might be reasonable to allow each customer insurance on a personal account, a separate business account and a separate custodial account like an IRA. But today, it is possible to insure hundreds of thousands of dollars in differently styled accounts, all in a single institution; this is a distortion and abuse of the insurance system.

I have been saying that for years, but the thing is so overgrown and so distorted it is going to be a tough one.

□ 1300

I would allow a person to increase coverage over and above the basic limit only if that individual were to pay an additional premium up front. Those who benefit from huge coverage ought to pay for it—not the small depositor whose taxes back up that inflated coverage.

So-called super accounts like bank investment contracts, pension fund deposits and others, should not get the kind of multimillion dollar protection that exists today. These are funds placed by professionals, who ought to be able to evaluate risks for themselves, and certainly shouldn't be rewarded for placing huge sums in weak institutions.

An additional and vital principle of my reform proposal is to limit the discretion of regulators, when an institution is in a weakening position. This is the only way to resolve the "too big to fail" problem.

At the heart of the FSLIC disaster was the failure of Congress and regulators to take early and forceful action to close insolvent institutions. The use of regulatory accounting gimmicks, the hopes that forbearance would allow time to heal all problems, and the idea that capital wasn't necessary, that we could through legislative jiggerypokery and legislative legerdemain, make a risky institution safe and sound. All contributed to the growing depth and breadth of the scandal.

I propose that regulators follow clearly prescribed actions when an insured institution's capital is impaired. The greater the impairment, the more stringent the action, and the less discretion permitted, would be the general rule. All institutions, regardless of size, would be treated in a like way, whenever their capital is impaired.

Today, the Comptroller acts to seize a bank when equity capital is gone—the place may not be totally broke by then, but clearly is unlikely to survive. The cost of resolving such a case is much less than the cost of allowing an institution to go through the floor and into the endless depths of failure. Mandatory restrictions on capital impaired savings and loans were imposed in FIRREA—such mandatory actions clearly ought to be a central element in protecting the deposit insurance system. But such treatment still is not certain nor is it uniform. I propose to remedy that.

For example, an institution with capital below a prescribed level should not be permitted to devise golden parachutes for the failing managers. Nor should such institutions pay out dividends when they ought to be re-

plenishing capital. There should be no payments to affiliates, without regulators approval.

Limits on growth, payments on subordinated debt interest, and the like, all should be restricted in a systematic way as capital declines. Correspondingly, regulatory control on a well-capitalized institution should be loosened.

I propose requiring a clear business plan at a certain capital level; I would require conservatorship at a lower level, perhaps a two per cent capital level. In no event would I permit regulatory to keep open an insolvent institution. The clarity and certainty of action I propose would impose a salutary discipline on regulators and regulated alike.

But there are still more actions needed to protect a strengthened deposit insurance system.

In FIRREA, we made commonly controlled institutions liable for each other's losses. What this means is that where a number of insured institutions are commonly controlled, the controlling entity cannot allow one or more institutions to sink, and hold on to just the healthy ones. This has happened in Texas, my own State. In other words, they leave the Government holding the bag, as it is. Uncle Sam ends up with all of the bad loans, all the junk, and you get an acquirer that has been bailed out through Government subsidy, in effect, with no bad loans.

This is the worst of all worlds, because that entity is competing now with the last few surviving independent, nonsubsidized entities. How can they last? They did not in the case of the savings and loans.

In my city of San Antonio we have only one remaining savings and loan. But every one of those that went under would have thought I was and in fact did think I was a raving radical.

I notice the presence of my colleague the gentleman from Virginia [Mr. PARRIS]. Let me say in all fairness, all truthfulness, his voice on several occasions I recall vividly was raised in the committee at hearings, and the gentleman was expressing grave and serious concern, and was most knowledgeable. I want to recognize that fact.

Mr. PARRIS. Mr. Speaker, will the gentleman yield?

Mr. GONZALEZ. I yield to the gentleman from Virginia [Mr. PARRIS].

Mr. PARRIS. Mr. Speaker, I appreciate the gentleman yielding. I have listened with considerable interest to the excellent statements that the chairman of the Committee on Banking, Finance, and Urban Affairs has made today on this important subject.

We have all heard it said many times that in a very complex situation, there is always a simple answer, which is always wrong. This is a very, very complex situation.

Mr. Speaker, I have come here today to listen to the remarks of the gentleman from Texas [Mr. GONZALEZ], because this is a matter of which I have had some interest over time as a Member of this institution. I want to say again to the chairman in response to his very kind comments, that under his leadership, as chairman of the Committee on Banking, Finance, and Urban Affairs, when we adopted FIRREA and instituted many of the reforms and measures that the gentleman has alluded to in his previous remarks here this afternoon, that much of that has been due to his leadership as chairman of that committee. I applaud the gentleman for that role and for his leadership.

Mr. Speaker, I just have one question of the gentleman from Texas [Mr. GONZALEZ], if I might. That is as the gentleman has previously mentioned in his remarks, FIRREA does require the Treasury Department to examine and report back to the Congress and the appropriate committees in regard to deposit insurance reform, and, my recollection is, there is some reference to restructuring.

Mr. GONZALEZ. Mr. Speaker, that is correct.

Mr. PARRIS. The Treasury Department has, in fact, indicated that they are undertaking some examination of that situation in both regards. My question to the chairman, and I especially noted his reference to holding some hearings in an early time frame in this Congress in regard to restructuring and to deposit insurance is, is it possible, and if this is an inappropriate question at the moment, do not hesitate to say so, but is it possible that the chairman would consider legislation in this Congress in regard to those two issues? Or is the gentleman simply attempting to focus attention and concern and lay the groundwork, if you will, to the study from the Treasury Department in regard to these important areas?

Mr. GONZALEZ. Mr. Speaker, yes, to follow through in more precise legislative language to this general statement I am making today as to intention, we should be able to have some results after checking with the Legislative Research Service before the end of the month. It would be my intention to go ahead and submit it. I do not know that from a realistic standpoint there would be much hope for action in the remaining time, but we do not know what is going to happen. We do not know if we will have a lame duck session or not. I think the sooner we get going, the better. That is why we want to have hearings, so we will have a background of information we can be adducing in the meanwhile.

Also in order to provide some leadership, some target, I hope to submit in bill form before the end of the month, and I would say substantially before the end of the month, a precise legislative draft expressing these intentions that I am mentioning generally today.

Mr. Speaker, of course, I will be communicating with the gentleman from Virginia [Mr. PARRIS]. He will be one of the first that I will be sending this copy to, and then, of course, a whole lot will depend on what happens here on out and what the will of Members like the gentleman from Virginia [Mr. PARRIS] and the majority of the committee wants to do and can do.

Mr. Speaker, it would seem to me that the better part of wisdom would be to wait until we had the benefit of Treasury's recommendations, which under FIRREA, they must submit by the end of the year, by 1991. But I do not see any reason why we should not be working in the meanwhile, while we are constituted and in session.

Mr. Speaker, as the gentleman from Virginia [Mr. PARRIS] knows, we will have a new Congress in January. By the time we have organized and reorganized committees, it will be the first week in February. So I think this is a matter so urgent that we should do everything that we are able to do now, and at the same time not try to overreach ourselves and act independently of whatever findings and recommendations Treasury might give us.

□ 1310

Mr. PARRIS. Of course, I hope and expect to be a Member of that new Congress.

Mr. GONZALEZ. I trust so.

Mr. PARRIS. And I look forward to approaching the task of restructuring and deposit insurance reform.

Finally, I say to the chairman, there are those of us who have different judgments in regard to these complex matters, but the chairman, as usual, has been courageous and is recognized for his lack of timidity in tackling these very, very difficult issues, sometimes in the face of opposition by special interest groups.

I congratulate the chairman for his position with regard to that and for his cooperation in the past.

Mr. Speaker, I thank the gentleman for yielding.

Mr. GONZALEZ. I am very grateful to the gentleman for his kind remarks, but above all for his performance and his contribution to whatever successes the committee can point to with some pride.

The gentleman has been in the forefront, as I said earlier, and the record is there. Politics aside, and I hope that even in this political year that we could minimize that because the issue is of such national importance, so vital, that unless men of goodwill, regardless of partisan differences and even ideology or ideas as to how to approach it—after all, that is why we have debate—2 heads, 10 heads, 30

heads are better than 1. We have very able membership on the committee.

I think the gentleman from Virginia, in all truthfulness, has been in the forefront. I think he was kind of rasping some nerves just 2½ or 3 years ago. I remember vividly because the gentleman was giving us statistics as to occurrences in my own home State of Texas with which I had been agonizing for months and could not get anybody to listen to.

I was surprised, but very pleased. I was hopeful that, with that expressed interest and the gentleman's leadership as a minority member of the committee, that we could have somehow or other prevailed a little bit earlier than was the case. But I think the record is there. I think, in all justification, the gentleman should feel proud that he recognized the dimensions of the problem and was concerned and expressed that concern and was knowledgeable. Let me say that his expertise contributed greatly to this committee.

I am not saying that just because the gentleman is here; I have said it elsewhere and I will say it again.

I said at the beginning that all the real power I ever felt a chairman really had essentially was just the power to set the agenda and offer leadership. After all, why be there?

Then you let the will of the majority prevail, but only after that agenda has provided, as far as it is humanly possible, all the necessary information and knowledge adduced through intensive hearings.

Let me point out that when I first came to the Congress, my first session—I have belonged to this committee since I came to the Congress 29 years ago—we had two sessions of the committee that whole half-year. That last session of the 87th Congress was only two full committee meetings.

And up to now, in this session, we have had 43 full committee hearings since the beginning of this Congress last year.

That is the only way I know, and I think that is basic to the purpose of congressional legislative activity, to be informed.

We have to adduce that information from all levels. The record will show that again.

I want to thank the gentleman, that even when few showed up, I could look to my left and see the gentleman's presence there. I want the gentleman to know that that meant a lot to me.

After all, the committee is a 51-member committee today. When I came aboard, I constituted No. 31. And there was some reluctance at that point to enlarge it to 31.

So I think the record ought to show that, and in all fairness and justice, the gentleman should be given credit for his performance. The record is there.

Coming back to the theme, I left off about the commonly controlled institutions liable for each other's losses. I just do not believe that the so-called firewall concept is very effective in preventing a holding company from undertaking activities that could put insured institutions at risk. In fact, we are seeing this now.

The Federal Reserve Board, through its interpretation and action of January 20 of last year, 1989, decided to interpret a section of the Bank Holding Company Act in such a way as to allow banks to get into this dastardly thing that has given all the mischief; and that is, equity for debt, to five specific big banks, the Federal Reserve.

I wrote a letter and expressed concern and said, "Hold up, don't do anything. We want to have hearings on this thing." They said, "Well, that is too bad. That is our interpretation of the law. We have taken care, we have firewalls, and we have this, that and the other." We examined that.

We find that there are untold millions of dollars of insured deposit money that is involved in high-risk, speculative ventures.

In the leveraged buyouts, and its apparent collapse, the commercial banking institutions are out way over, way over $50, $60 billion.

In just one, the R.J. Reynolds transaction, bank credit—and to what extent does that mean insured deposits—well, you can take it from there, anyway, you had more than $24 billion involved. So we are facing tremendous problems.

We have a total of over $3 trillion worth of insured deposits in commercial banks alone. But in the insurance fund, we do not even have $12 billion now.

This is the reason I am saying, and on the record, to my colleagues that the day has been reached where we cannot turn our backs, where we have got to at least initiate what must be a basic reform.

My proposition would be, instead of depending on firewalls, to extend the principle of cross-guarantees by requiring indemnification or liability provisions running from the parent, or the affiliate, to the insured institution. In this way there is a strong and, hopefully, compelling financial incentive to avoid actions by the parent company that can wreck the insured institution.

Similarly, the cross-guarantee concept needs to be clarified so that the authority of regulators to require a holding company to recapitalize insured affiliates is unquestioned.

All subsidiaries of a holding company ought to be separately capitalized. This is the theory they give us behind the so-called firewall concept. The operating principle here is to provide incentives for holding companies not to loot the bank or let it go down the drain, secure in the knowledge that somebody else will pick up the pieces.

Those who own banks, after all, are given special privileges, in fact, the most privileges.

Our country was started on the concept that we had equal rights for all, privileges for none. But the banking community is the most privileged of any segment of our society. As a matter of fact, they manufacture money and credit, not the Congress. What greater power and privilege than that?

So that, to repeat, the operative principle here is to provide incentives for the holding companies not to loot the bank. Of course, it is going to happen, when it comes to a push and a shove. And you realize, "well, after all, the FDIC will come in and will take over and we are not going to lose anything. So the fund is broke. Well, the taxpayers are guaranteeing that. So we are taxpayers, we will all be paying."

□ 1320

Those who own banks, after all, are given special privilege and status throughout their charters, and let me remind the banking community charters, when they are chartered, we have not really gone through the chartering process. The problem began back in the 1960s. In fact, I even introduced a bill to try to control a takeover of one bank of another through what they call hypothecation of bank stock.

This had happened in my district, and it showed clearly how, by evading the chartering process, otherwise incompetent applicants for charter were able to obtain a bank. However, every one of our statutes from the beginning of the country indicated that a bank shall be chartered for public need and convenience. Not convenience and profit of the bank, but "public need and convenience." I have crooned for 29 years when I have seen the great panjandrum of regulators and Chairmen of the Fed and others come and act as if we are supposed to be here, the Congress of the United States, representatives of the people, supposed to be at their beck and call rather than for the greatest interest of the greatest number of those who have elected Members to represent them. I want to remind bankers that if they are chartered, they are chartered for public need and convenience. Not as a license to go out and hunt for profits of an inordinate kind. They owe a special responsibility in exchange for that privilege. We cannot any longer afford to let the Deposit Insurance System underwrite the greatest risk while the profits go to owners and managers. Strengthening the system of cross guarantees not only is better than constructing elaborate but always vulnerable firewalls, it

is the best possible protection there is against moral hazard, and the idea that we would even use a word "moral hazard" is almost repugnant. An entity that has its own money at the greatest risk is not likely to be tempted to undertake foolish ventures. What regulation and proscription cannot accomplish, economic incentives can. This is the way to minimize the moral hazard that presently is associated with the deposit insurance structure today.

To summarize, my goal is to strengthen and protect the Deposit Insurance System itself, and the safety and soundness of our financial institutions thereby. This can be done by providing and enforcing adequate capital standards; by limiting insurance coverage and requiring realistic pricing for the coverage; by unifying the regulatory system and making it independent; by requiring regulators to act promptly and decisively when an insured institution begins to weaken; and by making holding companies responsible for losses their institutions incur.

This month, the committee will conduct hearings on deposit insurance in anticipation of reports required by FIRREA. We will hear from the Chairman of the Federal Reserve Board, the Chairman of the FDIC, the Director of the Congressional Budget Office and the Comptroller of the General Accounting Office. All of these agencies have been developing information on a crucial problem; all are ready to present findings thus far. All agree that there is an urgent need to act.

My proposal will be controversial. But I have learned that the more needed a reform is, the greater is the resistance; and I have learned that the greater the delay, the harsher the penalty. In the savings and loan catastrophe, we learned the cost of ignoring perilous situations. The reform I am offering will not be easy, but these are actions we must take. Delay will not make the task any easier, only harder and much more costly. Despite all distractions, despite all pleas to avoid these necessary actions, the reform I have outlined must be adopted. The only question is whether we will act before the storm clouds break.

Before I close, I would like to recognize the presence of another gentleman, and he has a little bit higher ranking on the minority side than the gentleman from Virginia [Mr. PARRIS], and I am speaking of the gentleman from Iowa [Mr. LEACH]. Now, I have tried to minimize and done my deadlevel best to minimize partisanship. It so happens that at this time the only two Members that have come in from the committee happen to be Members of the minority party. But the record there, again, is clear and evident, and it is self-proclaiming. As in the case of the gentleman from Virginia [Mr. PARRIS] and in the case of the gentleman from Iowa [Mr. LEACH], precisely, he has been forceful, outspoken, clear in his judgments, also another indispensable factor as a member of the Committee on Banking, and I am grateful for this opportunity to say so. I want to thank the gentleman from Iowa [Mr. LEACH] for his presence here today.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Member (at the request of Mr. PARRIS) to revise and extend his remarks and include extraneous material:)

Mr. WOLF, for 60 minutes each day, on September 6 and 7.

(The following Members (at the request of Mr. GONZALEZ) to revise and extend their remarks and include extraneous material:)

Mr. RICHARDSON, for 5 minutes, today.

Mr. STARK, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. LIPINSKI, for 5 minutes each day, on September 11, 18, and 25.

Mr. GONZALEZ, for 60 minutes, today.

Mr. ALEXANDER, for 15 minutes, on September 6.

Mr. LIPINSKI, for 60 minutes each day, on September 12, 19, and 26.

Mr. GONZALEZ, for 60 minutes, each day, on September 10, 13, 14, 17, 20, 21, 24, 27, and 28.

Mr. OWENS of New York, for 60 minutes each day, on September 12, 13, 14, 17, 18, 19, 20, and 21.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. PARRIS) and to include extraneous matter:)

Mr. SCHUETTE.

Mr. TAUKE.

Mr. BROOMFIELD in three instances.

Mr. PURSELL.

Mr. BLILEY.

Mr. CONTE.

(The following Members (at the request of Mr. GONZALEZ) and to include extraneous matter:)

Mr. ANDERSON in 10 instances.

Mr. GONZALEZ in 10 instances.

Mr. BROWN of California in 10 instances.

Mr. ANNUNZIO in six instances.

Mrs. LLOYD in five instances.

Mr. HAMILTON in 10 instances.

Mr. DE LA GARZA in 10 instances.

Mr. NELSON of Florida.

Mr. MCMILLEN of Maryland.

Mr. MAVROULES.

Mr. MOAKLEY.

Mr. ROE in two instances.

Mr. KANJORSKI.

Mr. HOCHBRUECKNER.

SENATE BILLS REFERRED

Bills of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 324. An act to establish a national energy strategy for the United States that reflects concern for the global environmental consequences of current trends in atmospheric concentrations of greenhouse gases, and for other purposes; to the Committees on Energy and Commerce and Science, Space and Technology.

S. 1289. An act to improve the management of forests and woodlands and the production of forest resources on Indian lands, and for other purposes; to the Committee on Interior and Insular Affairs.

S. 1834. An act to recognize and grant a Federal charter to the organization known as the Supreme Court Historical Society; to the Committee on the Judiciary.

S. 1913. An act to require the use of child restraint systems on commercial aircraft; to the Committee on Public Works and Transportation.

S. 1963. An act to amend the Public Health Service Act to facilitate the revitalization of the Commissioned Corps of the Public Health Service, and for other purposes; to the Committee on Energy and Commerce.

S. 1974. An act to require new televisions to have built in decoder circuitry; to the Committee on Energy and Commerce.

S. 2176. An act to provide better enforcement of the environmental laws of the United States, and for other purposes, to the Committee on Merchant Marine and Fisheries.

S. 2340. An act to develop and improve child protective service programs on Indian reservations and to strengthen Indian families; to the Committee on Interior and Insular Affairs.

S. 2628. An act to amend the Public Health Service Act to reauthorize certain National Institute of Mental Health grants and to improve provisions concerning the State comprehensive mental health services plan, and for other purposes; to the Committee on Energy and Commerce.

S. 2632. An Act to amend the Public Health Service Act to reauthorize the National Center for Health Statistics, and for other purposes; to the Committee on Energy and Commerce.

S. 2636. An act to authorize the Board of Regents of the Smithsonian Institution to plan and design an extension of the National Air and Space Museum at Washington Dulles International Airport, and for other purposes; to the Committee on House Administration.

S. 2753. An act to reauthorize the Developmental Disabilities Assistance and Bill of Rights Act; to the Committee on Energy and Commerce.

S. 2757. An act to amend the Foreign Assistance Act of 1961 to authorize the provision of medical supplies and other humanitarian assistance to the Lithuanian people to alleviate suffering during the current emergency; to the Committee on Foreign Affairs.

S. 2841. An act the Omnibus Territories Act of 1990; to the Committees on Armed Services, Interior and Insular Affairs, and Government Operations.

S. 2909. An act expressing the sense of Congress relating to the reduction of nuclear risk, requiring the Secretary of Defense to report on measures to reduce such risk, and for other purposes; to the Committees on Foreign Affairs and Armed Services.

S.J. Res. 357. Joint resolution to designate September 15, 1990 to October 15, 1990, as "Community Center Month"; to the Committee on Post Office and Civil Service.

S. Con. Res. 123. Concurrent resolution to encourage State governments, local governments and local educational agencies to adopt a comprehensive curricular program which provides elementary and secondary students with a thorough knowledge of the history and principles of the Constitution and the Bill of Rights and which fosters civic competence and civic responsibility; to the Committee on Education and Labor.

S. Con. Res. 127. Concurrent resolution to express the sense of Congress that Greyhound Lines, Inc., and the Amalgamated Transit Union should pursue meaningful negotiations under the auspices of the Federal Mediation and Conciliation Service to resolve their dispute and restore vital transportation services to American communities; to the Committee on Education and Labor.

S. Con. Res. 132. Concurrent resolution expressing the sense of the Congress that August 30, 1990, be observed as "1890 Land-Grant Institutions Centennial Recognition Day"; to the Committee on Post Office and Civil Service.

S. Con. Res. 145. Concurrent resolution to salute and congratulate the people of Poland as they commemorate the 200th anniversary of the adoption of the Polish Constitution; to the Committee on Post Office and Civil Service.

ENROLLED BILLS AND JOINT RESOLUTIONS SIGNED

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills, and joint resolutions of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 498. An act to clarify and strengthen the authority for certain Department of the Interior law enforcement services, activities, and officers in Indian country, and for other purposes;

H.R. 1159. An act to amend the National Trails System Act by designating the Juan Bautista de Anza National Historic Trail, and for other purposes;

H.R. 1199. An act to amend title 38, United States Code, to establish a system of competitive pay for nurses employed by the Department of Veterans Affairs, to authorize the Secretary of Veterans Affairs to make such system applicable to certain other health care personnel, to make certain improvements in veterans' health and education programs, and for other purposes;

H.R. 1465. An act to establish limitations on liability for damages resulting from oil pollution, to establish a fund for the payment of compensation for such damages, and for other purposes;

H.R. 1594. An act to make miscellaneous and technical changes to various trade laws;

H.R. 3048. An act to designate the Agricultural Research Service, U.S. Department of Agriculture, animal health research building in Clay Center, NE, as the "Virginia D. Smith Animal Health Research Laboratory;"

H.R. 3086. An act to amend title 5, United States Code, to grant appeal rights to members of the excepted service affected by adverse personnel actions, and for other purposes;

H.R. 3248. An act to revise the boundary of Gettysburg National Military Park in the Commonwealth of Pennsylvania, and for other purposes;

H.R. 4035. An act to designate the Federal building located at 777 Sonoma Avenue in Santa Rosa, CA, as the "John F. Shea Federal Building;"

H.R. 4273. An act to amend the Public Health Service Act to extend the program of grants for preventive health services with respect to tuberculosis, and for other purposes;

H.R. 4314. An act to implement the Inter-American Convention on International Commercial Arbitration;

H.R. 4790. An act to amend the Public Health Service Act to establish a program of grants for the detection and control of breast and cervical cancer;

H.R. 5131. An act to amend the Federal Aviation Act of 1958 to extend the civil penalty assessment demonstration program, and for other purposes;

H.R. 5350. An act to provide for a temporary increase in the public debt limit;

H.R. 5432. An act to extend the expiration date of the Defense Production Act of 1950;

3775. A letter from the Deputy Associate Director for Collection and Disbursement, Department of the Interior, transmitting notification of proposed refunds of excess royalty payments in OCS areas, pursuant to 43 U.S.C. 1339(b); to the Committee on Interior and Insular Affairs.

3776. A letter from the Deputy Associate Director for Collection and Disbursement, Department of the Interior, transmitting notification of proposed refunds of excess royalty payments in OCS areas, pursuant to 43 U.S.C. 1339(b); to the Committee on Interior and Insular Affairs.

3777. A letter from the Deputy Associate Director for Collection and Disbursement, Department of the Interior, transmitting notification of proposed refunds of excess royalty payments in OCS areas, pursuant to 43 U.S.C. 1339(b); to the Committee on Interior and Insular Affairs.

3778. A letter from the Secretary of the Interior, transmitting the study report on the De Soto Trail in Florida, Georgia, South Carolina, North Carolina, Tennessee, Alabama, Mississippi, Arkansas, Texas, and Louisiana, pursuant to 16 U.S.C. 1244(b); to the Committee on Interior and Insular Affairs.

3779. A letter from the Chairman, Administrative Conference of the United States, transmitting the eight annual report on agency activities for the period of October 1, 1988, through September 30, 1989, pursuant to 5 U.S.C. 575; to the Committee on the Judiciary.

3780. A letter from the U.S. Sentencing Commission, transmitting the 1989 annual report of the activities of the Commission, pursuant to 28 U.S.C. 997; to the Committee on the Judiciary.

3781. A letter from the Secretary of Commerce, transmitting a report on the fishermen's contingency fund, pursuant to 43 U.S.C. 1846(a); to the Committee on Merchant Marine and Fisheries.

3782. A letter from the Secretary of the Interior, transmitting a report of the U.S. Fish and Wildlife Service entitled "Wetland Losses in the United States—1780's to 1980's", pursuant to Public Law 101-233, section 18; to the Committee on Merchant Marine and Fisheries.

3783. A Communication from the President of the United States, transmitting an alternative plan for a Federal employees' pay adjustment to become effective on the first day of the first applicable pay period on or after January 1, 1991, pursuant to 5 U.S.C. 5305(c)(1) (H. Doc. No. 101-221); to the Committee on Post Office and Civil Service and ordered to be printed.

3784. A letter from the Martin Luther King, Jr. Federal Holiday Commission, transmitting the summary report on the fifth Federal holiday in honor of Dr. Martin Luther King, Jr.; to the Committee on Post Office and Civil Service.

3785. A letter from the Administrator, Environmental Protection Agency, transmitting the Agency's report, "Rainfall Induced Infiltration Into Sewer Systems"; to the Committee on Public Works and Transportation.

3786. A letter from the Administrator, General Services Administration, transmitting an informational copy of a prospectus for the Environmental Protection Agency in Chapel Hill, NC, pursuant to 40 U.S.C. 606(a); to the Committee on Public Works and Transportation.

3787. A letter from the Administrator, General Services Administration, transmitting an information copy of a lease prospectus for the U.S. attorney in Cleveland, OH, pursuant to 40 U.S.C. 606(a); to the Committee on Public Works and Transportation.

3788. A letter from the Administrator, General Services Administration, transmitting an informational copy of a prospectus for the Office of Personnel Management, located in the Thomas Circle South Building, 1121 Vermont Avenue, Washington, DC, pursuant to 40 U.S.C. 606(a); to the Committee on Public Works and Transportation.

3789. A letter from the Chairman, National Transportation Safety Board, transmitting the Ethiopian Government's report of the August 7, 1989, aviation accident involving Congressman Mickey Leland; to the Committee on Public Works and Transportation.

3790. A letter from the Administrator, National Aeronautics and Space Administration, transmitting notification of the waiver of the monetary set-aside for technology transfers and the reasons therefor; to the Committee on Science, Space, and Technology.

3791. A letter from the Secretary of Energy, transmitting a copy of a report entitled, "Continuous Fiber Ceramic Composite Program Plan"; to the Committee on Science, Space, and Technology.

3792. A letter from the Secretary of Defense, transmitting the report on Department of Defense procurement from small and other business firms for the period October 1989, through May 1990, and fiscal year 1990, pursuant to 15 U.S.C. 639(d); to the Committee on Small Business.

3793. A letter from the U.S. Court of Veterans Appeals, transmitting the actuarial report for year ending December 31, 1989; to the Committee on Veterans' Affairs.

3794. A communication from the President of the United States, transmitting notification of his determination that a waiver with respect to the emigration practices of the German Democratic Republic will substantially promote the objectives of section 402 of the Trade Act of 1974, pursuant to 19 U.S.C. 2432 (c), (d) (H. Doc. No. 101-226); to the Committee on Ways and Means and ordered to be printed.

3795. A letter from the Secretary of Health and Human Services, transmitting the fourth annual report on the impact of the Medicare hospital prospective payment system, pursuant to 42 U.S.C. 1395ww nt.; to the Committee on Ways and Means.

3796. A letter from the Acting U.S. Trade Representative, transmitting the President's determination that unilateral imposition of certain import fees are not in the national economic interest, pursuant to 19 U.S.C. 2411; to the Committee on Ways and Means.

3797. A letter from the Acting General Counsel, Department of Treasury, transmitting a draft of proposed legislation to amend the Tariff Act of 1930 to modernize and simplify customs procedures, facilitate the entry and clearance of vessels, increase the effectiveness of the Customs Service in commercial matters, and for other purposes; to the Committee on Ways and Means.

3798. A letter from the Secretary of Health and Human Services, transmitting a report on the rural secondary specialty demonstration; to the Committee on Ways and Means.

3799. A letter from the U.S. Trade Representative, transmitting a report on recent developments regarding implementation of section 301 of the Omnibus Trade and Competitiveness Act of 1988 for the period January through June 1990, pursuant to 19 U.S.C. 2411; to the Committee on Ways and Means.

3800. A letter from the Under Secretary for International Affairs and Commodity Programs, Department of Agriculture, transmitting a country and commodity allocation report showing current programming plans for food assistance under title II of Public Law 480 for fiscal year 1990, pursuant to 7 U.S.C. 2736b(a); jointly, to the Committees on Agriculture and Foreign Affairs.

3801. A letter from the Director, Office of Management and Budget, transmitting his certification that the amounts appropriated for the Board for International Broadcasting for grants to Radio Free Europe/Radio Liberty, Inc., are $5,187,142 less than the amount necessary to maintain the budgeted level of operation because of exchange rate losses in the third quarter of 1990, pursuant to 22 U.S.C. 2877(a)(2); jointly, to the Committees on Appropriations and Foreign Affairs.

3802. A letter from the Comptroller of the Department of Defense, transmitting notification that the Secretary has invoked the authority granted by section 3732 of the revised statutes to authorize the military departments to incur obligations in excess of available appropriations for clothing, subsistence, forage, fuel, quarters, transportation, and medical and hospital supplies; jointly, to the Committees on Armed Services and Appropriations.

3803. A letter from the Acting Secretary of State, transmitting the President's certification waiving certain restrictions as it is in the national interest, pursuant to Public Law 100-456, section 1306(b); jointly, to the Committees on Armed Services and Foreign Affairs.

3804. A letter from the Secretary of Energy, transmitting an implementation plan regarding operator training at Savannah River site; jointly, to the Committees on Armed Services and Energy and Commerce.

3805. A letter from the Secretary of Labor, transmitting the Department's annual report on black lung benefits during calendar year 1988, pursuant to 30 U.S.C. 936(b); jointly, to the Committees on Education and Labor and Ways and Means.

3806. A letter from the Acid Precipitation Assessment Program, transmitting the program's 1989 annual report, pursuant to 42 U.S.C. 8903(e); jointly, to the Committees on Energy and Commerce and Science, Space, and Technology.

3807. A letter from the Chairman, Nuclear Regulatory Commission, transmitting the Commission's report on abnormal occurrences at licensed nuclear facilities for the first calendar quarter of 1990, pursuant to 42 U.S.C. 5848; jointly, to the Committees on Energy and Commerce and Interior and Insular Affairs.

3808. A letter from the Chairman, Nuclear Regulatory Commission, transmitting the report on the nondisclosure of Safeguards Information for the quarter ending June 30, 1990, pursuant to 42 U.S.C. 2167(e); jointly, to the Committees on Energy and Commerce and Interior and Insular Affairs.

3809. A letter from the Agency for International Development, transmitting the fiscal year 1989 report on the Denton amendment program; jointly, to the Committees on Foreign Affairs and Armed Services.

3810. A letter from the Comptroller General of the United States, transmitting a joint review by the GAO and the Federal Court of Audit of the Federal Republic of Germany of the Rolling Airframe Missile Program (GAO/NSLAD-90-208, August 1990); jointly, to the Committees on Government Operations and Armed Services.

3811. A letter from the Chairman, Federal Election Commission, transmitting the fiscal year 1991 contingency plan for operations under a sequestered appropriation; jointly, to the Committees on House Administration and Appropriations.

3812. A letter from the Secretary of Health and Human Services, transmitting recommendations for changes in the methodology for payment under risk-sharing contracts, pursuant to Public Law 101-239, section 6102(d)(2) (103 Stat. 2185); jointly, to the Committees on Ways and Means and Energy and Commerce.

3813. A letter from the Secretary of Commerce, transmitting the Department's report on the competitiveness of the U.S. telecommunications industry; jointly, to the Committees on Ways and Means and Energy and Commerce.

3814. A letter from the Secretary of Energy, transmitting a comprehensive report on a project negotiated under the Department of Energy's Clean Coal Technology Demonstration Program, describing the project entitled "Full-Scale Demonstration of Low-Nox Cell Burner Retrofit" proposed by Babcock & Wilcox; jointly to the Committees on Appropriations; Energy and Commerce; and Science, Space, and Technology.

3815. A letter from the Secretary of Energy, transmitting a comprehensive report on a project negotiated under the Department of Energy's Clean Coal Technology Demonstration Program describing the project entitled "10 MW Demonstration of Gas Suspension Absorption" proposed by AirPol, Inc.; jointly, to the Committees on Appropriations; Energy and Commerce; and Science, Space, and Technology.

3816. A letter from the Comptroller General, transmitting a report on financial institutions known as Government-sponsored enterprises [GSE's] (GAO/GGD-90-97); jointly to the Committees on Government Operations; Banking, Finance and Urban Affairs; Agriculture; and Education and Labor.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

[Submitted Sept. 5, 1990]

Mr. BROOKS: Committee on the Judiciary. H.R. 849. A bill to amend title 1 of the United States Code to define the type of adjournment that prevents the return of a bill by the President, and to amend the Rules of the House of Representatives to require the Clerk to make certain notifications to the Speaker; with — amendments (Rept. 101-417, Pt. 2). Referred to the Committee of the Whole House on the State of the Union.

[Submitted Aug. 30, 1990]

Mr. ROE: Committee on Science, Space, and Technology. H.R. 4115. A bill to authorize appropriations for certain ocean and coastal programs of the National Oceanic and Atmospheric Administration; with an amendment; (Rept. 101-519, Pt. 2). Referred to the Committee of the Whole House on the State of the Union.

[Pursuant to the order of the House on Aug. 4, 1990, the following report was filed on Aug. 9, 1990]

[Pursuant to the order of the House on Aug. 4, 1990, the following report was filed on Aug. 14, 1990]

Mr. CONYERS: Committee on Government Operations. Stopping the Flood of Cocaine With Operation Snowcap: Is It Working? (Rept. 101-673). Referred to the Committee of the Whole House on the State of the Union.

Mr. CONYERS: Committee on Government Operations. AIDS Treatment and Care: Who Cares? (Rept. 101-674). Referred to the Committee of the Whole House on the State of the Union.

Mr. CONYERS: Committee on Government Operations. The Relationship Between State Assistance Programs and Federal Food Stamp Allocations: Two Case Studies; (Rept. 101-675). Referred to the Committee of the Whole House on the State of the Union.

Mr. CONYERS: Committee on Government Operations. Immigration Limbo or the Plight of Foreign National Witnesses Used in Major Narcotics Prosecutions (Rept. 101-676). Referred to the Committee of the Whole House on the State of the Union.

[Pursuant to the order of the House on Aug. 3, 1990, the following report was filed on Aug. 15, 1990.]

Mr. HAWKINS: Committee on Education and Labor. H.R. 4330. A bill to establish school-based and higher education community service programs, to establish youth service programs, and for other purposes; with an amendment (Rept. 101-677, Pt. 1). Ordered to be printed.

[Pursuant to the order of the House of Aug. 4 (legislative day of Aug. 3), 1990, the following report was filed on Aug. 22, 1990.]

Mr. CONYERS: Committee on Government Operations. Pluralism in Cultural Institutions Receiving Federal Funds (Rept. 101-678). Referred to the Committee on the Whole House on the State of the Union.

Mr. CONYERS: Committee on Government Operations. Programs Administered by the Bureau of Justice Assistance: Questionnaire Results Demonstrate Communication Breakdown (Rept. 101-679). Referred to the Committee of the Whole House on the State of the Union.

Mr. CONYERS: Committee on Government Operations. H.J. Res. 226. A bill to establish a national policy on permanent papers; with amendments (Report 101-680, Pt. 1). Ordered to be printed.

REPORTED BILL SEQUENTIALLY REFERRED AND EXTENSION OF CONCURRENT REFERRAL

[Submitted Sept. 5, 1990]

Under clause 5 of rule X, bills and reports were delivered to the Clerk for printing, and bills referred as follows:

Mr. BROOKS: Committee on the Judiciary. H.R. 5269. A bill to control crime; with an amendment; concurrent referral to the Committees on Armed Services, Education and Labor, Energy and Commerce, and Ways and Means extended for a period ending not later than September 10, 1990. The amendment recommended by the Committee on the Judiciary referred sequentially to the Committees on Banking, Finance and Urban Affairs, Government Operations, Interior and Insular Affairs, Public Works and Transportation, and Veterans Affairs for a period ending not later than September 10, 1990 for consideration of such provisions within the jurisdictions of those committees pursuant to clause 1, rule X, respectively (Rept. 101-681, Pt. 1). Ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. GONZALEZ (for himself, Mr. FRANK, and Mr. KENNEDY):

H.R. 5549. A bill to provide for the temporary extension of the Emergency Low Income Housing Preservation Act of 1987; to the Committee on Banking, Finance and Urban Affairs.

By Mr. ROTH:

H.R. 5550. A bill to direct the Secretary of Veterans Affairs to establish a satellite outpatient clinic in northeast Wisconsin; to the Committee on Veterans' Affairs.

By Mr. KANJORSKI:

H.R. 5551. A bill to amend the Internal Revenue Code of 1986 to reinstate the windfall profit tax on domestic crude oil and to appropriate the proceeds of the tax to the Resolution Trust Corporation; to the Committee on Ways and Means.

By Mr. LEHMAN of Florida:

H.R. 5552. A bill to provide assistance to Florida Memorial College in Miami, FL, for asbestos removal; to the Committee on Education and Labor.

By Mr. SLATTERY:

H.R. 5553. A bill to provide that taxpayers may rely on Internal Revenue Service guidelines in determining the funding limits for pension plans; jointly, to the Committees on Ways and Means and Education and Labor.

By Mr. GONZALEZ:

H.J. Res. 645. Joint resolution calling for the removal of U.S. Armed Forces from the Middle East; to the Committee on Foreign Affairs.

By Mr. FRANK (for himself, Mr. SOLOMON, Mr. DERRICK, Mr. STOKES, Mrs. COLLINS, Mr. YATES, Mr. HEFNER, Mrs. LLOYD, and Mr. STUDDS):

H.J. Res. 646. Joint resolution disapproving the extension of nondiscriminatory treatment (most-favored-nation treatment) to the products of the People's Republic of China; to the Committee on Ways and Means.

By Mr. SOLOMON (for himself, Mr. MARKEY, Mr. ROSE, Mr. SCHULZE, Mr. HUNTER, Mr. MCCANDLESS, Mr. COBLE, Mr. RAVENEL, Mr. RHODES, Mr. DOUGLAS, Mr. CARPER, Mr. SCHIFF, Mr. SPENCE, Mr. HOPKINS, Mr. WALSH, Mr. SCHEUER, Mr. APPLEGATE, and Mr. ROHRABACHER):

H.J. Res. 647. Joint resolution disapproving the recommendations of the President to extend nondiscriminatory treatment (most-favored-nation treatment) to the products of the People's Republic of China; to the Committee on Ways and Means.

By Mr. TAUKE:

H. Con. Res. 364. Concurrent resolution expressing the sense of Congress concerning a drawdown of the strategic petroleum reserve; to the Committee on Energy and Commerce.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

489. By the SPEAKER: Memorial of the Legislature of the State of Alaska, relative to supporting a police corps program; to the Committee on the Judiciary.

490. Also, Memorial of the Legislature of the State of Alaska, relative to reauthorization and amendment of the Magnuson Fishery Conservation and Management Act; to the Committee on Merchant Marine and Fisheries.

491. Also, Memorial of the Legislature of the State of Alaska, relative to taxation of certain student loans; to the Committee on Ways and Means.

492. Also, memorial of the General Assembly of the State of North Carolina, relative to urging Congress to pass legislation to ensure equitable distribution of Social Security benefits; to the Committee on Ways and Means.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

[Omitted from the Record of Aug. 3, 1990]

By Mr. FRANK:

H.R. 5547. A bill for the relief of Ovidio Javier Morla Paredes, Maria Estrada de Morla, Javier Alfredo Morla Estrada, and Carlos Andres Morla Estrada; to the Committee on the Judiciary.

By Mr. JONES of North Carolina:

H.R. 5548. A bill to transfer certain lands placed within the Cape Hatteras National Seashore because of an erroneous survey to those individuals claiming the lands; to the Committee on Interior and Insular Affairs.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

[Submitted Sept. 5, 1990]

H.R. 1268: Mr. BENNETT.

H.R. 2041: Mr. SKEEN and Mr. CAMPBELL of Colorado.

H.R. 2351: Mr. BOSCO.

H.R. 2596: Mr. GILLMOR.

H.R. 2816: Mr. TANNER, Mr. BILIRAKIS, and Mr. DYSON.

H.R. 3220: Mr. LANTOS, Mr. GILLMOR, and Mr. FAWELL.

H.R. 3272: Mr. GOODLING.

H.R. 3631: Mr. PALLONE.

H.R. 4226: Mr. UPTON, Mr. APPLEGATE, and Mr. PICKLE.

H.R. 4483: Mrs. LOWEY of New York, Mr. AUCOIN, Mr. CRAIG, Mr. ENGLISH, Mr. STUMP, and Mr. BRUCE.

H.R. 4492: Mr. MCCLOSKEY.

H.R. 4573: Mr. VALENTINE.

H.R. 4690: Mr. DOUGLAS, Mr. ERDREICH, Mrs. SCHROEDER, Mr. FOGLIETTA, and Mr. CROCKETT.

H.R. 4848: Mr. MCMILLAN of North Carolina.

H.R. 4923: Mr. EARLY.

H.R. 4976: Mr. LAGOMARSINO.
H.R. 5025: Mr. MACHTLEY.
H.R. 5123: Mr. VANDER JAGT.
H.R. 5133: Mr. ESPY.
H.R. 5163: Mr. TAUZIN.
H.R. 5269: Mr. HOAGLAND, Mr. ANNUNZIO, Ms. OAKAR, and Mr. HEFNER.
H.R. 5338: Mr. DIXON, Mr. WEISS, and Mrs. COLLINS.
H.R. 5344: Mr. VANDER JAGT, Mr. BEREUTER, Mr. STARK, Mr. LAGOMARSINO, Mr. SHAW, and Mr. ROBERT F. SMITH.
H.R. 5377: Mr. EMERSON, Mr. MCEWEN, Mr. FALEOMAVAEGA, Mr. HOYER, Mr. MARKEY, Mr. WALGREN, Mr. CRAIG, Mr. MACHTLEY, Mr. SAXTON, Mr. MILLER of Washington, Mr. DORNAN of California, and Mr. GILMAN.
H.R. 5411: Ms. MOLINARI and Mr. MURPHY.
H.R. 5429: Mr. DONALD E. LUKENS, Mr. SHARP, Mr. CHAPMAN, and Mr. PENNY.
H.R. 5491: Mr. SCHEUER, Mr. MACHTLEY, Mr. FAUNTROY, Mr. DONALD E. LUKENS, Mr. PAXON, and Ms. PELOSI.
H.J. Res. 369: Mr. THOMAS A. LUKEN, Mr. LEVIN of Michigan, Ms. LONG, Mr. BONIOR, Mr. MCHUGH, Mr. MORRISON of Washington, Mr. RINALDO, Mr. PANETTA, Mr. ROSE, Mr. MCDADE, Mr. COLEMAN of Missouri, Mr. BRENNAN, Mr. LEVINE of California, Mr. NEAL of Massachusetts, and Mr. STEARNS.
H.J. Res. 374: Mr. KENNEDY and Mr. MCDERMOTT.
H.J. Res. 439: Mr. PRICE.
H.J. Res. 583: Mr. DORGAN of North Dakota, Mr. HENRY, Mr. SLATTERY, Mr. SKAGGS, Mr. WISE, Mr. SISISKY, Mr. YOUNG of Alaska, Mr. BURTON of Indiana, Mr. HAYES of Louisiana, Mr. CARDIN, Mr. SHAYS, Mrs. MARTIN of Illinois, Mr. MILLER of Ohio, Mr. BORSKI, Mr. FLIPPO, Mr. ROWLAND of Connecticut, Mr. GILMAN, Mr. FRENZEL, Mr. FISH, and Mr. HYDE.
H.J. Res. 616: Mrs. BOXER, Mr. LAGOMARSINO, Mr. GREEN, Mr. PICKLE, Mr. HERTEL, Mr. BARTLETT, Mr. COLEMAN of Texas, Mrs. MEYERS of Kansas, Mr. NEAL of North Carolina, Mr. ROWLAND of Connecticut, Mr. STENHOLM, Mr. NELSON of Florida, Mr. OLIN, Mrs. PATTERSON, Mr. STARK, Mr. MCCRERY, Mr. COBLE, Mr. GALLO, Mr. WHITTAKER, Mr. GONZALEZ, Mr. DE LUGO, Mr. LEVIN of Michigan, Mr. DONNELLY, Mr. SARPALIUS, Mr. MACHTLEY, Mr. TRAFICANT, Mr. BUNNING, Mrs. SAIKI, Mr. HOYER, Mr. WILSON, Mr. COSTELLO, Mr. DELLUMS, Mr. BROWN of California, Mr. MOODY, Mr. CARR, Mr. DERRICK, Mr. DENNY SMITH, Mr. SMITH of New Jersey, Mr. BAKER, Mr. BRENNAN, Mr. POSHARD, Mr. CROCKETT, Mr. BILBRAY, Mr. BLAZ, Mr. DAVIS, Mr. FAWELL, Mr. GRANT, Mr. HAMILTON, Mr. BROWN of Colorado, Mr. MCEWEN, Mr. WEBER, Mr. SMITH of Iowa, Mr. SOLARZ, and Mr. STEARNS.
H.J. Res. 626: Mr. PRICE, Mr. GALLO, Mr. WOLPE, Mr. FALEOMAVAEGA, and Mr. BOSCO.
H. Con. Res. 151: Mr. BROWN of California, Mr. FEIGHAN, and Mr. DINGELL.
H. Con. Res. 259: Mr. RAHALL, Mr. MARTINEZ, Mr. PALLONE, Mr. APPLEGATE, Mr. JOHNSTON of Florida, Mr. SANGMEISTER, Mr. WALGREN, Mr. HAMILTON, Mr. COYNE, Mr. VALENTINE, Mr. ECKART, Mr. SMITH of Florida, Mr. SAVAGE, Mr. SERRANO, Mr. GORDON, Mr. WALSH, Mr. GRANT, Mr. MCNULTY, Mr. STOKES, and Mr. MILLER of Washington.
H. Res. 418: Mr. RANGEL.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

222. By the Speaker: A petition of the Legislature of Rockland County, NY, relative to opposition of elimination of State and local tax deductions; to the Committee on Ways and Means.

223. Also petition of the Network Municipal Council, Newark, NJ, relative to an excise tax increase on beer; to the Committee on Ways and Means.

224. Also, petition of Canadian Embassy, relative to an energy tax as a way of increasing Government revenues; to the Committee on Ways and Means.

EXTENSIONS OF REMARKS

SOME COMMENTS ON THE RECENT BIPARTISAN HOUSE DELEGATION TO BAHRAIN, SAUDI ARABIA, AND EGYPT

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 5, 1990

Mr. BROOMFIELD. Mr. Speaker, a number of Members have just returned from the Persian Gulf where we participated in a House delegation led by our distinguished majority leader, RICHARD GEPHARDT, and our distinguished minority leader, BOB MICHEL.

On this brief study mission, we had meetings with the Amir Sheikh Isa of Bahrain, King Fahd of Saudi Arabia, President Mubarak of Egypt, and the leaders of the Kuwaiti Government in exile.

Several impressions from this trip stand out. First, seeing conditions first-hand on the ground in Bahrain, Saudi Arabia, and Egypt strengthened our belief that President Bush did the right thing in making a massive show of force in the gulf.

Not only did he do the right thing, but he did it the right way. He knew that only a quick and decisive response to the Iraqi invasion could dissuade Sadam Hussein from further aggression. It was a response that was designed to protect our vital interests in the gulf, and also to send a message to other potential aggressors that such actions would not be tolerated in the post-cold war world.

President Bush also moved quickly to put together the kind of international support that would convince Saddam Hussein that he had made a horrendous miscalculation and that would assure other Arab leaders that their decision to oppose a fellow Arab had the broad political, moral, and military support of the rest of the world.

The second impression came from our conversations with the men and women of America's Armed Forces. It's been said that when the going gets tough, the tough get going. The temperature in Saudi Arabia rises to more than 120 degrees during the day. Sand gets in uniforms, clogs up weapons, and makes it hard to get about. The soldiers must often carry out their exercises in heavy clothing that protects them from chemical warfare, but that makes them all the more susceptible to the heat.

Yet they are in high spirits and proud of the job they are doing under difficult conditions. One young Marine told me he didn't mind the 120 degrees heat in Saudi Arabia because, he said, "I feel I am part of history." America's military is doing a tough job, and it is doing it well.

The third impression is the multinational nature of this operation. Some 22 nations are now involved—either by sending forces or by sending logistical and financial support. This includes support from several Arab nations.

Yet I believe these and other nations could be doing a lot more. The oil coming out of the Persian Gulf is a whole lot more important to the West Germans and Japanese and other industrial democracies than it is to the United States.

Young American men and women have dug themselves into foxholes in the sand of Saudi Arabia to protect the economic futures of their counterparts in Europe and elsewhere. I would like to see some of these allies contribute not only a lot more financial support to this operation, but some of their troops as well.

The fourth impression is that the President's strategy in the gulf has been bold and decisive on the one hand, and yet prudent and well thought out on the other.

There has been some talk in the United States about going after Saddam. Some refer to it as "taking him out." Yet there is a widespread belief among the people we talked with that the U.N. sanctions should be given a chance to work.

In this century, America has fought in two world wars, in Korea and Vietnam, and has committed its forces in many other perilous situations. I don't think that Americans are willing to conclude this century by becoming involved in what could be another major war, bloody and costly for all sides, unless this Nation has no other alternative.

Today there is a clear alternative—the blockade of Iraq. And it appears to be working. The United States military leaders we talked to believe that the blockade has virtually sealed off Iraq from seaborne commerce. The international community has responded with one voice.

If this multilateral operation succeeds in demonstrating that the world will no longer tolerate this kind of piracy on a large scale, then the U.N. sanctions will have succeeded not only in forcing Saddam Hussein to back down, but also in creating a climate for peace and cooperation among the nations of the world.

Mr. Speaker, I know many of my fellow Members will look forward to hearing the individual observations of those who were on the trip, so I would like to mention the names of those who served on the delegation. They were:

House leadership: RICHARD A. GEPHARDT, ROBERT H. MICHEL, STENY H. HOYER, and NEWT GINGRICH.

Armed Services Committee: LES ASPIN, G.V. (SONNY) MONTGOMERY, WILLIAM L. DICKINSON, and BEVERLY B. BYRON.

Permanent Select Committee on Intelligence: ROBERT W. KASTENMEIER, DAVE MCCURDY, and BUD SHUSTER.

Energy and Commerce Committee: W.J. (BILLY) TAUZIN, ED TOWNS, and WILLIAM E. DANNEMEYER.

Ways and Means Committee: DAN ROSTENKOWSKI, SAM GIBBONS, and GUY VANDER JAGT.

Appropriations Subcommittee on Foreign Operations: DAVID R. OBEY, ROBERT J. MRAZEK, and MICKEY EDWARDS.

Foreign Affairs Committee: DANTE B. FASCELL and WILLIAM S. BROOMFIELD.

PLACEMENT AND RELIGHTING OF THE "BUG" LIGHTHOUSE

HON. GEORGE J. HOCHBRUECKNER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 5, 1990

Mr. HOCHBRUECKNER. Mr. Speaker, today is an important day in the history of eastern Long Island. I am proud to report that today, September 5, 1990, the placement and relighting of the Long Beach Bar "Bug" Lighthouse is taking place. I ask that the text of my remarks delivered at an event in Greenport, NY, commemorating this occasion be inserted into the RECORD at this point.

THE DEDICATION OF THE LONG BEACH BAR LIGHTHOUSE, LONG ISLAND, NY

(Remarks by Hon. George Hochbrueckner)

Thank you, and first let me say how delighted I am to be here today with my wife Carol Ann to celebrate the return of the Long Beach Bar "Bug" Lighthouse, and, just as importantly, to recognize and applaud the commitment of this community to preserving Eastern Long Island's rich history. The East End Seaport and Marine Historical Foundation has worked what seems like a miracle here at the gateway to the Peconic Bays, and I am very pleased to be here with you.

I think it is especially appropriate that, as we gather to recall the East End's long and eventful marine and seaport history, we are joined by representatives of the United States Coast Guard and the Navy Marching Band. Our celebration would not be complete without them, and I am delighted they were able to be here.

The Coast Guard's mission includes the responsibility to maintain and patrol our waters. In Congress, where I serve on the Merchant Marine and Fisheries Committee in the House of Representatives, I have had many opportunities to witness their skill and dedication. They do a complex and often dangerous job very successfully. Today experienced men and women in the service design and operate sophisticated technology to monitor our waters. Not too long ago, however, the Coast Guard and mariners relied heavily on manned lighthouses and similar aids when navigating the inlets and harbors of the nation.

It's certainly a great pleasure to have the Navy Marching Band performing for us. The Navy is at the center of our nation's

maritime history, and as a veteran of the Navy and a strong supporter of our armed services, I am always happy to see them perform.

I would like to say a few words about the history of lighthouses. As lighthouse enthusiasts know, lighthouses were first built by the Egyptians in the third century B.C. For centuries, all over Europe and Asia, signal fires were built in towers, under treacherous conditions, to provide a welcoming beacon to those travelling toward new lands and unique cultures. The first lighthouse built in the United States stood in Boston Harbor in 1716. Over the years, some 1,200 navigational aids were constructed along 90,000 miles of coastline, rivers, and lakes in our nation.

Lighthouses were an integral part of the growth and strength of our early economic history, and surely played a crucial role in the defense of our nation. In these lighthouses, entire families were needed to manage the difficult responsibility of providing the clear and bright signal by which approaching vessels charted their course. Together with the United States Coast Guard, which has demonstrated its expertise for two centuries in patrolling our shores and waters, the lighthouse keepers' exacting tasks helped to ensure safe sea travel for millions. The shift of our national commerce from water to road, rail, and air in the last century has reduced the practicality of this aspect of the lighthouse's use. New technology also enabled many lighthouse families to return to the mainland permanently. Electronics and computers, administered by the U.S. Coast Guard, now operate the approximately 750 lighthouses still in use.

However, many of the nation's lighthouses have not been so fortunate. Over the years, hundreds of lighthouses were sold, left abandoned, or even demolished. This physical destruction often meant a loss of precious maritime and culture history as well. The neglect or destruction of lighthouses on Long Island is especially tragic. We on Long Island are very fortunate to have several lighthouses in our midst—including the Fire Island Light, and the Montauk Lighthouse at the tip of the South Fork. Of course, the Montauk Lighthouse is the second oldest lighthouse in continuous use in the United States.

We have inherited a rich fishing and navigation history, and a special awareness of the beauty surrounding us on land and sea. It is this appreciation of the value and importance of the past, I think, that is at the heart of the impulse on Long Island and nationwide to restore lighthouses. We would be remiss if we allowed lighthouses, the subject of the first public works bill passed by the newly united American Colonies, to be left to ruin. Across the country, we are seeing the efforts much like the one undertaken so successfully by the East End Seaport and Marine Historical Foundation. Communities and private organizations have taken the lead in safeguarding for future generations the tradition and beauty of the towers that help keep our travellers safe.

Preservation of the Bug Light is the product of the efforts of a relatively small community dedicated to the marine and seaport history of the East End. In an incredibly short span of time, the group has raised a tremendous amount of money; organized committees to oversee the project; involved the Coast Guard; investigated the history of the Bug Light structure and property; and carried out a reconstruction that we can all enjoy and take pride in. They've worked together, and my staff has worked with them, in a spirit and a dedication that is really wonderful. That's why I'm so pleased to be here today, to enjoy the re-creation of history brought about through the efforts of Merlon Wiggin and the East End Seaport and Marine Historical Foundation.

Merlon is originally from Maine, where the jagged coastline was once dotted with lighthouses. It should come as no surprise to us that he has a love of lighthouses, and a sense of the mystery and sentiment that surround them. He moved to Long Island in time to see the original Bug Light, before it was burned in 1963, and kept that picture in his mind. With his fellow directors Sarah Sands, George Rowson and Lucy Thompson, Merlon talked to friends and neighbors and began pursuing solutions for financing and maintaining a re-created Bug Light Lighthouse in Long Beach. The results are in, and I think we can all agree that a thoughtful and truly magnificent job was done.

I must also mention the important contribution to the Bug Light of Bill Allen, who recently passed away. A fisherman, Bill Allen spent his life plying the waters of the Peconic Bays, and lived for a time in the original Bug Lighthouse. His personal dream of having the Bug Light reconstructed and lit once again is finally being realized. The Allen family members here with us today can be proud of Bill and his dedication to the Bug Lighthouse.

As the Representative in Congress of a half million people on Eastern Long Island, I recognize citizens who make valuable contributions to their communities with a certificate of Congressional Recognition. I would say the value of the restoration of a piece of our local history is priceless. I am proud, as your Congressman and a native Long Islander, to recognize the work of Merlon Wiggin and the East End Seaport and Marine Foundation, and Bill Allen. When I return to Washington, I intend to place these remarks into the Congressional Record, making them and this occasion a permanent part of the official record of the Congress of the United States. I thank you all.

THE CUBAN AMERICAN NATIONAL COUNCIL HELPS FLORIDA INTERNATIONAL UNIVERSITY'S COLLEGE OF EDUCATION

HON. ILEANA ROS-LEHTINEN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 5, 1990

Ms. ROS-LEHTINEN. Mr. Speaker, it gives me great pleasure to recognize the Cuban American National Council for their organization has sought different methods to improve existing programs and design new ones.

Since its inception in 1972, the Cuban American National Council [CNC] has strived to deal realistically with modern social issues facing Cuban-Americans and other minorities. The CNC is to be commended for its important role in helping Cuban-Americans and other refugees adjust to the United States. The CNC accomplishes just that by acting as an identifier of the economic, social, and educational needs of Cuban-Americans and other minorities and attracting the support of Government agencies, corporations, and foundations in order to fulfill those needs.

However, the CNC also focuses its efforts in other areas of the community needing assistance. This year, one such project includes putting on the First Annual Dinner to benefit the College of Education at Florida International University [FIU] to be held on February 9, 1991. The College of Education is a leading force in Florida in providing top quality educational access and academic/professional excellence. The evening's events will focus on raising critically needed funds for FIU's College of Education in order to assist them in maintaining high quality education.

The Cuban American National Council members are to be thanked for their efforts to help Florida's community. The officers of CNC are: Guarione M. Diaz, president; Agustin de Goytisolo, chairman; Alina E. Becker, secretary; Maria Acosta, treasurer. The board of directors include Wilfredo Allen, Alina Antonetti, Antonio L. Argiz, Enrique Baloyra, Laureano Batista-Falla, Nelson Benedico, Marta Bequer, Peter Bernal, Annie Betancourt, Elva Collazo, Federico Costales, Rita Di Martino, Albert E. Dotson, Nancy Dreicer, Jorge Escalona, Zulima Farber, Marcelo Fernandez-Zayas, Vincent Forte, Juan Galan, Margarita Garcia, Mario Goderich, Sara C. Gomez, Pedro Jose Greer, Jr., Alma Guerra, Jose Manuel Hernandez, Antonio Jorge, Ada M. Kirby, Carmela Lacayo, Ivan Llorente, Sergio Masvidal, Marta Miyares, Beatriz Olivera, Jose S. Prince, Rene Rocha, Angel Rodriguez, Jorge Salazar, Celia Suarez, Frank Torano, Barton Udell, Mario Vizcaino, Raul Yazguirre, and Tere Zubizarreta.

A TRIBUTE TO SUNIL DUTT

HON. MERVYN M. DYMALLY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 5, 1990

Mr. DYMALLY. Mr. Speaker, it is my great pleasure to share with my colleagues the following information, written by Rajen S. Anand, a prominent member of the Asian Indian community, recognizing the charitable work of one Indian, Sunil Dutt, in helping lead the fight against cancer.

While this information focuses on the work of one man to save his fellow man, this effort is only symbolic of the great charitable sense demonstrated by the Indian community which is evident in the work of the Indian community. Asian Indians, a relatively new immigrant community have worked hard, ever since their arrival in the United States, to contribute to their new homeland without forgetting those less fortunate in their mother land—India.

SUNIL DUTT: A MAN WITH A MISSION

(By Rajen S. Anand)

Sunil Dutt is an acclaimed movie actor, film producer and director. He has acted in over 50 films, produced over a dozen full length films and has directed several successful movies which have been exhibited in many international Film Festivals. The highly popular man, Dutt is also an elected member of India's parliament and is currently serving his second term.

In addition to being a successful professional of the Indian film industry and a popular politician, the tall and handsome actor is widely respected for his personal attributes of a compassionate and caring human being, who has dedicated his efforts to uplift the poor and down trodden people of India. A strong promotor of secularism and religious tolerance amongst the highly fractional Indian society, a believer of peace and harmony in the world, Dutt has taken his message to the masses through his long peace marches.

On January 26, 1987, Dutt led a group of people to walk a distance of over 2,000 km. from Bombay to Amritsar to promote peace and harmony in the State of Punjab. He and 14 other members undertook a peace march on foot in Japan commencing from Nagasaki on July 9, 1988 reaching Hiroshima on August 6, covering a distance of 500 km. for world peace and a total ban on nuclear weapons and disarmament.

Sunil Dutt was married to a famed film actress, Nargis, who appeared in many hit movies. The glamorous film star dominated the Indian movie screen for years and gave memorable performances in movies such as Awara, Aah, Andrez and Mother India. In her later life, Nargis was stricken with pancreatic cancer for which she was treated in the United States. In 1981 Nargis, while laying on the Hospital bed in New York thought of a common man in India, who could not afford to come to the United States for advanced and expensive treatment. She asked Sunil Dutt to work for the day when the poor people will have access to modern medical care in India.

The cancer ultimately took the life of Nargis and after her death, Sunil Dutt established a charitable Foundation in the memory of his beloved wife, and has since been working to fulfill her dream of providing advanced medical care to cancer patients in India. The objective of the Foundation is to acquire sophisticated medical equipment, supplies and medicine in the U.S. and send it to India. Beside the parent chapter in New York, the Foundation currently has chapters in Detroit, Los Angeles, San Francisco, Toronto, and London (U.K.).

The Foundation has sent to India several hundred thousand dollars worth of equipment and helped establish cancer units in two hospitals.

Sunil Dutt very faithfully comes to the United States each year to help various Nargis Dutt Memorial Foundation chapters to raise money for the cause. The money is left here to purchase equipment and no cash is sent to India.

He is now a man with a mission of raising funds, buying modern equipment to be sent to India to provide better health care for the common people. Dutt has received many prestigious awards and honors and continues to work to fulfill the dream of his wife, meeting his own commitment to the great cause.

Mr. Speaker, at this time, I ask that my colleagues please join me in saluting Mr. Sunil Dutt, and the Indian community in southern California for making this world a better place to live in.

FEDERAL MILK PRICING—AN ISSUE OF FAIRNESS

HON. TOBY ROTH

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 5, 1990

Mr. ROTH. Mr. Speaker, today in Eau Claire, WI., a historical change is beginning in American agriculture. It is on this day that the first of many hearings around the nations on the Federal milk marketing orders is taking place. America has prided itself in being a fair nation, and reform of the milk marketing orders will bring this fairness to our farmers and consumers. Many proposals will be heard, including one that is modeled after legislation I sponsored, H.R. 501, the Milk Marketing Reform Act of 1989.

I had the opportunity to submit testimony at the first hearing that was held today, and I would like to submit a copy of my testimony to the RECORD.

TESTIMONY OF HON. TOBY ROTH

MILK MARKETING ORDERS

The federal milk marketing order system was established in the early 1930s to ensure a safe and adequate supply of milk. It also was meant to safeguard dairy farmers and consumers against great price swings and encourage regional milk production. Now, however, this system has become outdated and economically unsound. More importantly, these policies have severely hurt upper midwestern dairy farmers and Wisconsin farmers in particular. Midwest farmers have been trying to fight in the milk market with one hand tied behind their backs, and they can no longer afford this disadvantage.

Under the current order system, Wisconsin farmers receive the Minnesota-Wisconsin base price, which is calculated from surveys of what grade B milk producers are paid for their milk.

The class I price of milk is then calculated from the basic Minnesota-Wisconsin price and based in Eau Claire, Wisconsin. Since the base price for the Nation is the M-W, transportation differentials are then factored into the price of class I fluid milk. This gives higher prices to farmers the farther away they are from Eau Claire.

The effect of the current orders system has been to shift milk production to the west and southwest. The orders have long ago fulfilled their purpose of allowing areas with milk deficits, especially in the southwest, to meet their regional demands. Now, however, the orders have created milk surpluses in these areas and will continue to create more in the future.

A uniform playing field must be provided for all the Nation's farmers. To do this, the Federal order system should be consolidated and its inadequacies eliminated.

That is why I am proposing a plan to establish 4 to 8 regions with their own basing points. These regions would have a class I use of less than 60 percent and would be assigned the same cost differentials. This will efficiently supply milk to areas in need and bring fairness back to the order system.

Multiple basing points and fewer order regions will allow areas with deficit milk situations to pay differentials calculated from the nearest source of milk, not from Eau Claire, Wisconsin.

Under the multiple-basing point plan, new basing points will be established in the corn belt and northern plains. The corn belt and Kentucky-Tennessee exports will supply southern deficit regions such as Florida with enough fluid milk. Fluid milk would follow more common sense patterns and manufacturing milk availability would be assured for the upper midwest.

USDA figures show imports into the southern plains will decline 94 percent. The need for marketing from the Mid-Atlantic region to the Northeast would be eliminated if both regions are established as basing points.

The multiple basing point alternative will still have the stabilizing influence of an order system but will lower differentials around the country. This will be good news for consumers. For example, a six-region system would lower consumer prices an average of 6 percent and CCC expenditures 19 percent.

The multiple basing point plan I have proposed will reduce the high interregional milk marketing costs which plague the dairy industry under the current system and will make the milk industry more market-oriented.

We are entering into a new era of freer markets and less government money being spent on agriculture, including commodity credit corporation purchases. It is time to realize this and establish a common-sense, realistic plan that will be accepted by all producers in the country. I believe the multiple-basing point concept is the answer. In the long run it will give farmers and manufacturing plants the fair prices they deserve when rightful marketshare is restored to traditional dairy producing states.

LETTER OF COMMENDATION TO WILLIAM THOMAS SKINNER OF THE U.S. NAVY

HON. CARL D. PURSELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 5, 1990

Mr. PURSELL. Mr. Speaker, let me take this opportunity to share with my colleagues the letter of commendation that one of my constituents, Ensign William Thomas Skinner recently received. We congratulate him for his efforts

LETTER OF COMMENDATION

The Commander Naval Surface Group Western Pacific, Commander Task Force Seventy-Three and Commander Task Force Seventh-Five takes pleasure in presenting William Thomas Skinner, Ensign, Supply Corps, United States Navy a Letter of Commendation for service as set forth in the following citation:

"For outstanding performance as S-4 Division Officer in USS *Niagara Falls* [AFS 3] from September 1989 to March 1990 while deployed to the Western Pacific and Indian Ocean. Ensign Skinner consistently performed his demanding duties in an exemplary and highly professional manner. Displaying exceptional skill and resourcefulness, he led his undermanned division in not only the fulfillment of its mission but in the breaking of new sales records for the Ship's Store. He moved hundreds of lifts as a Flight Deck Officer without one being missent and set the standard for performance among the junior officers on board, and completed his Surface Warfare Supply Corps Officer qualifications despite his

heavy workload. His diligent efforts and resourcefulness inspired all who observed him and contributed significantly to the successful accomplishment of *USS NIAGARA FALLS'* mission. Ensign Skinner's exceptional professionalism, initiative and loyal dedication to duty reflected great credit upon himself and were in keeping with the highest traditions of the United States Naval Service."

G.L. CHESBROUGH,
Rear Admiral,
U.S. Navy.

U.S. ECONOMIC ASSISTANCE TO THE SOVIET UNION

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 5, 1990

Mr. HAMILTON. Mr. Speaker, I initiated correspondence with the Department of State on June 26, 1990, with respect to discussions between President Gorbachev and President Bush on the topic of United States economic assistance to the Soviet Union. On August 14, 1990, I received a reply from Secretary Baker which outlines United States-Soviet discussions on this topic during the course of the past year. The text of the correspondence follows:

COMMITTEE ON FOREIGN AFFAIRS,
Washington, DC, June 26, 1990.

Hon. JAMES A. BAKER III,
Secretary of State, U.S. Department of State, Washington, DC.

DEAR MR. SECRETARY: I write to ask some questions with respect to the recent Washington visit of President Gorbachev.

Following this visit, there were a number of reports that President Gorbachev had asked the United States to provide forms of economic assistance to the Soviet Union.

My first question is: Did President Gorbachev raise the subject of U.S. assistance?

If such a discussion occurred, I would like to know more about the details. Specifically:

What did the Soviet leader say he needed: Credits or credit guarantees; direct financial assistance; technical assistance; humanitarian assistance; or other assistance?

What amounts of assistance were discussed?

What was the response of the United States to the Soviet approach on assistance issues?

I appreciate your consideration of this letter and look forward to an early reply so that this issue can be explored further in July.

With best regards,
Sincerely yours,

LEE H. HAMILTON,
Chairman, Subcommittee on Europe and the Middle East.

THE SECRETARY OF STATE,
Washington, DC, August 14, 1990.

Hon. LEE H. HAMILTON,
Chairman, Subcommittee on Europe and the Middle East, Committee on Foreign Affairs, House of Representatives.

DEAR LEE: Thank you for your letter of June 26 requesting details on the discussions between President Bush and President Gorbachev during the Washington Summit on the subject of U.S. economic assistance to the Soviet Union.

Our high-level discussions with the Soviets on economic issues date from the Wyoming Ministerial in September 1989. The dialogue continues and to date has covered such topics as the transition to a market economy, the development of competition and competitive enterprises, the development of modern financial structures, ruble stabilization, and the need for full property rights.

At Malta in December 1989, the President told President Gorbachev that he would be prepared to waive the Jackson-Vanik Amendment to the 1974 Trade Act if the Soviets adopt and implement emigration legislation meeting international standards. Toward that end, we negotiated a Trade Agreement that was signed in June 1990 and are now engaged in negotiations with the Soviets on a bilateral investment treaty to improve the investment climate for U.S. investors in the Soviet Union. The President also indicated at Malta a willingness, once Jackson-Vanik is waived, to explore with Congress the removal of the Marxist-Leninist provisions of and the Stevenson Amendment to the Export Import Bank Act and the Byrd Amendment to the 1974 Trade Act. These provisions currently effectively deny access by the Soviet Union to U.S. credits and loan guarantees.

The President also proposed at Malta a set of specific proposals for technical cooperation designed to help the Soviets identify the issues involved in adopting a market-oriented economic strategy and to implement such a strategy. Several of the projects proposed at that time have now been completed and involved discussions with U.S. and Soviet government officials, non-official Soviet proponents of market reform, and the U.S. private sector. These projects include the following:

In October 1989, Federal Reserve Chairman Greenspan visited Moscow for discussions with Soviet officials and policy makers.

In February 1990, the Department of Commerce and the Small Business Administration hosted a Soviet delegation to study small businesses and how governments support their development.

Also in February, we hosted talks in Washington with a Soviet delegation, organized in part by the New York Stock Exchange on the development and regulation of securities and commodities exchanges.

In March, Soviet Finance Minister Pavlov and Gosbank Chairman Gerashchenko met with senior Administration officials and with Congressional members on macroeconomic and finance policy issues.

In April, Council of Economic Advisors Chairman Boskin visited the USSR to discuss economic reform and technical cooperation with Soviet policy makers and economists.

Also in April, the Bureau of Labor Statistics signed a Memorandum of Understanding with Soviet counterparts to expand cooperation in the development of statistical data.

Again in April, CPSU Central Committee official Ladygin led a delegation to Washington for talks at Treasury, the Federal Trade Commission (FTC), Justice, and State on anti-trust policy. At Ladygin's request, Justice and the FTC provided comments on Soviet draft anti-monopoly legislation.

At the Washington Summit, President Gorbachev spoke about the need for Western economic assistance to help the Soviet Union make the transition to a market-oriented economy. He referred to the need for financial assistance but did not identify any specific needs or figures. President Gorbachev also stressed the Soviet Union's interest in normal trade relations with the United States. President Bush made clear that the United States was prepared to offer technical cooperation to help the Soviet Union move toward a market-based economy. Gorbachev expressed interest in cooperation of this kind, but he was not specific on what technical cooperation needs and priorities he has.

Prior to the Houston Summit, President Gorbachev wrote to the President in his capacity as host of the Summit, regarding Western economic and financial assistance to the Soviet Union. This subject was discussed at Houston, and the Summit partners agreed that technical assistance should be provided now to help the Soviet Union move to a market-oriented economy. The Summit partners also noted that the prospects for meaningful and sustained economic assistance would be improved by further Soviet decisions to introduce more radical steps toward a market-oriented economy, to shift resources substantially away from the military and to cut support to nations promoting regional conflict. They agreed to ask the International Monetary Fund, the World Bank, the Organization for Economic Cooperation and Development, and the designated President of the European Bank for Reconstruction and Development, in consultation with the European Community, to study the Soviet economy, make recommendations for its reform and establish criteria for Western assistance that would support these reforms. This study should be completed by the end of this year.

To follow up the results of the Houston Summit, I proposed during my meeting with Foreign Minister Shevardnadze in Paris, July 18, the expansion of technical cooperation and gave him a list of additional projects for consideration. These include initiatives such as:

Market Economic Education to provide general economic education to Soviet officials, students, and the general population.

Distribution System to explore the possibilities of using our bilateral transportation agreement to support private sector projects, particularly in the area of freight transport by rail.

Market Pricing and its role in the operation of a market economy.

We will be pursuing this expansion of technical cooperation with the Soviets to develop projects which meet Soviet needs and interests and which are consistent with U.S. interests.

The Soviet Union has approached the United States to request financial credit guarantees for exports of U.S. agricultural products. The Department of Agriculture informed the Soviets in May that a waiver of the Jackson-Vanik Amendment to the 1974 Trade Act would be required for the Soviets to be eligible for such credits, which in turn hinges upon passage by the Soviets of their proposed emigration bill.

I hope this information will be useful to you.

With best personal regards,
Sincerely yours,

JAMES A. BAKER III.

BETH-EL HONORS RABBI MYRON BERMAN

HON. THOMAS J. BLILEY, JR.

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 5, 1990

Mr. BLILEY. Mr. Speaker, on Sunday, September 9, 1990, Temple Beth-El will honor Rabbi Myron Berman on the occasion of his 25th anniversary of service to the congregation and the Richmond Jewish community.

The program will begin at 2:30 p.m. in the sanctuary and will have several notable speakers, namely: Gerald Baliles, former Governor of Virginia; Bishop Walter Sullivan; Most Reverend Father Constantine Dombalis; Dr. John Ruskay, vice chancellor of the Jewish Theological Seminary of America.

The procession of all the dignitaries will precede the program and Mr. Alvin Lehman, president of Beth-El, will welcome the congregants and guests. Other participants will be Cantor Error Helfman, the Beth-El Choir, and Mr. Yakov Tulchinsky, principal violist with the Richmond Symphony. Rabbi Aaron Koplin will offer the invocation and Rabbi Joel Chaizen will deliver the benediction.

A Holocaust Torah will be presented to the temple commemorating Rabbi Berman's 25 years of dedicated service. The presentation will be made by Mrs. Jack Fine and Mr. Milton J. Lewis.

Mr. Richard November will serve as program director, and the program will close with a recessional, to be followed by a reception in the social hall.

Mrs. Joy Gerson, chairman of the tribute committee, noted that Dr. Myron Berman has been honored by many religious and communal organizations.

It is rare that a synagogue has the honor of celebrating a Rabbi's 25th anniversary. In the long history of Richmond, this is only the third time that a Rabbi has been so honored—it is a first for Beth-El.

Rabbi Berman came to Temple Beth-El in August 1965 after serving as associate Rabbi for Beth-El in Cedarhurst, NY for 7 years. A graduate of City College in New York, he received his MA and Ph.D. from Columbia University. He is a graduate with honors from the Rabbinical School of the Jewish Theological Seminary where he also received a BHL from its seminary college as well as a MHL and a honorary DD degree. The first Rabbi to serve as president of the Richmond Area Clergy Association, he received the Richmond City Medallion for communal service and later was honored by the National Conference of Christians and Jews. Recently, he received a citizens award from the Henrico Police Department.

He previously served as chairman of the board of education for the seaboard region of the United Synagogue and participated in the Richmond's first federation-sponsored mission to Israel. Subsequently he has led several groups to Israel. Through his efforts, Beth-El led all congregations in the State of Virginia for 2 years in raising $100,000 in Israel bonds at the Yom Kippur appeal.

He is the author of "Richmond's Jewry Shabbat in Shockoe 1769-76" and "The Attitudes of American Jews Towards East European Jewish Immigration, 1881-1914." Book reviews by Rabbi Berman have appeared in the American Historical Review and in the Journal of American History among other periodicals. He is also the author of numerous articles as well as the television videotape which appeared over WCVE, Jewish Currents in the James.

A member of the Virginia-Israel Commission, appointed by Governor Baliles, he authored the introductions to both Holocaust curricula published by the State of Virginia, and he is also a consultant to the State's commission on social studies. Most recently, he served as a member of the Henrico 2000 Committee which forecasted trends in education for the next decade.

Cited by Hadassah Magazine and Surroundings as among Richmond's most influential citizens, he served as chaplain in the United States Air Force, serving in New Mexico and Japan. Today he serves as chaplain for the Jewish War Veterans.

Rabbi Berman and his wife, Ruth, have two children, Barrie and Gregg, who have recently married and are practicing attorneys.

THE SALVATION ARMY: 100 YEARS OF GIVING TO THE PONTIAC-NORTH OAKLAND, MI AREA

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 5, 1990

Mr. BROOMFIELD. Mr. Speaker, on September 11, 1990, the Salvation Army will celebrate 100 years of service in the Pontiac-North Oakland, MI area. From the beginning this was a military occupation that was welcomed with open arms.

The parent body, which celebrates its 125th anniversary this year, may be the most far-reaching military organization in the world. It serves millions of people through 15,000 centers and outposts in 90 countries.

The Salvation Army serves the whole man—and woman. Its volunteers believe in a balanced ministry that cares for the needs of both the body and the spirit. As one of them put it, the "s" on their uniforms stand for "soup, soap, and salvation."

To me, their greatest virtue is their selflessness. They lead not only by exhortation, but by example. It is an army of volunteers that join not to do well, but to do good.

I have seen army members spending many a cold Michigan night raising their banners, setting up kettles and ringing their bells so that the warm spirit of Christmas could be shared by the poor and homeless.

The Salvation Army can be justifiably proud of its 100 years of service in the Pontiac-North Oakland area, and I hope that the people they serve can count on many more years of their inspiring ministry.

FAMILY COUNSELING SERVICES OF GREATER MIAMI

HON. ILEANA ROS-LEHTINEN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 5, 1990

Ms. ROS-LEHTINEN. Mr. Speaker, I wish to thank and commend the Family Counseling Services of Greater Miami [FCS], which will honor University of Miami president, Edward T. "Tad" Foote II for his dedication to the community, particularly as chairman of the Miami Coalition for a Drug Free Community. This occasion, which will take place on September 26, 1990, at the Biscayne Bay Marriott, also serves to thank the many volunteers and dedicated staff who have made the Family Counseling Services a success story since its founding in 1917.

It is the longstanding goal of FCS to make the world a better place by going directly to the source of our very being—the family. Countless programs and projects offered, such as the Comprehensive Counseling Centers, Project Self-Esteem, Operation Mainstream, Positive Start, AIDS Education and Prevention Project, Employee Counseling Services and Community Education, focus on the emotional and psychological as well as educational and health needs of the family.

On behalf of the many people who have benefited from the selfless efforts of FCS of Greater Miami, I extend my heartfelt appreciation to the following: Carl E.B. McKenry, president; Betty L. Alvarez, vice president; Errol J. Simmons, vice president; Greta Shulack, secretary; Felix Castillo, treasurer; Larry E. Adams, Sr., Jose Antonio Alvarado, Ph.D., Vashti Armbrister, Lettie J. Bien, Marilyn Cesarano, Polidecto Correa, O.D., John F. Cosgrove, Carol B. Courshon, Elvira M. Dopico, Ana Maria Haar, Phil Hamilton, Jr., David Kirsh, M.D., James A. Long, Carmen Morris, Van Myers, Douglas L. Oppenheimer, Jose Ramon Rodriguez, Jose B. Sanchez, Fred Seligman, M.D., Harriette S. Sherman, William J. Sipes, Jr., Anna A. Wyche, Albert L. Harriett, as well as the staff and the countless volunteers.

In an age of voluntarism, the Friends of the Family is a group of concerned individuals whose contributions advance the meaningful accomplishments of FCS. A nonprofit agency, FCS strives to strengthen family ties in Dade County through educational classes, groups, and training seminars for professionals. It should be of great comfort to us all to know that such an organization exists which helps people to reach their best potential.

FCS believes that no one is out of their reach of help. They care enough to help anyone in need of their assistance, from the 6-year-old child whose parents are in the midst of a bitter divorce to the 13-year-old drug abuser to a 68-year-old widow facing the fear of eviction to the recently laid-off mother of two seeking employment to the person suffering from AIDS and the prejudice and callous treatment that often accompanies this disease. It is the strong commitment of FCS of Greater Miami to combat the problems we encounter in modern life.

TRIBUTE TO SAMSTON (SAM) LITTLETON

HON. MERVYN M. DYMALLY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 5, 1990

Mr. DYMALLY. Mr. Speaker, I rise today to recognize the accomplishments of Sam Littleton, a trustee of the Compton Unified School District and a longtime friend who will be honored on September 8, 1990, for a distinguished career serving the people of the 31st district and southern California in the health sector.

During his early career, Sam Littleton worked as a mail carrier for the cities of Los Angeles and Compton at various intervals until he became disabled. However, he did not let his disability dissuade him from continuing to be a productive citizen. He enrolled, in middle age, at Compton Community College earning an AA degree and continued his college education at California State University, Los Angeles where he received his bachelor of arts degree in 1969. Still motivated for higher education, he applied and was accepted into the graduate program in social work at UCLA where he completed his studies for a masters degree in 1971.

Mr. Littleton's primary ambition was to become a social worker at the new King/Drew Medical Center and he was subsequently hired in April 1972, 1 month after the hospital opened its doors. Since that time, he was promoted to senior clinical social worker from 1972 until present, he has worked as the lone social worker on the evening shift in the emergency room at King/Drew—a position new and unique, at the time, in clinical social work.

In his assignment, he has assisted thousands of bereaved and grieving families; assisted many homeless persons in finding shelter; counseled many individuals with substance abuse problems; women who were victims of rape; elderly individuals who were confused and did not know their identity; made many home visits in the community to assist families in adapting to the grief process; responded to thousands of requests from inpatient hospital units requiring social work services during the evening hours when most social agencies in the community were and still are closed. He has been a champion for patient rights and utilized advocacy as a natural part of his role as a social worker.

His longevity in working the evening shift—4 p.m. to 12:30 a.m.—for 18 years is remarkable in its own right since the high pressure environment of the emergency room/trauma center has inherent characteristics that lead to staff burnout. His 18-year reign as the evening social worker has endeared him to many families, employees, and coworkers at the medical center and he will be sorely missed upon his retirement.

A VA CLINIC FOR NORTHEAST WISCONSIN

HON. TOBY ROTH

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 5, 1990

Mr. ROTH. Mr. Speaker, today I have introduced H.R. 5550, to direct the Secretary of Veterans Affairs to establish a veterans' outpatient clinic in northeast Wisconsin.

This bill is the latest step in my efforts to improve the VA health care system for thousands of veterans in northeast Wisconsin. In February, more than 700 veterans participated in my congressional forum on veterans issues, held in Depere, WI. Veterans Affairs Secretary Derwinski was the featured guest, along with leaders from national veterans organizations and officials from the Department of Veterans Affairs.

At the February forum, veterans identified this proposed clinic as their top priority. To help build additional support, more than 2,000 veterans signed a petition endorsing the clinic. I presented their petition to Secretary Derwinski in May.

Subsequently, I have communicated regularly with Department officials, culminating in a meeting with the Secretary in which he promised priority attention to this proposal.

Now the time has come to put this proposal into legislation and to ask the support of my colleagues.

It is vitally important that we continue to refine the veterans health care system, to meet the evolving needs of those who have sacrificed to defend our country. I know that Secretary Derwinski is committed to that goal. Enactment of this bill will help fill a significant need in northeast Wisconsin, and I urge my colleagues to study this legislation and work with me to make this clinic a reality.

H.R. 5550

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. ESTABLISHMENT OF DEPARTMENT OF VETERANS AFFAIRS OUTPATIENT CLINIC.

(a) IN GENERAL.—To carry out the recommendation concerning the need for a satellite outpatient clinic in northeast Wisconsin that was made by the Task Force on Access to Care and Rural Outreach of the Central Region Office of the Department of Veterans Affairs in the report of that task force that was made in May 1987, the Secretary of Veterans Affairs shall establish and maintain such an outpatient clinic in that area for the provision of outpatient care directly by the Department of Veterans Affairs.

(b) USE OF EXISTING FACILITIES.—So that medical care can be provided through such clinic in a cost-effective manner as soon as practicable after the date of the enactment of this Act, the Secretary shall seek to locate the clinic at a suitable existing facility that is vacant or underutilized, if such a facility is reasonably available and meets the requirements of the Department of Veterans Affairs.

(c) DATE FOR PROVIDING SERVICES.—The Secretary shall begin providing medical services from the outpatient clinic established pursuant to this section no later than October 1, 1991.

PUT OIL COMPANY WINDFALL PROFITS TO WORK FOR U.S. TAXPAYERS

HON. PAUL E. KANJORSKI

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 5, 1990

Mr. KANJORSKI. Mr. Speaker, today I am introducing legislation to resolve taxpayer anger over two of our most pressing problems: Price gouging by major oil companies, and the cost of the savings and loan cleanup.

My bill would save taxpayers billions of dollars in savings and loan cleanup costs by reinstating the old windfall profits tax on oil companies and dedicating the proceeds to the Resolution Trust Corporation.

By providing as much as $15 billion a year for the savings and loan cleanup we will also be saving taxpayers, and future generations, hundreds of billions in interest rate costs for the cleanup.

Mr. Speaker, American consumers are already paying billions of dollars in unjustified windfall profits to the multinational oil companies, which are increasingly owned by Middle Eastern interests, as a result of the crisis in the Middle East and the resulting near doubling in oil prices. It is time we put those funds to work for the taxpayer.

I would like to share with my colleagues a summary of my bill and an explanation of how it operates. As our colleagues meet with the administration at Andrews Air Force Base I hope they will incorporate this proposal into the bipartisan budget agreement.

BENEFITS

A windfall profits tax raises substantial revenues without imposing any additional burden on average taxpayers. It uses definitions and mechanisms from prior law which are well understood, easy to implement, and above all, fair. It turns adversity into an asset. It enables us to pay for a significant portion of the S&L cleanup today rather than running-up hundreds of billions of dollars of interest for our children to pay.

REVENUES

More than $15 billion a year would be raised by a windfall profits tax assuming an oil price of $30/barrel and thus a windfall of $8.50/barrel and a tax rate of 60 percent of the windfall (the midpoint between the rates on major oil companies and independents). Between 1980 and 1988 (when the original windfall profits tax was repealed) it raised $80 billion, with a high of more than $22 billion in 1982. This could pay for the entire savings and loan cleanup in less than a decade. In addition, for every dollar the price of oil rises over $30/barrel an extra $3 billion is generated.

EFFECT ON FUTURE OIL PRODUCTION AND EXPLORATION

None since the market price of oil is still below the base price of "new" oil. In addition, even if the market price did rise above the base price, the tax rate on new oil is relatively

low and producers would still receive more than twice as much for each barrel as they did only a few months ago, more than enough of an incentive to keep drilling.

IMPACT ON OIL PRICES AND CONSUMERS

None since it only taxes windfall profits and the oil companies do not have the ability to raise the price of oil above the level set by the cartel. Consumers are already paying higher prices, it is up to us to recapture part of the oil companies' windfall profits. As recent events have amply demonstrated, oil prices only rachet up. While companies always pass increases in wholesale prices along to consumers, they rarely, if ever, pass along decreases.

EQUITY

The last boom and bust in the economy of the oil patch is responsible for a significant portion of the cost of the savings and loan crisis. Reinstating the windfall profits tax will have a leveling effect on the economy of the Southwest and will relieve taxpayers of some of the cost of resolving the thrift crisis.

MECHANISM

The windfall profits tax divides all oil into three tiers: Tier I ("old" oil), Tier II (oil from stripper wells and the Naval Petroleum Reserve) and Tier III ("new" oil and expensive to extract heavy and tertiary oil).

A tax is imposed on the difference between the actual sales price and a base or reasonable price established before the oil cartel started manipulating supplies and prices. Tier I has the lowest base price, while tier III has the highest base price. Base prices are adjusted quarterly for inflation, and tier III new oil receives a special adjustment 2 percent above the rate of inflation.

Tier I windfall profits are taxed at a higher rate than tier II or tier III windfall profits. Tier I and tier II windfall profits of small independent producers are also taxed at a lower rate than the windfall profits of major multinational oil companies.

	Estimated base price	Tax rate for major producers (percent)	Tax rate for independent producers (percent)
Tier I (old oil)	$21.50	70	50
Tier II (stripper wells and Naval Petroleum Reserve)	26.25	60	30
Tier III			
Heavy and tertiary	34.50	30	30
New oil	34.50	22.5	22.5

EXAMPLE WITH OIL AT $30/BARREL

Tier III (new) oil is not taxed at all because the base price is above the sales price. For Tier II oil, the windfall is $30–$26.25 or $3.75/barrel, major producers pay a tax of 60 percent of that windfall ($2.25/barrel) and independents pay a tax of 30 percent of their windfall ($1.13/barrel). For Tier I (old) oil, the windfall is $30–$21.50 or $8.50/barrel, major producers pay a tax of 70 percent of that windfall ($5.95/barrel), and independents pay a tax of 50 percent of their windfall ($4.25/barrel).

27 MEMBERS ADD NAMES TO AMICUS CURIAE BRIEF

HON. C. THOMAS McMILLEN

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 5, 1990

Mr. McMILLEN of Maryland. Mr. Speaker, this week I joined with 26 of my distinguished colleagues in the House of Representatives in adding our names to an amicus curiae brief prepared by our distinguished former colleague and long-time chairman of the Judiciary Committee, Peter Rodino. The issue concerns a dispute between an American automobile distribution company in Maryland and Toyota, the Japanese automobile manufacturer.

In 1987, the distributor, Mid-Atlantic Toyota of Glen Burnie, MD, was attempting to hold on to its contract to distribute Toyotas in Maryland, Pennsylvania, Virginia, West Virginia, Delaware, and the District of Columbia. It brought its dispute to the Congress and this led Toyota to extend the contract, but not before Toyota had inserted an astounding paragraph. In essence, Mid-Atlantic Toyota was forced to agree that they would not "directly or indirectly, take any political actions at the local, State or Federal levels that are contrary to any business objectives of Toyota."

This gag order in effect, is an intrusion into the public process of our Government. The amicus curiae brief that I have joined asks a Federal court to remove this interference with an American firm's first amendment rights. If Toyota's efforts succeed, the right of a constituent to petition the Congress would have been violated and greatly reduced. I urge my colleagues to support us in this matter by adding their names of the amicus curiae brief.

Mr. Speaker, I will include in my remarks, the entire amicus curiae brief and the names of my colleagues who have already joined in this action.

As of 12 noon on August 3, 1990, the following Members have agreed to support the amicus brief:

Hon. FRANK J. GUARINI.
Hon. HOWARD BERMAN.
Hon. BEN JONES.
Hon. CHARLES WILSON.
Hon. MARCY KAPTUR.
Hon. BRUCE A. MORRISON.
Hon. JACK BROOKS.
Hon. EDOLPHUS TOWNS.
Hon. BENJAMIN GILMAN.
Hon. HELEN BENTLEY.
Hon. BENJAMIN CARDIN.
Hon. NANCY PELOSI.
Hon. EDWARD FEIGHAN.
Hon. JOHN G. ROWLAND.
Hon. THOMAS E. PETRI.
Hon. SONNY CALLAHAN.
Hon. JOHN CONYERS, JR.
Hon. BOB LIVINGSTON.
Hon. JILL LONG.
Hon. NICK JOE RAHALL II.
Hon. BOB MCEWEN.
Hon. BILL LEHMAN.
Hon. ROBERT TORRICELLI.
Hon. NICK MAVROULES.
Hon. ROBERT ROE.
Hon. BILLY TAUZIN.

[In the U.S. District Court, Central District of California, No. 90-3504 (JGD)]

FREDERICK R. WEISMAN, AN INDIVIDUAL, FREDERICK WEISMAN COMPANY, A DELAWARE CORPORATION, AND MID-ATLANTIC TOYOTA DISTRIBUTORS, INC., A DELAWARE CORPORATION, PLAINTIFFS, *v.* TOYOTA MOTOR SALES, U.S.A., INC., A CALIFORNIA CORPORATION, DEFENDANT

MOTION FOR LEAVE TO FILE A MEMORANDUM AMICUS CURIAE AND MEMORANDUM AMICUS CURIAE IN SUPPORT OF THE PLAINTIFFS' MOTION FOR A PRELIMINARY INJUNCTION

This Motion is filed by XX Members of Congress, each of whom is a duly elected legislator now serving in the United States House of Representatives. The office of each movant is described in detail in Exhibit A. We seek leave to file this Memorandum amicus curiae to stress the importance of the First Amendment Right of Petition to the Congress and the American people. While we fully support the plaintiffs' efforts to secure their individual rights to communicate with Congress, we are equally, if not more, concerned with the protection of the right of Congress to receive communications from the plaintiffs and others, a right that is essential to the maintenance of representative democracy. Our interests are different than those of the plaintiffs, and while our views complement and support theirs, our memorandum seeks to inform the Court of certain aspects of the law, history and role of the First Amendment that are of unique importance to us as Members of Congress. We therefore ask the Court to grant this Motion and accept this Memorandum as part of its consideration of the plaintiffs' motion for a preliminary injunction.

We have received consent from counsel for the plaintiffs [and counsel for the defendants] to file this Motion and the accompanying Memorandum. We therefore move this Court to accept and consider this Memorandum.

PRESERVATION OF AN ABSOLUTE, UNWAIVABLE RIGHT TO COMMUNICATE FREELY WITH CONGRESS IS ESSENTIAL TO THE MAINTENANCE OF A REPRESENTATIVE FORM OF GOVERNMENT

The "gag provision" at issue in this case would, if enforced, preclude the Mr. Weisman and his companies from communicating with Congress in any manner that Toyota considers "contrary to [its] business interests." That restriction is extraordinarily broad and, to the best of our knowledge, unprecedented. The provision represents a shocking assertion of private power to interfere in the public process of governance. In our view the provision is facially inconsistent with the history, purpose and implementation of the First Amendment. It also represents a substantial threat to the ability of Congresss to carry out its constitutional function of legislating for the welfare of the American people.

A. The Right of Petition in Our Constitution Was Intended to Preserve Full, Free and Unihibited Access to Congress

The First Amendment not only guarantees "freedom of speech," it specifically guarantees "the right of the people peaceably to assemble, and to petition the Government for a redress of grievances." While "freedom of speech" has often been the object of judicial interpretation, the "right of petition" has rarely been litigated. The absence of litigation is no indication of any diminished importance of this right. It is, instead, an indication of the unquestioned

importance of the right and a testament to the rarity of efforts to interfere with the exercise of the right.

The "right of petition" was not born in the United States, but finds its roots deep in our English common law tradition. King John guaranteed his subjects the right of petition in 1215 when he agreed to the Magna Carta. One of the central provisions of that covenant, found in clause 61 of the original version, established a council of 25 barons who were guaranteed the right, on behalf of all the king's subjects, to advise the king if he was "any respect delinquent toward any one or transgress any article" of the Magna Carta. King John, in a royal tone well known to the English barons, agreed that if any such delinquency were "shown to four barons of the aforesaid twenty-five barons, those four barons shall come to us . . . to explain to us the wrong, asking that without dealy we cause this wrong to be redressed." Magna Carta, clause 61 of the original version, as reprinted in C. Stephenson & F. Markham, Sources of English Constitutional History (Harper & Bros. New York 1937) at 125.

The English kings were, unfortunately, not always ready to stand behind King John's promise. After a series of punishments inflicted by their predecessors on petitioners for the King's redress, William and Mary were required to acknowledge in 1688 that "[I]t is the right of the subjects to petition the King, and all commitments and prosecutions for such petitioning are illegal." Statute of 1 Wm. & Mary, Sess. 2, c.2 (1688).

The importance of the right of petition was recognized in colonial America. England's failure to consistently recognize this right was one of the colonists' complaints that led to the Declaration of Independence. In its very first resolution, the first Continental Congress adopted the first American Bill of Rights, including in it our own version of William and Mary's promise:

"[T]he inhabitants of the English Colonies in North America, by the immutable laws of nature, the principles of the English constitution, and the several charters or compacts, have the following Rights:

* * * * *

"That they have a right peaceably to assemble, consider of their grievances, and petition the King; and that all prosecutions, prohibitory proclamations, and commitments for the same are illegal."

It was from these established roots that the First Amendment grew. The Framers did not invent a new right in 1791, they acted only to confirm what had been the right of our English ancestors for centuries—the right freely, openly and without fear of punishment to communicate with the Government.

B. Congress Has Repeatedly Legislated to Insure Open And Undeterred Access From the People to The Legislature

The First Amendment guarantee of an unfettered "right of petition" has not always been respected by the Government, but the Congress has repeatedly acted to insure that the lines of communication between it and the people remain open. President Taft issued an Executive Order prohibiting federal employees from testifying directly to Congress. (Ex. Order No. 1142) Congress responded with a law intended to guarantee that government employees had the same right to access to Congress that the First Amendment guaranteed to other citizens. Section 6 of the Post Office Appropriations Bill of 1912 provided that "[t]he right of persons employed in the civil service of the United States * * * to petition Congress, or any Member thereof, or to furnish information to either House of Congress, or to any committee or member thereof, shall not be denied or interfered with." (Ch. 389, § 6, 37 Stat. 539, 555) The purpose of the bill was plainly stated by Congressman Rouse:

"Mr. Chairman, all of us are familiar with what is known as the 'gag rule'; the officers of the Government, the employees of every department are by this rule denied that right which is given them by the Constitution. * * * This bill also gives to the employees * * * the right to present their grievances to Congress or any member thereof. * * * This provision simply places all employees on the same footing with all other American citizens, which should never have been otherwise, and restores to them the rights guaranteed by the Constitution." (48 Cong. Rec. 5080)

That provision remains a part of the law to this day. (5 U.S.C. § 7211)

At least three other congressional actions evidence the public importance of insuring open communications with Congress. Section 1505 of Title 18 makes it a crime to "corruptly * * * intimidate, or impede any witness * * * in connection with any inquiry or investigation being had by either House, or any committee of either House." Section 192 of Title 2 punishes false testimony before Congress. The Civil Service Reform Act of 1978 contained a provision making the improper dismissal of "whistleblower" a prohibited personnel practice. 5 U.S.C. § 2302(b)(8). Each of these laws is designed, at least in part, to insure that Congress can be informed by those who are aware of the facts that Congress must know to protect the public interest.

C. Unfettered Communications Between the People and the Congress is Essential to Effective Legislation in the Interests of all the People

In most First Amendment cases the focus is on the rights of the individual to speak out in the face of governmental restraint. In most First Amendment cases the courts are called upon to guarantee the rights of individuals that may be threatened by opposition from the majority. That traditional situation is not present in this case. What is at issue here, in our view, is not merely an issue of individual freedom, but an issue of insuring a collective right essential to the maintenance of a representative democracy.

Although the "right of petition" finds its roots in an effort to guarantee individuals access to their sovereign, that modern freedom also serves to insure an informed legislative process. When our Nation was younger and smaller, legislators were "full time" farmers, businessmen, lawyers and doctors and "part time" public servants. Today being a Member of Congress is a full-time, year-round job. Each of us depends on full, frank and open communications with our constituents and other citizens to inform us so we can legislate in the public's best interest. The First Amendment guarantee of the "right to petition" is the lynchpin of this essential communication. Toyota's "gag provision" threatens that lynchpin.

We have pointed out how Congress has legislated on several occasions to insure open communications between the people and the Government. But sensitivity to the central importance of this communications is not limited to the Legislative Branch. President Wilson recognized the importance of communications with Congress:

"It is the proper duty of a representative body to look diligently into every affair of government and to talk much about what it sees. It is meant to be the eyes and the voice, and to embody the wisdom and will of its constituents. Unless Congress have and use every means of acquainting itself . . . and unless Congress both scrutinize these things and sift them by every means of discussion, the country must remain in embarrassing crippling ignorances of the very affairs which it is most important that it should understand and direct. *The informing function of Congress should be preferred even to its legislative function.*" W. Wilson, Congressional Government at 303 (emphasis added).

The courts have also recognized the importance of open communications with Congress. In *McGrain* v. *Daugherty*, 273 U.S. 135 (1927), the Supreme Court noted that:

"[a] legislative body cannot legislate wisely or effectively in the absence of information respecting the conditions which the legislation is intended to affect or change; and where the legislative body does not itself possess the requisite information—which not infrequently is true—recourse must be had to others who possess it." 273 U.S. at 174-75. *See also Barenblatt* v. *United States*, 380 U.S. 109, 111 (1958).

The fact that the "right to petition" guarantees the flow of information *to Congress* as well as *from the individual* was expressly recognized by the court in *Osborn* v. *Pennsylvania-Delaware Serv. Station*, 499 F.Supp. 553, 556 (1980):

"The objective of the "right to petition" clause is not merely to guarantee the opportunity for seeking redress * * * it is also designed to provide some assurance that public decision-makers will be sufficiently informed to carry out their function."

Because the "right to petition" is both a private and a public right, protection of this First Amendment freedom is especially important.

D. The Toyota "Gag Provision" Threatens Effective Communication With Congress and Should be Held Invalid and Unenforceable as a Contract Against Public Policy and the Constitution

We are well aware that the "gag provision" in this case does not arise from any governmental action, but is found in a private contract between two parties, both of whom may be considered substantial economic entities. Nonetheless we urge the Court to hold that the "right of petition" is too important to *all* the people to be bargained away or waived by *some* of the people. In this case one of the parties to the contract now seeks judicial relief from its agreement, but that fact in our view should not control the Court's decision. There are some things the law cannot let private parties agree to do. We need not explain this fundamental proposition to this Court, for the Court is more fully informed on the legal concept than we are. But we urge the court to recognize the fundamental importance to all of us in insuring totally open communications with the arms of Government.

We doubt that any court would enforce a private contract under which one party bound itself not to testify in court on pain of economic punishment. Not only would such provision fail to insulate a witness from contempt or perjury charges, we do not believe a court would countenance imposition of damages on someone who broke a promise to "stand silent" and instead came

forward with pertinent evidence. That refusal to enforce a private agreement should be the reaction in this case as well.

In our view the existence of congressional subpoena power does not alter the adverse consequences of the Toyota "gag provision." While we are confident that a congressional subpoena would override any private agreement not to testify, the Court should appreciate the fact that Congress rarely resorts to subpoenas to obtain information. Our history and tradition is to rely primarily on voluntary testimony, not compulsory process. Moreover, unless Congress is first informed of the existence of a problem, it has no basis to issue a subpoena to obtain information. The Toyota "gag provision" thus has the consequence of cutting off the basic information Congress would need to know before it could initiate any formal inquiry. Moreover, subpoenas can only be issued by committees and individual Members of Congress depend almost entirely on voluntary communications initiated by the public for aquisition of the basic information we need in order to perform our public duties.

We see no valid reason for a court to legitimize a private contract such as the one in issue here. No individual has a legitimate right to attempt to muzzle another party in its communications with Congress. No individual has a right to seek to keep Congress from becoming informed about matters of public interest. While there may be few absolutes in the law, we submit that the rule we urge is an exception to that general principle. It is essential to the concept of representative government that all individuals are free, at all times and under all circumstances, to communicate with Congress. Our Constitution requires it and our collective welfare demands it. We urge this Court to clearly, plainly and promptly declare that "gag provisions" such as the one involved in this case are unlawful, void and repugnant to our laws and our Constitution.

CONCLUSION

For the reasons stated we urge the Court to grant the plaintiffs' Motion for a Preliminary Injunction and declare the Toyota "gag provision" void and unlawful as a matter of public policy.

Respectfully submitted,

——— ———,

Counsel for Amici.

SENSE-OF-CONGRESS RESOLUTION THAT THE UNITED STATES SHOULD TAP THE STRATEGIC PETROLEUM RESERVE

HON. THOMAS J. TAUKE

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 5, 1990

Mr. TAUKE. Mr. Speaker, today I am introducing a resolution expressing the sense of the Congress that the President should direct the Department of Energy to take all of the administrative steps, including prequalifying of bidders, for the use of the strategic petroleum reserve [SPR], and that the President should authorize a drawdown of the SPR in coordination with other countries holding their own strategic stockpiles of crude oil, such as Japan and West Germany.

Last winter we learned a painful lesson when prices of heating oil doubled and propane prices tripled in December 1989 in large part because of unexpected demand from unanticipated record cold weather and low inventories going into the winter heating season. I am afraid we may be about to endure the same hardships yet again, unless corrective actions are taken now to avoid them.

While a snapshot of the oil supply situation taken today indicates that supplies are adequate, storm clouds are on the horizon. Given the lead time involved in coordinating a drawdown of the SPR with our allies and then going through the administrative procedures associated with using the SPR, prudency dictates that we err on the side of caution and begin taking steps leading to a modest draw down of the SPR, as recommended by many notable energy analysts.

The SPR presently contains over 590 million barrels of crude oil in salt caverns on the gulf coast in Texas and Louisiana. U.S. taxpayers have invested over $20 billion in building the facilities and filling them with oil. The SPR contains the equivalent of 800 days of United States imports of oil from Iraq and Kuwait based on the average rate of 730,000 barrels per day at which we purchased oil from those two countries in the first 5 months of 1990. Once the remaining oil tankers which were loaded with Iraqi and Kuwaiti oil before the August 2, 1990 Iraq invasion of Kuwait and the subsequent United States and U.N. embargoes arrive in the United States in the next few weeks, the United States will need to draw down commercial and Government stockpiles of oil in order to meet likely demand for oil this winter and possibly into next year.

Oil, particularly with market changes in the 1980s, acts like a fungible commodity. As American consumers learned the hard way last month, the price of refined petroleum products like gasoline and heating oil is determined by world supply and demand, and thus by world events. The United States is not an island unto itself when it comes to oil. Thus, we should be paying careful attention to the forecasts that supplies could be very tight by the end of the year and into next year, even with the increased production coming from Saudi Arabia, Venezuela, and other oil producing countries.

The New York Times of August 31, 1990, ran an article based on an interview with a senior official of the International Energy Agency in which the official stated that the worldwide shortage of oil—based on current demand in excess of current production—could rise to more than 500,000 barrels per day in December. An IEA official is quoted as saying that such a shortfall is unmanageable without use of strategic oil reserves. These warnings were confirmed, albeit guised in diplomatic language, in the IEA communique issued following the meeting of the IEA board of governors later on August 31.

Section 161 of the Energy Policy and Conservation Act of 1975 authorizes the drawdown of the SPR if the President finds that it is required by a severe energy supply interruption. The law defines such an interruption as one which is, or is likely to be, of significant scope and duration and of an emergency nature, which may cause adverse economic impact on national safety or the national economy, and which results, or is likely to result, from an interruption in the supply of imported petroleum products, or from sabotage or an act of God. I believe that the current situation meets the criteria in the law and the Department of Energy concedes as much.

For example, the Northeast-Midwest Congressional Coalition issued a report done by its research institute which found that a 50 percent increase in annual average retail costs for petroleum products would increase oil costs in Iowa by an estimated $1.16 billion, or $250 more per person each year. Similar and in some cases greater increases are estimated for other States. The adverse economic impact from large oil price increases, particularly given the softness in the economy already, is self-evident. The sense of Congress resolution I am introducing puts the Congress formally on record as concluding that the current energy situation and that projected for the near future constitute a severe energy supply interruption within the meaning of the law.

In conclusion, the policy of the United States as declared in section 151 of the Energy Policy and Conservation Act of 1975 is that the purpose of the SPR is to reduce the impact of disruptions in supplies of petroleum products. The Energy Information Administration has advised the Congress through its daily energy situation analysis reports that there is a gross world oil disruption in excess of 4 million barrels per day, only 800,000 barrels per day of which was offset in August. As noted earlier, while increased production elsewhere is increasing, it could very well not be enough. Secretary of Energy James D. Watkins spoke to the IEA in Paris on May 30, 1989, and urged other IEA members to build their own SPR's for use early in a supply disruption. Early use has long been U.S. policy as set by the Congress and as advocated by the executive branch, including the current Secretary of Energy. The resolution I am introducing today reaffirms that important tenet of U.S. energy policy which is vital to the protection of the national economy.

A NEW POLICY FOR THE PERSIAN GULF

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 5, 1990

Mr. BROOMFIELD. Mr. Speaker, during the last month, I have had a number of conversations with my fellow Members from both sides of the aisle about events in the Persian Gulf. In my years in Congress, I have never seen such strong bipartisan support for a Presidential initiative in the foreign policy area. President Bush's swift and decisive response to the Iraqi invasion of Kuwait has earned him the praise of Democrats and Republicans, liberals and conservatives.

Perhaps the one thing lacking in this initiative has been a comprehensive statement of America's policy objectives. Yesterday, Secretary Baker appeared before the House Foreign Affairs Committee to give us such a

statement. It was clear, straightforward, thoughtful, and persuasive.

Secretary Baker's statement describes what's at stake in this crisis, what our goals are, and how we plan to achieve those goals. I commend it to any of my colleagues who want a clear statement of America's policy in the Persian Gulf, and ask that it be reprinted in the RECORD.

AMERICA'S STAKE IN THE PERSIAN GULF CRISIS

(Statement by Hon. James A. Baker III)

Mr. Chairman, Members of the Committee: I have come here today to speak to you—and through you to the American people—about the conflict in the Persian Gulf and what it means for the United States.

I would like to use my statement today to place this crisis in a larger context. The entire world has mobilized to redress aggression against a small country in a distant place. Already, we're paying higher prices when we pull up to the local gas pump. And thousands of our finest young men and women now stand guard in the heat of the Persian Gulf.

The President has made it plain we have a straightforward responsibility to the American people: Openly and clearly, we have a duty to state what is at stake as a result of Saddam Hussein's invasion of Kuwait. We have a duty to tell our people what our immediate goals are in this conflict. And we have a duty to explain how we plan to achieve those goals in order to further our long-run interests in the Gulf and beyond.

THE STAKES

Let me start by discussing what's at stake.

First, Iraq's unprovoked aggression is a political test of how the post-Cold War world will work. Amidst the revolutions sweeping the globe and the transformation of East-West relations, we stand at a critical juncture in history. The Iraqi invasion of Kuwait is one of the defining moments of a new era—an era full of promise but also one replete with new challenges. While the rules of the road developed during the Cold War did, in the end, preserve East-West peace in Europe, the task now is to build an enduring peace that is global in scope, not limited just to Europe and not rooted in confrontation and tension.

If we are to build a stable and more comprehensive peace, we must respond to the defining moments of this new era, recognizing the emerging dangers lurking before us. We are entering an era in which ethnic and sectarian identities could easily breed new violence and conflict. It is an era in which new hostilities and threats could erupt as misguided leaders are tempted to assert regional dominance before the ground rules of a new order can be accepted.

Accordingly, we face a simple choice: Do we want to live in a world where aggression is made less likely because it is met with a powerful response from the international community, a world where civilized rules of conduct apply? Or are we willing to live in a world where aggression can go unchecked, where aggression succeeds because we cannot muster the collective will to challenge it?

Sadly, Saddam Hussein's attack on Kuwait will not be the last act of aggression that international society will face. So long as ruthless aggressors remain, the reality of international life is that such predatory designs will emerge from time to time. But the current crisis is a first opportunity to limit such dangers, to reinforce the standards for civilized behavior found in the United Nations Charter, and to help shape a more peaceful international order built on the promise of recent trends in Europe and elsewhere. We must seize this opportunity to solidify the ground rules of the new order.

Second, from a strategic standpoint, we must show that intimidation and force are not successful ways of doing business in the volatile Middle East—or anywhere else. The combination of unresolved regional conflicts, turbulent social and political changes, weapons of mass destruction, and much of the world's energy supplies makes the Middle East particularly combustible. No one is immune from conflicts in the Middle East. And no one can feel safe when the danger of war escalating in the Middle East is so high.

If we want to encourage peaceful change and preserve the security of all our friends in the area, we must remain a reliable partner for peace. We must help demonstrate that Saddam Hussein's violent way is an anachronism, not the wave of the future.

Third, and perhaps most obviously, what is at stake economically is the dependence of the world on access to the energy resources of the Persian Gulf. The effects on our economy and our people are already being felt. But this is not about increases in the price of a gallon of gas at your local service station. It is not just a narrow question of the flow of oil from Kuwait and Iraq. It is about a dictator who acting alone and unchallenged could strangle the global economic order, determining by fiat whether we all enter a recession, or even the darkness of a depression.

A sustained oil price spiral—similar to what happened in 1973 and again in 1979—could easily cause higher inflation and interest rates worldwide, sending us all into a sustained recessionary slide. The burden could become particularly great for the new democracies of Eastern Europe, threatening to undo the revolutions of 1989. It would also be painfully felt in the poorer countries of Central America, South Asia, and Africa—threatening those who are now embracing market-oriented reforms and striving to improve living standards for their impoverished millions.

Simply put, these are the stakes raised by Iraq's invasion against Kuwait. How have we and the international community responded to them?

OUR OBJECTIVES

For the United States, the President has identified four immediate goals:

One, the immediate, complete, and unconditional withdrawal of all Iraqi forces from Kuwait as mandated in United Nations Security Council Resolution 660;

Two, the restoration of Kuwait's legitimate government;

Three, the protection of the lives of American citizens held hostage by Iraq, both in Iraq and in Kuwait; and

Four, a commitment to the security and stability of the Persian Gulf.

Our strategy is to lead a global political alliance to isolate Iraq—politically, economicaly, and militarily. In this way, we aim to make Iraq pay such a high price for its aggression that it will be forced to withdraw from Kuwait and release Americans and others held hostage. This in turn will allow the restoration of Kuwait's legitimate government. It will also improve the opportunities for long-term security and stability in the Persian Gulf in a way that builds on the unprecedented international consensus that has already been formed.

IMPLEMENTING THE STRATEGY

Our strategy has moved on two mutually-supporting tracks toward these aims. Let me summarize our efforts.

Diplomatically, we have worked from the beginning to foster a coordinated international response to Iraq's aggression. The results have been extraordinary and unprecedented. Five unanimous United Nations Security Council resolutions have been passed. And Iran is now isolated.

We are gratified by the responsible and productive work we have been able to undertake with the other Permanent Members—Britain, France, the Soviet Union, and the People's Republic of China—as well as the support the Arab League and the Non-Aligned Movement have provided.

In particular, the Soviet Union has proven a responsible partner, suggesting new possibilities for active superpower cooperation in resolving regional conflicts. The President will work to further strengthen our ties of partnership when he meets President Gorbachev in Helsinki this Sunday. In taking the long view, we should remember what this conflict would have looked like if old-style zero-sum thinking was still driving Soviet policy in the Gulf.

NATO, the EC, and the West European Union have pitched in magnificently. Our NATO ally, Turkey, should also be singled out for its fast, effective, and courageous cooperation. Finally, a broad regional coalition—including Egypt, Saudi Arabia, Kuwait, the Gulf states, and Syria—have done much to foster international cohesion.

In this regard, let me make a larger point: From the early days of this Administration, we have made a concerted effort—with our friends in Asia and Europe, with the Soviets, and with organizations like NATO and the EC—to focus on the explosive dangers inherent in regional conflicts. In response to Iraq's invasion, we have drawn upon the new international ties being shaped by this strategy.

The Kuwaitis themselves deserve our compassion and respect. They have suffered a brutal invasion, their country pillaged, their lives traumatized. There has been a tragic loss of life, and thousands of Kuwaitis have fled to neighboring states, escaping in many cases with only the clothes on their back.

The Kuwaitis, however, are fighting back heroically. They are not collaborating with the Iraqi occupiers. All elements of Kuwaiti society—from religious conservatives to secular liberals—have voiced support for the restoration of the government. An indigenous Kuwaiti resistance has emerged. It carries on the struggle against Iraqi aggression from inside Kuwait. Moreover, the government of Kuwait in exile is providing financial aid to support our military effort and to help alleviate economic disruptions that have occurred in such states as Egypt.

In short, Kuwait has been occupied, not conquered.

The political coalition, bound by the principle that Saddam Hussein must be denied the fruits of aggression, has created an economic embargo under UN auspices that is solidly in place. Iraq's import-dependent economy is beginning to feel the strain, and international pressures will continue to grow over time as shortages mount. Sanction busters may be tempted by the lure of financial profits, but Security Council Resolution 665 which permits enforcement by appropriate means should ensure that Iraq's

opportunities to export its oil and import key materials will be severely constrained over time.

Saddam Hussein's aggression has exacted a broad range of economic costs for countries across both the region and globe. The destruction of the Kuwaiti economy by Iraqi invaders has caused major economic dislocations for our friends in the region, notably Egypt and Turkey. Other countries with fragile economies, especially in Eastern Europe, are bearing heavy costs. The need to offset the burden of our own military efforts must also be addressed.

As the President announced last Thursday, we have initiated an action plan to meet these needs. Our friends around the world are responding. Saudi Arabia is meeting a large share of the fuel costs for this effort. And other Gulf states are providing fuel and financial resources to the affected states.

The President has also asked Secretary Brady and myself to go to key nations in the Gulf, Europe, and Asia to help mobilize and coordinate the international effort. We will attempt to ensure that the costs and responsibilities are shared equitably and that our various efforts complement one another. The aim is to address the vital needs of affected parties and to maintain the solidarity of the international coalition.

Time can be on the side of the international community. Diplomacy can be made to work.

On the military track, over twenty-five countries are now supplying men and materiel in support of the Security Council resolutions. US military objectives are to deter an Iraqi attack on Saudi Arabia and to insure the effective implementation of the United Nations sanctions. Our military forces are also there to protect American lives and to provide an effective and decisive military response should Iraq escalate its aggression to active combat with the multinational force.

Once the present danger passes, however, we must not let its lessons go unheeded. We have a responsibility to assure the American people that a decade from now, their sons and daughters will not be put in jeopardy because we failed to work toward long-run solutions to the problems of the Gulf.

The historic international consensus we have built can become a solid foundation for successfully meeting our immediate objectives and building a safer future. It can foster a future Gulf environment that will protect our interests and help us avoid having to make this kind of massive diplomatic and military effort again.

In the long run, we seek a stable Gulf in which the nations of that region and their peoples can live in peace, free of the fear of coercion. We seek a region in which change can occur and legitimate security concerns can be preserved peacefully. And we seek a region in which energy supplies flow freely.

We will need to work together with governments in the Gulf and outside of it to build a more durable order. We will want to ensure that our friends in the area have the means to deter aggression and defend themselves, making it less necessary to send American men and women to help them. And we will work with the rest of the regional and international community to prevent further Iraqi expansionism as well as Iraqi efforts to acquire and produce weapons of mass destruction.

Resolution of today's threat should also become a springboard for a sustained international effort to curb the proliferation of chemical, biological, and nuclear weapons and ballistic missiles in the region and elsewhere. It can become a springboard for revived efforts to resolve the conflicts which lie at the root of such proliferation, including the festering conflict between Israel and its Palestinian and Arab neighbors.

It is not enough to demonstrate that aggression and intimidation don't pay; we must show that a pathway to reconciliation and peace does exist, and that it can be found with good will and good faith on all sides.

THE IMPLICATIONS FOR AMERICA'S ROLE IN THE WORLD

Mr. Chairman, let me conclude by placing Saddam Hussein's invasion of Kuwait in historical perspective.

For over four decades, the central fact of international relations was the conflict between East and West. The Cold War reverberated across the globe, affecting everyone everywhere. Much of America's foreign policy was either driven by, or derivative of, our efforts to contain Stalinist aggression.

Now, the central dispute of the post-war period—the East-West conflict over the future of Europe—has been transformed. Last year's people power revolutions in Central and Eastern Europe swept away the dictatorships of the past. In their place, the people are finding freedom. Europe is becoming whole and free, and Germany will be united in peace and freedom.

An enlightened Soviet leadership has encouraged peaceful, democratic change as the only legitimate road to progress. This Administration has actively engaged the new thinkers and reformers in the Soviet Union. Together, we are finding common interests that will unite East and West. Partnership is replacing conflict.

As I have said many times before, America's role in this sea change in world politics is straightforward: We must leave behind not only the Cold War but also the conflicts that preceded it.

And this is why—as the President has said from the outset—Iraq's aggression cannot stand.

The line in the sands of Arabia is also a line in time. By crossing into Kuwait, Saddam Hussein took a dangerous step back in history. Maybe he thought the world would consider Kuwait expendable, that we would think of it as just a small, faraway country of which we knew and cared little. Possibly he remembered the 1930s when the League of Nations failed to respond effectively to Mussolini's aggression against Abyssinia, what is today Ethiopia. Clearly, Saddam Hussein thought his crime would pay.

But the world has decided otherwise. He must not be allowed to hold on to what he stole.

The President has made our position clear: The world must stand united to defend the principles enshrined in the United Nations Charter.

In this effort, America must lead and our people must understand that. We remain the one nation that has the necessary political, military, and economic instruments at our disposal to catalyze a successful collective response by the international community.

Geographically, we stand apart from much of the world, separated by the Atlantic and the Pacific. But politically, economically, and strategically, there are no oceans, and in a world without oceans, a policy of isolationism is no option at all. Only American engagement can shape the peaceful world our people so deeply desire.

We believe this coordinated and comprehensive international isolation of Iraq is the only peaceful path to meeting the objectives set by the President. Our efforts will, however, take time and that is what we ask most of the American people: Stand firm. Be patient. And remain united so that together we can show that aggression does not pay.

LITTLE HAVANA AND HIALEAH PALM CENTER INSTITUTES

HON. ILEANA ROS-LEHTINEN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 5, 1990

Ms. ROS-LEHTINEN. Mr. Speaker, the Cuban American National Council [CNC] has had yet another success in the area of education. The Little Havana and Hialeah Palm Center Institutes were created and administered by the CNC in conjunction with the Dade County Public Schools. The institutes serve as an alternative to existing middle schools, their goal being to prepare students to return to the regular classroom with the academic and social skills needed to succeed.

The institutes help those students who have encountered difficulties in the traditional school setting because of a lack of motivation and personalized attention. The programs offered are directed to assist students whose school performance is affected by limited English proficiency, problems of acculturation, prolonged absence from school, excessive absenteeism and lack of educational continuity, problems of socialization and behavior, emotional and family difficulties, and the need to work.

The institutes provide small group and individualized academic instructions for students from the 6th through 10th grades. A ratio of six teachers and a full-time counselor to every 100 students assures indepth counseling attention, as well as ensuring academic success for those students identified "at-risk" of dropping out of school before graduation.

A school of choice, the institutes require that students demonstrate a personal commitment to excel academically. More importantly, their parents or guardians must share the commitment and express their willingness to help in educationally related programs. Such parent/family participation is expected. Statement of their express awareness of the significant educational opportunity being offered must be made by students and parents alike.

I would like to extend special thanks to CNC's Board of Directors; Guarione M. Diaz, president; Agustin de Goytisolo, chairman; Alina E. Becker, secretary; Maria Acosta, treasurer; Wilfredo Allen; Alina Antonetti; Antonio L. Argiz; Enrique Baloyra; Laurence Batista-Falla; Nelson Benedico; Marta Bequer; Annie Betancourt; Elva Collazo; Frederico Costales; Rita Di Martino; Albert E. Dotson; Nancy Dreicer; Jorge Escalona; Zulima Farber; Marcelo Fernandez-Zayas; Vincent Forte; Juan Galan; Margarita Garcia; Mario Goderich; Sara C. Gomez; Pedro Jose Greer, Jr.; Alma Guerra; Jose Manuel Hernandez; Antonio Jorge; Ada M. Kirby; Carmela Lacayo;

Ivan Llorente; Sergio Masvidal; Marta Miyares; Beatriz Olivera; Jose S. Prince; Rene Rocha; Angel Rodriguez; Jorge Salazar; Celia Suarez; Frank Torano; Barton Udell; Mario Vizcaino; Raul Yzaguirre; and Tere Zubizarreta.

As a great supporter of education, I extend my sincerest appreciation to the Cuban American National Council for their latest effort to advance the cause of education in Dade County.

CHARLIE SMITH'S VISIT TO THE SOVIET UNION

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 5, 1990

Mr. CONTE. Mr. Speaker, I rise to bring the House's attention to a journey Charlie Smith, of Pittsfield, will undertake, beginning on September 15, 1990.

Charlie will be traveling with "Bridges for Peace," a grassroots organization with branches in the United States and the Soviet Union. The group brings American and Soviet citizens together, in the hope of progress toward peace and greater mutual understanding. His delegation will visit Moscow, and then move on to the cities of Kiev, Lvov, and Odessa in the Ukraine. At the same time, other Bridges for Peace delegations will visit Russia and the Baltic Republics.

Charlie is the former mayor of my hometown of Pittsfield and an executive of the Krofta Water Co. As a talented political leader, a resourceful businessman and a humanitarian who has devoted his life to helping people in western Massachusetts and around the world, he is an ideal representative of our region.

He will visit the Soviet Union at a crucial point in United States-Soviet relations and Soviet history as a whole. The Soviet Union is undertaking an epic reform in virtually all areas. Its leaders and citizens are making dramatic changes in policies ranging from economic planning, to foreign affairs, to farm policy, to relations between Soviet Republics. As this process continues, citizens of both the United States and the U.S.S.R. are doing their best to bring down the walls which divided us for so long.

The Bridges for Peace mission, dedicated to international peace and understanding, is an important part of that process. Today, I offer Charlie my congratulations for his role in helping build a stable peace, and I give him my best wishes and sincere hopes for a successful journey. I ask the whole House to join me.

A TRIBUTE TO SISTER MARY EDITH KNEBLEWSKI

HON. BILL SCHUETTE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 5, 1990

Mr. SCHUETTE. Mr. Speaker, I have the privilege today of congratulating an outstanding citizen of the State of Michigan, Sister Mary Edith Kneblewski, on her 75 anniversary as a Sister of Mercy. There was a special service held in her honor at the St. Francis Catholic Church on August 21, 1990. Immediately following the service, Sister Mary Edith joined all of her friends for a potluck dinner held in the St. Francis gymnasium.

Sister Mary Edith, one of 17 children, was born in 1897, in Traverse City, MI. She was baptized in the old St. Francis Church where she remains an adherent member. Over a period of 56 years, Sister Mary Edith served as a teacher, principal, and administrator in area Catholic schools. She then continued her devotion to a life of service as a chaplain for the sick at local hospitals and convalescent homes, as well as serving communion to area sick people in their homes.

At the age of 92, Sister Mary Edith has no plans to retire. She occasionally visits the sick in Detroit area hospitals as well as helps care for the older sisters at the Mercy Mother House. She also finds time to visit the infirm, helps feed stroke victims, and read to the blind.

Sister Mary Edith is a warm, thoughtful, and attentive friend. She is loved and respected by her colleagues, students, and friends. Sister Mary Edith has made a positive impression on people of all faiths who have been affected by her presence throughout the years.

Mr. Speaker, and my colleagues in the House, please join me in honoring Sister Mary Edith Kneblewski with congratulations on her 75th anniversary as a Sister of Mercy. I applaud Sister Mary Edith for her outstanding lifetime achievements and for serving as a role model and a friend to her community.

TESLA'S 134TH BIRTHDAY

HON. GEORGE W. GEKAS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 5, 1990

Mr. GEKAS. Mr. Speaker, it is fitting that as America celebrates the reopening of Ellis Island as a museum of our heritage, we honor an immigrant who contributed much to this country. He was a distinguished scientist and inventor, Nikola Tesla. Tesla's 134th birthdate was this summer, July 11.

In 1856 Nikola Tesla was born in Serbia, which is now Yugoslavia. He emigrated to this country at the age of 28. He was ahead of his time as a scientist and worked with Thomas Edison for nearly a year. Then he established his own laboratory and began a spectacular career in research and invention.

He was convinced that alternate electric current could provide light and power systems and he worked with George Westinghouse to market this system. Of course, today's electricity is provided through alternate current.

Nikola Tesla became a U.S. citizen in 1891. I am sure my colleagues join me in honoring this man who contributed so much to our country. His 700 inventions continue to influence the world in which we live.

Mr. Speaker, the United States is a better place for immigrants such as Nikola Tesla.

NEW SCIENCE AND SPACE MUSEUM

HON. ILEANA ROS-LEHTINEN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 5, 1990

Ms. ROS-LEHTINEN. Mr. Speaker, the Miami Museum of Science and Space Transit Planetarium's groundbreaking ceremonies for Phase I of the building renovation and expansion was held on August 20, 1990, at the Museum Lobby in Miami, FL.

In an attempt to enrich our community's cultural life, the Columbus Discovery Commemorative Fund Campaign will make the museum's renovation and expansion a realization through its generous funding. Similar gestures of generosity are a joint fundraising effort by and for the Greater Miami Opera, Historical Association of Southern Florida, and Miami Museum of Science, as well as a challenge grant from Mr. Mitchell Wolfson, Jr., which has inspired and endowed this worthwhile endeavor.

Special recognition should go to the museum's board of trustees: James M. Miller, president, Dennis Finneran, vice president, Peter E. Houghton, vice president, Mary Brenner, secretary, James H. Scott, treasurer, Marcelo A. Alvarez, assistant treasurer, executives Jack Admire, Mary Ann Bedingfield, Doris Blanck, Janet Case, Gloria Clifford, Lucy Constant, Anne Cruxent, Irene Lofberg, Roderick N. Setrey, James O. Plinton, Olga Pouget, Helene Schneker, Barbara Vicevich, and Mattie Lou Wessell.

Other board members include, Blanche August, Herman Berger, Martha Lou Bradley, Ethel Cassel, Marty Cleveland, Douglas Coffey, Clark Cook, Jr., Leona H. Cooper, Mayor George Corrigan, Mitchell Dauerman, Ethel Dessaint, Esther Ehlert, Marilyn Ellyson, Pat Fine, Jose A. Garrido, Jr., Martin J. Genauer, Pat Graham, Dale M. Gregory, Mimi Hammond, Herschel C. Hayo, Jr., Nancy Herget, William Heuson, James Hobbs, Joan Hudiburg, Carla Imbrie, Lonnie Kantor, Annalea Kayar, Michael Krop, Harold G. Levell, Steve Lieberman, Bruce Malec, Eugene H. Man, John Mann, Ernestine McKay, Bunny Meyer, John O'Hare, Jr., Angie Pickett, Austin Porfiri, William F. Quesenberry III, Ambrosio Rodriquez, Peter A. Rona, Stanley Ross, Jack J. Sapia, John Stokes, Lynn Strauss, Cathy Tilton, Jeff B. Weiner, and Albert L. Weintraub.

It is the museum's motto, "Making our dreams of the future * * * a reality today," which best captures the essence of this undertaking. For years now, the museum has made the dreams of many people, young and old, and from all walks of life, a reality. It has planted the seed of knowledge of the sciences and space in the hearts and minds of countless children, among whom our future Albert Einsteins and Buzz Aldridges will come. The investment of the efforts of those mentioned above is an insurance policy for coming generations to share in this experience and, consequently, ensure the strength and well-being of our country's future.

TRIBUTE TO THE U.S. BOARD ON GEOGRAPHIC NAMES

HON. SIDNEY R. YATES

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 5, 1990

Mr. YATES. Mr. Speaker, I wish to take a moment to salute the U.S. Board on Geographic Names for 100 years of excellent service to the Nation. The Board, which has functioned without a budget and with little recognition, is a superb example of long-standing cooperation between government agencies. It has had remarkable success in resolving local "naming" conflicts and over the years it has given the country the standard names and spellings that we take for granted on maps and other official documents.

The Board on Geographic Names makes policy on place names. Every year, the Board reviews scores of new domestic names and suggested changes. In addition, the Board may approve several thousand foreign names in a year. The need for such a body became evident with the opening of the American West. Exploration reports, mining claims, and surveys frequently referred to places and geographic features—mountains, valleys, rivers, settlements—by different names. As a result, President Benjamin Harrison created the U.S. Board on Geographic Names on September 4, 1890. President Theodore Roosevelt extended the Board's responsibilities in 1906, and the two great wars of this century greatly increased the Board's involvement with foreign names.

As it turns out, the Board has performed pioneering work in toponymy, the study of place names, and has earned for itself an estimable reputation among its counterparts the world over. The naming of places carries with it the implicit, fundamental human power of intellectual possession. The Board on Geographic Names has exercised that power with fairness, discretion, discrimination, taste, and sensitivity.

With no staff or facilities of its own and no distinct appropriation, the Board relies for those resources on the agencies from which its members are drawn: the Departments of Interior, Agriculture, Commerce, Defense, and State; the Central Intelligence Agency; the Government Printing Office; the Postal Service; and the Library of Congress. The Secretary of the Interior serves conjointly with the Board to standardize names. The U.S. Geological Survey, in the Department of the Interior, provides staff services for the Domestic Names Committee. Its counterpart in the Department of Defense, the Defense Mapping Agency, staffs the Foreign Names Committee.

The week of September 4–7 is the Board's centennial observation. The centennial is being marked by a major exhibition opening in the Madison Gallery of the Library of Congress. The exhibition, entitled "A World of Names," tells the fascinating story of how geographic places acquire their unique names. I urge you to stop by the Madison Building and visit the very informative exhibition. In addition, a series of symposia relating to the history and process of naming of geographic places is being held this week at the Library.

SGT. LEONARD P. MORAN—A HERO RECOGNIZED

HON. JOHN JOSEPH MOAKLEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 5, 1990

Mr. MOAKLEY. Mr. Speaker, I rise today to recognize a genuine American hero. U.S. Army Sgt. Leonard P. Moran was from my hometown of South Boston, MA. Sergeant Moran served with distinction in Korea; earning the Combat Infantry Badge, the Purple Heart, and three battle stars in that war. In addition, without regard for his own safety, while in Korea, he saved the life of a fellow soldier, John Norton.

"Lennie" Moran lived and died as a hero. He was completely selfless in the final brave act that took his life. Sergeant Moran returned from Korea to continue his service to his country in the United States Army. He was stationed at Fort Dix, NJ where he was an instructor for new Army recruits. On January 7, 1954, Sergeant Moran was instructing a new trainee, Pvt. John D. O'Callaghan, in throwing live hand grenades out of a pit. The trainee's first effort was done properly but his second attempt was low and it struck a parapet. The grenade bounced back into the pit with Sergeant Moran and the recruit. In the brief moment that followed, Lennie had to make a decision, and the one he made was brave and selfless.

Sergeant Moran was posthumously awarded the Soldier's Medal for the action that he took. The citation on the medal read in part, "Without hesitation and with complete disregard for his own personal safety, Sergeant Moran threw his body between the grenade and the trainee, thus shielding the soldier from danger and absorbing the full force of the explosion himself."

The citation continues, Sergeant Moran's consummate valor, inspirational action, and supreme sacrifice in saving human life, thereby reflecting lasting glory on himself, are in keeping with the honored traditions of the military service."

Sgt. Leonard Moran, war hero, died at the age of 22. In his life and in his death he acted completely without regard for his own safety. Sergeant Moran paid the ultimate price and made the supreme sacrifice for his country, for his beliefs and for his fellow man. For his bravery, former Speaker of the House John McCormack recommended Sergeant Moran for our country's highest military honor, the Congressional Medal of Honor.

It has taken over 36 years for this patriot and hero to be properly recognized but this September 22, Sergeant Moran's memory will be celebrated in South Boston at a Memorial Mass at the Gate of Heaven Church followed by a dedication ceremony in which the corner of Flint Place and Marine Road, across the street from his family's home, will be named in his honor.

Mr. Speaker, Sgt. Lenoard P. "Lennie" Moran was a hero in every sense of the word. His ideals and his actions are sources of inspiration for all of us who believe that this is the greatest country on God's earth. I salute Sergeant Moran, and I remember Lennie. He is missed but his memory lives with us still.

OLD SAN JUAN/WYNWOOD FESTIVAL

HON. ILEANA ROS-LEHTINEN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 5, 1990

Ms. ROS-LEHTINEN. Mr. Speaker, I would like to recognize the outstanding job the Old San Juan Festival Corp. has done in the Miami area to promote cultural and economic development in the community. On July 29, 1990, the members held the Old San Juan/Wynwood Festival to celebrate the many contributions the Puerto Rican community has given to southern Florida and the event was a resounding success.

It is encouraging to see such great civic pride and I am very pleased to have the Old San Juan Festival Corp. enrich us all by sharing their culture with the many diverse ethnic groups living in the Miami area. This fine group is composed of various community leaders and representatives of local Puerto Rican agencies and organizations.

Because of their diligent efforts, the Puerto Rican community has been able to prosper, as newer and better opportunities are created. Their success and growth allows the entire community to flourish, and for that we are all thankful and appreciative.

The board of directors deserves special recognition, including: Nelly Cordero, Adaljisa Martinez, Nilsa Velazquez, Roberto Camacho, William Rios, Dororthy Quintana, William Morales, Felix Rivera, Jose Rivera, Iris Corchado, Nora Smith, Jose Cobian, Gregorio Lind, John Martinez, Maria Luisa Rivera, Ramon Rivera, Betzaida Ferrer, Alicia Baro, Milagros Gonzalez, and Sadie Candelario.

Mr. Speaker, organizations such as the Old San Juan Festival Corporation deserve our praise for their exemplary efforts in promoting ethnic diversity. I am honored to recognize them today.

A TRIBUTE TO RAY DONAHUE

HON. NICHOLAS MAVROULES

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 5, 1990

Mr. MAVROULES. Mr. Speaker, I would like to bring to your attention the upcoming departure of Combr. Raymond Patrick Donahue from the Department of the Navy's Congressional Liaison office. Combr. Ray Donahue has served the House of Representatives with distinction since May of 1988. He has been key in maintaining the flow of information between the Congress and the Navy on literally hundreds of thousands of our inquiries on behalf of our constituents serving our U.S. Navy throughout the world. His dedicated effort to bring his wealth of fleet experience to our office has brought an improved understanding to my colleagues and our staffs. I have personally had the opportunity to travel

with Combr. Ray Donahue and have found him to be an outstanding example of our Navy's finest. He is as comfortable in the Halls of Congress or the distant lands of Europe as he is on the bridge of our Navy's most modern destroyer. Through this unparalleled professionalism and high spirit, Combr. Ray Donahue has become a true friend and comrade to all of us. As Combr. Ray Donahue transfers to attend the Industrial College of the Armed Forces for graduate studies prior to returning to sea, it is appropriate that we pause and offer our thanks. Mr. Speaker, Combr. Ray Donahue's service has been in the highest tradition of the Naval Service. I call you and my colleagues to join me in wishing Combr. Ray Donahue "Fair winds and following seas."

HONORING FRANK H. DeLELLO

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 5, 1990

Mr. COURTER. Mr. Speaker, it is an honor and a privilege for me to recognize Frank H. DeLello, of Hackettstown, NJ. Frank has done nothing more or less than serve his community better than over 15 years. Frank has demonstrated a superior intellect and a keen sense for what can be accomplished through his many successes in the private sector including ownership of several businesses. In the political sector, Frank has worshiped the Republican Party and has been one of the most loyal supporters both on the national and local levels. He helped the successful Bush/Quayle team in 1988 and has maintained the grass roots political experience that he garnered as the Warren County Republican Chairman.

The secret to Frank's success has much to do with his wonderful family. He is married and has three sons. Their support for Frank and confidence in him has been a strong support system and has helped guide the path to Frank's accomplishments. I, along with many others, wish continued success to Frank and I am confident that his strong commitment and service will continue in Warren County.

THE HISPANIC COALITION'S 1990 INTERAMERICAN 2000 PERMANENT CONFERENCE

HON. ILEANA ROS-LEHTINEN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 5, 1990

Ms. ROS-LEHTINEN Mr. Speaker, on July 27th of this year, the Hispanic Coalition hosted the Permanent Conference, 1990 Interamerican 2000 in Miami, FL. The coalition strives to reach the Hispanic communities in an effort to strengthen ties with the United States and improve their quality of life.

Equal opportunity, culturally, educationally, economically and socially, for all is of the utmost importance. Of major concern to the coalition is how to assure that Hispanics, and all other American groups, can enjoy full access to the opportunities and resources in this country today, as well as tomorrow. As productivity and international competitiveness gain increasing importance, the coalition believes that serious attention must be paid to adequate integration, exchange and development for all.

Activities organized by the coalition during the period between April and June, 1990, alone, was extensive. As a means of disseminating public information to the Hispanic organizations, the coalition attended several radio programs, as well as several TV programs, in an attempt to bring the services they provide to the community's attention. As part of their goals in addressing community needs, the coalition has actively participated and cooperated with several Hispanic organizations which had problems, by acting as a mediator and offering possible ways of solving their differences.

To advocate cases and promote issues that affect our Hispanic communities, the coalition has addressed letters to Senators and Congressmen requesting their support to repeal the employer sanction provisions in the Immigration Reform and Control Act [IRCA] of 1986. Furthermore, the coalition worked in conjunction with ASPIRA of Florida, Inc., a community-based organization, whose mission it is to develop a better educated, more community conscious Hispanic youth. They were asked by ASPIRA's drug prevention coordinator to assist them in offering a 12-week course to provide information and training to prevent the use and abuse of drugs in the Hispanic community.

These activities only begin to scratch the surface of the numerous invaluable services provided by the Hispanic Coalition, and we have the following to thank for that: Rosa E. Kasse, president; Rene A. Quinones, executive director; Marcos Alcayaga, conference general director; Rosario S. Roman, general secretary; Manuel R. Del Valle, treasurer; Victor T. Gutierrez, legal counsel; board of directors Beatriz A. Consuegra; Gabriel De La Hoz; Rafael Mencia Lister; Raul E. Ona; Hector Polit; Ivonne Rivera; and Jose F. Padro; and, advisory council members Humberto Amaro; Guarione M. Diaz; Edgard Solis; Janirah Vians; Tito Zambrana; Maurice Ferre; Roberto J. Arguello; and, Matilde Perez Porrata.

For their hard work and dedication in meeting the needs of Hispanics, from employment to education to immigration needs to the strengthening of coalitions among Hispanics nationwide, I offer my sincerest gratitude and the hope for the Hispanic Coalition's continued success.

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Meetings scheduled for Thursday, September 6, 1990, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

SEPTEMBER 7

9:30 a.m.
Joint Economic
To hold hearings on the employment-unemployment situation in August.
2359 Rayburn Building

SEPTEMBER 11

9:30 a.m.
Select on Indian Affairs
To hold hearings on proposed legislation on San Carlos water settlement rights.
SR-485

10:00 a.m.
Finance
Business meeting, to hear and consider the nominations of Jerome H. Powell, of New York, to be Assistant Secretary of Treasury for Domestic Finance, and Steven B. Kelmar, of Pennsylvania, to be Assistant Secretary of Health and Human Services for Legislation.
SD-215

2:00 p.m.
Armed Services
To hold hearings on the situation in the Persian Gulf.
SH-216

SEPTEMBER 12

9:00 a.m.
Select on Indian Affairs
Business meeting, to mark up S. 1554, to implement water settlements involving the Pyramid Lake Paiute Tribe, the States of California and Nevada and other parties regarding the waters of the Truckee and Carson Rivers and Lake Tahoe in Nevada and California, and H.R. 5063, to provide for the settlement of the water rights claims of the Fort McDowell Indian community in Arizona.
SR-485

SEPTEMBER 13

9:00 a.m.
Energy and Natural Resources
Water and Power Subcommittee
To hold hearings on S. 2657, to direct the Secretary of the Interior to conduct studies to investigate opportunities for wastewater reclamation and reuse and to study groundwater, S. 2658, to establish conditions for the sale and delivery of water from the Central Valley Project, California, S. 2870, to approve the Fort Hall Indian Water Rights Settlement, and H.R. 4148, to acquire certain water rights for the settlement of Indian water rights claims in the State of Arizona.
SD-366

10:00 a.m.
Environment and Public Works
Water Resources, Transportation, and Infrastructure Subcommittee
To hold oversight hearings to review programs of the Economic Development Administration, Department of Commerce, and the Appalachian Regional Commission.
SD-406

2:00 p.m.
Foreign Relations
To resume hearings on Threshold Test Ban and Peaceful Nuclear Explosions Treaties with Russia (Treaty Doc. 101-19, and Ex. N, 94th Congress, 2nd Session), and verification protocols for each treaty.
SD-419

SEPTEMBER 14

10:00 a.m.
Foreign Relations
Business meeting, to consider Threshold Test Ban and Peaceful Nuclear Explosions Treaties with Russia, (Treaty Doc. 101-19, and Ex. N, 94th Congress, 2nd Session), and verification protocols for each treaty, and S. 2436, authorizing funds for fiscal years 1991 and 1992 for the United States Peace Corps.
SD-419

2:00 p.m.
Finance
Medicare and Long-Term Care Subcommittee
To hold hearings on proposed legislation to help senior citizens make more informed choices when purchasing Medigap insurance policies and to moderate increases in Medigap premiums.
SD-215

SEPTEMBER 17

10:00 a.m.
Finance
Health for Families and the Uninsured Subcommittee
To hold hearings on proposed legislation to modify Medicaid's drug reimbursement program to improve access to affordable high quality care.
SD-215

SEPTEMBER 18

9:00 a.m.
Energy and Natural Resources
Water and Power Subcommittee
To hold hearings on S. 2969, to provide for completion of the Central Utah Project.
SD-366

Veterans' Affairs
To hold joint hearings with the House Veterans' Affairs Committee to review legislative recommendations of the American Legion.
SD-106

9:30 a.m.
Rules and Administration
Business meeting, to mark up S. 2522, to require Congress to purchase recycled paper and paper products to the greatest extent practicable, S. 2758, to provide additional membership on the Library of Congress Trust Fund Board, H. Con. Res. 338, authorizing printing of the proceedings of the bicentennial research conference entitled "Understanding Congress," and other pending calendar business.
SR-301

2:00 p.m.
Joint Library
Business meeting, on matters relating to the Library of Congress and its Congressional Research Service.
H-328, Capitol

SEPTEMBER 21

10:00 a.m.
Finance
International Trade Subcommittee
To hold hearings to review the final report on the U.S.-Japan Structural Impediments Initiative (SII) talks.
SD-215

SEPTEMBER 25

8:30 a.m.
Office of Technology Assessment
Board meeting, to consider pending business.
EF-100, Capitol

SEPTEMBER 28

10:00 a.m.
Finance
International Trade Subcommittee
To hold hearings to review progress made on important trade issues between the U.S. and Canada, focusing on subsidies, dispute settlement panels, and general implementation of the Free Trade Agreement and the 1986 Softwood Lumber Memorandum of Understanding.
SD-215

FEBRUARY 26

9:30 a.m.
Veterans' Affairs
To hold joint hearings with the House Committee on Veterans' Affairs to review legislative recommendations of the Disabled American Veterans.
345 Cannon Building

FEBRUARY 28

9:30 a.m.
Veterans' Affairs
To hold joint hearings with the House Committee on Veterans' Affairs to review the legislative recommendations of the Paralyzed Veterans of America, Blinded Veterans Association, Vietnam Veterans of America, Military Order of the Purple Heart, and Non-Commissioned Officers Association.
345 Cannon Building

APRIL 17

9:00 a.m.
Veterans' Affairs
To hold joint hearings with the House Committee on Veterans' Affairs to review legislative recommendations of AMVETS, Ex-Prisoners of War, Jewish War Veterans, and World War I Veterans.
345 Cannon Building

HOUSE OF REPRESENTATIVES—*Thursday, September 6, 1990*

The House met at 10 a.m. and was called to order by the Speaker pro tempore (Mr. BONIOR).

DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, DC,
September 6, 1990.

I hereby designate the Honorable DAVID E. BONIOR to act as Speaker pro tempore today.

THOMAS S. FOLEY,
Speaker of the House of Representatives.

PRAYER

Rabbi David B. Saltzman, Aventura-Turnberry Jewish Center, Aventura, FL, offered the following prayer:

O Lord who is manifest in the wonders of the natural world and in the story of humankind, we are aware of the important moment in history which we face.

As the seasons change, now that Labor Day has passed and the fall season is upon us, we recognize that it is traditional to begin to take stock of our deeds and thoughts and resolve to utilize our spiritual resources and inner strength in order to be more able to accomplish our goals for the future.

We pray that the leaders of our country gathered here, will continue to hear the lessons of the past and work to fulfill the dreams and ideals that are yet to be realized.

May this country continue to grow as a dynamic model of the flowering of the human spirit and continue to be a bastion for liberty and freedom.

Our prayers are with the members of the Armed Forces who are once again announcing to the world that the United States has learned from our past and is true to our ideals and purposes.

Bless all who are working to ensure a world at peace where individuals and peoples can live with security.

May the power that created harmony in the universe, grant us the ability to live in a world where all God's creatures understand the need for shalom, peace, harmony, and a sense of completeness and to that let us all say amen.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

PLEDGE OF ALLEGIANCE

The SPEAKER pro tempore. The gentleman from Florida [Mr. LEHMAN] will lead the House in the Pledge of Allegiance.

Mr. LEHMAN of Florida led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

RABBI DAVID B. SALTZMAN

(Mr. LEHMAN of Florida asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEHMAN of Florida. Mr. Speaker, I would like to thank Chaplain Ford for the privilege of having Rabbi David Saltzman as the guest chaplain this morning.

Rabbi Saltzman has served for the past 11 years as spiritual leader of the Aventura-Turnberry Jewish Center, a dynamic and growing congregation in our 17th Congressional District. This coming Sunday, I will be attending the official ceremony for the placing of the Torah in the new sanctuary.

Rabbi Saltzman was born in Brooklyn, NY, attended Flatbush Yeshiva High School, and graduated from Brooklyn College, after first spending his freshman year at Bar Ilan University during the time of the Sinai campaign. He was ordained at the Jewish Theological Seminary in 1965, where he was awarded the degree of doctor of divinity. He also holds a masters of Hebrew letters and master in academic administration.

Rabbi Saltzman has had a rich religious background, serving the spiritual needs of congregations in Massachusetts, New York, Illinois, and Florida, and as Navy chaplain in Guantanamo Bay, Cuba, and later with the marines in Vietnam.

This fall, Rabbi Saltzman will be leaving our community to serve as rabbi of the Conservative Congregation Moriah in Haifa, Israel. Our community will miss him, but we are most fortunate to have him with us today.

WE OUGHT TO BE REITERATING OUR SUPPORT FOR PRESIDENT BUSH IN THE MIDEAST CRISIS

(Mr. GEKAS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GEKAS. Mr. Speaker, increasingly there are Members of Congress who are taking the podium to give indication that they are beginning to abandon the President on his initiatives in the Middle East. Now is precisely the time when we ought to be reiterating our support for the President in the crisis in the Persian Gulf.

After all, the President has already been able to reach two of the three goals that he has stated: First, to deter aggression into Saudi Arabia; second, to converge the international community onto the crisis so that it would be a world against Iraq, not the United States against Iraq; and third, yet to be accomplished, the blockade, the economic blockage to bring Saddam Hussein to his senses, to his knees, if necessary.

The more time we give him—and we must give him time—the less chance there is that American blood will be spilled.

So let us respond immediately to those critics of the American policy and reiterate our support for the President to use whatever is necessary to make sure that our policy of national security and protection of our standard of living is protected in the Persian Gulf.

DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY NEXT

Mr. LEHMAN of Florida. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule be dispensed with on Wednesay next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

ADJOURNMENT TO MONDAY, SEPTEMBER 10, 1990

Mr. LEHMAN of Florida. Mr. Speaker, I ask unanimous consent that when the House adjourns today, it adjourn to meet at noon on Monday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

PROVIDING FOR A JOINT SESSION OF CONGRESS ON TUESDAY, SEPTEMBER 11, 1990

Mr. LEHMAN of Florida. Mr. Speaker, I offer a privileged concurrent resolution (H. Con. Res. 365) and ask for its immediate consideration.

The Clerk read the concurrent resolution, as follows:

H. CON. RES. 365

Resolved by the House of Representatives (the Senate concurring), That the two Houses of Congress assemble in the Hall of the House of Representatives on Tuesday, September 11, 1990, at 9 o'clock post meridiem, for the purpose of receiving such communication as the President of the United States shall be pleased to make to them.

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

IMPORTANCE OF NAVAL ORDNANCE STATION IN LOUISVILLE, KY

(Mr. MAZZOLI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MAZZOLI. Mr. Speaker, I support President Bush's decision to send U.S. military personnel to the Persian Gulf.

□ 1010

And like all Members of the House and Senate and people in the United States, we hope that this crisis can be settled quickly and peacefully.

Mr. Speaker, the current gulf crisis, however, demonstrates the importance of the U.S. Navy's sealift ability and seapower ability, and it demonstrates the vital role in both sealift and seapower played by Naval Ordnance Station, Louisville, which is located in my hometown.

Ironically, Naval Ordnance Station, Louisville, is one of the bases targeted for possible closure or realignment by Defense Secretary Cheney's decision of January of this year, 1990.

Mr. Speaker, events unfolding in the gulf, even as we speak today, underscore the importance of naval ordnance and the importance of the Pentagon not to move precipitously in deciding naval ordnance station's fate in the future.

In this connection, I wholeheartedly endorse the fair and impartial base closure guidelines which the House Committee on Armed Services, under the chairman, the gentleman from Wisconsin [Mr. ASPIN], has worked into the 1991 Defense bill which will reach the floor later this year.

I urge my colleagues in the House to support the language on base closure and the bill itself, when they reach the House, in order that we not in any way impede our ability to handle the problems in the gulf region.

THE 1990 AAA SCHOOL SAFETY PATROL LIFESAVING MEDAL

The SPEAKER pro tempore (Mr. PAYNE of Virginia). Under a previous order of the House, the gentleman from Florida [Mr. NELSON] is recognized for 5 minutes.

Mr. NELSON of Florida. Mr. Speaker, on September 14, the American Automobile Association will present to five deserving young students the highest award given to members of school safety patrols throughout the United States—the AAA School Safety Patrol Lifesaving Medal.

The Lifesaving Medal Program was initiated in 1949 by the American Automobile Association to recognize and honor selected school patrol members for heroic lifesaving actions. These awards are presented annually to school safety patrols who, while on duty, have saved the lives of persons in imminent danger.

An award review board composed of representatives from national educational, law enforcement, and safety organizations, selects outstanding medal recipients from candidates who have been officially nominated for consideration.

I am pleased to offer special commendation to the 1990 AAA School Safety Lifesaving Medal recipients:

Katie Dalbey, age 10, Tuscan Elementary School, Maplewood, NJ.

James Moon, age 9½, Monteith Elementary School, Grosse Pointe Woods, MI.

Taras P. Pacula, age 12, Winesburg Elementary School, Winesburg, OH.

Donald K. Pierce, Jr., age 10½, Monteith Elementary School, Gross Pointe Woods, MI.

Robbie Sanders, age 12, McCurdy Elementary, Florissant, MO.

Many congratulations to these outstanding AAA school patrols.

INTEREST ON UNDERPAYMENTS OF TAX

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. STARK] is recognized for 5 minutes.

Mr. STARK. Mr. Speaker, I rise today to introduce a bill entitled the Interest Equity Act of 1990. This is a simple bill with one purpose, and one purpose only—to treat business taxpayers the same as individuals regarding interest they pay on tax obligations.

Since the passage of the Tax Reform Act of 1986, most of the interest paid by individuals has been subject to an increasing nondeductible percentage. Last year, 90 percent of individual's personal interest was nondeductible. This year, 100 percent is nondeductible. As you know, Mr. Speaker, interest is no longer deductible on such worthy obligations as education and medical loans. Likewise, interest you pay to the Internal Revenue Service if you pay your taxes late can no longer be deducted. Some folks might say, "Why should it be? Why should I, a person who pays my taxes when they're due, subsidize someone who pays their taxes late?"

A good question, yet that's a subsidy that business taxpayers enjoy today. The individual taxpayer subsidizes the tax writeoff that businesses take when they pay interest on tax payments made after they are due. For corporations, that can amount to up to $340 of every $1,000 they pay in interest on their obligations. That's right, for every $1,000 a corporation is assessed in interest, only $660 actually comes out of the corporate coffers; the rest comes out out the pockets of other American taxpayers.

There's another aspect to this. During hearings held a couple of months ago by the Ways and Means Subcommittee on Oversight, there was mention of one company that delayed providing information necessary for completing an audit only to turn around at the completion of that audit and deduct the interest on the increased tax on their next tax return. So not only are we subsiziding the decision to delay payments of tax, we are doing so at the expense of our system of tax administration.

Mr. Speaker, this isn't one of those huge revenue raisers that we're going to need to balance the budget, but revenuewise, it's a winner, not a loser, and it's good tax policy.

H.R. —

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Interest Equity Act of 1990".

SEC. 2. INTERNAL REVENUE CODE AMENDMENTS.

(a) DISALLOWANCE OF INTEREST EXPENSE.—Section 163 of the Internal Revenue Code of 1986 is amended by inserting the following:

"(k) Disallowance of deduction for interest paid on tax obligations."

"(1) IN GENERAL.—In the case of any taxpayer, no deduction shall be allowed under this chapter for interest on tax obligations paid or accrued during the taxable year.

"(2) INTEREST PAID OR ACCRUED ON TAX OBLIGATIONS.—For purposes of this subsection, the term 'interest paid or accrued on tax obligations' means any interest paid or accrued on the following amounts:

"(A) Any amount required to be paid by the Internal Revenue Code of 1986;

"(B) Any amount for which a deduction is allowed under Section 164 of the Internal Revenue Code of 1986;

"(C) Any additions to taxes that are described in (A) and (B) above; or

"(D) Any amount for which a tax credit is allowed under Section 901 or 903 of the Internal Revenue Code of 1986."

(b) CONFORMING AMENDMENTS.—Subsection (k) "Cross references" is renumbered (1).

SEC. 3. EFFECTIVE DATE

This Act and the amendments made by this Act shall be effective for payments made after January 1, 1991.

ON DEBT FORGIVENESS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Arkansas [Mr. ALEXANDER] is recognized for 15 minutes.

Mr. ALEXANDER. Mr. Speaker, we read in the morning news today that

congressional leaders are convening at Andrews Air Force Base for the purpose of trying to work out a resolution on the current budget. Among those numbers that were reported by the local newspaper, the sum of $400 billion was thrown out as a possible deficit for next year. Actually, more precise numbers have been reported recently by the Committee on the House Budget, totaling about $393 billion in Federal fund deficits for next year. I mention that figure only to make reference to the fact that the Bush proposal to forgive $7 billion in debt owed to the United States by Egypt, our ally in the Middle East, for American military and other assistance, comes at a time when our budget is strained to the limits, when we face the possibility of massive Federal employee layoffs. The Federal Bureau of Investigation would be required to cut back many of its efforts to investigate organized crime in this country. The Task Force on Terrorism is threatened. The Drug Enforcement Administration would be required to cut back their initiative to fight the war on drugs. Also, there is little money to invest in our country, for such things as education and housing and public works, construction for highways, and other needed infrastructure.

If we are to deal with the Federal deficit, we must change both policies and management practices. One of the management practices that must be changed by this administration is the practice of the previous administration to ignore and to reschedule foreign debt collection. Foreign debt collection has been a subject of involvement, for me, almost from the day I came to the Congress 22 years ago. I felt then, as I feel now, that if foreign countries owe the American taxpayer money, then they should pay, the same as Americans must pay if they owe the Government money.

People I represent in Arkansas have a difficult time understanding how the Government can forgive billions of dollars in debt owed by foreign countries essentially treating those countries better than they treat American citizens. They know if those debtor nations had been Arkansas farmers, for example, or home buyers from the Farmers Home Administration, that the U.S. Government would foreclose those debts.

In fact, the U.S. Government did foreclose on many farmers in my district when policies of the past administrations sent farm prices plummeting through the floor, putting our farmers in a recession, unlike what we have seen in the last 20 years, and more like what we had during the 1930's, when farmers were unable to pay their obligations. I am sure those farmers are shaking their heads today over the news that the administration is proposing to wipe out $7 billion in debt when they lost their land and their homes for individual debts that appear tiny when compared to that massive figure.

I am told that the total debt owed by all farmers in Arkansas at the end of last year was about $3.2 billion, less than half of what the administration proposes to forgive in Egyptian debt.

The proposed Egyptian forgiveness would pay the debts of my State's farmers, with a lot of change left over. Farmers and home buyers in Arkansas know that if they do not pay the Government, the Government forecloses. When foreign countries do not pay, they are forgiven their debts. It is that arrangement which the people I represent do not understand. I recognize from having served as a member of the Subcommittee on Foreign Operations, many years ago, that there are special circumstances that develop in foreign countries that must be given consideration. However, the problem remains that foreign debt is not being collected and should be. The Egyptian situation merely puts this whole issue of foreign debt collection back into the spotlight.

I must also add, Mr. Speaker, that if the United States had an energy policy which depended more on our own natural resources, and less on foreign oil, we import about 52 percent of our oil today, we would not have this problem in the first place. The advancement of the alternative fuels industry in this country would have been greatly accelerated if we had spent just part of that $7 billion Mr. Bush proposes to forgive, in the development of alternative fuel sources, rather than in providing military aid, in order to protect fuel supplies coming from the Middle East.

Last year, I was successful in requiring the Department of the Treasury to provide a detailed accounting of the management of foreign debt owed to the United States, including information on the rescheduling of that debt. The rescheduling of the debt is a tool which has been used to evade provisions of the Alexander-Brooke amendment, passed in 1975, which merely said that if a foreign country is delinquent for more than 1 year in its oligations to the United States, that all future foreign aid is cut off. That is a reasonable provision. It is one that should be enforced, but it is one that was ignored by the Reagan-Bush administration, and I hope that the Bush administration changes that policy and that practice.

Mr. Speaker, the Alexander-Brooke amendment rests on the simple premise that if a nation is behind in its debt repayment to this country, it should not continue to receive foreign aid. I do not think it is so much to ask the countries which owe the United States money, to repay it. A high Government official was recently quoted as saying that this country had given up hope of collecting the $7 billion Egyptians owe to the United States, making the proposal to forgive it, a mere formality.

□ 1020

Mr. Speaker, I believe it is more than a formality, that we may be giving up hope of collecting too fast, and that such an attitude does not take into consideration the principle involved, which is what I am here today to discuss.

From my own experience I can tell my colleagues that it is possible to collect these debts, if someone will work at the task. I know from my own personal experience that in many cases the foreign countries simply have not been asked. Sure, there are special and extenuating circumstances, like in the case of Poland, for example, or, possibly, even Turkey, but in most instances our Government, our administration through the State Department, has simply not used the energy and the diplomacy necessary in order to get the job done.

In other words, Mr. Speaker, the executive branch cannot tell us how good or bad a job it is doing in collecting the past-due debts owed to the American people by foreign governments because they simply have not tried to do the job.

Mr. Speaker, I do not believe this is the way to run a railroad or a government, and, certainly if we are going to deal with the problem of the deficit facing this Nation, we must change some of our policies and some of our practices, and one management practice that we can begin with is to collect the debts that are justly owed to the American people by our foreign friends and allies abroad.

As we have seen, other nations are quickly lining up to receive the same treatment from this country as is proposed for Egypt and I believe that we may be sending the ship of state into very choppy seas.

I view this Egyptian debt proposal as the high price the Nation pays for being so dependent on foreign oil—it is a price which is too high.

America is now in the position of having to forgive billions in debt to protect its oil supply and is also in the frightening position of possibly having to trade blood for gasoline.

It must stop and it can stop.

A more efficient debt-collection process and an energy policy which depends more on the grain fields of the Midsouth than on the oil fields of the Mideast will help extricate America and the American taxpayers from this morass.

Mr. MARKEY. Mr. Speaker, will the gentleman yield?

Mr. ALEXANDER. I yield to the gentleman from Massachusetts.

Mr. MARKEY. Mr. Speaker, during my trip to the State of Israel last week I had an opportunity to meet with many in the top Israeli leadership, including Prime Minister Yitzak Shamir, Mr. Yitzak Rabin, and Deputy Foreign Minister Netan Yahu.

I come away from those meetings convinced more than ever that while the obstacles to a lasting peace between Israel and the Palestinians are many, they are not insurmountable. Israel genuinely wants peace. The key question is, Will the PLO and radical Arab States develop their quest to destroy Israel and grant Israel its right to exist.

The combination of Arab intransigence and growing Arab military might, including acquisition of nuclear, chemical, biological, and ballistic missile capabilities poses a threat to the peace and security of the entire Middle East and Persian Gulf regions. These weapons also pose a particular threat to the security of Israel. U.S. policy must help to avert both threats.

Secretary of State Baker yesterday agreed to a request by Israeli Foreign Minister David Levy for Patriot grount-to-air missiles to defend Israel against Iraqi ballistic missile attacks. I commend the administration for this decision, which is a good first step toward preserving Israel's security against the heightened danger of Iraqi aggression and intimidation.

But in the weeks and months ahead, the United States must consider the consequences for Israel's security of a massive influx of arms into the Arab world. We want to bolster the ability of Saudi Arabia to defend itself against Iraqi aggression and we want to encourage the courageous efforts of President Mubarak and other moderate Arab leaders to contain Saddam Hussein. But at the same time, we must take steps to assure that in arming the Arabs, we do not undermine the security of Israel. We need a balanced military assistance policy, which assists moderate Arab States seeking to resist aggression, while simultaneously assuring the continued security and survival of Israel.

Saddam Hussein's invasion of Kuwait has served as a wake up call to the world regarding the true nature of the threat to international security. As the cold war had ended, ushering in a new period of cooperation between East and West, a new danger to international security is emerging along a North-South axis. The Iraqi invasion should serve as a springboard to renewed efforts to prevent the proliferation of weapons of mass destruction, as Secretary Baker suggested the other day. At the same time, it should also serve as a springboard for us to put the pressure on the Arab world to reach as peace agreement with Israel and to halt their support for Palestinian terrorism.

Mr. ALEXANDER. Mr. Speaker, I appreciate the contribution of the gentleman from Massachusetts [Mr. MARKEY], and I would simply add that I had the privilege of meeting with President Mubarek, when he was Vice President, about 10 years ago, and he is an ally and friend of the United States and one that we do not take lightly. I hope that the principles that I have discussed here about fiscal management and about fiscal policy in no way denigrate the appreciation that we all have for an ally, but the fact remains that business is business, and we must get about the business of our own fiscal affairs if we are to continue to maintain the troops in the Middle East that protect the vital oil supply that runs the wheels of commerce and agriculture in America.

Again, Mr. Speaker, I appreciate very much the comments of the gentleman from Massachusetts [Mr. MARKEY].

PERMISSION FOR COMMITTEE ON ENERGY AND COMMERCE TO FILE REPORT ON H.R. 5267, CABLE TELEVISION CONSUMER PROTECTION AND COMPETITION ACT OF 1990

Mr. MARKEY. Mr. Speaker, I ask unanimous consent that the Committee on Energy and Commerce have until midnight tonight to file the report to accompany H.R. 5267, the Cable Television Consumer Protection and Competition Act of 1990.

The SPEAKER pro tempore (Mr. PAYNE of Virginia). Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

MINDING THE STORE

(Mr. DARDEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DARDEN. Mr. Speaker, certainly the attention of all this Nation has been focused on our crisis in the Middle East, as it properly should be. However, Mr. Speaker, I think we in Congress need to remember that there are other things that deserve our attention and deserve our work, as well, during the coming months.

While President Bush has done a commendable job, I believe with consultation and assistance from Congress in carrying on a very difficult mission in the Middle East, let us remember now that the job of the Congress is now to mind the store. We are directors, Mr. Speaker, of more than a trillion dollar corporation, and, if we do not meet our deadlines and our responsibilities by October 1, we can find ourselves in a rather embarrassing position with the American public.

So, Mr. Speaker, as we follow Ted Koppel, and Dan Rather, and Jim Kaiserski, and Dan Farmer and others in the Middle East and our media attention is focused there, let us not forget what we are about in Washington, and that is to do the business of the people and to get our trillion dollar corporation obligations met so that we can continue the business of the U.S. Government. Mr. Speaker, let us keep on track and let us look after and mind the store, as well as meet our global responsibilities.

□ 1030

FOREIGN SUBSIDIARY TAX AVOIDANCE

The SPEAKER pro tempore (Mr. PAYNE of Virginia). Under a previous order of the House, the gentleman from Virginia [Mr. WOLF] is recognized for 60 minutes.

Mr. WOLF. Mr. Speaker, I requested time today to discuss a matter that is very troubling to me and I believe will be as equally troubling to the American people when they learn all the facts about a situation involving foreign-owned subsidiaries and the payment of U.S. taxes.

We have recently been debating and approving next year's appropriations bills. At the same time, congressional leaders have been meeting with the President and his top advisers in a budget summit. And we have heard revised reports of the size of the Federal budget deficit. From some corners we have been hearing the call for new taxes. The serious problem that I will talk about today is part of the reason for the deficit and part of the reason for the shortfall in revenue. It is part of the reason for the trade deficit. The problem is that many foreign-owned subsidiaries in the United States are apparently not paying Federal income tax.

All of the evidence is not yet in, but today I want to raise some questions that I believe the American people deserve to have answered. The issue of foreign-owned subsidiaries avoiding U.S. taxes has been studied for the past 9 months by the investigators of the House Ways and Means Oversight Subcommittee. It is also currently being investigated by the General Accounting Office and the IRS. The results of these investigations—which you must remember are just preliminary—are troubling.

The Internal Revenue Service has reported that 1986 IRS statistics of income [SOI] data showed that foreign-owned companies reported approximately $550 billion in gross sales in the United States in that year. That is a big number, and represents all of the VCR's, foreign cars, electronic equipment, and so on that Americans are buying. But these same foreign-

owned companies collectively reported negative taxable income of $1.5 billion. Something here seems to be very, very wrong.

First I should indicate that this aggregate data does not prove that all foreign subsidiaries are avoiding taxes or are fixing their books—no one is claiming that all foreign subsidiaries are doing this. Many foreign subsidiaries are good, taxpaying corporate citizens that create jobs and are good for this country.

But as the investigators are scratching beneath the surface and are looking at specific industries and at specific companies, which are well-known to all of us, they are finding that the underreporting of income and tax avoidance may be pervasive. There has been testimony that these companies may have avoided paying up to $25 billion that they owe to the U.S. Government.

I have been looking into how to improve American competitiveness over the past few years, and this particular tax avoidance matter seems to encompass many of the factors that keep coming up when I look at competitiveness. It is like a microcosm of many of the things that are making it more and more difficult for American businesses to compete. And this tax avoidance by foreign subsidiaries is particularly disappointing to me as a supporter of free and fair trade.

Let me make clear my background on trade matters, to put things in perspective. I believe in free and fair trade, and in a level playing field for all firms that want to invest around the world. I have consistently opposed protectionist approaches to trade problems during my time in Congress. I have on several occasions voted against textile import quotas, and textiles are an important industry in Virginia. I voted against my colleague Mr. GEPHARDS's amendment to the omnibus trade bill in 1987. I have opposed import adjustment assistance and I have voted against domestic content requirements. I believe that America has the most to gain by remaining open to trade and by encouraging other countries to open their borders to American products and services. So I have never advocated barriers to trade. That has to be clear, based on what I am going to say. I have never advocated barriers to trade.

But I have also had some very real concerns about America's position in the international marketplace. There are storm warnings in many sectors of the economy, and I have worked with Members on both sides of the aisle on ways to improve American productivity, savings, investment in plant and infrastructure, and education, so that in the years ahead America will continue to offer opportunity and world leadership.

One of the storm warnings that concerns me is the rapid rise in foreign investment in this country. Foreign investment clearly has its positive and negative aspects, if it creates jobs and brings new technologies to the United States, then it should be welcomed. But some commentators suggest that American business is giving up whole sectors of the economy, and that America is becoming so dependent upon foreign capital that it affects our national policies and priorities. If they are right, then there may be a problem.

All you have to do is read the newspaper, listen to the radio, or watch television to hear about foreign investors buying high-profile U.S. companies and properties, and gaining market share in high technology products. Foreign companies are making a big impact in some industries such as chemicals and consumer electronics, and in some areas in commercial banking. To me, the most troubling cases are when a foreign interest acquires a defense-related company. If it happens enough, there is the potential that American firms will no longer be able to supply our forces with essential technologies, and we can see how important that is by what is happening in the Persian Gulf today.

Public opinion polls suggest that the American people are concerned about foreign investment, about the persistent trade deficits that America runs with some of these countries, and about the overall economic future of this Nation. Add to this the evidence that some foreign companies which have set up operations here, and which have been importing high percentages of parts and thus have contributed to the trade deficit, may not be paying their fair share of taxes. What does this mean about the validity of some of the arguments in favor of foreign investment?

I want to mention another preliminary issue, before I get into this tax avoidance matter in detail. I have watched as the debate on foreign investment and competitiveness has progressed and a pattern has developed where the media pretty quickly puts you into one camp or the other. When you talk about foreign investment or foreign lobbying, Japan often becomes the focus. You either get labeled as an internationalist, or as some would say, an apologist, or you get labeled as a basher.

I don't think that I would like to be put in with either group, and I think that trying to discredit someone and his or her ideas by name calling just clouds the issues. It is a smokescreen.

On the issue of tax avoidance, it should not matter where you stand on foreign investment. The issue is whether or not these companies, which enjoy the benefits of American markets, capital infrastructure, and workers, are paying their fair share of taxes.

The American taxpayer would have every right to be indignant if we are facing a huge budget deficit while foreign-owned companies are cheating on their taxes to the tune of billions of dollars. So today I want to raise some questions. I am not going to provide definitive answers, because the congressional investigators and the IRS are still looking into the matter. But I do want to raise some questions that I believe every business owner that pays taxes, and every American citizen that pays taxes, deserves to have answered.

I want to commend at the outset my colleagues who have focused on this issue, including DUNCAN HUNTER, DICK SCHULZE, MARCY KAPTUR, JAKE PICKLE, DICK GEPHARDT, and DAVID BONIOR. Now, let me briefly describe what the testimony before the Oversight Subcommittee has shown.

□ 1040

The congressional investigators focused on 36 foreign-owned U.S. distributors of automobiles, motorcycles, and electronics equipment. These companies are incorporated in the United States and distribute foreign-made products to American wholesalers and retailers. Out of the companies investigated, 25 were from Pacific Rim countries, and 11 had European parent companies.

The main tax issue that arose was transfer pricing, where, for example, a subsidiary would pay inflated prices for products that it purchases from the foreign parent to sell to the American public. By transferring the bulk of its profits back to the overseas parent because of this infalted price it pays, the subsidiary has a lower taxable income in the United States. Other ways of reducing taxable income that were discovered by the investigators included the shifting of income through excessive freight, insurance, and interest charges.

The investigators studied tax returns over a 10-year period, and found that more than half of the 36 companies investigated paid little or no Federal income tax. At the same time these companies were selling billions of dollars' worth of made products to American consumers.

Can it be that all of these companies are so poorly managed that even with billions in sales they are unable to make a profit?

Let me give an example of what the Oversight Subcommittee investigators found. They looked at one electronics company, described by IRS agents as a very aggressive and egregious taxpayer that had gross receipts over a 7-year period of approximately $4 billion. The company, over that period, reported $15 million in tax liabilities.

Now, it is possible that this company just had some bad years, and that is why its taxable income was so low. But when you look across the board among different industries and different companies and there is a pattern of unusually low taxable incomes, then this raises the question of tax evasion.

How much should these companies be paying in taxes? Several experts, including investment analysts, suggest that a rough estimate of how much a company should earn as taxable income is percent on gross revenues. So what would this mean for the electronics company with $4 billion in gross revenue?

If the company made $4 billion in gross receipts, you would thus expect a taxable income of roughly $320 million. And assuming a corporate tax rate of 34 percent—and, of course, the corporate tax rate was higher than that a few years ago—you would expect that company to pay taxes of about $109 million.

So it could be argued that this company probably should have paid taxes in the neighborhood of $109 million. And that is just one company. How much revenue has the Treasury lost if this pattern exists among many foreign subsidiaries?

In studying the 18 foreign automobile and motorcycle companies, all but two paid some Federal income taxes. But many utilized net operating loss carryforwards to substantially reduce their tax liability. In tax year 1987, 10 companies reported $38 billion in gross receipts and paid only $366 million, or less than 1 percent of gross receipts in Federal taxes.

Are U.S. companies doing the same thing and underreporting their income abroad? At the Oversight Subcommittee hearing on July 10, an IRS official testified that he has studied the tax return data of U.S. subsidiaries abroad, and that these firms "generally earned 8- to 10-percent pretax net operating profit on their business receipts." So this is consistent with the 8-percent figure that could be used to roughly estimate what taxable income should be. Compare this with the 1 percent for foreign subsidiaries, and there is cause for concern.

IRS statistics for income data for 1987, the most recent year available, both for all foreign companies operating in the United States, and for all Japanese firms show the return on assets and return on receipts for all foreign firms in 1987 are both less than 1 percent. For all Japanese firms, the return on assets and return on receipts is slightly more than one-tenth of 1 percent.

In contrast, remember, American firms overseas are generally reporting 8 percent of gross receipts as taxable income.

Other statistics illustrate the performance of Japanese controlled subsidiaries in the United States, in billions of dollars, from 1984 to 1987. It is reported that the receipts of these subsidiaries have increased from $112.6 billion in 1984 to $184 billion in 1987. The Japanese seem to be doing pretty well, as anyone who has purchased a TV or VCR or microwave lately will attest. Statistics also show that the assets of Japanese subsidiaries in the United States have increased from $65.6 billion in 1984 to $172 billion in 1987. Again, a large increase.

It would seem to follow that the net income of these subsidiaries would also increase. In fact, the IRS reports that collective net income fell from $1.6 billion in 1984 to $219 million in 1987. This is how much was reported for tax purposes.

Why, if their profits were falling like this, did foreign investors increase their purchases of companies in the United States? Why is it that while their receipts and assets are increasing, their net income, their profits, are decreasing?

Does it mean that these firms are getting worse at managing their companies, or better at arranging their books so that they show less taxable income?

I would like to illustrate these points with some charts.

This first chart shows foreign-controlled U.S. corporation assets in billions of dollars. In 1984, and these are the figures of the Department of the Treasury, their assets were $553 billion. In 1985 they went to $656 billion, in 1986, to $841 billion, and in 1987, $950 billion.

The next chart illustrates foreign-controlled U.S. subsidiaries' receipts in billions of dollars. In 1984 they were $459 billion; 1985, $514 billion; 1986, $543 billion; and in 1987, $650 billion. That is gross receipts.

The next set of charts shows Japanese-controlled United States corporation assets in billions of dollars. In 1984 they were $65.6 billion. In 1985 it went to $81.1 billion. If one has been reading the newspapers, that is not exactly a surprise, because foreign investors have purchased many U.S. buildings and companies. In 1986 it was $132.8 billion. In 1987, and it has gone higher since then, but this is the latest Department of the Treasury figure I have, it was $172 billion.

Moving to the other chart, we see Japanese-controlled United States corporations' receipts in billions of dollars. In 1984 they were $112 billion; 1985, $133 billion; it drops to $126 billion in 1986; it then shot up in 1987 to $184.9 billion in receipts.

So we see assets going off the chart to $87 billion. We see corporate receipts going up off the chart. I am sure every American would like their assets to be going up the same way.

□ 1050

This final chart shows Japanese-controlled United States corporations' net income, as reported to the IRS for tax purposes. It shows in 1984 net income was $1.8 billion. In 1985 it dropped to $1.3 billion in the midst of the economic recovery and prosperity under the Reagan administration, and as the economy continued to grow in this country their receipts dropped to $629 million. Then in 1987, in the heyday of the economic recovery, their receipts were $219 million.

The previous chart showed assets increasing. But the next chart shows as assets increased, net income decreased. As one goes up the other goes down.

I think this points to a problem. I think when Members focus on this they will agree that there may be a problem.

I think these statistics raise another issue—about who is providing advice to these foreign subsidiaries.

Obviously, the fact that some Members of Congress and the IRS are now focusing on tax avoidance by foreign subsidiaries means that those foreign subsidiaries that owe substantial back taxes are nervous. It means a lot of money to them. And, if the past is any guide, these foreign subsidiaries may spend big lobbying Congress to try to lessen the repercussions.

I believe that every company should be able to have access to legal advice and to accounting advice. But firms operating in this country also have an obligation to pay taxes. States? We are talking about possible tax evasion to the tune of $25 billion, and this would seem to be more than just creative accounting. And it has occurred while the countries that these parent companies are from have been building up huge trade surpluses with the United States.

Concerns have been raised that a lobbying effort might be waged in an attempt to divert attention from this tax issue, and it is probable that some of the lawyers and lobbyists that the foreign-owned subsidiaries will look to for help will be former top-ranking Federal officials. These former officials were educated and learned about the workings of the government at the expenses of the taxpayers of this country.

I am a lawyer, and I have worked here in Washington for years, so I am not naive about these matters. But I have become concerned about foreign lobbying since the Toshiba case, when this Congress was basically rolled by foreign interest, to the detriment of the American public.

I am not going to take the time of the House to rehash all of the details of the diversions of sensitive milling equipment by a subsidiary of Toshiba and a Norweigian company to the Soviet Union. But basically Congress

was rolled by the lobbyists representing foreign interests, and the company involved got nothing more than a slap on the wrist.

Originally, Congress would have put a 3-year ban on U.S. sales by the parent Toshiba company, a ban which would have cost them $2.5 billion. After the lobbying of former high-ranking U.S. officials, the final version of the Omnibus Trade Act included only a 3-year ban on imports from the subsidiary Toshiba Machine, which would cost them about $300 million. At the same time that Toshiba claimed innocence, the company was negotiating the sale of another sensitive technology to another East Bloc country. The total cost to the Navy to regain our advantage in submarine technology ranges in the billions of dollars. And we may never be able to calculate the cost to our national security.

As Members will recall, Toshiba sold high-technology equipment to the Soviet Union which enabled the Soviet Union to develop a quiet propeller. Our Navy used to be able to hear the Soviet subs 100 miles off the coast, and after Toshiba sold this high-technology information to the Soviet Union that range was reduced to about 10 miles. They sold it for $12 million, literally 30 pieces of silver. It was disappointing to see that activity. There were articles in the newspaper saying that Toshiba did not do it. Saying that if they did it, they apologized and that they were sorry. Then we found out that they were at the same time negotiating with another East bloc country to sell some other militarily sensitive equipment.

I might say that this technology endangered the lives of American sailors on submarines and the national security of the United States. To make up for the difference, it would cost anywhere from $6 billion to $10 billion to $30 billion.

I would hope that the Congress and the administration learned something from the Toshiba case, and that it will never, ever be repeated. Many in Congress are watching very closely any similar lobbying effort on behalf of foreign-owned subsidiaries that are avoiding taxes. Personally, I am concerned about what some of these former top-level U.S. officials are doing once they leave office. But it is very difficult to pass laws to regulate ethics in that area.

I do not want to attack anyone personally. I would like to give these individuals the benefit of the doubt—they may think that they are just doing a job and are not working against America's best interests.

In all fairness, on the Toshiba case reasonable men and women could differ. What we are talking about is what takes place in the future.

But the American people could have legitimate concerns about former top officials who gain the public trust and learn the ins and outs of government while being paid by the taxpayers, then go out to represent foreign interests.

To give you an idea of the magnitude of this foreign lobbying, congressional testimony last year suggested that the lobbying efforts of Japan was more than the combined budgets of America's five top industry organizations—the U.S. Chamber of Commerce, the National Association of Manufacturers, the Business Roundtable, the Committee for Economic Development, and the American Business Conference.

The foreign lobbying issue troubles many people in and out of Congress, and some have called for a new ethic in Washington. Many people believe there ought to be a new ethic beginning now to see that perhaps some of the abuses of the past do not take place in the future.

One of the major concerns that I have about this foreign subsidiary tax avoidance matter is the effect that it has on the competitiveness of American business. If you and I are in the same business, and I pay taxes and you don't, you will have a huge competitive advantage. If the corporate tax rate is 34 percent, then you will have 34 percent more of your income to spend on research and development, marketing, investment in new plant and machines, and so on. You here talk about the competitive disadvantage because of the cost of capital in this country—well that difference is small compared with this. Every business man and women who pays taxes in this country and has faced competition from foreign subsidiaries would have a right to be incensed about this.

There ought to be a level playing field. We all ought to be treated exactly equal.

□ 1100

There are also wider competitiveness repercussions. The Commerce Department reports that foreign-owned subsidiaries are much more likely than American companies to import finished products or parts from abroad. Thus, if they have more money to spend because of tax avoidance, they will be able to import more—this adds to our trade deficit. The figures on imports by foreign affiliates in this country are significant.

A Deputy Assistant Secretary of Commerce testified recently that in 1987 imports for foreign affiliates in the United States accounted for 35 percent of all imports, and 26 percent were imported directly from the affiliate's parent company. For Japan, the data is even worse: imports by Japanese affiliates in the United States account for 81 percent of total imports from Japan.

Several experts on transfer pricing cases suggest that a realistic estimate of the amount of unpaid taxes that the United States could recover in this area is $50 billion. This figure represents about $10 billion a year that could be collected for each year since 1985, plus interest on the unpaid taxes.

If there is delay in going after the unpaid taxes, however, the actual recovery could be much less, because of statute of limitations problems.

It is time for the Commissioner of the Internal Revenue Service to establish a strike force to investigate and, if the evidence supports it, to prosecute these cases. This strike force should be made up of experienced and talented tax auditors and attorneys, and the IRS should be given the authority to hire outside audit teams and tax experts to match up against the hired guns that will be representing the foreign-owned subsidiaries.

The Treasury appropriations bill that the House passed on July 13 included an amendment that I offered at full committee that provided the IRS with $10 million above last year's levels for its international enforcement activities and targeting foreign subsidiaries. These funds should be used to set up an expert strike force, and to target those foreign-owned subsidiary cases where the American people can recover the largest amount of unpaid taxes.

Frankly, the IRS, the Treasury Department, and the Congress should know that the American people will demand that these taxes be paid and that there be every type of aggressive activity to be sure that the IRS is supported in doing their job to collect these taxes.

I know that the Ways and Means Committee is looking at several substantive changes to the Tax Code to address the foreign subsidiary problem. I commend the committee on having the foresight to look into this issue, and I would encourage timely action on the substantive tax issues.

For the present, the Internal Revenue Service should set up a strike force to aggressively pursue the unpaid taxes of these foreign subsidiaries. Our tax system depends upon citizens complying with U.S. tax laws and everyone paying his or her fair share of taxes. Foreign-owned subsidiaries that come to this country to take advantage of U.S. workers and infrastructure and markets and do not pay taxes should be vigorously prosecuted.

The American taxpayer deserves nothing less.

As Congress and the administration continue to deal with the issue, it is important to remember what happened during the Toshiba case. Special

interest lobbying should not be permitted to distort this issue.

Let me say that one more time. Special interest lobbying should not be permitted to distort the issues, and the companies involved should be dealt with fairly and justly on the merits of their compliance with the U.S. tax laws. They ought not be dealt with in a negative way because they are foreign-owned. As I said earlier, many foreign-owned companies are good for this country and are law abiding and very beneficial. No negative action or repercussion should be taken just because they have foreign parent companies. But all we are asking is that they be treated exactly the same as American businesses.

We should give the IRS the support it needs to collect any taxes owed to the Federal Government and I hope my colleagues will take a close look at this issue and consider how the Congress can offer that support.

A TRIBUTE TO RICHARD CYERT

The SPEAKER pro tempore (Mr. PAYNE of Virginia). Under a previous order of the House, the gentleman from Pennsylvania [Mr. COYNE] is recognized for 5 minutes.

Mr. COYNE. Mr. Speaker, one of the most distinguished individuals in my hometown of Pittsburgh, Richard Cyert, retired this summer as president of Carnegie Mellon University.

Frankly, my reaction when I first heard that he was going to retire was: it is hard to imagine Carnegie Mellon without Dick Cyert at the helm. He started as an instructor there in 1948, back in the days when it was known as the Carnegie Institute of Technology. His very impressive career has been based there ever since, and he has served as president for 18 years.

Carnegie Mellon University has grown and prospered under his leadership. Indeed, one of the most important reasons that it is a world-class academic institution is Dick Cyert.

Dick has a reputation not only as a successful university administrator, but also as a highly respected economist. He has written and edited many books and articles on economics, some of which have become internationally recognized as landmarks in their field.

Among his greatest contributions to economics have been in oligopoly theory. "My first paper," he once recalled, "tested the hypothesis that oligopolists followed price changes during the upswing but not during the downswing of a business cycle." His work in this area eventually led to one of the classics in economics, "A Behavioral Theory of the Firm," which Dick cowrote with James March in 1963.

An indication of Dick's accomplishments is the number of honors he has received over the years. They include the Hofstra Distinguished Scholar Award, the University of Minnesota's Outstanding Achievement Award, a Ford Foundation Resident Faculty Fellowship, and a Guggenheim Foundation Fellowship.

Dr. Cyert is also a citizen of Pittsburgh in the best and fullest sense. No one has done more for the economic and intellectual life of our city than Dick Cyert.

Many of us remember the bad economic slump in Pittsburgh in the early 1980's. Dick was one of our local leaders who understood the gravity of our problems and helped devise the strategies we needed for economic renewal. He worked with others in private industry, the public sector, and the academic community to turn things around. Pittsburgh is now enjoying an economic renaissance, with a high-technology base that puts us in a strong position for the future. We are lucky to have had the vision and tenacity of Dick Cyert and his colleagues.

Many of us will miss our frequent meetings and conversations with Dr. Cyert—but after all, he has accomplished—he certainly deserves a full and happy retirement. I know that all Pittsburghers join me in paying tribute to Richard Cyert, thanking him for all he has done, and wishing him the very best.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Member (at the request of Mr. WOLF) to revise and extend his remarks and include extraneous material:)

Mr. GINGRICH, for 60 minutes today, September 10, 11, 12, 13, and 14.

(The following Members (at the request of Mr. ALEXANDER) to revise and extend their remarks and include extraneous material:)

Mr. NELSON of Florida, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. STARK, for 5 minutes, today.

Mr. HUCKABY, for 5 minutes, on September 7.

Mr. RICHARDSON, for 5 minutes, on September 11.

Mr. MCMILLEN of Maryland, for 5 minutes, today.

(The following Member (at the request of Mr. DARDEN) to revise and extend his remarks and include extraneous material:)

Mr. COYNE, for 5 minutes today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Member (at the request of Mr. WOLF) and to include extraneous matter:)

Mr. LEACH of Iowa.

(The following Member (at the request of Mr. ALEXANDER) and to include extraneous matter:)

Mr. ROE.

Mr. NELSON of Florida.

Mr. TORRES in two instances.

Mr. LANTOS.

ADJOURNMENT

Mr. WOLF. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 11 o'clock and 5 minutes a.m.) under its previous order, the House adjourned until Monday, September 10, 1990, at 12 noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

3817. A letter from the Director, Office of Management and Budget, transmitting notification of the President's intent to exempt all military personnel accounts from sequester, if a sequester is necessary, pursuant to 2 U.S.C. 903; to the Committee on Appropriations.

3818. A letter from the Commission on Alternative Utilization of Military Facilities, transmitting the Commission's second report on alternative utilization of military facilities, pursuant to Public Law 100-456, section 2819(b)(4) (102 Stat. 2120); to the Committee on Armed Services.

3819. A letter from the Deputy Assistant Attorney General, Civil Rights Division, Department of Justice, transmitting the 1989 annual report regarding the Department's enforcement activities under the Equal Credit Opportunity Act, pursuant to 15 U.S.C. 1691f; to the Committee on Banking, Finance and Urban Affairs.

3820. A letter from the Secretary of Education, transmitting a copy of final regulations—chapter 1 State operated or supported programs for Handicapped Children Program, pursuant to 20 U.S.C. 1232(d)(1); to the Committee on Education and Labor.

3821. A letter from the Assistant General Counsel, Department of Energy, transmitting notice of a meeting related to the International Energy Program to be held on Thursday, August 30, 1990, at the OECD, in Paris, France; to the Committee on Energy and Commerce.

3822. A letter from the Acting Assistant Secretary of State, transmitting the President's Memorandum of Justification that it is important to United States security interests to authorize certain arms sales to Saudi Arabia, pursuant to 22 U.S.C. 2364(a)(1); to the Committee on Foreign Affairs.

3823. A letter from the Assistant Secretary of State for Congressional Relations, transmitting a copy of Presidential Determination 90-36 concerning emergency military sales to Saudi Arabia, pursuant to 22 U.S.C. 2364(a)(1); to the Committee on Foreign Affairs.

3824. A letter from the Deputy Associate Director for Collection and Disbursement, Department of the Interior, transmitting notice of proposed refunds of excess royalty payments in OCS areas, pursuant to 43 U.S.C. 1339(b); to the Committee on Interior and Insular Affairs.

3825. A letter from the Deputy Associate Director for Collection and Disbursement, Department of the Interior, transmitting notice of proposed refunds of excess royalty payments in OCS areas, pursuant to 43 U.S.C. 1339(b); to the Committee on Interior and Insular Affairs.

3826. A letter from the Deputy Associate Director for Collection and Disbursement,

Department of the Interior, transmitting notice of proposed refunds of excess royalty payments in OCS areas, pursuant to 43 U.S.C. 1339(b); to the Committee on Interior and Insular Affairs.

3827. A letter from the Secretary, Department of Transportation, transmitting a report on options to prevent exotic species from entering U.S. waters in ships' ballast water, pursuant to Public Law 101-225, section 207(a) (103 Stat. 1913); to the Committee on Merchant Marine and Fisheries.

3828. A letter from the Assistant Secretary for Legislative Affairs, Department of State, transmitting a draft of proposed legislation to extend the deadline by which foreign nations must meet the requirements of the Marine Mammal Protection Act, to limit the embargo of tuna and tuna products from embargoed nations, and for other purposes; to the Committee on Merchant Marine and Fisheries.

3829. A letter from the Secretary of Commerce, transmitting the annual report on the activities of the Economic Development Administration for fiscal year 1989, pursuant to 42 U.S.C. 3217; to the Committee on Public Works and Transportation.

3830. A letter from the Secretary of Defense, transmitting the report on Department of Defense procurement from small and other business firms for the period October 1989 through June 1990, fiscal year 1990, pursuant to 15 U.S.C. 639(d); to the Committee on Small Business.

3831. A letter from the Secretary of Veterans' Affairs, transmitting the biennial report of the Advisory Committee on Former Prisoners of War, pursuant to 38 U.S.C. 221(c); to the Committee on Veterans' Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. DINGELL: Committee on Energy and Commerce. H.R. 5267. A bill to amend the Communications Act of 1934 to provide increased consumer protection and to promote increased competition in the cable television and related markets, and for other purposes; with an amendment (Rept. 101-682). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. GAYDOS:

H.R. 5554. A bill to direct the Administrator of the Small Business Administration to amend Federal regulations to provide eligibility for media and similar business concerns to participate in financial assistance programs administered by the Small Business Administration; to the Committee on Small Business.

By Mr. SLAUGHTER of Virginia:

H.R. 5555. A bill to expand the boundaries of the Fredericksburg and Spotsylvania County Battlefields Memorial National Military Park; to the Committee on Interior and Insular Affairs.

H.R. 5556. A bill to amend title 28, United States Code, to make changes in the composition of the eastern and western districts of Virginia; to the Committee on the Judiciary.

By Mr. STARK:

H.R. 5557. A bill to amend the Internal Revenue Code to disallow a deduction for interest paid or accrued on late paid taxes; to the Committee on Ways and Means.

By Mr. WEISS:

H.J. Res. 648. Joint resolution to designate the month of October 1990 as "National AIDS Awareness and Prevention Month"; to the Committee on Post Office and Civil Service.

By Mr. LEHMAN of Florida:

H. Con. Res. 365. Concurrent resolution providing for a joint session of Congress to receive a message from the President; considered and agreed to.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 173: Mr. VALENTINE, Mrs. BOXER, Mr. SHUMWAY, Mr. GUARINI, Mr. MAVROULES, and Mr. SLATTERY.

H.R. 661: Mr. COYNE.

H.R. 2608: Mr. SMITH of New Jersey.

H.R. 3355: Mr. DE LUGO and Mr. PENNY.

H.R. 3520: Mr. HAYES of Louisiana.

H.R. 3547: Mr. HOLLOWAY.

H.R. 3979: Mr. PAYNE of New Jersey, Mr. BROWN of California, and Mr. DWYER of New Jersey.

H.R. 4147: Mr. WEISS and Mr. DYSON.

H.R. 4250: Mr. DEFAZIO.

H.R. 4300: Mr. MCGRATH.

H.R. 4369: Mr. SPRATT, Mr. STALLINGS, Mr. GALLO, and Mr. SUNDQUIST.

H.R. 4492: Mr. GORDON and Mr. MCGRATH.

H.R. 4575: Mrs. BENTLEY.

H.R. 4652: Mr. KASTENMEIER, Mr. OLIN, Mr. RINALDO, and Mrs. SCHROEDER.

H.R. 4864: Mr. MOAKLEY, Mrs. MEYERS of Kansas, Mr. ROE, Mr. BORSKI, Mr. MARKEY, Mr. SMITH of Vermont, Mr. ECKART, Mr. BEREUTER, Mr. FOGLIETTA, Mr. CONTE, and Mr. CROCKETT.

H.R. 4865: Mrs. MEYERS of Kansas, Mr. ROE, Mr. BORSKI, Mr. MARKEY, Mrs. MORELLA, Mr. SMITH of Vermont, Mr. BEREUTER, Mr. FOGLIETTA, Mr. CONTE, and Mr. CROCKETT.

H.R. 5306: Mr. BONIOR, Mr. BOSCO, Mr. FOGLIETTA, Mrs. JOHNSON of Connecticut, Mr. JOHNSON of South Dakota, Mrs. KENNELLY, Mr. RAVENEL, Ms. SCHNEIDER, Mr. WELDON, and Mr. YATRON.

H.J. Res. 509: Mr. HERTEL, Mrs. KENNELLY, Mr. HUGHES, Mr. VOLKMER, Mr. VENTO, Mr. GUNDERSON, Mr. CHAPMAN, Mr. SYNAR, Mr. HALL of Texas, Mr. OXLEY, and Mr. KASICH.

H.J. Res. 525: Mr. GEREN, Mr. FAZIO, Mr. MILLER of California, Mr. HAYES of Illinois, Mr. BERMAN, Mr. GILMAN, Mr. POSHARD, Mr. INHOFE, Mr. ROSE, Mr. DENNY SMITH, Mr. HATCHER, Mr. SCHUMER, Mr. TRAFICANT, Mr. YATRON, and Mr. NEAL of North Carolina.

H.J. Res. 616: Mr. VANDER JAGT, Mr. VENTO, Mr. GILMAN, Mr. DORNAN of California, Mr. DOUGLAS, Mr. MATSUI, Mr. NOWAK, Mr. WHITTEN, Mr. BENNETT, Mr. SAWYER, Mr. MCCLOSKEY, Mrs. LLOYD, Mr. BROWDER, and Mr. HAMMERSCHMIDT.

H.J. Res. 632: Mr. RAHALL.

H. Con. Res. 329: Mr. GRANT.

H. Res. 312: Mr. WELDON, Mr. WOLF, Mr. SERRANO, Mr. KLECZKA, Mr. PASHAYAN, Mr. GEJDENSON, Mr. FRENZEL, and Mr. JONES of North Carolina.

H. Res. 411: Mr. RANGEL.

PETITIONS, ETC.

Under clause 1 of rule XXII,

225. The SPEAKER presented a petition of Board of Chosen Freeholders, Toms River, New Jersey, relative to the Reedy Creek area; which was referred to the Committee on Merchant Marine and Fisheries.

EXTENSIONS OF REMARKS

ENDANGERED SPECIES ACT "TOO TOUGH," LUJAN SAYS

HON. MEL LEVINE
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES

Thursday, September 6, 1990

Mr. LEVINE of California. Mr. Speaker, Earth Day has come and gone, but the need for environmental education goes on and on.

Take the recent comment by Secretary of the Interior Manuel Lujan that the Endangered Species Act is "too tough" which was prompted in part by the controversy in Arizona over protecting the endangered red squirrel. In an interview, Secretary Lujan went on to ask "do we have to save every subspecies" and to comment that "nobody's told me the difference between a red squirrel, a black one, or a brown one."

The answer to his question is, of course, we need to save every subspecies and, yes, there are important differences among squirrels and the millions of other species and subspecies on the planet. It is precisely this multitude of species and genetic differences which we are trying to save.

There are a number of very good, practical reasons for such a policy. Genetic diversity is crucial to every source of all of mankind's food, including the organisms which support the plants and animals we consume.

In an outstanding essay for the Los Angeles times, Sunday May 13, Prof. Donella Meadows of Dartmouth College outlines the case for biodiversity and answers Secretary Lujan's about saving the species.

The House is currently considering H.R. 1268, the National Biological Conservation and Environmental Research Act, which I am an original cosponsor of and which addresses the critically important issue of preserving species diveristy. We need this legislation and we need the administration's recognition of this deeply important issue.

Toward this end, I submit for the RECORD, the Meadows essay and an article including Secretary Lujan's comments:

[From the Los Angeles Times, May 12, 1990]

ENDANGERED SPECIES ACT "TOO TOUGH," LUJAN SAYS

(By Rudy Abramson)

WASHINGTON.—Under mounting pressure to protect the embattled Mt. Graham red squirrel in Arizona, the squawfish in Colorado and the spotted owl of the Pacific Northwest, Interior Secretary Manuel Lujan Jr. has suggested that Congress take a look at the Endangered Species Act to see whether it is unnecessarily restrictive.

Lujan's comments in a copyrighted interview in Friday's Denver Post incited an uproar from environmentalists, who interpreted them as a call for weakening the federal protection of a host of endangered plants and animals.

After an interview at Mesa Verde National Park in Colorado, the newspaper quoted the secretary as saying that the law "is just too tough," questioning whether endangered species must be protected in every locale where they exist, and asking: "Do we have to save every subspecies?"

The reaction was swift, with environmentalists accusing the secretary of insensitivity and creeping "Wattism," a reference to Ronald Reagan's Interior secretary, James G. Watt, who resigned after developing a reputation as notoriously anti-environment.

"We are incensed that the very Cabinet official whose job it is to be the country's front-line protector of endangered wildlife would make such outrageous statements," said National Wildlife Federation President Jay D. Hair.

"Secretary Lujan was quoted as saying that nobody has told him the difference between a red squirrel, a black one, or a brown one, and whether we have to save every subspecies," Hair added. "I would gladly meet with the secretary to provide him with a much-needed education about the importance of biodiversity."

The proximate cause of Lujan's criticism of the act apparently was a fight between scientists supporting construction of a $200-million telescope atop Mt. Graham in Arizona and environmentalists trying to protect the habitat there of 100 or so red squirrels confronting extinction.

The squirrels, Lujan said, presented "the best example" of the dilemma presented by the act's requirements and the interests of development. "Nobody's told me the difference between a red squirrel, a black one, or a brown one," he told the newspaper.

Opposing forces in the Arizona struggle have gone to court and two biologists for the Interior Department's Fish and Wildlife Service have said in depositions that their superiors ordered them to prepare reports stating that the squirrels and the telescope could coexist on Mt. Graham.

Lujan's complaint that the Endangered Species Act makes no provision for economic considerations came during the same week that the Interior Department was forced to suspend work on a Western water project because of scientists' concern over a protected fish.

The Department's Bureau of Reclamation put an indefinite hold on a $589-million Colorado reservation project after scientists for the Fish and Wildlife Service concluded it would threaten the survival of the Colorado squawfish, a large member of the minnow family.

Some $9 million already had been invested in the $589-million reservoir, which is designed to provide water for irrigation, for municipal supplies in southwestern Colorado and for Ute Indian tribes. Environmentalists hailed the action, but critics ridiculed the protection of a species regarded locally as a trash fish.

Lujan said the project will be restudied, and he argued that consideration should be given to the fact that the squawfish exists in other places far from the contested Animas-La Plata project.

Just hours before his Colorado interview, Lujan was asked by San Bernardino City Attorney James F. Penman to stop malathion spraying around the city until it could be determined whether threatened and endangered species would be harmed by the chemical war on Medflies.

Lujan declined, and an Interior Department spokesman called Freeman's request an attempt to make political use of the act.

Steven Goldstein, Lujan's press secretary, denied Friday that the secretary was calling for a weakening of the Endangered Species Act, saying he was expressing mounting frustrations caused by efforts to enforce it.

The secretary, he said, is concerned that the law is being missued to block economic development. Rather than calling for a weakening of it, Goldstein said, Lujan would like Congress to review how it applies to the protection of subspecies and officially endangered species that exist in more than one locale.

"He is suggesting," Goldstein said, "that Congress might want to examine it to determine whether it is being implemented for the purpose for which it was intended."

Lujan's remarks seemed certain to add fuel to the already furious debate over protection of the spotted owl in Washington, Oregon and Northern California.

Environmentalists and timber interests have battled over the issue of restricting logging in century-old forests that provide the habitat of the 1,500 pair of breeding owls still believed to exist.

The spotted owl currently is not listed as endangered, but a study by the Fish and Wildlife Service has been under way for months. An announcement is expected next month on whether the owl will be put on the list, a move that timber interests contend would have massive economic repercussions.

[From the Los Angeles Times, May 13, 1990]

PRESERVING BIODIVERSITY IS PROTECTING LIFE ON EARTH

(By Donella H. Meadows)

PLAINFIELD, NH.—The ozone hole and the greenhouse effect have entered our public vocabulary, but we have no catchy label for the third great environmental problem of the late-20th Century. It's even more diffuse than depletion of the ozone layer or global warming, harder to grasp and summarize. The experts call it "the loss of biodiversity."

Biodiversity obviously has something to do with pandas, tigers and tropical forests. But preserving biodiversity is a much bigger job than protecting rainforests or charismatic magafauna. It's the job of protecting all life—microscopic creepy-crawlies as well as elephants and condors—and all life's habitats—tundra, prairie and swamp as well as forests.

Why care about red squirrels, for instance?

"Do we have to save every subspecies?" asked the U.S. Interior secretary, Manuel Lujan Jr., on Thursday. He called for changes in the Endangered Species Act, because it is blocking construction of a $200-million telescope on Mt. Graham in Arizona, the habitat for about 180 endangered red squirrels.

Why care about tundra, swamp, blue beetles or little bluestem grasses? Ecologists give three reasons, which boil down to

simple self-interest on three levels of escalating importance.

Biodiversity has both immediate and potential economic value. This is the argument most commonly put forward to defend biodiversity, because it's the one our culture is most ready to hear. It cites the importance of the industries most directly dependent upon nature—fisheries, forestry, tourism, recreation and the harvesting of wild foods, medicines, dyes, rubber and chemicals.

Some ecologists are so tired of this line of reasoning that they refer wearily to the "Madagascar periwinkle argument." That obscure plant yields the drugs vincristine and vinblastine, which have revolutionized the treatment of leukemia. About a third of all modern medicines have been derived from molds and plants. The potential for future discoveries is astounding. The total number of species of life is somewhere between 10 million and 30 million, only 1.7 million of which we have named, only a fraction of which we have tested for usefulness.

The economic value of biodiversity is very real, but ecologists hate the argument because it is both arrogant and trivial. It assumes that the Earth's millions of species are here to serve the economic purposes of just one species. And even if you buy that idea, it misses the larger and more valuable ways that nature serves us, even if we never name or harvest its millions of species.

Biodiversity performs environmental services beyond price. How would you like the job of pollinating all trillion or so apple blossoms in New York state some sunny afternoon in late May? It's conceivable, maybe, that you could invent a machine to do it, but inconceivable that the machine could work as elegantly and cheaply as the honeybee, much less make honey on the side.

Suppose you were assigned to turn every bit of dead organic matter, from fallen leaves to urban garbage to road kills, into nutrients that feed new life. Even if you knew how, what would it cost? A host of bacteria, molds, mites and worms do it for free. If they ever stopped, all life would stop. We would not last long if green plants stopped turning our exhaled carbon dioxide back into oxygen. Plants would not last long if a few genera of soil bacteria stopped turning nitrogen from the air into nitrate fertilizer.

Human reckoning cannot put a value on the services performed by the ecosystems of earth. In addition to pollination and nutrient recycling, these services include the cleansing of air and water, flood control, drought prevention, pest control, temperature regulation and maintenance of the world's most valuable library—the genes of all living organisms.

Biodiversity contains the accumulated wisdom of nature and the key to its future. If you ever wanted to destroy a society so thoroughly that there would be no hope of its resuscitation, you would burn its libraries and kill its intellectuals. You would destroy its knowledge. Nature's knowledge is contained in the DNA within living cells. The variety of that genetic information is the driving engine of evolution, the immune system for life, the source of adaptability—not just the variety of species but also the variety of individuals within each species.

Individuals are never quite alike. Each is genetically unique mostly in subterranean ways that will only appear in future generations. We recognize that is true of human beings. Plant and animal breeders recognize it in dogs, cattle, wheat, roses, apples. The only reason they can bring forth bigger fruits or sweeter smells or disease resistance is that those traits are already present in the genes carried by some individuals.

The amount of information in a single cell is hard to comprehend. A simple one-celled bacterium can carry genes for 1,000 traits, a flowering plant for 400,000. Biologist E.O. Wilson says the information in the genes of an ordinary house mouse, if translated into printed letters, would fill all the 15 editions of the Encyclopedia Britannica that have been published since 1768. And each house mouse is slightly different from all the others.

The wealth of genetic information has been selected over billions of years to fit the ever-changing necessities of the planet. As Earth's atmosphere filled with oxygen, as land masses drifted apart, as humans invented agriculture and altered the land, there were lurking within individuals pieces of genetic code that allowed them to defend against or take advantage of the changes. These individuals were more fit for the new environment. They bred more successfully. The population began to take on their characteristics. New species came into being.

Biodiversity is the accumulation of all life's past adaptations, and it is the basis for all future adaptations (even those mediated by human gene-splicers). That's why ecologists value biodiversity as one of the Earth's great resources, as great as oil deposits or topsoils or fresh water. It's why they take seriously the loss of even the most insignificant of species; why they defend not only the preservation of species but the preservation of populations within species, and why they regard the current rate of human-induced extinctions as an unparalleled catastrophe.

We don't know how many species we are eliminating, because we don't know how many species there are. It's a fair guess that at the rate we are destroying habitat, especially, but not exclusively in the tropics, we're pushing to extinction about one species every hour. That doesn't count the species whose populations are being reduced so greatly that diversity within the population is essentially gone. Earth has not seen a spasm of extinctions like this for 65 million years.

Biologists estimate that human beings usurp, directly or indirectly, about 40% of each year's total biological production (and our population is on its way to another doubling in 40 years). There is hardly a place on Earth where people do not log, pave, spray, drain, flood, graze, fish, plow, burn, drill, spill or dump. There is no life zone, with the possible exception of the deep ocean, that we are not degrading. In poor countries biodiversity is being nickel-and-dimed to death; in rich countries it is being billion-dollared to death.

Besides "loss of diversity," biologists have another name for this problem—"biotic impoverishment." What is impoverished is not just biodiversity, it is also the human economy and human spirit. Ecologist Paul Ehrlich describes biotic impoverishment this way: "Unless current trends are reversed, Americans will gradually be living in a nation that has fewer warblers and ducks and more starlings and herring gulls, fewer native wildflowers and more noxious weeds, fewer swallowtail butterflies and more cockroaches, smaller herds of elk and bigger herds of rats, less edible seafood, less productive croplands, less dependable supplies of pure fresh water, more desert wastes and dust storms, more frequent floods and more uncomfortable weather."

Biodiversity can't be maintained by protecting a few species in a zoo, or by preserving greenbelts or national parks. To function properly nature needs more room than that. It can maintain itself, however, without human expense, without zookeepers, park rangers, foresters or gene banks. All it needs is to be left alone.

To provide their priceless polli-nation service, the honeybees ask only that we stop saturating the landscape with poisons, stop paving the meadows where bee-feed grows and leave them enough honey to get through the winter.

To maintain our planet, our lives and our future potential, the other species have similar requests, all of which add up to: Control yourselves. Control your numbers. Control your greed. See yourselves as what you are, part of an interdependent biological community—the most intelligent part, though you don't often act that way.

So act that way, either out of a moral respect for something magnificant that you did not create and do not understand, or out of a practical interest in your own survival.

IRS DISTRICT DIRECTOR IS RETIRING

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 6, 1990

Mr. MICHEL. Mr. Speaker, despite a general belief that IRS employees are out to get the taxpayer, the Internal Revenue Service has many exemplary employees in its ranks. One such employee is Ira Loeb, Director of the Springfield District of the IRS, who recently announced his retirement. Ira is the longest serving director in the history of the Springfield office, and is the recipient of numerous awards such as the prestigious Regional Commissioner's Award and several Assistant Commissioner Awards. His record as a public servent is laudable, and his presence at the helm of the Springfield District IRS office will be missed.

At the time, I would like to insert in the RECORD an article citing Ira Loeb's distinguished career which appeared recently in the State Journal Register.

IRS DISTRICT DIRECTOR IS RETIRING

(By Chris Dettro)

Ira Loeb, the longest-serving director in the history of the Springfield district of the U.S. Internal Revenue Service, announced his retirement Wednesday, saying his successor "will be a lucky man or woman."

Loeb will leave the IRS on Sept. 29. His successor likely will be named before he leaves and will be someone who has come through the IRS' Executive Development Program.

Loeb, who will turn 65 next month, has been director of the district, which stretches from Galesburg to Cairo, since Sept. 1, 1974. He is the third district director in Springfield since the district system was devised.

A reproduction of the commission by President Abraham Lincoln of a Springfield predecessor, William G. Green, as "collector of Internal Revenue for the Ninth Collec-

tion District of Illinois" dated March 4, 1863, hangs behind Loeb's desk.

"I'm not going to relax," Loeb said of his retirement. "I want to do something where I can use the skills I have in some kind of community service work. I just don't know what yet."

Loeb shouldn't be short on offers. He has already served on the United Way, the Combined Federal Campaign, Community Action Agency and the Springfield Jewish Federation while holding his full-time job. He also is a trustee of Temple B'rith Sholom.

He said he and his wife, Lenore, intend to stay in Springfield. "Springfield is our home," he said. "Two of our sons graduated from Springfield High School, and before this we had never lived anywhere longer than four years—12 different cities."

Loeb has occupied an office decorated with pictures of trips to Europe—including pictures he took while serving with the U.S. Army during World War II—for 16 years.

He said his greatest personal accomplishment during that time was overseeing the development of the IRS's Central Area Distribution Center in Bloomington.

"If it hadn't been for that, I probably would have retired five years ago," he said. "In the position of director, it's unusual to do something from the ground up, because most of the buildings and the system are already there and functioning when you arrive."

Tax forms are shipped to a 23-state area from the center. Loeb is responsible for the work of 1,600 employees in 14 offices throughout the district, including the Springfield headquarters on West Washington Street.

"On the tax side, I'd have to say electronic filing is the biggest innovation," he said. "It saves us so much work, and has reduced the input error rate from 20 percent to 3 percent. It's fast and virtually error-free."

More than 70,000 taxpayers filed their returns electronically in the district last year.

Loeb has received numerous awards during his 41-year federal career (25 with the IRS), including three assistant commissioner awards—one of the highest recognitions given to IRS executives. He also received a regional commissioner's award—the highest award given to IRS employees in the Midwest—for his work on the Bloomington distribution center.

Loeb said he is aware that the U.S. tax system is complicated and causes much consternation among taxpayers.

"There have been more than 150 tax law changes by Congress in the 16 years I've been director—some small, some not so small," he said. "We're conscious of the burden on the public, particularly the small businessman.

"But 100 million Americans get to sit down every year at their kitchen table in their own home and compute their share of what it costs to run the country, with no one looking over their shoulder," he said. "And most do it honestly."

If he could do one thing before he retired, he said, "I'd convince the American people we aren't the enemy. The millions of people who pay their taxes are the victims of the few who cheat.

"I'd just like people to understand we're not the bad guys. Talk to the people who have dealt with us. You'll find most have been pleasantly surprised."

HONORING JIM JIRSA, RESIDENT OF BALDWIN PARK

HON. ESTEBAN EDWARD TORRES

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 6, 1990

Mr. TORRES. Mr. Speaker, on September 10, 1990, Mr. Jim Jirsa will celebrate his 100th birthday. For this occasion, the community of Baldwin Park will organize a recognition day for him.

When Jim Jirsa and his wife May moved to Baldwin Park in 1945, they encountered turkey ranches, chicken farms, and orange groves. Signs warned of penalties for orange picking and it only cost a nickel to go downtown on the old, electric, red cars. Mr. Jirsa, along with his wife of 73 years, has watched the city's population grow from 16,000 to more than 60,000.

Mr. Jirsa has done more than watch the city change; he has been a dynamic force behind the changes. He set the wheels in motion for the senior citizen's programs by incorporating the Committee on Aging in 1977. A 1908 graduate of Chicago Business College, he has used his background in bookkeeping and accounting to help various community organizations. He served as treasurer for the Committee on Aging, the Senior Citizen Nutrition program and the American Legion in which he is a life member.

In addition Mr. Jirsa also served as a visitor on the Advisory Commission and as recreation and parks commissioner for Baldwin Park. In 1981 he was Senior Citizen of the Year and was honored on the 16th annual Older Americans Recognition Day by the L.A. County Board of Supervisors. He has also worked closely with the Baldwin Park Adult School.

Mr. Jirsa is the last remaining WWI veteran in Barracks No. 1643, the Baldwin Park post for veterans of WWI. In 1918, he was 28 years old and a newlywed of 14 months when he reported to Camp Grant in Rockford, IL. As a member of the 161st Depot Brigade, he worked as an orderly delivering transfers and telegrams for a monthly salary of about $8 after deductions.

Mr. Jirsa attributes his long life to days filled with responsibility both at home and within the community. Also, he says, he drinks milk.

Mr. Speaker, at this time I ask that my colleagues please join me in saluting Mr. Jim Jirsa for his outstanding community efforts in Baldwin Park. As a visible voice in the community, he has been part of the leadership, an active force, for Baldwin Park.

CELEBRATING THE WAYNE MANOR'S SILVER ANNIVERSARY CHARITY BALL

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 6, 1990

Mr. ROE. Mr. Speaker, it is with distinct pleasure that I rise today to pay tribute to a family who has spent 35 years in business faithfully and generously serving the people of my Eighth Congressional District of New Jersey. The Jachera family have been in the restaurant business since 1955 and for the last 25 years have been the proud proprietors of the Wayne Manor which will celebrate its silver anniversary on Friday, September 7, 1990.

To commemorate this event the Wayne Manor will host a charity ball and in typically unselfish behavior all proceeds will be donated by Ted Jachera, owner of the Manor, to two very worthy causes—St. Joseph's Home for the Elderly of the Little Sisters of the Poor in Totowa, NJ and the Huntington's disease unit of the Terence Cardinal Cooke Health Care Center in New York City. Honorary chairman for the ball is His Eminence John Cardinal O'Connor, archbishop of New York.

This silver anniversary notes not only 25 years of successful business, but 25 years of active participation in, and devotion to, a community and individuals who have had the good fortune to have come in contact with Ted Jachera and his family. The two charities which are being benefited by this dinner dance perform a great deal of important work in the area, ensuring that the unfortunate victims of disease and poverty have care and shelter.

The Little Sisters of the Poor dedicate their lives to taking care of the aged poor at St. Joseph's Home for the Elderly. These sisters provide the personal care and spiritual comfort which gives the aged the dignity and kindness which they deserve and so often are denied during the later stages along life's journey. Among the sisters' vows is that of hospitality—welcome of the aged regardless of race, religion, color, or natural origin. Devotion to the care and consolation of your fellow man has no higher calling and is truly God's work.

Huntington's disease is a hereditary brain disorder that slowly erodes the victim's mental capacity and physical control. In 1988, the Archdiocese of New York, under the leadership of John Cardinal O'Connor, established a unit for the care of Huntington's disease patients at the Terence Cardinal Cooke Health Care Center. Care at the Cooke Center is geared to the unique needs of the Huntington's patient. It is believed that this unit will serve as a model for others across the Nation and around the world. The charity ball will help to make the lives of the aged poor and Huntington's disease patients a bit more comfortable and hopeful. What better way to share the joy and success of 25 years in business than by helping those less fortunate.

The Jachera family began its long career in the restaurant business in 1955. Louis Jachera, laid off from work at the Tide Water Oil Co., and knowing that he must provide a living for his family, invested in a tavern called the Hi-Ho Club in Wayne, NJ, and moved his family into the apartment above the club. For 10 years, Louis and Anlela Jachera operated the club with the help of their sons Ted and Stan.

In 1964 Ted and Stan decided to set up their own business in association with Jerry Cardillo who lent his knowledge of the catering business and experience with Sam Cuccinello at the Rustic Lodge and was of tremendous assistance to the Jachera brothers. After a full year of work to complete the original section of the building, the Wayne Manor opened in July 1965. The building consisted of two rooms and an office. The Empire Room on the upper level opened first and was split into two separate rooms—the Princess and Duchess. By the end of the year the downstairs room opened and was called the Manor Room, divided into the Apollo and Venus Rooms.

The official grand opening occurred on August 9, 1965, and was one of the happiest days of Louis Jachera's life. He was able to witness his sons opening their own business. The opening would never have been possible without his proud support and generous financial backing. The HI-Ho Club was sold in October 1965 and Louis only shortly there after died of cancer on November 13, 1965.

The Manor expanded in 1969 adding an extension to the building and currently, after a great deal of hard work and renovations, can accommodate up to 2,000 people. There are eight banquet rooms, five kitchens, and an indoor and outdoor chapel.

In 1977, Ted and Stan Jachera were joined by their brother John who left IBM and began working with them full time at the Wayne Manor and is now in partnership with Ted. Ted's children Kathleen, Robert, and Thomas all work full time in the establishment and plan to continue the family business. John's children Linda and Steven are part-time employees as well.

Stanley Jachera and Jerry Cardillo have since passed away. They are both greatly missed and will always be remembered.

In addition to the coming Silver Anniversary Charity Ball, another silver anniversary was recently held at the Wayne Manor. The Martens, who on August 4, 1965, were the first couple to use the Manor for their wedding reception, renewed their vows on their 25th wedding anniversary. Again, in recognition of and gratitude to the people who have partronized his business over the years, Ted Jachera offered the use of the indoor chapel with his compliments.

Mr. Speaker, it is gestures such as this and the charity ball which often go unnoticed in the community, but they demonstrate the sincerest commitment and devotion to people which responsible businessmen across the Nation should emulate and which this particular community can be proud of. I know that you join with me and the rest of my colleagues in the House in extending my heartiest congratulations to the Jachera family on their achievements and generosity and for their continued success and prosperity.

INTRODUCTION OF A BILL TO MOVE THE COUNTIES OF CULPEPER, LOUISA, AND ORANGE FROM THE EASTERN JUDICIAL DISTRICT OF VIRGINIA TO THE WESTERN JUDICIAL DISTRICT

HON. D. FRENCH SLAUGHTER, JR.

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 6, 1990

Mr. SLAUGHTER of Virginia. Mr. Speaker, I rise today to introduce a bill which will enhance the access to the Federal courts for some 70,000 residents of my congressional district. Specifically, the bill will move the counties of Culpeper, Louisa, and Orange from the eastern judicial district of Virginia to the western district of Virginia.

Currently, litigants and lawyers are required to travel some distance to Alexandria or Richmond to access the Federal court. In light of the distance required to attend court, and the traffic and parking problems associated with such travel, there exists a reluctance to use the Federal court. Since these counties, once moved, would be assigned to the Charlottesville division of the western district, travel to a Federal court will be more convenient thereby enhancing utilization of the court.

The bill has the enthusiastic support of the bar associations of the three affected counties as well as the chief judge of the western district and the resident judge in Charlottesville.

I look forward to working with the Judiciary Committee to move this bill to enactment and provide the relief necessary for the people of Culpeper, Louisa, and Orange.

OLD GLORY

HON. ANDY IRELAND

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 6, 1990

Mr. IRELAND. Mr. Speaker, I rise today to share with my colleagues a fine and stirring poem written by my constituent, Mr. Howard Sessoms of Homeland, FL.

I met Mr. Sessoms while I was traveling in my district this summer. We visited, and he gave me a copy of a poem he had written about that great symbol of freedom, the American flag.

As I reflect on the debates we had earlier this year about the so-called right to desecrate our flag, I wish that all of my friends here in the Congress could see the wisdom contained in this simple poem by a true patriot.

Mr. Speaker, with the House's permission, I wish to reprint "Should We Burn The Flag."

SHOULD WE BURN THE FLAG

Today as I sit and meditate
And think back through the years
Of where we "were" and where we "are" now
I can hardly hold back the tears.

Can we still sing the Star Spangled Banner
Is this still a nation with Pride?
Have we lost all our morals and values?
Seems something in our nation has died.

Our Flag should be a symbol
We should fly it high with Pride
Men have followed it into battle
And for it men have died.

You ask, "should one be allowed to burn it?"
To express a point of view
To really get an answer to your question
Let me tell you what do do.

Ask those who died on Iwo Jima
Or the "Death March" on Bataan
Ask those who died in Korea
Ask those who fell in Viet-Nam.

Ask those entombed in Pearl Harbor
Ask those who were shot from the skies
Ask those who came home with limbs missing
Ask those who came home without eyes.

Ask those who died at Normandy
Ask General McArthur or Ike
Why not ask some of your veterans
Who under this banner did fight.

Now, I am a Pearl Harbor survivor
I've fought for our Flag and our land
And to see anyone that's so disloyal
I'll stand up and condemn any man.

It might be a long-haired hippie
Or someone in tuxedo or rags
But despicable is the man who lives in this land
And burns our American Flag.

Within these lines is an answer
Let your heart and your conscience decide
Should we burn our Star Spangled Banner
For which so many Americans have died?

UNITED STATES-MEXICO FREE TRADE AGREEMENT

HON. DONALD J. PEASE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 6, 1990

Mr. PEASE. Mr. Speaker, President Bush is expected to notify Congress this month that he plans to negotiate a free trade agreement [FTA] with Mexico. In recent hearings on this subject held by the Ways and Means Trade Subcommittee, I expressed certain misgivings I had about a United States-Mexico FTA. I argued that, while an FTA arrangement with Mexico might be good for the overall economic health of both nations, Mexico's low wage base might have a depressing effect on wages in the United States, especially in the manufacturing sector.

Prof. Robert Dunn, a professor at George Washington University, makes a similar case in a Washington Post article, which is printed below. It should be required reading for everyone involved in these bilateral trade negotiations.

[From the Washington Post, Aug. 1, 1990]

LOW-PAID WORKERS WOULD LOSE EVEN MORE IN FREE-TRADE PACT WITH MEXICO

(By Robert M. Dunn, Jr.)

A free-trade pact between the United States and Mexico is being portrayed as little more than an extension of the U.S.-Canada free trade deal of two years ago.

It is no such thing.

Free trade between the United States and Mexico would affect the distribution of income within the United States in ways that need careful consideration before such a system is implemented. The U.S.-Canada

pact did not produce these effects, so this problem did not arise two years ago.

Although free trade between the United States and Mexico would increase total incomes in this country, it would also redistribute income away from unskilled and semi-skilled labor and toward professional and technical labor and capital. Because the "winners" would be people whose incomes are already above average, while the "losers" would start with below average incomes, this arrangement would make the distribution of U.S. incomes more unequal.

This is because of the types of products each country would export to the other, and because of the resulting expansion of some industries and contraction of others. It is an argument first developed 70 years ago by two Swedish economists, Eli Hecksher and Bertril Ohlin.

They noted that when there is free trade between two countries when one has an abundance of labor and the other an abundance of capital, each will export products that use a great deal of its abundant input.

Labor-abundant countries export textiles because that industry uses a great deal of labor. Countries with large amounts of capital export products such as chemicals that require a lot of capital.

In the U.S.-Mexico case, this means that the United States will import labor-intensive goods such as garments and shoes from Mexico and will export capital and professional and technical labor-intensive goods such as computers and machinery. With an underemployed population of about 90 million people, Mexico could produce a huge volume of garments and shoes.

This pattern of trade would mean that labor-intensive industries in the United States would shrink, while capital and technical labor-using industries would expand. The U.S. demand for unskilled and semi-skilled labor would fall, while the demand for capital and for highly educated labor would grow. As a result, U.S. wage rates for unskilled and semi-skilled labor would fall, while returns to capital and to professional and technical labor would rise.

The U.S.-Canada free-trade agreement did not produce this effect because these two countries have very similar economies. U.S. labor is not threatened by competition from Canadians whose wages are similar to those prevailing here, but competition with Mexican labor is a very different matter.

Restraining laid-off workers, with the goal of making them high-income skilled workers, is often seen as the answer, but experience with such programs has been very disappointing. Most of the affected workers have limited educational backgrounds, and many are not young. Despite retraining efforts, they generally have ended up with lower incomes than in the jobs they lost.

There is a solution to this income redistribution problem, but it is difficult to implement. Because total U.S. incomes would undoubtedly rise as a result of free trade with Mexico, the winners would gain more dollars than the losers would lose. This makes it possible for the winners to compensate the losers and still gain. If, for example, half of the population gains $100 each from free trade, while the other half loses $50 per person, the winners could pay the losers $50 each, thus restoring their original incomes, while still having net gains of $50. If those benefiting from free trade with Mexico paid part of their gains as additional taxes, and if the revenues were used to compensate those whose incomes would decline, this would be an arrangement in which nobody loses.

The compensation approach is theoretically simple, but politically and administratively difficult. It implies a more active income redistribution policy from Washington, which is not a politically popular idea. It is also far from easy to measure the gains and losses with precision, so the compensation would be approximate at best. In any event, this approach has never been seriously considered by the Congress as part of U.S. trade policy.

Until it is clear that compensation will be provided, the AFL-CIO and other representatives of labor are correct in opposing the U.S.-Mexico free trade proposals. Most Americans are not unskilled or semi-skilled and would clearly gain from this arrangement, but the losers would be irrational if they did not oppose it.

There is, however, one way in which U.S. labor and the AFL-CIO would gain from free trade with Mexico, but it only partially offsets these income distribution effects.

Because Mexico is on the opposite side of the Hecksher-Ohlin process from the United States, it would export labor-intensive goods, and experience an increase in wage rates. Higher Mexican wages would reduce pressures to emigrate, thus cutting the number of illegal immigrants coming to the United States to compete with U.S. workers.

For years, the AFL-CIO has been looking for ways to reduce competition from foreign workers within our economy, and now it could have one, although it is a very expensive solution to the problem of illegal immigration. It requires trade flows that would reduce U.S. wage rates, which defeats the original reason for trying to keep foreign workers out.

Free trade with Mexico or the free international mobility of labor would produce the same income distribution effects. U.S. wages fall, while those in Mexico rise. The rational AFL-CIO goal is to both avoid free trade and keep foreign workers out of this country.

The United States faces a difficult dilemma in designing a policy for its trade with developing countries. On one hand, this country wants the gains in total income that result from free trade and would also like to encourage the growth of these economies and reduce pressures for their workers to try to come here. On the other side, there is already strong evidence that the distribution of U.S. incomes has become more unequal in the last two decades, and free trade with countries such as Mexico would make that problem worse.

If the United States is going to pursue free-trade discussions with Mexico as well as other Latin American countries, as suggested recently by the White House, serious thought must be given to providing compensation.

TRIBUTE TO JUDGE WILLIAM F. LANAM

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 6, 1990

Mr. LANTOS. Mr. Speaker, I invite my colleagues in the Congress to join me in paying tribute to Judge William F. Lanam, a distinguished justice in the Superior Court of San Mateo County. After 20 years of exemplary judicial service and a notable career of service to the citizens of San Mateo County, Judge Lanam will retire this month.

In the Superior Court, where he has served since January 1973, Judge Lanam was presiding judge, assistant presiding judge, and held other assignments on domestic, juvenile, mental, criminal, and civil calendars. He dealt with a number of complex litigation cases, including the publicized Tinsley desegregation case and the massive Shell oil case involving some 250 insurance companies.

Judge Lanam's service to our community did not begin with his appointment to the Superior Court in 1973. For 2 years prior to that time, he was a municipal court judge in the central district of San Mateo County. During his tenure, he initiated procedures which substantially reduced delays in bringing cases to trial, which has contributed significantly to the current status of San Mateo County courts as having the most up-to-date calendars in the State of California.

While he was executive director of the San Mateo County Bar Association, he developed the private defender program to provide private counsel for accused indigent individuals on trial. Since the inception of the program in 1969, it has been under contract with the San Mateo Board of Supervisors, and it has received awards of merit from the American Bar Association.

Judge Lanam also served as a deputy district attorney in San Mateo County from 1960 to 1962 and again in 1967. From 1962 to 1967 he was in private practice, and during that time he was named as the first juvenile court referee for San Mateo County by a unanimous vote of the Superior Court judges.

William F. Lanam was born in Hawaii on July 28, 1929, but spent his formative years in San Francisco. He graduated from the City College of San Francisco, San Francisco State College, and the University of San Francisco School of Law.

He met his wife while both were students at Commerce High School of San Francisco. They have been married for 40 years and have lived in Burlingame for the past 30 years. They are the parents of 6 children and have 11 grandchildren—all living in the San Francisco Bay Area.

A member and past chairman of the judicial ethics and judicial elections committees for the California Judges Association, Judge Lanam is the author of Judicial Elections Handbook. He formed and coordinated the San Mateo County Committee for Fair Judicial Elections and established the format which has been adopted by other counties throughout the State. He also organized and coordinated the joint committee on mental health and the law, which is comprised of members of the legal and mental health professions. An indication of his concern for others was his selection for the People Who Care Award.

Mr. Speaker, Judge William F. Lanam has been a steadfast and devoted public servant. The citizens of San Mateo County owe him a debt of gratitude for his public-spirited contribution to the courts and government of our area. I urge my colleagues to join me in honoring him now as he retires from the bench. We wish him well now as he pursues other activities.

AG LAB'S DIRECTOR READY FOR RETIREMENT

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 6, 1990

Mr. MICHEL. Mr. Speaker, the Northern Regional Research Center, "Ag Lab" in Peoria, IL, in my district, recently celebrated its golden anniversary. Throughout that time, the "Ag Lab" has been at the forefront of many important discoveries, universal in their applications. Credit for the successes of the Ag Lab goes in no small part to Lambertus Princen who recently retired from his position as director of the Northern Regional Research Center.

His tenure as director has been an exemplary one and he will be definitely missed. I know many share my hope for Dr. Princen's continued success.

At this time I would like to insert into the RECORD the following article which appeared in the Peoria Journal Star.

AG LAB'S DIRECTOR READY FOR RETIREMENT

(By Clare Howard)

Nearly three decades ago Lambertus H. Princen invented a soybean oil-based paint to replace the petroleum-based paint. Today the crisis in the Middle East reinforces the need to end America's dependence on foreign oil.

But Princen, director of the Northern Regional Reserch Center since 1984, is passing on that mission to others. He retired Friday, on his 60th birthday.

"Bert is a charismatic person—colorful, articulate," said William Tallent, former center director and now assistant administrator with the Agricultural Research Service in Washington, D.C.

"Bert played a key role working with Del Schneider in developing the Biotechnology Research and Development Consortium. BRDC is a model cited by all parts of the federal government, especially the Department of Commerce," Tallent said.

The Peoria ag lab is the only one of the four regional U.S. Department of Agriculture research laboratories affiliated with a consortium representing private industry. The goal of the consortium is to coordinate public and private research to bring discoveries to commercialization.

Princen has never walked a company line, never served as a government mouthpiece, his colleagues reported.

Last year, when the oil wars between the soybean industry and the tropical oil industry escalated, Princen made headlines when he said the hoopla was generated by special interest groups. He contended it didn't matter which oil people consume, as long as they consume in moderation.

Princen, a native of Holland, said recently, "In Holland people don't die of heart attacks, and they eat diets high in saturated fats, but they are never fat. They are a much leaner people, and they don't eat or drink as much and they ride bicycles more.

"If you burn all fat by exercise you have less fat to deposit in the heart—whether it's saturated or unsaturated," he said.

Princen also has not held back his criticism of the federal government's farm subsidies. He said the farm bill helps neither farmers nor the public, but is geared for maintaining the status quo.

"The government's very early concept was that food has to be cheap," Princen said. "But the government should not be responsible for making food cheap. If farmers got a higher (market) price for food they would not need government subsidies."

Railroad cars full of produce come into this country every day from Mexico, partly because labor is cheaper in South America and because pesticides are less expensive and more available there, he said.

Some U.S. companies continue to manufacture pesticides that are banned in this country but legal to sell abroad.

"In my mind it is unscrupulous to export chemicals banned in this country," Princen said. "Industrialists ought to have the same code of ethics, but some people do anything to make a buck. It's a question of degree—where one person's scruples start and another's end."

Princen said no classified research is conducted at the lab.

"The only hush-hush work was in cooperation with Thailand and Turkey to develop a poppy with no heroin in it," he said.

Princen received doctorate in physical chemistry from the State University of Utrecht in Holland. He worked as a postdoctoral fellow at the University of Southern California and joined the team of scientists at the ag lab in 1960. He and his wife have one son who is an aeronautical engineer with McDonnell Douglas Corp. in Long Beach, Calif.

In addition to soybean oil-based paint, Princen conducted research on electron microscopy, aerosol filtration, emulsions and particle size analysis.

He supervised research on antitumor agents, vegetable toxicants, new crops for industrial oils and paper production, lubricants, growth stimulators, tissue culture, photosynthesis and cattle feed production. He has published more than 80 research papers and book chapters and edited six books.

In January, Princen will begin teaching a chemistry course at Bradley University.

"I want to give chemistry majors an appreciation of agricultural chemistry and point out their opportunities in agriculture," he said. "This country needs more chemists to enter agricultural fields to keep our food systems safe. Our chemistry graduate students are steered toward medicine and petroleum."

Princen said part of the problem is that the petroleum industry funds scholarship and research in land grant universities in this country.

William Doane is a research leader of the plant polymer unit at the ag lab.

"Dr. Princen and I started here about the same time. He has always been a very strong supporter of research programs and scientists.

"Our center is in the lead among area centers in cooperative agreements with private industry. We are on a roll here, and if rumors are correct and we see an increase budget for product development, we should continue to see a wave of developments. The future looks very bright for the center."

HONORING JACOBO A. MOLINARI, RESIDENT, NORWALK

HON. ESTEBAN EDWARD TORRES

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 6, 1990

Mr. TORRES. Mr. Speaker, on September 13, 1990, Mr. Jacobo Augustine Molinari will celebrate his 90th birthday. On this special occasion, I would like to recognize the accomplishments of my friend, "El Comandante."

Mr. Molinari was born on September 13, 1900, in La Guilla, TX. Long time residents of Norwalk, he and his wife of 65 years, Linda, together have five children; two daughters and three sons.

"El Comandante" served in the Mexican Army at the young age of 13. He served as a first lieutenant from 1913 to 1916. In addition, he served in the U.S. Army as a commanding officer—Army captain—from 1942 to 1945. Because of his fluency in languages—French, German, Latin, Italian, Spanish, and English—he was a tremendous asset during his two military assignments.

Jacobo is a versatile man, having had a number of careers throughout his life and being an active member in many organizations.

A member of the Motion Picture Actors Guild since the 1920's, working in theatre and studios, his agent was Billy Rose until 1932. Jacobo has been an inactive mason since 1933. A retired dental technician for 65 years, he is now retired and is an honorary member of the Dental Technicians Association. Jacobo is a member of the Smithsonian Institute. He also served on the Southeast Area Social Service Funding Authority [SASSFA], "Nutrition Program Advisory Committee" for 8 years. Jacobo served on this committee's executive board for 4 years and has been a volunteer of the Nutrition Program for 8 years.

Jacobo, "El Comandante", has always spoken for the betterment of the senior citizens of Norwalk. An active member of the Senior Citizens Nutrition Program, Jacobo entertains the seniors with songs and poetry, as a host and cashier for the program. Mr. Molinari is an outstanding citizen of the community and serves whenever he is needed.

Mr. Speaker, at this time I ask my colleagues to please join me in saluting my good friend, "El Comandante", Mr. Jacobo Augustine Molinari, for his commendable efforts and achievements in improving his community. As Jacobo's actions stand recognized, I would like to officially wish him a happy birthday.

TRIBUTE TO ST. MICHAEL THE ARCHANGEL CATHEDRAL, PASSAIC, NJ, ON THE CELEBRATION OF ITS 100TH JUBILEE YEAR

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 6, 1990

Mr. ROE. Mr. Speaker, it is with the deepest reverence and the greatest sense of pride that I rise today to salute an outstanding house of worship and parish community in my Eighth Congressional District of New Jersey which, for a full century, has been a spiritual focal point and a beacon of faith for countless numbers of worshipers in the greater northern New Jersey area.

I am speaking of the Cathedral of St. Michael the Archangel in Passaic, NJ, which is celebrating their 100th anniversary in 1990.

This proud and historic occasion will be observed with a special celebration at the church on October 21, which will serve as a tremendous source of pride to all in attendance, and especially the pastor, Rev. Marcel Szabo and parochial vicar, Rev. James G. Hayer.

Mr. Speaker, the history of the Cathedral of St. Michael the Archangel is indeed a rich one. For the benefit of you and our colleagues, I would like to insert for the RECORD the history of this truly fine house of worship:

CHURCH HISTORY

At the end of the 19th century, when the Industrial Revolution was beginning in the United States, many immigrants came from Eastern Europe to work in the coal mines of Pennsylvania and the wool and silk mills of Passaic and Paterson.

In the early years, Byzantine Rite Catholics who immigrated from East Europe relied on a traveling pastor who served worshipers from Pennsylvania to Passaic. However, by 1890, the people of Passaic were able to establish their own church—St. Michael the Archangel—and the Rev. Nicephore Chanath came to serve as their first resident pastor. The church purchased the Evangelical Mission Chapel at the corner of First and Bergen Streets as its first meeting place, and in 1893, expanded the building to accommodate 300 people.

The membership of the church grew rapidly, and by 1902, the church had 600 families. That same year, construction began on a new church on the same site, at 96 First Street. The church was completed in 1905.

In 1917, the church purchased property in South Hackensack for use as a cemetery. Half the land was consecrated in 1921, and in 1936 the remaining half of St. Michael's Cemetery was consecrated.

In 1953, the church purchased, from the city of Washington, School No. 2 at 101 Market Street. The building was completely renovated, which entailed removing the third floor and providing a convent for Sister Servants of Mary, who would staff St. Michael's School. A Ladies Guild was also organized and raised funds to keep the school tuition free.

Ten years later a new diocese, the Eparchy of Passaic, was formed and the first bishop appointed. St. Michael's became the Cathedral—the principal church of the diocese. The church was also renovated at this time. The tall steeples that once stood a top the cathedral became worn and were removed and replaced with domes, and the building was brickfaced. In 1965, St. Michael's Cathedral housed the chancery offices and served as headquarters for the eparchial newspaper, Eastern Catholic Life.

In 1982, the diocese of Passaic bought 19 acres on Lackawanna Avenue in west Paterson as a site for a new diocesan headquarters, bishop's residence, and a cathedral chapel. The bishop's residence and center was completed in August 1986, and St. Michael's Cathedral Chapel in May 1987.

Mr. Speaker, I appreciate the opportunity to present a portion of the history of this distinguished church that remained dedicated to helping others and guiding them spiritually. As the Cathedral of St. Michael the Archangel of Passic, NJ, celebrates its 100th anniversary, I know that you and all of our colleagues here in Congress will want to join me in extending our warmest greetings and felicitations for both the service and guidance it has provided for its community, State, and Nation.

INTRODUCTION OF LEGISLATION TO EXPAND THE BOUNDARIES OF THE FREDERICKSBURG AND SPOTSYLVANIA COUNTY BATTLEFIELDS MEMORIAL NATIONAL MILITARY PARK

HON. D. FRENCH SLAUGHTER, JR.

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 6, 1990

Mr. SLAUGHTER of Virginia. Mr. Speaker, today I am introducing legislation to provide for the protection of Civil War battleground vital to the Battle of Wilderness. The bill authorizes the boundary expansion of the Fredericksburg and Spotslyvania County Battlefields Memorial National Military Park at Wilderness Battlefield to include property that was the site of General Longstreet's successful flank attack of Union troops. The purpose of this legislation is uniquely important. While at first glance it may appear to be just another national park boundary expansion to be considered and implemented like most other expansions, I am pleased to convey otherwise.

As you may know, Secretary of Interior Manuel Lujan recently announced a new initiative to protect Civil War sites. Entitled the American Battlefield Protection Plan, the initiative brings Federal attention to the role that States, localities and private preservation groups must play if we are to effectively preserve our history for future generations. Partnerships between the Government and private sector interests are always beneficial, but rarely do we witness the implementation of this laudable goal.

The bill I have introduced today to foster the preservation and interpretation of Longstreet's flank attack at Wilderness Battlefield is the first step towards making the goal of public-private partnership a reality. Following the unveiling of his American Battlefield Protection Plan, Secretary Lujan toured the site of Longstreet's flank attack which is currently owned by a private developer and slated for housing construction. At that time, the Interior Secretary revealed that the landowner was interested in working with the Park Service, Spotsylvania County officials, and private preservation groups to reach an agreement on the protection of this site.

Although many details have yet to be resolved between these groups, the current plan entails the purchase of land from the developer by a private preservation group so that the property can be held in abeyance until such time as the Department of Interior has the ability to purchase the land. Donation of the property to the National Park Service may also be possible in the long term. The key to making this idea work is the adoption of legislation to permit the inclusion of Longstreet's flank attack in the boundary of Wilderness Battlefield.

The Congress has not been presented with such an agreeable task for Civil War preservation in many years. Rarely do you find an instance where local officials, citizens, the Federal Government and private landowners agree that a solution is possible. While we no doubt have a responsibility to protect our heritage and the lessons learned by a war that tore this Nation apart for some time, we also have the responsibility to the taxpayers of this country. The American Battlefield Protection Plan is a worthy agenda, and the adoption of this legislation would encourage a more prudent approach to Civil War preservation.

THE BEACHWOOD 100

HON. EDWARD F. FEIGHAN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 6, 1990

Mr. FEIGHAN. Mr. Speaker, I rise today to salute the Beachwood, OH Police and Fire Departments. I do so as the Beachwood 100 prepares its own salute on September 16, a salute that goes beyond words to the actual provision of assistance to police and firefighters faced with unusual or extraordinary hardship.

Beachwood is a model city in so many ways. A great place to live, a great place to raise kids, one of the best examples I know of what we all call the "American way of life." Beachwood's assistance program to its police and firefighters is example of what makes Beachwood shine.

The assistance is provided by a group called the Beachwood 100, a group of citizens whose annual dues are used solely to create this aid fund. Any policeman or fireman in Beachwood has the security of knowing that in the event of a medical emergency he can turn to the fund for assistance. Aid comes in the form of a loan or an outright cash grant. The Beachwood 100 is always there.

Mr. Speaker, I am proud of the Beachwood 100 and of its officers. Larry Small, my field representative, is president of the Beachwood 100. I'm proud of the work he does for the 19th Congressional District as my representative and of his work with the Beachwood 100. The other officers are Dr. Seymour Ullman, vice president; Irv Berger, treasurer; Nancy Small, secretary. The board of directors includes Larry Cohn, chairman; Leon Miller, Sol Ronder, Don Kravitz, and Emory Kritzler.

I would also like to recognize each of the fine public servants of the Beachwood Police and Fire Departments:

BEACHWOOD POLICE DEPARTMENT

Chief Robert Abrams.
Deputy Chief Almis Stempuzis.
Lieutenant William Gerz.
Lieutenant Mark Sechrist.
Lieutenant John Corrigan.
Sergeant Dennis Nicklas.
Sergeant Joe Orosz.
Sergeant Gordon Fuchs.
Sergeant John O'Donnell.
Officer Jim Frydl.
Officer David Nank.
Officer Paul Berline.
Officer Alfred Holmberg.
Officer Joseph Bors.
Officer Joseph Ferenczy.
Officer Joel Edelstein.
Officer William Balcom.
Officer Darrell Dunham.
Officer Patrick Sullivan.
Officer Michael Nelson.
Officer Jack Wilson.
Officer Don Breckenridge.

Officer Thomas Karduck.
Officer Roger Curtiss.
Officer Bruce Hof.
Officer Eric Hall.
Officer Thomas Wetzel.
Officer Robert Brininger.
Officer Glen Payne.
Officer Robert Riley.
Officer Lance Burling.
Officer Allan Baumgartner.
Officer Gerol Character.
Officer Keith Winebrenner.
Officer Raymond Swenton.

BEACHWOOD FIRE DEPARTMENT

Chief William Kaselak.
Inspector Dennis Goebelt.
Inspector Howard Wise.
Inspector Thomas Vilt.
Inspector George Ward.
Inspector Robert Wood.
Inspector Patrick Kearns.
Inspector Kenneth Taylor.
Firefighter Frank Gaglione.
Firefighter Alex Kabal.
Firefighter Ron Gennert.
Firefighter Ken Kaplan.
Firefighter David Linn.
Firefighter Peter Priola.
Firefighter Douglas Corwon.
Firefighter Edward Hanzel.
Firefighter John Page.
Firefighter Richard Six.
Firefighter John Urvan.
Firefighter Chris Vatty.
Firefighter Len Sechrist.
Firefighter Dale Cubranich.
Firefighter Kern Swope.
Firefighter Dan O'Connell.
Firefighter Greg Schneider.
Firefighter William Peskura.
Firefighter Ron Serger.
Firefighter Fred Eichorn.
Firefighter Thomas Luskin.
Firefighter Scott Shannon.
Firefighter Dominic Peterre.
Firefighter Scott Schmauder.

A NEW CHINESE PRAGMATISM

HON. JIM LEACH

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 6, 1990

Mr. LEACH of Iowa. Mr. Speaker, for collective security to function efficaciously under the U.N. system, cooperation is necessitated between the Permanent Five Members of the Security Council. Accordingly, one crucial aspect of the Mideast crisis that is deserving of serious note by Congress is the cooperation or at least non-obstructionism of the People's Republic of China in the Security Council at this critical time.

The new era of heightened international cooperation which we all wish to see inaugurated must be hallmarked in theory and in fact by collective security. In what we hope is the post-cold war era the Iraqi crisis is in some ways the second poignant challenge—the first relating to the ongoing civil war in Cambodia.

In both the instance of Iraq and Cambodia the government in Beijing has, perhaps reluctantly and with substantial reservations, nevertheless progressively determined to side with the institutions of international law and order established and propelled by the framers of the United Nations Charter.

It is also worthy of note that this July after a 23 year hiatus, China restored formal diplomatic relations with Indonesia. In addition, within the next several months it is expected that China will normalize relations with Singapore as well.

It is also of significance that Beijing has recently proposed a regional approach to the joint development of the resource rich, but vehemently contested, Spratly islands. Located in the South Sea—roughly equidistant between Vietnam and Malaysian North Borneo—the Spratlys are claimed by Vietnam, China, the Philippines and Malaysia. In contrast with the belligerency implied by the March 1988 Chinese-Vietnamese naval encounter over the contested islands, the Chinese appear today to be attempting to use their enormous regional influence and power to move toward pragmatic reconciliation in Southeast Asia, particularly with those nations associated with the Association of Southeast Asian Nations [ASEAN].

These positive signs of enhanced Chinese cooperation with the United States and the international community in efforts to advance regional stability and global order can only be welcomed by the world at large. The United States not only has an important interest in a humanely governed China which pursues policies of economic and political reform at home, but a China which also plays a responsible role in world affairs. In this regard, it is to be hoped that in the aftermath of the Gulf crisis China will join with the United States and other concerned countries in a sustained international effort to curb the proliferation of chemical, biological, and nuclear weapons and ballistic missiles in the Middle East and elsewhere.

In conclusion, all sovereign countries are ultimately responsible for the formulation of their foreign policy. But from a congressional perspective it is this Member's judgment that to the degree American statecraft has played a role in the give and take of international diplomacy, the basic high-level, open communication approach of the Bush administration vis-a-vis China would appear in large measure to be vindicated.

If there is a lesson for Congress in these challenges of the year, it would appear to be that rhetorical posturing which would close the door on our historical open door policy with China may be solace for the soul but risky to the national interest.

When emergencies arise, when long-simmering disputes reach the point where credible resolution appears possible, leaders must be able to communicate with each other on a basis of mutual respect. It would simply have been disastrous if the United States had followed the siren of congressional perturbations and turned off serious communication with China a year ago.

AIDS AWARENESS MONTH

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 6, 1990

Mr. WEISS. Mr. Speaker, today, I am introducing a resolution designating October 1990 as "National AIDS Awareness Month."

Mr. Speaker, we are now in the second decade of the AIDS epidemic. AIDS is still very much with us; rumors of its decline are false. The U.S. Public Health Service tells us that in 3 years, there would be as many as 225,000 persons living with AIDS and 340,000 will have died.

The Public Health Service also reports that the number of HIV-infected persons who have not yet developed symptoms is continuing to increase. They estimate that one to one-and-a-half million pesons in the United States are infected, and, if a cure is not found, that the vast majority of them will eventually develop AIDS.

In spite of nearly a decade of AIDS research and prevention activities sponsored by the Federal Government and carried out by research labs, health departments and community-based organizations across the country, there still is no cure. Furthermore, prevention strategies have not reached many who are at the greatest risk of being infected.

In spite of these signs and signals that should continue to alarm the entire Nation, the AIDS epidemic is no longer the lead story in the Nation's media.

October has been the month designated as a time for increased efforts on the part of all agencies and organizations involved in the fight against AIDS to publicize the epidemic and raise consciousness about preventing the transmission of HIV.

By designating October "AIDS Awareness Month" we will focus the Nation's attention on this deadly disease. Education is our best weapon against AIDS and is essential to prevent its transmission. "AIDS Awareness Month" can stimulate activities by Federal, State and local agencies, and national and community groups in all parts of the United States to mount a campaign to educate our citizens about the need and the means to prevent the spread of AIDS, to provide compassionate, effective treatment and care to those who are infected, and to find a cure.

Mr. Speaker, I urge all my colleagues to join in this critical effort.

SALUTE TO PASSAIC COUNTY REGIONAL HIGH SCHOOL, LITTLE FALLS, NJ, ON ITS GOLDEN ANNIVERSARY

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 6, 1990

Mr. ROE. Mr. Speaker, it is with the greatest pride and admiration that I rise today to salute a truly outstanding educational institution in my Eighth Congressional District of New

Jersey that has helped mold the lives of young people in the greater northern New Jersey area for half a century.

I am speaking of Passaic County Regional High School of Little Falls, NJ, which is observing the 50th anniversary of its founding. To celebrate this historic event, Passaic County Regional High School will hold a dinner at the school on Wednesday, September 15, 1990. I know that this event will bring great pride to Dr. Louis R. Centolanza, the superintendent of Passaic County Regional High School, and to everyone connected with this great institution.

Mr. Speaker, as a means of providing you and our colleagues with the details of this fine school's rich background, I would like to insert for the RECORD the official history of Passaic County Regional High School:

Passaic County Regional High School opened its doors on September 16, 1940, to some 610 students from Totowa, West Paterson, and Little Falls, NJ. This institution is governed by the Passaic County Regional High School District No. 1 Board of Education which is composed of nine board of education members from Totowa, West Paterson, and Little Falls.

Passaic Valley is committed to the development of the well-rounded individual and has augmented its strong academic program with a wide range of athletic, musical, and literary activities designed to stimulate and encourage the individual growth of each student. The devotion, commitment, and encouragement of the many men and women, who as board members, administrators, teachers, and friends have assisted generations of students in becoming self-directed, aware, and integrated individuals who are capable of continued growth, has made Passaic Valley High School a special place.

The faculty considers this celebration of the 50th anniversary of the school's founding a milestone indicating, not the end of the journey, but rather an experience that will help Passaic Valley Regional High School charter its course into the 21st century. The loyalty and encouragement of so many alumni and friends guide many youths toward a better future.

Mr. Speaker, on behalf of myself and the rest of my colleagues I would like to congratulate the students, teachers, administrators, and board members, past and present of Passaic Valley Regional High School upon the school's 50th anniversary, which has continually aspired to the highest standards of educational excellence and which has most certainly made its community, its State, and our Nation a far better place to live.

RECOGNITION OF KEVIN LOCKE'S 1990 NEA NATIONAL HERITAGE FELLOWSHIP AWARD

HON. TIM JOHNSON

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 6, 1990

Mr. JOHNSON of South Dakota. Mr. Speaker, I rise with pride to announce that one of my constituents, Kevin Locke, of McLaughlin, SD, has just won one of the 13 1990 National Endowment for the Arts National Heritage Fellowship Awards. Mr. Locke is a flute player, singer, dancer and storyteller who lives on the Standing Rock Indian Reservation in the north central part of our home State, and is also a member of the governing body of the American Baha'i religious community.

Mr. Locke is being honored with this award because of his effort to preserve Lakota Sioux courting and flute songs, many of which have already been lost. However, living as a young man with an elderly Lakota-speaking uncle, Kevin learned much about the language and culture of his people. He studied the language and culture of his people, and became determined to save as many of the songs as he could, eventually becoming so proficient that many old people now say that he is a better flute player than those that they remember from days long past.

According to the National Endowment of the Arts citation, "Kevin Locke not only performs and lectures in schools all across the Plains States, he has toured the world, appearing in Canada, China, Spain, and Australia and on tours of Africa nations sponsored by the State Department. His nomination for a National Heritage Fellowship was supported by his own tribal council, the elders of his community, the faculty of the University of South Dakota, where he is pursuing a Ph.D. in Education, and the South Dakota Arts Council—a remarkable grouping that attests to his widespread reputation."

Mr. Speaker, South Dakota is greatly honored by the work of Mr. Locke, and we are especially proud that his many achievements are being recognized by the National Endowment for the Arts with this prestigious award.

IRAQ, THE MIDDLE EAST, AND THE UNITED STATES MILITARY BUDGET

HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 6, 1990

Mr. FRANK. Mr. Speaker, the world has changed in dramatic ways in the past few years, and our budget can be the beneficiary of much of these changes. It is now indisputable that many of our allies who have been the recipients of American subsidy in the form of military support can fully afford to pay their own way. At the same time, we have seen within the past year a very substantial diminuation in the potential military power of the Soviet Union. The Warsaw Pact is no more—Russia has lost all of its allies, and the threat of a Russian led land invasion in Europe is no longer a fact. Moreover, the Soviet Union itself has been substantially weakened by the economic and social crisis which it confronts. America needs to remain strong, with a substantial nuclear deterrent and the capacity to intervene when necessary in trouble spots like Iraq. But it is also clear that, with our allies now able to bear a far greater share of the common burden than they have historically done, and the threat from the Soviets considerably less than it was, we can afford to begin a sustained and reasonable reduction in our own military expenditures.

Some of those who have consistently opposed these reductions are trying to use the trouble in the Middle East as an argument against sensible reductions in American military expenditure which are in fact unrelated to the Middle East.

The Council for a Livable World has done a superb job in recent years in making a balanced and factual case for substantial reductions in our military budget in ways that will not diminish American security at all. During our congressional work period, the council summarized the arguments against those who would use the Iraq situation as a reason to perpetuate unnecessarily high military spending. I think the council has done a very good job once again in rebuting these arguments and in explaining why it is still very much in our national interest to proceed with a sensible set of reductions in the military budget. I believe the Members will profit greatly, Mr. Speaker, from reading these arguments and I ask that the Council of a Livable World summary of them be printed here.

IRAQ, THE MIDDLE EAST AND THE UNITED STATES MILITARY BUDGET

Iraq's invasion of Kuwait is being used to defend a variety of controversial weapons programs and to argue that the U.S. military budget should not be reduced. The U.S. military response instead indicates that it is more essential than ever for the United States to make careful choices among competing programs and priorities, both within the Pentagon and between military and domestic social needs.

Some important points to remember in light of the new international climate:

1. The substantial portion of the military budget devoted to support NATO and to oppose the Soviet military threat can still be substantially reduced. The Pentagon estimates that 60 percent of its total budget—about $170-$180 billion—is oriented towards a European mission. With the Soviet military threat continuing to decline and the disappearance of the Warsaw Pact, that portion remains ripe for cutbacks. The U.S. continues to maintain over 300,000 troops in Europe.

2. The segment of the budget spent on strategic nuclear programs—some 12% to 15%—can be pared back. There is no reason to move to a new generation of land based strategic nuclear missiles. A B-2 stealth bomber at $865 million a copy makes no sense for a conventional role in third world contingencies. The Brilliant Pebbles strategic defense initiative is irrelevant to the Middle East. Beware of politicians who argue, that "With SDI, we can be more aggressive in stopping the hegemony of tyrants like Hussein."

3. The need to transport quickly personnel and supplies to the Middle East highlights the requirement to make policy choices within the military budget. It is evident that transport planes and fast-sealift ships have a critical role to play in third world conflicts. The Pentagon has starved lift capacity in favor of more glamorous systems. Heavy weapons designed to counter the Soviet threat should be deemphasized. Weapons choices should be redirected to systems easier to transport. The U.S. could build many ground support or fighter aircraft for the price of one super-sophisticat-

ed B-2 designed to evade Soviet air defenses (over 40 F-16 Falcons for the price of one B-2). Minesweepers have also been neglected. To his credit, in the midst of the latest Middle East crisis, Defense Secretary Cheney ordered the Navy to halve the number of Seawolf attack submarines planned over the next four years and to build 16 Arleigh Burke class destroyers during that time rather than the original proposed 25.

4. The Pentagon should not use the Middle East crisis to evade the sound "fly before buy" management principle. The Senate Armed Services Committee recently emphasized that concept to guide its decision to defer procurement of the C-17 cargo aircraft because of development and testing delays and to eliminate procurement funding for the A-12 aircraft due to excessive concurrency between development and procurement. A weapons program suffering technical difficulties before the crisis should not be rushed ahead at a higher ultimate cost.

5. The Pentagon can make deep reductions in personnel. The Pentagon has asked to retain 2,038,000 active duty forces for the next fiscal year and 1,096,000 civilians. Even with the deployment of tens of thousands of troops to Saudi Arabia—only a small percentage of active duty forces—troops in Europe and elsewhere should be withdrawn and demobilized. Former Pentagon official William Kaufman points out that a greatly reduced force structure is more than sufficient to meet third world contingencies such as the Middle East. The reserves that may be called up would specialize in transport and supply. The Senate recently approved a plan to reduce military personnel by 100,000 per year for each of the next five years.

6. The expenditures for the troop deployment to the Middle East should be covered by a supplemental appropriations bill next year when the costs are more clearly known. It makes no sense to add money to the fiscal year 1991 military budget without any idea of the eventual costs.

7. The federal budget deficit represents a grave national problem requiring further military budget cutbacks. The most recent estimate by Richard Darman, director of the Office of Management and Budget, is that the federal budget deficit for fiscal year 1991 would be $168.8 billion. That figure does not include costs of the savings and loan bailout or effects on the economy of the oil price hikes and new military expenditures in the Middle East.

8. Protecting U.S. national security means more than spending money on Pentagon weapons programs. Helping Eastern European countries to make the transition from communism to democracy is a productive national security expenditure. So too would be renewing our economic competitiveness, nurturing the technology of the future, strengthening our health care and education systems, rebuilding the infrastructure of the country and adopting an energy policy to lessen our dependence on Middle East Oil.

SOME USEFUL QUOTES

"A new response to a new threat still means less money than it cost to counter the Soviet threat. For now, the military budget remains a political argument, and that argument is going to be settled in the context of domestic spending needs, just as it was before Iraq. It's still going to be easier to cut defense than to cut domestic spending or raise taxes."—Rep. Les Aspin, the New York Times, p. 10, August 12, 1990.

"U.S. military planning during the past 40 years has emphasized combat systems designed to fight against a numerically-superior, increasingly capable Soviet/Warsaw Pact conventional threat. That threat scenario led the military Services to develop increasingly expensive, sophisticated, and heavy combat equipment. The Services—especially the Army and the Marine Corps—have become too heavy and cumbersome to transport. The committee concluded that the Services need to promote research and development to field lighter, more lethal combat forces."—Report of Senate Armed Services Committee on FY 1991 Defense Authorization Bill, p. 23, July 20, 1990.

"The United States has only eight fast sealift ships capable of carrying heavy armored equipment to the gulf in about two weeks . . . Last year, the Pentagon rebuffed Congressional efforts to buy more fast ships. Congress approved $600 million for the vessels, but Defense Secretary Dick Cheney shifted some of the money to other programs. So far, none of the remaining $375 million has been spent."—The New York Times, p. A10, August 14, 1990.

"Everybody is going to be using what is going on in the Gulf as an argument for not cancelling his or her favorite programs."—Phil Friedman, military budget analyst for Paine Webber, The Washington Times, p. A10, August 14, 1990.

"As for domestic debates over specific weapons, the Iraq crisis may turn out to have as much impact on rhetoric as on outcomes, at least in the near term."—Pat Towell, Congressional Quarterly, p. 2596, August 11, 1990.

"The research, development and procurement process for defense has been geared toward early production—a research and buy process. This quick march to production was justified by citing a relentlessly modernizing military in the Soviet Union. That justification no longer exists."—FY91 Defense Authorization Bill: Committee Markup, Summary of Major Actions," House Armed Services Committee report, p. 5, July 31, 1990.

"Pentagon spending needs to be reshaped, and the first step is to curb systems designed to meet the now-shrinking threat from the Soviet Union. Congress and the services find all reductions painful, but the first retrenchments have been made. Secretary Cheney made another on Monday in deciding to stretch out purchases of the Seawolf nuclear attack submarine and the Aegis cruiser. Since these decisions are based on the diminishing Soviet threat, the crisis in the Middle East is no reason for reversing them."—Editorial in The New York Times, August 16, 1990.

COMMENDING HERMAN LECHT

HON. BENJAMIN L. CARDIN

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 6, 1990

Mr. CARDIN. Mr. Speaker, I would like to call to the attention of my colleagues my constituent, Mr. Herman S. Lecht. Mr. Lecht has recently been appointed chairman of the Senior Advisory Council for the Baltimore City Department of Aging and Retirement Education, and will be installed on September 14, 1990.

Mr. Lecht has worked hard to get to where he is today. He worked his way through college and law school in New York, by working the night shift as a civil servant, in the New York Post Office.

After graduating from law school, he continued his civil service career as an attorney with the Veterans Administration, where he continued to serve his country for 30 years, until he retired in 1973.

Mr. Lecht has served his community as well, through his memberships and offices he has held in many civic and fraternal organizations. He has prepared himself well for his new post on the Senior Advisory Council as vice president of the Northwest Senior Center.

Mr. Lecht can also be proud to call himself a family man. He and his wife Celia have been married more than 60 years, and have one daughter, four grandchildren, and two great grandchildren.

I am proud to call Herman Lecht not only a constituent, but also a friend. I urge my colleagues to join me today in saluting his accomplishments and his coming installation as chairman of the Senior Advisory Council.

HONORING THE HILLCREST JEWISH CENTER'S GOLDEN ANNIVERSARY

HON. GARY L. ACKERMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 6, 1990

Mr. ACKERMAN. Mr. Speaker, I rise today to pay tribute to the Hillcrest Jewish Center, which this year is celebrating its Golden Jubilee Anniversary of service to the Hillcrest, Fresh Meadows and Jamaica Estates communities in Queens County, NY. The year-long celebration will culminate on Sunday, September 9, 1990, with the official receipt and display in a place of honor of a Holocaust Memorial Torah Scroll from Eastern Europe. Also on that day a new Torah, commissioned by the center, will be dedicated.

The Hillcrest Jewish Center was founded in 1938 by a group of women who felt the need for a place of worship and a home in which to gather socially and fraternally. Within the first year 162 families had joined the center. The first Sunday school for children was started with classes held at the home of Tess Rosenfeld. The first High Holy Day services were held on October 2, 1940, at a rented storefront on Union Turnpike with 400 worshippers in attendance. The services were conducted by Rabbi Morris Dembowitz, who was retained as spiritual leader.

Funds for a building were raised at a dinner dance, ground was broken on September 9, 1941, and the dedication took place on February 15, 1942. In the summer of 1942 Rabbi Nathan Jacobson assumed the center's pulpit. During the war years the center was active in selling bonds, sending cheer packages to service men and women abroad, and participated in other defense activities.

Under the leadership of Rabbi Israel Mowshowitz, the center grew to its current prominent position in the community. It continues to serve the neighborhood as a place of worship, schools from Nursery School to Adult Education, a meeting place for lectures, con-

certs and all forms of communication in Jewish life. The center is a hallmark for continuity of faithful service to the people of Queens. It has weathered its hard times and has grown stronger through the hard work of its members. We need places like this to turn to in times of joy and need. So I ask my colleagues in the House of Representatives to join me in congratulating the Hillcrest Jewish Center, Rabbi Moshowitz and Congregation President Lawrence A. Lansner on the 50th anniversary and to extend the hope that the next 50 years will be as successful as the first.

SENATE—*Monday, September 10, 1990*

The Senate met at 10 a.m., and was called to order by the Honorable ALBERT GORE, Jr., a Senator from the State of Tennessee.

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray:

Lord, Thou hast been our dwelling place in all generations. Before the mountains were brought forth, or ever Thou hadst formed the earth and the world, even from everlasting to everlasting, Thou art God.—Psalm 90:1, 2.

Eternal God, sovereign Lord of history, make us wise to comprehend the times in which we live. We had just begun to adjust to the end of cold war—now our military might, with that of many nations, amasses in the Middle East where biblical history began and ends. Four thousand years ago Thou didst call a man Abram, out of whose loins came two sons, Isaac by his wife Sarah, and Ishmael by her Egyptian handmaid, Hagar. For 40 centuries, their progeny have been in almost perpetual conflict. Now their descendants are in the vortex of potential universal struggle.

Gracious God, when we adjourned barely 5 weeks ago, we were reorganizing for a peaceful world. Now the armies of the world confront each other with the possibility of an explosive conflagration involving the whole Earth. It is as though peace mocks us.

Creator God, You placed in the Earth of the Middle East a product upon which the whole world has come to depend. Meant to be a blessing, it becomes a curse. Deliver us, O Lord, by Thy mighty hand. Give wisdom to the President, his Cabinet and counselors, Members of Congress and world leaders in facing these critical days.

In the name of Jesus, the Prince of Peace. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore [Mr. BYRD].

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, DC, September 10, 1990.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable ALBERT GORE, Jr., a Senator from the State of Tennessee, to perform the duties of the Chair.

ROBERT C. BYRD,
President pro tempore.

Mr. GORE thereupon assumed the chair as Acting President pro tempore.

ORDER OF BUSINESS

The ACTING PRESIDENT pro tempore. In my capacity as a Senator from Tennessee, I ask unanimous consent that the Journal of proceedings be approved to date; that the call of the calendar be waived, and no motions or resolutions come over under the rule; that the morning hour be deemed to have expired.

Without objection, it is so ordered.

PROGRAM

The ACTING PRESIDENT pro tempore. I further ask unanimous consent that the time for the two leaders be reserved for their use later in the day; that there be a period for morning business not to extend beyond 11 a.m., with Senators permitted to speak therein for up to 5 minutes each; that at 11 a.m., the Senate begin consideration of Calendar No. 757, H.R. 5241, the Treasury, Postal Service appropriations bill.

Without objection, it is so ordered.

MORNING BUSINESS

The ACTING PRESIDENT pro tempore. In my capacity as a Senator from Tennessee, I suggest the absence of a quorum. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. LOTT. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LOTT. Mr. President, I ask unanimous consent to proceed as if in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator may proceed.

THE BUDGET NEGOTIATIONS

Mr. LOTT. Mr. President, like most Senators, I have spent a good part of the last month in my State of Mississippi. I have been all the way from Biloxi on the Mississippi gulf coast to Bull Frog Corner near Memphis, TN.

It is interesting the great words of wisdom you get when you go back home and meet with your constituents and listen to them at all times, in all types of forums from educational institutions, civic clubs, town hall meetings. They are all very interesting, very enjoyable, and you learn a lot from them. I certainly did while I was home. Most of the questions when I went to various meetings centered around what was happening in Saudi Arabia, what was happening with Iraq, and what the United States would do. Later on this week I will share some thoughts on that subject, as I know a lot of Senators will.

But my constituents always got around, during the question-and-answer periods, to saying that they are still concerned about the budget deficit. If I had to rate the issues on which I was questioned, I would put that one in second place, although it usually is in first place. The people really do care, they do think deficits matter, and they do not understand why the President and the Congress cannot get together on this issue in a sensible and reasonable way and bring down the deficit without having to go to the Gramm-Rudman-Hollings sequestration across the board. I heard a lot of Federal employees who are very concerned about furloughs. They do not like that. They think it is disruptive. I met with Customs officers concerned about literally being able to do their job.

I just want to share with the Senators today the fact that people in my State really do care, and I believe that is true in Nevada, in Virginia, in New York or in California. They expect results. That's why I am pleased to see that the budget negotiators, summiteers, whatever you might call them, have been sequestered over the weekend out at Andrews Air Force Base. I was a part of that type of discussions for I guess 6 or 7 of the last 10 years, and as a member of the so-called Gang of 17 and being involved in the negotiations in late 1987, I know how important they are and how difficult they are. I think we need to recognize that, whether Republican or Democrat, no matter what region you are from, dealing with budget deficits is a very difficult thing to do. Priorities are different in different regions with different Senators and Members of the other body. Coming together with an agreement and solution that will pass is extremely difficult. But it has to happen, and I hope that they will stay sequestered until they come out with an agreement, maybe all day and all night. Since I am not with them, it suits me fine if they stay day and night unitl they get the job done. I think all of us have to wish them well and hope they will be successful.

I am very much concerned about what I see or read that is expected to come out of these negotiations, and I hope to get more information from the negotiators today or in the next couple of days. It sounds negative. It sounds to me like it is where we left it the first of August, where it was back in June. There have been a few changes here or there, but they still are not really making the progress they need to make.

When I was home in the great State of Mississippi, I emphasized the fact that the President had been forthcoming—the President proposed a budget at the beginning of the year. The Congress laughed at it, beat up on it, threw it out on the street, and left it to die. The President, mistakingly, in my opinion, came foward and said everything is on the table and made his comment about taxes. He was willing to negotiate on everything. He made a sacrifice, a political sacrifice. I think he was wrong, but he did it. Still it did not move the negotiators.

Again, in my opinion mistakingly, the administration came foward with a second budget with little different parameters. Again, the Congress heaved a great laugh, and, in fact, one negotiator was quoted as saying: "Why should we slash our wrists when the administration is doing it to themselves every day? Let them go ahead and slash their wrists and kill themselves politically and see how many more budgets they will offer."

This process has to be bipartisan between the administration and Congress. The President has been forthcoming, and I think he has reached the point where he needs to go over the head of the Congress to the American people and sock it to the Congress for not being serious about reaching an agreement.

Hopefully later on today or tomorrow, there will be an agreement, but I am worried about a lot of what I see. There are some things that are going in the right direction.

First, I think timing is important. The negotiators seem to be saying we have to get the job done, do it now or face never getting it concluded in time to adjourn October 5 or close to that for the election. If not, a lameduck session would be in the offing, and that has almost always been a mistake. I have been through eight or nine of those, and every time the American people lose. We do not need a lameduck session. So timing is important.

Second, I think they are seeking the right amounts in the budget negotiations. They are trying to find $50 to $55 billion in revenue reduction and trying to make it a multiyear program up to about $500 billion in reductions. That is about where we should be.

But how they are talking about getting there is where major problems exist. No. 1, it seems that the negotiators are basically agreed we are going to get 50 percent of the reduction in tax increases. Call them alterations in the deductions, call them just revenue raisers, give them any name you want, but they are tax increases. The people are going to have to pay more taxes. The negotiators already seem to have said 50 percent comes on the side. Mistake No. 1.

The problem is not insufficient revenue. The problem is too much spending. We may not know that. We may have forgotten, but let me tell you, the people out in the trenches understand that. They say, "Get you priorities changed, cut back on the spending side. Do not raise taxes on us."

The second mistake is, after agreeing on parameters of 50 percent in tax increases for the budget agreement, the next 25-percent reduction would come out of defense. Again a mistake. Too deep, too precipitous. We have seen what can happen in an instant, not with the Soviet Union, but with some maniac from Iraq or some other place in the world, who threatens our security.

We need a planned, cautious, systematic, careful reduction in defense spending, at not the 25-percent level that would run into $11, $13, maybe $20 billion in cuts in 1 year. That's too much out of defense.

Then the last parameter they seem to agree to is an approximate 25-percent reduction in other spending, and they have been wimping out on that. They do not seem to think they can get 25 percent of a $50 billion agreement on the spending side, and that includes domestic and entitlement reforms. That's not nearly enough in spending savings.

Let me get into some of the details on that. There is no doubt in my mind we can cut spending. At a very minimum, we ought to freeze spending at last year's level.

We are going to be taking up an appropriations bill later today, and I have not really had a chance to study it that carefully—the Treasury, Postal Service, and General Government appropriations. It looks to me like it's $2.3 billion over the fiscal year 1990 level. The House of Representatives has already passed appropriations that are $1 billion over last year's level. Could we not at least freeze at last year's level.

We can make savings in domestic spending programs, and we can have reforms in entitlements that desperately need to be made. In fact, if you look at the charts, at where our budget dollars go, the lines going up astronomically—almost straight up—are entitlement programs. We have to make sure when we vote on the budget that the entitlement changes are also included, if it is to be a two-step process. The Congress will say we are going to do it, that we are going to make savings in entitlements. But they will not do it, they will duck it; it is too hot politically. We have not the time. We will wind up not doing it. Spending cuts are where the budget deficit needs to be attacked.

On taxes, in this city it is the conventional wisdom that, yes, we need more taxes. You hear it from the commentators. Always they need to talk about the tax side. Well, I am telling you that the individuals out there do not want their taxes increased. The conventional wisdom says, look, let us tax the rich; we do not want to affect the average working men and women. We will tax the rich.

One of the proposals I have seen being considered in negotiations is the gasoline tax increase. Who do you think really gets hit the hardest by a gasoline tax increase? Western, Southern, working class people. You know, the guy with a gas-guzzling Cadillac, does not care about a 7-cent-a-gallon increase. But for the guy with the Ford pickup truck going to work from Wiggins, MS, driving 50 or so miles a day round trip, it hits him or her hard. When you raise gasoline taxes, you are hurting the working people in this country.

And when you raise taxes on alcohol and beer and tobacco, do you think it just hits the rich. The rich are not the only people who drink beer. Again, the small working people are going to be hit. Some have even suggested that we eliminate any remaining tax deductions that we did not kill off in the last tax reform package.

We went too far last time. I am sorry I voted for that tax reform package. The people out in the real world were hurt by that, and not just upper middle-income and upper-income people. It was elderly people. It was the working folks.

Forget this baloney about taxing the rich—any time the Congress raises taxes, everybody gets hurt. Everybody. That is not the way to go.

I cannot help but remember TEFRA, the tax bill we passed back in the early 1980's when we agreed to raise taxes, I think by $75 billion, I have forgotten the exact amount, but it was some astronomical figure. We also were going to cut spending by $20 billion. We were going to get $1 in spending savings for every $3 we raised in taxes. We got every nickel of the tax increases, but only about 10 percent of the spending cuts.

I am not going to buy that deal again. I am not going to buy a deal where we vote to raise taxes and lower spending, and the deficit keeps going up. TEFRA is like a ghost that haunts us in the Congress. It was the worst vote I ever cast in the 18 years I have been a Member of Congress. I am not

going to be dragged into that kind of a deal again.

The negotiators further say we are not going to reduce the capital gains tax because again, it will benefit the wealthy. Let me tell you, the people out in the trenches, the people in the poorest State in the Nation—Mississippi—tell you they want the capital gains tax rate cut. Elderly couples who own a home would like to sell their home and not have their sales eaten up by capital gains.

For the timber industry, probably the biggest industry in my State of Mississippi, the capital gains reduction would have a tremendously positive impact. And these are not big wealthy landowners. A lot of them are people who own 60 acres of timberland.

The capital gains tax reduction is something that should be done. I do not understand why it has become such a political issue. I know a lot of Democrats as well as Republicans would like to see the capital gains rate reduced.

I am concerned that in these negotiations that are going forward, that maybe the administration is doing some things, thinking that Members of the Senate on the Republican side of the aisle are going to buy it outright to get a good deal. Yes, we need a good deal. I have voted many times in the past for budgets I did not like. But I am not going to vote for just any package that comes out of these negotiations, especially if 50 percent of it comes out of tax increases and where the priorities are clearly not in the proper order. I urge the negotiators, get your job done, do it now, do it on the spending side. Do not raise taxes.

I know there are people saying it is easy to stand up there and make that speech, but I tell you, I have been home. I have listened to the people. They understand what is happening up here better than we do. Maybe it is because we are so deep into the forest we are seeing every tree. But the people understand that there is too much spending going on up here, too much positioning, and tax increases are paid by real people out in the real world.

I hope our negotiators will come forward with a package that we can support together in a bipartisan way, but they had better take a serious look at where they are headed and what their priorities are at this time.

I thank the Chair and I yield the floor.

Mr. President, I make a point of order that a quorum is not present.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

TRIBUTE TO JAMES AUSTIN

Mr. WILSON. Mr. President, I rise today to pay tribute to the memory of James Austin, a fellow Californian who served his community with distinction and exemplary commitment.

James' long history of service began in 1963, when he served as a lieutenant in the Army National Guard for 6 years. In 1969, he became senior deputy at the central jail in Los Angeles, where he was responsible for training and ensuring that jail policies were adhered to by the deputies in his unit. James went on to become administrative sergeant and was instrumental in the development of the custody training manual. In November, 1977, he became patrol sergeant at the Lennox Station, overseeing personnel in cases of emergency and high risk situations. It was here that his expertise and abilities were tested, and on March 19, 1979, he passed with flying colors and received a letter of commendation for the successful handling of a barricaded suspect.

In 1983, he became the watch commander and later the operations lieutenant at the Altadena Station, where he was responsible for implementation of department policy and policies set forth by the captain, and also maintenance of the station and its vehicle fleet. Two years later, James continued his service to the people of Los Angeles by taking over as director of security at Los Angeles County Health Services. There, he drew from his rich background in public administration to restructure security procedures and develop a new training program. James capped off his distinguished career as license and bookmaking lieutenant, where he administered ongoing investigations conducted by sworn and civilian crews in his unit, advising the captain as to the status of cases being investigated.

California will miss James Austin. I am proud to salute this valued public servant and to commend the many contributions he made to our State community in the course of his distinguished career.

MARATHON HOUSE COMMENCEMENT EXERCISES

Mr. CHAFEE. Mr. President, on September 16, 1990, the nationally renowned Marathon House Drug and Alcohol Treatment Center will be holding its annual graduation exercises. Marathon is a Rhode Island-based treatment center that has helped thousands of families repair lives damaged by substance abuse.

I applaud Marathon's record of achievement and tradition of excellence. I ask unanimous consent that a statement on this event be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

MARATHON HOUSE COMMENCEMENT EXERCISES, SEPTEMBER 16, 1990

Warm congratulations to each and every one of you on this commencement day. Successful completion of the Marathon House Residential Treatment Program is a tremendous accomplishment. I know your families, friends, and counselors are happy for you.

Marathon House has a record of success. Ninety percent of the individuals who complete its program are substance-free and employed after one year. This record of achievement is unmatched anywhere in the nation. But, it can be improved upon. I hope that each of you—100 percent—are on your way to drug and alcohol-free lives.

Treatment programs are challenging; a great deal of hard work. It takes no less than an all-out effort to tackle what President Bush has called "the gravest domestic threat facing our nation today"—substance abuse. As members of Marathon's largest graduating class, you have won an important battle in the war on drugs. Keep fighting.

Marathon House plays a critical role in reducing the devastating impact of drug and alcohol abuse. It is wonderful to see that it continues to serve its clients so well. I was pleased to help secure funding for Marathon's new space in Exeter, Rhode Island, and I am delighted to see the opening of the new Wallom Lake facility in Pascoag. We all have high hopes for the future.

You, the graduates of 1990, have much to offer our communities. I urge you to set your sights high. The energy and determination that you brought to the treatment program will serve you well as you step away from Marathon House. One day at a time, it is possible to maintain healthy, productive, and substance-free lives. Good luck!

Again, congratulations, and have a great day.

ALZHEIMER'S ASSOCIATION 10TH ANNIVERSARY

Mr. PRESSSLER. Mr. President, it is a pleasure for me to extend congratulations to the Alzheimer's Association on its 10th anniversary. The association will celebrate its anniversary on Saturday, October 13, at its annual board meeting in Chicago. Today, I commend the association for its decade of commitment to finding a cure for Alzheimer's disease.

It is estimated that 4 million Americans currently are affected by Alzheimer's disease. My own father suffered from Alzheimer's for many years. It is the fourth leading cause of death for adults. By the 21st century, an estimated 14 million Americans will have Alzheimer's disease. Now is the time to support funding for research and education on Alzheimer's disease to curb this devastating disease before the number of victims doubles. I have been working on legislation in this area for nearly 12 years. Progress has been made in the field of biomedical research. But four out of five research projects are still rejected due to inadequate funding.

I congratulate the Alzheimer's Association for its lobbying efforts, which have resulted in a substantial increase in appropriations for Alzheimer's research since 1983. The Alzheimer's Association is a privately funded, voluntary organization. It has been truly inspiring to see the efforts, dedication and, most importantly, the results achieved by the Alzheimer's Association during the past 10 years. Its slogan, "Someone to Stand By You," accurately states the association's role in addressing the needs of those who are victimized by Alzheimer's disease. It is our duty to provide the financial support necessary to ease the burdens of the victims of Alzheimer's disease and their caregivers, as well as to find a cure for this terrible disease.

JOHN ALFRED PICKLER: SOUTH DAKOTA'S FIRST MEMBER OF CONGRESS

Mr. PRESSLER. Mr. President, during my recent visit to Faulkton, SD, I was invited by Jody Moritz, coeditor of the Faulk Record, Shirley Pritchard and the Faulk County Historical Society to tour the home of John Alfred Pickler, the first Congressman of the proud State of South Dakota. John Pickler was a true frontiersman. Realizing Dakota Territory's potential for statehood, in 1882, he and his wife Alice left the Muscatine, IA, area for Faulkton, where he established a law practice.

As we head toward the 21st century, I would like to thank the ladies of the Faulk County Historical Society for bringing to my attention Congressman Pickler's important role in leading the young State of South Dakota into the 20th century.

John Pickler was destined to be a leader. At age 18 he enlisted in the Army, served during the Civil War, rose to the rank of captain, and led the 138th Regiment of the U.S. Colored Infantry. He also reached the rank of major in the peacetime Army. He participated in a number of notable engagements and established an enviable record as a loyal, valiant soldier and able commanding officer.

Upon completion of military duty John Pickler entered Iowa State University and completed a 4-year degree. While at Ames, IA, he met Miss Alice Alt, whom he would wed in 1870. He then entered the University of Michigan at Ann Arbor, graduating in 1872 with a law degree. He then went to Kirksville, MO, where he engaged in the practice of law with P.F. Greenwood. He was elected State's attorney of Adair County, MO, where he remained for 2 years. He then traveled to Muscatine, IA, and formed with a classmate the firm Hoffman, Pickler & Brown. The firm stayed together until 1882 when John departed Iowa for the prairie of South Dakota.

John Pickler was recognized as a Republican leader in Iowa and served as chairman of his county's Republican central committee. He was also one of the Garfield, IA, electors in 1880. His word always carried weight in the councils of his party.

In September 1882, Pickler arrived by rail at Mitchell, SD, from which he traveled by stagecoach to Huron. There he joined a party of gentlemen who were headed to the center of Faulk County to establish a town. The party proceeded by rail to Miller, in Hand County, where the men procured lumber and other materials to construct a hotel in their new town.

The party set out northward from Miller without a trail to follow. They placed lumber lath at various high points on the prairie as they traveled across the sea of prairie grass to ensure that they would be able to find their way back. The men journeyed for 2 days until they settled on a site located on the south bank of the Nixon River where the town of Faulkton is now located.

Major Pickler's service to the State of South Dakota began as a member of the territorial legislature in Yankton from 1885 until 1887. He was instrumental in introducing the first bill in the territorial legislature to give women the right to vote in the Dakota Territory, 33 years prior to the ratification of the 19th amendment to the U.S. Constitution. He and his wife Alice promoted woman suffrage and were friends of Susan B. Anthony. That famous advocate for women suffrage visited their Faulkton home.

John's strong convictions were shared by his wife Alice. Mrs. Pickler and Susan B. Anthony in 1890 went on a speaking tour together through the State of South Dakota. She and Mrs. Anthony spoke on women suffrage and the temperance cause. Alice was the vice president of the Women's Christian Temperance Union for the State, president of the Woman's Relief Corp, and president of the South Dakota Equal Suffrage Association. Alice stayed active in civic affairs until her death on March 31, 1932.

Active in Republican politics, John Pickler was elected in 1889 to represent the new State of South Dakota in the U.S. House of Representative. He served in the 51st through the 54th Congresses, 1889–97. During his tenure as Congressman, he served as an active member on the committees on Public Lands, Indian Affairs, Invalid Pensions, Irrigation of Arid Lands, Alcohol-Liquor Traffic, and Claims. He was chairman of the Committee on Invalid Pensions during the 54th Congress. The Committee on Invalid Pensions no longer exists. Its modern counterpart would be the Veterans' Affairs Committee. He served 8 years in Congress before being nominated for the U.S. Senate along with James H. Kyle. Pickler understood that the Republican vote would be split, and that neither Kyle nor himself could be elected to the Senate in the aftermath of a tough intra-party struggle. Rather than seeing the office lost to his party, Pickler withdrew his name and threw his support to James H. Kyle. Kyle won the Senate seat for the Republicans.

As a result of his quest for knowledge, John Pickler was a broad-minded man of liberal culture and education. He spent many hours reading books in his personal search for enlightenment. John enjoyed reading and music with such a passion that he acquired a two-story commercial building from the ghost town of LaFoon, SD, sometime during the 1890–92 period. He put the building up on wheels and moved it to his Faulkton home. The 30-foot by 30-foot structure, now the largest room in the Pickler home, became the library. That library contained one of the largest and finest collections in the State at the turn of the century, with more than 2,000 volumes.

John's character and conduct were of the highest caliber. Upon his death on June 13, 1910, the bar of Faulk County prepared the following memorial:

Be it resolved, that in his death this court, the legal profession and the people of this state have sustained a great loss. He was the pioneer lawyer of Faulk county and during the years that he was associated with us, exerted a strong wholesome influence as a lawyer, public officer and a citizen. He was a man of strong individuality and personality, a tireless worker, diligent and strenuous in the interest of his clients. Possessed of firm convictions, of extraordinary intellectual force and ability, together with marked oratorical powers, he achieved a degree of usefulness, influence and power which is given but few to attain. The purity of his daily life and habits, his unswerving fidelity to high ideals and moral principles are especially to be commended, and furnish an example which has been an inspiration to all his associates. He was especially endowed with a sweet spirit of Christian charity, a spirit of goodwill and kindliness which went out toward all with whom he came in contact. He had a disposition which led him to overlook and make allowances for the faults and frailities of others, which was absolutely incapable of malice, and manifested itself in deeds of helpfulness and sympathy wherever the opportunity occurred. He was absolutely true to his convictions and stood for them with all of this might, mind and strength. Possessed of undaunted moral courage, he fearlessly stood and fought for what he believed to be right, uninfluenced by personal motives and without fear of consequences. And this undaunted courage was never more manifest than in his last struggle with the "grim monster who comes but to conquer." During all the long months of final illness he never for one moment evinced the slightest fear as to when or what the end of this struggle might be. *Resolved,* that we recognize with pride and thankfulness the value of his life and influence to the legal profession, to the community and to the state.

We South Dakotans are proud of John Pickler and his accomplishments in the military, political, and civic arenas. The legacy he began more than a century ago sets a fine example for all South Dakotans.

TERRY ANDERSON

Mr. MOYNIHAN. Mr. President, I rise to inform my colleagues that today marks the 2,004th day that Terry Anderson has been held captive in Beirut.

September 6, 1990, marked Terry Anderson's 2,000th day in captivity. According to the New York Post: "another grim milestone." Mr. President, I wish to express the hope that recent developments in the region might put an end to the journey.

Saddam Hussein's invasion of Kuwait has generated turmoil in the Middle East. Turmoil and shifting alliances. One hostage, Irishman Brian Keenan, has been released. Perhaps there is now good reason to hope that others will also be released.

I ask unanimous consent that the above mentioned New York Post article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Post, Sept. 6, 1990]

U.S. NEWSMAN IN 2,000TH DAY AS HOSTAGE

BEIRUT, LEBANON.—Hostage American journalist Terry Anderson marked another grim milestone yesterday his 2,000th day in captivity.

Anderson, 42, chief Middle East correspondent of The Associated Press, is the longest-held of the six Americans, four Britons, two West Germans and one Italian who are captives in Lebanon. Most are held by pro-Iranian Shiite Moslem militants. Anderson, 42, of Lorain, Ohio, was kidnapped in Moslem West Beirut on March 16, 1985, by the Islamic Jihad, or Islamic Holy War.

The last information on Anderson came from former Irish hostage Brian Keenan, who said after his release Aug. 24 that he had seen Anderson during his four years in captivity.

"I saw Terry Anderson some time ago. He's in good form," Keenan said after he was freed by a group calling itself the Organization of Islamic Dawn.

Islamic Dawn had freed U.S. hostages Robert Polhill and Frank Reed in April as a "good-will gesture."

Keenan said he spent part of his time in captivity with Anderson, noting they were in chains and blindfolded much of the time.

The Irishman said Anderson "appreciates the letters that he received from his family. He has a picture of his daughter, Sulome, which is some great companionship for him."

Sulome, Anderson's younger daughter, has never met her father. She was born nearly three months after he was kidnapped.

Mr. DECONCINI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

PRIVILEGE OF THE FLOOR—H.R. 5241

Mr. DECONCINI. Mr. President, I ask unanimous consent that Mr. Robert Finan be permitted the privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DECONCINI. Mr. President, what is the pending business?

TREASURY, POSTAL SERVICE, EXECUTIVE OFFICE OF THE PRESIDENT, AND INDEPENDENT AGENCIES APPROPRIATIONS ACT, FISCAL YEAR 1991

The PRESIDING OFFICER. If the Senator will suspend, under the previous order the hour of 11 a.m. having arrived, the Senate will proceed to the consideration of H.R. 5241, which the clerk will now report.

The legislative clerk read as follows:

A bill (H.R. 5241) making appropriations for the Treasury Department, the U.S. Postal Service, the Executive Office of the President, and certain Independent Agencies, for the fiscal year ending September 30, 1991, and for other purposes.

The PRESIDING OFFICER. The Senator from Arizona is recognized.

Mr. DECONCINI. Mr. President, H.R. 5241, the fiscal year 1991 appropriations bill for the Department of the Treasury, Postal Services and general government is what is before us today.

Mr. President, I make a motion to move to the consideration of this bill, an act making appropriations for this purpose ending September 30, 1991.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Arizona.

The motion was agreed to, and the Senate proceeded to consider the bill, which had been reported from the Committee on Appropriations, with amendments; as follows:

(The parts on the bill intended to be stricken are shown in boldface brackets, and the parts of the bill intended to be inserted are shown in italics.)

H.R. 5241

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the following sums are appropriated, out of any money in the Treasury not otherwise appropriated, for the Treasury Department, the United States Postal Service, the Executive Office of the President, and certain Independent Agencies, for the fiscal year ending September 30, 1991, and for other purposes, namely:

TITLE I

[TREASURY DEPARTMENT

[OFFICE OF THE SECRETARY

[DEPARTMENTAL OFFICES

[Salaries and Expenses

[For necessary expenses of the Departmental Offices including operation and maintenance of the Treasury Building and Annex; hire of passenger motor vehicles; not to exceed $22,000 for official reception and representation expenses; not to exceed $200,000 for unforeseen emergencies of a confidential nature, to be allocated and expended under the direction of the Secretary of the Treasury and to be accounted for solely on his certificate; not to exceed $1,649,000, to remain available until expended, for systems modernization requirements; not to exceed $1,000,000, to remain available until expended, for repairs and improvements to the Main Treasury Building and Annex; $63,083,000.]

DEPARTMENT OF THE TREASURY

DEPARTMENTAL OFFICES

SALARIES AND EXPENSES

For necessary expenses of the Departmental Offices including operation and maintenance of the Treasury Building and Annex; hire of passenger motor vehicles; not to exceed $22,000 for official reception and representation expenses; not to exceed $200,000 for unforeseen emergencies of a confidential nature, to be allocated and expended under the direction of the Secretary of the Treasury and to be accounted for solely on his certificate; not less than $2,212,000 and 40 full-time equivalent positions for the Office of Foreign Assets Control; not to exceed $1,649,000, to remain available until expended, for systems modernization requirements; not to exceed $1,000,000, to remain available until expended, for repairs and improvements to the Main Treasury Building and Annex; $63,883,000.

INTERNATIONAL AFFAIRS

For necessary expenses of the international affairs function of the Departmental Offices, including operation and maintenance of the Treasury Building and Annex; hire of passenger motor vehicles; maintenance, repairs, and improvements of, and purchase of commercial insurance policies for, real properties leased or owned overseas, when necessary for the performance of official business; not to exceed $2,000,000 for official travel expenses; and not to exceed $73,000 for official reception and representation expenses; [$27,517,000] *$29,717,000.*

OFFICE OF INSPECTOR GENERAL

SALARIES AND EXPENSES

For necessary expenses of the Office of Inspector General in carrying out the provisions of the Inspector General Act of 1978, as amended, hire of passenger motor vehicles; not to exceed $1,543,000 to remain available until expended, for systems modernization requirements; $21,296,000.

FINANCIAL CRIMES ENFORCEMENT NETWORK

SALARIES AND EXPENSES

For necessary expenses of the Financial Crimes Enforcement Network, including hire of passenger motor vehicles; not to exceed $3,000 for official reception and representation expenses; and awards of compensation to informers; $16,688,000.

FEDERAL LAW ENFORCEMENT TRAINING CENTER

SALARIES AND EXPENSES

For necessary expenses of the Federal Law Enforcement Training Center, as a bureau of the Department of the Treasury, including purchase (not to exceed thirty for police-type use) and hire of passenger motor vehicles; for expenses for student athletic and related activities; uniforms without regard to the general purchase price limitation for the current fiscal year; the conducting of and participating in firearms matches and presentation of awards; for public

awareness and enhancing community support of law enforcement training; not to exceed [$7,000] *$5,000* for official reception and representation expenses; room and board for student interns; and services as authorized by 5 U.S.C. 3109: *Provided,* That the Center is authorized to accept gifts: *Provided further,* That notwithstanding any other provision of law, students attending training at any Federal Law Enforcement Training Center site shall reside in on-Center or Center-provided housing, insofar as available and in accordance with Center policy: *Provided further,* That funds appropriated in this account shall be available for State and local government law enforcement training on a space-available basis; training of foreign law enforcement officials on a space-available basis with reimbursement of actual costs to this appropriation; training of [private sector security officials] *community leaders* on a space available basis with reimbursement of actual costs to this appropriation; travel expenses of non-Federal personnel to attend State and local course development meetings at the Center: *Provided further,* That the Director of the Federal Law Enforcement Training Center shall annually present an award to be accompanied by a gift of intrinsic value to the outstanding student who graduated from a basic training program at the Center during the previous fiscal year, to be funded by donations received through the Center's gift authority: *Provided further,* That none of the funds appropriated under this heading shall be used to reduce the level of advanced training or other training activities of the Federal Law Enforcement Training Center at Marana, Arizona; [$36,727,000] *$41,142,000: Provided further, That the Federal Law Enforcement Training Center shall hire up to and maintain an average of not less than 445 direct full-time equivalent positions for fiscal year 1991.*

ACQUISITION, CONSTRUCTION, IMPROVEMENTS, AND RELATED EXPENSES

For expansion of the Federal Law Enforcement Training Center, for acquisition of necessary additional real property and facilities, and for ongoing maintenance, facility improvements, and related expenses, [$18,735,000] *$29,000,000,* to remain available until expended.

FINANCIAL MANAGEMENT SERVICE

SALARIES AND EXPENSES

For necessary expenses of the Financial Management Service, $218,742,000, of which not to exceed $13,287,000 shall remain available until expended for systems modernization initiatives.

BUREAU OF ALCOHOL, TOBACCO, AND FIREARMS

SALARIES AND EXPENSES

For necessary expenses of the Bureau of Alcohol, Tobacco and Firearms, including purchase of not to exceed [six] *seven* hundred and fifty vehicles for police-type use for replacement only and hire of passenger motor vehicles; hire of aircraft; and services of expert witnesses at such rates as may be determined by the Director; not to exceed [$5,000] *$10,000* for official reception and representation expenses; for training of State and local law enforcement agencies with or without reimbursement; provision of laboratory assistance to State and local agencies, with or without reimbursement; [$296,284,000] *$305,704,000,* of which [$19,000,000] *$25,000,000* shall be available solely for the enforcement of the Federal Alcohol Administration Act during fiscal year 1991, and of which not to exceed $1,000,000 shall be available for the payment of attorneys' fees as provided by 18 U.S.C. 924(d)(2): *Provided,* That no funds appropriated herein shall be available for administrative expenses in connection with consolidating or centralizing within the Department of the Treasury the records of receipts and disposition of firearms maintained by Federal firearms licensees or for issuing or carrying out any provisions of the proposed rules of the Department of the Treasury, Bureau of Alcohol, Tobacco and Firearms, on Firearms Regulations, as published in the FEDERAL REGISTER, volume 43, number 55, of March 21, 1978: *Provided further,* That none of the funds appropriated herein shall be available for explosive identification or detection tagging research, development, or implementation: *Provided further,* That not to exceed $300,000 shall be available for research and development of an explosive identification and detection device: *Provided further,* That this provision shall not preclude ATF from assisting the International Civil Aviation Organization in the development of a detection agent for explosives or from enforcing any legislation implementing the Convention on the Marking of Plastic and Sheet Explosives for the Purpose of Detection: *Provided further,* That funds made available under this Act shall be used to achieve a minimum level of [3,984] *4,098* full-time equivalent positions for fiscal year 1991, of which no fewer than [692] *1,037* full-time equivalent positions shall be allocated for the Armed Career Criminal Apprehension Program.

UNITED STATES CUSTOMS SERVICE

SALARIES AND EXPENSES

OPERATION AND MAINTENANCE, AIR INTERDICTION PROGRAM

For expenses, not otherwise provided for, necessary for the hire, lease, acquisition (transfer or acquisition from any other agency), operation and maintenance of aircraft, and other related equipment of the Air Program; [$107,047,000] *$114,347,000,* to remain available until expended: *Provided,* That no aircraft or other related equipment with the exception of the aerostat program which will be transferred to the Department of Defense, shall be transferred to any other Federal agency, Department, or office outside of the Department of the Treasury during fiscal year 1991*: Provided further, That the United States Customs Service shall commence procurement of long-lead items and conduct all advanced planning required in preparation for the procurement of one additional P-3 airborne early warning (AEW) aircraft in fiscal year 1992.*

CUSTOMS FORFEITURE FUND

(LIMITATION ON AVAILABILITY OF DEPOSITS)

For necessary expenses of the Customs Forfeiture Fund, not to exceed $14,855,000, as authorized by Public Law 100-690; to be derived from deposits in the Fund.

CUSTOMS SERVICES AT SMALL AIRPORTS

(TO BE DERIVED FROM FEES COLLECTED)

Such sums as may be necessary, not to exceed $2,152,000, for expenses for the provision of Customs services at certain small airports or other facilities when authorized by law and designated by the Secretary of the Treasury, including expenditures for the salary and expenses of individuals employed to provide such services, to be de-

rived from fees collected by the Secretary of the Treasury pursuant to section 236 of Public Law 98-573 for each of these airports or other facilities when authorized by law and designated by the Secretary of the Treasury, and to remain available until expended.

UNITED STATES MINT

SALARIES AND EXPENSES

For necessary expenses of the United States Mint; $51,429,000, including amounts for purchase and maintenance of uniforms not to exceed $275 multiplied by the number of employees of the agency who are required by regulation or statute to wear a prescribed uniform in the performance of official duties.

EXPANSION AND IMPROVEMENTS

For expansion and improvements to existing Mint facilities and for renovation of such facilities as may be acquired, $550,000, to remain available until expended.

BUREAU OF THE PUBLIC DEBT

ADMINISTERING THE PUBLIC DEBT

For necessary expenses connected with any public-debt issues of the United States; $175,139,000[: *Provided*, That such sums as are necessary are appropriated to reimburse Federal Reserve Banks for services required by the Secretary to be performed by such banks as fiscal agents of the United States in support of administering the public debt, effective October 1, 1991].

PAYMENT OF GOVERNMENT LOSSES IN SHIPMENT

For payment of Government losses in shipment, in accordance with section 2 of the Act approved July 8, 1937 (40 U.S.C. 722), $500,000, to remain available until expended.

INTERNAL REVENUE SERVICE

ADMINISTRATION AND MANAGEMENT

For necessary expenses of the Internal Revenue Service, not otherwise provided for; executive direction, management services, and internal audit and security; including purchase (not to exceed 89 for replacement only, for police-type use) and hire of passenger motor vehicles (31 U.S.C. 1343(b)); and services as authorized by 5 U.S.C. 3109, at such rates as may be determined by the Commissioner; [$136,072,000] *$142,279,000*, of which not to exceed $25,000 for official reception and representation expenses; and of which not to exceed $500,000 shall remain available until expended for research.

PROCESSING TAX RETURNS AND ASSISTANCE

For necessary expenses of the Internal Revenue Service, not otherwise provided for; including processing tax returns; revenue accounting; statistics of income; providing assistance to taxpayers; [establishing and operating an ongoing training program for IRS employees under which employees will be provided with training and information designed to curtail employee mistreatment of taxpayers; and] hire of passenger motor vehicles (31 U.S.C. 1343(b)); and services as authorized by 5 U.S.C. 3109, at such rates as may be determined by the Commissioner; [$1,444,517,000] *$1,521,595,000*, of which $3,000,000 shall be for the Tax Counseling for the Elderly Program, no amount of which shall be available for IRS administrative costs.

TAX LAW ENFORCEMENT

For necessary expenses of the Internal Revenue Service for determining and establishing tax liabilities; tax and enforcement litigation; technical rulings; examining employee plans and exempt organizations; investigation and enforcement activities; securing unfiled tax returns; collecting unpaid accounts; the purchase (not to exceed 451, for replacement only, for police-type use), and hire of passenger motor vehicles (31 U.S.C. 1343(b)); and services as authorized by 5 U.S.C. 3109, at such rates as may be determined by the Commissioner; [$3,560,484,000] *$3,310,119,000*, of which not to exceed $70,000 shall be for official reception and representation expenses in connection with the 1991 General Assembly of the Inter-American Center of Tax Administrators, to be hosted by the United States[, and of which not less than $10,000,000 above fiscal year 1990 levels shall be available for the purposes of enforcement activities related to United States subsidiaries of foreign-controlled corporations that are in non-compliance with United States tax laws].

INFORMATION SYSTEMS

For necessary expenses for data processing and telecommunications support for Internal Revenue Service activities, including: returns processing and services; compliance and enforcement; program support; and tax systems modernization; and for the hire of passenger motor vehicles (31 U.S.C. 1343(b)); and services as authorized by 5 U.S.C. 3109, at such rates as may be determined by the Commissioner; [$993,927,000, of which not less than $247,878,000 shall remain available until expended and shall not be obligated prior to September 30, 1991, and pursuant to section 202(b) of the Balanced Budget and Emergency Deficit Control Reaffirmation Act of 1987, this action is a necessary (but secondary) result of a significant policy change and of which not to exceed $60,000,000 shall remain available until expended for other systems development projects and shall not be obligated prior to September 30, 1991, and pursuant to section 202(b) of the Balanced Budget and Emergency Deficit Control Reaffirmation Act of 1987, this action is a necessary (but secondary) result of a significant policy change] *$932,932,000, of which not less than $247,878,000 shall remain available until expended for tax systems modernization, and of which $60,000,000 shall remain available until expended for other systems development projects.*

ADMINISTRATIVE [PROVISION] *PROVISIONS*—INTERNAL REVENUE SERVICE

SECTION 1. Not to exceed [5] *4* per centum of any appropriation made available to the Internal Revenue Service for the current fiscal year by this Act may be transferred to any other Internal Revenue Service appropriation upon the advance approval of the House and Senate Committees on Appropriations.

SEC. 2. Not to exceed 15 per centum, or $15,000,000, whichever is greater, of any appropriation made available to the Internal Revenue Service for document matching for the current fiscal year by this Act may be transferred to any other Internal Revenue Service appropriation for document matching.

UNITED STATES SECRET SERVICE

SALARIES AND EXPENSES

For necessary expenses of the United States Secret Service, including purchase (not to exceed three hundred and forty-three vehicles for police-type use for replacement only) and hire of passenger motor vehicles; hire of aircraft; training and assistance requested by State and local governments, which may be provided without reimbursement; services of expert witnesses at such rates as may be determined by the Director; rental of buildings in the District of Columbia, and fencing, lighting, guard booths, and other facilities on private or other property not in Government ownership or control, as may be necessary to perform protective functions; the conducting of and participating in firearms matches and presentation of awards; and for travel of Secret Service employees on protective missions without regard to the limitations on such expenditures in this or any other Act: *Provided*, That approval is obtained in advance from the House and Senate Committees on Appropriations; for repairs, alterations, and minor construction at the James J. Rowley Secret Service Training Center; for research and development; for making grants to conduct behavioral research in support of protective research and operations; not to exceed $12,500 for official reception and representation expenses; not to exceed $15,000 to assist in hosting the Biennial Conference of the Organization of Women in Federal Law Enforcement; to be held during fiscal year 1991; not to exceed $50,000 to provide technical assistance and equipment to foreign law enforcement organizations, in counterfeit investigations; for payment in advance for commercial accommodations as may be necessary to perform protective functions; and for uniforms without regard to the general purchase price limitation for the current fiscal year; [$397,640,000] *$412,740,000*, of which $2,500,000 shall remain available until expended for renovations at the temporary official residence of the Vice President and [$3,200,000] *$1,600,000* to remain available until expended for renovations of the New York Field Office; and of which not to exceed $160,000 shall be made available for the protection at the one non-governmental property designated by the President of the United States under provisions of section 12 of the Presidential Protection Assistance Act of 1976 (18 U.S.C. 3056 note).

TREASURY DEPARTMENT—GENERAL PROVISIONS

SEC. 101. Appropriations to the Treasury Department in this Act shall be available for uniforms or allowances therefor, as authorized by law (5 U.S.C. 5901), including maintenance, repairs, and cleaning; purchase of insurance for official motor vehicles operated in foreign countries; entering into contracts with the Department of State for the furnishing of health and medical services to employees and their dependents serving in foreign countries; and services as authorized by 5 U.S.C. 3109.

SEC. 102. None of the funds appropriated by this title shall be used in connection with the collection of any underpayment of any tax imposed by the Internal Revenue Code of 1954 unless the conduct of officers and employees of the Internal Revenue Service in connection with such collection complies with subsection (a) of section 805 (relating to communications in connection with debt collection), and section 806 (relating to harassment or abuse), of the Fair Debt Collection Practices Act (15 U.S.C. 1692).

SEC. 103. Not to exceed 2 per centum of any appropriations in this Act for the Department of the Treasury may be transferred between such appropriations. [However, no such appropriation shall be increased or decreased] *Notwithstanding any authority to transfer funds between appropriations contained in this or any other Act, no transfer may increase or decrease any ap-*

propriation in this Act by more than 2 per centum and any such proposed transfers shall be approved in advance by the Committees on Appropriations of the House and Senate.

[SEC. 104. Notwithstanding any other provision of law, beginning October 1, 1990, and thereafter, the Financial Management Service shall be fully and directly reimbursed from the Social Security Trust Funds for the costs it incurs in the issuance of Social Security Trust Funds benefit payments, including all physical costs associated with payment preparation and postage costs. Such direct reimbursement shall also be made for all other trust and special funds which are the recipients of services performed by the Financial Management Service and which prior to enactment of this provision reimburse the General Fund of the Treasury for such services.]

This title may be cited as the "Treasury Department Appropriations Act, 1991".

TITLE II

UNITED STATES POSTAL SERVICE

PAYMENT TO THE POSTAL SERVICE FUND

For payment to the Postal Service Fund for revenue forgone on free and reduced rate mail, pursuant to subsection (c) of section 2401 of title 39, United States Code; [$484,592,000] *$470,592,000*: *Provided*, That mail for overseas voting and mail for the blind shall continue to be free: *Provided further*, That six-day delivery and rural delivery of mail shall continue at not less than the 1983 level: *Provided further*, That none of the funds made available to the Postal Service by this Act shall be used to implement any rule, regulation, or policy of charging any officer or employee of any State or local child support enforcement agency, or any individual participating in a State or local program of child support enforcement, a fee for information requested or provided concerning an address of a postal customer: *Provided further*, That none of the funds provided in this Act shall be used to consolidate or close small rural and other small post offices in the fiscal year ending on September 30, 1991.

PAYMENT TO THE POSTAL SERVICE FUND FOR NONFUNDED LIABILITIES

For payment to the Postal Service Fund for meeting the liabilities of the former Post Office Department to the Employees' Compensation Fund pursuant to 39 U.S.C. 2004, $38,142,000.

UNITED STATES POSTAL SERVICE

GENERAL PROVISION

SECTION 1. None of the funds appropriated in this Act or made available by 39 U.S.C. 2401(a) shall be available for the investigation of any bombing, attempted bombing, or other explosive incident unless such bombing, attempted bombing, or other explosive incident is directed at a United States postal facility, or the explosive device detonates or is discovered while still in possession of the United States Postal Service.

SEC. 2. (a) IN GENERAL.—Section 3626 of title 39, United States Code, is amended by adding at the end the following:

"(j)(1) In the administration of this section, the rates for mail under former section 4452(b) or 4452(c) of this title shall not apply to mail which advertises, promotes, recommends, offers, describes, or announces the availability of any credit, debit, or charge card, or similar financial service, provided by or through an arrangement with any person or organization not authorized to mail at the rates for mail under former section 4452(b) or 4452(c) of this title.

"(2) Paragraph (1) of this subsection shall not exclude matter from being mailed at the rates for mail under former section 4452(b) or 4452(c) of this title, by an organization authorized to mail at those rates, solely because such matter contains—

"(A) space advertising for which a valuable consideration has been paid, provided that such advertising is an integral part of a publication issued on a periodic basis by the authorized organization, and not included as an insert, enclosure, or supplement;

"(B) an incidental acknowledgement or mention of organizations or individuals who have made donations to the authorized organization; or

"(C) an incidental reference to services or benefits available as a result of membership in the authorized organization, provided that advertising, promotional, or application materials specifically concerning such services or benefits are not included.".

(b) CONFORMING AMENDMENT.—Section 2401(c) of title 39, United States Code, is amended by striking "3626(a)-(h)" and inserting "3626(a)-(h) and (j)".

This title may be cited as the "Postal Service Appropriations Act, 1991".

TITLE III

EXECUTIVE OFFICE OF THE PRESIDENT

COMPENSATION OF THE PRESIDENT

For compensation of the President, including an expense allowance at the rate of $50,000 per annum as authorized by 3 U.S.C. 102; $250,000: *Provided*, That none of the funds made available for official expenses shall be expended for any other purpose and any unused amount shall revert to the Treasury pursuant to section 1552 of title 31 of the United States Code: *Provided further*, That none of the funds made available for official expenses shall be considered as taxable to the President.

OFFICE OF ADMINISTRATION

SALARIES AND EXPENSES

For necessary expenses of the Office of Administration; [$24,910,000] *$25,410,000, of which not less than $500,000 shall remain available until expended for the White House Conference on Indian Education*, including services as authorized by 5 U.S.C. 3109 and 3 U.S.C. 107, and hire of passenger motor vehicles.

THE WHITE HOUSE OFFICE

SALARIES AND EXPENSES

For necessary expenses for the White House as authorized by law, including not to exceed $3,850,000 for services as authorized by 5 U.S.C. 3109 and 3 U.S.C. 105; including subsistence expenses as authorized by 3 U.S.C. 105, which shall be expended and accounted for as provided in that section; hire of passenger motor vehicles, newspapers, periodicals, teletype news service, and travel (not to exceed $100,000 to be expended and accounted for as provided by 3 U.S.C. 103); not to exceed $20,000 for official entertainment expenses, to be available for allocation within the Executive Office of the President; $32,799,000.

EXECUTIVE RESIDENCE AT THE WHITE HOUSE

OPERATING EXPENSES

For the care, maintenance, repair and alteration, refurnishing, improvement, heating and lighting, including electric power and fixtures, of the Executive Residence at the White House and official entertainment expenses of the President; $8,495,000, of which $500,000 for the rehabilitation of the White House kitchens shall remain available until expended, *and of which $1,202,000 for the repair of the face of the Executive Residence shall remain available until expended*, to be expended and accounted for as provided by 3 U.S.C. 105, 109-110, 112-114.

OFFICIAL RESIDENCE OF THE VICE PRESIDENT

OPERATING EXPENSES

For the care, maintenance, repair and alteration, refurnishing, improvement, heating and lighting, including electric power and fixtures, of the official residence of the Vice President, the hire of passenger motor vehicles, and not to exceed $90,000 for official entertainment expenses of the Vice President, to be accounted for solely on his certificate; $626,000: *Provided*, That advances or repayments or transfers from this appropriation may be made to any department or agency for expenses of carrying out such activities.

SPECIAL ASSISTANCE TO THE PRESIDENT

SALARIES AND EXPENSES

For necessary expenses to enable the Vice President to provide assistance to the President in connection with specially assigned functions, services as authorized by 5 U.S.C. 3109 and 3 U.S.C. 106, including subsistence expenses as authorized by 3 U.S.C. 106, which shall be expended and accounted for as provided in that section; and hire of passenger motor vehicles; $2,587,000.

COUNCIL OF ECONOMIC ADVISERS

For necessary expenses of the Council in carrying out its functions under the Employment Act of 1946 (15 U.S.C. 1021); $3,064,000.

OFFICE OF POLICY DEVELOPMENT

SALARIES AND EXPENSES

For necessary expenses of the Office of Policy Development, including services as authorized by 5 U.S.C. 3109, and 3 U.S.C. 107; $3,395,000.

NATIONAL CRITICAL MATERIALS COUNCIL

SALARIES AND EXPENSES

For necessary expenses of the National Critical Materials Council, including activities as authorized by Public Law 98-373; [$235,000] *$400,000: Provided, That a minimum level of 5 permanent full-time equivalent positions shall be hired and maintained by the National Critical Materials Council for fiscal year 1991.*

NATIONAL SECURITY COUNCIL

SALARIES AND EXPENSES

For necessary expenses of the National Security Council, including services as authorized by 5 U.S.C. 3109; $5,893,000[, of which not to exceed $2,000 may be for official reception and representation expenses].

OFFICE OF MANAGEMENT AND BUDGET

SALARIES AND EXPENSES

For necessary expenses of the Office of Management and Budget, including hire of passenger motor vehicles, services as authorized by 5 U.S.C. 3109; [$49,305,000] *$48,343,000*, of which not to exceed $4,500,000 shall be available to carry out the provisions of 44 U.S.C. chapter 35: *Provided*, That, as provided in 31 U.S.C. 1301(a), appropriations shall be applied only to the objects for which appropriations were made

except as otherwise provided by law: *Provided further,* That none of the funds appropriated in this Act for the Office of Management and Budget may be used for the purpose of reviewing any agricultural marketing orders or any activities or regulations under the provisions of the Agricultural Marketing Agreement Act of 1937 (7 U.S.C. 601 et seq.): *Provided further,* That none of the funds made available for the Office of Management and Budget by this Act may be expended for the altering of the transcript of actual testimony of witnesses, except for testimony of officials of the Office of Management and Budget, before the Committee on Appropriations or the Committee on Veterans' Affairs or their subcommittees: *Provided further,* That this proviso shall not apply to printed hearings released by the Committee on Appropriations or the Committee on Veterans' Affairs: *Provided further,* That none of the funds made available by this Act or any other Act shall be used to reduce the scope or publication frequency of statistical data relative to the operations and production of the alcoholic beverage and tobacco industries below fiscal year 1985 levels: *Provided further,* That none of the funds appropriated by this Act shall be available to the Office of Management and Budget for revising, curtailing or otherwise amending the administrative and/or regulatory methodology employed by the Bureau of Alcohol, Tobacco and Firearms to assure compliance with section 105, title 27 of the United States Code (Federal Alcohol Administration Act) or with regulations, rulings or forms promulgated thereunder.

OFFICE OF FEDERAL PROCUREMENT POLICY

SALARIES AND EXPENSES

For expenses of the Office of Federal Procurement Policy, including services as authorized by 5 U.S.C. 3109; $2,914,000.

OFFICE OF NATIONAL DRUG CONTROL POLICY
